

Dinas a Sir Abertawe

Hysbysiad o Gyfarfod

Fe'ch gwahoddir i gyfarfod

Y Cabinet

Lleoliad: O bell drwy Microsoft Teams

Dyddiad: Dydd Iau, 16 Gorffennaf 2020

Amser: 10.30 am

Cadeirydd: Cyngorydd Rob Stewart

Aelodaeth:

Cyngorwyr: R Francis-Davies, D H Hopkins, E J King, A S Lewis, C E Lloyd, A Pugh, J A Raynor, A H Stevens a/ac M Thomas

Hefyd gwahoddwyd: S Pritchard

Geylio ar-lein: <https://bit.ly/2Z4bMze>

Gweddarlledu: Gellir ffilmio'r cyfarfod hwn i'w ddarlledu'n fyw neu'n ddiweddarach drwy wefan y cyngor. Drwy gymryd rhan, rydych yn cytuno i gael eich ffilmio ac i'r delweddau a'r recordiadau sain hynny gael eu defnyddio at ddibenion gweddarlledu a/neu hyfforddiant o bosib.

Mae croeso i chi siarad Cymraeg yn y cyfarfod.

Dywedwch wrthym erbyn canol dydd, ddeuddydd cyn y cyfarfod.

Agenda

Rhif y Dudalen.

1. Ymddiheuriadau am absenoldeb.

2. Datgeliadau o fuddiannau personol a rhagfarnol.

www.abertawe.gov.uk/DatgeluCysylltiadau

3. Cofnodion.

Cymeradwyo a llofnodi, fel cofnod cywir, gofnodion y cyfarfod blaenorol.

1 - 4

4. Cyhoeddiadau Arweinydd y Cyngor.

Rhaid cyflwyno cwestiynau'n ysgrifenedig, cyn hanner dydd ar y diwrnod gwaith cyn y cyfarfod fan bellaf. Rhaid i gwestiynau ymwneud ag eitemau ar yr agenda. Ymdrinnir â chwestiynau o fewn cyfnod 10 munud.

5. Cwestiynau gan y cyhoedd.

Rhaid cyflwyno cwestiynau'n ysgrifenedig, cyn hanner dydd ar y

diwrnod gwaith cyn y cyfarfod fan bellaf. Rhaid i gwestiynau ymwneud ag eitemau ar yr agenda.

6. Hawl i holi cynghorwyr.

Rhaid cyflwyno cwestiynau'n ysgrifenedig, cyn hanner dydd ar y diwrnod gwaith cyn y cyfarfod fan bellaf. Rhaid i gwestiynau ymwneud ag eitemau ar yr agenda.

Agenda Item 3.

City and County of Swansea

Minutes of the **Cabinet**

Remotely via Microsoft Teams

Thursday, 18 June 2020 at 10.30 am

Present: Councillor R C Stewart (Chair) Presided

Councillor(s)

R Francis-Davies
A S Lewis
J A Raynor

Councillor(s)

D H Hopkins
C E Lloyd
A H Stevens

Councillor(s)

E J King
A Pugh
M Thomas

Officer(s)

Huw Evans
Adam Hill
Tracey Meredith
Phil Roberts
Ben Smith

Head of Democratic Services
Deputy Chief Executive / Director of Resources
Chief Legal Officer / Monitoring Officer
Chief Executive
Chief Finance Officer / Section 151 Officer

Also present

Councillor(s): S Pritchard

Apologies for Absence

Councillor(s): Nil

199. Disclosures of Personal and Prejudicial Interests.

In accordance with the Code of Conduct adopted by the City and County of Swansea, the following interest was declared:

- 1) Councillor J A Raynor declared a Personal & Prejudicial Interest in Minute 206 "Local Authority Governor Appointments" and stated that she had dispensation from the Standards Committee to Stay, Speak but Not Vote on matters relating to the Appointment of Local Authority Governors.

200. Minutes.

Resolved that the Minutes of the meeting(s) listed below be approved and signed as a correct record:

- 1) Cabinet held on 19 March 2020;
- 2) Cabinet held on 27 April 2020;
- 3) Cabinet held on 7 May 2020.

201. Announcements of the Leader of the Council.

The Leader of Council made no announcements.

202. Public Question Time.

No questions were asked.

203. Councillors' Question Time.

No questions were asked.

204. Warm Homes Fund (WHF) - Funding Application for First Time Central Heating in Swansea Private Sector Homes.

The Cabinet Member for Homes, Energy & Service Transformation submitted a report which sought to comply with Financial Procedure Rule 7 "Capital Programming and Appraisals", to commit and authorise the addition of new schemes to the Capital Programme. The Warm Homes Fund will be used to install appropriate first time gas heating to multiple properties that have been identified across Swansea that are within the Lower Super Output Areas (LSOA) areas for residents who are at risk of being or who are in fuel poverty and have electrical or solid fuel heating.

Resolved that:

- 1) The funding offer for qualifying homes from the Warm Homes Fund for first time central heating for 2020 & 2021 be approved and the scheme be added to the capital programme;
- 2) Delegated authority be given to the Director of Place, the Chief Legal Officer, the Chief Finance Officer and the Cabinet Member for Homes, Energy and Service Transformation to approve the required funding and contractual documentation.

205. Business Rates – Temporary Rate Relief Scheme (Wales) 2020/21.

The Chief Finance Officer submitted a report which provided information and sought consideration to adopt a new temporary Retail, Leisure and Hospitality Rates Relief Scheme relating to Business Rates, which has been introduced by Welsh Government for the financial year 2020/2021. This supplements the previously announced High Street and Retail Rates Relief Scheme.

Resolved that:

- 1) The details of the scheme as outlined in the report be noted;
- 2) The rate relief scheme and the application process outlined in the report be adopted for 2020/2021.

206. Local Authority Governor Appointments.

The Local Authority Governors Appointment Group submitted a report, which sought approval of the nominations submitted to fill Local Authority (LA) Governor vacancies on School Governing Bodies.

Resolved that:

- 1) The following nominations recommended by the Director of Education in conjunction with the Cabinet Member for Education Improvement, Learning & Skills be approved:

| | | |
|-----|-----------------------------|-------------------------|
| 1) | Bishopston Primary School | Lyn Ellis |
| 2) | Christchurch Primary School | Dr Janet Goodall |
| 3) | Craigfelen Primary School | Richard Bevan |
| 4) | Glais Primary School | Jill John |
| 5) | Glyncollen Primary School | Carole Wright |
| 6) | Grange Primary School | Katy Elizabeth Lewis |
| 7) | Llanrhidian Primary School | Professor Ruth Costigan |
| 8) | Pontybrenin Primary School | Caroline Hodson |
| 9) | Portmead Primary School | Wynne Griffiths |
| 10) | Sketty Primary School | Sharon Jones |
| 11) | YGG Gellionnen | Rebecca Williams |
| 12) | YGG Lôn Las | Susan Rodway |
| 13) | YGG Login Fach | Stephen Watkins |

207. Exclusion of the Public.

Cabinet were requested to exclude the public from the meeting during consideration of the item(s) of business identified in the recommendations to the report(s) on the grounds that it / they involve the likely disclosure of exempt information as set out in the exclusion paragraph of Schedule 12A of the Local Government Act 1972, as amended by the Local Government (Access to Information) (Variation) (Wales) Order 2007 relevant to the items of business set out in the report(s).

Cabinet considered the Public Interest Test in deciding whether to exclude the public from the meeting for the item of business where the Public Interest Test was relevant as set out in the report.

Resolved that the public be excluded for the following item(s) of business.

(Closed Session)

208. Acquisition of Land South of Fabian Way at Swansea Docks for Proposed SA1 Link Road.

Minutes of the Cabinet (18.06.2020)
Cont'd

The Cabinet Member for Delivery & Operations submitted a report which sought approval of the negotiated purchase price for acquisition of 18.7 acres of land by CCS at Swansea Dock. The land is to be acquired on the instruction of the Highways client, and is required to facilitate the construction of a spine road through SA1, linking Baldwin's Crescent and Langdon Road.

Resolved that the recommendations as detailed in the report be approved.

The meeting ended at 10.50 am

Agenda Item 7.

Report of the S.151 Officer

Cabinet – 16 July 2020

Revenue Outturn & Savings Tracker 2019/2020

| | |
|------------------------------------|---|
| Purpose: | To report on the detailed Revenue financial outturn for 2019/20 |
| Policy Framework: | Budget 2019/20. Transformation and Future Council (Sustainable Swansea –fit for the future) |
| Consultation: | Cabinet Members, Corporate management Team, Legal Services and Access to Services. |
| Recommendation(s): | It is recommended that: 1) The comments and variations in this report be noted, and that the proposed reserve transfers detailed in Section 7.3 are approved |
| Report Author: | Ben Smith |
| Finance Officer: | Ben Smith |
| Legal Officer: | Tracey Meredith |
| Access to Services Officer: | Rhian Millar |

1. Background and Introduction

- 1.1 This report details net expenditure for 2019/20 and highlights variances from the revised budget.
- 1.2 The Revenue Budget for 2019/20 was approved at Council on 28th February 2019. The budget as approved included the following proposals to address a potential budget deficit of £24.401m

| <u>Budget Proposals 2019/20</u> | £'000 | £'000 |
|---|--------------|----------------|
| Planned Service Savings. | -12,283 | |
| Cross cutting savings. | -357 | |
| | | -12,640 |
| Schools pressures funded by schools. | | -4,279 |
| Funding identified for change to Council Tax and Savings Proposals. | | -496 |
| Net effect of Council Tax base increase and increased charge. | | -6,986 |
| <hr/> | | |
| Overall resourcing | | -24,401 |

- 1.3 The specific savings proposals detailed above were incorporated into Directorate budgets at service level and have been the subject of specific monitoring via the budget savings tracker, reported to Cabinet on a quarterly basis during the year.
- 1.4 2019/20 marked the sixth year following the introduction, from 1st April 2014, of the Council's single status pay and grading scheme relating to all staff on NJC grades. The scheme specifically excludes Teaching staff, those on the Soulbury Scheme and Senior Officers at Head of Service/Director level.
- 1.5 The introduction of the scheme has been accompanied by an extensive appeals process for those staff adversely affected by pay and grading allocations made during the original allocation process. Despite significant inroads made to the numbers of appeals, elements of the appeals and grievance process does remain ongoing.
- 1.6 The extent to which appeals are successful in terms of job allocation will inevitably affect financial performance on an annual basis and impact on future budget planning.
- 1.7 The modelled costs of single status as at the implementation date have been incorporated in revenue budgets going forward. However, costs in respect of successful appeals have not, and any costs arising from appeals and grievances will have to be met from within existing Directorate Budgets.
- 1.8 The report that follows details the Revenue outturn position for 2019/20, makes commentary on comparison with in year budget monitoring and, where appropriate, details action already taken in setting the 2020/21 Revenue Budget based on anticipated outcome at quarter 3 of the year. It remains critical that the progress on savings adopted under *Sustainable Swansea* is subject to constant review and updated during each financial year and that future budgets are constantly informed by outcomes from the monitoring process.

2. Detailed Outturn Position

- 2.1 Overall direct revenue expenditure for 2019/20 was £11,240,000 less than the revised budget as follows:

| | £000's |
|--|----------------|
| Net Expenditure on Services per appendix 'A' - underspend | -7,474 |
| Reduced call on Contingency fund | -4,661 |
| Reduced call on Apprenticeship levy | -197 |
| Inflationary provision not utilised | -850 |
| One off corporate costs/income | 1,269 |
| Council Tax collection shortfall | 664 |
| Other net overspends | 9 |
| <hr/> | |
| Overall net underspend | -11,240 |

- 2.2 Members will see from the table at 2.1 above that the net overall underspend at year end is primarily the result of a net one off underspend in services of nearly £7.5m, together with the reduced call on Contingency Fund of £4.7m.. During the in-year reporting to members it was highlighted that a significant element of the Contingency fund was likely to be unallocated in the year , based on forecasts , and therefore would be utilised to mitigate future spend in relation to costs arising from risks/demand. The third quarter services position forecast a small net overspend in the region of £0.4m. The improvement during the last quarter to out turn is largely as a result of the action taken in the third and fourth quarter by all Directorates to contain or reduce overspending, in line with Cabinet decisions and target setting, following receipt of the in-year quarterly monitoring reports. A further major and one off contributor to the final position has been the receipt of significant historic shared costs settlements from the local health board and additional Welsh Government funding, both in relation to Social Services. This has then been offset further by the already agreed actions, namely to utilise unspent budgets on the central inflation provision and Apprenticeship Levy .
- 2.3 Separately, there is, as highlighted during the year, but not until now formally quantified, a significant in year underspend on capital financing of £7.4m. An element of capital programme slippage has contributed to the capital charge underspend. There is a strategy to monitor interest rates and average in the borrowing requirement over a period of time but inevitably as the need to fund the capital financing requirement increases so will the capital charges in line with the delivery of the capital programme, the budget and MTFP. Such underspends should therefore be considered temporary, albeit not necessarily solely one off (see 2.4) as the capital programme's financing requirements develop in the later years of the MTFP. Having externalised borrowing up to capital financing requirement (CFR) during 2018/19 and in light of the HM Treasury's decision in Oct 2019 to implement a 1% premium on all PWLB borrowing, no external borrowing has been undertaken in 2019/20. However as the capital programme's financing requirements

from 2020/21 onwards arise, the most economically advantageous source of funding shall need to be sourced (PWLB, market, bond issue) with the accompanying financing charges.

- 2.4 As outlined throughout the year (and set out in Section 7 below) it is proposed that the whole underspend on the Capital Charges be transferred in its entirety to the Capital Equalisation Reserve to help prudently meet part of future capital costs. This approach was re-affirmed by Council in its review of all reserves. This will result in a Capital Equalisation Reserve of £21.1m as at the start of 2020/21.
- 2.5 The improved final position, lower overspend and reduced cost of ER/VR scheme, has resulted in no call on the Restructure Reserve in year. This allows the S151 officer to propose that £3 million is retained In the Restructure Reserve to be used to continue to contribute towards helping centrally fund the costs of ER/VR in 2020-21, again only where there is an evidenced business case and reasonable payback period, as in previous years.
- 2.6 Details of net expenditure variations are given in Section 2.9 and onwards below.
- 2.7 Recommendations in terms of Reserve Movements and Review as a result of the final outturn position as set out in Section 2.1 to 2.3 are made in Section 7 of this report.
- 2.8 The Directorate/Services outturn position itself is made up of a mix of over and under spends and it is clear that some individual elements of the overspends within service areas may continue into 2020/21 and large one off income gains are unlikely to fully continue. However, the approved budget for 2020/21 addressed a number of the major underlying budget issues from previous years. This was all, of course, before the Covid 19 pandemic impact which will fundamentally affect the 2020-21 budgets
- 2.9 The following sets out the major service specific variances in 2019/20.

Resources Directorate

| Summary of variances: | £ |
|--|---------------------------------|
| Net Employee Costs | -2,598,000 |
| Savings exercise in-year to meet Sustainable Swansea Savings/Service savings targets | 1,790,000 |
| Digital Services Contracts & Hardware/Software | -559,000 |
| Council Tax Reduction Scheme (CTRS) | -461,000 |
| Housing Benefits/Rent Allowances | -474,000 |
| Other net variances | 47,000 |
| Total | <u><u>-2,255,000</u></u> |

Director Comments:-

1. As reported in the 2018/19 outturn, there was a shortfall in the target attributable to Sustainable Swansea savings in the Directorate. These were primarily historical savings targets which had not been achieved and carried over into this financial year. The Deputy Chief Executive in conjunction with Heads of Service undertook measures to proactively underspend to control the in-year budget.

This action meant a steady reduction of in-year spending related to staff costs through the management of both vacancies through a vacancy freeze, ER/VR, renegotiation of contracts and reducing non-essential spend. A key role of The Resources Directorate is to support the other directorates and due to the reduction in staffing this has had a substantial impact on other services and service delivery. These actions resulted in a rebalanced Directorate budget during 2019/20 with a projected underspend, although its longer-term sustainability remains challenging with the requirement for substantial transformation within these services to ensure a future balanced sustainable budget. This transformation would be ready to implement by the end of 19/20 to rebalanced the budget. However a number of restructures and planned efficiencies have not been started due to the Coronavirus Crisis which hit towards the end of the financial year.

2. Savings which were programmed in the earlier years and carried forward have not been achieved due to the changes in the demand for the service during the subsequent year, making the saving even more challenging. This relates to the Welsh Translation Service saving of £150,000.

Alternative proposals are being reviewed within the directorate and a plan to address these areas is being developed for 20/21 financial year.

In-year savings exercise to meet Sustainable Swansea Savings target and other Service savings:

| Savings exercise in-year: | £ |
|--|------------------|
| Employee costs | 998,000 |
| Corporate Health and Safety Wellbeing & Communications Model | 306,000 |
| Commercial Services Income | 130,000 |
| CTRS | 353,000 |
| Other | 3,000 |
| Total | 1,790,000 |

3. A third area of underspend variance relates to the Digital and Transformation savings and IT contract cost savings due to Oracle support and maintenance contract which has been negotiated as part of the Oracle Cloud implementation, training of support team on new contact centre technology and other contract costs,

4. A fourth area of Underspend variance relates to Legal Services, where vacancies have not been filled. This has resulted in case management increasing per lawyer which in turn has had implications on the speed of which work is completed. In addition successful cases such as liberty stadium has seen increased income.
5. The final major variances relates to budget overprovision for CTRS (Council Tax Reduction Scheme), which is predominantly demand led. Some significant reduction in this overall budget was factored into the 2019-1920 budget but it remains under review with the wider rollout of the Universal Credit system and wider efforts by Welsh Government to encourage and maximise local take up of the scheme. The other balance is Housing Benefit and Rent Allowances variance relating to a net over recovery of income and a write off of a previous year creditor transaction.
6. Detailed plans and proposals are now in place to deliver alternative savings to the above variances. Individual service overspends have occurred in year where they have adopted a new unplanned saving mid-year which will not materialise until 2020/21. This is not without difficulty in some areas where vacant posts have been left unfilled and ultimately deleted in the savings proposals. This continues to create pressure across Resources and work has been prioritised accordingly.

Action Plans for Resources include:

- Releasing of vacancies in each service
- Ensuring all legacy savings are achieved, which were previously allocated to services
- Service budget reviews to release additional savings, reviewing the risk across the Council including impact on other Directorates.
- Review of the CTRS which is a demand-led service
- Bringing forward savings as a result of digital wherever possible
- Reducing and stopping fees and subsidies wherever possible.
- A range of other measures are being considered as part of budget savings considerations.

However at the time of writing the budget and planned transformation programmes have been impacted through the Coronavirus and the planned action plans have not been implemented due to this and a review will need to take place within all service once the crisis has been resolved to a level where it can take place.

Director of Social Services

Children's and Adult Services

| | £ |
|--|------------|
| All Savings targets were met or achieved via alternative means | |
| Independent Child and Family Placements | -904,000 |
| External Domiciliary Care (Older Persons) | -604,000 |
| External Residential Care | -1,077,000 |
| MHLD Complex Care | 2,789,000 |
| Internal Services (Adults) | -2,633,000 |
| Internal Services (Children's) | -1,811,000 |
| Adoptions | 445,000 |
| Community Equipment | -793,000 |
| Other | 6,000 |
| | -4,582,000 |

Director's Comments

There have been significant improvements in the Social Services position throughout the year. This is the first time in recent years where both Adult Services and Child and Family have underspent.

In recent years, significant levels of unachieved savings have required exceptionally tight control of business as usual spend as well as reviews of grant eligible activity to ensure as much spend as possible is claimed through available grants. This process continued into 2019/20 and explains much of the improved performance.

The resolution of a long-standing dispute with partners around contributions to Children's placements saw a one off accounting adjustment of £1.7m applied to Child and Family. Whilst such adjustments are one off in nature and will not be repeated, the principles established for sharing costs will support the Council in the coming years.

The increased reliance on grant income to maintain services that would historically have attracted core Council funding is a concern in the medium term but manageable for 2020/21. At this stage the level of exposure to known short term grant funding is c.£9 million.

Despite the improved financial performance cost pressures for externally commissioned care have continued to rise. The combination of increased costs and higher demand are continuing to cause pressure. Many of these pressures have been managed through budget realignments and work to seek fair contributions from partners that will continue into 2020/21.

Underspends in respect of the Community Equipment Store are representative of the higher contributions received from partners, alongside the service's success in attracting external funding. The partnership agreement for this service requires that such underspends are set aside for the ongoing benefit of the service.

Poverty & Prevention

| | £ |
|--|-----------------|
| Young People's Services | -71,000 |
| Early Intervention Services | -123,000 |
| Tackling Poverty | -120,000 |
| Joint People Directorate Commissioning | -53,000 |
| Other | -1,000 |
| | <u>-368,000</u> |

Directors Comments:-

The core budget of Poverty and Prevention funds 24% of service spend, with the remainder funded by income, mostly Welsh Government grants. The principle adopted by the service is to maximise grant funding where legitimate and able to do so. Where this approach is successful it creates underspends and one off savings to core budgets.

The continued integration of commissioning services, as well as closer working with early intervention and prevention activity has provided additional opportunities for core funding underspends.

Director of Education

| | £ |
|--|----------------|
| School Catering | 953,000 |
| Cleaning Services | 159,000 |
| Home to School Transport | 916,000 |
| Out of County / Independent Placements | 184,000 |
| Other additional learning needs (ALN) pressures | 138,000 |
| Other continuing non-delegated schools pressures | 122,000 |
| Education Other Than At School (EOTAS) | -599,000 |
| Managed savings in staffing costs | -226,000 |
| Continuing scrutiny of costs | -152,000 |
| Further cost recovery and income generation | -202,000 |
| Retention of grant monies | -901,000 |
| Other net variances | -24,000 |
| | <u>368,000</u> |

Directors Comments:-

Education

Catering and Cleaning: Overspends in this area are primarily due to the impact of pay awards, other food cost pressures, and unfunded national changes in free school meal entitlements. However, these have been exacerbated by the significant late impact of the closure of schools in March that resulted in a significant loss of income, as well as additional costs to maintain support for those entitled to free school meals. Cost pressures had been mitigated in part by continuing management action to further increase income and efficiencies within the services, and action taken to address the underlying base budget shortfall through a review of future service level agreements (SLA) charges. Nevertheless, changes to the support for those eligible for free school meals during the current lockdown will continue to have a significant financial impact in 2020-2021 unless the full additional costs being incurred are recovered in some way.

Home to School Transport: This remains a significant area of concern, as it is inherently volatile and uncontrollable within existing national and local policy. Expectations continue to be raised through Welsh Government action and legal challenges. There has been some success in mitigating inflationary pressures through process reviews and the achievement of service efficiencies.

Out of County / Independent Placements: The overspend is significantly lower than earlier projections, reflecting the continuing management action to mitigate the scale of cost pressures which include contributions to the educational cost of social services placements. Like all independent placements, this is an inherently volatile demand-led budget.

Other ALN pressures are also apparent, particularly in areas such as additional specialist teaching (STF) facility support needs, education at home, equipment and the assessment team.

Other continuing non-delegated schools pressures primarily relate to unfunded historic pension costs and maternity costs.

EOTAS: A number of one off underspends were identified in year to support the department's financial position through a thorough review of budgets in this area, in line with the continuing development of the new model of EOTAS provision.

Robust management action has been taken throughout the year to as far as possible mitigate the scale of the underlying base budget cost pressures through the identification of managed staffing savings, the continuing scrutiny of costs, and wherever possible further cost recovery and income generation. A one-off retention of grant funding was agreed to further mitigate the overall scale of underlying cost pressures to be managed.

Without the late impact of the closure of schools on the catering service outturn, which added £328,000 to the overall overspend through the loss of income and the additional food costs incurred, the ED budget as a whole would have been virtually balanced, having managed cost pressures amounting to £2.5m identified at the start of the financial year.

The significant areas of unavoidable service and demand pressures identified above will continue into 2020/2021, whilst many of the mitigating savings identified during 2019/2020 are one off in nature. However, there is a robust medium term financial plan to continue to address the areas of underlying base budget shortfall, subject to the severe financial impact of the continuing lockdown on the cost of catering provision being recovered by the local authority.

Place Directorate

Director Comments:-

Notwithstanding the ongoing financial challenges, significant cross directorate performances continues to be made against base budget and savings targets. The directorate had remained on target to achieve a balance budget but was asked to take further measures to mitigate overspend elsewhere within the authority and seek to achieve a £500k underspend. The final outturn slightly better this with an overall underspend of £638k. This has been achieved by effective budget management and a significant increase in income. This has also mitigated some end of year challenges resulting from COVID 19 and its resultant impacts which are likely to amount to several hundred thousand pounds per month and particularly affect services areas which are income dependant e.g. car parking

The main overall variances are as follows

Highways and transportation overspend of £1.3m resulting from overspend in car parks (£443k), unachieved savings (£463k), park and ride (£347k), increased maintenance of fleet cost (£486k), and highway utility cost (£298k). partly offset by underspend in bus station (-£111k) and Civic parking enforcement income (-£360k) and other underspends

Waste management, parks and cleansing overspend of £984k resulting from cumulative unfunded Waste budget pressures and fall in recycling income (£467k), neighbourhood working (£468k including an RCCO of £180k) and other minor variances

Building Services net underspend of -£1.7m mainly as a result of increased income and fee recovery as a result of significant increase in turnover

Property services underspend of -£415k made up of increase income from assets and investments portfolio partly offset by shortfall in income from Quadrant (£263k)

Culture Tourism sport and Leisure underspend of -£226k made up of underspend in libraries (-£282), special events for addition large events (-£202k) party offset by overspend in the grand theatre (£234) largely resulted from delayed savings now in place for 20/21

Housing and Public protection overall underspend of -£985 mainly resulting from underspend in housing options (-£325k), Food safety (-£97k), Registrars from increased income (-£111k) and area renewals from increased income and staff underspends (-£225) and general fund housing budgets of (-£147k)

Economic regeneration and planning overspend of £104k mainly resulting from shortfall in market income (£199k) offset by underspends

In addition proactive budget management has also reduced overall spend levels across the directorate. This will assist the directorate try and meet the challenges coming in 20/21 resulting from additional COVID costs and significant reduction in income in the early months.

3. Items met from the Contingency Fund

- 3.1 The Council Report on 28th February 2019 highlighted a number of risks that may need to be met from the Contingency Fund in 2019/20.
- 3.2 The £1.695m Outturn figure shown at Appendix 'A' represents the cost of the ER/VR exercise for 2019/20 which has been charged to the Contingency Fund on an 'Invest to Save' basis. This is approximately half of the previous year's cost and this reduction contributes significantly to the reduction in usage/underspend on the revised contingency budget This £1.695m reflects the inevitable workforce restructures implicit within the budget proposals for 2019/20 and 2020/21 contained within the 'Sustainable Swansea- Fit for the Future' Budget strategy adopted by the Council. As in prior years access to ER/VR requires a maximum payback period of three years for an employee who leaves under the scheme.
- 3.3 In addition to the above, other costs have been funded from the contingency in year including funding for equipment for a new depot (£313,400) , Range of events to celebrate the 50th Anniversary of Swansea City status (£158,000) ,High Street car park lift repairs (£135,000) , Interim support arrangements for Chief Executive including regional working (£30,000) , Community Help/Initiatives Consultation (£33,000) , Western Powerhouse subscription (£20,000), Key Cities subscription (£10,000).
- 3.4 Items charged to the fund represent one off costs which, apart from ER/VR costs, will not re-occur during 2020/21. The budgeted Contingency fund for 2020/21 is £3,621,000. The unspent and unused elements of the contingency fund from 2019-20 will be potentially available to significantly boost, on a one off basis, the level accessible during 2020-21. This is considered necessary in light of likely risks and issues facing the council, including the financial impact of Covid 19.

3.5 The proposed use for the un-allocated element of the Contingency Fund in 2019/20 (£4.661m) is set out in section 7.

4. Schools Expenditure and Reserves Position

4.1 The Schools delegated budget for 2019/20 was £150,720,000.

4.2 This delegated budget in reality reflects in actual expenditure as shown in the education directorate line of the outturn summary given at appendix 'A', and any variation in expenditure incurred by Schools at a level greater/less than overall delegated budgets will result in a movement in ring-fenced delegated schools reserves.

4.3 During 2019/20 Schools expenditure overall was £871,123 more than the delegated budget, equating to an overspend of approximately 0.006%

4.4 This overspend will be taken from the schools own reserves.

The following is a summary of overall Schools Reserves since 2017:

| | Balance 31/3/2017 | Balance 31/3/2018 | Balance 31/3/2019 | Balance 31/3/2020 | Overall change over last 3 year period (%) |
|--------------|----------------------|----------------------|----------------------|----------------------|---|
| Primary | 5,433,323 | 5,310,963 | 5,694,092 | 4,697,855 | -13.5 |
| Secondary | 1,687,157 | 1,612,646 | 2,730,332 | 2,777,164 | +64.6 |
| Special | 454,287 | 177,098 | 176,008 | 254,290 | -44.0 |
| Total | 7,574,767 | 7,100,707 | 8,600,432 | 7,729,309 | +2.0 |

4.5 The above table is presented to reflect the quantum of schools reserves against each stream and the position within individual schools may vary quite considerably from the trend shown.

4.6 The above overall movement in Schools Reserves – a net decrease of £871,123 or 10.1% in year has to be viewed in the context of an overall increase in Schools funding of £3.707m in 2019/20.

4.7 It is expected that the outturn position for 2020/21 for schools will evidence a further net call on existing reserves.

5. Ongoing implications for the 2020/21 budget

5.1 There are ongoing risks from planned savings not achieved from 2019/20 budget which cumulatively impact future years.

5.2 There are ongoing overspend risks arising from the outturn position in the following areas

- Sustainable Swansea 2019/20 savings targets;
- Social Services both Adults and Children;

- Home to School Transport; and
- Education catering and cleaning.

5.3 There are inherent risks in the current 2020/21 budget around:

- Sustainable Swansea workstream savings 2020/21;
- Additional Learning Needs;
- Ongoing costs relating to residual Single Status appeals; and
- Uncertainty of impact of Brexit Transition Period.
- Impact of COVID19 costs, scope for recovery of costs from Welsh Government and consequential reduction in income.

5.4 There are emerging and continuing risks going forward in future years arising from national developments around:

- Risks to public finances generally through Covid 19 spending and lost national taxation receipts;
- Risk of redistribution of block government grant;
- Continued loss of existing specific grants;
- Ongoing demographic pressures especially in the older age population, pressures and interlinkages with NHS health care funding and a relative fragile private sector care sector;
- Higher than expected cases of looked after children;
- Affordability of the national employer pay awards to address National minimum and Living Wage issues and the effective, but unfunded, removal, of the public sector pay cap; and
- Ongoing Brexit Transition Period uncertainty.

5.5 Continued uncertainty at national government level means there remains doubt as to the timing, completion, or otherwise, and also the depth of the oft delayed forthcoming Spending Review. This means there is less certainty of a definitive redrawing of UK government departmental cash limits, consequential Welsh government cash limits and consequently the scope for considering the rebasing of the Welsh local government settlement. Budgets risk being simply rolled over, with a temporary continuation of some one-off grants that could have otherwise been hoped to have been more definitively built into base budget settlements.

5.6 We can anticipate therefore that the authority's overall budget position will remain under significant pressure for the foreseeable future, with added uncertainty and thus all efforts to live within budget must be redoubled.

6. Use of the savings tracker and outturn position - COVID19 impact

6.1 During 2019/20 the Council continued with use of a tracking mechanism in order to monitor progress against the specific savings proposals contained within service and overall budgets proposals.

- 6.2 The last reported position (at third quarter) as shown by the savings tracker for 2019/20 showed an overall achievement of 82%.
- 6.3 The tracker was not completed during lockdown and emergency response to the Covid 19 pandemic as part of pragmatic and practical reprioritisation of essential work (focus on outturn, closure, statement of accounts, maintaining supply lines for payroll, accounts payables, receivables and distribution of emergency grant aid). It is likely the performance would have improved in the final quarter and given the overall outturn position it is clear that some additional compensating savings have been made where specific savings have been delayed or have not been achieved.

7. Summary of Outturn Position and Recommendations

- 7.1 The outturn position for 2019/20 reflects a significant improvement on the forecast position at quarter 3 (Reported to Cabinet in February 2020) as a result of actions taken and additional income and Welsh Government funding in particular regarding Social Services .
- 7.2 This is the minimum that should be expected in terms of Service Revenue Budgets as a result of in year budget monitoring, management action and spending restrictions.
- 7.3 The report to Council in October 2019 reviewing its reserves proposed utilising some earmarked reserves to enhance the Capital Equalisation reserve. Based on the net Revenue position arising out of the actual final outturn position it is recommended that:-
- 7.3.1 The following transfers are made to earmarked Revenue Reserves as follows:-
- Social Care Resilience Fund(Adults) £1,894,346,
 - Social Care Resilience Fund(Childrens) £1,894,346,
 - Community Equipment Service Section 33 agreement £793,000 ,
 - Commuted Sums Received £72,000 ,
 - Vibrant and Viable City Centre £13,000 ,
 - Joint Archives service £26,000 ,
 - Workways extension/match funding £42,000 ,
 - Members Environmental Improvements £25,000
 - Tawe Barrage lock maintenance £20,000
 - Crematorium sinking fund £7,000,
 - Various Joint Ventures with WG £13,000
 - Capital Equalisation Reserve £7,413,000.
 - Contingency Fund £1,646,000
- 7.4 In addition to the above recommended transfers to earmarked reserves the S151 Officer, as a result of the outturn position proposes that the final unutilised balance of the Contingency Fund in 2019/20 (£4,661,000) as per APPENDIX A remains as a Contingency Fund reserve into 2020/21. This being further mitigation against potential unfunded costs /loss of income as a result of COVID19. Combined with

the proposed transfer above this will result in additional Contingency Fund of £6,306,000 being available, on a one off basis, as at 31 March 2021.

7.5 Notwithstanding these proposed transfers, it is a duty of the Section 151 Officer to consider levels of General and earmarked reserves in order to continually monitor their adequacy and projected use. This has to be done in terms of both current known and projected future liabilities.

7.6 It is the opinion of the Section 151 Officer at this point that there is no scope within General reserves to fund any additional expenditure of the Council given the current risks facing the Council in terms of continuing single status issues, ongoing spending pressures and the uncertainty of future Welsh Government funding streams. That means that subject to any limited emergency one off use of earmarked reserves, and other limited action the S151 Officer can propose immediately in year, all spending must otherwise be wholly contained within existing budgets.

8. Legal Implications

8.1 There are no legal implications relating to matters contained within this report.

9. Equality and Engagement Implications

9.1. The Council is subject to the Public Sector Equality Duty (Wales) and must, in the exercise of their functions, have due regard to the need to:

- Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act.
- Advance equality of opportunity between people who share a protected characteristic and those who do not.
- Foster good relations between people who share a protected characteristic and those who do not.

Our Equality Impact Assessment process ensures that we have paid due regard to the above.

9.2 The Revenue budget of the Council was approved following the application of the corporate Equality Impact Assessment (EIA) process throughout the Budget setting process. It is essential where service levels are affected by changes to the Revenue Budgets (including savings options) that the EIA process (alongside consultation and engagement as appropriate) is applied to ensure due regard is paid to the potential equality impacts of any proposals prior to decision making.

Agenda Item 8.

Report of the S151 Officer

Cabinet – 16 July 2020

Revenue Outturn 2019/20 – Housing Revenue Account [HRA]

| | |
|------------------------------------|---|
| Purpose: | This report details the City and County of Swansea's HRA outturn compared with the approved revenue budget for 2019/20. |
| Policy Framework: | Budget 2019/20. Transformation and Future Council (Sustainable Swansea – Fit for the Future) |
| Consultation: | Cabinet Members, Corporate Management Team, Legal Services and Access to Services. |
| Recommendation(s): | It is recommended that: 1) The comments and variations in this report be noted and that the proposed reserve transfers detailed in Section 2.1 are approved. |
| Report Author: | Ben Smith |
| Finance Officer: | Ben Smith |
| Legal Officer: | Tracey Meredith |
| Access to Services Officer: | Rhian Millar |

1. Summary of HRA outturn for 2019/20.

- 1.1 The HRA showed a deficit of £0.815m compared with the original budgeted deficit as outlined in the report to members on 28th March 2019 of £0.403m. The summarised HRA is set out in Table A in the Appendix.
- 1.2 The main reason for this overspend and movement against original deficit of some £0.412m is set out below :-

| Item | £m |
|--|--------------|
| Planned increased contribution to fund capital expenditure | 4.001 |
| Reduced management/revenue repairs costs | -1.551 |
| Reduced capital charges | -0.771 |
| Decrease in Bad Debt provision | -0.173 |
| Additional income and grant | -1.094 |
| Net overspend | 0.412 |

- 1.3 The increased contribution to fund capital expenditure was as a result of the planned use of existing balances and savings from the current year as set out above to minimise the borrowing requirement.
- 1.4 The decrease in management and revenue repairs costs was mainly due to lower than expected employee costs, additional Capital fee income and an underspend on revenue repairs.
- 1.5 The previously adopted treasury management strategy of 'internalising' the HRA capital financing requirement has been beneficial to the HRA in recent years. However to mitigate the ongoing Brexit risks, the projected increasing interest rate environment and working cashflow requirements, it was determined prudent to continue to externally fund the capital financing requirement by PWLB borrowing at historically low interest rates during the previous year in 2018/19. The underspend in capital charges in year (2019/20) is as a result of corresponding material slippage in the ambitious capital programme.
- 1.6 The reduction in the contribution to the bad debt provision arose because of lower than forecast rent arrears due to the pro-active approach of the Rent Arrears Team.
- 1.7 The additional income was due to a number of factors, namely as a result of the allocation of the week 53 rent income apportionment, additional income from the Furnished Tenancy Scheme and lower void numbers.

2. Reserves

- 2.1 The opening balance for the year was £6.156m. With the final 2019/20 use of reserves of £0.815m the closing balance is £5.341m. The summary reserves position including budgeted usage for 2020/21 is set out in Table B in the Appendix.

3. Legal Implications

- 3.1 There are no legal implications.

4. Equalities Implications

- 4.1 The Council is subject to the Public Sector Equality Duty (Wales) and must, in the exercise of their functions, have due regard to the need to:

- Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act.
- Advance equality of opportunity between people who share a protected characteristic and those who do not.
- Foster good relations between people who share a protected characteristic and those who do not.

4.2 Our Equality Impact Assessment process ensures that we have paid due regard to the above.

4.3 There are no equalities implications arising from this report. Equality impact assessments are carried out in respect of HRA budgets at the time that budgets are approved.

Appendix A - summarised HRA 2019/20 & Movement in Balances 2019/20 to 2020/21

Table A: Summarised HRA 2019/20

| Classification | Original Budget 2019/20 | Actual 2019/20 |
|-------------------------------------|--------------------------------|-----------------------|
| | £'000 | £'000 |
| <u>Expenditure</u> | | |
| Management and Maintenance | 31,059 | 29,335 |
| Capital Charges | 10,669 | 9,898 |
| Revenue Funding for capital schemes | 25,499 | 29,500 |
| Total Expenditure | 67,227 | 68,733 |
| <u>Income</u> | | |
| Rents and other income | 66,616 | 67,572 |
| Affordable Housing Grant | 208 | 346 |
| Use of balances | 403 | 815 |
| Total Income | 67,227 | 68,733 |

Table B: Movement in Balances 2019/20 to 2020/21

| Description | £000's |
|--|---------------|
| Actual balance at 1 st April 2019 | 6,156 |
| Actual transfer from Reserves 2019/20 | -815 |
| Actual balance 31st March 2020 | 5,341 |
| Budgeted use 2020/21 | 0 |
| Forecast balance 31st March 2021 | 5,341 |

N.B. Actual usage in 2020/21 will be dependent upon final Capital requirements including slippage of schemes from 2019/20.

Agenda Item 9.

Report of the Cabinet Member for the Economy, Finance and Strategy

Cabinet - 16 July 2020

Capital Outturn and Financing 2019/20

| | |
|------------------------------------|---|
| Purpose: | This report details capital outturn and financing for the year ended 31 March 2020. |
| Policy Framework: | Budget Plan 2019/20. |
| Consultation: | Cabinet Members, Corporate Management Team, Legal and Access to Services |
| Recommendation(s): | It is recommended that: 1) The net under spending of the approved budget of £29.38m is carried forward to 2020/21. |
| Report Author: | Ben Smith |
| Finance Officer: | Ben Smith |
| Legal Officer: | Debbie Smith |
| Access to Services Officer: | Rhian Millar |

1. Background

- 1.1 The original capital budget approved by Council in February 2019 for 2019/20 totalled £139.009m (excluding the waste provision). During 2019/20 this figure was increased by £16.93m to give a revised budget of £155.939 (excluding waste provision).

The net increase in the capital budget was the result of:

1. The addition of both grant funded and Council funded schemes after Council approved the original programme,
2. Delayed spending from 2018/19 carried forward into 2019/20.

2. Outturn 2019/2020

- 2.1 Capital outturn in 2019/20 on the approved budget was £126.559m, which is a significant level of spend across all service areas. There was an under spend on the approved and reprofiled budget of £29.38m which is detailed in Appendix A. Apart from a small number of exceptions, the

under spends in the capital budget represent delayed spending on approved schemes. As such, the unspent budget will need to be carried forward to 2020/21 in order to complete schemes in progress.

- 2.2 It should be recognised that capital schemes are complex projects which are often faced with a host of issues including legal (planning, procurement etc.) and operational (budget, ground conditions, weather), which can offer challenges to the delivery timetable. The Covid-19 pandemic had an adverse impact on the delivery of a number of capital schemes towards the end of 2019-20 and this is likely to continue to impact upon delivery during 2020-21. In addition, it should be recorded that prior to year end, Swansea Council was commissioned by Swansea Bay Health Board and Welsh Government to deliver an estimated cost £15m 1,000 bed Surge Hospital on the site of the previous Bay Studio to address the anticipated increased demand on the NHS. The main underspends are set out in Appendix C. Some schemes were overspent compared with budget but these were profiling issues where spend was delivered ahead of the original profile.
- 2.3 Appendix A shows the breakdown of Capital Expenditure and variances in respect of individual Directorates and highlights the sum of £51.839m spent on HRA properties during the year.
- 2.4 Notwithstanding the under spending mentioned above, the capital outturn represents a significant expenditure on a number of major projects. Appendix B lists projects with expenditure in excess of £0.5m.

3. Financial Implications

- 3.1 2019/2020 capital expenditure will be financed as follows:-

| Financing Requirement | |
|---|----------------|
| | £'000 |
| Unfinanced sundry creditors 2018/19 | 5,287 |
| 2019/20 ledger capital spend | 126,559 |
| To be financed sundry creditors 2019/20 | -6,492 |
| Spend to be funded in 2019/20 | 125,354 |

| Financing 2019/20 | |
|-------------------------------------|----------------|
| | £'000 |
| Supported Borrowing | 11,852 |
| Unsupported Borrowing (GF plus HRA) | 37,462 |
| Grants and Contributions | 39,655 |
| Revenue contributions to capital | 31,243 |
| Capital receipts | 5,142 |
| Total financing 2019/20 | 125,354 |

4. Legal Implications

4.1 There are no legal implications.

5. Equality and Engagement Implications

5.1 The Council is subject to the Public Sector Equality Duty (Wales) and must, in the exercise of their functions, have due regard to the need to:

- Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act.
- Advance equality of opportunity between people who share a protected characteristic and those who do not.
- Foster good relations between people who share a protected characteristic and those who do not.

Our Equality Impact Assessment process ensures that we have paid due regard to the above.

5.2 There are no equalities implications arising from this report. A full analysis of equalities implications is carried out as part of the annual budget process and any expenditure detailed in this report is on approved schemes.

| HRA Wind & Weatherproofing (including Hi-rise flats) | 6,170 |
| HRA Refurbishment (mainly Kitchens & Bathrooms) | 25,068 |
| HRA regeneration and repairs including Easiform properties | 3,833 |
| HRA External facilities | 5,666 |
| HRA Energy Efficiency (including Boiler Replacements) | 1,100 |
| HRA Tenant Adaptations Programme | 3,137 |
| Total of schemes in excess of £0.5m | 113,971 |

| Capital Projects Underspent in excess of £0.25m | | Appendix C |
|--|-------|---|
| Project | £'000 | Comments |
| Education | | |
| Gorseinon Primary new build | 621 | Winter weather conditions have hampered progress and Covid-19 affected site progress during March 2020 resulting in a revised spend profile. |
| YGG Tan-y-Lan new build | 1,399 | Delayed start on site resulting from approval issues with Stopping Up Notice resulting in a revised spend profile. |
| Education other than at school new build | 1,536 | Delays incurred due to planning issues, winter weather conditions and Covid-19 affected site progress from March 2020 resulting in a revised spend profile. |
| Digital Services | | |
| IT - mobile and agile laptops and accessories | 1,319 | Spend driven by Agile Programme Rollout. Therefore kit is bought in time accordingly to ensure warranties are maximised. |
| Social Services | | |
| ICF - Relocate Integrated Community Hub | 396 | There has been a delay in progressing this scheme given there are complex legal issues relating to the joint ownership, which involves a trust, and need to be resolved before purchase of the site can take place. |
| Highways | | |
| Highways & Transport vehicle replacement programme | 1,262 | Some programmed vehicle tenders delayed due to resource. Crusher delivered late April (£143k spend), 7 sweepers awaiting Contract Award (£525k spend) |
| Integrated Transport Unit | 370 | Additional tender for plug door vehicles was required. Delivery of vehicles from supplier delayed due to Covid 19 shutdown. |
| Active Travel Fund schemes | 519 | Several of the projects were adversely affected by the Covid-19 shutdown during March 2020. Works are planned to resume during 2020-21 financial year with full spend expected in time for the Q5 Claim. |
| Safe Routes in Communities grant - Clydach Area | 396 | The project was adversely affected by the Covid-19 shutdown during March 2020. Works are planned to resume during 2020-21 financial year with full spend expected in time for the Q5 Claim. |

| | | |
|--|-------|---|
| Local Transport Fund and Local Transport Network funds | 821 | Several of the projects were adversely affected by the Covid-19 shutdown during March 2020. Works are planned to resume during 2020-21 financial year with full spend expected in time for the Q5 Claim. |
| Corporate Building Services | | |
| Bishop Gore Electrical works | 502 | Work on site started in February 2020, however the need to work around the operation of the school, unforeseen site issues and then working restrictions of Covid-19 have led to a delay in the completion of the project, however works are on track and should be complete by summer 2020. |
| Culture | | |
| Freedom Leisure improvements | 402 | Due to cost uncertainty and additional backlogged maintenance items becoming apparent, some improvement work to the LC was paused in Feb, to obtain confidence on the budget remaining. Covid-19 has further implications on completion of Morrision changing rooms, with interim payment certificates expected in 20/21. |
| Corporate Property | | |
| Salix Loan Energy Efficiency scheme | 250 | The contract for the refit programme is now complete. However, 'start on site' has been delayed as a result of changes to specification. 19/20 monies will need to be carried forward into 20/21. First drawdown from Salix likely to be May/June 2020 although the current Covid-19 pandemic may result in further delays. |
| Agile working furniture | 391 | Swansea received a £400k grant from WG in March 2020 financing a large part of the agile programme enabling £391k to be carried forward into 2020-21 year to complete the programme of works at the Guildhall. |
| Economic Regeneration & Planning | | |
| Swansea Central Phase 1 | 2,910 | Rivington Cashflow included contingency which wasn't used as much as predicted and Buckingham March valuation was below their Cashflow estimate. |

| | | |
|--|---------------|---|
| Kingsway offices design and planning | 929 | Stage 2 design work paused temporarily to review commercial aspects which reduced committed design team resources (review completed). Early client/consultant decision to use skype wherever possible reduced expense costs & established important working precedent well in advance of the current Covid-19 issues. |
| Palace Theatre | 1,006 | Underspend due to delays in receiving in-principle grant approval from WG which delayed acquisition of the building and appointment of MDT. Overall programme has been delayed but is a multi-year programme with grant funding that can be carried forward. |
| Powerhouse scheme at Copperworks | 1,863 | Delayed award of works contract due to tender clarifications and value engineering exercise and to source additional Council funding to mitigate the contract works coming in over budget. |
| Kingsway Infrastructure, demolition and renovation schemes | 3,038 | Contributed by the demise of Dawnus as main contractor leading to a delay within the work programme. Budget expected be utilised in full going forward. |
| HRA | | |
| More Homes programme | 1,926 | Colliers Way 2 - Welsh Water approval of drainage took seven months resulting in a delayed start, coupled with poor winter weather conditions. Parc-y-Helyg - delayed start caused by timescale of drainage approval by Welsh Water. |
| WWP Llwynceithin & Maesglas Flats | 276 | Delayed start due to possible safety issues, subsequently resolved. |
| Total underspends greater than £250k 2019/20 | 22,132 | |
| | | |

Agenda Item 10.

