Integrated Impact Assessment Screening Form – Appendix A

**Q3 What involvement has taken place/will you undertake e.g. engagement/consultation/co-productive approaches?
Please provide details below – either of your activities or your reasons for not undertaking involvement**

No involvement has taken place at this point in the project as only 5-10 small access points are being deployed initially and falls within permitted development. This IIA screening will be kept under review following the initial deployment.

Q4 Have you considered the Well-being of Future Generations Act (Wales) 2015 in the development of this initiative:

- a) Overall does the initiative support our Corporate Plan's Well-being Objectives when considered together?
Yes No
- b) Does the initiative consider maximising contribution to each of the seven national well-being goals?
Yes No
- c) Does the initiative apply each of the five ways of working?
Yes No
- d) Does the initiative meet the needs of the present without compromising the ability of future generations to meet their own needs?
Yes No

Benefits to the city include:

- Mobile coverage and capacity: Much improved mobile phone signal enabling more people to use the network during busy periods within the city centre.
- Innovation & Growth: Small access points will be futureproofed, supporting the increasing demand for data and connectivity. It will support higher data speeds, improved network reliability, and the ability to support numerous connected devices simultaneously. This will support innovation and in turn growth within Swansea

Q5 What is the potential risk of the initiative? (Consider the following impacts – equality, socio-economic, environmental, cultural, legal, financial, political, media, public perception etc...)

High risk

Medium risk

Low risk

The project is assessed as medium risk due to the risks around public perception as some people are always concerned about mobile technology.

Q6 Will this initiative have an impact (however minor) on any other Council service?

Yes

No

If yes, please provide details below

This project will include the support of Highways and Planning. This is already being addressed through the establishment of a 'Barrier Busting Group'. This group is establishing a process to ensure the deployment of digital infrastructure causes minimum disruption.

Q7 What is the cumulative impact of this proposal on people and/or communities when considering all the impacts identified within the screening and any other key decisions affecting similar groups/ service users made by the organisation?

Integrated Impact Assessment Screening Form – Appendix A

(You may need to discuss this with your Service Head or Cabinet Member to consider more widely if this proposal will affect certain groups/ communities more adversely because of other decisions the organisation is making. For example, financial impact/poverty, withdrawal of multiple services and whether this is disadvantaging the same groups, e.g., disabled people, older people, single parents (who are mainly women), etc.)

This project will bring significant advantages as it will address the issues of congestion across networks. However, public perception is important, and some people are always concerned about mobile technology. The project will seek to be open and transparent, starting with a small number of cells and evaluating before expanding further.

Outcome of Screening

Q8 Please describe the outcome of your screening below:

- **Summary of impacts identified and mitigation needed (Q2)**
- **Summary of involvement (Q3)**
- **WFG considerations (Q4)**
- **Any risks identified (Q5)**
- **Cumulative impact (Q7)**

The summary of impacts has been categorised as having a medium positive impact. This project will bring significant advantages as it will address the issues of congestion across networks. However, public perception is important, and some people are always concerned about mobile technology. The project will seek to be open and transparent, starting with a small number of access points and evaluating before expanding further. It is proposed that expansion of the infrastructure is delegated to the relevant Director and Cabinet Member and the integrated impact assessment is kept under review.

Well-being and future generations and the five ways of working considerations include:

- An integrated and collaborative approach to working with telecom providers in the longer term
- Much improved mobile phone signal enabling more people to use the network during busy periods within the city centre.
- Access points will be futureproofed for the long-term, supporting the increasing demand for data and connectivity. It will support higher data speeds, improved network reliability, and the ability to support numerous connected devices simultaneously. This will support innovation and in turn growth within Swansea.
