SWANSEA BAY City Deal	Strategic Alignment	
Strategy / Policy	Core Principles	How the Project Aligns
ик		
Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of: •Bideas: the world's most innovative economy •Beople: good jobs and greater earning power for all •Infrastructure: a major upgrade to the UK's infrastructure •Business Environment: the best place to start and grow a business •Elaces: prosperous communities across the UK. The Strategy also recognises the Grand Challenges of •Artificial Intelligence and data •Ageing society •Elace growth •Euture of mobility	 Ideas – directly addresses the second and third challenges, by creating the supportive environment needed (in Box Village & Innovation Precinct) for graduates to turn idea into successful products and services and creating a local ecosystem that will support innovation and sustained growth in the technology sector. People – The project is working closely with the City Deal Skills & Talent Initiative and local employability projects to ensure local individuals have the skills needed to tak advantage of the job opportunities that will be created through the project. Infrastructure – The project will enable the right infrastructure to be put in place in Swansea to support graduate start-ups (through UWTSD's Box Village & Innovation Precinc and the growth of the technology sector. Business Environment – as outlined in the Strategy, more opportunities to operate in an environment with advice and challenge, especially from other entrepreneurial businespeople, can help businesses succeed initially and through their stages of development. The project will provide this environment for start-up and growing businesses in Swansea, combining flexible space, co-located with other similar businesses, with access to extensive support and curation through UWTSD and its wide partner network. Places –Investment in the project through the Swansea Bay City Deal will strengthen the local economy, and facilitate the growth of highly productive technology base businesses in the region.
UK Digital Strategy 2017	This strategy sets out how the UK will develop a world-leading digital economy that works for everyone. It has seven strands: •©onnectivity - building world-class digital infrastructure for the UK •Skills and inclusion - giving everyone access to the digital skills they need •The digital sectors - making the UK the best place to start and grow a digital business •The wider economy - helping every British business become a digital business •Eyberspace - making the UK the safest place in the world to live and work online •Digital government - maintaining the UK government as a world leader in serving its citizens online •The data economy - unlocking the power of data in the UK economy and improving public confidence in its use	One of the seven strands within the UK Digital Strategy focuses on "Making the UK the best place to start and grow a digital business". This includes an emphasis on supporting and growing new businesses, and growing digital clusters across the UK. The project directly responds to this, by facilitating the creation and expansion of innovative technology based businesses in Swansea Bay.
Wales		
Wellbeing of Future Generations	The Well-being of Future Generations Act requires public bodies in Wales to think about	The project delivers the goals and ways of working of the Wellbeing of Future Generations (Wales) Act 2015, particularly:
Action 2015	The wein-being of volute definerations Act requires public booles in wates to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change. There are 7 Wellbeing Goals: • a Prosperous Wales • a Resilient Wales • a More Equal Wales • a More Equal Wales • a Wales of Cohesive Communities • a Wales of Cohesive Communities • a Wales of Vibrant Culture and Thriving Welsh Language • a Globally Responsible Wales The Act also identifies 5 Ways of Working: • b Dong Term • b The gration • b Woolvement • b Collaboration • P revention	 A Prosperous Wales – supporting innovative, productive and low carbon activities, and generating wealth and employment opportunities for Swansea Bay City Regio residents; A More Equal Wales – reducing regional differences, and utilising social benefit clauses to create employment and training opportunities for workless individuals; A Wales of Cohesive Communities – revitalisation of a run-down part of the City Centre to create a new connected living and working environment, and supporting th technology based business community; A Healthier Wales – New green spaces and high quality public realm will contribute to a healthy urban environment that supports health, recreation and wellbeing.

Prosperity for All 2017	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking	The project aligns with the Welsh Government's Prosperity for All strategy, and in particular the Prosperous and Secure theme by generating new secure and sustainable

	Yr Egin Phase 1Business Case - OBC v11A June 20	
SWANSEA BAY City Deal	Strategic Alignment	
Strategy / Policy	Core Principles	How the Project Aligns
UK		•
Create Together, the UK Creative Industries Council 2016	UK Creative Industries Council 5 Year Strategy for Cross Industry Collaboration (2016) identifies 8 key drivers for growth; • Digital Infrastructure, • Finance for Growth, • Diversity, • Education and Skills, • Intellectual Property, • International, • Regions and Clusters • Regulation. Regarding Regions and Clusters, it states that with rising demand for creative services globally, it will be vital to strengthen creative economies in every region to enhance the UK's creativity, productivity and competitiveness and identifies 3 Big Wins: 1. Local infrastructure plans to incentivise growth in the creative economy, 2. Local Enterprise Partnerships (LEPs) to work with local Universities, other education providers and employers to ensure a sustainable skills pipeline for their region 3. The distinctive contribution of the creative industries to the wider economy of each region should be recognised, with improved investment flows	 The project contributes directly to these Big Wins through: 1. The City Deal proposals prioritise investment in digital infrastructure. 2. The University's objective to develop a sustainable skills pipeline, working with Carmarthenshire County Council and other providers is at the heart of the project. 3. The University's strategy is both to engage in commercial partnerships with Yr Egin occupiers and co-invest with private sector investors in the small and start-up businesses which will develop at the Yr Egin cluster. The strategy also recognises the creative industries have already proven to be powerful drivers in regenerating individual cities and neighbourhoods, raising their profile, making them more distinctive and more attractive and stimulating places for people to work and live. Yr Egin will meet these objectives creating a locally sustainable cluster delivering high value jobs and skills retention but also providing the means by which much greater commercial interaction and growth can take place with other UK creative clusters to the benefit of each.
Wales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change. There are 7 Wellbeing Goals:	Yr Egin project will help to deliver on the seven strategic goals of the Wellbeing of Future Generations Act (2015) in part by its inclusion of a major public body as the anchor occupier. The University is committed to the goals of the Act, and considers sustainable, strong performance to be one of the critical measures by which the success of the project will be judged. By relocating such a major public body to Carmarthen, the University will be helping to build a stronger, fairer economy for West Wales and will be enabling people from the region to attain better paid, more highly skilled jobs in their local area. Key to this will be the provision of courses structured around the working environment, leading to the upskilling of the local community that results in a better, fairer job market and economy. The Business Case contains a detailed appraisal of the direct contribution of the project to the Wellbeing Goals and Ways of Working.

Prosperity for All / Taking Wales Forward 2017	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking Wales Forward Programme for Government: • Prosperous and Secure • Prealthy and Active • Mealthy and Active • Monited and Connected And based around the 5 Priority Areas of: • Barly Years • Prousing • Social Care • Mental Health • Skills and Employability	Yr Egin proposal is fully aligned to Taking Wales Forward, and will support the overall Welsh Government strategy to provide more and better jobs in the creative industries. Yr Egin will assist in the practical delivery of all four strands of Taking Wales Forwards, and will ensure sustainable growth and development in both the region and Wales as a whole. ●Prosperous and Secure - An important aspect of Yr Egin is providing highly skilled, creative jobs for the local population, removing the need for these individuals to relocate out of West Wales. This will also build on the University's strategy of delivering enhanced skills and jobs to the region with the goal of reducing poverty and reducing the current levels of economic deprivation ●Bealthy and Active - The opportunities provided by the Yr Egin creative cluster will enrich jobs in the local economy and provide a dynamic environment for talent to flourish. By securing ●Thellectual and creative capital the 'halo' effect of Yr Egin will extend to positive impact on the health and well-being of the local population. ●Ambitious and Learning - Yr Egin will support this by bringing together education and industry, enabling innovation and entrepreneurship between the University and both public and private sectors. Yr Egin will also provide the capability to enhance both academic and vocational routes for learners into education, as well as providing the opportunity for significant, industry based upskilling of the local community. ●Ented and Connected - Yr Egin will deliver extensively on the strategic theme of United and Connected and will transform the way that public service delivery is undertaken by becoming wholly digital. It will also actively assist in delivering the target of achieving 95% of citizens having digital skills by 2021. Another key aspect of Yr Egin (assisted by the inclusion of S4C) will be to provide a creative and digital environment where business can be conducted in Welsh.
Tackling Poverty Action Plan	 The key objectives of our Tackling Poverty actions are: to prevent poverty, especially through investment in giving children the best possible start in life. From conception through to early adulthood, our aim will be to reduce inequality at the earliest possible stage and break the link between socio-economic disadvantage, educational under achievement and the impaired life chances that flow from these; recognising that the best route out of poverty is through employment, we will continue to help people to improve their skills and enhance the relevance of their qualifications. We will also remove other barriers to employment – from practical barriers such as the accessibility of transport and buildings to less tangible barriers such as poverty of aspiration - helping people to move on to and up the employment ladder; at the same time, we will increase action to mitigate the impact of poverty here and now. We recognise that for more and more people, even being in work will not guarantee that they can escape poverty. We can act to improve the quality of life of these communities, families and individuals. 	The University is committed to positively influencing the regions and areas in which it operates through its position as a major institution. Part of this influence is the positive actions and steps that the University can take towards making Wales a fairer society and tackling poverty in areas such as Carmarthen that have historically underperformed economically when compared to the metropolitan areas of Cardiff and Swansea (Source: ONS 2014). The University believes that this influence is best targeted by working to upskill the local population as well as by directly and indirectly providing employment. By situating a large public organisation within Carmarthen which will in turn attract many other businesses and by providing more opportunities for employment and growth, the Yr Egin project will inject a substantial economic stimulus into the Carmarthen area and will help to reduce poverty in the surrounding region.
A Living Language 2012-17	 Welsh Government's vision is to see a thriving, living Welsh language. The strategy provides the framework to achieve the WG desire to see: an increase in the number of people who both speak and use the language more opportunities to use Welsh an increase in people's confidence and fluency in the language an increase in people's awareness of the value of Welsh, both as part of our national heritage and as a useful skill in modern life the strengthening of the position of the Welsh language in our communities strong representation of the Welsh language throughout digital media. 	Yr Egin will be the catalyst for promoting and strengthening bilingualism throughout the South West Wales region and will address the priorities set out in Welsh Government strategy for the recovery of the national language. Historically it has been recognised that there are not enough opportunities for business to be conducted in Welsh and the development of both Welsh speaking and bilingual workplaces is a central element of the strategy. Yr Egin will address this by providing employment opportunities within the cluster to Welsh speakers and will develop an ethos of bilingual capability, enabling Welsh speakers to conduct business in their native language. This will be coupled with Yr Egin working with its tenants to ensure that a clear commitment to bilingualism is achieved, developing brand new entrepreneurial opportunities that take advantage of both languages. The inclusion of S4C will be critical to Yr Egin achieving this goal. By relocating the Welsh national broadcaster to Carmarthen (an area of Wales with a higher percentage of Welsh speakers), it is the vision of Yr Egin that Welsh will be seen as a comparable language to English within the cluster, driving and developing an increase in Welsh language skills within the business community and the surrounding area.