Cabinet Member for Investment, Regeneration and Tourism

Cabinet – 16 July 2020

Welsh Government Transforming Towns Green Infrastructure Projects

| | |
|------------------------------------|--|
| Purpose: | To comply with Financial Procedure Rule No.7 (Capital Programming and Appraisals) - to commit and authorise the inclusion of the green infrastructure projects to the capital programme. |
| Policy Framework: | Swansea Bay City Region Economic Regeneration Strategy, Swansea Central Area Regeneration Framework, South West Wales Regional Plan for Regeneration. |
| Consultation: | Access to Services, Finance, Legal. |
| Recommendation(s): | It is recommended that: 1) Cabinet approve the addition of the Welsh Government funded green infrastructure projects to the capital programme in 2020/21. |
| Report Author: | Clare James |
| Finance Officer: | Ben Smith |
| Legal Officer: | Debbie Smith |
| Access to Services Officer: | Rhian Millar |

1. Introduction

- 1.1 This report provides an update on the Welsh Government Transforming Towns Green Infrastructure funding, and requests approval to add the green infrastructure projects to the capital programme in 2020-21.

2. Background

- 2.1 On 6th December 2019 Welsh Government issued a call for applications for a £5m pan Wales Green Infrastructure fund. This funding was intended to complement the existing WG Target Regeneration Investment (TRI) Programme and specifically focused on the provision of green spaces, green infrastructure and enhanced biodiversity.
- 2.2 The funding was available in 20/21 for capital works within the current TRI target areas: City Centre & Tawe Riverside Corridor and Morriston. The fund was open to local authorities and other partners, but (like the TRI programme) all bids had to be submitted through the local authority.
- 2.3 Two Council bids were submitted along with five other bids on behalf of local partners. The seven bids had a combined grant request of £1.124m. The External Funding Panel approved submission of these bids at its meeting on 4th March 2020.
- 2.4 Welsh Government received strong interest in the green infrastructure fund and the funding pot was oversubscribed. The bids were assessed by a Panel that included WG officers and external green infrastructure experts. In April 2020 the Council was notified that four Swansea funding bids, submitted on behalf of local partners, had been successful.

3. The Green Infrastructure Grant Funding

- 3.1 Welsh Government have awarded £784,804 capital grant funding for four green infrastructure schemes in Swansea City Centre. This funding is for a green roof, green walls on two commercial buildings and a pilot scheme for green roof bin shelters. All schemes will be delivered by partner organisations.
- 3.2 Welsh Government are requiring local authorities to administer all successful funding awards, as currently happens on the TRI programme. This function will be undertaken by the Economic Development & External Funding Team and a management fee has been included in each bid to cover the Council's costs for doing this. The Council will award grant funding to all four schemes in line with the grant applications that were submitted to WG.

4. Equality and Engagement Implications

- 4.1 The Council is subject to the Public Sector Equality Duty (Wales) and must, in the exercise of their functions, have due regard to the need to:
 - Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act.
 - Advance equality of opportunity between people who share a protected characteristic and those who do not.

- Foster good relations between people who share a protected characteristic and those who do not.

Our Equality Impact Assessment process ensures that we have paid due regard to the above.

- 4.2 An Equality Impact Assessment (EIA) screening has been completed for the 4 green infrastructure projects that will be delivered by partners, and is attached at appendix 2. This tool confirms that full EIAs are not required.

5. Financial Implications

- 5.1 The financial implications are set out in Appendix A and show that £784,804 of capital costs would be added to the capital programme in 2020/21, which would be wholly funded by the Welsh Government grant. £30,000 match funding is required for one of the schemes but this will be provided by the relevant partner and there is no requirement for the authority to make capital match contributions to any of the schemes.
- 5.2 Officers will be appointed within the Economic Development & External Funding team to administer the successful funding bids, with costs met by the management fee built in to each grant. There will be no additional revenue funding implications.

6. Legal Implications

- 6.1 The Council will need to comply with the terms and conditions attached to the WG Green Infrastructure grant funding.
- 6.2 The projects will be delivered and administered in partnership with external organisations and will be managed in-line with Service Level Agreements, adhering to the terms and conditions set-out in Grant Offer Letters and following City and County of Swansea policies. In the case of grant investment in private sector developments a legal charge will be placed on property or assets linked to the grant recipient to ensure recipient adheres to grant offer terms and conditions for the necessary period to ensure financial risk to the authority is mitigated.
- 6.3 These projects are fully compliant with the Well-being of Future Generations (Wales) Act 2015. The projects align with the Council's obligation to act in a sustainable way and the examples of public and private sector investment demonstrate compliance with the 5 Ways of Working promoted by the Act and will make a significant contribution to the 7 well-being goals.

Equality Impact Assessment Screening Form – Appendix B

Please ensure that you refer to the Screening Form Guidance while completing this form. If you would like further guidance please contact the Access to Services team (see guidance for details).

Section 1

Which service area and directorate are you from?

Service Area: Planning & City Regeneration

Directorate: Place

Q1(a) WHAT ARE YOU SCREENING FOR RELEVANCE?

| | | | | | |
|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|
| Service/ Function | Policy/ Procedure | Project | Strategy | Plan | Proposal |
| <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

(b) Please name and describe here:

Welsh Government Transforming Towns Green Infrastructure Funding has been awarded to the Council to grant fund four projects that will create green walls on two commercial buildings, a new green roof and green roof bin shelters in the city centre. All projects will be delivered by partner organisations.

Q2(a) WHAT DOES Q1a RELATE TO?

| | | |
|---------------------------------------|---|---|
| Direct front line service delivery | Indirect front line service delivery | Indirect back room service delivery |
| <input type="checkbox"/> (H) | <input type="checkbox"/> (M) | <input checked="" type="checkbox"/> (L) |

(b) DO YOUR CUSTOMERS/CLIENTS ACCESS THIS...?

| | | | |
|------------------------------|------------------------------|---|---------------------------------------|
| Because they need to | Because they want to | Because it is automatically provided to everyone in Swansea | On an internal basis i.e. Staff |
| <input type="checkbox"/> (H) | <input type="checkbox"/> (M) | <input checked="" type="checkbox"/> (M) | <input type="checkbox"/> (L) |

Q3 WHAT IS THE POTENTIAL IMPACT ON THE FOLLOWING...

| | High Impact (H) | Medium Impact (M) | Low Impact (L) | Don't know (H) |
|------------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|
| Children/young people (0-18) | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Older people (50+) | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Any other age group | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Disability | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Race (including refugees) | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Asylum seekers | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Gypsies & travellers | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Religion or (non-)belief | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Sex | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Sexual Orientation | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Gender reassignment | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Welsh Language | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Poverty/social exclusion | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Carers (inc. young carers) | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Community cohesion | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Marriage & civil partnership | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| Pregnancy and maternity | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Q4 WHAT ENGAGEMENT / CONSULTATION / CO-PRODUCTIVE APPROACHES WILL YOU UNDERTAKE?

Please provide details below – either of your planned activities or your reasons for not undertaking engagement

The four green infrastructure projects have been prepared by partner organisations and the funding applications were submitted by Swansea Council to WG on their behalf. All projects will help increase green infrastructure in the city centre in line with the draft Swansea Central Area Green Infrastructure Strategy - *Regenerating Our City for Wellbeing and Wildlife* (due to be adopted in 2020). The strategy was a partnership between the Council and Natural Resources Wales and was developed with public / private / 3rd sector and public involvement. To inform the strategy over 630 face to face conversations were held with members of the public across 10 locations in the Swansea Central Area, sessions were held with the 4 primary schools within the catchment and stakeholder meetings with 6 local groups including residents and local interest groups. There was overwhelming support for more nature in the city, including trees, plants flowers and water features and many people spoke of the positive emotional benefits / feeling of happiness and calmness they felt by being in or near nature. These projects will directly support this.

Q5(a) HOW VISIBLE IS THIS INITIATIVE TO THE GENERAL PUBLIC?

| | | |
|---|--|--|
| High visibility <input type="checkbox"/> (H) | Medium visibility <input checked="" type="checkbox"/> (M) | Low visibility <input type="checkbox"/> (L) |
|---|--|--|

(b) WHAT IS THE POTENTIAL RISK TO THE COUNCIL'S REPUTATION? (Consider the following impacts – legal, financial, political, media, public perception etc...)

| | | |
|---|---|---|
| High risk <input type="checkbox"/> (H) | Medium risk <input type="checkbox"/> (M) | Low risk <input checked="" type="checkbox"/> (L) |
|---|---|---|

Q6 Will this initiative have an impact (however minor) on any other Council service?

Yes No If yes, please provide details below

Q7 HOW DID YOU SCORE?

Please tick the relevant box

MOSTLY H and/or M → HIGH PRIORITY → EIA to be completed
Please go to Section 2

MOSTLY L → LOW PRIORITY / NOT RELEVANT → Do not complete EIA
Please go to Q8 followed by Section 2

Q8 If you determine that this initiative is not relevant for an EIA report, you must provide a full explanation here. Please ensure that you cover all of the relevant protected groups.

The four projects will increase green infrastructure provision in the city centre, in line with the draft green infrastructure strategy for the Swansea Central Area. The screening process has shown that these projects will have low impacts on equality groups. Grant recipients will be required to adhere to equal opportunities policy as a condition of the funding agreement.

Section 2

NB: Please email this completed form to the Access to Services Team for agreement before obtaining approval from your Head of Service. Head of Service approval is only required via email – no electronic signatures or paper copies are needed.

Agenda Item 11.

Report of the Cabinet Member for Education Improvement, Learning & Skills

Cabinet – 16 July 2020

WLGA Correspondence: Further Funding for Music Services in Schools 2019-20

| | |
|------------------------------------|--|
| Purpose: | To advise Cabinet of the award of funding from the WLGA in relation to Music Services Provision in Schools for 2019-2020 |
| Policy Framework: | Schools Music SLA |
| Consultation: | Access to Services, Finance, Legal. |
| Recommendation(s): | It is recommended that: 1) Cabinet note the implications contained in the report and retrospectively approve the acceptance of the Grant. |
| Report Author: | Karin Jenkins |
| Finance Officer: | James Moore |
| Legal Officer: | Debbie Smith |
| Access to Services Officer: | Rhian Millar |

1. Introduction

- 1.1 The purpose of this paper is to provide an overview of the Award of Funding in relation to WLGA Education Grant 2019-2020 – Funding Support to further enhance music provision in Schools in Wales with a further £1,4000,00.

2. The Grant

- 2.1 Welsh Government awarded this grant directly and did not require an application from the Council. Allocations have been offered to all Welsh Councils. The offer to this council is £103,690 and covers the period to the 31 March 2020.

2.2 The purpose of the funding is for:

Local authorities to use the funding as they see fit and in accordance with local needs to deliver any one, or a combination of the following options whilst showing that they are using the monies in an innovative and creative way:

- FSM Support
- Ensemble Access
- Instruments
- Access and Inclusion
- Progression and Achievement
- GCSE and A level music support
- Rock and Pop Ensemble
- Master Classes
- Co-operative arrangements
- Monitoring

2.3 Due to the short timescales for acceptance imposed by Welsh Government, this report is provided to members for their information.

3. Equality and Engagement Implications

3.1 There are no equality or engagement implications associated with this report.

3.2 The Council is subject to the Public Sector Equality Duty (Wales) and must, in the exercise of their functions, have due regard to the need to:

- Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act.
- Advance equality of opportunity between people who share a protected characteristic and those who do not
- Foster good relations between people who share a protected characteristic and those who do not.

3.3 Our Equality Impact Assessment process ensures that we have paid due regard to the above. (See Appendix 1)

4. Financial Implications

4.1 This funding will help support the council's financial commitments in this key area

5. Legal Implications

5.1 The Council must comply with the terms and conditions attached to any offer of grant funding.

5.2 The Council must follow its Contract Procedure Rules when procuring any goods or services utilising this grant money.

Q4 WHAT ENGAGEMENT / CONSULTATION / CO-PRODUCTIVE APPROACHES WILL YOU UNDERTAKE?

Please provide details below – either of your planned activities or your reasons for not undertaking engagement

This additional funding stream was made available late in the financial year and therefore opportunities have been limited to undertake engagement activities.

Q5(a) HOW VISIBLE IS THIS INITIATIVE TO THE GENERAL PUBLIC?

| | | |
|---|---|---|
| High visibility <input type="checkbox"/> (H) | Medium visibility <input type="checkbox"/> (M) | Low visibility <input checked="" type="checkbox"/> (L) |
|---|---|---|

**(b) WHAT IS THE POTENTIAL RISK TO THE COUNCIL’S REPUTATION?
(Consider the following impacts – legal, financial, political, media, public perception etc...)**

| | | |
|---|---|---|
| High risk <input type="checkbox"/> (H) | Medium risk <input type="checkbox"/> (M) | Low risk <input checked="" type="checkbox"/> (L) |
|---|---|---|

Q6 Will this initiative have an impact (however minor) on any other Council service?

Yes No **If yes, please provide details below**

**Q7 HOW DID YOU SCORE?
Please tick the relevant box**

**MOSTLY H and/or M → HIGH PRIORITY → EIA to be completed
Please go to Section 2**

**MOSTLY L → LOW PRIORITY / NOT RELEVANT → Do not complete EIA
Please go to Q8 followed by Section 2**

Q8 If you determine that this initiative is not relevant for an EIA report, you must provide a full explanation here. Please ensure that you cover all of the relevant protected groups.

The additional funding stream will provide additionality to what is already being provided in schools. It will have a positive impact on the delivery of music services in Swansea. It will not have any adverse impact on any of the protected characteristics.

Agenda Item 12.

Report of the Cabinet Member for Education Improvement, Learning and Skills

Cabinet - 16 July 2020

21st Century Schools Welsh Education Partnership – Strategic Partnering Agreement

| | |
|--------------------------|--|
| Purpose: | The Welsh Government has been procuring a private sector partner to work with it on the delivery of education and community facilities in Wales, under the Mutual Investment Model (MIM) 21st Century Schools Programme. The report explains the process and seeks approval to enter into a Strategic Partnering Agreement (SPA) with the Welsh Education Partnership Company (WEPCo). |
| Policy Framework: | <ul style="list-style-type: none">• QEd Programme and Strategic Outline Programme for Band B of the 21st Century Schools and Colleges Programme• The Corporate Plan• Contract Procedure Rules and Financial Procedure Rules• The Capital Budget & Programme 2019/20 to 2024/25 approved by Council on 5 March 2020. |
| Consultation: | Finance, Legal, Procurement, Access to Services. |
| Recommendations: | It is recommended that Cabinet: <ol style="list-style-type: none">1. Notes the outcome of the Preferred Bidder Stage of the Competitive Dialogue Procedure under the Public Contracts Regulations 2015 as outlined in this report;2. Approves the Strategic Partnering Agreement at Appendix F of this report and summarised in section 3 of this report and authorises the Chief Legal Officer to enter into the agreement on behalf of the Council , subject to recommendation (3) below;3. Gives delegated authority to the Director of Education, after consultation with the Director of Place and the Chief Legal Officer: |

- a) To approve the final terms of the Strategic Partnering Agreement; and
 - b) To approve any further deeds and documents which are ancillary to the Strategic Partnering Agreement.
4. Approves the appointment of the Director of Place as 'Participant Representative' to sit on the Strategic Partnering Board (SPB);
 5. Notes that in agreeing to the Strategic Partnering Agreement, it is not being asked to decide to proceed with any Pathfinder Project, and that nothing within the Strategic Partnering Agreement commits the Council to make any such commitment. Any decision to proceed with a Pathfinder Project or indeed any new MIM project will be reported to Cabinet for decision.

Report Author: Brian Roles

Finance Officer: Ben Smith

Legal Officer: Debbie Smith

Access to Services Officer: Rhian Millar

1. Summary

- 1.1 The Welsh Government has been procuring a private sector partner to work with it on the delivery of education and community facilities in Wales, under the MIM 21st century schools programme. The Welsh Government is expected to select and appoint a preferred bidder by September 2020.
- 1.2 The successful private sector partner and a subsidiary of the Development Bank of Wales (known as WGCo) will be required to form Welsh Education Partnership Co (WEPCo), which will deliver infrastructure services to the participants in Wales.
- 1.3 The participants to the arrangements will be a number of local authorities and further education institutions. The participants and WEPCo will enter into a Strategic Partnering Agreement. Under the Strategic Partnering Agreement, WEPCo will be required to provide partnering services to the participants, including (i) project development and delivery; and (ii) supply chain assembly and management. This may lead to the delivery of revenue supported Band B projects pursuant to a separate Project Agreement or, in due course, capital funded projects could be delivered through this contract structure.
- 1.4 The purpose of this report is to explain the process and seek Cabinet approval to enter into a strategic partnering agreement with Welsh

Education Partnership Co to facilitate the delivery of education and community facilities. Cabinet is also asked to approve the appointment of the Director of Place as 'participant representative' to sit on the Strategic Partnering Board.

2. Background

- 2.1 Welsh Government funding for Band B of the 21st Century Schools Programme is being provided through £600m capital and £500m revenue funding. The revenue funding is being provided through a Mutual Investment Model (MIM), a form of private public partnership (PPP).
- 2.2 The "Mutual Investment Model", or MIM, was formally launched by the Welsh Government on 28 February, 2017 and is a platform for delivery of the "Taking Wales Forward" agenda. MIM has been designed to finance major capital projects due to a scarcity of capital funding. It is based on traditional PPP structures but with the following core principles embedded:
 - a) an emphasis on wider community benefits;
 - b) enhanced stakeholder involvement;
 - c) public sector equity investment;
 - d) no soft services; and
 - e) effective and efficient contract management by the public sector.
- 2.3 The Mutual Investment Model unlike traditional forms of PPP includes long-term obligations to secure community benefits, create apprenticeships and training places for Welsh workers and for sustainable development, in which the private partner will be required to support delivery of the Well-being of Future Generations Act.
- 2.4 The MIM is intended to support additional investment in social and economic infrastructure projects and help to improve public services in Wales. Under the MIM, the private sector partners will build and maintain public assets under licence, and in return the Council supported by funding from the Welsh Government will pay a fee to the private partner, which will cover the cost of construction, maintenance and financing the project.
- 2.5 The Project Agreement for each individual project will nevertheless make it clear that the granting of the licence shall not operate or be deemed to operate as a lease and Project Co shall not have or be entitled to exclusive possession (save as to the extent expressly included within the Ancillary Rights) nor shall it have any estate, right, title or interest in and to the Site or the Facilities. Project Co shall occupy as a licensee only.
- 2.6 The incentive is on Project Co to ensure that Works are complete on time so that it starts receiving payment of the Monthly Service Charge. In circumstances where there is a default by the contractor, including its insolvency, then Project Co will be required to find a replacement to ensure that the Works are completed on time. The risk of contractor insolvency sits with Project Co. It will have in place security to recover any additional

costs from its contractor. If a replacement cannot be found then this, in time, is likely to lead to a Project Co Event of Default and the Senior Lenders are likely to step in to Project Co's role and find a suitable replacement (pursuant to the terms of its Direct Agreement with the Authority). The failure to do so will reduce any compensation they would be entitled to. If there is a Project Co Event of Default and no replacement then the Authority will have to pay out BUT this will be based on one of two calculations. The first is if there are willing bidders to take on the contract in which case the Participant would pay the best bid received from a bidder to take it on. If there are no willing bidders then the Participant will be liable to pay what is termed the Estimated Fair Value of the Contract i.e. what would someone have paid to take it on. The Participant will receive a benefit obviously of whatever has been constructed to date

- 2.7 The grant rate for projects funded through the Mutual Investment Model is 81%. The balance of 19% will be funded from Revenue funding.
- 2.8 A summary briefing on the Mutual Investment Model (MIM) is set out in Appendix A.
- 2.9 The Council had identified four projects which could be considered for funding through the Mutual Investment Model. The most significant by far related to the Special Schools Review, however Welsh Government has since advised that a special school project is not eligible for MIM funding and therefore capital funding would now have to be sought for this potential project. The Mutual Investment Model remains appropriate for new build projects for primary and secondary schools where there are no land ownership or other legal complications.
- 2.10 Following further discussions involving Cabinet members and having identified a number of potential MIM projects, Swansea submitted a Letter of Intent dated the 28 March 2018. This confirmed the commitment to the Welsh Government's procurement of a Private Sector Delivery Partner ("PSDP") on the Council's behalf and to be named as a Contracting Authority in the Contract Notice for the procurement of the PSDP. It also confirmed a commitment to becoming a shareholder in the Welsh Education Partnership vehicle ("WEP") and to becoming a Participant under, and signing, the Strategic Partnering Agreement ("SPA"), which will allow the Council access to the Partnering Services to deliver Qualifying Projects and such other capital schemes or Facilities Management services (relating to the provision of education sector services or community services) as the Council might wish to bring to the WEP.
- 2.11 Since then, it has now been determined that there will not be a separate shareholders agreement to be entered into by the Council at the outset. The specific finance arrangements, which might include a shareholders agreement, would be agreed at individual project approval stage and therefore considered by Cabinet at that time.

2.12 The Welsh Government has been procuring a private sector partner to work with it on the delivery of education and community facilities in Wales, under the MIM 21st Century Schools Programme. It will be the only means of delivering revenue funded Band B projects. The Welsh Government is expected to select and appoint a preferred bidder during the summer of 2020. The successful private sector partner and a subsidiary of the Development Bank of Wales (known as WGCo) will be required to form WEPCo, which will deliver infrastructure services to the Participants in Wales.

3. The Strategic Partnering Agreement (SPA)

3.1 The **Participants** to the arrangements will be a number of Local Authorities and Further Education Institutions. The Participants and WEPCo will enter into a Strategic Partnering Agreement (**SPA**). The SPA provides for how the parties act together over the long term in a collaborative partnering, non-adversarial and open manner to support the effective planning, procurement and delivery of education and community facilities in Wales and the delivery of infrastructure services. The SPA is due to be executed in September 2020.

3.2 The initial term of the SPA is 10 years. This may be extended by 5 years by any one or more Participants. Under the SPA, WEPCo is required to provide partnering services to the Participants. These services include (i) project development and delivery; (ii) supply chain assembly and management and (iii) other professional services necessary to fund and deliver education and community facilities.

3.3 For the first 10 years of the SPA, WEPCo has the exclusive right to provide services to all Participants (as signatories to the SPA) including:

- a) Project Development Partnering Services to work up new “Qualifying Projects” (only) for delivery (including supply chain assembly, funding and value for money), set out in more detail in Schedule 3 (Partnering Services) of the SPA; and
- b) Project Services (design, construction, testing, commissioning and completion of the premises, hard facilities management, and installation of equipment) relating to a “Qualifying Project” subject to it becoming an “Approved Project” within the first 10 years of the SPA and for a MIM Band B project, provided that it has met the criteria set out in Schedule 5 (Approval Process for New Projects) of the SPA.

3.4 “Qualifying Projects” means those identified projects at the outset for delivery by WEPCo (as set out in a Schedule to the SPA) and all other 21st Century Schools and Colleges (Band B) MIM Programme projects, where such a project has been identified by a Participant required to enable them to provide education based services in the region.

3.5 Participants may ask WEPCo to provide on a non-exclusive basis:

- a) Project Services relating to capital projects required for the provision of education sector services (where expressly designated and approved under a Strategic Outline Programme) and/or community services;
 - b) Strategic Support Partnering Services (such as estate planning, service planning and demonstrating value for money);
 - c) Project Development Partnering Services in respect of potential new projects, which are not “Qualifying Projects”, but requested by a Participant;
 - d) Ongoing Partnering Services and/or Project Development Partnering Services after ten years, where the initial term of the SPA has been extended; and
 - e) Project Services in respect of Qualifying Projects which become “Approved Projects” after 10 years, where the initial term of the SPA has been extended.
- 3.6 If a Participant receives funding for a 21st Century Schools and Colleges Band B MIM Programme project, WEPCo has the exclusive right to develop proposals for the delivery of that project (Project Development Partnering Services) within the first 10 years of the SPA.
- 3.7 Therefore, the most likely outcome for a Participant that becomes a party to the SPA is that they proceed to develop a project or projects using the Approval Process in the SPA resulting in the execution of a Project Agreement which will govern the design, build, finance and maintenance of schools or colleges.
- 3.8 Appendix D provides a more detailed summary of the SPA.
- 3.9 The SPA commits the Participants and WEPCo to work to the following nine (9) key principles:
- a) to develop close working relationships between WEPCo and the Participants at all levels;
 - b) to focus on achieving the best value for money operational performance within agreed timescales;
 - c) to set in place business and cultural processes to enable the Participants and WEPCo to establish and agree challenging time and performance objectives and to meet or better them;
 - d) to recognise each other’s needs, constraints, limitations, capabilities, roles and responsibilities to achieve mutually beneficial outcomes;
 - e) to identify by regular monitoring, weaknesses and strengths in the relationship between and amongst the Participants and WEPCo and to work together to overcome the weaknesses and to build on the strengths;
 - f) to commit to the early recognition and resolution of differences, conflicts and disputes between and amongst the Participants and WEPCo in a ‘no surprises’ environment;

- g) to appoint within each of the Participants and WEPCo co-ordinators at senior level who will support, defend and promote the long term strategic partnership between them and its principles of operation;
- h) to develop openness and trust in a transparent information and data sharing environment; and
- i) in accordance with the Equality Requirements to positively promote equal opportunities and the Ethical Employment Code by combating discrimination on the grounds of race, ethnicity, religion, nationality, gender, disability, age or sexuality and promoting good relations between all sections of the community in 'everything we do' including:
 - I. Delivering high quality Education Sector Services and (where relevant) Community Services for end users; and
 - II. Working with the local community and partners in the public, private or voluntary sectors.

3.10 The Strategic Partnering Board (**SPB**) is the guardian vehicle of these commitments.

4. The Strategic Partnering Board (SPB)

4.1 The SPB will act as the primary mechanism for managing WEPCo's performance. The SPB will be the central forum in which the Participants can work together with WEPCo, Welsh Government and Stakeholder Representatives to ensure that the key principles of the SPA are met. Participant representation will be required on the SPB.

4.2 The SPB's role will be to approve the Strategic Delivery Plan (**SDP**); ensure any new project proposals are consistent with the SDP; monitor WEPCo's performance against agreed Key Performance Indicators; approve any extension to the SPA term; and approve any proposed disposal of interest in share capital resulting in a loss of control by WEPCo (or subsidiary).

4.3 The Council's Representative will be expected to be a senior representative of the Council, with the appropriate authority to make decisions on behalf of the Council. They should be experienced in holding a director or similar position and have the required skills to make the decisions required to be made by the SPB. The Council will need to consider any likely conflicts of interest and ensure that conflicts of interest do not prevent the chosen representative from fulfilling their role as representative as well as any other role they hold directly in the Council.

4.4 The Council's Representative will attend the SPB meetings at least every three months, together with representatives of each Participant, WEPCo, Welsh Government and other stakeholder representatives as agreed by the Participants. These meetings are to review financial and operating issues and provide strategic input into the partnering arrangements including the exchange of ideas in relation to each of the Participants' accommodation and service delivery requirements.

- 4.5 The SPB must have a quorum of five (5) Participants' representatives (one of whom must be a representative from Welsh Government) and a WEPCo Representative. If a quorum is not present at any meeting of the SPB within thirty (30) minutes of that meeting's start time, the SPA requires that the meeting is adjourned to the same time and place five (5) Business Days later. For any adjourned meeting, the quorum shall be one Participant's Representative (who must be a representative of the Welsh Government) and the WEPCo Representative. Telephone conference calls or video conferences are valid as a meeting of the SPB. Appendix E provides a more detailed summary of the role of the SPB.
- 4.6 The Director of Place is recommended as 'Participant Representative' to sit on the Strategic Partnering Board, as the lead Director for the procurement of construction related frameworks and contracts with responsibility for regeneration.

5. Pathfinder Projects

- 5.1 WEPCo shall, if requested to do so by one or more Participants, develop proposals for the implementation and delivery of new projects including Pathfinder Projects through the Approval Process for New Projects set out in Schedule 5 of the SPA. WEPCo will assist Participants in developing proposals for the delivery of new projects, the preparation of an outline business case and the obtaining of all necessary approvals to progress any new project request by a Participant.
- 5.2 Pathfinder status depends on the engagement and readiness of the relevant Participant and their chosen site, and is not linked to the Welsh Government choosing specifically a scheme to be a Pathfinder. The Welsh Government team have been working with a number of Authorities to-date and it is yet unclear how many Pathfinders there may be. It is hoped that by the signature of the SPA there will be at least one Pathfinder, but Pathfinder projects may also be identified after signature of the SPA.
- 5.3 The Council had previously identified four potential projects that may be eligible for MIM, leaving three remaining with the switch of the potential special school project to capital funding. These now will require review and scoping, and depending upon the timescales it is possible that one of these projects may be progressed in time for the first phase of Pathfinder projects.
- 5.4 Schedule 5 of the SPA sets out the procedure by which WEPCo and the Participants will work together to agree which New Projects will be taken forward and approved for development by WEPCo and on what basis. Schedule 5 sets out a two stage Approval Process for such New Projects. The approval process shall only apply in relation to Qualifying Projects regardless of whether the period of ten (10) years from the Commencement Date has expired.

- 5.5 WEPCo will work with Participants to develop local delivery plans (addressing Participants' requirements) which will form part of the annual Strategic Delivery Plan (SDP). WEPCo will then review the applicability of the SDP to the provision of education services in the Participant's Region to decide which New Projects should progress. The SPB shall ensure that WEPCo's proposals for New Projects are consistent with delivery of the latest SDP.
- 5.6 WEPCo shall, without entitlement to specific or additional payment, work with the Participants and other members of the SPB to analyse and discuss the range of potential funding options for New Projects, as well as develop the Participants' requirements in relation to New Projects.
- 5.7 WEPCo will be obliged to meet the Participants' requirements for the delivery of any new project including Pathfinder Projects. Authority to proceed to deliver any new project including a Pathfinder Project, and to enter into a Project Agreement, would require further Council approval and reports will be brought back to Cabinet for determination accordingly.
- 5.8 Appendix B provides a more detailed summary of the Approval Process for New Projects under the SPA.

6. What Happens If Approval Is Not In Place By September 2020?

- 6.1 Local Authorities and FEIs are strongly encouraged to sign up to the arrangements with WEPCo via the SPA regardless of whether they have a MIM Project in place as WEPCo also offers Strategic Support Partnering Services which can assist Participants with estates planning or associated activities.
- 6.2 It is recognised that Cabinet is being asked to agree to enter into the SPA before the Welsh Government has appointed a preferred bidder. As such, the SPA document is not yet in its final form. Whilst it is not envisaged that the draft SPA will change substantially once a preferred bidder is approved, it is recommended that delegated authority is given to the Council's Director of Place, in consultation with the monitoring officer, to agree the final terms of the SPA and make any necessary minor amendments to it, should these be required.
- 6.3 The purpose of the SPA is to enable Participants to proceed to develop a project or projects using the Approval Process for New Projects within the SPA, resulting in the execution of a Project Agreement. In order to benefit from that process Participants need to execute and be a party to the SPA.
- 6.4 Whilst there is a mechanism within the SPA that will allow for those Participants (named in the OJEU) to sign up after September 2020 by way of a deed of adherence (**DoA**), this will create several complexities:
- a) Where any Participant is to sign the DoA this will require all existing parties to re-execute the SPA. This will require all Participants to take

further decisions to re-enter the SPA, creating delays in the delivery of Pathfinder Projects

- b) Where any Participant is not signed up to the SPA by the September 2020 deadline, it is unlikely that they will have a Pathfinder Project or be included in the first Annual Business Plan of WEPCo. This will cause delays in the delivery of any education project
- c) There may be a procurement risk in entering into the DoA, based on time elapsed argument, if the DoA is not entered into within 6 months

7. Potential Procurement Risk

- 7.1 If a Participant were to choose not to sign the SPA or the DoA and then wanted in the future to access Partnering Services or Project Services from WEPCo, it will not be able to do so in a procurement safe manner.
- 7.2 Similarly, with regards to 21st Century Schools and Colleges Band B funding, if a Participant were to choose not to sign the SPA or the DoA but then wanted to utilise WEPCo to deliver a Band B funded project (whether capital or revenue) in the future, it will also not be able to do so in a procurement safe manner.
- 7.3 Should for example, a Participant secure MIM Band B funding downstream from the Welsh Government for a project not currently identified and it was required to use WEPCo, it would not be able to do so in a procurement safe manner if it had not signed the SPA or the DoA. WEPCo has the exclusive right to develop proposals for the delivery of a 21st Century Schools and Colleges Band B MIM Programme project (Project Development Partnering Services) within the first 10 years of the SPA.
- 7.4 It is therefore recommended that Cabinet approve entering into the SPA as set out this report to ensure that the SPA can be completed in the Autumn as planned and that the Council is able to utilise the SPA from its go-live date.

8. The Procurement Process

- 8.1 The Welsh Government is engaged in a competitive dialogue tender process working to the procurement timetable below at Table 1. The aim of the competitive dialogue procedure is to enable the Welsh Government as the contracting authority to "identify the solution or solutions which are capable of meeting its needs". Comprehensive dialogue has been held with each of the Bidders during the Dialogue Process.
- 8.2 On 14 February 2020 three Draft Bids were received. These were reviewed and comments sent back on the Draft Bid submissions to inform the next stage of dialogue. On 20th February a "meet the Bidders" event was held at the Yr Hafod facilities in CP2, well attended by Participants and other Stakeholders.

9. Impact of Covid-19

9.1 The final intensive stage of Dialogue known as 'boot camp' was due to commence at the Principality Stadium on Monday 16 March 2020. On 14 March a member of the core team and one of the advisers both took ill with coronavirus symptoms. Due to the ensuing events with the Covid-19 pandemic the decision was taken to delay the start of boot camp to make arrangements for it to be conducted remotely via Microsoft Teams or other remote methods where required. Following two weeks of very intensive remote engagement activity separately with the three bidders (which included involvement from bid team members based across Europe) at 18.30 hrs on 3 April 2020 the Welsh Government successfully Closed Dialogue and invited Final Bids in line with the original procurement programme.

9.2 Bidders submitted their Bids by 12 noon on 27 April 2020 and compliant Final Tenders were received from the three bidders. Since then Welsh Government have;

- Evaluated and completed moderation of the bids by 20th May 2020.
- Completed all necessary Welsh Government Ministerial approvals and Welsh Government assurance procedures ahead of schedule in order to move to the next milestone and select the preferred bidder.
- Selected the preferred bidder.
- Informed all bidders of the outcome of the evaluation and have sent out the Standstill/Alcatel letters together with an offer to give feedback to all three bidders.

The signature of the SPA is expected to take place in accordance with the timetable set out below.

Table 1

| Matter | Date(s) |
|---------------------------------------|---|
| Issue of ITPDSB to Bidders | 21 October 2019 |
| Commencement of Dialogue with Bidders | 28 October 2019 |
| Christmas Break | 18 December 2019 - 5 January 2020 |
| Continuation of Dialogue with Bidders | 6 January 2020 |
| Return of Draft Bid | 17:00 hours 14 February 2020 |
| Recess | 17 February 2020 - 13 March 2020 |
| Boot Camp | 16 March 2020 - 3 April 2020 |
| Close of Dialogue | 3 April 2020 |
| Return of Bids | 12:00 noon 27 April 2020 |
| Evaluation of Bids and approvals | 27 April 2020 - 30 June 2020 (original timescale 3 July 2020) |
| Appointment of Selected Bidder | 30 June 2020 (original timescale 3 July 2020) |
| Standstill | 1 July 2020 – 10 July 2020 |

| | |
|--|----------------|
| Following formation of WEPCo, signature of WEPCo Shareholders' Agreement | September 2020 |
| Signature of Strategic Partnering Agreement | September 2020 |

10. Equality and Engagement Implications and the Well Being of Future Generations Act

Equality and Engagement Implications

10.1 The Council is subject to the Public Sector Equality Duty (Wales) and must, in the exercise of their functions, have due regard to the need to:

- Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act.
- Advance equality of opportunity between people who share a protected characteristic and those who do not.
- Foster good relations between people who share a protected characteristic and those who do not.

Our Equality Impact Assessment process ensures that we have paid due regard to the above.

10.2 An Equality Impact Assessment (EIA) screening has been completed for the wider 21st Century Schools Band B programme with a further screening now completed for this Strategic Partnership Agreement. Whilst there are no specific equality or engagement implications at this stage in the process, all projects that are/would be the result of these agreements, would be subject to the EIA process (which incorporates the UNCRC) with the likelihood that a full EIA report would be required for each project.

10.3 In addition, all stakeholders would be fully engaged as each project is developed and in a number of cases statutory consultations would be required.

Well Being of Future Generations Act

10.4 The Well-being of Future Generations Act (WGFGA) ensures that public bodies think more about the long term, work better with people and communities and each other, look to prevent problems and take a more joined-up approach.

10.5 Band B of the 21st Century Schools and Colleges Programme is based upon a consistent and objective assessment of each sector and school catchment, reviewing current pupil numbers and capacities with projected future demand for places and also the number of pupils nearest to each School. This seeks to define and demonstrate the need both now and in the future. This process considers not exclusively, the wellbeing of pupils,

teaching and learning, curriculum developments, the appropriate size of school and learner travel.

- 10.6 All projects have a communication plan, which is reviewed regularly. This includes the engagement strategy; school (governors, head, staff, pupils, parents as well as the wider community) are fully engaged throughout the lifecycle of projects to ensure that the views of stakeholders are fully taken into account.
- 10.7 The delivery of projects through the MIM route will still afford the opportunity to adopt the ways of working and consider how best the goals of the WBFGA can be fulfilled.
- 10.8 The Mutual Investment Model also unlike traditional forms of PPP includes long-term obligations to secure community benefits, create apprenticeships and training places for Welsh workers and for sustainable development, in which the private partner will be required to support delivery of the Well-being of Future Generations Act.

11. Financial Implications

- 11.1 There are no immediate financial implications within this report, although there are potential projects within the current 21st Century Schools Band B programme envelope which may be considered for MIM funding (and any later funding Bands).
- 11.2 The MIM 21st Century Schools and Colleges Programme: Band B Guide to the MIM Programme (for Participants) May 2019 sets out the funding contributions available for MIM projects as follows:

“Welsh Government (“WG”) has established the following funding contribution principles, subject to Business Case Approval:

 - WG will fund LA/FEI 81% of the Annual Service Payment for projects delivered under a MIM Project Agreement by an individual Participant (via revenue);
 - Subject to certain conditions being satisfied, WG will provide 100% funding to support any activities which would not otherwise be required for a Capital project e.g. PPP specific Legal, Technical and Financial Advice.
 - WG will fund all other development activities on the same basis as the 21st Century Schools and Colleges Capital Programme “
- 11.3 The MIM Funding Criteria guidance note provides a breakdown of how the various activities / elements will be funded.
- 11.4 Each project will be option appraised to ensure the project is suitable for MIM funding and provides Value for Money and a comprehensive options appraisal incorporating net present value cashflows will be prepared to assess each project. If MIM funding is considered the most appropriate

and Value for Money means of delivering a project a further report will be prepared for Cabinet approval for each individual project.

- 11.5 Appendix A provides an overview of the Mutual Investment Model and further detail regarding its revenue and capital implications.
- 11.6 Fundamentally, MIM offers a significant additional stream of investment to support the priority needs identified by local authorities for Band B of the 21st Century Schools Programme. The WG continues to encourage all Local Authorities and FEIs to sign up to the arrangements with WEPCo regardless of whether they currently have a potential MIM Project, as WEPCo also offers Strategic Support Partnering Services which can assist Stakeholders with estates planning or associated activities.
- 11.7 At this stage, the Council is not committing to any project(s), so there is no firm commitment or financial implications and there will be further reports regarding any specific projects at the appropriate time.
- 11.8 It may be noted however that for each specific project, Project Co does not receive payment from the Participant until the Works are complete and the Services start to be provided (the Payment Commencement Date). Thereafter, it will be paid the Annual Service Charge until the end of the MIM Project Agreement. The Annual Service Charge (subject to performance) includes;
- WEPCo Partnering Services in relation to Stage 2: Full design and planning.
 - Accommodation in accordance with the agreed SoA and in accordance with the size parameters.
 - External works including site connections (footpaths, roads etc) landscaping, 3G Sports pitches (where deemed to form part of the project delivery) within the red line boundary.
 - Temporary accommodation will only be funded where it is a requirement to enable delivery of the proposed solution i.e. construction on an existing site where the existing buildings must be demolished to enable the new school or college to be constructed.
 - Hard FM (maintenance and lifecycle)
 - Statutory e.g. planning applications, building control, highways, NRW, etc
 - Insurance associated with Project delivery (Project Co Insurance).
- 11.9 However, WEPCo may recover the Incurred Stage 2 Project Development Fee (pre-construction phase costs) immediately following the Stage 2 pre-construction phase report under certain conditions and if the project does not progress.
- 11.10 The charge under the Project Agreements will include a proportion of WEPCo's overheads (Ongoing Partnering Services Costs), and the Project Development Fee (for working up New Projects), and cost of Partnering Services.

11.11 There will be certain costs that will not be included in the Annual Service Charge and will be a direct project capital cost that will be incurred at the time that the cost is incurred; such costs may include;

Costs 100% funded by Participant

- Internal fees including Education, CBS, IT and Legal
- Internal costs for example legal searches
- Decant costs
- External works outside the red line boundary including s278 highway works
- Temporary accommodation if this does not form part of the solution or suitable alternatives can be found.
- Bringing all services to the site
- Site enabling works including land remediation, ecological works and demolition of existing buildings, prior to taking the scheme to WEPCo - **However** if the project is identified by Welsh Government as a Pathfinder, in which case enabling works may be funded by Welsh Government to support the programme delivery; funding will be dependent upon the availability of public capital.

Costs 100% funded by WG

- Professional adviser fees

Costs 65% funded by WG on a capital basis

- WEPCo Stage 1 Project Development Fees will be paid on a Stage 1 Approval being issued, otherwise these will be 100% funded by the Participant.
- Some furniture and equipment dependent on category otherwise this will be part of the annual charge
- ICT Hardware

11.12 The service charge would be fixed for the duration of the project (25 years), although subject to inflation

11.13 The MIM annual charge represents a significant revenue commitment, however, with a WG intervention rate of 81%, the cost falling on the authority is comparable with traditional prudential borrowing costs and makes it a realistic option for authorities. MIM also has the potential benefits previously outlined, including the effective maintenance of the asset over a long period of time.

11.14 Work is continuing to deliver the remaining investment priorities within Band B and identify any opportunities afforded by MIM and for a Pathfinder Project(s). Potential MIM schemes are included within the Band B envelope incorporated into the Capital Budget and Programme 2019-20 to 2024-25, approved by Council on 5 March 2020.

12. Legal Implications

- 12.1 Approval to enter into the Strategic Partnering Agreement (SPA) is an executive function requiring a decision of the Cabinet.
- 12.2 To enter into and participate in the SPA referred to in this report, the Council will be relying upon a number of statutory powers:
- a) the “well-being” powers contained in section 2 Local Government Act 2000;
 - b) powers contained in the Education Acts 1996 and 2002;
 - c) the “incidental” provisions of section 111 Local Government Act 1972.
- 12.3 The well-being powers contained in section 2 Local Government Act 2000 permit the Council to do anything which it considers is likely to achieve any one or more of the following objects—
- a) The promotion or improvement of the economic well-being of their area;
 - b) The promotion or improvement of the social well-being of their area, and
 - c) The promotion or improvement of the environmental well-being of their area
- 12.4 The incidental provisions of section 111 Local Government Act 1972 permit the Council to do anything (whether or not involving the expenditure, borrowing or lending of money or the acquisition or disposal of any property or rights) which is calculated to facilitate, or is conducive or incidental to, the discharge of any of their functions.
- 12.5 The programme will need to operate in line with the Well-being of Future Generations (Wales) Act 2015. The Act sets a framework of seven goals to develop and protect the social and economic development and cultural well-being of Wales and the five ways of working to achieve sustainable development.
- 12.6 Entering into the SPA does not bind the Council in any way. However, the Council will be required to appoint a representative to act on its behalf in relation to the SPA. The identity of the representative may change at any time following written notice to WEPCo and all other Participants. Each representative may also at any time, by written notice to WEPCo, authorise others to exercise the functions and powers of the Council.
- 12.7 The power to appoint an individual to the Strategic Partnering Board (SPB) is contained within Schedule 2 Local Authorities (Executive Arrangements) (Functions and Responsibilities) (Wales) Regulations 2007. Cabinet is asked to approve the Director of Place for appointment as ‘Participant Representative’ to sit on the Strategic Partnering Board (SPB).

12.8 The SPA is to be executed as a deed and attested in accordance with Article 14(5) of the Constitution.

Local Government Act 1972.

Summary briefing on the Mutual Investment Model (MIM)

1. Background:

- 1.1 A presentation by the then Cabinet Secretary for Finance and Local Government in March 2016, provided an introduction to MIM as an investment approach, highlighting some of the key features, processes and governance.
- 1.2 Since this time, there have been a number of further presentations and discussions involving Cabinet members regarding the Band B programme and funding.
- 1.3 A Cabinet Report in July 2017 considered and endorsed the future proposals and investment priorities for Band B of the 21st Century Schools Programme for submission to the Welsh Government (WG). This identified four potential projects (£58.7m out of a total Band B submission of £149.7m) which best met the WG criteria at that time for funding through MIM. To deliver these projects outside of MIM would have greatly increased the existing prudential borrowing commitment for other projects, as well as requiring a far larger share of the limited traditional capital 'pot' available to the WG, so risking the delivery of those projects in Band B.
- 1.4 In December 2017, WG approved Swansea's Band B 'in principle' and in its entirety; however, it subsequently requested a review of potential MIM projects against tightened criteria, specifically:
 - To encourage market interest, "ideal facilities for MIM delivery are 100% new builds that are:
 - Secondary Schools larger than 800 places;
 - Primary schools larger than 420 places;
 - All through schools; and Further Education Colleges. "
 - "It is not value for money to put small or very complex projects (such as special schools, PRUs and very small primaries) through a MIM route."
 - "It is therefore, unfortunate that a number of projects that have been put forward for MIM, via the SOPs [Strategic Outline Programmes], are now deemed unsuitable for delivery under this funding model."

In Swansea's case, this included the potential new build special school.
- 1.6 Since this time, there have been further discussions and updates to Cabinet members outlining WG progress in establishing this procurement and delivery model. This included the WG:
 - Tendering for a single strategic partner
 - Organising independent legal representation for all stakeholders
 - Seeking to resolve specific legal issues and concerns in relation to MIM in relation potential aided sector projects

2. **More Recent Progress:**

2.1 This has included:

- Considerable work to develop detailed business cases and the early delivery of priority projects within Band B, drawing down from the available traditional capital funding within the approved programme envelope.
- Clarification of MIM approach, timescales and opportunities to support the delivery of the remaining priority projects
- The submission of tenders from potential strategic partners and the detailed evaluation of submissions by WG with a view to the appointment of the selected bidder by July 2020.
- The current request for approval to sign up with that partner, considered in this report.

3. **What is MIM and what are its benefits?**

3.1 The Mutual Investment Model is a form of Public Private Partnership (PPP) but unlike traditional forms of PPP includes long-term obligations to secure community benefits, create apprenticeships and training places for Welsh workers and for sustainable development, in which the private partner will be required to support delivery of the Well-being of Future Generations Act.

