Q3 What involvement has taken place/will you undertake e.g. engagement/consultation/co-productive approaches? Please provide details below – either of your activities or your reasons for not undertaking involvement

The EV chargepoints installed to-date have implemented under permitted development on council owned land. All EV chargepoints are signposted and available for use by the general public. Two dedicated PRM EV charging bays have been created in the new Copr Bay South car park.

Any future schemes for delivery would include consultation as required.

Q4 Have you considered the Well-being of Future Generations Act (Wales) 2015 in the development of this initiative:

- a) Overall does the initiative support our Corporate Plan’s Well-being Objectives when considered together?
 Yes No
- b) Does the initiative consider maximising contribution to each of the seven national well-being goals?
 Yes No
- c) Does the initiative apply each of the five ways of working?
 Yes No
- d) Does the initiative meet the needs of the present without compromising the ability of future generations to meet their own needs?
 Yes No

Q5 What is the potential risk of the initiative? (Consider the following impacts – equality, socio-economic, environmental, cultural, legal, financial, political, media, public perception etc...)

High risk

Medium risk

Low risk

Q6 Will this initiative have an impact (however minor) on any other Council service?

Yes No If yes, please provide details below

The scheme has resulted in additional assets within car parks which are monitored and enforced by Civil Enforcement Officers who patrol the car parks against their misuse.

Q7 What is the cumulative impact of this proposal on people and/or communities when considering all the impacts identified within the screening and any other key decisions affecting similar groups/ service users made by the organisation?

Integrated Impact Assessment Screening Form

(You may need to discuss this with your Service Head or Cabinet Member to consider more widely if this proposal will affect certain groups/ communities more adversely because of other decisions the organisation is making. For example, financial impact/poverty, withdrawal of multiple services and whether this is disadvantaging the same groups, e.g., disabled people, older people, single parents (who are mainly women), etc.)

The cumulative impact of these schemes has provided a strategic and local network of electric vehicle chargepoints for people living, working and visiting the City and County of Swansea. This network has / will support those needing to charge an EV, building confidence in availability of charging infrastructure to support the transition to a sustainable transport system, and net zero Swansea by 2050.

Outcome of Screening

Q8 Please describe the outcome of your screening below:

- **Summary of impacts identified and mitigation needed (Q2)**
- **Summary of involvement (Q3)**
- **WFG considerations (Q4)**
- **Any risks identified (Q5)**
- **Cumulative impact (Q7)**

These transport infrastructure schemes will serve to improve public amenity, connectivity and access for all, and will be the subject of consultation as appropriate.

For schemes which are proposed to be developed in future, consultation will be undertaken if schemes are approved by Welsh Government or any other funding body, and individual projects will consider their equality impacts more fully at the appropriate design stages when they will be screened in their own right.

The Well-being of Future Generations Act (Wales) 2015 has been considered in the development of these schemes. These initiatives support our Corporate Plan's Well-being Objectives, will contribute towards the seven national wellbeing goals, applying the five ways of working and meeting the needs of the present without compromising the ability of future generations to meet their own needs.

These schemes will be highly visible to the public and are considered to pose a medium risk to the Council. The cumulative impact of these schemes will be positive for people living near to chargepoints or for those travelling to the communities in which they are located. They will improve public access to EV charging and enhance charging capabilities for communities, making more sustainable modes of transport a realistic option when choosing a vehicle for their transport needs.