Wales Infrastructure Investment Plan	 Improving transport networks, in particular east-west links in North and South Wales. Improving telecommunications networks. Supporting the development of the energy industry in Wales. Investing in housing. Delivering more efficient and economical public services. Improving the quality of the educational estate. 	The Yr Egin project aligns with the intentions and aims of the Wales Infrastructure Investment Plan and supports its overall delivery in a variety of ways. The creative industry is highlighted as one of nine major industries, in terms of economic development, focused on through the plan. Key to this is the substantial growth in creative industries in recent years (23% between 2005 and 2009), making it one of the fastest growing industries in the UK. The Plan highlights that the support of the industry is key for improvements to GVA and to growth in Wales as a whole. Yr Egin will create precisely the environment required for the creative and digital industries to flourish. The WIIP also highlights the opportunity that clusters can provide in securing additional economic growth through increases in economic activity.
Regional	Developing our Enterprise Zones.	
Swansea Bay City Region Economic	The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy	The Region suffers from a series of overarching economic issues including low GVA, lack of well-paid job opportunities, skills shortages and
Regeneration Strategy	Maximum job creation for all Maximum job creation for all Moveledge Economy and Innovation	outward youth migration. This has been recognised within the South West Wales Economic Regeneration Strategy. Yr Egin will directly assist in resolving these issues by the creation of a creative and digital cluster taking advantage of the new infrastructure proposals of the Internet Coast. The economic stimulus that Yr Egin will deliver through the creation of high value, highly skilled jobs and the regional impact of positioning major tenants the Region will provide the springboard for the regeneration of both the local the wider area. Yr Egin will also deliver on the key objective of the City Region's strategy to substantially increase the capacity and capability of the City Region to create and distribute digital content. The clustering effect of Yr Egin will provide opportunities for local businesses, SMEs and startups to take advantage of their proximity to major broadcasters, creating the perfect environment for creative content, leading to increased and more efficient productivity, an increase in opportunity and a rise in GVA for the area as a whole.

Bargen Ddinesig	Digital Infrastructure Programme Business Case - OE	3C v3.5 November 20
SWANSEA BAY City Deal	Strategic Alignment	
Strategy / Policy	Core Principles	How the Project Aligns
ик		
Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of: • Eleas: the world's most innovative economy • Eleople: good jobs and greater earning power for all • Enfrastructure: a major upgrade to the UK's infrastructure • Business Environment: the best place to start and grow a business • Elaces: prosperous communities across the UK. The Strategy also recognises the Grand Challenges of • Artificial Intelligence and data • Ageing society • Elean growth • Ebuture of mobility	Put the UK at the forefront of the AI and data revolution - AI and Data require widespread and high capacity digital connectivity Harness the power of innovation to help meet the needs of an ageing society - Key enabler is technology that has fixed and mobile connectivity widely available and high capacity Maximise the advantages for UK industry from the global shift to clean growth - Reduction in the need to travel and the 'Smart' control of energy systems We will become a world leader in shaping the future of mobility- Mobility demands high capacity and widespread mobile communications
UK Digital Strategy 2017	This strategy sets out how the UK will develop a world-leading digital economy that works for everyone. It has seven strands: ©Connectivity - building world-class digital infrastructure for the UK •Skills and inclusion - giving everyone access to the digital skills they need •The digital sectors - making the UK the best place to start and grow a digital business •The wider economy - helping every British business become a digital business •Evberspace - making the UK the safest place in the world to live and work online •Digital government - maintaining the UK government as a world leader in serving its citizens online •The data economy - unlocking the power of data in the UK economy and improving public confidence in its use	Building World Class Digital Infrastructure, including full fibre and 5G - A central part of what Digital Infrastructure project will deliver Give everyone access to the digital skills they need - Widespread deployment and hot-spots of 5G will drive the development of skills Making the UK the best place to start and grow a digital business - Digital Infrastructure is a pre-requisite, alongside the other central SBCD projects in digital media Helping every British business become a digital business - Making high quality digital connectivity widely available is a critical enabler Maintaining the UK government as a world leader in serving its citizens online - Digital transformation requires digital infrastructure to deliver the services Unlocking the power of data in the UK economy - Data analytics is core to new digital services Fixed and mobile networks will be the enabling infrastructure that drives economic growth - The Digital Infrastructure project is based upon this Nationwide Full Fibre connectivity, there must be a sharp increase in the pace of full fibre roll out - Full Fibre is a one of the key objectives under the cost of deploying fibre networks as low as possible by addressing barriers to deployment - Part of Digital Infrastructure is the deployment of publicly owned infrastructure assets to reduce roll out costs Supporting market entry and expansion by alternative network operators - Open procurements are planned for all Digital Infrastructure

Future Telecoms Infrastructure DCMS	 Fixed and mobile networks will be the enabling infrastructure that drives economic growth Nationwide Full Fibre connectivity, there must be a sharp increase in the pace of full fibre roll out Making the cost of deploying fibre networks as low as possible by addressing barriers to deployment Supporting market entry and expansion by alternative network operators An 'outside in' approach to deployment that means gigabit capable connectivity across all areas of the UK is achieved at the same time A switchover process to increase demand for full fibre services We want the UK to have high quality mobile connectivity where people live, work and travel Alongside finishing the roll out of 4G networks to meet existing mobile demand, we want the UK to be a world leader in 5G 	 1.The Digital Infrastructure project is based upon this 2.Full Fibre is a one of the key objectives under the connected Cities element of Digital Infrastructure project 3.Part of Digital Infrastructure is the deployment of publicly owned infrastructure assets to reduce roll out costs 4.Open procurements are planned for all Digital Infrastructure 5.Rural connectivity is a key objective of Digital Infrastructure project 6.Demand and Supply simulation are both planned within Digital Infrastructure 7.Support for supply side actions and lowering build costs for 4G are included 8.Construction of 5G hot-spots is a key objective
5G Strategy for the UK	Government has a clear ambition for the UK to be a global leader in the next generation of mobile technology – 5G Digital infrastructure is a building block of the Government's modern Industrial Strategy Deliver three main outcomes: • accelerating the deployment of 5G networks • maximising the productivity and efficiency benefits to the UK from 5G • creating new opportunities for UK businesses at home and abroad, and encouraging inward investment	5G in support of specific and key projects is included Several aspects of the SBCD deal and specifically Digital Infrastructure addresses this directly Accelerating deployment through direct intervention and supporting infrastructure roll-out Projects will demonstrate productivity and efficiency gains across several sectors Availability of leading edge connectivity through Digital Infrastructure project will encourage inward investment
Digital Strategy and Leadership DCMS	Developing a local digital infrastructure strategy: • A senior digital champion to lead the process • Bringing together local teams involved in deployment of digital infrastructure • Putting in place the required skills and resources Collaborating with network providers	A central SBCD team under a single leadership is proposed Coordination of the 4 Local Authorities is proposed Development and recruitment of key skills and resources is proposed Working closely with communications Service Providers is proposed
5G Briefing Paper - UK Parliament	Gives a date of 2027 for most of the UK POPULATION to have 5G coverage Acknowledges the need for wider fibre deployments to support 5G Acknowledges the costs and commercial risks for MNOs to roll out 5G	The papers are more aspirational than concrete requirements on CSPs to roll out 5G. However, the commitments are there and engagement by the SBCD team with the intent and how these evolve into full policy and perhaps intervention funding should be kept under constant review
SRN Ofcom notice of 5G Coverage Compliance	SRN is a joint agreement with MNOs to cover the UK with 4G services, Match funded £1bn 90% of the UK Landmass must be covered 87% of Wales landmass must be covered Baselined in 2020, additional coverage must be in NotSpots	The timescales for SRN are unclear, 14 years is identified as the period this will apply, but no end date is given for the 88% or 90%+ The SBCD team would have the opportunity to examine the proposals of the MNOs for coverage in Q3/4 of 2020 and thereby lobby for changes or to be early in additional deployments
Innovate UK Industrial Challenge Fund	Next Generation services are predicated on leading edge digital infrastructure Transforming construction envisages digital design and IoT Robotics across a wide number of sectors Next Generation services for AI and embeded digital technology Leading edge healthcare, including digital technologies Driverless Cars Creative Industries clusters	Includes digital technologies as a key component which will require leading edge connectivity in fibre and 4G/5G Distributed design and IoT are all included in the project Robotics require leading edge fixed and mobile connectivity AI and analytics require leading edge fixed and mobile connectivity Healthcare requires leading edge fixed and mobile connectivity, particularly the new wave of wearable devices Autonomous vehicles need widespread 5G Creative industries are primarily digitally based and need leading edge fixed and mobile connectivity
Catapults	Various Streams, including: Digital, Energy, Future Cities, High Value Manufacturing, Offshore renewable energy and transport systems	Although these are not government entities, they are closely linked with Innovate UK and act as a delivery partner in many cases. A large number of their interest areas align directly with the Digital Infrastructure project

Wales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change. There are 7 Wellbeing Goals: • A Prosperous Wales • A Resilient Wales • A Resilient Wales • A More Equal Wales • A Healthier Wales • A Wales of Cohesive Communities • A Wales of Cohesive Communities • A Wales of Vibrant Culture and Thriving Welsh Language • A Globally Responsible Wales The Act also identifies 5 Ways of Working: • Bong Term • Bregration • Brovlovement • Collaboration • Prevention	Prosperous - Directly supports the goal through delivering innovation, low carbon, expands skills and employment to new highvalue roles Resilient - Supports economic change through digital transformation Healthier - Supports technology's part in delivering health of the nation More Equal - Supports the removal of the digital divide across all sectors Cohesive - Supports well connected communities and governments
Digital First - Welsh Government	Helping the public sector provide excellent online digital services to the people and business of Wales Seek to develop the infrastructure required to support digital service delivery Digital Transformation forms a central part of the Welsh Governments plans to make public services more meaningful to users	Delivering online services requires digital connectivity to those services, through fixed of mobile networks being supported by the project A key element of the infrastructure is the digital connectivity with the right coverage and quality, both delivered by the project Digital Transformation is enabled and driven by the availability of digital infrastructure
Delivering Digital Inclusion - Welsh Government	To ensure that everyone who wants to be online can get online, protect themselves and their friends and families online and do more online to fully benefit from the opportunities the internet and other digital technologies offer	The Digital Infrastructure project is directly focused on this vision and expands upon it to ensure everyone has network access, but also that access meets the demand of the user, including ultrafast and full fibre links and 4G/5G links
Mobile Action Plan - Welsh Government	The planning system has a key part to play in maximising mobile phone coverage across Wales The public sector in Wales has thousands of assets that could be used to site mobile telecommunications infrastructure on public land, public highway and buildings The topography and population density in Wales throws up specific challenges for mobile coverage. Extending coverage as far as possible is likely to require innovative solutions particularly in rural areas. The investment being made by the mobile industry towards regulatory targets will significantly improve mobile connectivity in Wales both in terms of voice and data. However, it is likely that there will still be areas of Wales without a usable and reliable mobile signal The Digital Infrastructure project is directly focused on this vision and expands upon it to ensure everyone has network access, but also that access meets the demand of the user, including ultrafast and full fibre links and 4G/5G links	Specific proposals are made related to a central SBCD function to support efficient planning processes Specific proposals are made related to a central SBCD function to support efficient asset management processes The use of new ways to achieve rural connectivity is included for both fixed and wireless technologies A central team is proposed for SBCD to act as a voice for the region in both investment and regulatory compliance and to work with the Emergency Service coverage requirements