3.2 Specifically MIM:

- Allows the delivery of an additional £500 million (capital equivalent) of education infrastructure beyond WG capital borrowing limits
- Ensures that a facility is well maintained over a long period of time (25 years) and at expiry of the contract the facility must be handed back in good condition
- Places the public sector in a stronger commercial position in the event of default (such as insolvency of the Construction Contractor (such as with Carillion) or failings in construction (such as with some Edinburgh Schools) than on a comparable capital project
- Promotes the public interest through embedding within the Contract an obligation on the private sector to provide stretching community benefits
- Benefits from an expert delivery team with a proven track record of procuring, delivering and operating these complex projects

Strategic partnering offers:

- A tried and tested model (e.g. in Scotland and 'Building Schools for the Future' in England)
- Smaller MIM projects to be included
- Local Authorities to be a contracting counterparty
- Potential support for the delivery of other projects

MIM differs from traditional capital funding in that:

- There is no capital cost up front but an annual charge once possession is taken of the new facilities (a contractual commitment)
- There will need to be some capital funding to meet costs such as surveys and preliminary investigations and furniture and equipment etc. (IT and up-front costs to get to RIBA Stage 0) which can't be MIM funded
- The contract term and annual charge would be for a period of 25 years

Land Ownership:

- There is no transfer of land ownership involved in a MIM Project at any point
- The MIM Project Agreement deals with property interests in a different way to other contracts, in that ownership remains with the Authority.
- The Authority will then merely grant a licence, to use and access the Site to Project Co (set up by WEPCo). This is so that Project Co can enter and remain on those parts of the Site as necessary to carry out the Works (during construction) and/or the Services (following construction). This will extend to such rights as necessary in relation to dealing with utilities.
- Once the building is complete the End User (in this case the School) occupies the facility (as does the existing school presently) and Project Co is responsible for providing ongoing Maintenance and Lifecycle services to the Facility again under an “access protocol” which is agreed by the End User/Authority and Project Co
- Project Co has no proprietary interest in the land
- However, Project Co does have a right to be repaid by the Authority for the Facility and the Service Provision (under the Annual Charge) and it is that payment stream from the public sector to the private sector that is effectively the “security” that the Senior Debt funder relies on (rather than a “Charge” over the land and facility itself)

4. Eligibility for MIM

- 4.1 To be considered for funding through MIM a potential project would need to be:
- 100% new build on a site with no unresolved legal or other issues
 - A single project or batch of projects with a capital value of more than £15 million comprising:
 - Primary Schools
 - Secondary Schools
 - All through Schools
 - No Special Schools or PRUs would be considered appropriate for MIM

5. How does MIM work?

- 5.1 MIM differs from the Private Finance Initiative (PFI) by:
- Sharing (but not capping) profits: sharing in the earnings of a PPP by taking equity
 - Promoting the public interest through the right to appoint a Director

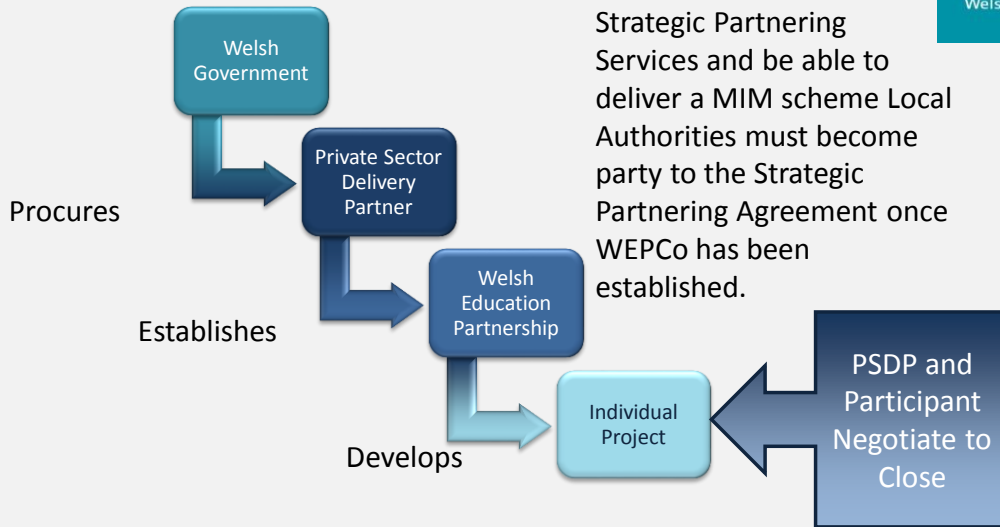

- **Not including ‘soft’ services**, such as cleaning and catering
- Embedding **transparency** about costs and performance, and the requirement to review efficiency, effectiveness and performance every two years
- **Not including equipment**, which can be funded more efficiently from public capital
- It’s provisions to secure **community benefits; and others** to help deliver the objectives of the **Well-being of Future Generations Act**; as well as incorporating a commitment to an **ethical employment code**
- Strengthened provisions around **Handover**, ensuring infrastructure is ready to be used on time at the point of Completion
- Having an improved **Change Protocol**, so allowing the adoption of changes efficiently during the construction and operational phases, at agreed costs or with known methodologies, with some low value changes being able to be performed directly by the public sector rather than Project Co.
- Low Value Maintenance work falling outside the Project Agreement.
- Energy consumption and insurance premium being treated as pass-through costs.
- *In short, MIM is similar to PFI in the funding mechanism but with many of the rough edges removed and concerns addressed – particularly regarding ‘soft’ services etc.*

5.2 Once built the following ‘hard’ facilities management services would be included within the contract:

- Asset Maintenance including all systems, Mechanical and Electrical, and statutory testing
- Energy and utilities supply and management including energy and water efficiency
- Helpdesk
- Quality assurance and continuous improvement
- Health and safety management including fire safety
- Environmental management
- Performance monitoring and reporting
- Interface services
- Internal redecoration – to be confirmed

5.3 The diagram below shows the strategic partnering arrangements:

WEP Strategic Partnering

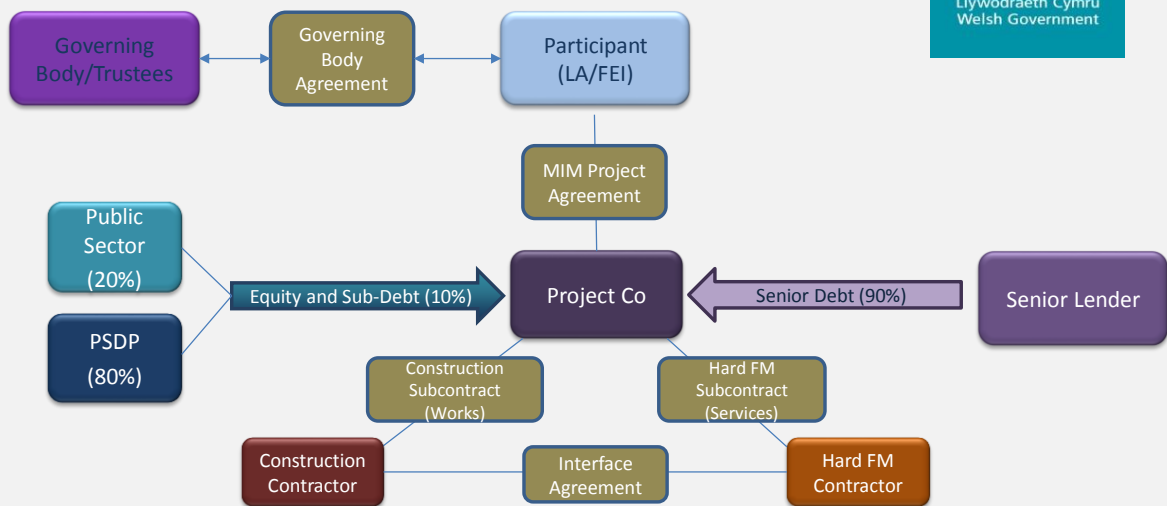

In order to access the Strategic Partnering Services and be able to deliver a MIM scheme Local Authorities must become party to the Strategic Partnering Agreement once WEPCo has been established.

6. Specific Issues re Aided Sector Projects

6.1 The proposed structural approach to delivering Church Schools via MIM and the strategic partnering arrangements is set out in the diagrams below:

MIM Structure (Church Schools)

6.2 This is a model that has been accepted in England by both the Catholic and Church of England Diocesan Authorities and there are no apparent reasons why MIM is not an appropriate delivery vehicle for both church

and Local Authority (LA) maintained schools. However, the contracting authority to the Project Agreement will have to be the relevant Local Authority, which will require it to be party to the Strategic Partnering arrangements that are currently being put in place. This does not cost anything and it has been recommended that all LAs and Further Education Institutions (FEIs) in Wales sign up to the arrangements to give them the option to deliver MIM projects in the future.

6.3 One of the benefits of MIM for voluntary aided schools is that the building is maintained and life-cycled for 25 years and 85% of the cost of the facility, financing the facility and the associated maintenance / lifecycle is funded by Welsh Government. Moreover, WG have agreed in principle (subject to approval) to fund the legal fees of the Trustees to enter into the Governing Body Agreement provided that the first school's agreement will act as a standard precedent that is applicable across church schools in Wales.

6.4 In the case of a voluntary aided school, where the Diocese owns the land, the most sensible approach is for the Local Authority to enter into the MIM Project Agreement with Project Co, and agree that the provision of the licence to Project Co from the Local Authority is backed off via a Governing Body agreement with the Diocese (in this case the Landowner).

7. Can the Council afford MIM and does it represent good value for money?

7.1 The annual charge represents a significant revenue commitment, however, with a WG intervention rate of 81%, the cost falling on the authority is comparable with traditional prudential borrowing costs and makes it a realistic option for authorities. MIM also has the potential

benefits previously outlined, including the effective maintenance of the asset over a long period of time.

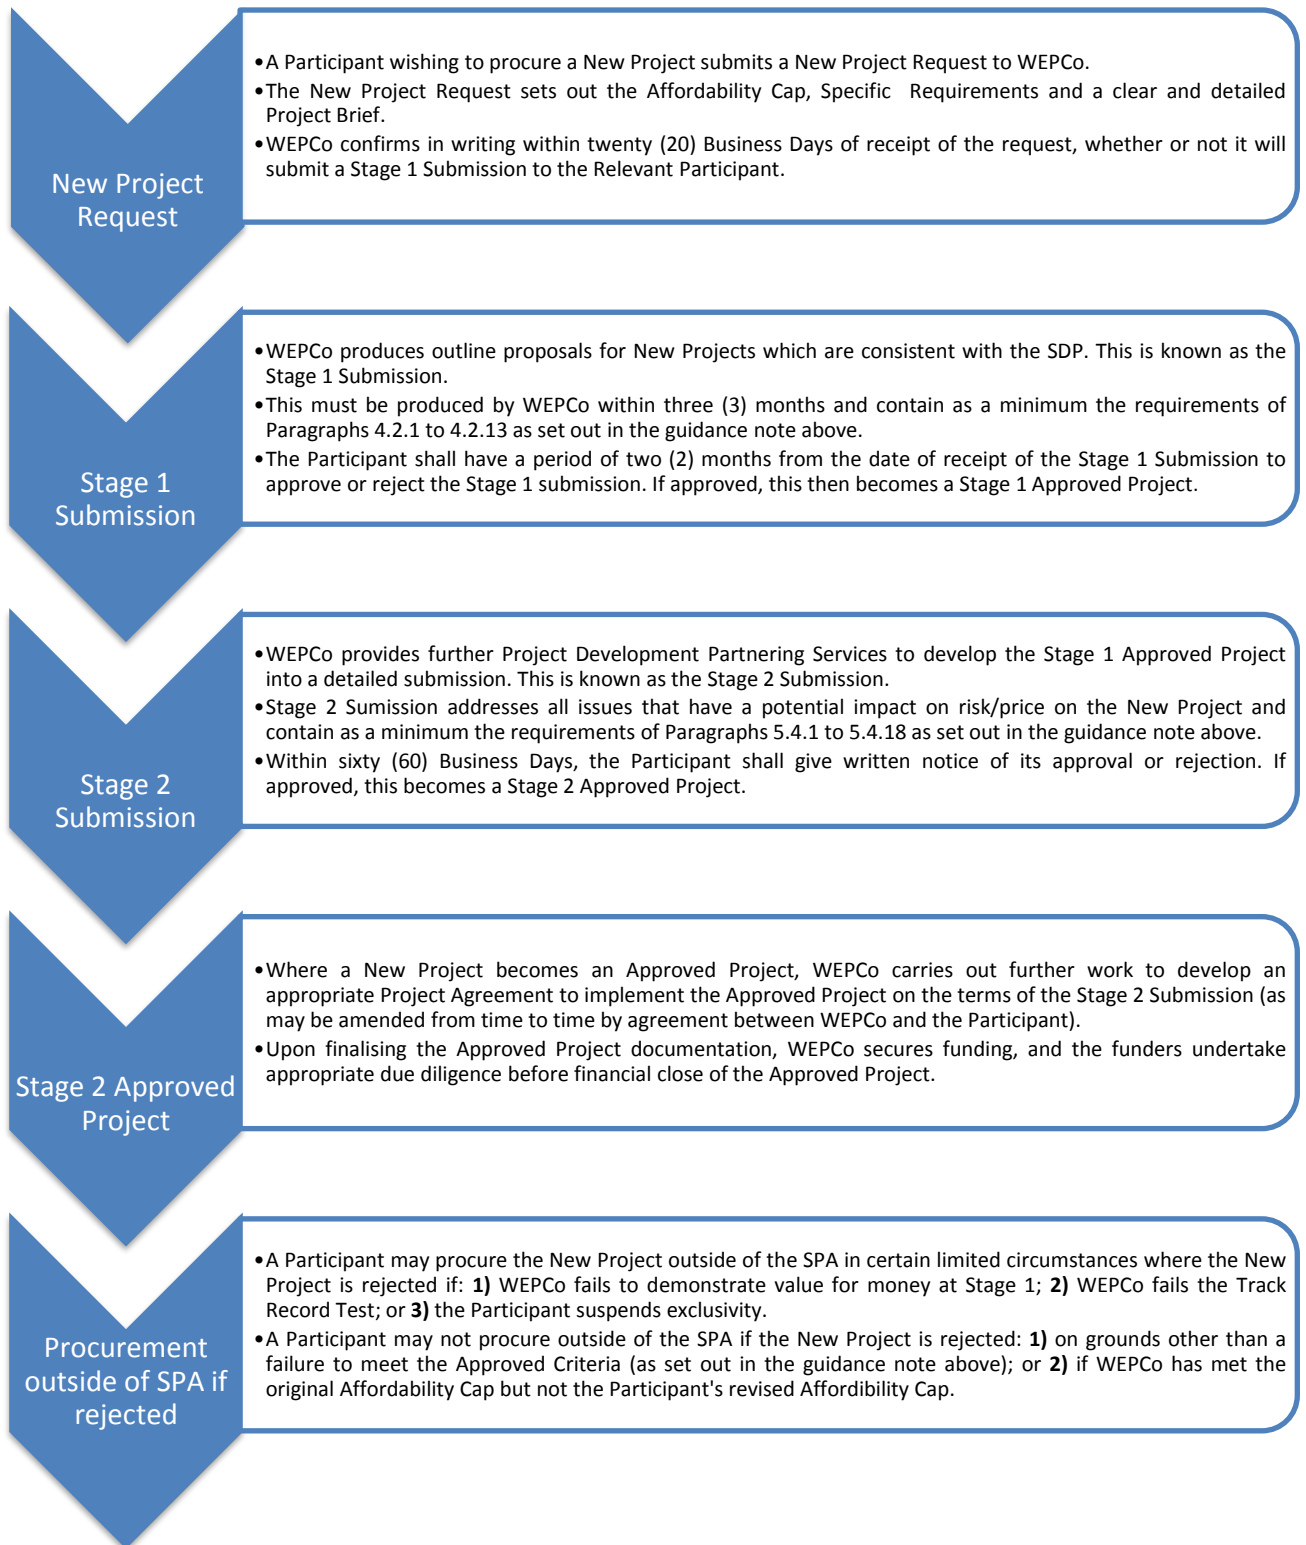

- 7.2 Fundamentally, MIM offers a significant additional stream of investment to support the priority needs identified by local authorities for Band B of the 21st Century Schools Programme. The WG continues to encourage all Local Authorities and FEIs to sign up to the arrangements with WEPCo regardless of whether they currently have a potential MIM Project, as WEPCo also offers Strategic Support Partnering Services which can assist Stakeholders with estates planning or associated activities.
- 7.3 An authority effectively needs to be 'in it to win it.' At this stage, the Council is not committing to any project(s), so there is no firm commitment or financial implications and there will be further reports regarding any specific projects at the appropriate time.

8. **Timeline / Next Steps**

8.1 The next steps in the WG procurement timeline are as follows:

- Evaluation of Bids and approvals 27 April 2020 - 3 July 2020
- Appointment of Selected Bidder 3 July 2020
- Standstill 4 July 2020 - 14 July 2020
- Formation of WEPCo and sign up to Strategic Partnering Agreement by all LAs and FEIs by September 2020
- Start to develop first MIM Pathfinder Projects September 2020
- The process to progress a specific MIM project is set out below and initially requires the submission of a Strategic Outline Case (SOC) and completion of the Stage 0 checklist.

WEP Strategic Partnering Delivery Model - Approval Process for New Projects Summary

WEP STRATEGIC PARTNERING DELIVERY MODEL**APPROVAL PROCESS FOR NEW PROJECTS****1 INTRODUCTION**

- 1.1 The WEP Strategic Partnering Agreement (**SPA**) is the agreement entered into between the Local Authorities and Further Education Institutions (the **Participants**) and WEPCo (being the joint venture company established between the Private Sector Delivery Partner and a subsidiary of the Development Bank of Wales).
- 1.2 Schedule 5 of the SPA sets out the procedure by which WEPCo and the Participants will work together to agree which New Projects will be taken forward and approved for development by WEPCo and on what basis. Schedule 5 sets out a two stage Approval Process for such New Projects. The approval process (as discussed in more detail below) shall only apply in relation to Qualifying Projects regardless of whether the period of ten (10) years from the Commencement Date has expired.
- 1.3 The Parties may agree to utilise this process (amended as appropriate) in respect of other Project Services under Clause **Error! Reference source not found.** but are not obliged to do so.
- 1.4 A flow diagram outlining the Approval Process for New Projects is appended to this guidance note at Appendix A.
- 1.5 Capitalised terms in this guidance note shall have the meaning given to them in the SPA unless otherwise defined in this guidance note.

2 OBLIGATIONS OF THE PARTIES***How are New Projects identified at the outset?***

- 2.1 WEPCo will work with Participants to develop local delivery plans (addressing Participants' requirements) which will form part of the annual Strategic Delivery Plan (**SDP**). WEPCo will then review the applicability of the SDP to the provision of education services in the Participant's Region to decide which New Projects should progress. The SPB shall ensure that WEPCo's proposals for New Projects are consistent with delivery of the latest SDP.

How far will WEPCo's role extend in developing New Projects and obtaining approval?

- 2.2 Paragraphs 2.1 and 2.2 of Schedule 5 lists WEPCo's general obligations in developing New Projects. WEPCo has a full set of obligations, including:
 - 2.2.1 identifying Participants' requirements for future New Projects;
 - 2.2.2 prioritising New Projects and advising on best timeframes for New Projects;
 - 2.2.3 engaging with stakeholders and advising on the preferred funding options;
 - 2.2.4 preparing outline business cases;
 - 2.2.5 obtaining all necessary approvals;
 - 2.2.6 agreeing an appropriate Comparator for determining adjustments to the Project Development Fee Cap; and
 - 2.2.7 agreeing each part of the Project Development Fee Estimate..
- 2.3 WEPCo shall (pursuant to Paragraph 2), without entitlement to specific or additional payment, work with the Participants and other members of the Strategic Partnering Board (**SPB**) to (including but not limited to) analyse and discuss the range of potential funding options for New Projects, as well as

develop the Participants' requirements in relation to New Projects (as more explicitly set out in Paragraphs 2.2.1 to 2.2.11).

What are the Participants expected to do by way of the Approval Process for New Projects?

- 2.4 Paragraph 2.3 of Schedule 5 sets out the Participants' obligations, which mainly includes obligations of co-operation with WEPCo, including providing necessary information; identifying its needs and funding opportunities (including benchmarks); and providing assistance in obtaining necessary Consents.
- 2.5 Each Participant will co-operate with WEPCo in its performance of its obligations (as set out in Paragraphs 2.2.1 to 2.2.11) in relation to any New Project or any potential New Project being developed by WEPCo. Where the potential Participant and WEPCo are unable to agree the matters referred to in paragraph 2.2.11 within a period of three (3) months, the SPB shall determine such matters.

3 NEW PROJECT REQUEST

- 3.1 Any Participant wishing to procure a New Project (**Relevant Participant**) shall first submit a New Project Request to WEPCo to produce a Stage 1 Submission (Paragraph 3.1). This New Project Request will need to set out matters, including but not limited to, the Affordability Cap, Specific Requirements, a clear detailed Project Brief and any requirements in relation to a New Project that must be satisfied as part of a Stage 1 Submission and/or Stage 2 Submission (as set out more explicitly in Paragraphs 3.1.1 to 3.1.3).
- 3.2 WEPCo shall be entitled (pursuant to paragraph 3.2) to raise any queries and request clarification from the Participant in relation to the New Project Request to enable it to fully assess the request and provide a meaningful response.
- 3.3 WEPCo shall then (in accordance with Paragraph 3.3) confirm in writing to the Participant, within twenty (20) Business Days of receipt of a New Project Request, whether it will submit a Stage 1 Submission to the Participant. If WEPCo confirms that it does not intend to do so, or fails to give the necessary confirmation, then the Participant shall be entitled to procure such New Project outside the terms of the SPA and shall not be in breach of the exclusivity provisions as set out in Clause 9 of the SPA (Exclusive Nature of this Agreement).
- 3.4 It is important to note that where the reason for WEPCo not proceeding is the Affordability Cap being unrealistically low, the parties shall (pursuant to Clause 3.3.1) work together in good faith to seek to agree an alternative Project Brief and/or Affordability Cap which will form the basis of a revised New Project.
- 3.5 If the parties fail to agree such terms within six (6) months of WEPCo's original confirmation, the Participant shall be entitled to procure the New Project outside the terms of the SPA and shall not be or be deemed to be in breach of the Clause **Error! Reference source not found.** exclusivity provisions. If the New Project is a Qualifying Project and they commence to procure such New Project prior to the expiry of ten (10) years from the Commencement Date at a substantially greater cost than the Affordability Cap, the Clause 9 exclusivity provisions will still apply.

4 STAGE 1 SUBMISSION AND APPROVAL

- 4.1 Upon WEPCo's confirmation of the New Project Request, WEPCo will (pursuant to Paragraph 4.1) produce outline proposals for New Projects, which develop and are consistent with the SDP where so requested. This is known as the Stage 1 Submission.
- 4.2 All Stage 1 Submissions will be produced within three (3) months (or such longer period up to a maximum of six (6) months where necessary) from the New Project Request. A Stage 1 Submission shall (as set out in Paragraph 4.2) be produced in accordance with the relevant Partnering Services Method Statement (to be incorporated into the SPA) and contain as a minimum (more expressly set out in Paragraphs 4.2.1 to 4.2.13):

- 4.2.1 a value for money assessment in respect of the New Project Request;
 - 4.2.2 a concept design (to RIBA Stage 2) of the New Project;
 - 4.2.3 a desktop study meeting the requirements of the Partnering Services Method Statements, site investigation studies and environmental impacts (as appropriate and as set out in Clause 4.2.3 more explicitly);
 - 4.2.4 confirmation as to whether the New Project requires the transfer of properties by the Participant to WEPCo, to a Project Service Provider, or to a wholly owned Subsidiary of WEPCo;
 - 4.2.5 the identity of the contractual structure and proposed corporate structure;
 - 4.2.6 a schedule of all material amendments required to the New Project Specific Project Agreement and template Project Agreement for MIM Projects taking into account the Approval Criteria;
 - 4.2.7 the identity of the Participant and/or other parties who will become Project Agreement Counterparties;
 - 4.2.8 an explanation as to how the New Project fits into the service delivery strategy as set out in the latest SDP;
 - 4.2.9 the effect (if any) on any employees of the Participant or relevant third party service providers;
 - 4.2.10 a planning brief;
 - 4.2.11 a maximum time period for submission of a Stage 2 Submission on the assumption that the New Tender Project achieves Stage 1 Approval;
 - 4.2.12 the proposed Project Development Fee Estimate; and
 - 4.2.13 a BIM Execution Plan.
- 4.3 The Stage 1 Submission must also be accompanied by a copy of the most recent WEPCo Performance Report and confirmation as to whether or not the Track Record Test has been passed at the date of submission of the Stage 1 Submission.
- 4.4 In developing a Stage 1 Submission, WEPCo shall (pursuant to Paragraph 4.3) liaise with the Participant and relevant end users as necessary to ensure the best available value for money is achieved through the appropriate consideration of all viable options and informed choices by WEPCo, stakeholders and the Relevant Participant(s). WEPCo shall also be obliged to enter into the Project BIM Agreement for the New Project and comply with its obligations thereunder. The Participant shall also (pursuant to Paragraph 4.4) without prejudice to the requirements of Schedule 6 of the SPA, provide WEPCo with such information as to its requirements and other inputs as WEPCo may reasonably require.
- 4.5 As part of its preparation for each Stage 1 Submission, WEPCo shall, save in respect of Pathfinder Projects, carry out a desktop study of the relevant site or sites and report to the Participant of such studies (in accordance with Paragraph 4.5).
- 4.6 Following receipt of a Stage 1 Submission by the Participant, (pursuant to Paragraph 4.6), the Participant shall have a period of two (2) months from the date of receipt of the Stage 1 Submission in which to notify WEPCo that it approves or rejects the Stage 1 Submission. If approved, this then becomes a Stage 1 Approved Project (Paragraph 4.6).

- 4.7 WEPCo's costs in relation to the preparation of a Stage 1 Submission that has been submitted in accordance with Paragraph 4 of Schedule 5 shall be borne by WEPCo unless in certain circumstances e.g. where the New Project subsequently becomes an Approved Project and the relevant costs are included as part of the Project Development Fee for such Approved Project (as more explicitly set out in Paragraphs 4.8.1 – 4.8.3).
- 4.8 It should be noted that if a Stage 1 Submission does not become a Stage 1 Approved Project, then in certain limited circumstances (as set out in detail in Paragraphs 4.9.1 – 4.9.3 including but not limited to where the New Project in question is not a Qualifying Project, then the Participant shall be entitled to procure the New Project outside the terms of the SPA and shall not be deemed to be in breach of the exclusivity provisions as set out in Clause 9 of the SPA, unless (in the case of Paragraph 4.9.1(a)) they seek to commence procurement of such New Project during any period when exclusivity in respect of the Participant has been reinstated pursuant to Clause **Error! Reference source not found.**, Clause **Error! Reference source not found.** or Clause **Error! Reference source not found.**
- 4.9 Finally, in relation to the Stage 1 Submission, where in respect of a New Project demolition of an existing facility is anticipated within the scope of a New Project and an Asbestos Management survey has not been carried out by the Participant and included within the New Project Request, WEPCo, shall then procure an Asbestos Management Survey with the support and guidance of the Participant, in accordance with the provisions as set out in Paragraphs 4.10.1 to 4.10.5.

5 STAGE 2 SUBMISSION AND APPROVAL

- 5.1 Once the Stage 1 Submission becomes a Stage 1 Approved Project, WEPCo, will (pursuant to Paragraph 5.1) when requested to do so in writing by the Participant, provide further Project Development Partnering Services to proceed regularly and diligently to develop a Stage 1 Approved Project into a detailed submission. This is known as a Stage 2 Submission. This shall then be presented to the Participant as soon as reasonably practicable and in any case within the maximum period specified in the Stage 1 Submission.
- 5.2 WEPCo shall, in developing a Stage 2 Submission (pursuant to Paragraph 5.2) continue to liaise with the Participant and relevant end users (Paragraph 5.2.1) and WEPCo shall be obliged to comply with its BIM protocol obligations under the Project BIM Agreement and submit a BIM Execution plan to the Participant within one month of commencing Stage 2.
- 5.3 As part of the Stage 2 process, the Participant shall provide WEPCo with any such information as to its/their requirements (including the Specific Requirements) and other inputs as WEPCo may reasonably require and shall assist WEPCo in the review of any draft designs and proposals in relation to the Stage 2 Submission (Paragraph 5.3.1) and generally co-operate with WEPCo in relation to any Stage 2 Submission (Paragraph 5.3.2).
- 5.4 WEPCo shall produce each Stage 2 Submission in accordance with the relevant Partnering Services Method Statement and shall procure that the Stage 2 Submission shall address all issues that have a potential impact on risk and/or price in respect of the proposed New Project and shall include as a minimum (including but not limited to and as set out in more detail in Paragraphs 5.4.1 to 5.4.18):
- 5.4.1 a value for money assessment in respect of the option given Stage 1 Approval;
 - 5.4.2 terms for the transfer of properties agreed between WEPCo and the relevant Participants or third parties;
 - 5.4.3 a mark-up of the Project Specific Project Agreement with Project Co's proposals;
 - 5.4.4 detailed design work (to RIBA Stage 4) and submission of relevant building warrant applications;
 - 5.4.5 requirements for planning approvals and all associated costs;
 - 5.4.6 an explanation as to why the Stage 2 Submission meets the Approval Criteria (as set out below);

- 5.4.7 a timetable setting out the stages and timescales for the period between achieving Stage 2 Approval and the execution of the Project Agreement in relation to that New Project;
 - 5.4.8 commitment letters from any proposed tenants or sub-tenants of the Facilities;
 - 5.4.9 details of the competency assessments undertaken and the results of the same, in respect of the potential 'Principal' Contractor for purposes of the CDM Regulations;
 - 5.4.10 the Corporate Structure of the Project Service Provider;
 - 5.4.11 a draft Project Co Shareholders' Agreement relating to any New Project which is a MIM Project;
 - 5.4.12 fully developed sub-contracts for each of the Contractor and (in the case of MIM Projects) the Service Provider and any relevant [Key Sub-Contractors]¹;
 - 5.4.13 details of the proposed security package; and
 - 5.4.14 commitment letters from the senior funders confirming acceptance of the documents submitted by WEPCo (in the case of MIM Projects).
- 5.5 The Approval Criteria consists of the criteria against which any New Project is judged in determining whether it achieves Stage 2 Approval. The criteria are set out in Paragraphs 5.5.1 to 5.5.10 in more detail, but include (and are not limited to) a requirement that the cost of the New Project is within the Affordability Cap; that it has been demonstrated that the New Project provides value for money; and that the New Project meets the Specific Requirements.
- 5.6 After the above has been complied with, WEPCo shall then submit its Stage 2 Submission to the Participants, copied to SPB (Paragraph 5.6). It is then expected that the SPB will provide a forum for discussion of such Stage 2 Submission. If, acting reasonably, the Participant finds that any material aspects of the Stage 2 Submission are unsatisfactory to them, the Participant shall notify WEPCo of the same and offer reasonable assistance to WEPCo to address such deficiencies.
- 5.7 Within sixty (60) Business Days of the later of submission to the Participant of a Stage 2 Submission and the date on which WEPCo provides them with all reasonable further information that has been requested and provided, the Participant shall give written notice of whether they reject or approve the Stage 2 Submission (as per Paragraph 5.7). If approved, this becomes a Stage 2 Approved Project.
- 5.8 Alternatively, the Participant may give notice that they reject the New Project on the grounds set out in Paragraph 5.7.2. One of the grounds is that there has been a change to the Affordability Cap since the New Project Request which has rendered the New Project not Affordable. If WEPCo has not been notified of the Participant decision then they shall be deemed to have rejected the New Project (Paragraph 5.8). In certain limited circumstances, where the Participant has rejected the New Proposal, WEPCo may be entitled to recover its Incurred Project Development Fee and procure the New Project outside the terms of the SPA (Paragraph 5.10).
- 5.9 Where a New Project has been rejected by the Relevant Participant on the grounds that it did not meet the Approval Criteria (Paragraph 5.7.2(b)), WEPCo shall be entitled, should it wish to do so, to refer the matter for consideration under the Dispute Resolution Procedure within ten (10) Business Days after receiving notice of the Rejection by the Participant (Paragraph 5.11).
- 5.10 Where a New Project becomes an Approved Project, WEPCo shall (pursuant to Paragraph 5.14) carry out further work to develop appropriate Project Agreements to implement the Approved Project on the terms of the Stage 2 Submission. The Participant shall (as set out in Paragraph 5.15) notify WEPCo

¹ Where applicable.

in writing as soon as they become aware of any matter which may adversely affect the viability of any New Project.²

- 5.11 The Participant shall then provide all reasonable assistance to WEPCo in relation to the procurement by WEPCo of all relevant Consents and the entering into of the relevant Project Agreement (Paragraph 5.16) and WEPCo shall (pursuant to Paragraph 5.18) novate all of its past, present and future rights, obligations and liabilities under a Project BIM Agreement to the Project Service Provider on or prior to the date of execution of the Project Agreement for the Approved Project.

6 CHANGES TO THE RELEVANT PARTICIPANT REQUIREMENTS

- 6.1 If there are any material variations to the Specific Requirements, Affordability Cap or Approval Criteria, in relation to a New Project by the Relevant Participant after a Stage 1 Submission has been submitted, then (pursuant to the provisions of Paragraph 6.1), WEPCo and the Relevant Participant shall negotiate in good faith as to the implications on the Stage 1 Submission and/or Stage 2 Submission (as appropriate) and shall seek to agree the changes to accommodate such variations.
- 6.2 The Participant may, (pursuant to Paragraph 6.2) at any time, give notice in writing to WEPCo that they propose to cancel a New Project without completing the Stage 1 Submission and Stage 2 Submission process (Paragraphs **Error! Reference source not found.** to **Error! Reference source not found.**). This is known as a Cancellation Notice.
- 6.3 Where the Participant issues a Cancellation Notice to WEPCo, the Participant shall (pursuant to Paragraph 6.2) pay WEPCo the Incurred Project Development Fee in respect of the cancelled New Project. The relevant date for calculation being the date of the Cancellation Notice.
- 6.4 It is important to note that, unless the period of ten (10) years after the Commencement Date has expired then, to the extent the New Project in question is a Qualifying Project, the Participant shall not be entitled to procure the Required Facilities and/or the provision of the Project Services outside the terms of this Agreement without recommencing this New Project Approval Process.

7 SUSPENSION OF EXCLUSIVITY

- 7.1 Where the Participant exercises any right to suspend exclusivity in accordance with Clause 9.7, Clause 23.3 or 23.10.1 of the SPA, while WEPCo is preparing a Stage 1 Submission or a Stage 2 Submission in respect of any New Project, then (pursuant to Paragraph 7) the Participant may notify WEPCo at any time while such suspension subsists to cease work on producing the relevant Stage 1 Submission or Stage 2 Submission.
- 7.2 In such circumstances, WEPCo shall then cease work and the Participant shall pay WEPCo the Incurred Project Development Fee in respect of the relevant New Project with the relevant date for calculation being the date of the notice from the Participant.

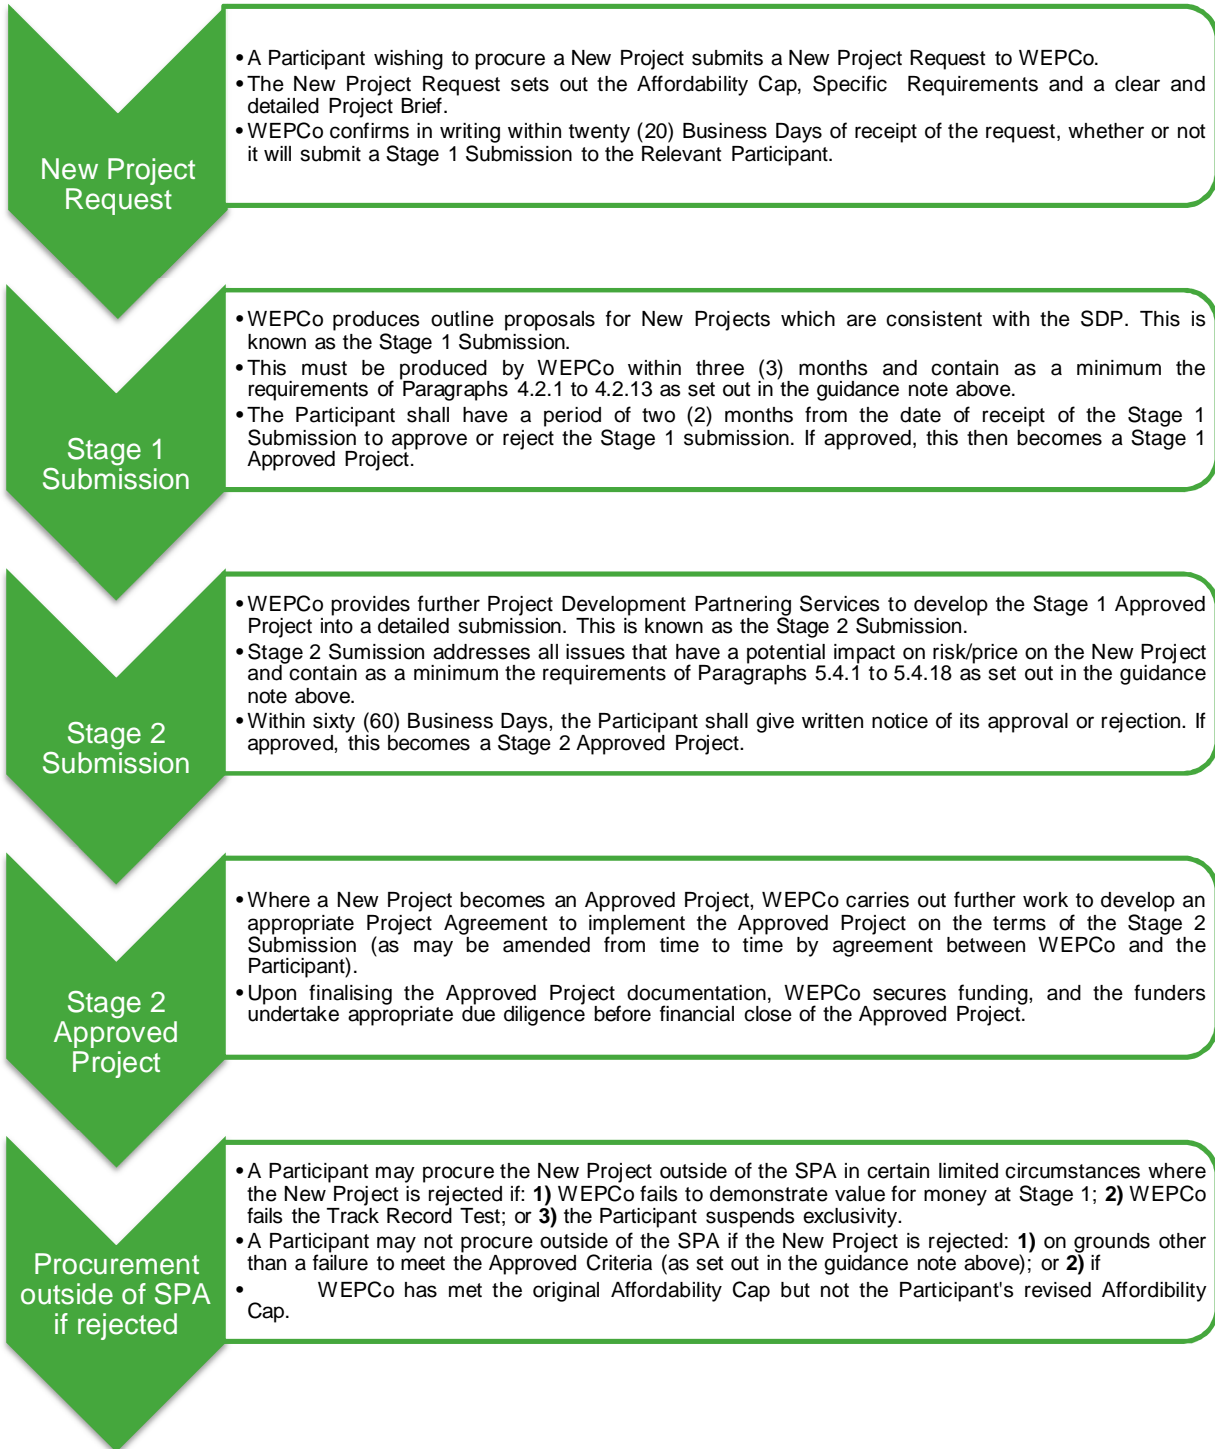

8 SURVEYS

- 8.1 Where WEPCo recommends that surveys, studies and/or investigations (other than desktop studies) are required for the purposes of a Stage 1 Submission, WEPCo will procure such surveys, studies and/or investigations on the terms and at prices agreed with the Participant.
- 8.2 The cost of the surveys, studies and/or investigations will be payable by the Participant to WEPCo within twenty five (25) Business Days of receipt of a valid invoice. This cost will not form part of the Project Development Fee unless the Participant and WEPCo agree to the contrary.

² The provisions of Paragraph 5.15 shall not apply to any Relevant Participant which is a Local Planning Authority exercising its functions as such.

APPENDIX A

APPROVAL PROCESS FOR NEW PROJECTS

WEP STRATEGIC PARTNERING DELIVERY MODEL
FREQUENTLY ASKED QUESTIONS AND ANSWERS

Strategic Partnering Agreement

1 PARTNERING SERVICES AND EXCLUSIVITY

1.1 Do we have to use WEPCo to deliver our MIM Band B scheme?¹

Once a Participant has entered into the SPA, it gives WEPCo the exclusive right to deliver 21st Century Schools and Colleges (Band B) MIM Programme projects for a period of ten years from the commencement date of the Strategic Partnering Agreement (SPA). However, these MIM Band B projects must be approved and meet the relevant criteria set out and agreed with the relevant Participant through Schedule 5 (*New Project Approval Process*). Exclusivity can be suspended by Participants in limited circumstances – please see further question 1.6 below.

1.2 If we do not have a MIM Band B scheme, why should we sign up? What else could we use WEPCo for? Can we use WEPCo to deliver facilities outside of education, e.g. libraries, leisure centres, office accommodation?

Signing up to the SPA will give Participants the flexibility to use WEPCo in the future to provide Partnering Services or Project Services for capital projects for education or associated community facilities. Participants may request WEPCo to deliver:

Project Development Partnering Services in respect of potential new projects which are not MIM Projects

The role of WEPCo is to develop proposals for a new project to meet the Participant's requirements including affordability and other agreed approval criteria (services, operational, financial and value for money). The scope and specification of the services to be provided by WEPCo will be agreed between WEPCo and the relevant Participant on a project by project basis, together with the approval criteria. The relevant Participant will remain as "sponsor" for business case approval purposes. The role of WEPCo will be to support the relevant Participant in preparing agreed outputs at each business case approval stage for the delivery of the new project.

Strategic Support Partnering Services

Strategic Support Partnering Services are to support Participants in strategic estate planning and strategic services planning to plan education sector services and where requested, community services. These are discrete, consultancy support services that may be required by Participants on an *ad-hoc basis* on terms and conditions appropriate for the particular circumstances.

Project Services

Project Services means services required to be provided in relation to the design, construction, testing, commissioning and completion of premises (including any temporary works) and the installation of equipment; and/or the provision of hard facilities maintenance services.

Participants may request WEPCo to deliver:

- (a) Project Services relating to major capital projects in the education sector (not just MIM Projects);
- (b) Project Services relating to capital projects required for the provision of education sector services or community services. Associated community facilities may include libraries, leisure and

¹ Capitalised terms have the meaning provided for in the Strategic Partnering Agreement unless otherwise stated.

children's and other educational community based services strategically related to MIM or other capital projects delivered through WEPCo;

- (c) Project Services in relation to the provision of hard facilities maintenance services required for the provision of education sector services or community services.

1.3 What partnering services may WEPCo provide?

WEPCo may provide a range of Partnering Services to Participants.

These fall into three categories:

- 1.3.1 *Ongoing Partnering Services* (day to day operational services, partnering and collaborative working, supply chain assembly and overall management, value for money);
- 1.3.2 *Project Development Partnering Services* (working up new projects for delivery, supply chain assembly, funding and value for money); and
- 1.3.3 Strategic Support Services (strategic estate planning, strategic service planning and value for money).

Please see **SPA Summary** for further details.

WEPCo shall provide Project Development Partnering Services to implement Qualifying Projects in accordance with the specification, KPIs (including community benefits) and rates set out in Schedule 3 (*Partnering Services*).

Participants may request WEPCo to deliver Project Development Partnering Services in respect of potential new projects which are not MIM Projects. Recipient Participants and WEPCo agree the scope of services to be provided. Participants can also request WEPCo provide Strategic Support Services on an ad-hoc basis on terms and conditions appropriate for the particular circumstances.

1.4 How do we request services from WEPCo?

WEPCo will provide the Ongoing Partnering Services on a continuous basis (without formal request to do so by the Participant).

Participants can request that WEPCo provides Project Development Partnering Services, to develop proposals for a new project in accordance with the process set out in Schedule 5 (*Approval Process for New Projects*) of the SPA.

Participants can request WEPCo provides, on an ad hoc basis, Strategic Support Partnering Services on terms and conditions agreed in advance between the Participant and WEPCo.

1.5 How is WEPCo paid for the services it provides?

WEPCo's Ongoing Partnering Services are recovered through the OPS Relevant Proportion payable as part of the Project Development Fee charged by WEPCo for New Projects.

WEPCo charges a Project Development Fee for the provision of Project Development Partnering Services. Please see further question 3.7 below.

For Strategic Support Partnering Services, WEPCo is paid by the relevant Participant within 30 days of a valid invoice, the cost being calculated at rates and prices quoted by WEPCo in accordance with Section 4 of Schedule 3 (*Partnering Services*) of the SPA, and updates as agreed in advance by the Participant.

Please see **SPA Summary** for further details.

1.6 If WEPCo is performing poorly are we still bound by exclusivity?

WEPCo is at risk of having its rights of exclusivity suspended for poor performance. This is not subjectively determined. The SPA sets out what constitutes a “WEPCo Event of Default” that is sufficiently serious to trigger the suspension of exclusivity and the process that must be followed by Participants to suspend exclusivity. If this is the case, each Participant can suspend the exclusivity granted to WEPCo which will include any New Projects that have not yet reached stage 2 approval under Schedule 5 (*Approval Process for New Projects*) of the SPA. The Participants can lift that suspension at any time and the suspension of exclusivity will be lifted on remedy of the default (or where the private sector delivery partner’s shares in WEPCo are sold).

1.7 How will our requests be prioritised by WEPCo? How will projects be prioritised for delivery by WEPCo, if there are competing demands on the resources and capital of the WEPCo?

One of the objectives of the Strategic Partnering Board (SPB), on which representatives from each Participant, WEPCo and Welsh Government sit is to give guidance on and approve the order in which New Projects should be progressed and on what basis. WEPCo is then obliged to prioritise New Projects on a basis consistent with the decisions of the SPB. As the Participant representatives sit on the SPB, they will have a direct say on which New Projects are prioritised over others, following discussions between all SPB representatives.

1.8 What are the expected timescales for signing the SPA?

Completion of the procurement process is set for September 2020. We will be guiding each Participant through the process of signing all documents, including the SPA, in preparation for completion and we expect this to take place in June and July, to allow plenty of time before completion.

2 ROLE AND INVOLVEMENT AS A PARTICIPANT

Strategic Partnering Board

2.1 We do not have a scheme in the pipeline to be delivered by WEPCo – will we still have to attend the SPB meetings?

The SPB governs the relationship between WEPCo and the Participants. It will comprise of representatives of each Participant, WEPCo, Welsh Government and other stakeholder representatives as agreed by the Participants.

Each Participant that has entered into the SPA is obliged to appoint a representative to the SPB under clause 14 of the SPA to act on its behalf in relation to the SPA. The identity of the Participant’s Representative may change at any time, provided written notice is given to WEPCo and the other Participants.

The SPB will meet at least every three months to review financial and operating issues and provide strategic input into the partnering arrangements including the exchange of ideas in relation to the Participants’ accommodation and service delivery requirements.

