- Decisions that affect the ability (including external partners) to offer Welsh language opportunities and services

(b) Please name and fully describe initiative here:

The use of reusable containers for recycling

The Council currently provides a mixture of single use and reusable containers to collect recycling at the kerbside. A briefing note is being submitted to the Climate Change and Nature Recovery STC to consider their views on replacing single use recycling containers with reusable containers for certain recycling streams.

Similar to the previous switch to reusable bags for kerbside plastic waste, consideration would be given to ensuring appropriately sized and lightweight containers are provided to residents that produce small volumes of recycling, or have difficulty handling the standard sized containers. This proposal will have negligible impact on residents using the existing assisted collection service. Any changed reusable containers will still be provided to the public without charge.

The majority of Councils in Wales have already switched to reusable containers for recycling in line with the Welsh Government blueprint.

Q3 What involvement has taken place/will you undertake e.g. engagement/consultation/co-productive approaches? Please provide details below – either of your activities or your reasons for not undertaking involvement

Engagement has been undertaken with the Waste Leadership Team and Waste Collection supervision team. Engagement will also be run with focus groups from the Waste Collections workforce. Engagement will also be undertaken with the Trade Unions, STC and elected Members prior to considering whether public consultation is appropriate.

Q4 Have you considered the Well-being of Future Generations Act (Wales) 2015 in the development of this initiative:

- a) Overall does the initiative support our Corporate Plan’s Well-being Objectives when considered together?
 Yes No
- b) Does the initiative consider maximising contribution to each of the seven national well-being goals?
 Yes No
- c) Does the initiative apply each of the five ways of working?
 Yes No
- d) Does the initiative meet the needs of the present without compromising the ability of future generations to meet their own needs?
 Yes No

Q5 What is the potential risk of the initiative? (Consider the following impacts – equality, socio-economic, environmental, cultural, legal, financial, political, media, public perception etc...)

High risk

Medium risk

Low risk

Waste is a potentially emotive issue, therefore any scheme could potentially attract public criticism. However, a switch to reusable containers would be expected to be viewed as overwhelmingly positive.

Q6 Will this initiative have an impact (however minor) on any other Council service?

- Yes No If yes, please provide details below

Integrated Impact Assessment Screening Form – Appendix A

Street Cleansing teams will be impacted by their ability to collect/empty incorrectly used reusable containers. This potential issue already exists for the reusable plastic bag, so Cleansing will be able to readily adapt to other reusable containers.

Q7 What is the cumulative impact of this proposal on people and/or communities when considering all the impacts identified within the screening and any other key decisions affecting similar groups/ service users made by the organisation?

(You may need to discuss this with your Service Head or Cabinet Member to consider more widely if this proposal will affect certain groups/ communities more adversely because of other decisions the organisation is making. For example, financial impact/poverty, withdrawal of multiple services and whether this is disadvantaging the same groups, e.g., disabled people, older people, single parents (who are mainly women), etc.)

The switch to reusable containers for selected waste streams will help meet the Council's aim to reduce single use plastic wherever possible. Consideration has been/will be given to the needs of both residents and collection operatives to ensure containers are appropriate for householders and safe for employees. The proposal will not impact the resident's ability to recycle and will not pass on costs to residents.

Outcome of Screening

Q8 Please describe the outcome of your screening below:

- **Summary of impacts identified and mitigation needed (Q2)**
- **Summary of involvement (Q3)**
- **WFG considerations (Q4)**
- **Any risks identified (Q5)**
- **Cumulative impact (Q7)**

This is a low risk proposal which is likely to be seen as a positive change by the majority of the public. The proposal will consider the safety of operational staff, and adapt to the minority of the public that could potentially be negatively impacted by a "standard" service. Similar containers are already successfully used in Swansea for the kerbside plastic waste stream, so positive outcomes would also be expected for the switch to reusable containers on other waste streams.