	 Inclusivity: Making sure everyone can enjoy the benefits of technology is a key part Skills: We will use technology to improve teaching methods and learning. Beyond schools, we will ensure that everyone in Wales can acquire the basic skills and confidence to get online and use digital technologies. Economy: We want to drive economic growth. We will support Welsh companies to network with research departments to create and commercialise new digital technologies. We will help more Welsh companies to exploit these developments to innovate, grow and access new markets, especially in our priority sectors Public services: We will make more public and government services digital so they are easier to access S.Infrastructure: To deliver all the benefits of digital technology, we aim to ensure that all residential premises and businesses in Wales will have access to high speed broadband. We will continue to work to eliminate 'not spots' and to ensure that there is fair and equal access to higher speed broadband and to improve mobile coverage 	 Digital Infrastructure project has a key objective of the widest possible connectivity services Utilising technology for skills and education requires underpinning digital infrastructure of the highest quality as delivery moves into video and augmented reality, both considerations for the project Leading edge digital infrastructure will support inward investment and innovation directly Digital Transformation in services requires access via digital networks A fundamental aspect of the project is to ensure the widest possible coverage of both fixed and mobile communications
	This strategy outlines how we will use technology and greater access to information to help improve the health and well-being of the people of Wales. It describes a Wales where citizens have more control of their health and social care, can access their information and interact with services online as easily as they do with other public sectors or other aspects of their lives, promoting equity between those that provide and those that use our services in line with prudent healthcare and sustainable social services. 1.Information for You 2.Supporting Professionals 3. Improvement & Innovation 4.A Planned Future	Digital Infrastructure is a direct enabler of all the strategic objectives within this Digital Health and Social Care Strategy for Wales. Specifically, some of the proposed projects under the 5G and IoT actions are directly involved with health projects such as the Well Being village. Generally, an supporting the widest deployment of digital infrastructure, many of the strategic aims become easier to deliver and maintain. 1. Wider digital access directly promotes this aim 2. System integration directly is supported 3. Service change and data availability directly supported 4. Digital working directly supported
Wales	The current situation is of great concern for service users, health and care organisations, health and social care workers, and society more broadly. Health and social care services experience workforce shortages; Wales' outcomes for health and care are not improving as fast as desired; and service delivery is not consistently good. In this final report we recommend to the Welsh Government some key actions that need to be taken to do that, including: clarifying what a set of new models of care might look like; strengthening the power of citizens and users to make change; improving the local leadership and governance needed to implement change; harnessing digital, scientific, technological and infrastructure developments to underpin modernised models of care as well as unlock efficiencies; and at a national level designing the system to expedite and incentivise progress through increased transparency	Recommendations 7 – Harnessing innovation and accelerate technology and infrastructure developments is directly supported. Digital Infrastructure is a critical enabler to achieve this recommendation. Recommendation 8 - Align system design to achieve results. Transformative change happens at several levels, but digital transformation of services is a key driving force that is supported directly by the actions in this business case.
Regional		

Swansea Bay City Region Economic	By 2030, South West Wales will be a confident, ambitious & connected City Region,	Knowledge and innovation are strongly supported by digital infrastructure and digital services. The delivery of both are primary objectives
Regeneration Strategy	recognised internationally for its emerging Knowledge and Innovation economy	for the Digital Infrastructure project
	Strategic	Aim 1: Inward investment can be made more attractive by the availability of high quality digital infrastructure. Digital sector businesses
	Aim 1: Business Growth, Retention & Specialisation Strategic	tend to drive higher value jobs

		Aim 5: The project directly supports the widest access to next generation fixed and mobile broadband, including

Bargen Ddinesig	Skills and Talent Business Case - Draft OBC Aug 20		
SWANSEA BAY City Deal	Strategic Alignment		
Strategy / Policy	Core Principles	How the Project Aligns	
UK			
Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of: • Eleas: the world's most innovative economy • Eleople: good jobs and greater earning power for all • Enfrastructure: a major upgrade to the UK's infrastructure • Business Environment: the best place to start and grow a business • Eleaces: prosperous communities across the UK. The Strategy also recognises the Grand Challenges of • Artificial Intelligence and data • Ageing society • Elean growth • Eluture of mobility	The Skills and Talent Programme will develop a sustainable pipeline of individuals to support growth of the four themes and support the future competitiveness of the region. It will nurture indigenous talent through initial education and ongoing career development, while also attracting globally-competitive skills to the region through the private sector investment which ensues from the proposal as a collective. The programme will seek to utilise and maximise the potential of city region partner organisations through the existing RLSP structure and will look to develop and support strategic skills interventions around the key themes of ICT infrastructure and digital skills, Health, Energy and Smart Manufacturing.	
Wales			
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change. There are 7 Wellbeing Goals:	Prosperous - It will directly support an innovative and skilled Wales through developing new skills activity to support the development of the City Deal projects. It will allow for activity to become mainstream enhancing the current skills provision and allowing a greater number of talented individuals to enter the Welsh digital economy. It will support the development of local supply chains and new and innovative business activity through supporting skills development within the digital economy. Resilient - The programme will support the economy of the regional and Wales through the global transition that will arise from technological changes such as automation and artificial intelligence by ensuring residents are equipped with the skills required. Healthier - Skills and Talent will support individuals to participate within the digital economy and access sustainable employment which benefits mental and physical well-being. There will be direct support for the life science and well-being theme which includes Pentre Awel the 'Life Science and Well-being Village' as well as the 'Life Science Campuses' projects. Increased connectivity and the skills to utilise digital technologies will help to address issues related to isolation, loneliness and well-being. Equal - Skills and Talent will support the City Deal in its ambitions to drive through economic transformation within the region and reduce the deficit in GVA performance compared to other parts of the UK. The programme will support the progression of bilingual learners into the digital economy.	

Prosperity for All	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking Wales Forward Programme for Government: •Prosperous and Secure •Prealthy and Active •Ambitious and Learning •Dinited and Connected And based around the 5 Priority Areas of: •Early Years •Prousing •Social Care •Mental Health •Skills and Employability	The Skills and Talent programme supports the key objectives of the Welsh Government's Prosperity for All strategy specifically the Ambitious and Learning theme by creating opportunities for all to achieve skills at all levels and from all ages enabling individuals to achieve a better chance of getting a rewarding job and the ability for the region to attract inward investment to the area because of a strong skills base.
Economic Action Plan	The purpose of the Economic Action Plan is to support delivery of Prosperity for All – the national strategy for Wales. The Plan sets out a vision for inclusive growth, built on strong foundations, supercharged industries of the future and productive regions. The Plan focusses on boosting productivity and addressing inequality. The Plan presents Calls to Action on a number of areas including: •Decarbonisation •Ennovation •Eigh quality employment and skills development •Research and development	The Skills and Talent programme supports the key objectives of the Welsh Government's Prosperity for All strategy specifically the Ambitious and Learning theme by creating opportunities for all to achieve skills at all levels and from all ages enabling individuals to achieve a better chance of getting a rewarding job and the ability for the region to attract inward investment to the area because of a strong skills base.
Tackling Poverty Action Plan	 The key objectives of our Tackling Poverty actions are: to prevent poverty, especially through investment in giving children the best possible start in life. From conception through to early adulthood, our aim will be to reduce inequality at the earliest possible stage and break the link between socio-economic disadvantage, educational under achievement and the impaired life chances that flow from these; recognising that the best route out of poverty is through employment, we will continue to help people to improve their skills and enhance the relevance of their qualifications. We will also remove other barriers to employment – from practical barriers such as the accessibility of transport and buildings to less tangible barriers such as poverty of aspiration - helping people to move on to and up the employment ladder; at the same time, we will increase action to mitigate the impact of poverty here and now. We recognise that for more and more people, even being in work will not guarantee that they can escape poverty. We can act to improve the quality of life of these communities, families and individuals. 	The aim of the Skills and Talent programme is to develop the opportunities for all to achieve higher qualifications and opportunities to work in ground breaking technology through the City Deal projects and other investment opportunities that will be generated in the region. The International opportunities through the Erasmus programme and the development of opportunities for companies and students from overseas to invest, study and work in the region

Skills Implementation Plan	The skills implementation plan was developed to inform future action in relation to post-19 skills and employment policy. The aim of the plan is to provide details of the actions to be undertaken by the Welsh Government working with employers, individuals, trade unions and delivery partners. The four key themes of the Policy Statement are: • Skills for jobs and growth: how Wales can stimulate demand for a more highly-skilled society that can drive forward our economy in pursuit of jobs and growth • Skills that respond to local needs: a skills system which reflects the needs of local communities, including a streamlined and accessible employment and skills offer • Skills that employers value: the importance of engaging employers to participate in the skills system and the level of co-investment needed alongside government if Wales is to remain competitive • Skills for employment: the role of the skills system in providing employment support necessary to assist individuals into employment and to progress in work	
Schools Improvement Plan	The strategy covers post 16 education and skills via further and higher education, adult and community learning and apprenticeship and aims to deliver. The aspiration of the strategy is to have aspirational young people with opportunities across all levels of education achieve the highest levels of qualifications	The Skills and Talent programme aims to increase the number of people in the region attaining a qualification and to generate opportunities for all to attain higher qualifications to meet the needs of the City deal projects.
Youth Engagement and Progression Framework	Youth Engagement Framework The Youth Engagement and Progression Framework (YEPF) sets out a new approach to developing support for young people who are at risk of or who have become NEET. The Framework has 6 key elements: Identifying young people most at risk of disengagement; Better brokerage and co-ordination of support	The Skills and Talent programme will work with all people in society with the aspiration of raising the skills levels for all across the region. There are a high percentage of individuals who fall within the NEET category and the Skills and Talent programme will work with all employability projects, stakeholders and educational establishments to ensure that the opportunities that will be generated through the whole City Deal portfolio.
Regional		
Swansea Bay City Region Economic Regeneration Strategy	The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy and boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims: •Business Growth, Retention and Specialisation •Skilled and Ambition for long term success •Maximum job creation for all •Knowledge Economy and Innovation •Distinctive Places and Competitive Infrastructure.	The Skills and Talent programme will be instrumental in the success of all 5 key aims of the strategy and will deliver on the key skills requirements to meet the needs of the employers in the region.
Regional Employment and Skills Plan	The plan informs and support the Welsh Government's strategic approach to the delivery of employment and skills provision in conjunction with the other two Regional Skills Partnerships in Wales.	The Skills and Talent programme will utilise the work undertaken by the RLSP team includingdata being generated on the impact of Covid 19 pandemic for future skills needs.

Bargen Ddinesig	Life Science and Wellbeing Campuses Business Case - Draft OBC Dec 20		
City Deal	Strategic Alignment		
Strategy / Policy	Core Principles	How the Project Aligns	
UK			
Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of: •Beas: the world's most innovative economy •Beople: good jobs and greater earning power for all •Brfrastructure: a major upgrade to the UK's infrastructure •Business Environment: the best place to start and grow a business •Elaces: prosperous communities across the UK. The Strategy also recognises the Grand Challenges of •Artificial Intelligence and data •Ageing society •Elean growth •Euture of mobility	The ILS Campuses Strategy builds upon excellent industrial, life science and clinical research strengths. The Life Science, Wellbeing & Sport Campuses also underpin wider regional efforts to support regeneration in some of the UK's most deprived areas.	
UK Government Strategy for UK Life Sciences	Building an integrated system of industry, academia and health service. The IL Life Science, Wellbeing & Sport Campuses are underpinned by UK/local sector strengths in industrial capacity and academic research. The alignment with HE/FE and wider skills development and global investors supports delivery of skills and talent.	Embedding innovation activity within an integrated healthcare and life sciences environment will place citizens at the centre of innovation. The focus created by the ILS Campuses will provide sustainable critical mass,and underpin services to support digital inclusion.	
The Department for Culture Media and Sport's UK Digital Strategy	This strategy sets out how the UK will develop a world-leading digital economy that works for everyone. It has seven strands: •Connectivity - building world-class digital infrastructure for the UK •Skills and inclusion - giving everyone access to the digital skills they need •The digital sectors - making the UK the best place to start and grow a digital business •The wider economy - helping every British business become a digital business •Eyberspace - making the UK the safest place in the world to live and work online •Digital government - maintaining the UK government as a world leader in serving its citizens online •The data economy - unlocking the power of data in the UK economy and improving public confidence in its use	Information to be provided	
The UK Governments 5G Strategy	Government has a clear ambition for the UK to be a global leader in the next generation of mobile technology – 5G Digital infrastructure is a building block of the Government's modern Industrial Strategy Deliver three main outcomes: • accelerating the deployment of 5G networks • maximising the productivity and efficiency benefits to the UK from 5G • creating new opportunities for UK businesses at home and abroad, and encouraging inward investment	Aligned to the SBCR Digital infrastructure project, the project will harness the emerging digital capabilities inclusive of ultra-fast broadband and 5G mobile connectivity to drive technology development and innovation.	