As part of its role, the SPB will approve the Strategic Delivery Plan and prioritisation of New Projects. It is a benefit for each Participant to attend SPB meetings and take SPB decisions even if it does not currently have a scheme in the pipeline. Where permitted by a Participant’s own governance framework, a Participant’s Representative can delegate responsibility to any other person to attend the SPB and vote on behalf of the delegating Participant’s Representative by written notice to WEPCo. A quorum of the SPB is proposed to be five Participant’s Representatives (one of whom must be a representative of the Welsh Government) and the WEPCo Representative (with adjourned meetings as a result of a lack of quorum in the initial meeting having a quorum of one Participant Representative (being the Welsh Government representative) and the one WEPCo Representative).

2.2 Do we have to attend the SPB meetings in person?

SPB meetings can be held by telephone conference call or video conference or a combination of both, providing all participants are able to speak to and hear each other and a quorum is always present.

2.3 Who would be the right representative on the SPB?

Representatives are expected to be senior representatives of the Participant, with the appropriate authority to make decisions on behalf of the Participant. They should be experienced in holding a director or similar position and have the required skills to make the decisions required to be made by the SPB. Participants will need to consider any likely conflicts of interest and ensure that conflicts of interest do not prevent the chosen representative from fulfilling their role as representative as well as any other role they hold directly in the Participant organisation.

2.4 Does a decision of the SPB bind us if we have not voted in favour of that decision?

SPB decisions are taken by majority vote (of Participant Representatives and the Welsh Government Representative) and so if a majority of the SPB voting representatives approve a decision, it will be passed. However decisions of the SPB which affect a Participant in a way which result in expenditure or liability being incurred by the Participant, or have an adverse impact on the manner in which the Participant discharges a statutory function, will only bind that Participant where it has voted in favour of the decision. If the Participant has not voted in favour of a decision which affects it in this way, it will not be binding on it.

Investment and financing

2.5 Can we take up shares or invest in the WEPCo?

No, it is not open to Participants to take shares or invest in the WEPCo.

2.6 Can we make a capital payment or contribution on our MIM project(s) to reduce the revenue commitment?

Legally it is possible for a capital contribution to be made under a Project Agreement but this is a policy matter and would be subject to approval by Welsh Government. The quantum and timing of the capital contribution would also be limited by accounting treatment rules to ensure it does not bring a project on balance sheet.

2.7 How much profit will the private sector make?

This will be governed by the WEPCo Shareholders' Agreement and the SPA. Under the SPA (Schedule 4, Appendix 1) the equity returns for projects and project management fees are capped, and these caps will be bid back by bidders.

In competition, bidders will be tested on the daily rates for delivery of Partnering Services and Internal Rate of Return (IRR).

Obligations and liabilities

2.8 Do we have any ongoing liabilities or commitments as a Participant if we decide not to procure any works or services from WEPCo?

As a Participant you will be bound by the terms of the SPA, and will have committed to attending the Strategic Partnering Board. You will also be subject to the freedom of information obligations set out in clause 50 and the further assurance provision (to do all things and execute all further documents necessary to give full effect to the SPA). However, save in the circumstances set out in question 2.10 below, there is no joint liability of the Participants (and only then does this apply where two or more Participants have both breached the terms of the SPA), which means that no act or omission of any Participant shall bind any other Participant.

2.9 How does the default of one Participant affect the others?

There are only limited grounds which constitute a Participant Event of Default under the SPA. If a Participant Event of Default occurs, WEPCo may serve notice on the Participant(s) responsible for the Participant Event of Default suspending or terminating the SPA insofar as it relates to such Participant(s). The SPA will remain in place and effective as between the WEPCo and the non-defaulting Participants.

2.10 If WEPCo is in default, can each Participant decide whether they want to terminate or continue with WEPCo?

If there is a WEPCo Event of Default, the Participants may or may not have the right to terminate the SPA (depending on the nature of the default, and whether or not WEPCo has the opportunity to remedy its breach). If there is a WEPCo Event of Default there are a number of potential consequences, and each Participant (acting through Welsh Government) may be able to elect to suspend WEPCo's exclusivity, or require WEPCo to replace a non-performing Supply Chain Member, or serve a SPA Material Default Notice or a Default Termination Notice to terminate the SPA. Where a right of termination has arisen, Participants can each decide whether to do so or continue with WEPCo.

2.11 What happens in a conflict situation between the Participants?

The SPA governs the relationship between the Participants and WEPCo. The role of the SPB and decision making is set out in response to question 2.1 above.

Where Participants need to act together to request WEPCo to deliver, for example, a batch of projects, we would recommend the procuring Participants enter into a co-operation agreement governing that joint request and any disputes that arise in relation to it, including how WEPCo's costs will be apportioned between the Participants where such costs relate to some or all of the projects.

2.12 If WEPCo gets into financial difficulties, are we liable for their debts?

No, WEPCo is a separate legal entity and is responsible for its own debts and liabilities.

2.13 What are our potential liabilities if we default under the Strategic Partnering Agreement?

If a Participant commits a Participant Event of Default, WEPCo can either:

- suspend performance of services to that Participant until that Participant can demonstrate to WEPCo's reasonable satisfaction it is capable of performing their obligations; or
- notify the Participant of the Event of Default. If the default is capable of remedy and hasn't been remedied within 30 Business Days of notice or is not capable of remedy, WEPCo may either serve notice on each Participant in default terminating the SPA in relation to them with immediate effect or simply notify the Participants in default of the effect their default has had. Any Participants in default will be liable to pay compensation to WEPCo in accordance with schedule 14 section 1. If the SPA is terminated in its entirety by the default, additional compensation under schedule 14 section 2 will also be payable.

If a Participant is served a Participant Default Notice more than once in any 12 months, it will not receive Project Development Partnering Services or any Strategic Support Partnering Services unless paid monthly in arrears.

The Participants have several liability, other than where two or more Participants have suffered an Event of Default leading to a termination of the SPA, in which case, the losses of WEPCo will be split between the defaulting Participants.

2.14 What happens to Projects if WEPCo is in default under the SPA (or vice versa)?

Depending on the severity of the WEPCo Event of Default, in the worst case scenario, Participants may suspend WEPCo's exclusivity and during that period serve an SPA Material Default Notice which allows the Participants to terminate the SPA immediately.

Please see **SPA Summary** for further details.

3 DELIVERING PROJECTS THROUGH WEPCO

3.1 What business case approval will we need to deliver our project?

WEPCo will assist each Participant in recommending potential New Projects. Each Participant will then need to obtain approval in accordance with its governance procedures prior to it requesting WEPCo to produce a stage 1 submission in relation to a New Project. Once that approval has been obtained, WEPCo will then prepare the stage 1 and stage 2 submissions and as part of that process, will assist the Participant in obtaining an outline business case and full business case approval, which will be required to enable the New Project to progress to Approved Project status.

Please see **separate guidance published by Welsh Government** in respect of business case approvals. This is published on the E Portal under Welsh Government Guidance.

3.2 What is the process to develop project proposals?

Schedule 5 (*Approval Process for New Projects*) of the SPA outlines the approval process for New Projects.

Please see **SPA Summary** for further details and **separate guidance note**.

A Participant can request WEPCo prepare a proposal for a New Project. WEPCo will then prepare a stage 1 submission and if successful, a stage 2 submission, before the New Project becomes an Approved Project and is developed.

3.3 What do we need to fund and what will Welsh Government fund? What do we expect WEPCo to do - will WEPCo support site identification?

Welsh Government will fund the capital cost and 81% of the Participant's unitary charge in relation to MIM Projects delivered under the WEP Strategic Partnering Delivery Model. Each Participant will need to pay the remaining 19% of the unitary charge.

Welsh Government will pay Bevan Brittan LLP's legal fees in advising the Participants on the pathfinder projects. Please see separate note on the scope of Bevan Brittan's services published on the E Portal.

WEPCo will analyse and discuss with Participants, the individual accommodation requirements of each Participant. It will assist in developing local delivery plans and identify options for meeting the Participants' accommodation requirements and recommend New Projects to progress, including developing the Participant's requirements for each New Project, discussing the range of funding options for that New Project and assisting Participants in preparing outline business cases and obtaining the necessary approvals.

3.4 When does statutory consultation fit into the new project approval process?

Under the SPA, WEPCo must undertake widespread consultation, as agreed with the relevant Participants, within the local community throughout the New Project Approval Process. The Participant procuring the New Project and WEPCo will need to agree a time within the stage 1 and 2 submission preparatory framework in which consultation will take place, and its results then fed into the proposal for the New Project.

3.5 What do we need to do at "stage zero" to get our project ready to submit to WEPCo? Do we need to develop our BIM requirements?

Please see **separate guidance published by Welsh Government**.

WEPCo will work with a Participant to recommend New Projects and subsequently develop the Participant's requirements for each project. This includes preparing an outline business case. WEPCo will also, as part of the stage 1 submission, provide a detailed Project execution plan which includes a BIM Execution Plan.

3.6 How is WEPCo paid for the work it undertakes to progress our project to the point it is ready for contract signature?

WEPCo will be paid for this work as payment for Project Development Partnering Services in accordance with Schedule 4 (*Partnering Services Costs*) of the SPA.

Please see **SPA Summary** for further details.

3.7 How can we be assured our project is value for money?

WEPCo is obliged to evidence that its proposals for New Projects deliver value for money and continuous improvement in value for money.

WEPCo's specific obligations are set out in Schedule 5 (*Approval Process for New Projects*), Schedule 6 (*New Project Pricing Report*) and section 5B of Schedule 3 (*Partnering Services*). Please see **SPA Summary** for further details.

3.8 How are we involved in selection of our project's contractor and FM service provider?

Participants will have a key role in the selection of a contractor and FM service provider. Whilst WEPCo will lead on the procurement and selection of the project's contractor and FM service provider, as the procuring Participant, you will have the opportunity to feed into the tender evaluation and award criteria, attend meetings relating to the procurement process and discuss with WEPCo, the choosing of the preferred tenderer for construction and FM services. WEPCo is obliged to increase opportunities for local employment and training and so will need to look to local employment and labour for the delivery of these services.

Bidders will be tested on their approach to supply chain assembly during the procurement to select the PSDP. This includes the preparation of detailed methodologies that will be incorporated into the SPA.

3.9 Can WEPCo access professional team / construction / FM suppliers on our existing frameworks or panels?

WEPCo will separately procure the construction and FM service providers for individual projects, WEPCo may be able to access existing frameworks or panels, but this will need to be assessed on a case by case basis, and is dependent on being permissible under the terms of that existing framework or panel. This will be jointly considered with the relevant Participant on a project specific basis.

3.10 How can WEPCo ensure that our project delivers wider community benefits, e.g. use of local labour?

One of the WEPCo Objectives is to increase opportunities for local employment and training. WEPCo is also obliged, as part of the specification of services it will provide, to ensure it includes local communities in the development of New Projects and associated community improvement initiatives and ensure the enhancement of user satisfaction by developing and designing facilities that present a focal point for the community. WEPCo will be required to meet specified KPIs, including those linked to community benefits. This will be robustly tested throughout the procurement to select the PSDP.

3.11 Can community groups use the school facilities delivered by WEPCo? Will this allow revenue to be generated that we can keep?

Yes. One of the obligations of WEPCo in developing New Projects is to consider out-of-hours community use including having a reception and social areas for community use for use outside of normal hours and associated security. WEPCo is also obliged to ensure that it includes local

communities in the development of New Projects and associated community improvement initiatives and ensure the enhancement of user satisfaction by developing and designing facilities that present a focal point for the community. It is permitted for schools to retain revenue from community use out of hours.

3.12 How will WEPCo ensure new facilities are sustainable, energy efficient and net carbon zero/carbon neutral?

Ensuring WEPCo delivers facilities that are environmentally friendly is built into how WEPCo will develop and deliver New Projects under the SPA. This is a WEP Objective. WEPCo will also be obliged in obtaining stage 2 approval of all New Projects, to agree with Participants and adopt appropriate standards for development, which includes BREEAM. It will therefore be important that Participants discuss and agree with WEPCo the environmental standards they wish to achieve in developing the new facilities, such as ensuring the facilities are developed using sustainable materials and developed to be run as energy efficient and net carbon zero/carbon neutral on completion.

3.13 How will WEPCo ensure new facilities are secured by design to minimise vandalism and malicious damage?

WEPCo is obliged to consider security in developing plans for New Projects. The standards for development of the New Project are agreed between the Participants and WEPCo and so Participants will be able to request particular specifications that it would like the development to meet. The terms of the Project Agreement will govern construction and maintenance standards.

3.14 How will we negotiate the terms of the Project Agreement, including agreeing changes to the terms?

A template of the Project Agreement is included in Schedule 7 (*MIM Projects*) to the SPA, along with other template documentation, including a template D&B Development Agreement.

The Project Agreement includes a number of MIM education sector specifics including:

- Optional drafting suitable for use for Schools or College projects
- Optional drafting suitable for batched Schools projects
- Optional drafting suitable for “Post Completion Works”
- “ICT Handover” principles adopted
- Notification of Examination Periods
- Unavailability of Existing Facilities/Disruption Events
- No handover during term time
- Late completion remedies
- Malicious Damage
- Local Authority College specific drafting.

There is a standardised approach to allow the project specific tailoring of the template Project Agreement. Part of Bevan Brittan’s role will be to develop and tailor appropriately with you the template Project Agreement for submission to Welsh Government for approval.

Please see **separate guidance from Welsh Government and separate guidance on the Project Agreement.**

Bevan Brittan LLP

11 May 2020

WEP STRATEGIC PARTNERING DELIVERY MODEL**SUMMARY OF STRATEGIC PARTNERING AGREEMENT****1 INTRODUCTION¹**

- 1.1 The WEP Strategic Partnering Agreement (**SPA**) is the agreement entered into between the Local Authorities and Further Education Institutions (**Participants**)² and WEPCo (being the joint venture company established between the Private Sector Delivery Partner (**PSDP**) and a subsidiary of the Development Bank of Wales).
- 1.2 The SPA provides for how the parties act together over the long term in a collaborative partnering, non-adversarial and open manner to support the effective planning, procurement and delivery of education and community facilities in Wales and the delivery of infrastructure services.
- 1.3 The SPA sets out the high level principles that underpin the delivery of the parties' obligations; the behaviours, vision and values of WEPCo; the establishment of a framework that promotes excellence and value for money; and the monitoring and management of WEPCo's performance.
- 1.4 Under the SPA, WEPCo will be required to provide **partnering services** to the Participants. These services include (i) project development and delivery; (ii) supply chain assembly and management and (iii) other professional services necessary to fund and deliver education and community facilities.
- 1.5 The initial term of the SPA is 10 years. This may be extended by 5 years by any one or more Participants. Certain protections in the SPA continue in force beyond the term of the SPA until the end of the last associated Project Agreement entered into by the Participant(s) for the delivery of individual education facilities.
- 1.6 WEPCo will have the sole and exclusive right for the term of the SPA to nominate a subsidiary of the PSDP (which will be a special purpose vehicle that holds the majority of voting rights, or a wholly owned subsidiary of such a company) (**Project Co**) to deliver MIM Projects, provided that the relevant criteria in the SPA are met. Approved MIM Projects will be developed by WEPCo, but delivered by Project Co which will enter into a Project Agreement with the relevant Participant to deliver the relevant MIM Project.
- 1.7 Participants will be able to request that WEPCo, or a nominated wholly owned subsidiary of WEPCo, provides other **project services** such as the delivery of design and build capital projects for education or community facilities under the SPA, provided that the relevant criteria in the SPA are met. WEPCo and/or its subsidiaries shall enter into all required agreements for the delivery of capital projects and/or FM services directly with the relevant Participant, which in the case of education sector capital projects shall be substantially in the form of the Template Education Design and Build Development Agreement appended to the SPA.

2 NEW PROJECTS

- 2.1 WEPCo shall, if requested to do so by one or more Participants, develop proposals for the implementation and delivery of new projects by a Project Service Provider. For MIM Projects, the Project Service Provider will be the Project Co that will be created for such purpose and for other approved projects shall be WEPCo or a Subsidiary of WEPCo. The role of WEPCo will include the raising of finance, project development, project management and supply chain assembly and management of a new project up to contractual/financial close, during the construction period and operational period.

¹ Capitalised terms have the meaning provided for in the Strategic Partnering Agreement unless otherwise stated.

² Note those named as a "Contracting Authority" in the OJEU notice will be entitled to sign and enter into the SPA.

- 2.2 The obligations on WEPCo and the relevant Participant in relation to the identification, approval and delivery of a new project are set out in Schedule 5 (*Approval Process for New Projects*).
- 2.3 For an overview of Schedule 5 and a flow chart outlining the Approval Process for New Projects, please see **separate guidance**.
- 2.4 WEPCo is obliged to assist Participants in developing local delivery plans, which will form the basis of an annual Strategic Delivery Plan (**SDP**) developed between the Participants and WEPCo. The Participants' requirements for new projects will in most cases be initiated through the inclusion of such projects in the latest edition of the SDP.
- 2.5 WEPCo will assist Participants in developing proposals for the delivery of new projects, the preparation of an outline business case and the obtaining of all necessary approvals to progress any new project request by a Participant.
- 2.6 With each approved new project, WEPCo will (or will procure a Project Service Provider will) enter into a Project Agreement, a template form of which is appended to the SPA at Schedule 7 (*Template Project Agreements*). For an overview of the Template Project Agreement, please see **separate guidance**. For every MIM Project, the Project Service Provider will enter into a Shareholders' Agreement to establish the relevant Project Co.³
- 2.7 WEPCo must evidence value for money both at the beginning and continuously throughout the development and delivery of new projects in accordance with Schedules 3 (*Partnering Services*), 5 (*Approval Process for New Projects*) and 6 (*New Project Pricing Report*).
- 2.8 The Participants will develop with WEPCo the approach to supply chain assembly for the delivery of a new project, the market testing of design and construction, hard facilities management services and the funding of the new project to ensure value for money. WEPCo and the relevant Participant(s) will work together to ensure that the pricing of a new project provides the relevant Participant(s) with robust, transparent and auditable information as to the costs, fees and prices included within WEPCo's proposals.
- 2.9 WEPCo shall, for all projects, monitor and update (where applicable) the predicted capital, whole life cost and any increase or reduction in estimated costs, the final cost of design and construction and the actual cost of maintaining and repairing each project. WEPCo will be expected to demonstrate to Participants through a WEPCo Performance Report and Annual Review, lower costs and/or greater value for money over the term of the SPA.
- 2.10 Planning permission for approved projects to be delivered by WEPCo must be obtained by WEPCo prior to signing the relevant Project Agreement.

3 PARTNERING SERVICES

- 3.1 WEPCo may provide a range of Partnering Services to Participants.
- 3.2 These fall into three categories:
 - 3.2.1 Ongoing Partnering Services;
 - 3.2.2 Project Development Partnering Services; and
 - 3.2.3 Strategic Support Services.

³ This will be substantially in the form of the Template Project Co Shareholders' Agreement appended to the SPA.

Figure 1 WEPCo Partnering Services

- 3.3 WEPCo shall provide **Ongoing Partnering Services** to the Participants that relate to the day to day operation of WEPCo, the fostering of partnering and collaborative working between the parties, supply chain management and the delivery of value for money.
- 3.4 WEPCo shall provide **Project Development Partnering Services** to implement and deliver projects identified in the SPA and all other 21st Century schools and colleges (Band B) MIM Programme Projects (**Qualifying Projects**) in accordance with the specification, KPIs (including community benefits) and rates set out in Schedule 3 (*Partnering Services*). The role of WEPCo is to develop proposals for a Qualifying Project to meet the Participant’s Requirements including affordability and other agreed approval criteria (services, operational, financial and value for money). The scope and specification of the services to be provided by WEPCo will be agreed between WEPCo and the relevant Participant on a project by project basis, together with the approval criteria.
- 3.5 The relevant Participant will remain as “sponsor” for business case approval purposes. The role of WEPCo will be to support the relevant Participant in preparing agreed outputs at each business case approval stage for the delivery of a Qualifying Project.
- 3.6 WEPCo shall also, where requested, provide **Strategic Support Partnering Services**, to support Participants in strategic estate planning and strategic services planning to plan education sector services and where requested, community services. These are discrete, consultancy support services that may be required by Participants. The Participants and WEPCo will jointly develop a Strategic Delivery Plan for the delivery of new accommodation requirements.
- 3.7 WEPCo must monitor the performance of each of the Partnering Services and Project Services at its own cost and expense, meet value for money requirements and demonstrate continuous improvement wherever practicable achieved through agreed KPIs, as developed in accordance with the SPA throughout the term.
- 3.8 For all Partnering Services, WEPCo must provide the Partnering Services in compliance of the WEP Objectives and all objectives set out in the SDP agreed between the Participants and WEPCo. All Partnering Services must meet the requirements for Value of Money set out in clause 13 and seek to obtain continuous improvement in providing the services.

Payment for Partnering Services

- 3.9 Clause 10 of the SPA governs what WEPCo is entitled to charge a Participant for the provision of Partnering Services.
- 3.10 WEPCo recovers Partnering Services Costs relating to Ongoing Partnering Services and Project Development Partnering Services in accordance with Schedule 4 (*Partnering Services Costs*) of the SPA. Partnering Services Costs are recovered either from the Participant on a “pay as delivered” basis, or as a lump sum at financial close of the relevant approved Project, or such costs are rolled into the financial model for the relevant approved Project and are repaid over the term of the relevant Project Agreement.
- 3.11 WEPCo recovers the costs incurred for the delivery of Strategic Support Partnering Services on a “pay as delivered” basis or as otherwise agreed with the relevant Participant procuring such services from WEPCo. The quantum of such costs will be calculated by reference to the rate card which will be included at Schedule 4 (*Partnering Services Costs*).

Subcontracting of Partnering Services

- 3.12 WEPCo is able to subcontract its obligations in respect of the whole or part provision of the Partnering Services to a Partnering Subcontractor but will remain responsible to the relevant Participants for the provision of the contracted out services.
- 3.13 WEPCo is responsible for ensuring the performance by the Supply Chain Members of their obligations under the relevant Supply Chain Agreements.
- 3.14 On the expiry or earlier termination of the SPA, the handover provisions set out in Schedule 20 (*Handover on Expiry or Termination*) will apply. Any staff engaged in the delivery of Partnering Services will transfer under TUPE regulations to the relevant Participant or third party successor provider of services.
- 3.15 For further detail on the scope of Partnering Services in Schedule 3 (*Partnering Services*) and Schedule 4 (*Partnering Services Costs*), please see **separate guidance**.

4 PROJECT SERVICES

- 4.1 WEPCo is responsible for providing **Project Services** to Participants. These are services required under a Project Agreement in relation to the design, construction, testing, commissioning and completion of premises (including any temporary works) and the installation of equipment, together with the provision of facilities maintenance (FM) services.
- 4.2 The SPA acknowledges that Participants may have existing providers in place to provide their accommodation requirements and associated services. WEPCo agrees to work with Participants to ensure the existing providers are treated fairly and that the individuals providing the existing services are, where possible, employed by the Project Service Provider.

5 EXCLUSIVITY

- 5.1 The Participants grant WEPCo the sole and exclusive right for the 10 year term of the SPA to provide:
 - 5.1.1 Ongoing Partnering Services
 - 5.1.2 Project Development Partnering Services in respect of projects identified in the SPA and 21st Century Schools and Colleges (Band B) MIM projects (**Qualifying Projects**)
 - 5.1.3 Project Services in respect of Qualifying Projects that become Approved Projects (as developed through Schedule 5 (*Approval Process for New Projects*)).

After 10 years exclusivity will not apply.

5.2 Participants may request WEPCo to deliver other services:

- 5.2.1 Project Services relating to Major Capital Projects in the education sector, save for MIM projects for a specified period;
- 5.2.2 Project Services relating to capital projects required for the provision of education sector services or community services;
- 5.2.3 Project Services in relation to the provision of FM Services required for the provision of education sector services or community services (not provided as part of any Qualifying Project);
- 5.2.4 Strategic Support Partnering Services;
- 5.2.5 Ongoing Partnering Services and/or Project Development Partnering Services after 10 years (where the term of the SPA has been extended);
- 5.2.6 Project Development Partnering Services in respect of potential New Projects which are not Qualifying Projects.

The above services are not subject to exclusivity.

5.3 The benefits of exclusivity include:

- 5.3.1 Participants will not have to embark on another regulated procurement for the delivery of Partnering Services or Project Services for the lifetime of the SPA.
- 5.3.2 Participants can be assured of the appropriate level of commitment from WEPCo to foster the development of a successful partnership and outcomes over the long term.
- 5.3.3 Participants can be assured regarding value for money and continuous improvement for the delivery of a pipeline of new projects.
- 5.3.4 Delivery of economies of scale over time through the growth of the WEPCo estate.

5.4 Exclusivity can be suspended if WEPCo fails the “Track Record Test” and will not apply until WEPCo passes a subsequent Track Record Test. This is an assessment of whether in the most recent WEPCo Performance Report shared with Participants on an annual basis, WEPCo has met specified KPIs (including those that relate to community benefits) as evidenced.

6 REPRESENTATIVES AND STRATEGIC PARTNERING BOARD (SPB)

- 6.1 Each Participant will appoint a representative to act on its behalf in relation to the SPA. The identity of the Participant’s Representative may change at any time following written notice to WEPCo and all other Participants. Each Participant Representative may also at any time, by written notice to WEPCo, authorise others to exercise the functions and powers of that Participant.
- 6.2 The SPB governs the relationship between WEPCo and the Participants. It will comprise of representatives of each Participant, WEPCo, Welsh Government and other stakeholder representatives as agreed by the Participants.
- 6.3 The SPB will meet at least every three months to review financial and operating issues and provide strategic input into the partnering arrangements including the exchange of ideas in relation to the Participants’ accommodation and service delivery requirements.

- 6.4 A quorum of the SPB is proposed to be five Participant's Representatives (one of whom must be a representative of the Welsh Government) and the WEPCo Representative. For any adjourned meeting, the quorum shall be one Participant's Representative (who must be a representative of the Welsh Government) and the WEPCo Representative. WEPCo and stakeholder representatives will not have a vote at SPB meetings. Decisions will be taken by majority vote. A decision that affects a Participant will only bind it if that Participant's representative has voted in favour of it.
- 6.5 The SPB will approve the annual Strategic Delivery Plan, ensure New Project proposals are consistent with the SDP, manage WEPCo's performance against agreed KPIs, approve any extension to the SPA term and approve any proposed disposal of interest in share capital resulting in a loss of control by WEPCo (or subsidiary).
- 6.6 WEPCo will be obliged to report on its KPIs which will be reviewed by the SPB annually. The SPB will assess whether the Track Record Test has been passed and if any significant performance failure has occurred. Any dispute shall be resolved under Schedule 21 (*Dispute Resolution Procedure*).

7 DEFAULT

Participant Default

- 7.1 Participant Event of Default includes:
 - 7.1.1 one or more Participants being in breach of clauses 9.1, 9.2 and 9.6 (exclusivity clause);
 - 7.1.2 one or more Participants failing to attend SPB meetings which has a material adverse effect on WEPCo or any Project Service Provider;
 - 7.1.3 one or more Participants being in breach of the SPA which delays the execution of any Project Agreement relating to an Approved Project by more than 40 Business Days;
 - 7.1.4 an expropriation, sequestration, nationalisation or requisition of any Facilities or assets and/or shares of WEPCo or its Holding Company or Project Service Provider by a Participant or any other Relevant Authority (where this occurs due to a Relevant Authority, all Participants will be deemed responsible for the Event of Default); and
 - 7.1.5 any non-payment by a Participant under the SPA exceeding £100,000 60 Business Days after demand.
- 7.2 Where a Participant Event of Default occurs, WEPCo may either:
 - 7.2.1 suspend their performance of the SPA in relation to the Participant in default until that Participant can demonstrate to WEPCo's reasonable satisfaction it is capable of performing their obligations; or
 - 7.2.2 notify the Participant of the Event of Default.

If the Participant Event of Default is capable of remedy and has not been remedied within 30 Business Days or is not capable of remedy with immediate effect, WEPCo may either serve notice on each Participant in default terminating the SPA in relation to them with immediate effect or simply notify the Participants in default of the effect their default has had. Any Participants in default will be liable to pay compensation to WEPCo in accordance with section 1 of Schedule 14 (*Compensation on Participant Event of Default and Termination*). If the SPA is terminated in its entirety by the default, compensation under section 2 of Schedule 14 (*Compensation on Participant Event of Default and Termination*) will be payable.
- 7.3 If a Participant is served a Participant Default Notice more than once in any 12 months, it will not receive Project Development Partnering Services or any Strategic Support Partnering Services unless paid monthly in arrears.

- 7.4 The Participants have several liability, other than where two or more Participants have suffered an Event of Default leading to a termination of the SPA, in which case, the loss of WEPCo will be split between the defaulting Participants.

WEPCo Default

- 7.5 The SPA provides for a long list of circumstances which constitute a WEPCo Default including amongst others, WEPCo breaching the SPA, WEPCo failing to provide the Partnering Services, WEPCo breaching health and safety laws; WEPCo failing to pay Participants under the SPA which exceeds £10,000 for 60 Business Days on demand; WEPCo or a Project Service Provider suffering an Insolvency Event; and WEPCo (or WEPCo Party) committing a Prohibited Act.
- 7.6 On a WEPCo Event of Default, each Participant can (acting through the Welsh Government) suspend the exclusivity granted to WEPCo which will include any New Projects that have not yet reached Stage 2 approval. The Participants can lift that suspension at any time and the suspension of exclusivity will be lifted on remedy of the default and where the PSDP shares in WEPCo are sold.
- 7.7 The SPA provides for an escalation of remedies following a WEPCo Event of Default, proportionate to the severity of the default, which may be exercised by the Participants (acting through Welsh Government). These include: suspension of exclusivity; requiring a remediation programme to be implemented; an improvement programme to satisfy Participants that the events will not recur; termination of a non-performing supply chain member; and ultimately termination of the SPA.
- 7.8 WEPCo will reimburse each Participant for all reasonable costs incurred by each Participant as a result of WEPCo's breach of the SPA.

8 WEPCO INDEMNITIES

- 8.1 As would be expected under a long term partnering agreement, the SPA includes provisions under which WEPCo indemnifies the Participants, and the Participants indemnify WEPCo, for certain losses. These are limited to Direct Losses, and exclude Indirect Losses (such as loss of profit and loss of business opportunity), and further Participants partially exclude their liability for their negligence (see below) and claims in tort.
- 8.2 The scope of the indemnity provided by WEPCo is slightly wider than the Participants' indemnities to WEPCo, as the Participants' indemnities are limited to Direct Losses sustained by WEPCo as a consequence of any negligent act or omission by that Participant (or a Participant Party relating to that Participant) relating to the performance or non-performance of the Participant's obligations under the SPA, or a breach of an express provision of the SPA by that Participant. The indemnities provided by WEPCo relate to any act or omission of WEPCo (not just its negligence or breach of an express obligation).
- 8.3 The indemnities cover death and/or personal injury, damage to assets of the other party and third parties. In each case (and subject to the overriding limitation on the scope of the Participants' indemnities described in above), each party is liable for Direct Losses sustained in consequence of any claim for death and/or personal injury of their own employees or persons engaged by them, notwithstanding any act or omission of the other party.
- 8.4 In respect of death or personal injury to third parties, and damage to property, each party indemnifies the other for Direct Losses they cause (save to the extent caused or contributed to by the Participant's own negligence (where WEPCo is indemnifying the Participant) or WEPCo's own acts or omissions (where the Participant is indemnifying WEPCo). Physical damage to property is typically an insured risk, and the indemnity given by the Participants to WEPCo excludes insured losses. Where damage to property has been caused (or contributed to) by the Participant's own negligence, and they are claiming under the WEPCo indemnity, the Participant is responsible for the deductibles under any policy of insurance, and any sums over the maximum amount required to be insured under the SPA insurance policies.

9 DISPUTE RESOLUTION

- 9.1 Disputes are dealt with in accordance with the resolution procedure set out in Schedule 22 (*Dispute Resolution Procedure*). If a Dispute occurs, the parties must consult in good faith. If that is unsuccessful, the Dispute must be escalated to senior personnel. If that is unsuccessful, the Dispute will be escalated to mediation and failing that to arbitration. The exception to this is where a party requires an order restraining another party from doing any act or compelling another to do any act or a judgement for a liquidated sum where there is no arguable defence.

10 INSURANCE

- 10.1 The insurances listed in Schedule 9 (*Insurances*) and any others required by law must be taken out by WEPCo, subject to insurance being available in the market to cover WEPCo in its role during the lifetime of the SPA. The insurance will cover any indemnity claims against WEPCo in relation to any death or bodily injury or third party property damage arising out of or in connection with the Partnering Services.
- 10.2 If a Project Service Provider notices a risk becoming an Uninsurable Risk under the relevant Project Agreement, the Participants and WEPCo will hold a SPB meeting within 7 Business Days and will use their reasonable endeavours to agree a position with regards to the risk within 20 Business Days of notice.

11 INTELLECTUAL PROPERTY RIGHTS

- 11.1 WEPCo grants a free, irrevocable, non-exclusive and transferable (but only to any assignee or transferee of any rights or benefits under the SPA or following termination of the SPA) licence to each Participant to use the Intellectual Property Rights which are vested in WEPCo and where possible, where vested in third parties. WEPCo will indemnify Participants where they receive a claim as a result of the Participant infringing third party Intellectual Property Rights (other than as a result of the Participant acting outside of the terms of the SPA).

12 ASSIGNMENT AND SUBCONTRACTING

- 12.1 WEPCo cannot assign or dispose of the SPA without the prior written consent of the Participants, other than where granting security rights in a form approved by the Participants prior to grant.
- 12.2 A Participant cannot assign or dispose of the SPA other than to a limited set of organisations set out in clauses 28.4.1 to 28.4.4, including the Welsh Ministers, an agency of the Welsh Ministers, Government or Local Authority, any other Further Education Corporation or Designated Institution or any person with the legal capacity or sufficient financial resources to perform the obligations of the Participant. Depending on the transferee, the obligations may need to be guaranteed by the Participant.

Bevan Brittan LLP

WEP STRATEGIC PARTNERING DELIVERY MODEL**ROLE OF THE STRATEGIC PARTNERING BOARD (SPB)****1 INTRODUCTION¹**

- 1.1 The WEP Strategic Partnering Agreement (**SPA**) is the agreement entered into between the Local Authorities and Further Education Institutions (**Participants**)² and WEPCo (being the joint venture company established between the Private Sector Delivery Partner (**PSDP**) and a subsidiary of the Development Bank of Wales).
- 1.2 The purpose of the SPA is to establish a long term partnership (initial term of 10 years, which may be extended by 5 years) between WEPCo and the Participants. The SPA provides for the creation of the Strategic Partnering Board (**SPB**); this paper summarises the role of the SPB in the context of the SPA.

2 THE SPA KEY PRINCIPLES

- 2.1 The SPA commits the Participants and WEPCo to work to the following nine (9) key principles, and the SPB is the guardian vehicle of these commitments.
- 2.2 The key principles of the SPA are:
- a) to develop close working relationships between WEPCo and the Participants at all levels;
 - b) to focus on achieving the best value for money operational performance within agreed timescales;
 - c) to set in place business and cultural processes to enable the Participants and WEPCo to establish and agree challenging time and performance objectives and to meet or better them;
 - d) to recognise each other's needs, constraints, limitations, capabilities, roles and responsibilities to achieve mutually beneficial outcomes;
 - e) to identify by regular monitoring, weaknesses and strengths in the relationship between and amongst the Participants and WEPCo and to work together to overcome the weaknesses and to build on the strengths;
 - f) to commit to the early recognition and resolution of differences, conflicts and disputes between and amongst the Participants and WEPCo in a 'no surprises' environment;
 - g) to appoint within each of the Participants and WEPCo co-ordinators at senior level who will support, defend and promote the long term strategic partnership between them and its principles of operation;
 - h) to develop openness and trust in a transparent information and data sharing environment; and
 - i) in accordance with the Equality Requirements to positively promote equal opportunities and the Ethical Employment Code by combating discrimination on the grounds of race, ethnicity, religion, nationality, gender, disability, age or sexuality and promoting good relations between all sections of the community in 'everything we do' including:

¹ Capitalised terms have the meaning provided for in the Strategic Partnering Agreement unless otherwise stated.

² Note those named as a "Contracting Authority" in the OJEU notice will be entitled to sign and enter D

- a) Delivering high quality Education Sector Services and (where relevant) Community Services for end users; and
- b) Working with the local community and partners in the public, private or voluntary sectors.

3 SPB MECHANICS

3.1 SPB Structure

The SPB will comprise of:

- a) one representative from each of the Participants;
- b) one representative of WEPCo, nominated by the board of directors of WEPCo;
- c) one additional representative of Welsh Government (at Welsh Government's discretion); and
- d) a reasonable number of Stakeholder Representatives interested in or affected by Education Sector Services and/or Community Services;

3.1.1 Participant Representatives are expected to be senior representatives of the Participant, with the appropriate authority to make decisions on behalf of the Participant. They should be experienced in holding a director or similar position and have the required skills to make the decisions required to be made by the SPB. Participants will need to consider any likely conflicts of interest and ensure that conflicts of interest do not prevent the chosen representative from fulfilling their role as representative as well as any other role they hold directly in the Participant organisation.

3.1.2 The identity of a Participant's Representative in the SPB may change at any time following written notice to WEPCo and all other Participants.

3.1.3 A Participant Representative may also give written notice to WEPCo authorising others to exercise the functions and powers of that Participant at SPB meetings.

3.1.4 A Chairman will be appointed on an annual basis from amongst the Participants' Representatives. Save where agreed to the contrary by the Participants, it is intended that the post of Chairman will rotate annually amongst the Participants' Representatives in turn. The Chairman will be non-voting in his capacity as Chairman.

3.2 SPB Meetings

3.2.1 The SPB will meet regularly at least every 3 months to provide strategic input into how the partnering established by the SPA is operating, and to review financial and operating (including performance) issues.

3.2.2 Agendas for SPB meetings will be circulated on behalf of the Chairman five (5) Business Days in advance (with supporting papers) and any party wishing to raise other agenda items will notify all other members of the SPB (with supporting papers) in writing no later than three (3) Business Days in advance.

3.2.3 The SPB must have a quorum of five (5) Participants' Representatives (one of whom must be a representative from Welsh Government) and a WEPCo Representative. If a quorum is not present at any meeting of the SPB within thirty (30) minutes of that meeting's start time, the SPA requires that the meeting is adjourned to the same time and place five (5) Business Days later. For any adjourned meeting, the quorum shall be one Participant's Representative (who must be a representative of the Welsh Government) and the WEPCo Representative. Telephone conference calls or video conferences shall be valid as a meeting of the SPB.

- 3.2.4 The Participants must arrange for a person to take minutes of all SPB meetings and circulate the same to all representatives and the Chairman within five (5) Business Days after the relevant meeting.
- 3.2.5 All members of the SPB are obliged to use reasonable endeavours to ensure their regular attendance at all meetings and each Participant will, unless unavoidable, ensure that its representative on the SPB is appropriately empowered to agree matters on its behalf.
- 3.2.6 Each Participant is required to use reasonable endeavours to ensure that its representative on the SPB conducts himself in accordance with the partnering principles contained in the SPA and in a manner intended to ensure that the SPB complies with its obligations and carries out its functions in a timely manner.
- 3.2.7 Decisions will be taken by a majority vote. WEPCo and Stakeholder Representatives will not have a vote at SPB meetings. A decision that affects a Participant will only bind it if that Participant's representative has voted in favour of it.

4 PARTNERING SERVICES

- 4.1 The SPB will serve as a forum for the open exchange of ideas, and will enable the Participants to discuss their forthcoming accommodation and service delivery requirements to ensure an integrated co-ordinated and practical approach to fulfilling such requirements.

4.2 The Strategic Delivery Plan

The Strategic Delivery Plan (**SDP**) will set out objectives based on Participants' local delivery plans and will be developed annually between the Participants and WEPCo. The SPB will be required to approve:

- 4.2.1 the initial SDP put forward in accordance with Section 1 of Schedule 11 (*Initial SDP*); and
- 4.2.2 any amendments made to the SDP in accordance with Section 2 of Schedule 11 (*Updated SDP*).

4.3 The Management System

The SPB shall be required to approve the following systems established by WEPCo:

- 4.3.1 a quality management system for the purpose of ensuring and demonstrating that all aspects of the Partnering Services and all other matters for which WEPCo is responsible under the SPA are carried out fully in conformity with the relevant provisions of SPA and WEPCo's quality management policies and objectives;
- 4.3.2 an appropriate system for implementing WEPCo's occupational health and safety (**OH&S**) policies and objectives to enable it to control its OH&S risks and improve its OH&S performance over time; and
- 4.3.3 an appropriate system for achieving and demonstrating sound environmental performance by controlling the impacts of WEPCo's activities, products and services on the environment, consistent with its environmental policy and objectives.

4.4 The Partnering Services Costs Rates

- 4.4.1 WEPCo is required to provide report of the Partnering Services rates and prices by reference to:
 - a) other relevant local and national trends;
 - b) the rates and prices actually paid by WEPCo for similar services (where WEPCo has used Good Industry Practice to secure best value in respect of those services);

and taking account of value for money objectives set out in the Key Performance Indicators and the outcomes of the Partnering Services Supply Chain Refresh.

- 4.4.2 The SPB shall decide whether to approve any proposal of an increase or decrease of, or no change to the rates.

5 MANAGING WEPCO PERFORMANCE

- 5.1 The SPB will act as the primary mechanism for managing WEPCo's performance.
- 5.2 WEPCo will be required to regularly monitor and report to the SPB on its performance (and its Partnering Subcontractors) under the SPA, of the Project Service Providers and the Supply Chain Members under Project Agreements.
- 5.3 Within twenty (20) Business Days of each Review Date, WEPCo will issue to the SPB the WEPCo Performance Report, which will detail a review of whether each of the Key Performance Indicators has been met.
- 5.4 In less than one (1) month of the Review Date in that year, the SPB will hold a formal Annual Review of the operation of the SPA and WEPCo's performance in the context of the targets and objectives in the SDP and the Key Performance Indicators. As part of this review, the SPB (excluding for such purposes WEPCo's representative) will review WEPCo's progress against the partnership objectives in the SPA and the WEPCo Performance Report and the SPB and WEPCo shall agree any key findings from such review together with the implications relating to WEPCo's future activities.
- 5.5 The SPB shall be entitled to require information and/or clarification from WEPCo in relation to the WEPCo Performance Report including as to whether or not the Track Record Test has been passed and, whether any Significant Performance Failure has occurred.

6 APPROVAL PROCESS OF NEW PROJECTS

- 6.1 In respect of New Projects, the SPB will work with WEPCo and Participants to:
- 6.1.1 identify, analyse and discuss the Participants' collective and individual accommodation requirements;
 - 6.1.2 assist in the development of local delivery plans and review their applicability to the provision of Education Sector Services and Community Services in the Region;
 - 6.1.3 develop further the SDP, in particular to further refine the proposals contained in the SDP;
 - 6.1.4 decide the basis upon which New Projects are prioritised;
 - 6.1.5 identify and appraise available options for meeting the Participants' accommodation requirements and recommend (on the basis of best available value for money) which New Projects to progress;
 - 6.1.6 advise how best to bundle accommodation requirements within a New Project to ensure that the New Project is Affordable, offers value for money and provides a solution with an appropriate level of flexibility;
 - 6.1.7 take into consideration the views of relevant stakeholders in relation to the SDP and actual or potential New Projects;
 - 6.1.8 develop the Participants' requirements in relation to New Projects (which will be developed further during the Stage 2 Approval process) to enable it to form the basis for the agreement of the relevant Project Agreement;

- 6.1.9 analyse and discuss the range of potential funding options for New Projects including the feasibility of third party funding such as sponsorship when considering and developing a New Project;
- 6.1.10 assist in the preparation of outline business cases and obtaining all necessary approvals; and
- 6.1.11 for any New Project in respect of which such Participant(s) has/have indicated an intention to submit a New Project Request, agree:
 - a) the appropriate Comparator for purposes of determining any adjustments to the Project Development Fee Cap pursuant to paragraph 2 of Schedule 4 (Partnering Services Costs) in respect of such Comparator; and
 - b) each part of the Project Development Fee Cap for each stage.
- 6.2 Where the potential Relevant Participant(s) and WEPCo are unable to agree the matters referred to in paragraph 6.1.11 above within a period of three (3) months, the SPB shall determine such matters.
- 6.3 The SPB should be provided with copies of both the Stage 1 and Stage 2 Submissions and will provide a forum for discussion of whether the submissions meet the Approval Criteria. Approval of the New Projects is ultimately decided by the Relevant Participant(s).

7 EXTENDING THE SPA TERM

- 7.1 The term of the SPA may be extended for an additional five (5) years after the Initial ten year term. The SPB will meet twelve (12) months before the Initial Expiry Date to review:
 - 7.1.1 the performance of the Parties under the SPA and, in particular, the performance of WEPCo in delivering the Partnering Services to the performance standards set out in Clause **Error! Reference source not found.** (*Services Obligations*);
 - 7.1.2 the Education Sector Services and Community Services needs of the population within the Region; and
 - 7.1.3 whether it would be beneficial to the provision of all or any of the Education Sector Services and/or Community Services in the Region to extend this Agreement for a further five (5) year period from the Initial Expiry Date.
- 7.2 It will then be decided by WEPCo and one or more of the Participants whether to extend the term of the SPA by five (5) years from the Initial Expiry Date.

8 DISPOSAL OF PROPERTIES AND/OR SHARES

- 8.1 SPB approval will be required in respect of any action, which would result in a loss of control (direct or indirect) by WEPCo of any Subsidiary of WEPCo, which is a Project Service Provider. The SPB is obliged to act reasonably and without undue delay, taking into account any proposals put forward. If the SPB does not approve the proposed action, WEPCo must use all reasonable endeavours to procure that its Subsidiary and/or the relevant Project Service Provider shall not proceed with that proposed action.
- 8.2 It will be deemed to constitute a material breach of the SPA by WEPCo if:
 - 8.2.1 any Project Service Provider takes any action under its Project Agreement, which under the terms of such agreement, requires the SPB's consent without such consent having first been obtained, or
 - 8.2.2 WEPCo or any Subsidiary of WEPCo takes any action, which requires the SPB's consent or agreement under the SPA without such consent or agreement having first been obtained.

9 INSURANCE

- 9.1 Where a Project Service Provider for a MIM Project has notified a Project Agreement Counterparty of a risk becoming an Uninsurable Risk (pursuant to the provisions of the relevant Project Agreement), the Participants and WEPCo must ensure that a meeting of the SPB is held as soon as is reasonably practicable (and in any event within seven (7) Business Days of receipt by the Project Agreement Counterparty of such notice).
- 9.2 At that meeting the SPB will consider the situation and the parties will work together to use all their respective reasonable endeavours to obtain an agreed position from the SPB in relation to the risk becoming an Uninsurable Risk within twenty (20) Business Days of the Project Service Provider notifying the Project Agreement Counterparty as described above.

10 CONCLUSION

The SPB will be the central forum in which the Participants can work together with WEPCo, Welsh Government and Stakeholder Representatives to ensure that the key principles of the SPA are met. The SPB's role will be to approve the SDP; ensure any New Project proposals are consistent with the SDP; monitor WEPCo's performance against agreed KPIs; approve any extension to the SPA term; and approve any proposed disposal of interest in share capital resulting in a loss of control by WEPCo (or subsidiary).

WEP STRATEGIC PARTNERING AGREEMENT

**ITPDSB Version
(Standard Form Version 1.4)**

STANDARD FORM WEP STRATEGIC PARTNERING AGREEMENT

STANDARD FORM VERSION 1

IMPORTANT NOTICE

This is the first version of the Welsh Education Partnership ("**WEP**") Strategic Partnering Agreement ("**SPA**") the intention of which is to minimise the time and costs of dealing with legal issues relating to the WEP Strategic Partnering Delivery Model. The Welsh Government expect the standard form SPA to be used substantially un-amended. A certain degree of customisation of the standard form SPA will be necessary to reflect the features of the developed scheme. However project specific justification must be given to any such customisation and must be approved by the Welsh Government.

