Appendix C: Assessment of the Strategy's contribution to the Well-being of Future Generations Act's wellbeing goals and application of the ways of working.

Wellbeing Goal	Evidence of contribution
A prosperous Wales	 Strategy designed to address adaptation to and mitigation for climate change. GI typographies which facilitate high performing efficient buildings and public realm and support a low carbon society. Strategy outcome to increase local knowledge and skills on the benefits of GI techniques and technologies. Strategy outcome to increase understanding and knowledge of how GI will improve environmental,
A resilient Wales	 Aim of the strategy is to create and maintain multifunctional GI which supports ecosystem resilience and addresses climate change. Biodiversity is one of the five principles of the strategy with a focus on native species or those with a documented value for wildlife. Strategy focuses on connectivity via the development of green artery across the Swansea Central Area and out to the Swansea Bay, Tawe Riverside and Hillside wildlife corridors. Strategy outcomes to provide practical evidence on how the Council is meeting it duties under the Environment Act. Development of the Strategy is one of the steps of the Councils Corporate Priority – to maintain and enhance Swansea's natural resources and biodiversity.
A healthier Wales	 Strategy will enable access to nature and vegetation which has numerous physical and mental health benefits. Installation of the correct type of GI can help reduce / manage air and water pollution, and the impacts of extreme weather events.
A more equal Wales	 Swansea Central Area is in Castle ward which includes some of the most deprived and vulnerable people in Wales. Castle 2 (North) is the 2nd most deprived Lower Super Output Area (LSOA) in Swansea. GI is low (13%) in the Swansea Central Area in comparison to other areas of the county and the national average. The Strategy's aim is to double this to 26% by 2030.

A Wales of cohesive communities A Wales of vibrant culture and thriving Welsh Language	 In enhancing and increasing good quality GI the Strategy is helping create attractive places in the Swansea Central Area for residents and the wider community to enjoy / use. The focus on multi-functionality to build resilience and adaptation to and mitigation for climate change contributes to community safety. Development of a green artery will improve connectivity across the city centre extending out to the Swansea Bay, Riverside and Hillside wildlife corridors / recreational spaces.
A globally responsible Wales	 The Strategy's contribution to improving ecosystem reliance, adaption to and mitigating for climate change and enhancing natural resources are part of local and global environmental improvements. The Strategy is part of the Council's delivery of it's duty to the Environment Act (Wales)
Way of	Evidence of contribution
Working	
Looking at the Long term	 Strategy aims to make immediate enhancements which will help future proof the Swansea Central Area against existing and future challenges including; Improving residents facilities, health and wellbeing, Improving visitors experience and dwell time, Future proofing for climate change, flooding, warmer hotter summers, more extreme weather events, Reducing energy costs and consumption. Strategy focus is on building environmental / ecosystem reliance. Strategic objectives are long term with short, medium and long term steps.
Taking in	The GI Strategy will have a positive impact and
integrated approach	 contribute to all of the well-being goals. The contribution will be monitored to avoid any unintended negative impacts. The Strategy contributes to the Swansea PSB's working with Nature Well-being Objective and the corporate objectives of the Council and NRW.
Involving people	 Early engagement process to inform the vison for the strategy included: 634 face to face conversations with members of the public in 10 locations around the Swansea Central Area.

	 Sessions with the 4 primary schools covering the Swansea Central Area (3 English medium 1 Welsh medium). Social media campaign on twitter. Stakeholder meeting with 6 local groups including residents groups and local interest groups and local universities. Two half day stakeholder workshops with partners across the public, private and third sector. Internal corporate session with officers and members. Draft strategy to go out to 6 week public consultation.
Callaboration	
Collaboration	Joint project between Swansea Council and
with others	Natural Resources Wales.
	 Development of Strategy is a step in the Public
	Service Board's Working with Nature Objective.
Prevention	 Strategy's aim for multi-functional GI will help address existing, and build resilience to prevent or reduce the impact of future, environmental, social, economic and cultural problems in the Swansea Central Area.