The UK Government Building Digita UK (BDUK)	 Building Digital UK (BDUK), part of the Department for Digital, Culture, Media & Sport (DCMS) is delivering broadband networks to the UK. Current activity includes: Bivestment to provide superfast broadband coverage to as many premises as possible beyond the 95% level achieved in December 2017 Biloting a way to provide gigabit-capable broadband to the hard-to-reach places in the UK through its Rural Gigabit Connectivity programme that is currently funded through to March 2021 Stimulating private investment in gigabit-capable connections through its UK Fibre programme, currently funded through to March 2021 	Embedding innovation activity within an integrated healthcare and life sciences environment will place citizens at the centre of innovation. The focus created by the ILS Campuses will provide sustainable critical mass,and underpin services to support digital inclusion.
Wales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change. There are 7 Wellbeing Goals: • A Prosperous Wales • A Resilient Wales • A More Equal Wales • A Healthier Wales • A Wales of Cohesive Communities • A Wales of Cohesive Communities • A Wales of Vibrant Culture and Thriving Welsh Language • A Globally Responsible Wales The Act also identifies 5 Ways of Working: • Exong Term • Entegration • Envolvement • Collaboration • Prevention	The Life Science,Well-being & Sport Campuses project will be inclusive of all, creating diverse opportunities apprenticeships, jobs and continued skills development. Public and private sectors will jointly address the linked determinants of health & well-being between education, health and employment.
Prosperity for All / Tjaking Wales Forward	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking Wales Forward Programme for Government: • Prosperous and Secure • Bealthy and Active • Ambitious and Learning • Dinited and Connected And based around the 5 Priority Areas of: • Early Years • Bousing • Social Care • Mental Health • Skills and Employability	Aiming to build a Wales that is prosperous and secure, healthy and active, ambitious and learning, and united and connected. This will be delivered by securing and creating sustainable employment, shifting the approach from treatment to prevention, inspiring people to be the best they can be and building the vital links that make it easier for people to come together and for the economy to grow.
Economic Action Plan	The purpose of the Economic Action Plan is to support delivery of Prosperity for All – the national strategy for Wales. The Plan sets out a vision for inclusive growth, built on strong foundations, supercharged industries of the future and productive regions. The Plan focusses on boosting productivity and addressing inequality. The Plan presents Calls to Action on a number of areas including: •Decarbonisation •Binovation •Bigh quality employment and skills development •Research and development	The plan sets out the principles to support an economy that increases both wealth and well-being through inclusive growth and fair distribution of benefits across Wales, delivering better jobs closer to home. The Life Science, Well-being & Sport Campuses project responds to for four of the seven "Calls to Action". The Project will expand the capacity and capability to allow investment into training provision through expansion of apprenticeships, foundation, undergraduate, postgraduate training and continued professional development. The project will also enable the enhancement of vocational and innovative learning programmes and engage with employers from across the public and private sectors to ensure a true and sustainable pipeline of talent is commanded. Digital capacity and capabilities will be incorporated into all aspects of the project inclusive of skills development activities.

Parliamentary Review of Health and	• Harness innovation, and accelerate technology and infrastructure developments	This initiative will support the delivery of the quadruple aim advocated within the report. In particular, whilst supporting the delivery of al

Regional		
		The Institute of Life Science, Wellbeing & Sport is an expansion for growth in GVA and employment and will main ILS-supported levels of
Regeneration Strategy	and boost productivity for the City Region area and sets out the Strategic Framework	growth throughout the SBCR programme period, delivering 1,120 jobs (directly and indirectly) based upon Life Sciences & Well-being
	for intervention through 5 Strategic Aims Strategic Aims:	innovation across the regional cluster by 2031 (across both R&D and wider industry).
	•Business Growth, Retention and Specialisation	
	•Skilled and Ambition for long term success	The region will engage with Welsh Government and wider stakeholders to create the SBCR living lab/testbed environment. This will be
	•Maximum job creation for all	achieved through ILS and Joint Clinical Research Facility (J-CRF) engagement and activity across SBCR. During the period, the region will
	•Knowledge Economy and Innovation •Distinctive Places and Competitive Infrastructure.	utilise its RD&I assets to attract 4 significant inward investments to support balanced cluster growth and opportunity for wider UK sector.
		This would also involve realising a network of 300 cluster firms within the project period. Expanding technology and knowledge transfer activities between industry, academia and health service. This will involve development in excess of 100 new commercialisation
		opportunities during the project period, with £48m co-investment and numerous enterprise partnerships.
		opportantites during the project period, with 146m co-investment and numerous enterprise partnersings.
		In response to the Case for Change and broader Strategic Case, the Campuses Project has been developed appraising options against the
		following Critical Success Factors in pursuit of achieving the Spending Objectives:
		• To support the growth of high value employment in the sector
		• To expand the pipeline of new enterprises in the sector
		• To enhance the effectiveness of regional RD&I assets for local and UK-wider innovation
		• To enhance the region and UK sector profile by capturing major international opportunities
		• To expand the pipeline of innovation opportunities engaged and realised with SBCR RD&I assets

Regional Employment and Skills Plan	Life Science, Wellbeing & Sport Campuses will provide a pipeline of healthcare innovations benefitting communities during the development phase (locally) and from commercialisation (UK and further afield). This will provide both local economic uplift through improved health and wellbeing and subsequent productivity along with wider societal benefit and skills uplift improving education and skills is both important to our efforts to reduce poverty and to improve the city and economy, which means transforming our education system to ensure children and young people have the necessary skills for the new economy. The Life Sciences,Wellbeing & Sport project will work alongside RLSP to identify skills solutions, including bespoke training where required. An agreement will be developed with the Training Solutions group, resulting in:
A Regional Collaboration for Health (ARCH)	The Life Sciences, Wellbeing & Sport Campuses will support the health and wellbeing challenges within the region through collaborative approaches. Specifically around Skills & Workforce, Research, Enterprise & Innovation, Service Transformation and Wellbeing.

Economic Action Plan	The purpose of the Economic Action Plan is to support delivery of Prosperity for All – the national strategy for Wales. The Plan sets out a vision for inclusive growth, built on strong foundations, supercharged naduration of the future and productive regions. The Plan focuses on boosting productivity and addressing inequality. The Plan presents Calls to Action on a number of areas including: +Becarbonisation +Binovation High quality employment and skills development. +Becard and development.	The Wellbeing Village is responsive to four of the five 'Calls to Action' and all seven 'Economic Contract' principles of the Prosperity for All Economic Action Plan. The co-location of services and R&D / business acceleration infrastructure will bring to pass uniform socio-economic growth across the region, facilitated by digital connectivity (such as telecare/ telehealth), revised training and wellness pathways and business incubation capabilities. In addition, the skills and talent pipeline will be inclusive of people of all ages and abilities through entry level and specialist training. Adjacent Communities First areas will be targeted to provide aspirational opportunities that will help break the cycle of deprivation. We would make an indirect contribution to the fifth call to active as links with international companies will foster the exporting of Pis and products developed in the Village.
Wales Infrastructure Investment Plan	The Wales Infrastructure Investment Plan for Growth and Jobs sets out the Weish Government's strategic Investment priorities, provides a detailed account of sectoral Investment plans and sets out the key elements of a new approach to infrastructure Investment. The Plans Indenfitiss the following Investment priorities: • Improving transport networks, in particular east west links in North and South Wales. • Supporting the development of the energy industry in Wales. • Supporting the development of the energy industry in Wales. • Delivering more difficient and economical public services. • Improving the quality of the deuconal estate. • Delivering more difficient and economical public services. • Developing our Enterprise Zones.	The Village aligns with the strategic priorities of the Wales infrastructure investment Pina through creating a step business, rescaled and development excellence / capacity underpinned by strong public, private and thrid sector partnerships. Through interconnectivity the Village will deliver prosperity, improve service delivery and create a sustainable, moder and multidisciplinary list cence and health underfore. This will be underpinned by the creation of modern infrastructure meeting gaps in the local market for business incubation and research space, including larger premises for growing businesses: It will also provide necessary expansion space for education, skills and training in line with demand and growth projection in the health and care sectors.
Visit Wales Partnership for Growth	Increasing visitor spend by: • more well-being facilities • more all year round attractions, activities and innovative / distinctive experiences	Tourism generates over £434m of revenue to Carmarthenshire's economy annually. Under current proposais, a Wellness Hotel (with associated R&D and training utilities) and National Diving Centre would further increase the "tourism offer" of South Lianelli, enriching existing provision (adjacent Millennium Coastal Path) and supporting a more prosperous economy. Delta Lakes would become a centre for wellness tourism in the Swansea Bay City Region, a rapidly expanding sector: 14% growth rate between 2013-2015, compared to 6.5% growth in overall tourism. 5563 billion global revenue.
Social Services and Wellbeing Act 2014	Partnership working for the best possible standards of care Suitability of infrastructure and services Safeguarding of citizens • Involving people in decisions about their car	The Village will serve as a vehicle for delivering the radical change to working practices which have been called for by the Act. Integrating the communities of Lianelli in the collaborative activities will ensure that people have greater control over their care, promote independence, move care closer to people's homes and provide fit-for-purpose facilities to safeguard peoples' wellbeing across the life course. This will also include telemedicine via 'skype' consultation
Parliamentary Review of Health and Social Care in Wales	Harnes innovation, and accelerate technology and infrastructure developments A Health & Care System that's always fearning Boid new models of seamless care	The Village meets all the recommendations of the review, particularly 3, 5, 6,7 and 8 by maximising the benefits of technology and innovation to pursue the Quadruple Aim and deliver more effective and efficient care. The business incubation/scceleration units will improve system design and provide access to infrastructure for holistic product development (e.g. 3d printing for prototyping) in order to rapidly accelerate development, implementation, and evaluation of seamless care and support whilst allowing a shared space for R&D and industry to continually learn and improve

Bargen Ddinesig	Homes as Power Stations - OBC v2 Nov 19			
City Deal	Strategic Alignment			
Strategy / Policy	Core Principles	How the Project Aligns		
UK				
Industrial Strategy 2017 Climate Change Act	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of: •Iteas: the world's most innovative economy •Beople: good jobs and greater earning power for all •Itfrastructure: a major upgrade to the UK's infrastructure •Business Environment: the best place to start and grow a business •Places: prosperous communities across the UK. The Strategy also recognises the Grand Challenges of •Artificial Intelligence and data •Ageing society •Elean growth •Euture of mobility The Climate Change Act established a target for the UK to reduce its emissions by a	The HAPS project aligns well with each of these foundations, particularly 'ideas' – where the goal is to create 'the world's most innovative economy'. The HAPS project has greatest strategic fit with the 'clean growth' grand challenge, where the strategy states: • The move to cleaner economic growth – through low carbon technologies and the efficient use of resources – is one of the greatest industrial opportunities of our time.' • We will transform construction techniques to dramatically improve efficiency' • 'For the majority of [the UK's] energy to be clean and affordable, we need much more intelligent systems. Smart systems can link energy supply, storage and use, and join up power, heating and transport to increase efficiency dramatically. By developing these world-leading systems in the UK, we can cut bills while creating high-value jobs for the future.'		
	minimum of 80% from 1990 levels by 2050 with five-yearly interim targets. To note, the Welsh Government has set a more ambitious target of reducing emissions in Wales by at least 40% by 2020 from 1990 levels with a target to reduce emissions by 3% per annum, measured against a baseline of average emissions between 2006 and 2010. This includes all 'direct' greenhouse gas emissions in Wales except those from heavy industry and power generation that are covered by the EU Emissions Trading Scheme.	housing – this decarbonisation of homes will align to this policy and support delivery of emission reduction targets		
Construction Sector Deal	The Construction Sector Deal sets out an ambitious partnership between the industry and the government that aims to transform the sector's productivity through innovative technologies and a more highly skilled workforce. One of the benefits outlined in the Construction Sector Deal states 'better homes that are cheaper to run'	Direct alignment with HAPS		
Transforming Infrastructure Performance Plan	Transforming Infrastructure Performance (TIP) plan, which is the UK Government's plan to increase the effectiveness of investment in infrastructure – both economic infrastructure such as transport and energy networks, by improving productivity in the way we design, build and operate assets.	The HAPS project is a demonstration project and aligns with the Transforming Infrastructure Performance (TIP) plan, which is the UK Government's plan to increase the effectiveness of investment in infrastructure – both economic infrastructure such as transport and energy networks, by improving productivity in the way we design, build and operate assets.		