Users of this standard form should be aware of the following points:

1. The standard form contract contains a number of footnotes identifying certain key issues that the parties will need to consider when using it. However, this is not an exhaustive list, and the standard form SPA will therefore need to be analysed and reviewed in detail to ensure that it is tailored to the requirements of the developed scheme and that its terms (and their impact) are clearly understood by the Participant(s). Customisation should not however extend to the parties seeking to change the substance of commercial terms or making unnecessary drafting amendments. All changes to the standard form contract require the prior approval of Welsh Government.
2. All parties are reminded that the WEP Strategic Partnering Delivery Model is a true partnership in every sense of the word and the value of further debate over insubstantial issues should be considered in this light. The public sector shall be positively motivated to work with the private sector to avoid or mitigate the impact of any issues that may arise over the lifetime of the partnering.
3. The standard form SPA is not a replacement for independent, specialist advice and parties must ensure that they have taken appropriate legal, financial and technical advice before using this document.
4. The standard form SPA shall be used in conjunction with any guidance issued by the Welsh Government from time to time.
5. This notice and the footnotes should be removed as appropriate before finalisation of the document for execution.

Should you have any questions on the draft you are asked to contact MIMEducation@gov.wales

THIS AGREEMENT is made on the day of

AMONG:

- (1) [◆] **LIMITED**, a company registered under number [◆] whose registered office is at [◆] ("**WEPCo**");
- (2) [] of [];
- (3) [] of [];
- (4) [] of [];
- (5) [] of [];
- (6) [] of []; and
- (7) [] of [].

RECITALS:

- (A) [The Participants which are [*appropriate references to public sector Participants to be inserted*] have agreed to enter into this Agreement pursuant to their powers contained in [*specific reference*].]
- (B) This Agreement establishes the long-term strategic partnering between WEPCo and the Participants relating, inter alia, to the delivery of improved Education Sector Services and, in certain instances, Community Services, in the Region.

NOW IT IS HEREBY AGREED as follows:

1. DEFINITIONS, INTERPRETATION AND CONSTRUCTION

This Agreement shall be interpreted according to the provisions of Schedule 1 (*Definitions, Interpretation and Construction*).

2. PURPOSE AND CONDUCT OF THE PARTIES

Aim

2.1 The purpose of this Agreement, the Shareholders' Agreements and the Project Agreements is to establish a long-term partnering relationship between WEPCo and the Participants and for WEPCo to provide or procure, across the Region as a whole, the provision of appropriate accommodation and related services to the Participants and others involved in providing Education Sector Services and/or Community Services with the aim of:

- 2.1.1 improving the efficiency of delivery of community and education based facilities;
- 2.1.2 making the best use of public resources; and
- 2.1.3 providing continuous improvement in both cost and quality in public procurement.

2.2 The aim of this Clause 2 is to identify the high level principles which underpin the delivery of the Parties' obligations under this Agreement and to set out key factors for a successful relationship between the Parties. Whilst it is recognised that these principles are difficult to measure in isolation, the successful implementation of the Project Agreements, the Shareholders' Agreements and this Agreement will depend on the Participants' ability effectively to co-ordinate and combine their expertise, manpower and resources in order to deliver an integrated approach to Education Sector Services and, in certain instances, Community Services in the Region, under this Agreement.

Principles

2.3 The principles referred to in Clause 2.2 are:

- 2.3.1 to develop close working relationships between WEPCo and the Participants at all levels;
- 2.3.2 to focus on achieving the best value for money operational performance within agreed timescales;
- 2.3.3 to set in place business and cultural processes to enable the Participants and WEPCo to establish and agree challenging time and performance objectives, and to meet or better them;
- 2.3.4 to recognise each other's needs, constraints, limitations, capabilities, roles and responsibilities to achieve mutually beneficial outcomes;
- 2.3.5 to identify, by regular monitoring, weaknesses and strengths in the relationship between and amongst the Participants and WEPCo and to work together to overcome the weaknesses and to build on the strengths;
- 2.3.6 to commit to the early recognition and resolution of differences, conflicts and disputes between and amongst the Participants and WEPCo in a 'no surprises' environment;
- 2.3.7 to appoint within each of the Participants and WEPCo, co-ordinators at senior level who will support, defend and promote the long-term strategic partnering between them and its principles of operation;
- 2.3.8 to develop openness and trust in a transparent information and data sharing environment; and
- 2.3.9 in accordance with the Equality Requirements to positively promote equal opportunities and the Ethical Employment Code by combating discrimination on the grounds of race, ethnicity, religion, nationality, gender, disability, age or sexuality and promoting good relations between all sections of the community in 'everything we do' including:
 - (a) delivering high quality Education Sector Services and (where relevant) Community Services for end users; and
 - (b) working with the local community and partners in the public, private or voluntary sectors.

Mutual Objectives

2.4 This Agreement, under which, inter alia, a contractual structure is established for the delivery of a range of services designed to assist in the integrated delivery of Education Sector Services and, in certain cases, Community Services in the Region, aims to ensure that the following essential components are embraced and adhered to by WEPCo and the Participants:

- 2.4.1 WEPCo and the Participants agree and commit themselves to:
 - (a) the agreed mutual aims set out in Clause 2.1, and the WEP Objectives; and
 - (b) understanding the other Parties' long-term goals and working towards them in accordance with the principles set out in Clause 2.3;
- 2.4.2 these mutual objectives are kept under review through meetings and effective communications;
- 2.4.3 WEPCo and the Participants benefit from 'open book' relationships in accordance with Clause 36 (*Records and Open Book Accounting*);
- 2.4.4 in its dealings with Supply Chain Members for the delivery of individual Projects, WEPCo will seek to act in a manner consistent with the principles in Clause 2.3 and will seek to ensure that each of such parties is aware of and is able to contribute to the mutual objectives agreed with the Participants from time to time in accordance with this Clause 2.4; and
- 2.4.5 without prejudice to the provisions of Clause 30 (*Confidentiality*), all discussions between the Parties are treated with mutual confidentiality.

Problem Resolution

2.5 WEPCo and the Participants adopt an agreed systematic approach to problem resolution which recognises the principles contained in Clause 2.3.6 and:

- 2.5.1 seeks solutions without apportioning blame;
- 2.5.2 is based on mutually beneficial outcomes;
- 2.5.3 treats WEPCo and the Participants as equal parties in the dispute resolution process;
- 2.5.4 contains a mutual acceptance that adversarial attitudes waste time and money; and
- 2.5.5 relies on more and better discussion - with less paperwork and more constructive correspondence.

Improvement

2.6 WEPCo and the Participants will commit themselves to the achievement of continuous, measurable and measured improvement by:

2.6.1 agreeing quantitative and qualitative targets (pursuant to Clause 14.17 (*Managing WEPCo Performance*) and Section 3 (*Performance Measurement*) of Schedule 3 (*Partnering Services*) which relate to the purpose and aim of this Agreement and the Parties' mutual objectives and which:

- (a) are specific;
- (b) are challenging;
- (c) add value; and
- (d) eliminate waste;

2.6.2 measuring and reviewing contractual performance against the Key Performance Indicators in accordance with this Agreement; and

2.6.3 identifying and following best practice.

Non-binding effect of this Clause 2

2.7 The Parties recognise and agree that the partnering ethos, principles and objectives described and set out in this Clause 2 are aspirational and shall not and are not intended to give rise to legally binding rights and obligations between the Parties.

3. COMMENCEMENT, DURATION AND EXPIRY OF THIS CONTRACT

Contract Term and Expiry

3.1 Subject to Clause 3.2 and to earlier termination in accordance with its terms, this Agreement will commence on the Commencement Date and will expire on the date ten (10) years after the Commencement Date (the "**Initial Expiry Date**"). For the avoidance of doubt, WEPCo shall not be entitled to any compensation for termination of this Agreement on expiry on the Initial Expiry Date or on the Extended Expiry Date, as the case may be, nor on any extension to this Agreement beyond the Initial Expiry Date.

3.2 The term of this Agreement may be extended for an additional five (5) years after the Initial Expiry Date in the circumstances and in accordance with procedure set out in this Clause 3.2:

3.2.1 twelve (12) months before the Initial Expiry Date the SPB shall meet to review:

- (a) the performance of the Parties under this Agreement and, in particular, the performance of WEPCo in delivering the Partnering Services to the performance standards set out in Clause 8.1 (*Services Obligations*);
- (b) the Education Sector Services and Community Services needs of the population within the Region; and
- (c) whether it would be beneficial to the provision of all or any of the Education Sector Services and/or Community Services in the Region to extend this Agreement for a further five (5) year period from the Initial Expiry Date;

3.2.2 if WEPCo and one or more of the Participants (the "**Continuing Participants**") agree that it would be beneficial to the provision of all or any of the Education Sector Services and/or Community Services in the Region to extend this Agreement, the Continuing Participants shall serve a written notice upon WEPCo at least six (6) months before the Initial Expiry Date the effect of which shall be to extend the term of this Agreement by five (5) years from the Initial Expiry Date as between WEPCo and the Continuing Participants. In relation to any Participant who is not a Continuing Participant, this Agreement shall expire on the Initial Expiry Date and nothing in this Clause 3.2.2 shall extend or increase the liability of any such Participants.

3.3 Upon the expiry or earlier termination of this Agreement, the following clauses shall continue to the extent necessary to give effect to the expiry or termination of this Agreement, or, if later (and where applicable to the operation of WEPCo's Partnering Services related to performance of a Project Service Provider under an operative Project Agreement), shall continue in force until the final D&B Termination Date of any Project Agreement for a D&B Project in force at the time of expiry or earlier termination of this Agreement, which was entered into pursuant to this Agreement:

| Clause number(s) | Description |
|--|---|
| 1 | <i>Definitions, Interpretation and Construction</i> |
| 5.2 - 5.5 (inclusive) | <i>Disposal of properties and/or shares</i> |
| 8.1 (excluding Clause 8.1.5 and Clause 8.1.6), 8.4, in each case only to the extent relevant following expiry of this Agreement and relating to reporting and performance measurement obligations) | <i>Service Obligations</i> |
| 12 | <i>Parties' Representatives</i> |
| 14 (excluding Clause 14.4) | <i>Management of WEPCo's performance</i> |
| 16-20 (but, in the case of Clauses 20.3 to 20.8 (inclusive) only to the extent relevant following expiry of this Agreement) | <i>Indemnities; Insurance; Intellectual Property rights; Transfer of employment; Site security and personnel issues</i> |
| 22 | <i>Participant default</i> |
| 23 | <i>WEPCo events of default</i> |
| 24 | <i>Force Majeure</i> |
| 25 | <i>Corrupt gifts and fraudulent payments</i> |
| 27 | <i>Agency and Participants' statutory authority</i> |
| 28 | <i>Assignment and sub-contracting</i> |

| Clause number(s) | Description |
|------------------|---|
| 29 | <i>Performance of subcontractors</i> |
| 30-32 | <i>Confidentiality; Freedom of Information; Change in parties to the partnering agreement</i> |
| 33-52 | <i>Dispute resolution; Order of precedence of documents; No recourse to public funds; Records and open book accounting; Personal Data; Liability of the Participants; Prohibited activities; Notices; Amendments; Waiver; No agency; Entire agreement; Severability; No double recovery; Costs and expenses; Third Party Rights; Mitigation; Further assurance; Governing law and jurisdiction; General assistance and cooperation and Participant undertakings</i> |

4. DELIVERABLES

4.1 On or prior to execution of this Agreement:

- 4.1.1 WEPCo shall deliver to each Participant's Representative the documents referred to in Section –1 (*Documents to be delivered by WEPCo*) of Schedule 2 (*Completion Documents*) (save to the extent the requirement to deliver any such document is waived by the relevant Participant's Representative(s) by written notice to WEPCo); and
- 4.1.2 each Participant shall deliver to WEPCo the relevant documents referred to in Section –2 (*Documents to be delivered by the Participants*) of Schedule 2 (*Completion Documents*) (unless the requirement to deliver any such document is waived by WEPCo by written notice to the relevant Participant(s)).

5. PLANNING MATTERS AND INTERESTS IN PROPERTY

5.1 **Planning matters**

- 5.1.1 It is the intention of the Parties that, where Planning Permission is required for any Approved Project, that detailed Planning Permission is obtained prior to execution of the Project Agreement in respect of the relevant Approved Project. In such cases the provisions of Schedule 12 (*Planning Matters*) and Schedule 13 (*Unreasonable Conditions*) shall have full effect in respect of such Approved Project. WEPCo's performance of its obligations under Schedule 12 (*Planning Matters*) in respect of a specific Approved Project shall be deemed to be part of the Project Development Partnering Services and the costs incurred relative thereto shall be included as part of the Project Development Fee.
- 5.1.2 In exceptional circumstances, in terms of the relevant Stage 2 Approval, detailed Planning Permission may not be required to be obtained prior to execution of the

relevant Project Agreement. In such cases the provisions of Schedule 12 (*Planning Matters*) and Schedule 13 (*Unreasonable Conditions*) shall, subject to Clause 5.1.4, have effect in respect of the relevant Approved Project until such time as a Project Agreement is executed whereupon such matters as relate to the development which is the subject of that Project Agreement shall become the responsibility of the Project Service Provider under that Project Agreement and, save as agreed to the contrary between the Project Service Provider and the relevant Project Agreement Counterparty, the appropriate provisions from Schedule 12 (*Planning Matters*) and Schedule 13 (*Unreasonable Conditions*) shall be included within the relevant Project Agreement.

- 5.1.3 WEPCo shall provide all such assistance as is required by any Project Service Provider under a Project Agreement to ensure a smooth transition of planning matters including but not limited to all Consents, Planning Permissions, Planning Agreements and Infrastructure Agreements which are the subject of that Project Agreement.
- 5.1.4 The requirements of paragraphs 1.1.1, 1.1.2 and 1.1.3 of Schedule 12 (*Planning Matters*) shall continue to apply in respect of any Project the subject of a Project Agreement notwithstanding the execution of the relevant Project Agreement.

Disposal of properties and/or shares

- 5.2 WEPCo shall not take or permit to be taken any action which would result in a loss of control (direct or indirect) by WEPCo of any Subsidiary of WEPCo which is a Project Service Provider without the approval of the SPB. If, subject to Clause 5.5, WEPCo or any Subsidiary of WEPCo proposes to sell, transfer or otherwise dispose of any legal, beneficial or equitable interest in share capital which would result in a loss of control by WEPCo of any Subsidiary of WEPCo which is a Project Service Provider, WEPCo shall notify the SPB in writing of its intention (or the intention of its Subsidiary) and such notification shall be accompanied by proposals setting out how, if the proposed transaction were to proceed, the relevant Project Agreement Counterparties' rights under the relevant Project Agreement(s), together with the wider protection afforded to the Project Agreement Counterparties as a consequence of the inter-relation between that Project Agreement, the WEPCo Shareholders' Agreement and this Agreement, would or could be preserved or enhanced.
- 5.3 In deciding whether to approve any proposed action notified under Clause 5.2, the SPB shall act reasonably and without undue delay, taking into account any proposals put forward pursuant to Clause 5.2. If the SPB does not approve the proposed action, WEPCo shall not, and shall use all reasonable endeavours to procure that its Subsidiary and/or the relevant Project Service Provider shall not, proceed with that proposed action.
- 5.4 If any Project Service Provider takes any action under its Project Agreement which, in terms of such agreement, requires the SPB's consent without such consent having first been obtained, or if WEPCo or any Subsidiary of WEPCo takes any action which requires the SPB's consent or agreement under this Agreement without such consent or agreement having first been obtained, such action shall be deemed to constitute a material breach by WEPCo of its obligations hereunder for the purposes of Clause 23.1.3.
- 5.5 Clause 5.2 shall not apply to the sale, transfer or other disposition of a legal, beneficial or equitable interest in the share capital of a Subsidiary of WEPCo which is a Project Service Provider where:

- 5.5.1 such sale, transfer or disposition is required by the Funders in response to a default by the Project Service Provider under the relevant Funding Agreements; or
- 5.5.2 the disposition is the grant of security for any loan made to the Project Service Provider under the relevant Funding Agreements.

6. **NEW PROJECTS**

- 6.1 The Parties' obligations in relation to the identification, approval and delivery of New Projects which are Qualifying Projects are contained in Schedule 5 (*Approval Process for New Projects*).
- 6.2 In respect of each Approved Project (including where Clause 9.3.5 applies) WEPCo shall, or shall procure that a Project Service Provider shall enter into a Project Agreement either:
 - 6.2.1 substantially in the form of the relevant Template Project Agreement completed in accordance with the "IMPORTANT NOTICE" set out on such Template Project Agreement to reflect such amendments as may be required in the circumstances of that particular Project Agreement and as may be agreed between WEPCo and the Relevant Participant(s) and approved by the Welsh Government; or
 - 6.2.2 in the case of an Approved Project for FM Services only, or a D&B Project for Community Services only, in such form as may be agreed between the Relevant Participant(s) and WEPCo and approved by the Welsh Government.
- 6.3 In respect of each Approved Project that is a MIM Project (including where Clause 9.3.5 applies), WEPCo shall procure that a Project Service Provider shall enter into a Project Co Shareholders' Agreement substantially in the form of the Template Project Co Shareholders' Agreement, completed in accordance with the "IMPORTANT NOTICE" set out on such Template Project Co Shareholders' Agreement to reflect such amendments as may be required in the circumstances of that particular project as agreed among the Project Service Provider, PSDP and WGCo and approved by the Relevant Participant(s) and Welsh Government.

7. **EXISTING SERVICE PROVIDERS**

- 7.1 WEPCo acknowledges that the Participants' accommodation requirements and associated services are, at the Commencement Date, delivered using a variety of service providers including, in some cases, persons employed by the Participants.
- 7.2 The Parties recognise that during the term of this Agreement it is envisaged that WEPCo will be providing or procuring the provision of an increasing proportion of the Participants' accommodation requirements and associated services under the terms of this Agreement and (via the Project Service Providers) the Project Agreements.
- 7.3 WEPCo and each Participant will work together to ensure that the existing service providers are treated fairly as a consequence of the operation of this Agreement and, without prejudice to the operation of Law and the requirements of Clause 19 (*Transfer of Employment*), WEPCo shall endeavour, where it is practicable and consistent with achieving the Participant's requirements from time to time, to employ or procure employment by a Project Service Provider of those individuals engaged in carrying out activities for the benefit of that Participant for which WEPCo or any Project Service Provider under a Project Agreement subsequently becomes responsible under the Agreement or any Project Agreement.

8. SERVICES OBLIGATIONS

8.1 WEPCo shall procure that the Partnering Services are at all times performed:

- 8.1.1 with that degree of skill and care that would reasonably be expected of a competent professional provider of the relevant Partnering Service having regard to the nature and extent of that service;
- 8.1.2 in accordance with all relevant Law and codes of practice (including Local Government Requirements where applicable);
- 8.1.3 in accordance with all Consents;
- 8.1.4 in a manner which is not likely to be injurious to health or cause damage to property;
- 8.1.5 in accordance with paragraphs 1.1.1 and 1.1.2 and all other applicable provisions of Section 1 (*Specification*) of Schedule 3 (*Partnering Services*);
- 8.1.6 in accordance with the applicable provisions of the Partnering Services Method Statements;
- 8.1.7 in so far as not in conflict with an express obligation of WEPCo under this Agreement, or where in relation to a matter there is no express obligation or standard imposed on WEPCo under this Agreement, in accordance with Good Industry Practice; and
- 8.1.8 in a manner:
 - (a) consistent with the Participants discharging their statutory duties and/or other functions undertaken by them as the same may be notified to WEPCo from time to time; and
 - (b) that recognises the Participants' (and prospective Project Agreement Counterparties') needs for flexibility of occupation of premises to be provided and/or serviced under Project Agreements, particularly with regard to:
 - (i) providing Facilities which have potential for alternative uses to those to which they are initially intended to be put;
 - (ii) meeting the future accommodation requirements of Participants and other community stakeholders in the Region by taking into account the flexibility contained in any Project Agreements existing for the time being and, in particular, the terms and conditions of such Project Agreements and the remaining duration of such Project Agreements; and
 - (iii) the manner in which New Projects are identified and brought forward under the SDP and the terms of this Agreement.

8.2 To avoid doubt, the obligations in Clause 8.1 are independent obligations. In particular compliance by WEPCo with Section 5 (*Partnering Services Method Statements*) of Schedule 3 (*Partnering*

Services) shall not be a defence to an allegation that WEPCo has not complied with any other requirement of Clause 8.1. In the event of any conflict between any provision of any of the Partnering Services Method Statements and any other requirement of this Agreement including Clause 8.1, WEPCo shall amend (at its own cost) the relevant provisions of the Partnering Services Method Statements so as to remove the conflict and provide an updated version of the same for approval by the Participants. Once the updated version has the approval of the Participants, it shall replace the relevant part of Section 5 (*Partnering Services Method Statements*) of Schedule 3 (*Partnering Services*).

8.3 Subject to Clause 28.2, and the Participants' rights under Clause 23 (*WEPCo Events of Default*) WEPCo shall be free to sub-contract the whole or any part of the provision of the Partnering Services to a Partnering Subcontractor, notwithstanding which it shall remain solely responsible to the relevant Participant(s) for the provision of the relevant Partnering Services in accordance with this Agreement.

8.4 The Parties agree that it is fundamental to the successful operation of this Agreement that WEPCo devotes sufficient resource and expertise to providing the Partnering Services in a competent and timely manner and otherwise in accordance with the standards set out in Clause 8.1 (*Service Obligations*).

9. **EXCLUSIVE NATURE OF THIS AGREEMENT**

9.1 Subject to Clauses 9.3, 9.7, 22.2, 22.6, 23.3 and 23.10, WEPCo shall have the sole and exclusive right and obligation for a period of ten (10) years from the Commencement Date to provide all of the services which comprise the Ongoing Partnering Services and the Project Development Partnering Services to each of the Participants on the terms and subject to the conditions of this Agreement and in particular subject to the Partnering Services Costs being recoverable only in accordance with Clause 10.2. In respect of the Project Development Partnering Services, such exclusivity relates only to Qualifying Projects.

9.2 Subject to Clauses 9.3, 9.6, 9.7, 22.2, 22.6, 23.3 and 23.10 and the provisions of Schedule 5 (*Approval Process for New Projects*), WEPCo shall have the sole and exclusive right for a period of ten (10) years from the Commencement Date to provide itself, or nominate its wholly owned Subsidiaries or, in the case of MIM Projects nominate a PSDP Related Party, to provide Project Services (in each case as Project Service Provider) to each of the Participants in relation to those Qualifying Projects that become Approved Projects within such ten (10) year period and each Participant shall ensure that, subject to the terms of this Agreement, they contract with WEPCo or its nominees as aforesaid under a Project Agreement for the provision of Project Services in relation to all such Qualifying Projects which become Approved Projects, in each case on the terms and subject to the conditions of this Agreement.

9.3 WEPCo shall have no right or obligation, but may be requested by any Participant, subject to the agreement of appropriate terms and conditions and subject to applicable Law prevailing at the relevant time and applicable procurement rules and guidance, to provide itself, or nominate its wholly owned Subsidiaries or, in the case of MIM Projects under Clause 9.3.5 to nominate a PSDP Related Party, to provide (in each case as Project Service Provider) to the Participants (or any of them):

9.3.1 Project Services in relation to capital projects identified by a Participant as required for the provision of Education Sector Services (where such projects have been expressly designated and Approved under a Strategic Outline Programme) and/or Community Services, in the Region;

- 9.3.2 Project Services in relation to the provision of FM Services that are not provided as part of any Qualifying Project, but are required in relation to capital projects procured under Clause 9.3.1 in the Region;
- 9.3.3 Strategic Support Partnering Services;
- 9.3.4 Ongoing Partnering Services and/or Project Development Partnering Services after the date falling ten (10) years from the Commencement Date, where the term of this Agreement has been extended beyond the Initial Expiry Date in accordance with Clause 3.2;
- 9.3.5 Project Services in respect of Qualifying Projects which become Approved Projects after the date falling ten (10) years from the Commencement Date, where the term of this Agreement has been extended beyond the Initial Expiry Date in accordance with Clause 3.2; and/or
- 9.3.6 Project Development Partnering Services in respect of potential New Projects which are not Qualifying Projects but are requested by a Participant pursuant to Clause 9.3.1 or Clause 9.3.2.

9.4 All Project Services to be provided to Participants or to any other person(s) pursuant to Clause 9.3 (excluding Clause 9.3.5 to which Clause 6.1 shall apply) shall be provided pursuant to a Project Agreement either:

- 9.4.1 substantially in the form of the relevant Template Project Agreement completed in accordance with the "IMPORTANT NOTICE" set out on such Template Project Agreement to reflect such amendments as may be required in the circumstances of that particular Project Agreement and as may be agreed between WEPCo and the Relevant Participant(s) and approved by the Welsh Government; or
- 9.4.2 in the case of Project Services for FM Services only, or a D&B Project for Community Services only, in such form as may be agreed between WEPCo and the Relevant Participant(s) and approved by the Welsh Government.

9.5 The Participants shall work together with each other and with WEPCo with the aim of ensuring that the Project Services at all of their Facilities are provided under the terms of this Agreement and the Project Agreements.

9.6 Subject to Clauses 9.3, 9.7, 22.2, 22.6, 23.3 and 23.10 and the provisions of Schedule 5 (*Approval Process for New Projects*), each of the Participants undertake to WEPCo, that they shall not enter into any transactions for the provision of Qualifying Projects in the Region in furtherance of their statutory duties or otherwise, other than pursuant to a Project Agreement entered into pursuant to this Agreement. The undertaking contained in this Clause 9.6 shall cease to be effective and binding on the expiry of ten (10) years from the Commencement Date.

9.7 The exclusivity granted pursuant to Clause 9.1 and/or Clause 9.2 may be suspended in respect of any Participant during any period where WEPCo has failed the Track Record Test by such Participant serving written notice of such suspension on WEPCo. Without prejudice to the rights of the Participants under Clauses 23.3 and 23.10, any such suspension shall expire:

- 9.7.1 following written notice to that effect being served on WEPCo by the Participant in question, copied to the SPB; or
- 9.7.2 automatically where WEPCo passes a subsequent Track Record Test or where Clause 23.12.2(b) applies.

9.8 No breach of Clause 9.1 or Clause 9.2 shall arise as a result of the provision of Partnering Services or Project Services by a third party to any Participant who serves a suspension notice in circumstances where they are entitled to do so under this Agreement, to the extent such services are instructed during such period of suspension.

9.9 Where a suspension of exclusivity by a Participant occurs (whether pursuant to Clause 9.7, Clause 23.3 or Clause 23.10) and WEPCo has commenced the New Project Approval Process for a New Project for which such Participant is a Relevant Participant but has not obtained a Stage 1 Approval or Stage 2 Approval (as the case may be), then, subject to the terms of Schedule 5 (*Approval Process for New Projects*), WEPCo shall continue to provide the Project Development Partnering Services comprised within the relevant stage(s) of the New Project Approval Process for such New Project unless and until notice is served pursuant to paragraph 7 of Schedule 5 (*Approval Process for New Projects*) by the Relevant Participant in respect of such New Project.

10. PRICE AND PAYMENT FOR THE SERVICES

Payment for Partnering Services

10.1 WEPCo shall prepare and maintain accurate records of the Partnering Services Costs (and details of the proposed New Projects in relation to which such costs are incurred, where relevant).

10.2 Save in the circumstances set out in Clause 22 (*Participant Default*) and Schedule 5 (*Approval Process for New Projects*), WEPCo shall recover its Partnering Services Costs in respect of Ongoing Partnering Services and Project Development Partnering Services as provided in Schedule 4 (*Partnering Services Costs*). As regards Strategic Support Partnering Services then, subject always to Clause 22 (*Participant Default*), these shall be provided by WEPCo and paid for by the relevant Participant(s) (within 30 days of valid invoice therefor) at rates and prices quoted by WEPCo and accepted by the relevant Participant(s) in advance. These rates and prices should be in accordance with Section 4 (*Partnering Services Costs Rates*) of Schedule 3 (*Partnering Services*) as updated from time to time in accordance with this Agreement, subject to whatever adjustments as may be agreed between WEPCo and the relevant Participant(s) in each case.

10.3 All payments under this Agreement shall be made in pounds sterling by electronic transfer of funds for value on the day in question to the bank account of the recipient (located in the United Kingdom) specified in the relevant invoice, quoting the invoice number against which payment is made. Subject to Section 3 (*Payment and Interest*) of Schedule 14 (*Compensation on Participant Event of Default and Termination*), all valid invoices shall be payable within 30 days of receipt.

10.4 If any Party (acting in good faith) disputes all or any part of any sum payable hereunder, the undisputed amount shall be paid by the relevant Party in accordance with Clause 10.3 and the provisions of the Dispute Resolution Procedure shall apply in respect of the disputed part. Following resolution of the dispute, any amount agreed or determined to have been payable shall be paid forthwith by the relevant

Party to the recipient, together with interest on such amount calculated in accordance with Clause 10.5 (*Late Payment*).

Late Payment

10.5 Each Party shall be entitled, without prejudice to any other right or remedy, to receive interest on any payment not made on its due date, calculated from day to day at a rate per annum equal to the Default Interest Rate from the day after the date on which payment was due up to and including the date of payment.

Set-Off

10.6 Whenever any sum of money shall be agreed, or determined, as due and payable by WEPCo to a Participant, such sum may at that Participant's discretion be deducted from or applied to reduce the amount of any sum then due to WEPCo from the Participant under this Agreement or which, prior to payment of such sum by WEPCo may so become due, provided that Participant has given WEPCo not less than five (5) Business Days written notice of its intention to deduct or apply such sum.

10.7 Whenever any sum of money shall be agreed, or determined as due and payable by a Participant to WEPCo, such sum may at WEPCo's discretion be deducted from or applied to reduce the amount of any sum then due from WEPCo to that Participant under this Agreement or which, prior to payment of such sum by the Participant, may so become due, provided that WEPCo has given that Participant not less than five (5) Business Days written notice of its intention to deduct or apply such sum.

VAT

10.8 All amounts stated to be payable by any party under this Agreement shall be exclusive of any VAT properly chargeable on any amount.

10.9 Each party shall pay to the relevant other party any VAT properly chargeable on any supply made to it under this Agreement provided that it shall first have received from the other party a valid tax invoice in respect of that supply which complies with the requirements of Part III VAT Regulations 1995.

10.10 If any Party (the "**First Party**") considers that any VAT which another Party (the "**Second Party**") claims to be properly chargeable to the First Party in connection with this Agreement is not in fact properly so chargeable, the First Party shall be entitled to require the Second Party to obtain a clearance from HM Revenue and Customs (or, if relevant, such other body as is charged at the time with the collection and management of VAT) as to the VAT (if any) properly so chargeable. The Second Party shall forthwith request HM Revenue and Customs for such a clearance.

10.11 The following further provisions shall apply in respect of the applications for a clearance in accordance with Clause 10.10:

10.11.1 prior to submitting its request for such clearance and any further communication to HM Revenue and Customs in connection with the obtaining of the clearance, the Second Party shall first obtain the agreement of the First Party to the contents of such request and any such further communication, such agreement not to be unreasonably withheld or delayed;

10.11.2 the Second Party shall provide to the First Party copies of all communications received from HM Revenue and Customs in connection with the application for clearance as soon as practicable after receipt; and

10.11.3 the Second Party shall use all reasonable endeavours (including without limitation the provision of such additional information as HM Revenue and Customs may require) to obtain such clearance as soon as reasonably practicable following the initial request.

10.12 If clearance is required by the First Party under Clause 10.10, the First Party shall not be obliged to pay the VAT so claimed by the Second Party unless and until clearance is received from HM Revenue and Customs which states that a sum of VAT (the "**VAT Sum**") is properly so chargeable or HM Revenue and Customs state that they are not prepared to give clearance on the matter. In this case, then subject to Clauses 10.13 and 10.14 and provided that the First Party shall first have received a valid tax invoice which complies with the requirements of Part III VAT Regulations 1995 and which states the VAT Sum to be the amount of VAT chargeable to the First Party, the First Party shall pay the VAT Sum (and any interest or penalties attributable to the VAT Sum) to the Second Party.

10.13 If the First Party disagrees with any clearance obtained pursuant to Clause 10.10 by the Second Party from HM Revenue and Customs, then the Second Party (provided that it is indemnified to its reasonable satisfaction against all costs and expenses including interest and penalties which it may incur in relation thereto) shall take such action and give such information and assistance to the First Party as the First Party may require to challenge such clearance or otherwise to resist or avoid the imposition of VAT on the relevant supply.

10.14 The following further provisions shall apply if the First Party shall exercise its rights under Clause 10.13:

10.14.1 the action which that First Party shall be entitled to require the Second Party to take shall include (without limitation) contesting any assessment to VAT or other relevant determination of HM Revenue and Customs before any VAT tribunal or court of competent jurisdiction and appealing any judgement or decision of any such tribunal or court;

10.14.2 if the Second Party shall be required to pay to or deposit with HM Revenue and Customs a sum equal to the VAT assessed as a condition precedent to its pursuing any appeal, the First Party shall, at its election, either pay such sum to HM Revenue and Customs on behalf of the Second Party or on receipt of proof in a form reasonably satisfactory to the First Party that the Second Party has paid such sum to or deposited such sum with HM Revenue and Customs the First Party shall pay such sum to the Second Party;

10.14.3 save as specifically provided in Clause 10.12, the First Party shall not be obliged to pay to the Second Party any sum in respect of the VAT in dispute to the Second Party or in respect of VAT on any further supplies made by the Second Party to the First Party which are the same type and raise the same issues as the supplies which are the subject of the relevant dispute unless and until the final outcome of the relevant dispute is that it is either determined or agreed that VAT is properly chargeable on the relevant supply or supplies; and

10.14.4 the Second Party shall account to the First Party for any costs awarded to the Second Party on any appeal, for any sum paid to or deposited with HM Revenue and Customs in accordance with Clause 10.14.2 which is repayable to the Second Party and for any interest to which the Second Party is entitled in respect of such sums.

11. **NOT USED**

12. **PARTIES' REPRESENTATIVES**

Representatives of the Participants

12.1 The respective Participants' Representatives shall be

[insert name of each Participant's Representative and Participant in respect of which they are to act]

or such other persons appointed by each Participant from time to time pursuant to this clause. Each Participant's Representative shall exercise the functions and powers of that Participant in relation to the operation of this Agreement and the WEPCo Operations which are identified in this Agreement as functions or powers to be carried out by the Participant's Representative. Each Participant's Representative shall also exercise such other functions and powers of that Participant under this Agreement as that Participant may notify to WEPCo in writing from time to time. Each Participant's Representative shall represent that Participant only and shall have no power to delay anything in relation to or exercise the functions or powers of any other Participant.

12.2 Each Participant's Representative shall be entitled at any time, by written notice to WEPCo, to authorise any other person to exercise the functions and powers of that Participant delegated to him pursuant to this clause as set out in such notice, either generally or specifically. Any act of any such person shall, for the purposes of this Agreement, constitute an act of that Participant's Representative and all references to the Participant's Representative in this Agreement (apart from this Clause 12.2) shall be taken as references to such person so far as they concern matters within the scope of such person's authority (as so notified in writing to WEPCo).

12.3 Each Participant may by written notice to WEPCo and the other Participants change the identity of their Participant's Representative. Each Participant shall (as far as practicable) consult with WEPCo and the other Participants prior to the appointment of any replacement for its Participant's Representative, taking account of the need for liaison and continuity in respect of this Agreement. Such change shall have effect on the date specified in the written notice (which date shall, other than in the case of emergency, be such date as will not cause material inconvenience to WEPCo in the execution of its obligations under this Agreement).

12.4 During any period when no Participant's Representative has been appointed in relation to one or more Participants (or when a Participant's Representative is unable through illness, incapacity or any other reason whatsoever to carry out or exercise his functions under this Agreement) the affected Participant shall carry out the functions which would otherwise be performed by that Participant's Representative.

12.5 No act or omission of a Participant's Representative or any officer, employee or other person engaged by a Participant shall, except as otherwise expressly provided in this Agreement:

12.5.1 in any way relieve or absolve WEPCo from, modify, or act as a waiver of any claim in respect of, any liability, responsibility, obligation or duty of WEPCo arising out of this Agreement; or

12.5.2 in the absence of an express order or authorisation under this Agreement constitute or authorise a variation hereto.

12.6 Except as previously notified in writing before such act by a Participant to WEPCo, WEPCo and WEPCo's Representative shall be entitled to treat any act of that Participant's Representative which is authorised by this Agreement as being expressly authorised by that Participant and WEPCo and WEPCo's Representative shall not be required to determine whether an express authority has in fact been given.

Representative of WEPCo

12.7 WEPCo's Representative shall be [*Insert the name of the WEPCo representative*] or such other person appointed from time to time pursuant to this clause. WEPCo's Representative shall have full authority to act on behalf of WEPCo for all purposes of this Agreement. Except as previously notified in writing before such act by WEPCo to the Participants, the Participants and the Participants' Representatives shall be entitled to treat any act of WEPCo's Representative in connection with this Agreement as being expressly authorised by WEPCo and the Participants' Representatives shall not be required to determine whether any express authority has in fact been given.

12.8 WEPCo may, by written notice to the Participants, change WEPCo's Representative. Where WEPCo wishes to do so it shall by written notice to the Participants' Representatives propose a replacement for approval, taking account of the need for liaison and continuity in respect of this Agreement. Such appointment shall be subject to the approval of the Participants (not to be unreasonably withheld or delayed).

13. VALUE FOR MONEY

13.1 The procedure by which WEPCo shall produce evidence as to whether or not its proposals in respect of a New Project which is a Qualifying Project deliver value for money is as set out in Schedule 5 (*Approval Process for New Projects*), Schedule 6 (*New Project Pricing Report*) and the relevant provisions of Section 5B (*Partnering Services Method Statements - Project Development Partnering Services*) of Schedule 3 (*Partnering Services*).

13.2 WEPCo shall ensure that the procedures implemented pursuant to this Agreement in order to demonstrate value for money and continuous improvement in value for money will be carried out at all times openly, fairly and with full transparency and in a manner such that the Participants are able to check compliance with the requirements in this Clause 13 (*Value for money*).

13.3 Throughout the course of this Agreement and of all Projects carried out pursuant to or arising out of this Agreement, WEPCo shall monitor and record in writing the predicted capital and, where applicable, whole life cost to the Project Agreement Counterparty for each Project and any increases or reductions in such estimated cost from time to time together with the reasons for all such increases or reductions.

- 13.4 WEPCo shall also record the final cost for:
- 13.4.1 the design and construction of each Project; and
 - 13.4.2 as the information becomes available over time, the actual cost of maintaining and repairing each Project throughout the duration of the relevant Project Agreement,
- in either case where such design and construction and/or maintenance and repair is the responsibility of the Project Service Provider under the relevant Project Agreement.

13.5 WEPCo will benchmark the costs referred to in Clause 13.4 in respect of each individual Project against such costs for all Projects. WEPCo will also break down such costs into comparable units of costs for different components of such Projects as agreed with, or as reasonably requested by, the Participants, so that a comparison can be made between the costs of similar projects and similar components from similar and different projects under the WEP Strategic Partnering Delivery Model.

13.6 Without prejudice to Section 3 (*Performance Measurement*) of Schedule 3 (*Partnering Services*), by *inter alia* benchmarking costs in accordance with Clause 13.5, and disregarding any effects of inflation, WEPCo will be expected to be able to demonstrate in the WEPCo Performance Report and at the Annual Reviews (and at such other times as may be reasonably requested by the Participants) lower costs and/or greater value for money to the Participants in the delivery of Projects in accordance with this Agreement over the term of this Agreement.

13.7 In relation to any proposed changes under any Project Agreement (whether the proposed change is as a result of change in law, a change requested by the Project Agreement Counterparty or otherwise) or any other matter affecting the relevant Project which may have an equivalent effect on other Projects, WEPCo shall work with the relevant Project Service Providers to achieve the best value solution for the Participants and Project Agreement Counterparties across the relevant Projects in respect of such proposed changes or other matter.

14. **MANAGEMENT OF WEPKO'S PERFORMANCE**

14.1 A strategic partnering board ("**SPB**") will be established by the Parties comprising:

- 14.1.1 one representative from each of the Participants from time to time who shall, in each case, be that Participant's Representative or any other person authorised by that Participant's Representative¹;
- 14.1.2 one representative of WEPCo, nominated by the board of directors of WEPCo;
- 14.1.3 one additional representative of Welsh Government (at Welsh Government's discretion), as notified from time to time in writing to the Chairman; and
- 14.1.4 such other reasonable number of representatives of stakeholders interested in or affected by Education Sector Services and/or Community Services and any other co-opted person as the Participants may from time to time agree (having first consulted with WEPCo) ("**Stakeholder Representatives**"). The Participants shall ensure that the

¹ It is anticipated the Representatives on the SPB will be senior representatives.

Stakeholder Representatives are bound by the same obligations of confidentiality to WEPCo and to the Participants as if they were a party to this Agreement.

Neither the WEPCo representative, nor the Stakeholder Representatives shall be entitled to vote in meetings of the SPB.

14.2 The SPB shall meet regularly (and at least every three (3) months) to provide strategic input into how the partnering established by this Agreement is operating and to review:

14.2.1 financial; and

14.2.2 operating (including performance),

issues and to give guidance on and approve the order in which New Projects should be progressed, and to give guidance on by whom and on what basis such New Projects should be progressed.

14.3 The SPB will serve as a forum for the open exchange of ideas and enable the Participants to discuss their forthcoming accommodation and service delivery requirements to ensure an integrated co-ordinated approach to fulfilling such requirements. The SPB also has a number of rights and obligations as expressly set out in this Agreement.

14.4 The SPB shall be required to approve the SDP put forward annually in accordance with Section 2 (*Updated SDP*) of Schedule 11 (*Strategic Delivery Plan*) and shall ensure that WEPCo's proposals for New Projects are consistent with delivery of the latest SDP.

14.5 Decisions of the SPB will be taken by the majority vote. In the event of deadlock, no one has a casting vote unless expressly set out in this Agreement. Decisions of the SPB which Affect any Participant will bind that Participant only where that Participant's Representative on the SPB has voted in favour of the decision on that Participant's behalf.

14.6 A chair of the SPB ("**Chairman**") shall be appointed in accordance with this Clause 14.6.

14.6.1 The Chairman will be appointed on an annual basis from amongst the Participants' Representatives.

14.6.2 Save where agreed to the contrary by the Participants, it is intended that the post of Chairman shall rotate annually amongst the Participants' Representatives in turn.

14.6.3 The first Participant's Representative to hold the post of Chairman (from the Commencement Date until the first anniversary thereof) shall be the Participant's Representative appointed by [*insert first Chairman appointing Participant*]. The order of rotation thereafter shall be as agreed between the Participants.

14.6.4 The Chairman will be non-voting in his capacity as Chairman.

14.7 SPB meetings will take place at such places and (subject to Clause 14.2) times as the Parties shall decide. Agendas will be circulated on behalf of the Chairman five (5) Business Days in advance (with supporting papers) and any Party wishing to raise other agenda items (including an item under "Any other

business") will notify all other Parties (with supporting papers) in writing no later than three (3) Business Days in advance.

14.8 A quorum for the proper and valid conduct of any business of the SPB shall be [five (5)] Participants' Representatives (one of whom must be a representative from Welsh Government) and the WEPCo Representative, in each case appointed pursuant to Clause 14.1.

14.9 If a quorum is not present at any meeting of the SPB within 30 minutes of that meeting's start time, it shall be adjourned to the same time and place on the date which is five (5) Business Days later. The quorum for any adjourned meeting shall be one (1) Participant's Representative (who must be a representative from Welsh Government) and the WEPCo Representative.

14.10 The Participants shall arrange for a person to take minutes of all SPB meetings and circulate the same to all representatives appointed at such time pursuant to Clause 14.1 and the Chairman (whether or not the same were in attendance of the meeting) within five (5) Business Days after the relevant meeting.

14.11 Each of the Parties shall use all its reasonable endeavours to ensure their regular attendance at all meetings of the SPB and each Participant will, unless unavoidable, ensure that its representative on the SPB is appropriately empowered to agree matters on its behalf.

14.12 Each Participant shall use all its reasonable endeavours to ensure that its representative on the SPB conducts himself in accordance with the partnering principles contained in Clause 2.3 and in a manner intended to ensure (insofar as each Participant is able) that the SPB complies with its obligations and carries out its functions in a timely manner.

14.13 A telephone conference call or video conference or a combination of the same, at which all participants are able to speak to and hear each of the other participants and at which for all times at that meeting a quorum of the SPB is able to so participate, shall be valid as a meeting of the SPB.

Managing WEPCo performance

14.14 The SPB will act as the primary mechanism for managing WEPCo's performance.

14.15 WEPCo shall regularly monitor and report to the SPB on the performance of WEPCo (and its Partnering Subcontractors) under this Agreement and of the Project Service Providers and the Supply Chain Members under Project Agreements.

14.16 WEPCo shall, within twenty (20) Business Days of each Review Date, complete and issue to the SPB the WEPCo Performance Report. The WEPCo Performance Report shall include a review of each of the Key Performance Indicators, detailing, in each case, whether or not the relevant Key Performance Indicator has been met together with a summary of the data and scoring supporting each of the Key Performance Indicators (which data and scoring shall be as up to date as reasonably practicable as at the Review Date and in any event shall be up to date as at the date thirty (30) Business Days prior to the Review Date). If any change is made to the WEPCo Performance Report pursuant to the procedure in Clause 14.18, then references to the WEPCo Performance Report shall be read as references to the WEPCo Performance Report as updated or amended by agreement with WEPCo or as a result of agreement or determination pursuant to the Dispute Resolution Procedure.

14.17 The Participants and WEPCo shall meet annually following each Review Date to consider whether the Key Performance Indicators remain the most appropriate measure of WEPCo's performance of the

Services, having regard in particular to the principle that a continuous improvement in WEPCo's performance should be incentivised through the Key Performance Indicators and the requirement to comply with prevailing Law and applicable governmental policy, and shall act reasonably in seeking to agree any amendment to the Key Performance Indicators and consequential changes to the Partnering Services Method Statements.

14.18 In each year, as soon as reasonably practicable after receipt of the WEPCo Performance Report and in any event not later than one (1) month thereafter (or failing receipt of the WEPCo Performance Report, within two (2) months after the Review Date in that year), the SPB will hold a formal annual review (the "**Annual Review**") of the operation of this Agreement and WEPCo's performance in the context of the targets and objectives in the SDP and the Key Performance Indicators. The requirements in relation to the content and conduct of the review will be agreed from time to time by the Parties. As part of this review, the SPB (excluding for such purposes WEPCo's representative) will review WEPCo's progress against the partnership objectives in this Agreement and the WEPCo Performance Report and the SPB (excluding for such purposes WEPCo's representative) and WEPCo shall seek to agree, in good faith, any key findings from such review together with the implications thereof in relation to the WEPCo's future activities. The Participants and/or the SPB shall be entitled to require information and/or clarification from WEPCo in relation to the WEPCo Performance Report including as to whether or not the Track Record Test has been passed and, to the extent relevant, any Significant Performance Failure has occurred. Any dispute in relation to the WEPCo Performance Report (including whether or not the Track Record Test has been passed in accordance with the methodology set out at Table 5 of the Appendix to Section 3 (*Performance Measurement*) of Schedule 3 (*Partnering Services*) and, to the extent relevant, any Significant Performance Failure has occurred²) shall be resolved by reference to the Dispute Resolution Procedure.

15. INFORMATION

15.1 WEPCo shall not in any way be relieved from any obligation under this Agreement nor shall it be entitled to claim against the Participant on grounds that any information, whether obtained from the Participant or otherwise (including information made available by the Participant) is incorrect or insufficient and shall make its own enquiries as to the accuracy and adequacy of that information.

15.2 Save to the extent expressly provided in a Project Agreement:

15.2.1 none of the Participants nor any of their respective agents, servants or advisers shall be liable to WEPCo (whether in contract, tort or otherwise and whether or not arising out of any negligence on the part of the Participants or any of their respective agents, servants or advisers) in respect of any inadequacy of any kind whatsoever in Works and Facilities Information;

15.2.2 no Participant shall be deemed to have given any warranty or undertaking that Works and Facilities Information represents all of the information in its possession or power relevant or material to any New Project; and

² WG will wish to explore with Bidders during dialogue the extent to which other Significant Performance Failures can arise at other points in time.

