(531)2319-GWP-4A-XX-PP-A-V&M_DAS-**P02**_Design and Access Statement

Late email comment from Heneb stating that a formal response before Committee will unable to be submitted but deferring comment to Cadw, as much of the site is a Scheduled Monument, which takes priority over their remit.

Amend Condition 14 to read:

Prior to commencement of the relevant part of the development, a Foundation Works Assessment detailing if any piling operations should be necessary and showing the complete scope and arrangement of the foundation design, and all associated subterranean groundworks, including the construction methods shall be submitted to and approved in writing by the Local Planning Authority. The submitted documents should show how archaeological remains will be protected by a suitable mitigation strategy and if any piling is required, plans of those piling operations or any other foundation designs using penetrative methods sufficient to demonstrate that there is no unacceptable risk to groundwater and archaeological remains have been submitted to and approved in writing by the Local Planning Authority. The piling/foundation designs shall be implemented in accordance with the approved details.

Reason: In order that all below ground impacts of the proposed development are known and an appropriate protection and mitigation strategy is achieved to preserve archaeological remains by record and/or in situ in accordance with Planning Policy Wales Edition 12 2024 and to ensure that any piling/foundation works do not present an unacceptable risk to groundwater during construction and methods/design are agreed prior to the commencement of development in accordance with Swansea Local Development Plan Policies HC1, HC2,

RP4 & RP6

Additional Condition

23. No development shall take place until the applicant, or their agents or successors in title, has secured agreement for a written scheme of historic environment mitigation which has been submitted by the applicant and approved by the local planning authority. Thereafter, the programme of work will be fully carried out in accordance with the requirements and standards of the written scheme.

Reason: To identify and record any features of archaeological interest discovered during the works, in order to mitigate the impact of the works on the archaeological resource in accordance with Swansea Local Development Plan Policies HC1 and HC2.

2

2024/1662/LBC

Vivian And Musgrave Engine Houses, Landore, Swansea

Condition 2 – updated drawing references

2. The development shall be carried out in accordance with the following approved plans and documents, subject to any minor deviation being agreed by the Local Planning Authority. If during the works hidden features of historic fabric are uncovered, then the Local Planning Authority Conservation Officer shall be afforded access to inspect and assess the significance. Any necessary amendments to the consented scheme shall be agreed if the features of significance are worthy of retention.

(531)2319-GWP-4A-XX-PP-A-V&M_DAS-**P02**_Design and Access Statement

Amend wording of Condition 9.

9. Prior to the removal of void tops, excluding voids 5 and 6 north, a Method Statement for the removal of those void tops, shall be submitted to and agreed in writing by the Local Planning Authority. The site shall be developed in accordance with the approved details.

Insert 2 new conditions:

10. Prior to the commencement of works to void 5, the following is required:

a) a method statement for the removal of the steel plate shall be submitted to and approved by the LPA. The removal of the steel plate shall then be carried out in accordance with the approved method statement.

b) Once the steel plate has been removed, further investigation works of void 5 shall be completed and a statement detailing the proposed treatment of void 5 shall be submitted to the LPA for approval.

The works shall be carried out in accordance with the approved methodology.

Reason: In order to assess such details to ensure the character of the listed structure is retained in accordance with Section 97 of the Historic Environment (Wales) Act 2023 and in accordance with Swansea Local Development Plan 2010-2025 Policies HC1 and HC2.

11. Prior to the commencement of works to void 6 north, further investigation shall be completed and a statement detailing the proposed void filling of the Vivian rolls trench with retained furnace base, including an allowance for ground water, shall be submitted to and agreed in writing by the Local Planning Authority.

Reason: In order to assess such details to ensure the character of the listed structure is retained in accordance with Section 97 of the Historic Environment (Wales) Act 2023 and in accordance with Swansea Local Development Plan 2010-2025 Policies HC1 and HC2.

Existing conditions 10, 11 & 12 to become 12, 13 & 14 respectively.

3

2024/2217/LBC

Vivian And Musgrave Engine House, Hafod Morfa Copperworks, Swansea, SA1 2LE

Late comments:

Cadw comments were received dated 8th January highlighting issues and requesting updated WSI - An updated written scheme of investigation was received on 24th January following discussions with Cadw to address their concerns as follows:

Refer to the works as temporary protection, as they do not constitute 'backfill'.

The description of the proposals is "Removal of vegetation growth and instatement of temporary covers to protect the archaeological remains"

Heras foot blocks to replace concrete blocks to weigh down covers

It has been agreed with Cadw to retain concrete blocks for weighing down the temporary covers within scheduled area on basis that they will not be in place for long, the covering is very robust and the blocks will not break up or damage the archaeology. On this basis, LPA Officers consider it appropriate to apply the same approach within the curtilage listed area of archaeology retaining the concrete blocks.

Details for de-watering.

This has been provided in the updated WSI to address areas of ponding water and an LBC condition attached to

ensure compliance

Inspections fortnightly and in advance / following severe weather events.

The regime for inspections has been addressed in the updated WSI and an LBC condition attached to ensure compliance

3

2024/1634/FUL

Land Off Bryntywod, Llangyfelach, Swansea, SA5 7LF

The following comments have been received from the Fire and Rescue Service:

I acknowledge receipt of the notification to the Mid and West Wales Fire and Rescue Authority in relation to the above application.

The site plan/s of the above proposal has been examined, and the Fire and Rescue Authority would wish the following comments to be brought to the attention of the planning committee/applicant. It is important that these matters are dealt with early on in any proposed development:

1. *Further to the email correspondence received, you have confirmed that the following points will be adhered to:*
 - *Please ensure that the proposal meets the requirements of Approved Document B(Wales) 2020 B5 Access and facilities for the Fire and Rescue Service*
 - *Section 16 Fire mains and Hydrants*
 - *Section 17 Vehicle Access for Fire appliances*
 - *Current NFCC Grid Scale Battery Energy Storage System planning, Guidance for FRS.*

The developer should consider the need to provide adequate water supplies and vehicle access for firefighting purposes on the site and general guidance on this matter is given in the attached Appendix and the following links:

<https://www.water.org.uk/guidance/national-guidance-document-on-the-provision-of-water-for-firefighting-3rd-edition-jan-2007/>

<https://www.ukfrs.com/index.php/promos/16847>

Furthermore, the applicant should be advised to contact the appropriate Authority responsible for ensuring safety and compliance for these types of developments i.e., Health & Safety Executive / Local Authority Building Control.

The plan/s has been retained for record purposes.

Additional assessment

The proposal includes on-site fire water storage tanks and a fire safety strategy. There are no objections by the Fire and Rescue Service and references are made to compliance with Building Regulations and other guidelines. These are primarily covered by separate consenting process and, subject to development being carried out in accordance with the approved plans submitted with this planning application, it is considered that matters relating to fire safety have been reasonably addressed.

Since no adverse comments have been received from the Fire and Rescue Authority, plenary powers are no longer required. The recommendation is therefore amended to:

Approve, subject to the conditions listed in the original committee report.