Consultation - Future Homes	This second water and second second second second for the Fortune Disease Control of the U.S.	
Standard	This consultation sets out government plans for the Future Homes Standard, including proposed options to increase the energy efficiency requirements for new homes in 2020. The Future Homes Standard will require new build homes to be future-proofed with low carbon heating and world-leading levels of energy efficiency; it will be introduced by 2025. This document is the first stage of a two-part consultation about proposed changes to the Building Regulations. It also covers the wider impacts of Part L for new homes, including changes to Part F (ventilation), its associated Approved Document guidance, airtightness and improving as-built performance of the constructed home.	The HAPS project is aligned to these proposed energy efficiency requirements.
Clean Growth Strategy	The strategy sets out proposals for decarbonising all sectors of the UK economy through the 2020s. It explains how the whole country can benefit from low carbon opportunities, while meeting national and international commitments to tackle climate change. The strategy sets out a comprehensive set of policies and proposals that aim to accelerate the pace of 'clean growth', i.e. deliver increased economic growth and decreased emissions. •Accelerating clean growth •Improving business and industry efficiency •Improving the energy efficiency of our homes •Bolling out low carbon heating •Accelerating the shift to low carbon transport •Delivering Clean, Smart, Flexible Power •Enhancing the benefits and value of our natural resources The Strategy recognises that it is only through innovation that new technologies will be developed and the cost of clean technologies come down.	Information to be provided
Ten Point Plan for a Green Industrial Revolution	The Government's Ten Point Plan lays the foundations for a Green Industrial Revolution. The Plan supports the creation of jobs and economic growth around the green economy through the following sectors and activities: • "Advancing Offshore Wind • Driving the Growth of Low Carbon Hydrogen • Delivering New and Advanced Nuclear Power • Accelerating the Shift to Zero Emission Vehicles • Sireen Public Transport, Cycling and Walking • Delivesting in Carbon Capture, Usage and Storage • Brotecting Our Natural Environment • Sireen Finance and Innovation	Point 7: Greener Buildings The HAPS project aligns with and delivers the action detailed in point 7 to improve energy efficiency of homes and replace fossil fuel heating with lower carbon, more efficient alternatives.
Powering our Net Zero Future (Energy White Paper Dec 2020)	This white paper builds on the Government's Ten Point Plan to set the energy-related measures the Plan announced in a long-term strategic vision for the energy system, consistent with net zero emissions by 2050. It establishes the goal of a shift from fossil fuels to clean energy, in power, buildings and industry, while creating jobs and growing the economy and keeping energy bills affordable. It addresses how and why our energy system needs to evolve to deliver this goal. And it provides a foundation for the detailed actions the Government will take to realise the vision.	HAPS aligns to this energy white paper as the paper presents a vision to make the transition to energy efficient homes and shifting away from gas to electricity to heat our homes.
Wales		

Wellbeing of Future Generations	The Well-being of Future Generations Act requires public bodies in Wales to think about	The Well-being of Future Generations Act aims to improve the social, economic, environmental and cultural well-being of Wales through
Action 2015	the long-term impact of their decisions, to work better with people, communities and each	seven well-being goals:
	other, and to prevent persistent problems such as poverty, health inequalities and climate	Prosperous Wales - HAPS will directly tackle fuel poverty and play a key role in driving economic growth, supporting the growth of
	change.	green jobs and skills throughout Wales and increasing the competitiveness of businesses
	There are 7 Wellbeing Goals:	2 Resilient Wales – HAPS will tackle poverty and the global threat of climate change by addressing the energy trilemma of affordability,
	•图 Prosperous Wales	sustainability and security of the energy supply and the need for decarbonisation and contributing to meeting the demand for new
	•图 Resilient Wales	houses
	•图 More Equal Wales	B Healthier Wales – provision of low carbon, energy efficient homes will have a positive effect on health and well-being and address the
	•图 Healthier Wales	health inequalities caused by poor energy efficiency
	•图 Wales of Cohesive Communities	2 More Equal Wales – HAPS will work with partners and networks to ensure that the opportunities created by the project will be available
	• Wales of Vibrant Culture and Thriving Welsh Language	and accessible to all; help reduce inequalities within society and address health inequalities caused by poor energy efficiency
	•图 Globally Responsible Wales	2 Cohesive Community - the project will contribute to meeting societal needs for efficient and healthy housing with lower energy costs
	The Act also identifies 5 Ways of Working:	2 Vibrant Culture and thriving Welsh Language – Opportunities will be taken to promote the Welsh language in the delivery of the project
	•Eong Term	B Globally Responsible Wales – the project will be developed and delivered in line with the sustainable development principles
	• Integration	highlighted by the Act. The project will also contribute to the efficient use of resources through new build and retrofit activities
	• Involvement	
	•Øollaboration	
	• Prevention	
Taking Wales Forward / Prosperity	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking	HAPS will contribute to the following priority areas of this strategy:
for All	Wales Forward Programme for Government:	Housing – the HAPS project will contribute to meeting new-build targets in Wales. There is a current shortage of energy efficient new
	Prosperous and Secure	housing in the region. HAPS will facilitate the adoption of a programme of new-build energy efficient housing, with integrated renewable
	•Bealthy and Active	energy, combined with an energy efficiency retrofit of existing stock to improve their energy efficiency will support meeting this target.
	• Ambitious and Learning	
	•Dinited and Connected	Skills and employability – through links with the Skills and Talent project, the HAPS project will ensure that people have appropriate skills
	And based around the 5 Priority Areas of:	to take advantage of available employment opportunities linked to renewable technologies in housing. The HAPS project will work with
	•Early Years	employment initiatives to ensure unemployed (long and short-term) and economically inactive individuals can access appropriate skills
	•Bousing	training to increase their employment chances.
	•Social Care	This Plan sets the foundations for Wales to transition to a low carbon nation. Cutting emissions and the moving towards a low carbon
	•Mental Health	economy bring opportunities around clean growth for business, as well as wider benefits for people and our environment. The HAPS
	•Skills and Employability	project links directly into the following policy areas of the plan:
		Policy 32 – Developing Routes to Market for Renewable Technologies - The UK also needs newer and emerging technologies to continue
		to be developed, to provide a diverse mix of generation, which can also provide economic opportunities in exporting technology and
		expertise.
		Policy 33 – Increasing local ownership of energy generation. In 2018 Welsh Government held a call for evidence on the benefits of, and
		challenges in, increasing locally-owned generation48. This demonstrated that increasing ownership of energy generation within Wales is
		likely to increase prosperity and we are now taking forward the actions indicated by the evidence. This includes developing a policy
		position on ownership of energy generation.
		Policy 36 - Market Regulation and Investment. In 2017 UK Government published the 'Upgrading our Energy System: Smart Systems and
		Flexibility' plan. This set out actions government, Ofgem and industry will take to:
		Premove barriers to smart technologies (such as storage and demand-side response);
		Benable smart homes and businesses; and improve access to energy markets for new technologies and business models.
Innovation Strategy for Wales	This Strategy seeks to promote, encourage and enable innovation across the whole	HAPS will deliver against the 5 themes of the Innovation Strategy.
	economy, with clear priorities identified and built on the acknowledged strengths of Wales.	
	The Strategy is based around action across 5 main themes:	
	improving collaboration	
	promoting a culture of innovation	
	providing flexible support and finance for innovation (in partnership with Welsh	
	Government)	
	 prioritising and creating critical mass 	
	 innovation in Government prioritising and creating critical mass 	

The Environment (Wales) Act	The Environment (Wales) Act puts in place legislation needed to plan and manage Wales' natural resources in a more proactive, sustainable and joined-up way. It seeks to position Wales as a low carbon, green economy, ready to adapt to the impact of climate change. Relevant sections of the Act are: @Part 1: Sustainable management of natural resources in a more proactive, sustainable and joined-up way @Part 2: Climate change – provides Welsh Ministers with powers to put in place statutory emission reduction targets, including at least an 80% reduction in emissions by 2050 and carbon budgeting to support their delivery. This is vital within the context of existing UK and EU obligations, sets a clear pathway for decarbonisation and provides certainty and clarity for business and investment	The HAPS project will deliver against the targets of this act and will encourage smart, energy efficient homes to become standard, which in turn deliver reduction in emissions target and decrease energy demand.
Energy Wales: A Low Carbon Transition	The Welsh Government set out its proposals for transitioning to a sustainable, low carbon economy in Energy Wales: A Low Carbon Transition, in 2012. This aims to maximise the long-term economic benefits of the transition, ensuring communities benefit from energy infrastructure developments and careful planning and management of the relationship between energy development and the natural environment. The Welsh Government committed to prioritise efforts on: •Eeadership providing a clear, consistent framework for investors, regulators and decision- makers and infrastructure, coordination and stability to make Wales a great place to do business •Maximising jobs and wider economic benefits ensuring communities derive long-term benefits •Acting now for Wales' long-term energy future supporting innovation, research, development and commercialisation in the areas that offer the greatest potential for long- term benefit Delivery proposals include: priorities for action, high level milestones and a summary of deliverables for low carbon energy, energy efficiency, energy intensive industries, marine energy, regulatory regimes, infrastructure and other areas. As of April 2017, public services in Wales should use 100% renewable electricity, 50% of which will be generated in Wales. The Programme for Government, Taking Wales Forward 2016-2021, reconfirms the commitment to emissions reductions and support for renewable energy. In a statement in December 2016, the Cabinet Secretary for Climate Change, Environment and Rural Affairs, Lesley Griffiths, outlined energy priorities for the Fifth Assembly, including: •Eeduced reliance on energy generated from fossil fuels •An actively managed transition to a low-carbon economy	The HAPS project delivers the targets of 'A Low Carbon Transition' by providing the evidence base for smart, energy efficient homes. It will also embed the industry in the region maximising jobs and long term economic development.
Green Growth Wales: Local Energy	Sets out the approach to local energy in support of the strategic energy policy. The energy system is in a period of transition – an opportunity for Wales to take control of its own energy needs. The vision is for communities and businesses to use locally generated electricity and heat, from a range of renewable installations, to supply local demand and minimise dependence on central generation: ©Creating local energy systems ©Tackling poverty for the long term ©Positioning Wales at the forefront of carbon reduction	The HAPS project will identify those developments which can be powered by local energy systems. The aim of HAPS is to demonstrate the reduction in energy demand through fabric first approach and energy efficient technologies.