- 15.2.3 none of the Participants nor any of their respective agents, servants or advisers shall be liable to WEPCo, any Project Service Provider or any Supply Chain Member in respect of any failure (whether before or after execution of the relevant Project Agreement) to:
- (a) disclose or make available to WEPCo, a Project Service Provider or any Supply Chain Member any information, documents or data; or
 - (b) keep Works and Facilities Information up to date; or
 - (c) inform WEPCo, any Project Service Provider or any Supply Chain Member of any inaccuracy, error, omission, unfitness for purpose, defects or inadequacy in Works and Facilities Information.

15.3 WEPCo acknowledges and confirms, for itself, the Project Service Providers and Supply Chain Members that:

- 15.3.1 before execution of each Project Agreement, they shall have conducted their own analysis and review of the relevant Works and Facilities Information and as such shall be deemed to have satisfied themselves as to the accuracy, completeness and fitness for purpose of all such Works and Facilities Information upon which they place reliance; and
- 15.3.2 save to the extent expressly provided in a Project Agreement, they shall not be entitled to make any claim against any of the Participants or any of their respective agents, servants or advisers, whether in damages or for extensions of time or additional payments under the Project Agreement, on the grounds of any misunderstanding or misapprehension in respect of the relevant Works and Facilities Information or on the grounds that incorrect or insufficient information relating thereto or to any Site was given to it by any person whether or not in the employ of the Participants, nor shall they be relieved from any risks or obligations imposed on or undertaken by them under the Project Agreements on any such ground.

16. **INDEMNITIES**

WEPCo indemnities to Participants

16.1 WEPCo shall indemnify and keep each of the Participants indemnified at all times from and against all Direct Losses sustained by such Participant in consequence of:

- 16.1.1 any claim for, or in respect of, the death and/or personal injury of any employee of, or person engaged by, WEPCo or any WEPCo Party notwithstanding any act or omission of the Participants or any Participant Party;
- 16.1.2 any claim for, or in respect of, the death and/or personal injury of any third party (other than a person referred to in Clause 16.1.1 or Clause 16.2.1) arising out of, or in the course of, the WEPCo Operations, save to the extent caused (or contributed to) by any negligent act or omission by that Participant (or a Participant Party relating to that Participant) in respect of the performance or non-performance of the Participant's obligations hereunder or breach of any express provision of this Agreement by that Participant (or relevant Participant Party);

- 16.1.3 any physical loss of or damage to the Participant's assets arising by reason of any act or omission of WEPCo or any WEPCo Party, save to the extent that such loss or damage arises out of any negligent act or omission by that Participant (or a Participant Party relating to that Participant) relating to the performance or non-performance of the Participant's obligations hereunder or breach of any express provision of this Agreement by that Participant (or relevant Participant Party); and
- 16.1.4 any loss of or damage to property or assets of any third party arising by reason of any act or omission of WEPCo or any WEPCo Party, save to the extent that such loss or damage arises out of any negligent act or omission by that Participant (or a Participant Party relating to that Participant) relating to the performance or non-performance of the Participant's obligations hereunder or breach of any express provision of this Agreement by that Participant (or relevant Participant Party),

PROVIDED THAT in the case of Clauses 16.1.3 and 16.1.4 to the extent the loss or damage referred to has been caused by a negligent act or omission of the Participant or relevant Participant Party then the Participant shall be responsible for the deductibles under any policy of insurance required under this Agreement and any amount over the maximum amount required to be insured under such insurance policy.

Participants' indemnities to WEPCo

16.2 Each Participant shall indemnify and keep WEPCo indemnified at all times from and against all Direct Losses sustained by WEPCo in the course of or arising out of the conduct of the WEPCo Operations as a consequence of:

- (a) any negligent act or omission by that Participant (or a Participant Party relating to that Participant) relating to the performance or non-performance of the Participant's obligations hereunder; or
- (b) breach of any express provision of this Agreement by that Participant (or relevant Participant Party),

which results in:

- 16.2.1 any claim for, or in respect of, the death and/or personal injury of any employee of, or person engaged by, that Participant or a Participant Party relating to that Participant notwithstanding any act or omission of WEPCo or any WEPCo Party;
- 16.2.2 any claim for, or in respect of, the death and/or personal injury of any third party (other than a person referred to in Clause 16.1.1 or Clause 16.2.1), save to the extent caused (or contributed to) by any act or omission of WEPCo or any WEPCo Party;
- 16.2.3 any physical damage to any part of the Facilities or any assets or other property of WEPCo or any WEPCo Party, save to the extent caused (or contributed to) by any act or omission of WEPCo or any WEPCo Party; or
- 16.2.4 any loss of or damage to property or assets of any third party, save to the extent caused (or contributed to) by any act or omission of WEPCo or any WEPCo Party,

PROVIDED THAT, in the case of Clauses 16.2.3 and 16.2.4:

- (a) there shall be excluded from the indemnity given by the each of Participants any liability for the occurrence of risks against which WEPCo is bound to insure under this Agreement or which any Project Service Provider is required to insure under a Project Agreement; and
- (b) where and to the extent the loss or damage referred to has been caused by a negligent act or omission by a Participant (or a Participant Party relating to that Participant) relating to the performance or non-performance of the Participant's obligations hereunder or by any breach of any express provision of this Agreement by a Participant (or relevant Participant Party) then that Participant shall be responsible for the deductible under any policy of insurance required under this Agreement and any amount over the maximum amount required to be insured under such insurance policy.

Conduct of claims

16.3 This sub-clause shall apply to the conduct by a party from whom an indemnity is sought under this Agreement, of claims made by a third person against a party having (or claiming to have) the benefit of the indemnity. The party having, or claiming to have, the benefit of the indemnity is referred to as the "**Beneficiary**" and the party giving the indemnity is referred to as the "**Indemnifier**". Accordingly:

- 16.3.1 if the Beneficiary receives any notice, demand, letter or other document concerning any claim for which it appears that the Beneficiary is, or may become, entitled to indemnification under this Agreement, the Beneficiary shall give notice in writing to the Indemnifier as soon as reasonably practicable and in any event within twenty (20) Business Days of receipt of the same;
- 16.3.2 subject to Clauses 16.3.3, 16.3.4 and 16.3.5 below, on the giving of a notice by the Beneficiary pursuant to Clause 16.3.1 above, where it appears that the Beneficiary is or may be entitled to indemnification from the Indemnifier in respect of all (but not part only) of the liability arising out of the claim, the Indemnifier shall (subject to providing the Beneficiary with a secured indemnity to its reasonable satisfaction against all costs and expenses that it may incur by reason of such action) be entitled to dispute the claim in the name of the Beneficiary at the Indemnifier's own expense and take conduct of any defence, dispute, compromise, or appeal of the claim and of any incidental negotiations. The Beneficiary shall give the Indemnifier all reasonable co-operation, access and assistance for the purposes of considering and resisting such claim;
- 16.3.3 with respect to any claim conducted by the Indemnifier pursuant to Clause 16.3.2 above:
 - (a) the Indemnifier shall keep the Beneficiary fully informed and consult with it about material elements of the conduct of the claim;
 - (b) the Indemnifier shall not bring the name of the Beneficiary into disrepute; and
 - (c) the Indemnifier shall not pay or settle such claims without the prior consent of the Beneficiary, such consent not to be unreasonably withheld or delayed;

- 16.3.4 the Beneficiary shall be free to pay or settle any claim on such terms as it thinks fit and without prejudice to its rights and remedies under this Agreement if:
- (a) the Indemnifier is not entitled to take conduct of the claim in accordance with Clause 16.3.2 above; or
 - (b) the Indemnifier fails to notify the Beneficiary in writing of its intention to take conduct of the relevant claim within twenty (20) Business Days of the notice from the Beneficiary under Clause 16.3.1 above or notifies the Beneficiary in writing that it does not intend to take conduct of the claim; or
 - (c) the Indemnifier fails to comply in any material respect with the provisions of Clause 16.3.3 above;
- 16.3.5 the Beneficiary shall be free at any time to give notice in writing to the Indemnifier that it is retaining or taking over (as the case may be) the conduct of any defence, dispute, compromise or appeal of any claim (or of any incidental negotiations) to which Clause 16.3.2 applies. On receipt of such notice the Indemnifier shall promptly take all steps necessary to transfer the conduct of such claim to the Beneficiary, and shall provide to the Beneficiary all reasonable cooperation, access and assistance for the purposes of considering and resisting such claim. If the Beneficiary gives any notice in writing pursuant to this paragraph, then the Indemnifier shall be released from any liability under its indemnity under Clause 16.1 or Clause 16.2 (as the case may be) and, without prejudice to any accrued liabilities, any liability under its indemnity given pursuant to Clause 16.3.2 in respect of such claim;
- 16.3.6 if the Indemnifier pays to the Beneficiary an amount in respect of an indemnity and the Beneficiary subsequently recovers (whether by payment, discount, credit, saving, relief or other benefit or otherwise) a sum which is directly referable to the fact, matter, event or circumstances giving rise to the claim under the indemnity, the Beneficiary shall forthwith repay to the Indemnifier whichever is the lesser of:
- (a) an amount equal to the sum recovered (or the value of the saving or benefit obtained) less any out of pocket costs and expenses properly incurred by the Beneficiary in recovering the same; and
 - (b) the amount paid to the Beneficiary by the Indemnifier in respect of the claim under the relevant indemnity,
- PROVIDED THAT** there shall be no obligation on the Beneficiary to pursue such recovery and the Indemnifier shall be repaid only to the extent that the amount of such recovery aggregated with any sum recovered from the Indemnifier exceeds any loss sustained by the Beneficiary (including for this purpose indirect or consequential losses or claims for loss of profits which are excluded by this Agreement from being recovered from the Indemnifier); and
- 16.3.7 any person taking any of the steps contemplated by Clauses 16.3.1 to 16.3.5 (inclusive) shall comply with the requirements of any insurer who may have an obligation to provide an indemnity in respect of any liability arising under this Agreement.

Mitigation - indemnity claims

- 16.4 To avoid doubt the provisions of Clause 49 (*Mitigation*) apply to any indemnity given under this Agreement and any such indemnity shall not extend to Direct Losses which could have been reduced or avoided by the Beneficiary complying with the provisions of such clause.

Taxation

- 16.5 If any payment by one party under an indemnity in this Agreement is subject to income tax or corporation tax (or any tax replacing them) in the hands of the recipient, the recipient may demand in writing to the party making the payment that the payment shall be increased by such amount (the "**Additional Amount**") as would ensure that, after taking into account any such tax payable in respect of the Additional Amount and any credit or saving that may arise as a result of paying the Additional Amount, the recipient receives and retains a net sum equal to the amount it would have otherwise received had the payment not been subject to such tax, with the result that it is left in no better or worse tax position. The party making the payment shall pay the Additional Amount within ten (10) Business Days of receipt of such demand.

Limitations

- 16.6 The indemnities under this Agreement shall not apply and there shall be no right to claim damages for breach of this Agreement, in tort (including negligence), restitution or on any other basis whatsoever to the extent that any loss claimed by either party is for Indirect Losses suffered or allegedly suffered by any party.
- 16.7 Subject to the provisions relating to Participants' negligence in Clauses 16.1 and 16.2 no Participant shall be liable in tort, (including negligence), restitution to WEPCo or any WEPCo Party in respect of any negligent act or omission of the Participants or any Participant Party relating to or in connection with this Agreement and WEPCo shall procure that no WEPCo Party shall bring such a claim against the Participants. WEPCo has accepted this on the basis that it and each WEPCo Party will cover the risk of negligent acts or omissions by insurance or in such other manner as it (or they) may think fit.

17. INSURANCE

The Insurances

- 17.1 WEPCo shall procure at its own cost that the insurances, details of which are set out in Schedule 9 (*Insurances*), are taken out and are maintained for the term of this Agreement provided that WEPCo shall not be required to maintain such of those insurances as are unavailable within the worldwide insurance market with reputable insurers of good standing (provided always such unavailability is not caused by the actions of WEPCo) or which are offered on terms such that the risk is not generally being insured against in the worldwide insurance market.
- 17.2 Without prejudice to the other provisions of this clause, WEPCo shall, at all relevant times, at its own cost, effect and maintain in full force those insurances which it is required to effect by any applicable Law.

17.3 All Insurances shall:

17.3.1 be placed with insurers who are:

- (a) insurers of good financial standing;
- (b) appropriately regulated;
- (c) of good repute in the international insurance market; and
- (d) acceptable to the Participants (such acceptance not to be unreasonably withheld or delayed, taking into account Clause 17.3.1(a) to (c) above); and

17.3.2 comply with the relevant provisions of Schedule 9 (*Insurances*).

Subrogation and vitiation

17.4 WEPCo shall procure that all policies of insurance referred to in paragraphs 3 and 4 of Schedule 9 (*Insurance*) to be effected by it pursuant to this Clause 17 (*Insurance*) shall contain a provision to the effect that the insurers have agreed to waive all rights of subrogation against each of the Participants (and all Participant Parties) save to the extent that a Participant has vitiated the policy by a deliberate act or omission.

17.5 Where WEPCo is obliged to effect insurance (other than those insurances referred to in paragraph 3 of Schedule 9 (*Insurances*)) under this Clause 17, not bring any claim or action against any of the Participants (or any Participant Party) in respect of any loss or damage in circumstances where WEPCo could recover such loss or damage under such insurance (whether or not such insurance has in fact been effected or, if effected, has been vitiated as a result of any act or omission of WEPCo (or any WEPCo Party), including but not limited to non-disclosure or under-insurance).

17.6 WEPCo shall ensure that the public and products liability policy shall contain an indemnity to principals clause under which the Participants shall be indemnified in respect of claims made against the Participants in respect of death or bodily injury or third party property damage arising out of or in connection with the Partnering Services and for which WEPCo is legally liable.

17.7 WEPCo shall not take any action or fail to take any reasonable action or (in so far as it is reasonably within its power) permit or allow others to take or fail to take any action (including failure to disclose any fact) as a result of which any of the Insurances may be rendered void, voidable, unenforceable or suspended or impaired in whole or in part or which may otherwise render any sum paid out under any relevant policy repayable in whole or in part.

Evidence of the Insurances

17.8 WEPCo shall, as soon as it is available, supply the Participants with written evidence that the Insurances are in force on or before the effective date or date of renewal of every policy of Insurance (or such other evidence of insurances as may be reasonably required).

17.9 Receipt of such evidence by the Participants shall not in itself constitute acceptance by the Participants or relieve WEPCo of any of its liabilities or obligations under this Agreement.

Acceptance and compliance

- 17.10 Neither failure to comply nor full compliance with the insurance provisions of this Agreement shall relieve WEPCo of its liabilities and obligations under this Agreement.

Uninsurable risks under Project Agreements

- 17.11 Without prejudice to the rights of a Project Agreement Counterparty under its Project Agreement, where a Project Service Provider for a MIM Project has notified a Project Agreement Counterparty of a risk becoming an Uninsurable Risk pursuant to the provisions of the relevant Project Agreement, the Participants and WEPCo shall co-operate so as to ensure that a meeting of the SPB is held as soon as is reasonably practicable (and in any event within seven (7) Business Days of receipt by the Project Agreement Counterparty of such notice). At that meeting the SPB shall consider the situation and the parties will work together to use all their respective reasonable endeavours to obtain an agreed position from the SPB in relation to the risk becoming an Uninsurable Risk within twenty (20) Business Days of the Project Service Provider notifying the Project Agreement Counterparty as described above.

18. INTELLECTUAL PROPERTY RIGHTS

Partnering Services Data

- 18.1 WEPCo shall make available to each Participant free of charge (and hereby irrevocably licenses each Participant to use) all rights it may have to use the Partnering Services Data that might reasonably be required by that Participant and WEPCo shall ensure that it obtains all necessary licences, permissions and consents to ensure that it can make such rights it may have to use the Partnering Services Data available to each Participant on these terms, for the Approved Purposes and in this clause "**use**" shall include the acts of copying, modifying, adapting and translating the material in question and/or incorporating them with other materials and the term "**the right to use**" shall be construed accordingly.

Maintenance of data³

- 18.2 To the extent that any of the data, materials and documents referred to in this Clause 18 (*Intellectual Property Rights*) are generated by or maintained on a computer or similar system, WEPCo shall:

- 18.2.1 use all reasonable endeavours to procure for the benefit of each Participant, at no charge or at the lowest reasonable fee, the grant of a licence or sub-licence for any relevant software to enable each Participant or its nominee to access and otherwise use (subject to the payment by the relevant Participant of the relevant fee, if any) such data for the Approved Purposes. As an alternative, WEPCo may provide such data, materials or documents in a format which may be read by software generally available in the market at the relevant time or in hard copy format; and
- 18.2.2 enter into the NCC's then current multi-licence escrow deposit agreement or standard single licence escrow deposit agreement as appropriate in each case.

³ If any party is to be given access to any of the other party's computer systems, as a matter of good practice and also to clarify potential liability for unauthorised access to those systems under the Computer Misuse Act 1990, the scope of each party's authorisation to access each other's computer systems will need to be defined clearly. The terms of such authorisation will be project specific.

18.3 WEPCo shall ensure the back-up and storage in safe custody of the data, materials and documents referred to in Clause 18.2 in accordance with Good Industry Practice. Without prejudice to this obligation, WEPCo shall submit to the Participants for approval its proposals for the back-up and storage in safe custody of such data, materials and documents and any Participant shall be entitled to object if the same is not in accordance with Good Industry Practice. WEPCo shall comply, and shall cause all WEPCo Parties to comply, with all procedures to which the Participants have given their approval. WEPCo may vary its procedures for such back-up and storage subject to submitting its proposals for change to the Participants, who shall be entitled to object on the basis set out above.

Intellectual Property Rights

18.4 WEPCo:

18.4.1 hereby grants to each Participant, free of charge, an irrevocable, non-exclusive and transferable (but only to any assignee or transferee of any rights or benefits under this Agreement or upon or at any time following termination of this Agreement) licence (carrying the right to grant sub licences) to use the Intellectual Property Rights which are or become vested in WEPCo; and

18.4.2 shall, where any Intellectual Property Rights are or become vested in a third party, use all reasonable endeavours to procure the grant of a like licence to that referred to in Clause 18.4.1 above to each Participant,

in both cases, solely for the Approved Purposes.

18.5 WEPCo shall use all reasonable endeavours to ensure that any Intellectual Property Rights created, brought into existence or acquired during the term of this Agreement vest, and remain vested throughout the term of this Agreement, in WEPCo and WEPCo shall use best endeavours to enter into appropriate agreements with any WEPCo Party (or other third parties) that may create or bring into existence, or from which it may acquire, any Intellectual Property Rights.

18.6 WEPCo shall on request provide to each Participant with written absolute waivers from all authors of the Intellectual Property Rights in relation to all their moral rights arising under the Copyright, Designs and Patents Act 1988 in relation to the Intellectual Property Rights and, as far as is legally possible, any broadly equivalent rights such authors may have in any territory of the world.

Claims

18.7 Where a claim or proceeding is made or brought against any Participant which arises out of the infringement of any rights in or to any Intellectual Property (other than any Disclosed Data) or because the use of any materials, plant, machinery or equipment in connection with the WEPCo Operations or Project Services infringes any rights in or to any Intellectual Property of a third party then, unless such infringement has arisen out of the use of any Intellectual Property by or on behalf of such Participant otherwise than in accordance with the terms of this Agreement, WEPCo shall indemnify such Participant at all times from and against all such claims and proceedings and the provisions of Clause 16.3 (*Conduct of Claims*) to Clause 16.7 shall apply.

19. TRANSFER OF EMPLOYMENT

19.1 [Whilst, at the Commencement Date, the Parties do not envisage that a Relevant Transfer will apply in relation to the provision of the Partnering Services by or on behalf of WEPCo or as a result of it carrying out its general business activities]⁴ the provisions of Schedule 15 (*Transfer of Employment and Pensions*) shall apply in relation to any transfers of staff to WEPCo or any Partnering Subcontractor pursuant to or necessitated by this Agreement (excluding transfers pursuant to or necessitated by a Project Agreement to which such Project Agreement shall apply). It is the Parties' intention that the costs of such transfers should be fully recovered through Project Development Fees to be received after the date of that transfer or as otherwise agreed between the Parties.

19.2 WEPCo shall be obliged to act in such a manner and to manage its affairs to ensure, to the extent it is within its powers, that the effect of Clause 19.1 upon each of the Participants is mitigated.

19.3 The provisions of Schedule 20 (*Handover on Expiry or Termination*) shall apply in relation to any transfers of staff on expiry or termination of this Agreement.

20. SITE SECURITY AND PERSONNEL ISSUES

20.1 Each Participant shall have the right to refuse admittance to, or order the removal from any premises of that Participant or from the Facilities of any person employed by (or acting on behalf of) WEPCo who such Participant has reasonable grounds for believing is not a fit and proper person to be in such premises or the Facilities.

20.2 Any action taken under Clause 20.1 shall forthwith be confirmed in writing by the relevant Participant to WEPCo and, to avoid doubt, shall not relieve WEPCo of any of its obligations under this Agreement.

Resources and training

20.3 WEPCo shall procure that:

20.3.1 there shall at all times be a sufficient number of staff (including all relevant grades of supervisory staff) engaged in the provision of the Partnering Services with the requisite level of skill and experience. To avoid doubt, this obligation shall include ensuring that there are sufficient staff to cover periods of holiday, sickness, other absence and anticipated and actual peaks in demand for each of the Partnering Services; and

20.3.2 all staff receive such training and supervision as is necessary to ensure the proper performance of this Agreement and compliance with all health and safety rules, procedures and requirements.

20.4 Each Participant agrees to permit and arrange for prospective Transferring Employees who are employees of that Participant, prior to the relevant Transfer Date, to receive training and to make familiarisation visits to any relevant premises of WEPCo or a Partnering Subcontractor (all as reasonably requested by WEPCo and in such manner as to ensure that there is no material adverse effect on the operations of the Participant as a result of the same).

Convictions and disciplinary action

- 20.5 WEPCo (to the extent permitted by Law) shall procure that all potential staff or persons performing any of the Partnering Services who may reasonably be expected in the course of their employment or engagement to have access to children, the elderly or vulnerable adults (each a "**Named Employee**"):
- 20.5.1 (other than Transferring Participant Employees):
 - (a) are questioned concerning their Convictions prior to commencing such employment or engagement; and
 - (b) obtains a check of the most extensive available kind made with the Disclosure and Barring Service.
 - 20.5.2 are questioned during the term of their employment or engagement concerning any Convictions which arise during the term of their employment or engagement.
- 20.6 WEPCo shall procure that (other than Transferring Participant Employees) no person who discloses any Convictions, or who appears on a Barred List following the results of a Disclosure and Barring Service check, is employed without the Participants' Representatives prior written consent (such consent not to be unreasonably withheld or delayed).
- 20.7 Subject always to having the prior written consent of the relevant individual, WEPCo shall procure that the Participants are kept advised at all times of any member of staff who, subsequent to his/her commencement of employment as a member of staff, receives a Conviction or whose previous Convictions become known to WEPCo (or any employee of a Partnering Subcontractor). WEPCo shall procure the removal of such persons who subsequently receive a Conviction (or whose previous Convictions become known to WEPCo) from the relevant facilities either:
- 20.7.1 at the Participant's request (where the information has been provided to the Participant); and
 - 20.7.2 in all cases, where the relevant information has not been provided to the Participant.
- 20.8 Any Participant's Representative (acting reasonably) may instruct WEPCo to procure that appropriate disciplinary action is taken against any employee of WEPCo or any Partnering Subcontractor (in accordance with the terms and conditions of employment of the employee concerned) who misconducts himself or is incompetent or negligent in his duties or who any Participant has reasonable grounds for believing that their presence or conduct on the Facilities or at work is otherwise undesirable. The Participants shall co-operate with any such disciplinary proceedings and shall be advised in writing by WEPCo of the outcome.
- 20.9 WEPCo shall procure that there are set up and maintained, by it and by all Partnering Subcontractors, personnel policies and procedures covering all relevant matters (including discipline, grievance, equal opportunities and health and safety). WEPCo shall procure that the terms and the implementation of such policies and procedures comply with Law and Good Industry Practice and that they

⁴ Review and consider whether appropriate in light of Tenderers solution.

are published in written form and that copies of them (and any revisions and amendments to them) are forthwith issued to the Participants.

Lists and Records

20.10 WEPCo shall procure that the Participants' Representatives shall at all reasonable times have consent to access all material details in respect of all employees of WEPCo or any Partnering Subcontractors including numbers and categories of staff employed to perform the Partnering Services and including in respect of each such employee:

20.10.1 details of qualifications; and

20.10.2 details of training undertaken by the employee.

21. TRANSITION/HANDOVER ON EXPIRY AND TERMINATION

21.1 WEPCo shall co-operate to ensure a smooth transition and handover of the Partnering Services on the expiry or earlier termination of this Agreement.

22. PARTICIPANT DEFAULT

22.1 For the purposes of this Agreement, each of the following is a Participant Event of Default :

22.1.1 one or more Participants:

- (a) committing a material breach of the terms of Clauses 9.1, 9.2 and 9.6, provided that the renewal or extension of a lease of premises currently occupied by a Participant or the taking of a short term lease by a Participant to cover the short term needs of that Participant pending completion of Required Facilities pursuant to a Project Agreement shall not comprise a material breach by that Participant of the provisions of Clauses 9.1, 9.2 and/or 9.6; and/or
- (b) failing to perform its obligations under Clause 14.11 (to the extent that such breach is not an event or circumstance falling under the terms of Clause 22.1.2) where such breach of Clause 14.11 has a material adverse effect on WEPCo or any Project Service Provider;

22.1.2 one or more Participants acting in a manner in breach of this Agreement which shall have delayed by more than forty (40) Business Days the date for execution of any Project Agreement in relation to an Approved Project (as such date was agreed between WEPCo and the Relevant Participants as part of the Stage 2 Approval for that Approved Project);

22.1.3 an expropriation, sequestration, nationalisation or requisition of any Facilities or a material part of the Facilities or a material part of the assets and/or shares of WEPCo or its Holding Company or a Project Service Provider by a Participant or any other Relevant Authority;

22.1.4 non-payment by any Participant(s) of amounts due under this Agreement (which are not in dispute) exceeding £100,000 (index linked) sixty (60) Business Days after a written

notice is served on all the relevant Participant(s), copied to the other Participants stating the amount due and the date when such amount becomes due,

PROVIDED THAT a rejection of a New Project in accordance with the terms of Clause 13.1 and/or Schedule 5 (*Approval Process for New Projects*) shall not comprise a Participant Event of Default. In the event that a Participant Event of Default under Clause 22.1.3 occurs as a result of the actions of a Relevant Authority other than a Participant, all Participants shall be deemed to be responsible for such Participant Event of Default.

22.2 On the occurrence of a Participant Event of Default or within a reasonable time after WEPCo becomes aware of the same, and while the same is still subsisting, WEPCo may, at its option:

22.2.1 suspend performance by it of all or part of its obligations under this Agreement to the Participant(s) responsible for the Participant Event of Default until such time as such Participant(s) have demonstrated to WEPCo's reasonable satisfaction that they will perform and are capable of performing their obligations under this Agreement; or

22.2.2 serve written notice on Participant(s) responsible for the Participant Event of Default (copied to the other Participants) of the occurrence and (specifying details) of such Participant Event of Default. If the relevant matter or circumstance is capable of remedy (and, for the avoidance of doubt, a delay referred to in Clause 22.1.2 and breach of the provisions of Clause 14.11 shall each be deemed to be capable of remedy) and has not been remedied by the responsible Participant(s) (or otherwise) within thirty (30) Business Days of such notice, or, if it is not capable of remedy, with immediate effect, WEPCo may:

(a) serve a written notice on each Participant responsible for the Participant Event of Default terminating this Agreement with immediate effect insofar as it relates to such Participant; or

(b) serve a written notice on each Participant responsible for the Participant Event of Default (copied to the other Participants) specifying the effect such Participant Event of Default has had (and continues to have) on WEPCo (a "**Participant Default Notice**").

22.3 WEPCo shall not exercise or purport to exercise any right to terminate this Agreement except as expressly set out herein.

22.4 Where WEPCo has served a Participant Default Notice and/or terminates this Agreement in accordance with Clause 22.2 in respect of a Participant as a result of a Participant Event of Default, the Participant(s) responsible for the Participant Event of Default shall pay compensation to WEPCo calculated in accordance with Section 1 (*Participant Event of Default Compensation Sum*) of Schedule 14 (*Compensation on Participant Event of Default and Termination*).

22.5 Where, as a result of termination in accordance with Clause 22.2 in respect of a Participant Event of Default, WEPCo has terminated this Agreement in its entirety, the Participant(s) responsible for the Participant Event of Default shall, in addition to liability under Section 1 (*Participant Event of Default Compensation Sum*) of Schedule 14 (*Compensation on Participant Event of Default and Termination*), pay

compensation to WEPCo calculated in accordance with Section 2 (*Participant Event of Default Termination Sum*) of Schedule 14 (*Compensation on Participant Event of Default and Termination*).

22.6 Where WEPCo has validly served a Participant Default Notice more than once in any twelve (12) month period in respect of the same Participant, it shall not be required to provide either the Project Development Partnering Services or any Strategic Support Partnering Services to that Participant under this Agreement except on terms which provide, inter alia, for the payment by such Participant of all Partnering Services Costs (other than those which are already being paid via Project Agreements) monthly in arrears.

23. WEPCO EVENTS OF DEFAULT

WEPCo Events of Default

23.1 For the purposes of this Agreement, each of the following is a WEPCo Event of Default :

- 23.1.1 the occurrence of any Project Co Event of Default or D&B Co Event of Default, in each case as defined in the relevant Project Agreement (other than one resulting from an Insolvency Event (or equivalent event under the relevant Project Agreement) in relation to the Project Service Provider, or any right of the Project Agreement Counterparty to terminate as a result of a "*Prohibited Act*" as defined in the relevant Project Agreement) in respect of one or more Project Agreements provided that, where the event in question is one which is capable of remedy in terms of the applicable Project Agreement, such event shall comprise a WEPCo Event of Default:
- (a) at the instance of any Participant who is a Project Agreement Counterparty or is otherwise directly affected by such event by virtue of an interest or involvement in the relevant Facilities, on its occurrence; and
 - (b) at the instance of any other Participant, on the expiry of any remedy period permitted under the applicable Project Agreement without it being remedied;
- 23.1.2 the occurrence of a Significant Performance Failure;
- 23.1.3 WEPCo committing a material breach of its obligations under this Agreement (other than as a consequence of a breach by one or more of the Participants of their obligations under this Agreement) including:
- (a) failure to take out and maintain the Insurances in accordance with Clause 17.1; and/or
 - (b) any breach arising pursuant to Clause 5.4;
- 23.1.4 WEPCo ceasing to provide or procure the provision of all or a substantial part of the Partnering Services in accordance with this Agreement (other than as a consequence of a breach by one or more of the Participants of their obligations under this Agreement);
- 23.1.5 WEPCo commits a material breach of its obligations under this Agreement (other than as a consequence of a breach by one or more of the Participants of their obligations under this Agreement) which results in the criminal prosecution and conviction of WEPCo or any WEPCo Party under the Health and Safety Regime (an "**H&S Conviction**") provided

that an H&S Conviction of a WEPCo Party shall not constitute a WEPCo Event of Default if either:

- (a) within ninety (90) Business Days from the date of the H&S Conviction (or, in the case of H&S Conviction which is subject to an appeal or any further judicial process and where such appeal or further judicial process does not result in the successful appeal against or quashing of the H&S Conviction, within sixty (60) Business Days of the date of the decision of such appeal or judicial process), the involvement in this Agreement of each relevant WEPCo Party (which in the case of an individual director, officer or employee shall be deemed (if it is reasonable to so deem) to include the WEPCo Party of which that person is a director, officer or employee) is terminated and a replacement is appointed by WEPCo in accordance with Clause 28.2 below; or
- (b) within forty (40) Business Days of the H&S Conviction WEPCo puts forward a method statement which specifies in sufficient detail the changes to working practices that will be implemented to prevent any recurrence of the events leading up to the H&S Conviction and that method statement is approved by the Participants, such approval not to be unreasonably withheld or delayed;

- 23.1.6 WEPCo failing to comply with the provisions of Clause 28 (*Assignment and sub-contracting*);
- 23.1.7 WEPCo failing to pay any sum or sums due to the Participants (or any of them) under this Agreement (which sums are not in dispute) which, either singly or in aggregate, exceed(s) £10,000 (index linked) and such failure continues for sixty (60) Business Days from receipt by WEPCo of a written notice of non-payment from the Participants;
- 23.1.8 an Insolvency Event occurs in relation to WEPCo;
- 23.1.9 an Insolvency Event (or equivalent event in terms of the relevant Project Agreement) occurs in relation to a Project Service Provider other than WEPCo;
- 23.1.10 any Project Service Provider fails (after having received a valid notice from its relevant Project Agreement Counterparty) to terminate any Supply Chain Agreement to which it is a party and to procure that a replacement Supply Chain Member is appointed in accordance with the provisions of the relevant Project Agreement;
- 23.1.11 WEPCo has, at the date of this Agreement, been in one of the situations referred to in regulation 57(1) of the Public Contracts Regulations 2015 (S.I. 2015/102), including as a result of the application of regulation 57(2) of the Public Contract Regulations 2015 (S.I 2015/102) and should therefore have been excluded from the procurement proceedings;
- 23.1.12 In the circumstances described in Clauses 26.5.5(a), 26.6 and 26.7; and
- 23.1.13 a Prohibited Act, giving rise to a right to terminate pursuant to Clause 25 or the relevant Project Agreement.

23.2 Each Party shall notify the others in writing of the occurrence, and details, of any WEPCo Event of Default promptly on such Party becoming aware of its occurrence, and WEPCo shall notify the Participants in writing of any event or circumstance which is likely, with the passage of time or otherwise, to constitute or give rise to a WEPCo Event of Default promptly on WEPCo becoming aware of such event or circumstance.

23.3 On the occurrence of a WEPCo Event of Default, without prejudice to the rights of the Participants (acting through Welsh Government) pursuant to Clause 23.4 to 23.13, each Participant may elect to suspend the exclusivity granted to WEPCo by it pursuant to Clause 9.1 and/or Clause 9.2 by serving written notice of such suspension on WEPCo (which shall include, for the avoidance of doubt, the suspension of exclusivity in respect of any of the Participant's batched New Projects that have not achieved Stage 2 Approval, pursuant to paragraph 1.3.1(a) of Section 1 of Schedule 3 (*Partnering Services*)). Without prejudice to the rights of each of the Participants under Clause 9.7, any such suspension shall expire:

23.3.1 following written notice to that effect being served on WEPCo by the Participant in question, copied to the SPB; and

23.3.2 automatically where the WEPCo Event of Default has been remedied or where Clause 23.12.2(b) applies.

23.4 On the occurrence of a WEPCo Event of Default, or within a reasonable time after the Participants (or any one of them) become aware of the same, and while the same is subsisting, the Participants may (acting through Welsh Government):

23.4.1 in the case of any WEPCo Event of Default referred to in Clauses 23.1.1 to 23.1.4 (inclusive) and 23.1.6 either (in their absolute discretion):

(a) exercise their rights under Clause 23.6; or

(b) serve written notice of default on WEPCo requiring WEPCo at WEPCo's option either:

(i) to remedy the WEPCo Event of Default referred to in such notice of default (if the same is continuing) within twenty (20) Business Days of such notice of default; or

(ii) to put forward within twenty (20) Business Days of such notice of default a programme to the reasonable satisfaction of the Participants (acting through Welsh Government) (set out, if appropriate, in stages) for remedying the WEPCo Event of Default (a "**Remediation Programme**") or in the case of a Significant Performance Failure, to satisfy the Participants that the events or circumstances that gave rise to the Significant Performance Failure will not recur or has/have otherwise been addressed to the Participants' satisfaction (an "**Improvement Programme**"). In either case, such programme may include the PSDP proposing the replacement of a shareholder who holds shares directly or indirectly in the PSDP pursuant to Clause 9.8 of the WEPCo Shareholders Agreement.

A Remediation Programme shall specify in reasonable detail the manner in, and the latest date by, which such WEPCo Event of Default will be remedied.

An Improvement Programme shall set out such detail so as to satisfy the Participants that the events or circumstances that gave rise to the Significant Performance Failure will not recur or has/have otherwise been addressed within the timescale as agreed in the Improvement Programme.

WEPCo shall only have the option of putting forward a Remediation Programme or an Improvement Programme (as the case may be) in accordance with this sub-clause if it first notifies the Participants within ten (10) Business Days of such notice of default that it proposes to do so.

For the avoidance of doubt the reversal of any action that was done without SPB consent shall remedy that breach provided that WEPCo shall indemnify each of the Participants in respect of all losses, costs and expenses incurred as a result of that action being so carried out.

If WEPCo fails:

- (1) to remedy the WEPCo Event of Default in accordance with Clause 23.4.1(b)(i) and does not put forward a Remediation Programme or an Improvement Programme (as the case may be) in accordance with Clause 23.4.1(b)(ii), in either case within twenty (20) Business Days of the notice referred to in Clause 23.4.1(b); or
- (2) (in the case of a Remediation Programme) to remedy the WEPCo Event of Default within the agreed time period(s) specified in the Remediation Programme; or
- (3) (in the case of an Improvement Programme) to implement the material steps identified in the Improvement Programme to the reasonable satisfaction of the Participants within the relevant time period(s) specified in the Improvement Programme so as to satisfy the Participants (in their absolute discretion) that the events or circumstances that gave rise to the Significant Performance Failure will not recur or has/have otherwise been addressed within the timescales as agreed in the Improvement Programme,

the Participants shall be entitled to exercise their rights under Clause 23.6 and/or Clause 23.10;

23.4.2 in the case of any WEPCo Event of Default referred to in Clauses 23.1.5, 23.1.7, 23.1.8, 23.1.11, 23.1.12 or 23.1.13, exercise their rights under Clause 23.10; or

23.4.3 in the case of a WEPCo Event of Default referred to in Clause 23.1.9 or 23.1.10 (each a "**Project Service Provider Default**") exercise their rights under Clause 23.9.

- 23.5 Where WEPCo puts forward a Remediation Programme or an Improvement Programme in accordance with Clause 23.4.1(b)(ii), the Participants shall have twenty (20) Business Days from receipt of the same within which to notify WEPCo in writing (acting reasonably) that they do not accept the programme, failing which the Participants shall be deemed to have accepted the programme. Where the Participants notify WEPCo that they do not accept the programme, the Participants may elect to exercise their rights under Clause 23.6.
- 23.6 Where the Participants are entitled to exercise their rights under this Clause 23.6, the Participants may, in their absolute discretion (acting through Welsh Government):
- 23.6.1 require WEPCo by written notice to terminate a Supply Chain Agreement to which it is a party or, as the case may be, procure the termination of any Supply Chain Agreement to which any Project Service Provider or Partnering Subcontractor is a party as employer which has caused or materially contributed to the occurrence of the WEPCo Event of Default and to procure that a replacement Supply Chain Member is appointed in accordance with the provisions of this Agreement or the relevant Project Agreement as the case may be; or
 - 23.6.2 where WEPCo itself has been providing the Services in respect of which the WEPCo Event of Default occurred, require WEPCo to cease providing the relevant Services and procure that a replacement Supply Chain Member is appointed in accordance with Clause 28 (*Assignment and sub-contracting*) to provide such Services within sixty (60) Business Days.
- 23.7 If the Participants exercise their rights under Clause 23.6 in relation to a WEPCo Event of Default affecting provision of the Partnering Services, WEPCo shall forthwith put forward proposals for the interim management or provision of the relevant Partnering Services until such time as an alternative Supply Chain Member can be engaged by WEPCo. If WEPCo fails to do so (or its proposals if implemented are not reasonably likely to give adequate provision of the relevant Partnering Services) then without prejudice to the other rights of the Participants in this Clause 23 (*WEPCo Events of Default*), the Participants (or any of them) may perform, or procure a third party to perform, such Partnering Services themselves and WEPCo shall indemnify each of the Participants in respect of their costs in so doing.
- 23.8 If WEPCo fails to terminate or procure the termination of the relevant Supply Chain Agreement to which it or any Project Service Provider or Partnering Subcontractor is a party as employer and to procure that a replacement Supply Chain Member is appointed in accordance with the provisions of Clause 23.6, the Participants shall be entitled at their option to exercise their rights in accordance with the provisions of Clause 23.10.
- 23.9 Where a Project Service Provider Default has occurred the following shall apply:
- 23.9.1 where the Project Service Provider Default is not capable of remedy, the Participants (acting through Welsh Government) shall be entitled to exercise the rights set out in Clause 23.10; and
 - 23.9.2 where the Project Service Provider Default is capable of remedy, the Participants (acting through Welsh Government) may serve written notice of default on WEPCo requiring WEPCo to put forward within twenty (20) Business Days of such notice of default a reasonable programme (set out, if appropriate, in stages) for remedying the Project

Service Provider Default and ensuring that such Project Service Provider Default does not recur (the "**PSP Rectification Programme**"), in which case:

- (a) where WEPCo fails to put forward such PSP Rectification Programme in the twenty (20) Business Day period, the Participants (acting through Welsh Government) shall be entitled to exercise the rights set out in Clause 23.10; and
- (b) where WEPCo puts forward a PSP Rectification Programme within the twenty (20) Business Day period:
 - (i) the PSP Rectification Programme shall specify in reasonable detail the manner in, and the latest date by, which the Project Service Provider Default is proposed to be remedied (where such default is capable of remedy) and the procedures and practices which WEPCo and/or the Project Service Providers propose to put in place to ensure that such Project Service Provider Default does not recur;
 - (ii) the Participants shall consider the PSP Rectification Programme and liaise with WEPCo to discuss its contents and, in particular, whether the Participants consider it to be sufficient that, if properly implemented by WEPCo and/or the Project Service Providers it would prevent the Project Service Provider Default from recurring. The Participants shall, in considering whether or not to approve a PSP Rectification Programme under consideration, be entitled to take into account the performance of WEPCo and/or the relevant Project Service Provider in implementing the provisions of any previous PSP Rectification Programme agreed in relation to a breach or breaches substantially similar to the breach or breaches which have given rise to the PSP Rectification Programme then under consideration;
 - (iii) the Participants and WEPCo shall use their respective best endeavours to ensure that such liaison as is appropriate takes place so as to ensure that the Participants are in a position to determine whether they are satisfied with the PSP Rectification Programme within twenty (20) Business Days after receipt by the Participants of the PSP Rectification Programme; and
 - (iv) where the Participants (acting reasonably) are not satisfied that the PSP Rectification Programme meets the requirements set out in Clause 23.9.2(b)(i) or agreement cannot be reached between the Participants and WEPCo as to the terms of a PSP Rectification Programme or WEPCo fails to comply with the agreed PSP Rectification Programme, the Participants (acting through Welsh Government) shall be entitled to exercise the rights set out in Clause 23.10.

23.10 Subject to Clause 23.12, where the Participants are entitled to exercise their rights under this Clause 23.10, the Participants may (acting through Welsh Government):

- 23.10.1 suspend WEPCo's exclusivity by notice in writing to WEPCo (a "**Suspension Notice**") until further notice (if any) (any such notice reinstating exclusivity being a "**Reinstatement Notice**");
- 23.10.2 during the period of any such suspension serve an SPA Material Default Notice; and
- 23.10.3 at any time (whether or not a Suspension Notice has been served on WEPCo) elect to treat such circumstances as an SPA Material Default by notice in writing to WEPCo (an "**SPA Material Default Notice**") in accordance with Clause 23.12.

If a Suspension Notice is served and no Reinstatement Notice has been served by the Participants within six (6) months of the date of the Suspension Notice then a SPA Material Default Notice shall be deemed to have been served on WEPCo on the expiry of such six (6) month period.

23.11 In the event of the Participants exercising their right under Clause 23.10.1:

- 23.11.1 none of the Participants shall have any liability whatsoever whether under this Agreement or in tort, restitution or at common law to WEPCo or any WEPCo Party save for in respect of any antecedent breach of this Agreement by that Participant; and
- 23.11.2 WEPCo shall no longer be required to provide the Partnering Services for the period of the suspension, provided that:
 - (a) the Participants (or any of them) may require WEPCo to provide all or any part of the Partnering Services and, if WEPCo agrees, such Partnering Services shall be provided on the terms set out in Clause 8 (*Services Obligations*) and Clause 10.2 (*Payment for Partnering Service*); and
 - (b) WEPCo shall recommence the provision of the Partnering Services on receipt of a Reinstatement Notice.

The provisions of Clause 23.12.1 and 23.12.2(a) shall apply mutatis mutandis to any Participant serving a notice of suspension under Clause 9.7 or Clause 23.3.

23.12 If the Participants serve an SPA Material Default Notice on WEPCo pursuant to Clause 23.10.3 (or are deemed to have served such an SPA Material Default Notice pursuant to Clause 23.10) (together an "**SPA Material Default**") then an SPA Material Default shall be deemed to have occurred whereupon:

- 23.12.1 the Participants (acting through Welsh Government) shall be entitled to terminate this Agreement with immediate effect by notice in writing to WEPCo (a "**Default Termination Notice**");

23.12.2 if no Default Termination Notice is given by the Participants pursuant to Clause 23.12.1 within twenty (20) Business Days of the deemed occurrence of the SPA Material Default then:

- (a) the provisions of Clauses 9.3 to 9.9 of the WEP Co Shareholders Agreement shall apply; and
- (b) if an SPA Material Default Notice is served at a time when WEPCo's exclusivity has been suspended pursuant to Clauses 9.7, 23.3 or 23.10.1 or where the SPA Material Default Notice is deemed to have been given pursuant to Clause 23.10, then a Reinstatement Notice (and/or notice revoking such suspension in the case of Clauses 9.7 and 23.3) shall be deemed to have been given immediately on completion of the sale (at the end of the procedure in Clauses 9.3 to 9.9 of the WEPCo Shareholders Agreement and the related provisions in the Articles of Association of WEPCo), of all the shares held by the PSDP in WEPCo to WGCo and/or a third party purchaser.

Participants' costs

23.13 WEPCo shall reimburse each Participant for all reasonable costs incurred by that Participant as a result of WEPCo's breach of any of its obligations under this Agreement or their exercise of their rights under this Agreement in respect of such breach (including, without limitation, any relevant increased administrative expenses and the reasonable and proper costs of the Participant incurred under this Agreement and the WEPCo Shareholders Agreement resulting from the occurrence of a termination of this Agreement pursuant to this Clause 23 (the "**Participants' Costs**")).

24. FORCE MAJEURE

24.1 Save as otherwise expressly provided in this Agreement, none of WEPCo or the Participants shall be relieved from any liability under this Agreement to the extent that by reason of Force Majeure it is not able to perform its obligations under this Agreement.

24.2 None of WEPCo or the Participants shall be entitled to any compensation or other payment by reason of the occurrence of an event of Force Majeure.