Smart Living Wales	A range of emerging drivers in Wales and the UK have increased interest in how to intelligently balance, interconnect and integrate smarter solutions to assist the balancing of the energy trilemma - security, affordability and low carbon developments. The vision adopted in the Smart Living Demonstrator Framework is: "Wales has the opportunity to influence how we live with energy and resources in the future through demonstrators that will innovatively transform homes, businesses and communities providing multiple benefits for all." 'Smart Living' is a concept covering a range of policy and practical interventions that drive low carbon solutions that can deliver a range of societal benefits.	It is within this context that the HAPS project will be developed and delivered
Independent Review of Affordable Housing	Interindependent Review Parlet were established in May 2018 by the then Minister for Housing and Regeneration, and includes the following recommendations: 1.Introduction of a requirement for all new affordable homes to be near zero carbon / EPC 'A' using a fabric first approach from 2021, supplemented by technology (renewables) if required 2.Continue to support the trialling of Modern Methods of Construction (MMC) to help establish which methods can contribute to the objective of increasing the scale and pace of affordable housing provision with the existing resources available. Develop a strategy to map out how Wales could further use off-site manufacturing (OSM) and MMC to deliver near zero carbon homes along with an appropriate timetable for achieving this.	Information to be provided
Smarter Energy Future for Wales	The National Assembly for Wales Environment and Sustainability Committee recommends moving to 'near-zero' carbon emissions as the new Welsh Housing Quality standard. It also strongly advocates for local energy systems, with grid level local prioritisation for Welsh customers, based on net positive buildings and homes. The report emphasises the importance of local, sustainable, supply chains for technology development, supply and fitting, increasing Welsh resilience and delivering carbon cuts through the framework laid out in the Wellbeing of Future Generations Act. Finally, the report recommends setting up a not-for-profit, publicly owned energy company, a suggestion that has been endorsed by Ofgem.	HAPS aims to develop a regional skilled and sustainable supply chain which is aligned to the aim of this report.
Prosperity for All - A Low Carbon Wales	 Key areas of environmental improvement including industry, transport and waste Driving sustainable growth and modern infrastructure 	Information to be provided
National Development Framework	The National Development Framework for Wales addresses national priorities through the planning system, including: •®ustaining and developing a vibrant economy, •®ecarbonisation, •®eveloping resilient ecosystems, •®mproving the health and well-being of our communities.	The local authority partners will identify development areas across all sectors where the HAPS approach can be adopted.

Welsh Government emerging fuel poverty plan consultation	The Welsh Government has set out new plans to improve the energy efficiency of homes and help reduce fuel poverty further by 2035. Proposals include 10 immediate actions that are expected to have the biggest impact between now and 2023. One of the key proposals will see continuous investment to deliver home energy efficiency improvements through the Warm Homes Programme, through which £336 million of investment has been delivered since 2011. The Welsh Government also outlines it's wider goal of housing decarbonisation to fulfil its net zero obligations by 2050. The government's proposals also include domestic energy advice and support services to help people save money and reduce energy use, a plan to improve winter resilience for people struggling to meet the cost of their domestic fuel needs and to publish Welsh domestic energy data annually to help focus on communities at greatest risk of living in fuel poverty.	The HAPS project will respond to the proposed fuel poverty plan consultation and will incorporate actions and recommendations into the project during the delivery phase.
Regional		
Swansea Bay City Region Economic	The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy and	HAPS is one of nine projects and programmes prioritised to deliver the Swansea Bay City Deal 'Internet Coast' strategy, based on the
Regeneration Strategy	boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims: •Business Growth, Retention and Specialisation •Skilled and Ambition for long term success •Maximum job creation for all •Enowledge Economy and Innovation •Distinctive Places and Competitive Infrastructure.	Swansea Bay City Region Economic Regeneration Strategy 2013 – 2030. The Swansea Bay City Deal is supported by the evidence-based Swansea Bay City Region Economic Regeneration Strategy 2013 – 2030. This strategy comprises five strategic aims to deliver the ambitious vision: 'By 2030, South West Wales will be a confident, ambitious and connected City Region, recognised internationally for its emerging knowledge and innovation economy'. HAPS is aligned to each of the five strategic aims of this strategy: Business growth, retention and specialisation – supporting the creation of new industry in the region, supporting locally-based business growth and creating a sustainable supply chain Skilled and ambitious for long-term success – working closely with the Skills and Talent City Deal project to ensure the region's workforce has the appropriate skills to maximise the opportunity of HAPS BMaximising job creation for all – supporting diversification of the economy, through the creation of employment opportunities linked to the green growth economy and a sustainable indigenous supply chain BKnowledge economy and innovation – establishing the Swansea Bay City Region as a test bed for smart, low carbon, energy efficient homes and associated product development and commercialisation of innovation BDistinctive places and competitive infrastructure – providing an attractive infrastructure asset for the region

Floating wind energy is one of the decarbonised energy technologies that will be supported by Pembroke Dock Marine, the public funding will help ensure the technology reaches full maturity well in advance of the 2050 targets.		
Climate Emergency	Climate emergency declarations have been made internationally. This includes UK and Welsh Governments, and all but one of the regions covered by the Swansea Bay (Try Deal (Neath Port Tabotha has instead announced a Decarbonistion and Renewable Energy Strategy). The focus is to increase ambition to adopt more ambitious targets for reaching ne zero emissions.	Penbroke Dock Marine project provides the support structure for the growth of an industry that targets the generation of decarbonised energy and therefore aligns with climate emergency goals. Since the early drafts of the FBC, climate emergency declarations have been made internationally. This includes UK and Welsh Governments, and all but one of the regions covered by the Swansea Bay City Deai (Neath Port Tailoot has instead announced a Decarbonisation and Renewable Energy Strategy). The focus is to increase ambition to adopt more ambitious targets for reaching net zero emissions. Pembroke Dock Marine provide the support structure for the growth of an industry that targets the generation of decarbonised energy and therefore aligns with climate emergency goals.		
UK Government Marine Policy Statement	Marine renewable energy can provide employment thus creating wide and long-term benefits for both national and local economies. (2.5.3) A secure, sustainable and affordable supply of energy is of central importance to the economic and social wellbeing of the UK. (3.3.1) Marine renewable energy, particularly wave and tidal stream technologies have significant potential in the medium to long-term. (3.3.3) up to 20% of the UK's current energy demand (3.3.21) "It is important for marine planning to take account of appropriate locations for such developments".	The potential impact of inward investment in offshore wind, wave, tidal stream and tidal range energy related manufacturing and deployment activity is significant; as well as the impact of associated employment opportunities on the regeneration of local and national economies.		
Marine Strategy Framework Directive	The aim of the European Union's Marine Strategy Framework Directive (MSFD) is to protect the marine environment across Europe, where fundamental to the MSFD is the aim to achieve Good Euroronmental Status (GE) of the EUV waters by 2020. Or relevance to the marine energy industry, the MSFD seeks to address the impact of impulse underwater (anthroogenic) noise into the marine environment, which can provide adverse environmental affects to marine wildlife and habitats. Due to the high level of uncertainty about the effects of noise, the UK consultation on the MSFD has highlighted that it has not been possible to recommend a specific target for impulse noise which is believed to be equivalent to GES.	PDM will allow industry/catapult/academic led research to overcome some of these challenges by providing a test area for R&D.		
Catapults	Various Streams, Including: Digital, Energy, Future Cities, High Value Manufacturing, Offshore renewable energy and transport systems	The Offshore Benewable Energy Catapult is one of the four partners in PDM. It will establish a Catapult within the region providing a strong link into the UK's industrial Strategy, particularly the Strength in Place theme, and would aim to be a key Pembrokeshire asset, attracting further funding into the county, ensuring MEECE's sustainability.		

F		
F	The Clean Air Strategy details the Government's approach to tackle all sources of air	PDM will make a significant contribution to the UK Government's Clean Air Strategy. The proposed development specifically seeks to encourage renewable energy industries across a range of low carbon technologies, in order to reduce greenhouse gas emissions. Furthermore, it is recognised that marine energy
s		technologies have the potential to displace coal and natural gas generation on the grid and to reduce CO2 emissions permanently
	Strategy is to deliver it's objectives through the following priority actions:	
	•Becuring clean growth and innovation	
	Action to reduce emissions from transport	
	 Action to reduce emissions at home 	
	 Action to reduce emissions from farming 	
	 Action to reduce emissions from industry