25. CORRUPT GIFTS AND FRAUDULENT PAYMENTS

Warranty

25.1 WEPCo warrants that in entering into this Agreement it has not committed any Prohibited Act.

Remedies

25.2 If WEPCo or any WEPCo Party (or anyone employed by or acting on behalf of them) commits any Prohibited Act, then the Participants shall be entitled to act in accordance with Clauses 25.2.1 to 25.2.6 below:

25.2.1 if a Prohibited Act is committed by WEPCo or by an employee not acting independently of WEPCo then each of the Participants may terminate this Agreement with immediate

effect with respect to that Participant by giving written notice to WEPCo, and this Agreement will terminate with respect to that Participant;

- 25.2.2 if the Prohibited Act is committed by an employee of WEPCo acting independently of WEPCo, then each of the Participants may give written notice to WEPCo of termination of this Agreement with respect to that Participant and this Agreement will so terminate, unless within twenty (20) Business Days of receipt of such notice WEPCo terminates the employee's employment and (if necessary) procures the performance of the relevant part of the Services by another person;
- 25.2.3 if the Prohibited Act is committed by a Contractor and/or Service Provider or by an employee of a Contractor and/or Service Provider not acting independently of that Contractor and/or Service Provider then each of the Participants may give written notice to WEPCo of termination of this Agreement with respect to that Participant and this Agreement will so terminate, unless within twenty (20) Business Days of receipt of such notice WEPCo terminates the relevant Supply Chain Agreement and procures the performance of the relevant part of the Services by another person, where relevant, in accordance with Clause 28 (*Assignment and sub-contracting*);
- 25.2.4 if the Prohibited Act is committed by an employee of a Contractor and/or Service Provider acting independently of that Contractor and/or Service Provider then each of the Participants may give written notice to WEPCo of termination of this Agreement with respect to that Participant and this Agreement will so terminate, unless within twenty (20) Business Days of receipt of such notice WEPCo procures the removal of the employee from any and all WEPCo Operations and (if necessary) procures the performance of the relevant part of the WEPCo Operations by another person;
- 25.2.5 if the Prohibited Act is committed by any other person involved in the provision of WEPCo Operations not specified in Clauses 25.2.1 to 25.2.4 above then each of the Participants may give written notice to WEPCo of termination of this Agreement with respect to that Participant and this Agreement will so terminate unless within twenty (20) Business Days WEPCo procures the removal of such person from any and all WEPCo Operations and the termination of the appointment of their employer (where such person is not employed by WEPCo) and (if necessary) procures the performance of the relevant part of the Services by another person; and
- 25.2.6 any notice of termination under this sub-clause shall specify:
 - (a) the nature of the Prohibited Act;
 - (b) the identity of the party who the Participant(s) believe has committed the Prohibited Act; and
 - (c) the date on which this Agreement will terminate in accordance with the applicable provisions of this sub-clause.

25.3 Without prejudice to their other rights or remedies under this clause:

25.3.1 the Participants shall be entitled to recover from WEPCo the amount or value of any such gift, consideration or commission; and

25.3.2 each Participant shall be entitled to recover from WEPCo any other loss sustained in consequence of any breach of this clause.

Permitted Payments

25.4 Nothing contained in this clause shall prevent WEPCo from paying any proper commission or bonus to its employees within the agreed terms of their employment.

Notification

25.5 WEPCo shall notify the Participants in writing of the occurrence (and details) of any Prohibited Act promptly on WEPCo becoming aware of its occurrence.

Interim Management

25.6 Where WEPCo is required to replace any Supply Chain Member with which it has contracted pursuant to this clause, the provisions of Clause 23 (*WEPCo Events of Default*) shall apply and be construed accordingly.

26. TAX COMPLIANCE

26.1 WEPCo represents and warrants to the Participants that at the date of this Agreement, it has notified the Participants in writing of any Occasions of Tax Non-Compliance and any litigation in connection with any Occasions of Tax Non-Compliance that it or, so far as it is aware having made reasonable enquiries, any of the Shareholders (other than WGCo) is involved in.

26.2 If at any time an Occasion of Tax Non-Compliance occurs in relation to it or any Shareholder other than WGCo (a "**Non-Compliant Shareholder**"), WEPCo shall:

26.2.1 notify the Participants in writing of such fact within five (5) Business Days of it becoming aware of that occurrence; and

26.2.2 provide to the Participants:

(a) promptly, and in any event within twenty (20) Business Days of its becoming aware of that occurrence, details of the steps which it, or as the case may be, the Non-Compliant Shareholder is taking to address the Occasion of Tax Non-Compliance and to prevent the same from recurring, together with any mitigating factors that it considers relevant (together "**Proposed Mitigating Measures**"); and

(b) such other information in relation to the Occasion of Tax Non-Compliance as the Participants may reasonably require within five (5) Business Days of receipt of notice from the Participants to do so.

26.3 The Participants will notify WEPCo in writing if the Proposed Mitigating Measures are acceptable to it, in its reasonable opinion, within fifteen (15) Business Days of receipt of all information required to be provided in accordance with Clause 26.2.

26.4 Where the Participants have notified WEPCo that the Proposed Mitigating Measures are not acceptable, the Participants may, in that notice, request that WEPCo provides details of further measures it, or as the case may be, the Non-Compliant Shareholder, would take to prevent the same from recurring, together with any further mitigating factors that it considers relevant. Within twenty (20) Business Days of receipt of a notice from the Participants requesting further measures, WEPCo will either provide details of the further measures it, or as the case may be, the Non-Compliant Shareholder, is willing to take or notify the Participants that it is not willing to take further measures. The Participants will consider any further measures proposed by WEPCo and notify WEPCo within fifteen (15) Business Days if those further measures, taken together with the Proposed Mitigating Measures, are acceptable to the Participants, acting reasonably.

26.5 If:

26.5.1 the warranty by WEPCo contained in Clause 26.1 is untrue and Proposed Mitigating Measures are not agreed in accordance with Clauses 26.3 to 26.4 (inclusive); and/or

26.5.2 WEPCo commits a material breach of its obligation to notify the Participants of any Occasion of Tax Non-Compliance and / or WEPCo fails to provide details of Proposed Mitigating Measures each as required by Clause 26.2; and/or

26.5.3 the Participants otherwise becomes aware that an Occasion of Tax Non-Compliance has occurred in relation to WEPCo or a Shareholder (other than WGo) and WEPCo fails to provide details of Proposed Mitigating Measures within twenty (20) Business Days of its being required by the Participants to do so; and/or

26.5.4 the Participants notify WEPCo under Clause 26.4 that the Proposed Mitigating Measures are not acceptable and, if WEPCo is requested to provide details of further measures pursuant to Clause 26.4 the further measures (if any) are not acceptable to the Participants, in its reasonable opinion and the Participants notify WEPCo to that effect; and / or

26.5.5 in any such case WEPCo fails to implement, or procure the implementation by a Non-Compliant Shareholder of, any Proposed Mitigating Measures agreed to by the Participants in any material respect (including as to timetable),

then the Participants shall be entitled to give to WEPCo:

(a) where the Occasion of Tax Non-Compliance has occurred in relation to WEPCo, a notice under Clause 23.1.12; and

(b) where the Occasion of Tax Non-Compliance has occurred in relation to a Shareholder, a notice under Clause 26.6 (*Shareholder Tax Non-Compliance Notice*).

26.6 Subject to Clause 26.7, where the Occasion of Tax Non-Compliance applies to a Non-Compliant Shareholder, the Participants may by written notice (a "**Shareholder Tax Non-compliance Notice**") require

that the Non-Compliant Shareholder transfers all its shares and Shareholder loan notes in WEPCo to a person who is not an Unsuitable Person within one hundred and eighty (180) days commencing on the date the Shareholder Tax Non-compliance Notice is served. If the Non-Compliant Shareholder does not effect such transfer of shares and Shareholder loan notes in WEPCo to a person who is not an Unsuitable Person within such one hundred and eighty (180) day period (or such longer period as may be agreed by the Participants in its absolute discretion) then the Participants will be entitled to give a notice to WEPCo under Clause 23.1.12.

26.7 If WEPCo fails to implement, or procure the implementation by a Non-Compliant Shareholder of, any Proposed Mitigating Measures agreed to by the Participants in any material respect (including as to timetable) following an Occasion of Tax Non-Compliance which applies to a Non-Compliant Shareholder, the Participants may by written notice (a "**Shareholder Tax Mitigation Measures Non-Compliance Notice**") require that the Non-Compliant Shareholder transfers all its shares and Shareholder loan notes in WEPCo to a person who is not an Unsuitable Person within ninety (90) days commencing on the date the Shareholder Tax Mitigation Measures Non-Compliance Notice is served. If the Non-Compliant Shareholder does not effect such transfer of shares and Shareholder loan notes to a person who is not an Unsuitable Person within such ninety (90) day period (or such longer period as may be agreed by the Participants in its absolute discretion) then the Participants will be entitled to give a notice to WEPCo under Clause 23.1.12.

27. **AGENCY AND PARTICIPANTS' STATUTORY AUTHORITY**

Nothing in this Agreement shall be construed as a fetter or restriction on the exercise of a Participant's planning or highways function nor, without prejudice to WEPCo's rights and remedies under this Agreement, on the exercise of any other statutory function by or on behalf of any Participant.

28. **ASSIGNMENT AND SUB-CONTRACTING**

Assignment and sub-contracting

28.1 This Agreement and any other agreements to which WEPCo and at least one of the Participants are a party shall be binding on, and shall enure to the benefit of, WEPCo and the relevant Participants and their respective successors and permitted transferees and assignees. In the case of the Participants, their successors shall include any person to whom the Welsh Ministers or other Relevant Authority, in exercising their statutory powers to transfer property, rights and liabilities of any Participant upon such Participant ceasing to exist, transfers the property, rights and obligations of the Participants under this Agreement and any other agreements to which WEPCo and that Participant are a party.

28.2 Subject to Clause 28.3, WEPCo shall not, without the prior written consent of the Participants or, in the case of specific subcontracts for Strategic Support Partnering Services to be provided to individual Participants or Project Development Partnering Services in respect of identified New Projects, the written consent of the relevant Participant (such consent in the case of any proposed sub-contracting not to be unreasonably delayed and may only be withheld in circumstances where the obligations to be subcontracted are material obligations and the proposed sub-contractor is an Unsuitable Person), assign, transfer, subcontract or otherwise dispose of any interest in this Agreement and any other contract entered into by WEPCo for the purposes of performing its obligations under this Agreement.

28.3 The provisions of Clause 28.2 do not apply to the grant or exercise of any security rights, in a form approved by the Participants prior to its grant (such approval not to be unreasonably withheld or delayed),

for any loan made to WEPCo under any Funding Agreement. The Participants may make any approval conditional upon the execution by such assignee of a Funders' Direct Agreement in relation to the exercise of its rights.

28.4 A Participant shall not assign or otherwise dispose of the benefit of the whole or part of this Agreement to any person, save:

- 28.4.1 to the Welsh Ministers or a Minister of the Crown pursuant to an Order under the Ministers of the Crown Act 1975, or any other person or body replacing any of the foregoing (or to whom the Welsh Ministers or the Government exercising their statutory rights would be entitled to transfer such benefits); or
- 28.4.2 to any department, office, instrumentality or agency of the Welsh Ministers or Government or any Local Authority which (in any such case) has the legal capacity and sufficient financial resources to perform the obligations of the Participant hereunder and any other agreement (including a Project Agreement) to which such assignment, transfer or disposal relates;
- 28.4.3 in the case of any Further Education Corporation or Designated Institution (as defined in the Further and Higher Education Act 1992) any other Further Education Corporation or Designated Institution who has the legal capacity and sufficient financial resources to perform the obligations of the Participant hereunder and/or any other agreement (including a Project Agreement) to which such assignment, transfer or disposal relates and/or whose obligations are validly and enforceably guaranteed by the Welsh Ministers or Government; and/or
- 28.4.4 to any person who has the legal capacity and sufficient financial resources to perform the obligations of the Participant hereunder and whose obligations are validly and enforceably guaranteed by the Participant, a Local Authority, or the Welsh Ministers or Government or by any department, office, instrumentality or agency of the Government,

PROVIDED THAT nothing in this sub-clause shall restrict the rights of the Welsh Ministers or the Government to effect a statutory transfer. For the purposes of this Clause 28.4, an obligation shall be deemed to be validly and enforceably guaranteed by a Participant, Local Authority, the Government or any department, office, instrumentality or agency of the Welsh Ministers or Government (in any such case) if that Participant, Local Authority, the Government or any department or office, instrumentality or agency of the Government (as the case may be) has delivered a legal opinion stating that the guarantee is fully valid and enforceable in accordance with its terms subject to customary qualifications and assumptions from a reputable firm of solicitors approved in advance by WEPCo (such approval not to be unreasonably withheld or delayed) having appropriate experience of the matters opined upon.

28.5 Where WEPCo enters into a contract with a Partnering Subcontractor for the purposes of performing the Partnering Services under this Agreement, WEPCo shall cause a term to be included in such contract:

- 28.5.1 which requires payment to be made to the Partnering Subcontractor within a specified period not exceeding thirty (30) days from receipt of a valid application for payment as

defined by the contract requirements and provides that, for the purpose of payment alone, where the relevant Participant responsible for payment for the Partnering Services has made payment to WEPCo and the Partnering Subcontractor's application for payment includes Partnering Services in relation to which payment has been made by the relevant Participant then, to the extent that it relates to such Partnering Services, the invoice shall be treated as valid and payment shall be made to the sub-contractor without deduction (but without prejudice to any right to deduct or set off validly arising under the terms of the contract with the Partnering Subcontractor); and

28.5.2 which notifies the Partnering Subcontractor that the contract forms part of a larger contract for the benefit of the relevant Participant and that should the Partnering Subcontractor have any difficulty in securing the timely payment of an invoice that matter may be referred by the Partnering Subcontractor to *[insert the contact name and address of relevant Participant procuring the Partnering Services]*; and

28.5.3 in the same terms as this Clause 28.5 (including for the avoidance of doubt this Clause 28.5.3) subject only to modification to refer to the correct designation of the equivalent party as the supplier and recipient of the services, as the case may be.

29. **PERFORMANCE OF SUBCONTRACTORS**

29.1 WEPCo will be responsible for ensuring the due performance by the Supply Chain Members with whom it has contracted (if any) and its subcontractors of any tier of their obligations under the relevant Supply Chain Agreements and subcontracts (as the case may be).

30. **CONFIDENTIALITY**

Confidential Information

30.1 The Parties agree that the provisions of this Agreement shall, subject to Clause 30.2 below, not be treated as Confidential Information and may be disclosed without restriction.

30.2 Clause 30.1 above shall not apply to provisions of this Agreement designated as Commercially Sensitive Information and listed in Section 1 (*Commercially Sensitive Information*) of Schedule 19 (*Confidential Information*) which shall, subject to Clause 30.4, be kept confidential for the periods specified in that Section.

30.3 The Parties shall keep confidential all Confidential Information received by one Party from another Party relating to or in connection with this Agreement and shall use all reasonable endeavours to prevent their employees and agents from making any disclosure to any person of any such Confidential Information.

Permitted Disclosure

30.4 Clauses 30.1 and 30.3 shall not apply to:

30.4.1 any disclosure of information that is reasonably required by any person engaged in the performance of their obligations under this Agreement for the performance of those obligations;

- 30.4.2 any matter which a party can demonstrate is already or becomes generally available and in the public domain otherwise than as a result of a breach of this Clause;
- 30.4.3 any disclosure to enable a determination to be made in accordance with Schedule 22(*Dispute Resolution Procedure*) or in connection with a dispute between WEPCo and any of its subcontractors;
- 30.4.4 any disclosure which is required pursuant to any Law or Parliamentary obligation placed upon the party making the disclosure or the rules of any stock exchange or governmental or regulatory authority having the force of law or, if not having the force of law, compliance with which is in accordance with the general practice of persons subject to the stock exchange or governmental or regulatory authority concerned;
- 30.4.5 any disclosure of information which is already lawfully in the possession of the receiving party, prior to its disclosure by the disclosing party;
- 30.4.6 any provision of information to the Parties' own professional advisers or insurance advisers or insurers or to any Funders or any Funders' professional advisers or insurance advisers or, where it is proposed that a persons should or may provide funds (whether directly or indirectly and whether by loan, equity participation or otherwise) to WEPCo to enable it to carry out its obligations under this Agreement, or may wish to acquire shares in WEPCo in accordance with provisions of this Agreement to that person or their respective professional advisers but only to the extent reasonably necessary to enable a decision to be taken on the proposal;
- 30.4.7 any disclosure by a Participant of information as may be reasonably required for the purpose of conducting a due diligence exercise, to any person in connection with the operation of Schedule 6 (*New Project Pricing Report*);
- 30.4.8 any registration or recording of the Consents and property registration required;
- 30.4.9 any disclosure of information by a Participant to the Welsh Government or any department, office or agency of the Welsh Government or their respective advisers or to any person engaged in providing services to a Participant for any purpose related to or ancillary to this Agreement;
- 30.4.10 any disclosure for the purpose of:
 - (a) the examination and certification of a Participant's or WEPCo's accounts;
 - (b) any examination pursuant to section 6(1) of the National Audit Act 1983 or study pursuant to section 145A Government of Wales Act 1998 of the economy, efficiency and effectiveness with which a Participant has used its resources;
 - (c) complying with a proper request from a Party's insurance adviser, or insurer on placing or renewing any insurance;
 - (d) (without prejudice to the generality of Clause 30.4.4 above) compliance with the FOIA and/or the Environmental Information Regulations; or

(e) [compliance with the Local Government Wales Measure 2009]; or

30.4.11 disclosure pursuant to Clause 30.12 (*Departmental Disclosure*),

PROVIDED THAT to avoid doubt, neither Clause 30.4.10(d) nor Clause 30.4.4 above shall permit disclosure of Confidential Information otherwise prohibited by Clause 30.3 (*Confidential Information*) where that information is exempt from disclosure under section 41 of the FOIA.

30.5 Where disclosure is permitted under Clause 30.4 (*Permitted Disclosure*), other than under Clauses 30.4.2, 30.4.4, 30.4.5, 30.4.8 and 30.10, the party providing the information shall procure that the recipient of the information shall be subject to the same obligation of confidentiality as that contained in this Agreement.

30.6 WEPCo shall not make use of this Agreement or any information issued or provided by or on behalf of a Participant in connection with this Agreement otherwise than for the purpose of this Agreement, except with the written consent of the relevant Participant.

30.7 Where WEPCo, in carrying out its obligations under this Agreement, is provided with information relating to the users of any Facility, WEPCo shall not disclose or make use of any such information otherwise than for the purpose for which it was provided, unless WEPCo has sought the prior written consent of that person and had obtained the prior written consent of the relevant Participant.

30.8 On or before the Initial Expiry Date or, where applicable, the Extended Expiry Date, WEPCo shall ensure that all documents or computer records in its possession, custody or control, which contain information relating to any user of any Facility including any documents in the possession, custody or control of a Supply Chain Member, are delivered up to the relevant Participant.

30.9 The Parties acknowledge that both the National Audit Office and Wales Audit Office have the right to publish details of this Agreement (including Commercially Sensitive Information) in their relevant reports.

30.10 The provisions of this Clause 30 (*Confidentiality*) are without prejudice to the application of the Official Secrets Act 1911 to 1989.

Announcements

30.11 Unless otherwise required by any Law or any regulatory or governmental authority (but only to that extent), no Party shall make or permit or procure to be made any public announcement or disclosure (whether for publication in the press, the radio, television screen or any other medium) of any Confidential Information or in the case of WEPCo of its (or of any WEPCo Party's) interest in any Project or, in any such case, any matters relating thereto, without the prior written consent of the other Parties (which shall not be unreasonably withheld or delayed).

Departmental Disclosure

30.12 Each of the Participants shall be free to disclose the terms of this Agreement to the Welsh Government, the Auditor General for Wales, the Wales Audit Office and Relevant Government Departments.

31. **FREEDOM OF INFORMATION**

- 31.1 WEPCo acknowledges that a Participant is subject to the requirements of the FOIA and the Environmental Information Regulations and shall assist and cooperate with a Participant (at WEPCo's expense) to enable the Participant to comply with any Information disclosure requirements.
- 31.2 In the event that a Request for Information is received by WEPCo, WEPCo will transfer the Request for Information to the Participant as soon as practicable after receipt and in any event within two (2) Business Days of receiving the request.
- 31.3 In the event that a Request for Information is received by a Participant in relation to Information that WEPCo is holding on its behalf and which the Participant does not hold itself the Participant shall refer to WEPCo such Request for Information as soon as practicable and in any event within five (5) Business Days of receiving such Request for Information and WEPCo shall:
- 31.3.1 provide the Participant with a copy of all Information in its possession or power in the form that the Participant requires within five (5) Business Days (or such other period as the Participant may specify) of the Participant requesting that Information; and
 - 31.3.2 provide all necessary assistance as reasonably requested by the Participant to enable the Participant to respond to the Request for Information within the time for compliance set out in section 10 of the FOIA or Regulation 5 of the Environmental Information Regulations.
- 31.4 Following notification under Clause 31.3, and up until such time as WEPCo has provided the Participant with all the Information specified in Clause 31.3 WEPCo may make representations to the Participant as to whether or not or on what basis Information requested should be disclosed, provided always that the Participant shall be responsible for determining at its absolute discretion:
- 31.4.1 whether Information is exempt from disclosure in accordance with the provisions of the FOIA or the Environmental Information Regulations;
 - 31.4.2 whether Information is to be disclosed in response to a Request for Information, and
- in no event shall WEPCo respond directly to a Request for Information unless expressly authorised to do so by the Participant.
- 31.5 WEPCo shall ensure that all Information produced in the course of this Agreement or relating to this Agreement is retained for disclosure for as long as is reasonably necessary for the purposes of this Agreement and shall permit the Participant to inspect such records as requested from time to time.
- 31.6 WEPCo acknowledges that any lists or schedules provided by it outlining Commercially Sensitive Information are of indicative value only and that the Participant may nevertheless be obliged to disclose Confidential Information in accordance with the requirements of the FOIA and the Environmental Information Regulations.
- 31.7 WEPCo acknowledges that (notwithstanding the provisions of Clause 30 (*Confidentiality*)) a Participant may, acting in accordance with the Secretary of State's Code of Practice on the Discharge of Functions of Public Authorities under Part 1 of the Freedom of Information Act 2000 (the "**FOIA Code**")

and/or having full regard to any guidance or briefings issued by the Information Commissioner or the Welsh Government, be obliged under the FOIA, or the Environmental Information Regulations to disclose Information concerning WEPCo, the Partnering Services or any Project:

31.7.1 in certain circumstances without consulting with WEPCo; or

31.7.2 following consultation with WEPCo and having taken their views into account,

provided always that where Clause 31.7.1 above applies a Participant shall, in accordance with the recommendations of the FOIA Code, draw this to the attention of WEPCo prior to any disclosure.

31.8 In the event that WEPCo is or becomes subject to Environmental Information Regulations or FOIA it shall comply with its obligations under Environmental Information Regulations and FOIA. It will use reasonable endeavours to consult the Participant before disclosing Information about them.

31.9 WEPCo shall ensure that all Information held on behalf of a Participant is retained for disclosure for at least the number of years (from the date it is acquired) specified in the relevant Participant Policy relating to records retention and shall permit a Participant to inspect such Information as requested from time to time.

32. CHANGE IN PARTIES TO THE PARTNERING AGREEMENT

32.1 [Subject to complying with applicable Law, the following public bodies may become Participants under this Agreement where the Participants and WEPCo jointly so agree in writing: [■]⁵

32.2 The Participants shall procure that any new Participant shall execute a deed of adherence in substantially the form of the draft attached at Schedule 10 (*Deed of Adherence*).

33. DISPUTE RESOLUTION

Except where expressly provided otherwise in this Agreement, any dispute between the Parties or any of them arising out of or in connection with this Agreement shall be resolved in accordance with the procedure set out in Schedule 22 (*Dispute Resolution Procedure*).

34. ORDER OF PRECEDENCE OF DOCUMENTS

34.1 Inconsistencies between any contract documents in relation to which two or more Parties are party to two or more contract documents shall be resolved in the following order of precedence:

34.1.1 this Agreement; followed by

34.1.2 Project Agreements; followed by

34.1.3 Shareholders Agreements; followed by

34.1.4 all other contract documents to which the relevant Parties are a party.

⁵ Insert List of any Participants named in contract notice (by reference to the Descriptive Document) who do not enter into the SPA at the Commencement Date.

35. **NO RECOURSE TO PUBLIC FUNDS**

35.1 WEPCo shall at all times perform its obligations under this Agreement at its own risk and procure that the Project Service Providers perform their obligations under any Project Agreement at their own risk and in each case without recourse to Government or other public funds or guarantees save:

- 35.1.1 as otherwise expressly provided for elsewhere in this Agreement or the Shareholders Agreements; or
- 35.1.2 with the prior written consent of any Affected Participant;
- 35.1.3 in relation to any New Project, in terms of the approvals obtained pursuant to Schedule 5 (*Approval Process for New Projects*) (for Qualifying Projects) or as otherwise agreed between WEPCo and the relevant Project Agreement Counterparty (for all other Projects).

35.2 WEPCo confirms that it has not applied, and, save in implementation of the SDP, has no intention (as at the date of execution of this Agreement) of applying for any Government or European Union grants or funding or any other public funds or guarantees for the purpose of performing its obligations (or those of its subsidiaries or other Project Service Providers) under this Agreement or any Project Agreement. If WEPCo (or any of its subsidiaries or any other Project Service Providers) is or becomes entitled to apply for any such grants or funding in relation to the carrying out of any of the Services it shall obtain consent from the relevant Participant(s) before submitting the relevant application. The consent of the relevant Participant(s) to WEPCo's (or the relevant subsidiaries' or other Project Service Providers') application may be given on conditions, including a condition that, should WEPCo (or the relevant subsidiaries or other Project Service Provider) receive any such grant or funding, the payments made the relevant Participant(s) to WEPCo (or the relevant subsidiaries or other Project Service Provider, as the case may be) in accordance with this Agreement and/or any Project Agreement will be reduced by the amount of the grant or funding or such lesser amount as the relevant Participant(s) may determine.

36. **RECORDS AND OPEN BOOK ACCOUNTING**

Maintenance and provision of records

36.1 WEPCo shall, and shall procure that each WEPCo Party and Project Service Provider shall, maintain a true and complete set of records of personnel and all activities relating to the performance of this Agreement or any Project Agreement and all transactions related thereto and a complete up to date and orderly documentary record of all transactions entered into by WEPCo, such WEPCo Party or Project Service Provider, as the case may be for the purposes of Supply Chain Agreements including copies of all Supply Chain Agreements and all such other information reasonably required by any of the Participants and/or specified in any Agreement.

Audit and review

36.2 WEPCo shall ensure that:

- 36.2.1 all documents kept pursuant to Clause 36.1 shall be kept in good order and shall be available at all reasonable times for inspection by the Participants, the Participants' Representatives and any third party identified by the Participants, including any Governmental audit organisation, and WEPCo shall make available (or, as the case may

be, procure the availability of) such items of clarification or substantiation as may be required by any of the Participants in relation thereto including such oral or written explanations as may be considered necessary by any of the Participants (acting reasonably); and

36.2.2 WEPCo and any WEPCo Party and Project Service Provider shall provide any Participant with a copy of any or all of the documents referred to in Clause 36.1 free of charge within five (5) Business Days of the Participant's request for the same.

Duration of Retention of Records

36.3 WEPCo shall, and shall procure that each WEPCo Party and Project Service Provider shall, retain all documents referred to in Clause 36.1 (and any other records WEPCo or such WEPCo Party or Project Service Provider, as the case may be, is required to keep under any Project Agreement or Supply Chain Agreement) for a period of not less than six (6) years from that document's creation or coming into that party's possession, whichever is the later. Each of the Participants shall have the right to audit any and all such records at any reasonable time on reasonable written notice during the term of this Agreement and during the six (6) year period following the expiry or termination of this Agreement, whichever is the earlier.

Support to the Participants

36.4 WEPCo shall maintain such contemporaneous records and other documentation as shall be required by any of the Participants to support the Participants in any criminal or civil proceedings by or against the Participants. WEPCo shall ensure that all such records and other documentation are complete and accurate and shall provide all reasonable assistance as may be required by any of the Participants to support any such criminal or civil proceedings. The provisions of this Clause 36.4 shall not apply to proceedings initiated by or against WEPCo under Schedule 22 (*Dispute Resolution Procedure*) or Clause 51.2.

36.5 For the purposes of:

36.5.1 the audit, examination and certification of the Participants' accounts;

36.5.2 any examination or study pursuant to the Public Audit (Wales) Act 2004 of the economy, efficiency and effectiveness with which the Participant has used its resources; or

36.5.3 [an assessment under the Local Government Wales Measure 2009],

the Auditor General for Wales, the Public Accounts Committee of Wales and the Wales Audit Office may examine such documents as they may reasonably require which are owned, held or otherwise within the control of WEPCo (and WEPCo shall procure that any person acting on its behalf who has such documents and/or other information shall also provide access) and may require WEPCo to produce such oral or written explanation as he considers necessary.

36.6 WEPCo shall provide and shall procure that the Supply Chain Members shall provide such information as any of the Participants may reasonably require from time to time to enable them to meet their obligations to provide reports and returns pursuant to regulations, directions or guidance applicable to Participants (in each case as amended, replaced or consolidated from time to time) or as required by

external agencies including, without limitation, reports and returns regarding the physical condition of buildings occupied by the Participants, health and safety, under the Regulatory Reform (Fire Safety) Order 2005, relating to environmental health.

37. PERSONAL DATA

37.1 In this Clause 37, the terms "**Controller**", "**Data Subject**", "**Personal Data Breach**", "**Process**", "**Processor**" and "**Special Categories of Personal Data**" shall have the meanings given to them by the Data Protection Laws. "**Data Loss Event**" shall mean any event that results, or may result, in unauthorised access to Personal Data held under this Agreement, and/or actual or potential loss and/or destruction of Personal Data in breach of this Agreement, including any Personal Data Breach.

37.2 WEPCo undertakes to each of the Participants that it shall comply at all times with its obligations as a separate Controller under the Data Protection Laws. In particular (but without prejudice to the generality of the foregoing) WEPCo:

- 37.2.1 warrants that it has, or will have at all material times, (and shall use best endeavours to procure that all Supply Chain Members and their agents and sub-contractors of any tier have or will have at all material times) Protective Measures in place to protect against unauthorised or unlawful Processing of Personal Data and against accidental loss or destruction of, or damage to, Personal Data held or Processed by it and that it has taken, or will take at all material times, all reasonable steps to ensure the reliability of any of its staff which will have access to Personal Data Processed as part of the WEPCo Operations;
- 37.2.2 undertakes that it will only obtain, hold, process, use, store and disclose Personal Data as is necessary (and only for so long as is necessary) to perform its obligations under and in connection with this Agreement and that such data will be held, processed, used, stored and disclosed in accordance with the Data Protection Laws and any other applicable Law;
- 37.2.3 notify the relevant Participant(s) without undue delay upon becoming aware of any Data Loss Event in respect of the Personal Data;
- 37.2.4 co-operate with the relevant Participant(s), to the extent reasonably requested, in relation to any notifications to the Information Commissioner or to Data Subjects which any Party is required to make following a Personal Data Breach;
- 37.2.5 co-operate with the relevant Participant(s), to the extent reasonably requested in relation to:
 - (a) a request to a Participant from a Data Subject to exercise any right under the Data Protection Laws;
 - (b) any other communication from a Data Subject to a Participant concerning the Processing of their Personal Data; and
 - (c) any communication from the Information Commissioner concerning the Processing of Personal Data, or compliance with the Data Protection Laws.

- 37.2.6 undertakes that it will allow each of the Participants access to any relevant premises on reasonable written notice to inspect its procedures described at Clause 36.2.1 above; and
- 37.2.7 pay an annual fee to the Information Commissioner in accordance with the Data Protection (Charges and Information) Regulations 2018 (unless exempt from the requirement to do so); and
- 37.2.8 undertakes that it will indemnify and keep indemnified each of the Participants against all losses, claims, compensation awards, damages, liabilities, costs and expense (including without limitation, reasonable legal investigatory and consultancy fees and expenses) incurred by them which arises from:
 - (a) any breach of this Clause 37 (*Personal Data*) by WEPCo, any WEPCo Party or the Supply Chain Members or their agents and subcontractors of any tier; and/or
 - (b) any act or omission of WEPCo, any WEPCo Party or the Supply Chain Members or their agents and subcontractors of any tier which results in a breach by a Participant of Clause 37.

38. LIABILITY OF THE PARTICIPANTS

Subject to paragraph 2.3 of Section 2 (*Participant Event of Default Compensation Sum*) of Schedule 14 (*Compensation on Participant Event of Default and Termination*), the liability of each of the Participants under this Agreement is several and no act or omission (including any default or waiver) of any Participant shall bind any other Participant save as expressly set out herein.

39. PROHIBITED ACTIVITIES

WEPCo shall not (and shall procure that none of its Associates shall) during the period when this Agreement is in force carry out any activities which in the reasonable opinion of any of the Participants are incompatible with the provision of Education Sector Services and/or Community Services, as appropriate.

40. NOTICES

40.1 All notices under this Agreement shall be in writing and all certificates, notices or written instructions to be given under the terms of this Agreement shall be served by sending the same by first class recorded post, email or by hand, leaving the same at:

40.1.1 If to WEPCo; c/o [*Insert address*]

40.1.2 If to the Participants: [*Insert respective addresses*]

40.2 Any Party may change its nominated address or email address by prior written notice to the other Parties.

40.3 Notices given:

- 40.3.1 by first class recorded post shall be effective upon the earlier of (i) actual receipt, and (ii) three (3) Business Days after mailing, provided that a notice or other communication is received on a non-Business Day or after 5pm in the place of receipt shall be deemed to be received at 9am on the next following Business Day in such place;
- 40.3.2 by hand shall be effective upon delivery, provided that a notice or other communication is received on a non-Business Day or after 5pm in the place of receipt shall be deemed to be received at 9am on the next following Business Day in such place; and
- 40.3.3 by e-mail shall be deemed to have been received:
- (a) at the time the e-mail enters the Information System of the intended recipient designated by them to receive electronic notices pursuant to this Agreement (as identified by the e-mail address specified in Clause 40.1 or notified from time to time under Clause 40.2) if on a Business Day between the hours of 9am and 4pm,
 - (b) by 11am on the next following Business Day, if the email enters the intended recipient's relevant Information System at any time after 4pm, on a Business Day and before 9am on that next following Business Day,

and provided that no error message indicating failure to deliver has been received by the sender and provided further that within 24 hours of transmission a hard copy of the e-mail signed by or on behalf of the person giving it is sent by post or delivered by hand to the intended recipient in accordance with the provisions of Clause 40.1.

41. **AMENDMENTS**

This Agreement may not be varied except by an agreement in writing signed by duly authorised representatives of all the Parties.

42. **WAIVER**

42.1 Any relaxation, forbearance, indulgence or delay (together "**indulgence**") of any Party in exercising any right shall not be construed as a waiver of the right and shall not affect the ability of that Party subsequently to exercise that right or to pursue any remedy, nor shall any indulgence constitute a waiver of any other right (whether against that Party or any other person).

42.2 The Parties agree that no waiver shall occur or be deemed to have occurred unless or until clear and unequivocal express waiver of a clearly identified default is contained in a written notice by the waiving Party to the defaulting Party expressly for the purpose of effecting such waiver.

42.3 No waiver under Clause 42.2 shall be a waiver of a past or future default or breach, nor shall it amend, delete or add to the terms, conditions or provisions of this Agreement unless (and then only to the extent) expressly stated in that waiver.

43. **NO AGENCY**

43.1 Nothing in this Agreement shall be construed as creating a partnership or as a contract of employment between the Participants (or any of them) and WEPCo.

43.2 Save as expressly provided otherwise in this Agreement, WEPCo shall not be, and shall not be deemed to be, an agent of the Participants or any of them and WEPCo shall not hold itself out as having authority or power to bind the Participants or any of them in any way.

43.3 Without limitation to its actual knowledge, WEPCo shall for all purposes of this Agreement, be deemed to have such knowledge in respect of the Project as is held (or ought reasonably to be held) by WEPCo or any WEPCo Party.

44. **ENTIRE AGREEMENT**

44.1 Except where expressly provided otherwise in this Agreement, this Agreement constitutes the entire agreement between the Parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings concerning the subject matter of this Agreement.

44.2 Each of the Parties acknowledge that:

44.2.1 it does not enter into this Agreement on the basis of and does not rely, and has not relied, upon any statement or representation (whether negligent or innocent) or warranty or other provision (in any case whether oral, written, express or implied) made or agreed to by any person (whether a party to this Agreement or not) except those expressly repeated or referred to in this Agreement and the only remedy or remedies available in respect of any misrepresentation or untrue statement made to it shall be any remedy available under this Agreement; and

44.2.2 Clauses 15.1 and this Clause 44.2 shall not apply to any statement, representation or warranty made fraudulently, or to any provision of this Agreement which was induced by fraud, for which the remedies available shall be all those available under the law governing this Agreement.

45. **SEVERABILITY**

If any provision of this Agreement shall be held to be invalid, unenforceable or unlawful to any extent by the courts of any jurisdiction to which it is subject, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability or legality of the remaining provisions of this Agreement or any other documents referred to in it.

46. **NO DOUBLE RECOVERY**

Notwithstanding any other provisions of this Agreement, no Party shall be entitled to recover or make a claim under this Agreement in respect of any loss or damage that it has incurred to the extent that such Party or, in the case of WEPCo, a Project Service Provider, has previously recovered in respect of such loss pursuant to this Agreement or otherwise.

47. **COSTS AND EXPENSES**

Each Party shall be responsible for paying its own costs and expenses incurred in connection with the negotiation, preparation and execution of this Agreement.

48. **THIRD PARTY RIGHTS**

It is agreed for the purposes of the Contracts (Rights of Third Parties) Act 1999 that this Agreement is not intended to, and does not, give to any person who is not a party to this Agreement any rights to enforce any provision contained in this Agreement save to the extent expressly provided in this Agreement and, to avoid doubt, without prejudice to the rights of any permitted successor to the rights of WEPCo or of any permitted assignee.

49. **MITIGATION**

Each of the Participants and WEPCo shall at all times take all reasonable steps to minimise and mitigate any loss and/or costs and/or expenses for which the relevant Party is entitled to bring a claim against any other Party pursuant to this Agreement and to take all reasonable steps to minimise and mitigate any effects or circumstances and/or events adversely affecting the performance of their obligations under this Agreement which would otherwise entitle that Party to relief and/or to claim compensation hereunder.

50. **FURTHER ASSURANCE**

Each Party shall do all things and execute all further documents necessary to give full effect to this Agreement.

51. **GOVERNING LAW AND JURISDICTION**

51.1 This Agreement shall be considered as a contract made in England and Wales and shall be subject to the laws of England and Wales.

51.2 Subject to the provisions of the Dispute Resolution Procedure, both parties agree that the courts of England and Wales shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Agreement and irrevocably submit to the jurisdiction of those courts.

52. **GENERAL ASSISTANCE AND CO-OPERATION AND PARTICIPANT UNDERTAKINGS**

52.1 Each Party undertakes to co-operate in good faith with the others to facilitate the proper performance of this Agreement and in particular will:

52.1.1 use all reasonable endeavours to avoid unnecessary disputes and claims against the other Parties;

52.1.2 not interfere with the rights of any other Party and its servants, agents, representatives, contractors or sub-contractors (of any tier) on its behalf in performing its obligations under this Agreement nor in any other way hinder or prevent such other Party or its servants, agents, representatives, or sub-contractors (of any tier) on its behalf from performing those obligations; and

52.1.3 (subject to Clause 52.2) assist the other Parties (and their servants, agents, representatives, or sub-contractors (of any tier)) in performing those obligations so far as is reasonably practicable.

52.2 Nothing in Clause 52.1 shall:

52.2.1 interfere with the right of each of the Parties to arrange its affairs in whatever manner it considers fit in order to perform its obligations under this Agreement in the manner in which it considers to be the most effective and efficient;

52.2.2 oblige any Party to incur any additional cost or expense or suffer any loss of profit in excess of that required by its proper performance of its obligations under this Agreement; or

52.2.3 relieve any Party from any obligation under any indemnity contained in this Agreement or from any obligation to pay any debt due or payable under this Agreement.

52.3 Without prejudice to WEPCo's obligation to provide information pursuant to other terms of this Agreement a party (the "**Providing Party**") shall (provided that fulfilling its obligations under this Clause 52.3 does not require it to commit expenditure or time resources of its employees over a level which it considers to be material) supply to any other Party (the "**Requesting Party**") such information as may from time to time be reasonably required by the Requesting Party in relation to the performance of the Requesting Party's obligations under this Agreement and which is within the Providing Party's care and control subject to compliance by the Requesting Party with the provisions of Clause 30 (*Confidentiality*) and save to the extent that the Providing Party is restricted by Law or by any binding confidentiality obligation or undertaking from supplying such information.

52.4 Each of the Participants severally undertakes to WEPCo that it shall:

52.4.1 subject to the provisions of this Agreement, comply with all Laws, Local Government Requirements and Consents applicable to it which relate to the WEPCo Operations;

52.4.2 not wilfully impede WEPCo in the performance of its obligations under this Agreement (having regard always to the interactive nature of the activities of the Participants and of WEPCo and to the Participants' use of the Facilities and Sites to carry out any operations or activities carried out by any of the Participants on or at any Site for the purposes contemplated by this Agreement or any of the Participant's statutory functions);

52.4.3 inform WEPCo as soon as reasonably practicable if at any time it becomes unable to meet any of its financial obligations and in such case inform, and keep WEPCo informed, of any course of action to remedy the situation recommended or required by the [Welsh] Government or other competent authority; and

52.4.4 to the extent permitted by Law, supply to WEPCo within sixty (60) Business Days of their publication, a copy of the Participants' Annual Report and Financial Statement,

PROVIDED THAT, to avoid doubt, nothing in this sub-clause shall in any way fetter the discretion of any of the Participants in fulfilling their statutory functions.

IN WITNESS WHEREOF the parties have executed this Agreement as a Deed the day and year first above written.