Innovation Strategy for Wales	This Strategy seeks to promote, encourage and enable innovation across the whole economy, with clear priorities identified and built on the acknowledged strengths of Wales.	Innovation Wales identifies some key themes where Wales needs to improve its innovation performance, and PDM will help to define these themes as follows: - Improving collaboration PDM is itself a collaboration, and MECES where business model enterties the enterties of collaboration as a main innovation delivery mechanism.
	The Strategy is based around action across 5 main themes:	 mproving consources on the accurate a single constraint of the accurate a single constraint of the accurate and the accurate and
	improving collaboration	and, if built, PDZ's unique facilities to trial, demonstrate and validate those innovations.
	promoting a culture of innovation	• Providing flexible support and finance for innovation While MEECE will not be able to offer grants to companies, it can provide innovation support through a number of mechanisms, ranging from de minimus aid (free to the company) to fully collaborative projects where all consortium members share costs and benefits.
	 providing flexible support and finance for innovation (in partnership with Welsh 	Prioritising and creating critical mass Under this theme, Innovation Wales recommends that Welsh Government investment should be prioritised around existing or emerging capabilities. PDM meets this criterion, as it builds on proven capabilities in Pembroke Dock, proven capabilities in the development and operation of
	Government)	a world leading test facility by Wave Hub Ltd. and the previous academic expertise developed through the Low Carbon Research Institute (LCRI)
	innovation in Government	Innovation Wales identifies some key themes where Wales needs to improve its innovation performance, and PDM will help to deliver these themes as follows:
	 prioritising and creating critical mass 	• Improving collaboration PDM is itself a collaboration, and MEECE's whole business model embraces the ethos of collaboration, and indeed must embrace collaboration as a main innovation delivery mechanism.
		• Promoting a culture of innovation ORE Catapult is the UK's flagship technology innovation and research centre for advancing wind, wave and tidal energy. Through MEECE, Catapult will bring its experience in promoting and capturing innovation to Pembrokeshire and Wales, leveraging that experience by using META's
		and, if built, PDZ's unique facilities to trial, demonstrate and validate those innovations.
		• Providing flexible support and finance for innovation While MEECE will not be able to offer grants to companies, it can provide innovation support through a number of mechanisms, ranging from de minimus aid (free to the company) to fully collaborative projects where all consortium members share costs and benefits.
		Prioritising and creating critical mass Under this theme, Innovation Wales recommends that Welsh Government investment should be prioritised around existing or emerging capabilities. PDM meets this criterion, as it builds on proven capabilities in Pembroke Dock, proven capabilities in the development and operation of
		a world leading test facility by Wave Hub Ltd. and the previous academic expertise developed through the Low Carbon Research Institute (LCRI)
Energy Wales: A Low Carbon	The statement outlines the Welsh Government's ambition to transition to a low carbon	PDM will contribute strongly to the ambition to create a sustainable, low carbon economy for Wales, by supporting the development of a thriving marine energy sector in Wales.
Transition	economy and ensure that economic benefits and jobs and real community benefits continue	
	to be delivered. The commitment will ensure:	Lead the drive to develop a competitive marine energy sector in Wales. PDM will support this drive by providing essential port infrastructure, test and demonstration facilities and innovation support.
	. Engage and support businesses that help us to achieve our low carbon ambition - ensuring	• Identify strategic sites for wave and tidal stream developments and the wider actions that will be needed to support them. Morlais and PDZ have been identified as Demonstration Zones for tidal and wave respectively. PDM will be part of the 'wider actions' that support them.
	that Wales is the best possible place to do business by being responsive to the needs of	• Work with The Crown Estate and industry to bring forward a marine energy leasing round for Welsh waters as soon as possible. This has been achieved through The Crown Estate leases for Morlais and PDZ. PDM will support both Demonstration Zones.
	businesses and industry as a cornerstone of our approach.	Provide robust and timely information and guidance to the emerging marine renewable energy sector on the nature of the opportunities in Welsh waters. PDM will support the sector in realising these opportunities.
		• Work with partners to promote Wales as a centre for marine renewables. MEW and PoMH are already key partners in such promotion, and the addition of META, PDZ and MEECE will strengthen this message.
	and provide businesses with clarity and stability.	• Investigate mechanisms for advancing the deployment of marine energy arrays. The PDZ is a strategic site that has been identified for wave energy array demonstrations and leased as such by the Crown Estate. PDM will support the sector in developing their device technologies to a level where array deployments in PDZ
	Engage the UK Government to ensure that there is a credible framework for capital	become feasible. PDZ itself could enable deployment of marine energy arrays to the order of tens of megawatts.
	investment to support the transition to a low carbon economy, that the market mechanisms	
	proposed by the Electricity Market Reform are implemented with greater clarity and speed	
	and that they address current inequalities.	
	Support our vital energy intensive industries in the transition to a low carbon economy,	
	engaging the UK Government to ensure that during transition there is clarity on and mitigation for the exposure of energy intensive industries to policy costs that could	
Securing Wales Future		PDM will be globally significant, offering an opportunity to promote not only marine energy in Wales but wider commercial interests abroad. The project will continue to a thract inward investment from around the world, creating or safeguarding jobs as well as increasing inward migration of innovators and business leaders.
Securing wates ruture	identified as vital for Wales as the UK transitions away from being a member of the	For more globally again and using an opportantly or promote not winy mainet energy in well contract contract and again and an adain and and adams and adain adaptation and a solution to the well solu
	European Union. The document underpins the negotiating position Wales needs to have in	
	place to ensure the country maintains its economic performance in the wake of BREXIT. The	
	project demonstrates good alignment with the rationale behind Wales' position as set out in	
	this document, which is summarised below. Wales is a world-facing nation with the majority	
	of its border comprising of coastline. Marine based transport offers the most cost effective	
	and environmentally friendly method of moving goods from Wales to global markets both	
	within the EU and outside. Investments in Port areas such as those proposed by PDM to	
	support green growth initiatives will improve the economic attractiveness of businesses	
	locating themselves in Wales and support them to grow to meet the needs of a global	
	marine energy prize worth an estimated £76bn by 2050 with a sustainable floating offshore	
	wind sector adding and additional £10bn per year	
Energy Policy Statement: A Low	The Policy Statement outlines the Welsh Governments Main Actions in the drive towards	Pembroke Dock Marine directly encourages the establishment of new renewable energy industries that will reduce greenhouse gas emissions and promote sustainable economic growth.
Carbon Revolution	energy efficiency and low carbon energy. These Actions are:	
	 Action on energy efficiency and small scale renewables 	
	•Action to produce low carbon electricity on a large scale	
	Eow carbon renewables	
	 Marine: offshore wind, tidal range, tidal stream and wave energy Onshore wind 	
	- Unshore wind - Hydropower and geothermal schemes	
	- Bioenergy/Waste	
	•Eow carbon nuclear power	
	Eow carbon large scale fossil fuel power generation with carbon capture and storage (CCS)	
	Service and storage (ccs)	
Economic Prioritisation Framework	k The EPF recognises that EU funds are only one piece of the overall investment jigsaw across	
	Wales and it points the way to joining up the pieces. In doing so, it assists both WEFO and	development built around displacement - these are new facilities that will ad to the current UK marine energy proposition and allow the industry to benefit for gains in innovation and operational efficiencies.
	potential beneficiaries in determining how to target the activities set out within the Welsh	The new industrial growth will be supported by Pembrokeshire's extensive engineering supply chain. Originally grown around the oil and gas industry, the supply chain has been increasingly pressured with refinery closures. PDM will support supply chain resilience and, in doing so, will ensure a robust and reliable supply
	Operational Programmes/ programming documents. The EPF will help identify the	chain continues to be available for Valero. It will create high skill, year-round jobs for both the current and future employment markets. Marine energy specifically has significant focus on the STEM skill base. Beyond the dedicated marine energy jobs, a wider cross-section of skills will be created in the supporting supply
	opportunities and investments in a geographical or specific thematic area. Operations	chain. Pembroke Dock Marine has two key aims – to enhance operational efficiency (driving industrial costs down) and enhanced innovation. The creation of MEECE will focus on increasing collaboration to support innovation and ultimately creating Pembrokeshire based intellectual property.
	seeking EU funding support will be expected to describe how they can contribute to, interact	
	with or complement relevant opportunities or investments in ways which can add value and	
	provide wider benefits. It details the programmes and initiatives being developed and	
	delivered in the South West Wales area.	

Wales National Marine Plan	The Plan has an overarching aim to support the sustainable development of the Welsh	PDM will assist in achieving the objectives of the Marine Plan by providing pre-consented test areas for marine energy device testing in close proximity to the Strategic Resource Areas.
	marine area by contributing across Wales' well-being goals, supporting the Sustainable	
	Management of Natural Resources (SMNR) through decision making and by taking account	
	of the cumulative effects of all uses of the marine environment.	
	Objectives:	
	·Contribute to a thriving Welsh economy by encouraging economically productive activities	
	and profitable and sustainable businesses that create long term employment at all skill	
	levels.	
	•Support the opportunity to sustainably develop marine renewable energy resources with	
	the right development in the right place, helping to achieve the UK's energy security and	
	carbon reduction objectives, whilst fully considering other's interests, and ecosystem resilience	
	 Provide space to support existing and future economic activity through managing multiple 	
	 Provide space to support existing and tuture economic activity through managing multiple uses, encouraging the coexistence of compatible activities, the mitigation of conflicts 	
	between users and, where possible, by reducing the displacement of existing activities.	
	 Becognise the significant value of coastal tourism and recreation to the Welsh economy and 	
	well-being and ensure such activity and potential for future growth are appropriately	а
	safeguarded. Ensuring a strong, healthy and just society	
	 Contribute to supporting the development of vibrant, more equitable, culturally and 	
	linguistically distinct, cohesive and resilient coastal communities.	
	•Support enjoyment and stewardship of our coasts and seas and their resources by	
	encouraging equitable and safe access to a resilient marine environment, whilst protecting	
	and promoting valuable landscapes, seascapes and historic assets.	
	Improve understanding and enable action supporting climate change adaptation and	
	mitigation. Living within environmental limits	
	•Support the achievement and maintenance of Good Environmental Status (GES) and Good	
	Ecological Status (GeS).	
	Protect, conserve, restore and enhance marine biodiversity to halt and reverse its decline Innovation Wales identifies some key themes where Wales needs to improve its innovation performance	
Innovation Wales	innovation wales identifies some key themes where wales needs to improve its innovation performance	Improving collaboration: PDM is itself a collaboration, and IMEECE's whole business model embraces the ethos of collaboration, and indeed must embrace collaboration as a main innovation delivery mechanism.
		Promoting a culture of innovation: DRE Cataput is the URS's flagship technology innovation and research centre for advancing wind, wave and tidal energy. Through MEECE, Cataput will bring its experience in promoting and capturing innovation to Pembrokeshire and Wales, leveraging that experience by using META's and, if built, PDS's undura facilities to trial demonstrate and wallade those innovations.

ИК		·	
Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of: • Biteas: the world's most innovative economy • Beople: good jobs and greater earning power for all • Birfrastructure: a major upgrade to the UK's infrastructure • Business Environment: the best place to start and grow a business • Places: prosperous communities across the UK. The Strategy also recognises the Grand Challenges of • Birtificial Intelligence and data • Bigeing society • Clean growth • Puture of mobility	 Enhance competitiveness of regional economy by creating a knowledge ecosystem with suitable infrastructure to drive growth Innovation in decarbonisation, energy generation and use, construction techniques and air quality improvement Strengthen regional economic base through supporting critical industries, while diversifying and developing supplementary industries treduce reliance on existing manufacturing base Use of hydrogen as a clean fuel will accelerate the growth of the green economy Increasing productivity and helping to close the GVA gap between the region and the rest of Wales and between Wales and the rest of the UK Providing capacity for innovation to support regional and UK industrial base Encouraging creation of new businesses to capitalize on the research and development in the region Improving the retention and attraction of University graduates and academics within the area Working with partners across the UK, developing a knowledge economy in the region Highly complementary to projects already funded such as the Cardiff University Flexis project, further enhancing innovation and industrial collaboration across the region 	
Climate Change Act	The UK's emissions targets were revised in 2019 to be net zero greenhouse gases by 2050. The Committee on Climate Change's 2018 progress report to Parliament, Reducing UK Emissions, outlined four messages to Government to get emissions reductions on track. It identified the need to 'Act now to keep long-term actions open' and specifically referenced floating wind a type of emerging technology that could offer cost reduced low carbon energy generation. This will be a critical step in ensuring the need is met for a diverse portfolio of low carbon technology that will meet the increasing electricity demands towards 2050 as stated in the report.	The Climate Change Act is the basis for the UK's approach to committing the Government to reduce emissions by at least 80% of 1990 levels by 2050, with 5 yearly interim targets. The SILCG is aligned to this Act by transitioning to a low carbon economy.	
Clean Air Strategy	The Clean Air Strategy details the Government's approach to tackle all sources of air pollution, making air healthier to breathe, protecting nature and boosting the economy. The Strategy is to deliver it's objectives through the following priority actions: •Securing clean growth and innovation •Action to reduce emissions from transport •Action to reduce emissions at home •Action to reduce emissions from farming •Action to reduce emissions from industry •Eeadership at all levels	The DEFRA Clean Air Strategy sets out the comprehensive actions required across all parts of government and society to improve air quality. The SILCG programme is aligned to this strategy as it will support reduction in emissions from industry and transport and monitor air quality.	

Clean Growth Strategy	The strategy sets out proposals for decarbonising all sectors of the UK economy through the 2020s. It explains how the whole country can benefit from low carbon opportunities, while meeting national and international commitments to tackle climate change. The strategy sets out a comprehensive set of policies and proposals that aim to accelerate the pace of 'clean growth', i.e. deliver increased economic growth and decreased emissions. •Accelerating clean growth •Biproving business and industry efficiency •Biproving the energy efficiency of our homes •Bolling out low carbon heating •Accelerating the shift to low carbon transport •Delivering Clean, Smart, Flexible Power •Einhancing the benefits and value of our natural resources The Strategy recognises that it is only through innovation that new	SILCG is aligned to the aim of clean growth i.e. economic growth while reducing greenhouse gases. @decarbonising all sectors of the UK economy through the 2020s •IEhe SILCG will support low carbon industries •IEhe SILCG will support the BEIS ambition to accelerate the commercialisation of clean energy technologies and investment in smart energy systems.
Clean Air Plan for Wales Consultation	technologies will be developed and the cost of clean technologies come down.The aim of the Clean Air Plan for Wales is to improve air quality and reduce theimpacts of air pollution on human health, biodiversity, the natural environmentand the economy. This Plan supports delivery of commitments underProsperity for All: our national strategy. In particular, 'reducing emissions anddelivering vital improvements in air quality' to support 'healthier communitiesand better environments'.This Plan sets out a 10-year pathway to achieving cleaner air. The Plan isstructured around four core themes, with actions to enable collaborativeapproaches to reducing air pollution.• People: Protecting the health and well-being of current and futuregenerations• Environment: Taking action to support our natural environment, ecosystemsand biodiversity• Prosperity: Working with industry to reduce emissions, supporting a cleanerand more prosperous Wales• Place: Creating sustainable places through better planning, infrastructure and	 Clean air is essential for good health – this programme will enhance monitoring to better understand how and where impacts on air quality are made Focus on identifying sources of PM10s and hence identify corrective actions
Commercial Property: Market Analysis and Potential Interventions	To inform the new Property Delivery Plan, the report sets out an analysis of the Welsh commercial property market, including current and likely demand, property market responses and the extent to which there is a gap in supply. It also considers potential priorities for, and approaches to, intervention. In line with the Welsh Government's regional approach to economic development, it outlines the priorities for intervention within South East Wales, South West and Mid Wales and North Wales. The report contains an analysis of the property market for South West and Mid Wales.	 Supports intervention through creation of 900,000 sq ft of new space over a rolling three-year period, providing premises in a new way Creation of this space will support indigenous business and encourage inward investment through delivering a modern, attractive and suitable infrastructure for innovative development

Ten Point Plan for a Green Industrial Revolution	The Government's Ten Point Plan lays the foundations for a Green Industrial Revolution. The Plan supports the creation of jobs and economic growth around the green economy through the following sectors and activities: •Advancing Offshore Wind •Driving the Growth of Low Carbon Hydrogen •Delivering New and Advanced Nuclear Power •Accelerating the Shift to Zero Emission Vehicles •Sreen Public Transport, Cycling and Walking •Bret Zero and Green Ships •Breener Buildings •Bresting in Carbon Capture, Usage and Storage •Protecting Our Natural Environment •Sreen Finance and Innovation	SILCG programme is aligned to the aim to 'build back better: to invest in making the UK a global leader in green technologies. •SILCG will stimulate the growth of low carbon hydrogen •SILCG will support the ambition to the shift to zero emission vehicles •SILCG will construct greener buildings •SILCG will support green innovation •Bort Talbot is identified in the plan as one of the places in the UK pioneering the decarbonisation of transport industry and power
Road to Zero	•Transition to zero emission road transport. •Reduction in emissions from conventional vehicles	 The Road to Zero Strategy outlines the mission to put the UK at the forefront of the design and manufacture of zero emission vehicles. The target is for all new cars and vans to be zero emission by 2040. It also aims to reduce emissions from conventional vehicles during the transition. The SILCG programme aligns to this as it will develop a regional LEV strategy and coordinate funding opportunities / charging points activity to increase the number of charge points in the region. The strategy states that the UK is well placed to be a global leader in hydrogen and fuel cell powered transportation which aligns to the SILCG programme
Wales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change. There are 7 Wellbeing Goals: Improvement Wales Improvement Improvement Collaboration Improvement Im	 Providing high quality jobs and training opportunities, which will lead to improved health, stronger community cohesion and a more vibrant culture Creating a culture of innovation in the SBCR and diversifying the economic base of the area, through sustainable development aligned to global needs Anticipated spin-out companies will stimulate further private and public investment in the region Safeguarding of existing, highly-skilled and well-paid jobs Creating an attractive region to live and do business in, with opportunities available to all

Prosperity for All	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes	Creating high-value jobs leading to national prosperity
	of Taking Wales Forward Programme for Government:	•Encourage a robust talent pipeline, benefitting the region through higher wages and lower levels of underemployment
	• Prosperous and Secure	Provides a focus for inward investment together with indigenous innovation
	● ■ealthy and Active	Providing the right environment for businesses to thrive
	•Ambitious and Learning	• The project will house state of the art research equipment and will attract top-class talent to the area levering collaboration across the
	•Dinited and Connected	globe
	And based around the 5 Priority Areas of:	Delivering wider benefits to the regional community
	•Early Years	
	• Pousing	
	•Social Care	
	•Mental Health	
	•Skills and Employability	
Economic Action Plan	The purpose of the Economic Action Plan is to support delivery of Prosperity for	
	All – the national strategy for Wales. The Plan sets out a vision for inclusive	Accelerating low-cost energy generation
	growth, built on strong foundations, supercharged industries of the future and	 Investment in human capital, infrastructure and innovation to address productivity gap
	productive regions. The Plan focusses on boosting productivity and addressing	• A locus of innovation and research in the Neath Port Talbot region will strengthen the existing local economy and create new sustainable
	inequality. The Plan presents Calls to Action on a number of areas including:	opportunities
	•Decarbonisation	Creating quality jobs and delivering industrially relevant training in future-focused technologies and applications will support people-
	•Innovation	driven economic growth
	 Bigh quality employment and skills development 	Enabling public investment with social purpose, delivering increased value
	Besearch and development	 Supporting public sector to become exemplar and drive green growth
Welsh Government Innovation	This Strategy seeks to promote, encourage and enable innovation across the	Leading the way through public sector exemplar investment in a cohesive low carbon strategy for the region
Wales	whole economy, with clear priorities identified and built on the acknowledged	Improved opportunities for supply chain productivity
	strengths of Wales. The Strategy is based around action across 5 main themes:	 Innovation in decarbonisation will lead to growth of new company clusters in recycling technology, the circular economy, component
	• improving collaboration	manufacture and modular construction
	• promoting a culture of innovation	• It will also increase the research capacity and capability for the region, paving the way for future growth in other sectors
	• providing flexible support and finance for innovation (in partnership with	
	Welsh Government)	
	innovation in Government	
	prioritising and creating critical mass	
The Environment (Wales) Act	The Environment (Wales) Act puts in place legislation needed to plan and	Contribute to emissions reduction by creating solutions for commercialisation that will allow a range of manufacturing sectors to
	manage Wales' natural resources in a more proactive, sustainable and joined-	decarbonise
	up way. It seeks to position Wales as a low carbon, green economy, ready to	Promote use of renewable energy sources
	adapt to the impact of climate change.	• Develop energy positive construction technologies to reduce emissions from buildings, providing demonstrators to a wider audience
	Relevant sections of the Act are:	
	Part 1: Sustainable management of natural resources in a more proactive,	
	sustainable and joined-up way	
	Part 2: Climate change – provides Welsh Ministers with powers to put in place	
	statutory emission reduction targets, including at least an 80% reduction in	
	emissions by 2050 and carbon budgeting to support their delivery. This is vital	
	within the context of existing UK and EU obligations, sets a clear pathway for	
	decarbonisation and provides certainty and clarity for business and investment	
Prosperity for All - A Low Carbon	Key areas of environmental improvement including industry, transport and	Creating high value jobs and innovation in clean growth will support the vision of establishing Wales as one of the best places in the
Wales	waste	world to live, work and do business
	Driving sustainable growth and modern infrastructure	• Deliver research, infrastructure and solutions that are essential to delivering the rapid change needed to hit ambitious targets
		Opportunities to use active building (i.e. energy generating) technologies to pilot a modern construction sector
		• Efficient use of resources and reuse of brownfield sites

A Manufacturing Future for Wales: a framework for action	Consultation document on the Welsh Government's proposals for the future of the manufacturing industry in Wales. The document outlines the proposed approach which: •@ncourages greater innovation and headquarter location across Wales •@rows our export potential •mcreases quality employment and skills across Wales •@xpands the research and development base across Wales	 Directly support the plans for clean, green growth with focus on decarbonisation and waste utilisation – setting the foundations for a circular economy in a regional eco-system that synergizes benefits and growth The cluster expertise in the area will create an ideal location to deliver green innovation through innovators, supply chain, infrastructur and manufacturers across a range of sectors Academic and industrial partnership will offer opportunities to develop specialist learning and training to ensure a long-term talent pipeline aimed at attractive, high-quality career opportunities with longevity and resilience
Clean Air Plan for Wales Consultation	Improve air quality for health, nature & prosperity	The plan aims to improve air quality through air quality modelling and real time monitoring to ensure there is a targeted approach. The SILCG is aligned in the following way: • The programme will enhance monitoring to better understand how and where impacts on air quality are made; • Eocus on identifying sources of PM10s and hence identify corrective actions
Electric Vehicle (EV) charging strategy for Wales (consultation)	Draft strategy for EV charging in Wales •Eurrent charging provision in Wales for cars & vans •Euture charging needs	The SILCG is aligned in the following way: •Coordinated approach for the region •Mapping current situation, behaviour and future demand in relation to low emission vehicles •Aligned to the Wales strategy
Regional Investment for Wales (RIFW)	 4 investment priority areas: ●Business productivity & competitiveness ●Eealthier, fairer and more sustainable communities ●Zero carbon economy ●Beducing economic inequalities 	The SILCG is aligned in the following way: •©reating the right environment for sustainable and inclusive jobs and growth •©pportunities to grow and strengthen productivity and competitiveness of SMEs in green industrial revolution •©pportunities for research and innovation in collaboration with government, industry and academia. •Economic growth and decarbonisation
Regional		
Swansea Bay City Region Economic Regeneration Strategy	The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy and boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims: •Business Growth, Retention and Specialisation •Skilled and Ambition for long term success •Maximum job creation for all •Enowledge Economy and Innovation •Distinctive Places and Competitive Infrastructure.	 Supporting indigenous industries which are economically critical in terms of GVA and employment Creating the physical and knowledge-based infrastructure to foster and encourage innovative start-ups, providing support to ensure retention and growth of new businesses In particular, support early-stage knowledge-intensive firms through incubation and innovation stages Creating highly skilled and well-paid jobs, developing skills to maximise employment in growth sectors Removing barriers to employment Supporting business as a regional gateway, increasing entrepreneurial culture Through specialised training solutions, deliver a talent pipeline for high-growth sectors Support the 'internet coast' through next-generation digital infrastructure, creating future energy systems, integrating renewable ener with existing asset base and delivering leading-edge research Contribute to the key themes: -embeddedness - existing base of trained labour -relatedness - diversifying existing strengths in the area via the metals industry -connectedness - already established network of steel and metals companies in the area

Regional Economic Framework	Consultation document for the Regional delivery of the Economic Acton Plan	The SILCG programme is aligned in the following way:
	for Mid and South West Wales. The approach the Regional economic growth is	• Addressing the areas of weaknesses / threats – will increase productivity, create employment opportunities, provision of low carbon high
	the four broad priority areas agreed by Welsh Government Cabinet for	quality business infrastructure
	replacement EU funds, but will also reflect additional regional priorities:	 Build on the strengths of sectoral strengths in energy, advanced manufacturing and innovation centres.
	• Reducing income inequalities for people, analysing the factors that create	• The SILCG programme is aligned to the SBCR Regional Delivery Plan as this action plan will focus on diversification, energy and renewables
	income inequality and reduce disposable and discretional income	sectors.
	More productive and competitive businesses, including the vital role of	
	innovation and research as well as alternative business models	
	The transition to a zero carbon economy, taking advantage of the	
	opportunities this creates as well as reducing negative effects	
	• Healthier and more sustainable communities, recognising different challenges	
	in different communities and the role of local areas in identifying priorities in	
	their places.