SCHEDULES

SCHEDULE 1 - DEFINITIONS, INTERPRETATION AND CONSTRUCTION

1. DEFINITIONS

1.1 In this Agreement, unless the context otherwise requires, the following expressions shall have the following meanings:

| | |
|---|---|
| "21st Century Schools and Colleges (Band B) Programme" | means phase 2 of the 21st Century Schools and Colleges strategic investment programme, led by Welsh Government in collaboration with the Welsh Local Government Association, local authorities, colleges and dioceses; |
| "21st Century Schools and Colleges (Band B) MIM Programme" | means projects comprised within the 21st Century Schools and Colleges (Band B) Programme, where such projects have been expressly approved for funding through MIM, as identified in the draft programme attached at Part 1 of Schedule 8 (<i>Draft 21st Century Schools and Colleges (Band B) MIM Programme</i>) and as may be adjusted from time to time to reflect revised funding allocations under the 21st Century Schools and Colleges (Band B) Programme; |
| "ACBR Enhancements" | has the meaning given in the Template Project Agreement; |
| "Additional Amount" | has the meaning given to it in Clause 16.5; |
| ["Additional Benefits" | means the community benefits listed in Table 3 of the Appendix to Section 3 of Schedule 3 (<i>Key Performance Indicators</i>);] |
| "Additional Community Benefit Project Co Proposals" | has the meaning given in the Template Project Agreement; |
| "Administering Authority" | means the administering authority for each relevant LGPS Fund and the Fund which they administer; |
| "Admission Body" | means a transferee admission body for the purposes of regulations 5 of the LGPS Regulations; |
| "Affect" | in relation to a Participant, a decision of the SPB affects that Participant if: (a) it requires expenditure to be incurred by that Participant; (b) it requires that Participant to incur an actual or |

contingent liability;

- (c) it has an adverse impact upon the manner in which that Participant discharges a statutory function,

and '**Affected Participant**' shall be construed accordingly;

"Affected Authority" means a Participant in relation to whose land and/or facilities Planning Permission and/or a Planning Agreement and/or an Infrastructure Agreement is required to enable Project Services to proceed on or at such land and/or facilities;

"Affordable" means within the capital funding envelope and/or revenue resource parameters, as appropriate determined by the Relevant Participant(s) as available for a proposed New Project;

"Affordability Cap" has the meaning given to it in paragraph 3.1 of Schedule 5 (*Approval Process for New Projects*);

"Agreement" means this agreement;

"Annual Review" has the meaning given to it in Clause 14.18;

"Approval Criteria" has the meaning given to it in paragraph 5.5 of Schedule 5 (*Approval Process for New Projects*);

"Approved" means any project or group of potential projects referred to in a Strategic Outline Programme that has, in either case, fulfilled the Strategic Outline Case Requirements and has been requested by a Participant pursuant to Clause 9.3.1, after the Initial Period;

"Approved Project" means a New Project which is a Qualifying Project and which has Stage 2 Approval;

"Approved Purposes" means such purposes as any Participant may consider appropriate from time to time, including:

- (a) each of the Participants carrying out their duties under this Agreement and/or any statutory functions which each of the Participants may have; and
- (b) following termination of this Agreement and/or the exercise by the Participants of their rights under Clause 23.7, the carrying out of operations the same as, or similar to, the WEPCo Operations, the design and/or construction of the Facilities and/or the operation, maintenance or improvement of the Facilities;

"Asbestos" has the meaning given to it in the Control of Asbestos Regulations

2012;

| | |
|---|---|
| "Asbestos Management Survey" | means a Management Survey as described in Guidance Note HSG264 (Asbestos: The Survey Guide) published by the Health & Safety Executive; |
| "Asbestos Provisional Sum and Programme" | has the meaning given to it in paragraph 4.10.3 of Schedule 5 (<i>Approval Process for New Projects</i>); |
| "Asbestos Schedule" | means the asbestos schedule, in the form set out in Schedule Schedule 21 (<i>Asbestos Schedule</i>) together with any adjustments that WEPCo and the Relevant Participant agree are necessary for each New Project, in advance of the appointment of the Asbestos Surveyor. |
| "Asbestos Surveyor" | means a licensed asbestos surveyor appointed in accordance with paragraph 4.10.1 of Schedule 5 (<i>Approval Process for New Projects</i>); |

| "Project Development Fee Cap" | <p>means, in respect of:</p> <ul style="list-style-type: none"> (a) the New Project Approval Process for each New Project; (b) the work carried out so as to obtain Stage 1 Approval for each New Project; and (c) the work carried out so as to obtain Stage 2 Approval for each New Project, <p>as the case may be, the level of maximum Project Development Fee that can be charged by WEPCo, calculated in accordance with paragraph 2 of Schedule 4 (<i>Partnering Services Costs</i>);</p> |

| | |
|--|--|
| "Project Development Fee Estimate" | means the estimated Project Development Fee, calculated in accordance with paragraph 1.2 of Schedule 4 (<i>Partnering Services Costs</i>); |
| "Project Development Partnering Services" | means the Partnering Services listed in paragraph 1.1.3(b) of Section 1 (<i>Specification</i>) of Schedule 3 (<i>Partnering Services</i>); |
| "Project Execution Plan" | has the meaning given in paragraph 1.3.1(b)(i)(3) of Section 1 (<i>Specification</i>) of Schedule 3 (<i>Partnering Services</i>); |
| "Project Service Provider" | means any person that is obliged, pursuant to a Project Agreement, to provide the Project Services thereunder and, where not WEPCo, is a Subsidiary of WEPCo, or is a PSDP Related Party in the case of MIM Projects; |
| "Project Service Provider Default" | has the meaning given to it in Clause 23.4.3; |
| "Project Services" | means: <ul style="list-style-type: none"> (a) services required to be provided in relation to the design, construction, testing, commissioning and completion of premises (including any temporary works) and the installation of equipment; and/or (b) the provision of FM Services; <p>whether or not in relation to Required Facilities;</p> |
| "Proposed Mitigating Measures" | has the meaning given in Clause 26.2.2(a) (<i>Tax Compliance</i>); |
| "Protective Measures" | means appropriate technical and organisational measures which may include: pseudonymising and encrypting Personal Data, ensuring confidentiality, integrity, availability and resilience of systems and services, ensuring that availability of and access to Personal Data can be restored in a timely manner after an incident, and regularly assessing and evaluating the effectiveness of such measures; |
| "Providing Party" | has the meaning given to it in Clause 52.3; |
| "PSDP(s)" | [◆] Limited (registered No [◆]) whose registered office is at [◆]; |
| "PSDP Related Party" | [means a company which the PSDP holds the majority of the voting rights in, or a Subsidiary of such company;] |
| "PSP Rectification" | has the meaning given in Clause 23.9.2; |

Programme"

"Qualifying Projects"

means:

- (a) the Identified Projects; and
- (b) all other 21st Century Schools and Colleges (Band B) MIM Programme projects, where such project has been identified by a Participant as being required to enable them to provide education based services in the Region;

"Recognition Agreement"

means any agreement or arrangement made by or on behalf of one or more trade unions and one or more employers or employers' associations relating to the recognition of a trade union or unions by an employer to any extent for the purposes of collective bargaining (as defined by section 178(2) of the Trade Union and Labour Relations (Consolidation) Act 1992);

"Related Dispute"

has the meaning given to it in paragraph 8.1 of Schedule 22;

"Related Dispute Notice"

has the meaning given to it in paragraph 8.2 of Schedule 22;

"Region"

means Wales;

"Reinstatement Notice"

has the meaning given in Clause 23.10.1;

"Relevant Authority"

means any court with jurisdiction and any local, national or supra-national agency, inspectorate, minister, ministry, official, public or statutory person of the government of the United Kingdom or the European Union or of the Welsh Ministers or the National Assembly of Wales;

"Relevant Government Departments"

means any Government department;

"Relevant Participant(s)"

has the meaning given to it in paragraph 3.1 of Schedule 5 (*Approval Process for New Projects*);

"Relevant Service Transfer Date"

has the meaning given to it in paragraph 1.1 of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*);

"Relevant Tax Authority"

means HM Revenue and Customs or, if applicable, a tax authority in the jurisdiction in which WEPCo, or, as the case may be, the relevant person is established;

"Relevant Transfer"

means a relevant transfer for the purposes of the Transfer Regulations;

"Relief Event"

has the meaning given to it in the relevant Project Agreement;

| | |
|--|--|
| "Remediation Programme" | has the meaning given in Clause 23.4.1(b)(ii); |
| "Requesting Party" | has the meaning given to it in Clause 52.3; |
| "Requests for Information" | shall have the meaning set out in the FOIA or the Environmental Information Regulations as relevant (where the meaning set out for the term "request" shall apply); |
| "Required Facilities" | means Facilities to be provided or in respect of which services are to be provided pursuant to Qualifying Projects; |
| "Retendering Information" | has the meaning given to it in paragraph 1.9 of Schedule 20 (<i>Handover On Expiry Or Termination</i>); |
| "Review Date" | means each anniversary of the Commencement Date; |
| "RPIX" | means the Retail Prices Index (All Items Excluding Mortgage Interest) as published by the Office for National Statistics from time to time, or failing such publication, such other index as the parties may agree, or as may be determined in accordance with Schedule 22 (<i>Dispute Resolution Procedure</i>), most closely resembles such index; |
| "Satisfactory Planning Permission" | means a Planning Permission which is not subject to an Unreasonable Condition; |
| "SDP" or "Strategic Delivery Plan" | means the Strategic Delivery Plan as set out at Section 1 (<i>Initial SDP</i>) of Schedule 11 (<i>Strategic Delivery Plan</i>) and approved by the SPB as amended from time to time pursuant to Section 2 (<i>Updated SDP</i>) of Schedule 11 and approved by the SPB; |
| "Second Party" | has the meaning given to it in Clause 10.10; |
| "Service Level Specifications" | has the meaning given to it in Schedule Part 1 of each relevant Project Agreement; |
| "Service Provider" | means any person engaged from time to time as may be permitted by this Agreement and/or any Project Agreement to procure the provision of the Services (or any of them); |
| "Services" | means the Partnering Services and the Project Services; |
| "Shareholder" | means a shareholder in WEPCo from time to time; |
| "Shareholders Agreements" | means the WEPCo Shareholders' Agreement and Project Co Shareholders' Agreement; |
| "Shareholder Tax Mitigation Measures Non- | has the meaning given to it in Clause 26.7; |

| | |
|--|---|
| Compliance Notice" | |
| "Shareholder Tax Non-Compliance Notice" | has the meaning given to it in Clause 26.6; |
| "Significant Performance Failure" | means an event identified as such in Section 3 (<i>Performance Measurement</i>) of Schedule 3 (<i>Partnering Services</i>) ⁸ , disregarding the extent to which such failure is attributable to a Relief Event or the occurrence of Force Majeure; |
| "Site" | has the meaning given to it in the relevant Project Agreement; |
| "SPA Material Default" | has the meaning given to it in Clause 23.12; |
| "SPA Material Default Notice" | has the meaning given to it in Clause 23.10.3; |
| "SPB" | means the strategic partnering board as defined in Clause 14.1; |
| "Specific Requirement" | has the meaning given to it in paragraph 3.1.2 of Schedule 5 (<i>Approval Process for New Projects</i>); |
| "Stage 1" | means the stage described at paragraph 4 of Schedule 5 (<i>Approval Process for New Projects</i>); |
| "Stage 1 Approval" | has the meaning given to it in paragraph 4 of Schedule 5 (<i>Approval Process for New Projects</i>); |
| "Stage 2 Approval" | has the meaning given to it in paragraph 5.7.1 of Schedule 5 (<i>Approval Process for New Projects</i>); |
| "Stage 1 Submission" | has the meaning given to it in paragraph 4.1 of Schedule 5 (<i>Approval Process for New Projects</i>); |
| "Stage 2" | means the stage described at paragraph 5 of Schedule 5 (<i>Approval Process for New Projects</i>); |
| "Stage 2 Submission" | has the meaning given to it in paragraph 5.1 of Schedule 5 (<i>Approval Process for New Projects</i>); |
| "Stakeholder Representatives" | has the meaning given to it in Clause 14.1.4; |
| "Strategic Outline Case" | means Welsh Government's requirements from time to time for |

8

Relevant KPI's and calibrations to be agreed with Tenderers during dialogue. It is anticipated that, as a minimum this will provide good coverage across the Ongoing Partnering Services, the Project Development Partnering Services and Project Services. Section 3 of Part 3 of Schedule 3 must be self-contained and capable of clearly identifying what constitutes a Significant Performance Failure and at what frequency these could arise – including whether or not these are assessed annually or more frequently.

| | |
|--|--|
| Requirements" | approval of a Strategic Outline Case; |
| "Strategic Outline Programme" | means a Strategic Outline Programme listing projects to be included in the 21 st Century Schools and Colleges (Band B) Programme, submitted by Participants to Welsh Government dated with a base date of July 2017, as updated from time to time; |

| "Subsidiary" | shall be construed in accordance with section 1159 and 1173 of the Companies Act 2006; |
| "Supply Chain Agreement Dispute" | has the meaning given to it in paragraph 6.1 of Schedule 22; |
| "Supply Chain Agreements" | means the agreements between: <ul style="list-style-type: none"> (a) WEPCo and its direct Partnering Subcontractors; (b) a Partnering Subcontractor and its subcontractors in relation to Partnering Services; and (c) any Project Service Provider and its Service Providers and Contractors, from time to time; |
| "Supply Chain Member(s)" | means any party (except WEPCo or a Project Service Provider) to a Supply Chain Agreement; |
| "Suspension Notice" | has the meaning given in Clause 23.10.1; |
| "Template Project Agreement" | means the relevant form of agreement set out at Sections 1 and 2 of Schedule 7 (<i>Template Project Agreements</i>); |
| "Template Project BIM Agreement" | means the relevant form of agreement set out at Schedule 16 (<i>Template Project BIM Agreement</i>); |
| "Template Project Co Shareholders' Agreement" | means the relevant form of agreement set out at Section 4 of Schedule 7 (<i>Template Project Co Shareholders' Agreement</i>); |
| "Template WEPCo Shareholders' Agreement" | means the relevant form of agreement set out at Section 3 of Schedule 7 (<i>Template WEPCo Shareholders' Agreement</i>); |
| "Tender Process" | has the meaning set out in Schedule 6 (<i>New Project Pricing Report</i>) and "Tendering" shall be construed accordingly; |
| "Track Record Test" | means, assessment of whether the most recent WEPCo Performance Report shows that the WEPCo has met the requirements identified as relevant in [column 6 of Tables 1 to 3 and column 5 of Table 4] of Section 3 (<i>Performance Measurement</i>) |

| | |
|--|---|
| | of Schedule 3 (<i>Partnering Services</i>) ⁹ ; |
| "Transfer Date" | means the date on which a Relevant Transfer occurs; |
| "Transfer Event" | means the occurrence of a Relevant Transfer upon expiry or termination of this Agreement; |
| "Transfer Regulations" | means the Transfer of Undertakings (Protection of Employment) Regulations 2006 (SI No 246); |
| "Transferring Employee" | means any Transferring Participant Employee or Transferring Non-Participant Employee; |
| "Transferring Non-Participant Employee" | means in relation to any service equivalent to a Partnering Service, any persons employed by any organisation or body other than a Participant (including for the avoidance of doubt, any sub-contractor or agent engaged by the Participants) who is wholly or mainly engaged in the provision of that service as at the Transfer Date and who will become an employee of WEPCo or a Partnering Subcontractor on the Transfer Date in accordance with the provisions of paragraph 1 of Section 1 (<i>General</i>) of Schedule 15 (<i>Transfer of Employment and Pensions</i>); |
| "Transferring Participant Employee" | means in relation to any service equivalent to a Partnering Service, all those persons employed by any of the Participants under a contract of employment (excluding, to avoid doubt (without limitation), any person engaged by any of the Participants as an independent contractor or persons employed by any sub-contractor engaged by any of the Participants) who are wholly or substantially engaged in the provision of that service as at the Transfer Date; ¹⁰ |
| "Uninsurable Risk" | in respect of a MIM Project, has the meaning given to it in the relevant Project Agreement; |
| "Unreasonable Conditions" | means any condition, requirement or obligation whether in or proposed to be in a Planning Permission, a Planning Agreement or an Infrastructure Agreement as set out in Schedule 13 (<i>Unreasonable Conditions</i>) PROVIDED ALWAYS that for the purposes of this Agreement, none of the following constitute an Unreasonable Condition: |

⁹ Relevant KPIs and calibrations to be agreed with Bidders during dialogue – Section 3 of Part 3 of the Schedule 3 must be self-contained and capable of clearly identifying what constitutes a pass or failure on the Track Record Test (see Table 5 in this regard).

¹⁰ Schedule 15 is drafted on the basis that the employer of the Transferring Employees is a party to the Strategic Partnering Agreement. In the event that the employer is not a party to the Strategic Partnering Agreement, then any employees who are to transfer will be considered to be Transferring Non-Participant Employees for the purposes of these provisions. This will need to be considered further on a case-by-case basis.

- (a) any condition, requirement or obligation which has been volunteered in writing by the parties or has been acknowledged to be acceptable by them in writing prior to its imposition; or
- (b) any condition, requirement or obligation which is agreed or deemed or determined pursuant to the provisions of this Agreement not to be an Unreasonable Condition;

"Unsuitable Person"

means either:

- (a) any person who has a material interest in the manufacture, production, sale or distribution of [pornography,] [arms and weapons or] tobacco products and/or alcoholic drinks; or
- (b) [any person whose tax returns submitted on or after 1 October 2012 have been found to be incorrect as a result of:
 - (i) HM Revenue and Customs successfully challenging it under the General Anti-Abuse Rule ("**GAAR**") or the Halifax Abuse Principle;
 - (ii) the Relevant Tax Authority challenging it under any tax rules or legislation that have an effect equivalent or similar to the GAAR or the Halifax Abuse Principle; and/ or
 - (iii) the failure of an avoidance scheme which the person was involved in and which was, or should have been, notified under the DOTAS or any equivalent or similar regime in a jurisdiction in which the person is established;
- (c) any person whose activities are, in the reasonable opinion of the Participants, incompatible with the provision of Education Sector Services and/or Community Services (as applicable) in the Region; or
- (d) any person whose activities, in the reasonable opinion of the Participants, pose or could pose a threat to national security;

"VAT"

means value added tax at the rate prevailing at the time of the relevant supply charged in accordance with the provisions of the Value Added Tax Act 1994;

"VAT Sum"

has the meaning given to it in Clause 10.12;

| | |
|--|--|
| "Welsh Government" | means the government of Wales, established pursuant to the Government of Wales Act 2006; |
| "Welsh Language Standards" | means the [Welsh Language Standards (No.1) Regulations 2015]; ¹¹ |
| "Welsh Ministers" | means the Welsh Ministers, appointed pursuant to Section 48 of the Government of Wales Act 2006 and their successors; |
| "WEPCo Board" | means the board of directors from time to time of WEPCo, as constituted in accordance with the WEPCo Shareholders' Agreement; |
| "WEPCo Event of Default" | has the meaning given to it in Clause 23.1; |
| "WEPCo Operations" | means the management and provision of the Partnering Services and the performance of all other obligations of WEPCo under this Agreement from time to time; |
| "WEPCo Party" | means any of WEPCo's agents (including WEPCo's Representative), subsidiaries and contractors (including without limitation any Partnering Subcontractor and any Project Service Provider) and its or their subcontractors of any tier and its or their directors, officers, employees and workers in relation to the provision of Services arising out of this Agreement and "WEPCo Parties" shall be construed accordingly; |
| "WEPCo Performance Report" | means a report to be issued by WEPCo reporting on WEPCo's performance and the performance of Partnering Subcontractors, Project Service Providers and Supply Chain Members against the Key Performance Indicators, in respect of the period ending on the most recent Review Date, including analysis of whether the Track Record Test has been passed or failed and identifying any Significant Performance Failures or potential Significant Performance Failures; |
| "WEPCo's Representative" | means the person appointed by WEPCo pursuant to Clause 12; |
| "WEPCo Shareholder" | means a shareholder in WEPCo from time to time; |
| "WEPCo Shareholders' Agreement" | means an agreement dated on or around today's date among WEPCo, PSDP(s) and WGC, including any agreement relating to the subscription of equity (or other shareholder funding) by the shareholders of WEPCo in WEPCo or any Holding Company of WEPCo; |

¹¹ Include reference to relevant Regulations under Welsh Language (Wales) Measure 2011.

"WEP Objectives"

means the following key objectives of the WEP Strategic Partnering Delivery Model across Wales:

- (a) the achievement of well-being goals under the Well-being of Future Generations (Wales) Act 2015, to improve the social, economic, environmental and cultural well-being of Wales through infrastructure development;
- (b) to provide enhanced local services by increasing the scale of joint service working and integration across Wales to deliver greater efficiency in procurement and better outcomes at the point of service delivery;
- (c) to deliver a sustained programme of joint asset management and investment into education and community based facilities and developments;
- (d) to establish a more efficient and sustainable procurement methodology for public sector bodies that:
 - (i) reinforces joint strategic planning and delivery;
 - (ii) is stable and long-term;
 - (iii) delivers demonstrably better value for money than current procurement arrangements;
 - (iv) is flexible in its ability to respond to evolving service strategies and in being able to deliver through different contractual/ funding routes;
 - (v) is able to generate sufficient project size, volume and deal flow to attract private finance into the delivery and long-term management of the service;
 - (vi) increases opportunities for local employment and training; and
 - (vii) provides a focus for community engagement;
- (e) to share learning and improve the procurement process;
- (f) to deliver facilities that meet public sector policy objectives for design quality and sustainability; and
- (g) to facilitate and improve the level of stakeholder engagement in the planning of services and development of facilities for Education Sector Services and Community

Services;

| | |
|------------------------------------|--|
| "WCo" | means [◆]; |
| "Works" | means the design (including the preparation of all Design Data), construction, testing, commissioning and completion of Facilities (including any temporary works) and the installation of any equipment to be performed in accordance with a Project Agreement (as varied or supplemented from time to time in accordance with the provisions of the relevant Project Agreement); |
| "Works and Facilities Information" | means all materials, documents and data relating to the proposed design or construction of Works, the operation and maintenance of Facilities and other matters relevant thereto supplied or made available to WEPCo or any of its nominees or any Project Service Provider by or on behalf of any of the Participants from time to time; |

2. INTERPRETATION

This Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning.

- 2.1 The headings and marginal notes and references to them in this Agreement shall be deemed not to be part of this Agreement and shall not be taken into consideration in the interpretation of this Agreement.
- 2.2 Except where the context expressly requires otherwise, references to:
- 2.2.1 clauses, sub-clauses, and Schedules are references to clauses, sub-clauses of and Schedules to this Agreement;
 - 2.2.2 references to paragraphs, sub-paragraphs, and Appendices are references to paragraphs and sub-paragraphs of and appendices to Schedules (or Sections of Schedules) to this Agreement;
 - 2.2.3 Sections are references to sections of Schedules to this Agreement; and
 - 2.2.4 Attachments (if any) are references to attachments to or contained in this Agreement.
- 2.3 The Schedules and any Appendices or Attachments to this Agreement are an integral part of this Agreement and a reference to this Agreement includes a reference to the Schedules, Appendices and the Attachments.
- 2.4 Words importing persons shall, where the context so requires or admits, include individuals, firms, partnerships, trusts, corporations, governments, governmental bodies, authorities, agencies, unincorporated bodies of persons or associations and any organisations having legal capacity.

- 2.5 Where the context so requires words importing the singular only also include the plural and vice versa and words importing the masculine shall be construed as including the feminine or the neuter or vice versa.
- 2.6 The language of this Agreement is English. All correspondence, notices, drawings, test reports, certificates, specifications and information shall be in English. All operating and maintenance instructions, name plates, identification labels, instructions and notices to the public and staff and all other written, printed or electronically readable matter required in accordance with, or for purposes envisaged by, this Agreement shall comply with Welsh Language Standards (including any amending, supplemental or replacement law from time to time) and shall be bilingual (in English and Welsh), where required by the Participants, provided that all operating and maintenance instructions (and any other complex technical documents) are permitted in English only.
- 2.7 References to any agreement or document include (subject to all relevant approvals and any other provisions of this Agreement concerning amendments to agreements or documents) a reference to that agreement or document as amended, supplemented, substituted, novated or assigned.
- 2.8 References to any Law are to be construed as references to that Law as from time to time amended or to any Law from time to time replacing, extending, consolidating or amending the same.
- 2.9 References to a public organisation (other than a Participant) shall be deemed to include a reference to any successor to such public organisation or any organisation or entity which has taken over either or both the functions and responsibilities of such public organisation. References to other persons (other than WEPCo or a Participant) shall include their successors and assignees.
- 2.10 References to a deliberate act or omission of a Participant or any Participant Party shall be construed having regard to the interactive nature of the activities of the Participants and of WEPCo and the expression shall exclude acts or omissions which were within the contemplation of the parties or which were otherwise provided for in this Agreement or in any Project Agreement.
- 2.11 The words in this Agreement shall bear their natural meaning. The parties have had the opportunity to take legal advice on this Agreement and no term shall, therefore, be construed contra proferentem.
- 2.12 Reference to "Parties" means the parties to this Agreement and references to a "Party" mean one of the parties to this Agreement.
- 2.13 In construing this Agreement, the rule known as the ejusdem generis rule shall not apply nor shall any similar rule or approach to the construction of this Agreement and accordingly general words introduced or followed by the word "other" or "including" or "in particular" shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- 2.14 All of WEPCo's obligations, duties and responsibilities shall be construed as separate obligations, duties and responsibilities owed to the Participants (or a Participant, as the case may be) and to be performed at WEPCo's own cost and expense.

2.15 References to amounts or sums expressed to be "index linked" are, unless expressly stated otherwise, references to amounts or sums as adjusted on each anniversary of the Commencement Date in accordance with the following formula:

$$\text{Amount or sum} \times (\text{RPIXd} / \text{RPIX0})$$

Where RPIXd is the value of the Retail Prices Index (All Items Excl Mortgage Interest) published or determined with respect to the month most recently preceding the relevant anniversary of the Commencement Date and RPIX0 is the value of the Retail Prices Index (All Items Excl Mortgage Interest) in respect of [♦].

2.16 [Reference to a document being in the "agreed form" is a reference to the form of the relevant document agreed between the parties and for the purpose of identification initialled by each of them or on their behalf.]

2.17 Where this Agreement states that an obligation shall be performed "no later than" or "within" or "by" a stipulated date or event which is a prescribed number of Business Days after a stipulated date or event, the latest time for performance shall be noon on the last Business Day for performance of the obligations concerned.

2.18 Where this Agreement states that an obligation shall be performed "no later than" or "by" a prescribed number of Business Days before a base date or "by" a date which is a prescribed number of Business Days before a base date, the latest time for performance shall be noon on the last Business Day for performance of the obligations concerned.

2.19 References to this Agreement, a Project Agreement or a Shareholders' Agreement or to a provision thereof shall be construed at a particular time as a reference to it as it may have been amended, varied, supplemented, modified or appended.

2.20 A person, being a company, shall be "controlled" by another person if that other person owns a majority of the voting equity of that person or controls the majority of the votes at meeting of the board of directors of that person.

2.21 A "**parent undertaking**" or "**subsidiary undertaking**" has the meaning set out in section 1162 and Schedule 7 of the Companies Act 2006.

2.22 A body corporate is in the "same group" as another body corporate where:

2.22.1 it is a subsidiary undertaking of such body corporate;

2.22.2 it is a parent undertaking of such body corporate; or

2.22.3 it is a subsidiary undertaking of the parent undertaking of such other body corporate.

SCHEDULE 2 - COMPLETION DOCUMENTS

SECTION–1 - DOCUMENTS TO BE DELIVERED BY WEPCO

1. Unless an original document is specifically requested, a copy (certified by an officer of WEPCo as being a true copy) of each of the following documents is to be delivered by WEPCo to each Participant's Representative:

- 1.1 The WEPCo Shareholders' Agreement and certification from WEPCo that the WEPCo Shareholders' Agreement has become (or will become, simultaneously with delivery of the other documents referred to in this Schedule 2 (*Completion Documents*)) unconditional in accordance with its terms, accompanied by evidence of the same.
- 1.2 Extracts from the minutes of the meeting of the board of directors (certified as true and accurate by a director or the secretary of the relevant company) of each of WEPCo and the PSDP, at which resolutions were passed approving the execution, delivery and performance of each relevant document to which such person is expressed to be a party and in each case authorising a named person or persons to execute and deliver each such document and any other documents to be delivered by it pursuant to it.
- 1.3 Evidence of the share subscriptions required under the WEPCo Shareholders' Agreement having been made by the Shareholders in WEPCo.
- 1.4 WEPCo's Certificate of incorporation and of any certificate of incorporation on change of name.
- 1.5 The memorandum and articles of association of WEPCo.
- 1.6 Evidence of the insurances required in accordance with Clause 17 (*Insurance*) having been taken out by WEPCo and that the policies comply with the requirements of this Agreement.
- 1.7 [Management Services Agreement between WEPCo [and the PSDP] properly executed by each party thereto].
- 1.8 Supply Chain Agreements in respect of delivery of the Partnering Services.¹²

¹² It is expected any key supply chain agreements relating to the delivery of the Partnering Services (only) shall be in place with the execution of the SPA – exact details will be specific to the PSDP and completed during the Selected Bidder period.

SECTION-2 - DOCUMENTS TO BE DELIVERED BY THE PARTICIPANTS

1. Each Participant shall deliver to WEPCo a certified copy of the board or committee resolution of that Participant approving the execution, delivery and performance of this Agreement and in each case authorising a named person or persons to execute and deliver each such document and any documents to be delivered by it pursuant thereto.
2. [The Participants shall deliver to WEPCo a certified copy of WCo's formal approval to sign the WEPCo Shareholders' Agreement.]

SCHEDULE 3 - PARTNERING SERVICES

SECTION 1 - SPECIFICATION

1. PARTNERING SERVICES OBLIGATIONS

1.1 General Requirements

1.1.1 Required Outcome

- (a) The provision of the Partnering Services in a collaborative fashion to achieve the WEP Objectives and the objectives set out in the SDP and in particular, the provision and demonstration of overall value for money of New Projects and Project Services, and in relation to Partnering Services continuous improvement and value for money:
 - (i) through synergy between WEPCo and the Participants;
 - (ii) through the identification and thorough appraisal of all practical options for the delivery of the SDP in order to ensure the optimal solution is applied in every case;
 - (iii) through effective supply chain management in the broadest sense;
 - (iv) by exploiting the benefit of repeat work as an incentive for efficiency and high quality performance wherever appropriate;
 - (v) through the efficient and effective development and delivery of New Projects;
 - (vi) by developing a joint commitment to common goals;
 - (vii) by accurately measuring and reporting performance; and
 - (viii) by adopting open-book accounting techniques.
- (b) WEPCo shall comply with Section 2 (*Quality Systems*) of this Schedule 3 (*Partnering Services*) and shall ensure that the Partnering Services are carried out in accordance with the plans referred to therein (save to the extent anything within the terms of such plans is in conflict with any provision of this Agreement, in which case WEPCo shall update said plans to remove the conflict forthwith).

1.1.2 Scope

- (a) Value planning shall be carried out to ensure that WEPCo and the Participants are mutually supportive and undertake only those tasks for which they are best suited and to ensure that:
 - (i) each of the Participants receive optimal value for money in the Partnering Services provided by WEPCo and its supply chain;

- (ii) each of the Participants receive optimal value for money in all Approved Projects, and in particular Project Services procured from WEPCo and its supply chain;
- (iii) risk allocation is, subject to the terms of this Agreement, equitable and appropriately apportioned between the parties; and
- (iv) openness and accountability can be demonstrated to the appropriate governance authorities for public sector organisations.

1.1.3 The services described in this Section 1 (*Specification*) of Schedule 3 (*Partnering Services*) are classified as follows:

- (a) Ongoing Partnering Services, being constant or recurring Partnering Services, which shall include:
 - (i) Partnering and Collaborative Working;
 - (ii) Partnering Service Supply Chain Establishment and Overall Management; and
 - (iii) Value for Money.
- (b) Project Development Partnering Services, being Partnering Services provided by WEPCo in connection with the development of New Projects, which shall include:
 - (i) New Project Development and Delivery;
 - (ii) Supply Chain Establishment for each New Project;
 - (iii) Funding; and
 - (iv) Value for Money.
- (c) Strategic Support Partnering Services that may be required by the Participants or any of them such as:
 - (i) Strategic Estate Planning;
 - (ii) Service Planning; and
 - (iii) Value for Money.

For the avoidance of doubt, the provisions of Clause 9.1 do not apply to this category of Partnering Services. Partnering Services of this classification may be individually procured by one or more Participant pursuant to Clause 9.3, on an ad-hoc basis on terms and conditions appropriate for the particular circumstances.

Ongoing Partnering Services**1.2.1 Partnering and Collaborative Working****(a) Required outcome**

- (i) Successful development and delivery of the SDP as part of WEPCo's membership of the SPB.
- (ii) The establishment and development of the SPB which effectively oversees, monitors, supports and reviews the development and achievement of the SDP over the term of this Agreement. The SPB shall serve as a forum for the open exchange of ideas and knowledge and to enable the Participants and WEPCo to discuss forthcoming accommodation and service delivery requirements to ensure an integrated, co-ordinated and practical approach to fulfilling such requirements.

(b) Scope

- (i) WEPCo shall perform its obligations under Section 2 (*Updated SDP*) of Schedule 11 (*Strategic Delivery Plan*) in relation to the SDP.
- (ii) WEPCo shall ensure the effective delivery of the SDP in a manner which demonstrably provides value for money to the Participants.
- (iii) WEPCo shall support the development of the SPB through activities including, but not limited to:
 - (1) attending and actively contributing to each meeting of the SPB; and
 - (2) providing all necessary and adequate information, reports and documentation (including the information and reports required in terms of Clause 14).
- (iv) WEPCo shall work closely with the Participants to ensure continuous improvement in the delivery of WEPCo services in the Region and implement effective and measurable performance management.
- (v) Provide all necessary information to Participants in relation to the identification and development of Participants' New Project Requests.
- (vi) Develop and implement measures to ensure timely delivery of Approved Projects.

(c) **Ancillary activities**

It is anticipated that in order to support the development, regular update and delivery of the SDP, including stimulating and promoting community involvement in the delivery of the SDP (which are key aims and objectives of the Participants), WEPCo shall work with the Participants to successfully build and deliver a long-term partnership including;

- (i) developing and maintaining relationships and working closely with local stakeholders from each Participant, local authority departments, local businesses and the wider community to ensure ownership and support for the SDP;
- (ii) developing and maintaining close relationships with Participants and local stakeholders to understand their strategic and local drivers and constraints in order to support delivery of the SDP;
- (iii) developing and maintaining an awareness and understanding of the SDP, and how this fits into the Participants' corporate vision and strategy;
- (iv) developing and maintaining an awareness and understanding of Participants' sustainability strategies;
- (v) developing and maintaining an awareness and understanding of how shared community facilities and services may be appropriate and can contribute to delivering integrated services, community services and regeneration with the Region;
- (vi) developing and maintaining an understanding of national and local policies on major public sector strategic documents, policies, targets, timeframes etc and the impact they may have on New Projects;
- (vii) supporting the Participants in the efficient identification and maximisation of opportunities to acquire new sites or dispose of existing sites;
- (viii) maintaining an awareness of future changes in legislation that may impact the SDP and reporting these to the SPB in a timely manner;
- (ix) actively participating with each of the Participants and other stakeholders within other agencies and organisations in the identification of common goals for improving local communities through improved provision of services; and
- (x) building close working relationships with external agencies and other interested organisations as part of the SDP development process and in connection with the development of New Projects.

For the avoidance of doubt, such activities specified in this paragraph (c) shall be an integral part of WEPCo's overall service delivery but shall be excluded from the Clause 9.1 sole and exclusive right and obligation provision and shall not be subject to any specific or additional payment.

1.2.2 Partnering Services Supply Chain Establishment and Overall Management

(a) **Required outcome**

- (i) The establishment of a supply chain that has the experience, ability and resources to deliver, across the whole of the Region, the services required of Participants to deliver the SDP and all Approved Projects.
- (ii) Selection of supply chain partners and ongoing management of supply chain such that optimal performance and value for money is achieved.

(b) **Scope**

(i) **Establish WEPCo's Supply Chain for Partnering Services**

- (1) WEPCo shall select and appoint a supply chain commensurate with the Participants' values, goals and vision having regard to a number of areas including, but not limited to, health and safety, commitment to delivery of community benefits, quality and sustainability. Subject to the terms of this Agreement, the supply chain will be established and managed in a manner that will:
 - (A) optimise and clearly demonstrate value for money;
 - (B) ensure the effective performance of the Project Services and the other Partnering Services;
 - (C) provide optimal risk transfer to achieve certainty of delivery;
 - (D) mitigate the risk of time and/or cost overrun;
 - (E) secure and maximise tangible benefits from repeat business and long-term business relationships, where appropriate;
 - (F) deliver and demonstrate continuous improvement in the delivery of the Partnering Services over the term of this Agreement; and
 - (G) be undertaken in a transparent and auditable manner with clearly identified selection criteria and evaluation methodology and so as to satisfy

the SPB (under exclusion of WEPCo's representative) that decisions have been made on a proper, arm's length basis where WEPCo proposes to include within the supply chain any B Shareholder Member or any Associate of any of WEPCo, the PSDP or any B Shareholder Member.

- (2) The assessment and selection of supply chain partners shall be conducted following a robust and clear procedure with suitable levels of checking to ensure that supply chain partners are selected with the ability to demonstrate:
 - (A) appropriate professional accreditation;
 - (B) financial robustness;
 - (C) capacity to undertake the required services;
 - (D) established and successful management systems including quality, environment and health and safety;
 - (E) sufficient resources;
 - (F) an appropriate level of support to the key resources;
 - (G) an appropriate level of quality in deliverables; and
 - (H) a proven track record in terms of relevant experience in relation to capital and revenue funded education and/or community projects, as appropriate.
- (3) WEPCo shall establish supply chain agreements based on goals common to those of WEPCo, the Participants and service users.

(ii) **Manage performance of Supply Chain partners**

- (1) Performance of supply chain partners shall be reviewed in accordance with WEPCo's continuous improvement targets and performance measurement requirements in Section 3 (*Performance Measurement*) of Schedule 3 (*Partnering Services*).
- (2) WEPCo shall, where appropriate, promote long-term high-quality working relationships between WEPCo and the supply chain to benefit the Participants and service users in terms of quality outcomes and value for money.

- (3) WEPCo shall ensure the effective measurement of Supply Chain Member performance and implement robust, transparent, auditable and effective processes (clearly dealing with any conflicts of interest, potential or actual) for removal of under-performing supply chain partners from the supply chain.
- (4) The testing of performance of supply chain partners should be undertaken, as a minimum, on an annual basis, and should include, but not be limited to, their:
 - (A) performance against the supply chain selection criteria;
 - (B) ability to complete their agreed scope of works in accordance with WEPCo's [Quality System];
 - (C) ability to provide a service that continues to demonstrate value for money;
 - (D) capacity to undertake the required services in a manner which promotes partnership working; and
 - (E) continuing ability to demonstrate that their practices and principles are aligned with those of the Participants.
- (5) Reporting on performance of supply chain partners shall be undertaken annually.
- (6) The output of this annual review shall be reported to the SPB along with any proposed actions.
- (7) The output of the review will be used to ensure any lessons learned are communicated and applied with the supply chain partners and fed back into future New Projects in order to demonstrate continuous improvement.

(iii) **Partnering Services Supply Chain Refresh**

- (1) WEPCo shall develop and implement robust, transparent and auditable processes (clearly dealing with any conflicts of interest, potential or actual) for:
 - (A) performance measurement, performance management and periodic review of the Supply Chain Members;
 - (B) (not less than every two (2) years) carrying out a full review and assessment of the performance of

incumbent Supply Chain Members and implementing a robust, transparent and auditable open-market exercise in respect of Partnering Services, to select the most appropriate new supply chain members so as to update its supply chain by the addition, removal, retention and/or substitution of its members from time to time (such process being known as the "**Partnering Services Supply Chain Refresh**"),

in either case, so as to maintain a high quality and value for money service.

- (2) In reviewing the performance of individual supply chain partners, WEPCo shall consider the ongoing performance of the supply chain partner in comparison to the open market of suppliers able to provide the required services and to other supply chain partners providing comparable services.
- (3) The output of such periodic review shall be reported to the SPB along with any proposed actions.
- (4) WEPCo should ensure that its proposals for updating the supply chain (whether by removing, replacing or adding supply chain partners) take into account the whole range of consultants and suppliers who can demonstrate an ability to meet the requirements imposed under this Agreement in relation to the Region.
- (5) The review and updating of the supply chain (whether by removing, replacing or adding supply chain partners) from time to time, shall be undertaken in a transparent and auditable manner with clearly identified selection criteria and evaluation methodology and so as to satisfy the SPB (under exclusion of WEPCo's representative) that decisions have been made on a proper, arm's length basis where WEPCo proposes to retain or include within the supply chain the PSDP, any B Shareholder Member or any Associate of any of WEPCo, the PSDP or any B Shareholder Member from time to time.
- (6) The selection of new supply chain partners shall be commensurate with the principles and guidelines set-out in paragraph 1.2.2(b)(i) above.
- (7) The selection of new supply chain partners shall ensure that innovative, sustainable and cost effective approaches, if applicable, appropriate and add value, are rewarded.

1.2.3 Value for Money

(a) **Required outcome**

- (i) The provision of value for money to the Participants, and the wider community, over the term of this Agreement in relation to Ongoing Partnering Services.

(b) **Scope**

- (i) Achieve value for money in the delivery of Ongoing Partnering Services across the Region through the following:
- (1) operating a planned and structured programme for reviewing and improving the ongoing performance of WEPCo and its supply chain;
 - (2) effective monitoring and measurement of actual cost over the term of this Agreement including the collection and verification of actual cost data; and
 - (3) effective management of Partnering Services Costs and the Participants' transaction costs through the removal of unnecessary duplication, the development of close partnership working, the early engagement of Funders and the Supply Chain Members, and the appropriate use of standardisation and innovation.
- (ii) Continuous improvement in value for money over the term of this Agreement through measurable improvements in outcomes and/or reductions in the overall and elemental cost of Partnering Services over the term of this Agreement.
- (iii) The review and, where value for money, refresh of the Partnering Services supply chain or other effective demonstration of value for money where appropriate, in all cases in accordance with the provisions of Section 4 (*Partnering Services Costs Rates*) of Schedule 3 (*Partnering Services*) and Schedule 4 (*Partnering Services Costs*).
- (iv) The provision of elemental cost data (both estimated and actual) from each Approved Project as necessary for the demonstration of value for money and/or for inclusion in a WEP Strategic Partnering Delivery Model benchmarking database, all in accordance with Clause 13 (*Value for Money*).
- (v) Contribute to improvements in Participants' value for money in the delivery of Education Sector Services and/or, where applicable. Community Services through improvements in efficiency and operating cost of facilities through economies of scale and/or any other measures applicable.

Project Development Partnering Services

1.3.1 New Project Development and Delivery

(a) Required Outcome

- (i) New Projects developed in a robust and transparent basis with clear understanding of Participant requirements as to risk, cost and programme.
- (ii) New Projects developed bringing leading edge design quality and innovation including clear emphasis on health and safety and sustainability.
- (iii) New Projects developed that enable improved education service delivery and optimal value for money to Participants.
- (iv) New Projects taken effectively and efficiently through optioneering, feasibility, outline business case, final business case and contract award (as required) in a planned, structured and managed process.
- (v) Improvement in the speed, quality and cost of delivering New Projects.
- (vi) The enhancement of affordability and value for money through shared use, the development of multi-purpose buildings and the attraction of private sector tenants and other third party incomes, where requested.

(b) Scope

(i) Stage 1

- (1) The provision of all the information reasonably required to achieve Stage 1 Approval. This should comprise provision of choice to the Relevant Participants and sufficient information to inform that choice and to ensure the best available value for money option is identified in each case, including but not limited to:
 - (A) critical success factors for the New Project;
 - (B) site selection including location, acquisition and development cost, where requested;
 - (C) future flexibility and adaptability of the site;
 - (D) design of the facilities taking into account functionality, flexibility and whole life cost, together with suitable warranties allowing the

Contractor and design team appointed at Stage 2 to rely on and use such concept designs;

- (E) specific requirements for the development and operation of the facilities;
 - (F) interfaces with other public or private organisations and the impact this may have on the Facilities including any opportunity for improving efficiency of service through sharing of all, or parts, of the facilities; and
 - (G) facilities management and service delivery requirements.
- (2) Consistency of approach to development and delivery of New Projects to measure, understand and work with each of the Participants to facilitate continued improvement.
 - (3) WEPCo shall provide a detailed Project execution plan including critical success factors for the New Project programme, stakeholder engagement plan, communication plan, BIM Execution Plan, deliverable list, roles and responsibility matrix and risk register covering the Stage 1 activities ("**Project Execution Plan**").
 - (4) WEPCo shall monitor their performance of New Project Stage 1 development and through appropriate and agreed measures, highlight lessons learnt and include these with that continuous improvement process.
 - (5) For the purposes of the CDM Regulations, conduct appropriate competency assessments of potential Principal Designers (who may be Supply Chain Members) on behalf of the Relevant Participant(s) in their capacity as "Client" (which shall have the meaning ascribed to it in the CDM Regulations) for the potential New Project and so as to ensure the Relevant Participant(s) are able to discharge the relevant obligations of the Client under the CDM Regulations in that regard.
 - (6) Recommend to the Relevant Participant(s) an appropriate person or persons whom the Relevant Participant(s) (or one of them) in their capacity as "Client" for purposes of the CDM Regulations may wish to appoint as Principal Designer in respect of the New Project as a whole (in this regard, all Parties recognising that the preference would be for the same Principal Designer to continue in role once the Project

Service Provider takes over as "Client" pursuant to the relevant Project Agreement).

- (7) Where any activities to be carried out as referred to in paragraphs 4.2.3(b) to 4.2.3(g) of Schedule 5 (*Approval Process for New Projects*) are notifiable for purposes of the CDM Regulations, WEPCo shall elect to be the Client in respect of such works and shall discharge the roles and responsibilities incumbent on the Client in respect of such activities under the CDM Regulations. WEPCo shall ensure that the Relevant Participant(s) are timeously supplied with a copy of each and every health and safety file prepared by the relevant Principal Designer in respect of such notifiable activities.

(ii) **Stage 2**

- (1) WEPCo will update the Project Execution Plan for Stage 1 to include all Stage 2 activities.
- (2) WEPCo shall progress each New Project from Stage 1 Approval to Stage 2 Approval in an efficient, effective and timely manner.
- (3) WEPCo shall develop the Stage 1 designs, to include identification and, wherever appropriate, the realisation of every opportunity to:
 - (A) provide desirable extras;
 - (B) create a focal point for the community through mixed public use etc, where requested;
 - (C) attract complementary private sector business income;
 - (D) provide high-quality, well-located and appointed environments; and
 - (E) develop flexible, "future-proof" buildings which inspire staff and service users and provide a focal point for the community.
- (4) WEPCo shall work with the Relevant Participant(s) to develop and understand the facilities management (FM) requirements for New Projects.
- (5) Where required by the Relevant Participant(s), WEPCo shall develop specific proposals in relation to carrying out the FM services on a New Project.

- (6) Conduct, on behalf of the Relevant Participant(s) in their capacity as "Client" for purposes of the CDM Regulations appropriate competency assessments of any potential Principal Contractors so as to discharge the relevant obligations of the Client under the CDM Regulations in that regard.

(iii) **General**

For the avoidance of doubt, this paragraph (iii) applies to all stages throughout the development of New Projects.

(1) **Design Approach**

WEPCo shall:

- (a) have the expertise to carry out feasibility studies, option appraisals, and inspirational designs in line with the project requirements from the SDP, a brief or output specification;
- (b) utilise best practice on all New Projects and implement lessons learnt from the wider WEP Strategic Partnering Delivery Model and industry as a whole. This shall include lessons learnt and requirements identified by the Participants; and
 - (i) agree with the Participants, and adopt, appropriate and current design quality toolkits to support the design development of New Projects, such as BREEAM

(2) **Health and Safety**

- (ii) WEPCo shall take a leading role in ensuring that health and safety requirements are met during the development and construction of New Projects; and
- (iii) WEPCo shall advise and support the Relevant Participant(s) in their capacity as Client to perform its duties as a "client" pursuant to the CDM Regulations.

(3) **Community Inclusion**

- (a) WEPCo shall ensure that it includes local communities in the development of New Projects

and associated community improvement initiatives.

- (b) WEPCo shall ensure the enhancement of user satisfaction by developing and designing facilities that present a focal point for the community through, where applicable, multi-use including complementary businesses and services such as fitness centres, cafeterias etc.
- (c) WEPCo shall understand and have expertise in the management, operating and design implications of extended facilities and out-of-hours community use, including considerations for:
 - (i) good signage both external and internal;
 - (ii) access, external lighting and car parking;
 - (iii) heating controls for use outside normal hours;
 - (iv) changing facilities, reception and social areas for community use accessible for use outside normal hours; and
 - (v) facilities used for community use grouped for ease of access, security and zoned heating.

(4) **Facility Interaction**

WEPCo shall be fully aware, and have expert knowledge of, the relationships between operational infrastructure and the built environment and understand the specific issues within the New Project development that require specific solution regarding integration/separation and interface, including but not limited to:

- (a) Security;
- (b) Access;
- (c) ICT;
- (d) Fire Management;
- (e) Cleaning; and
- (f) Confidential or contaminated waste.

(5) **Innovation**

- (a) WEPCo shall ensure that appropriate consideration is given to innovation in the design and development of New Projects.
- (b) WEPCo shall:
 - (i) have the understanding and skills to develop creative and innovative solutions to facility organisation, design of facility buildings and provision of facilities, that are sustainable, and will deliver wider Community Services improvements;
 - (ii) consider the provision of imaginatively designed solutions that will inspire staff and service users, provide flexibility of use and make a positive statement to the community;
 - (iii) have the understanding and skills to develop and deliver new and different approaches in service provision that are transformational; and
 - (iv) have an understanding of the changing ICT environment and the opportunities this provides in terms of space use flexibility and improved service delivery.

(6) **Sustainability**

- (a) WEPCo shall develop and implement specific requirements for sustainability and support the Participants' wider sustainability strategies.
- (b) WEPCo shall identify and consider the use of sustainable techniques, including energy efficiency and savings and measures to reduce construction waste, to be implemented on New Projects which are affordable, present value for money and have a positive impact on the facilities.

(7) **Community**

- (a) WEPCo shall give due consideration to, and compliance where appropriate, with local community improvement projects in the vicinity

of New Projects and the wider strategic importance of these initiatives.

- (b) WEPCo shall undertake widespread consultation (on basis agreed with the Relevant Participant(s)) within the local community throughout the New Project process.

1.3.1 Supply Chain Establishment for New Projects

(a) Required outcome

Establishment of supply chain for a specific New Project or New Projects shall be carefully considered to ensure that services are provided by the most appropriate partner(s) and that optimal performance and value for money are achieved. A Relevant Participant may request supply chain assembly in respect of:

- (i) a New Project for a single Facility;
- (ii) a New Project for a group or batch of Facilities; or
- (iii) a group or batch of planned New Projects, in which case the Tender Process will be carried out in conjunction with the first of such New Projects but shall establish a supply chain for the prescribed number of New Projects, on the basis of terms that secure and maximise tangible benefits from repeat business and long-term business relationships, subject always to Clause 23 and Appendix 1 of Schedule 6 (*New Project Pricing Report*).

(b) Scope

- (i) WEPCo shall ensure the appropriate engagement of supply chain partners during (and before) the New Project Approvals Process, as appropriate, from conception to enable improved outcomes and best available value for money.
- (ii) WEPCo shall review the suitability of supply chain partners to undertake services in relation to a New Project or New Projects, paying regard, but not limited to, the following:
 - (1) availability of resources, where appropriate, to progress the New Project through the design, construction and operation phases of the New Project; and
 - (2) ability to provide a level of service on a constant and recurring basis throughout the development of the New Project.

- (iii) WEPCo shall select and appoint a supply chain commensurate with the Relevant Participants' values, goals and vision having regard to a number of areas including, but not limited to, health and safety, commitment to delivery of community benefits, quality and sustainability. Subject to the terms of this Agreement, the supply chain will be established and managed in a manner that will:
- (A) optimise and clearly demonstrate value for money;
 - (B) ensure the effective performance of the Project Services;
 - (C) provide optimal risk transfer to achieve certainty of delivery;
 - (D) mitigate the risk of time and/or cost overrun;
 - (E) secure and maximise tangible benefits from repeat business and long-term business relationships, where appropriate; and
 - (G) be undertaken in a transparent and auditable manner with clearly identified selection criteria and evaluation methodology and so as to satisfy the SPB (under exclusion of WEPCo's representative) that decisions have been made on a proper, arm's length basis where WEPCo proposes to include within the supply chain any B Shareholder Member or any Associate of any of WEPCo, the PSDP or any B Shareholder Member.
- (iv) The assessment and selection of supply chain partners shall be conducted following a robust and clear tender procedure with suitable levels of checking to ensure that supply chain partners are selected with the ability to demonstrate:
- (A) appropriate professional accreditation;
 - (B) financial robustness;
 - (C) capacity to undertake the required works or services;
 - (D) established and successful management systems including quality, environment and health and safety;
 - (E) sufficient resources;
 - (F) an appropriate level of support to the key resources;
 - (G) an appropriate level of quality in deliverables; and

- (H) a proven track record in terms of relevant experience in relation to capital and revenue funded accommodation projects, as appropriate.
- (v) WEPCo shall maintain an awareness of any Relevant Participant targets in relation to recruitment and training initiatives and, where applicable and appropriate, shall take due cognisance of these in their supply chain resourcing plans. In partnership with the National Skills Academy for Construction and CITB (the Construction Industry Training Board) WEPCo will ensure it works with construction employers to embed skills and employment opportunities; maximising benefit to the sector and to local communities. WEPCo shall record and report how their supply chain resourcing activities are commensurate with, or impact upon, Participant recruitment and development targets.
- (vi) WEPCo shall establish supply chain agreements based on goals common to those of WEPCo, the Participants and service users.

1.3.2 Funding

(a) Required Outcome

- (i) The ability to secure funding for a New Project or New Projects, if required, on terms which demonstrate the appropriate balance between funding costs, transaction costs and long-term flexibility.
- (ii) The achievement of improvements in funding terms wherever practicable through repeat business and/or the use of funding competitions and/or the appropriate use of WEPCo's existing and growing asset base over the term of this Agreement.
- (iii) The commitment to challenge Funders to provide innovation and flexibility in their approach to funding of individual projects. In so doing this should result in funding that is fit for purpose and which provides an ongoing value for money approach, with flexibility to acknowledge change at minimal cost and disruption to a Project whilst also applying the appropriate level of rigour in respect of due diligence on individual Projects.

(b) **Scope**

- (i) Where Project Services giving rise to capital expenditure are to be funded wholly or partly from revenue payments by the Project Agreement Counterparty, the selection and appointment of Funder(s) to finance each Project Agreement.
- (ii) The development and agreement of funding terms which provide appropriate flexibility and demonstrates the best available value for money for the Participants.
- (iii) The promotion of long-term effective working relationships between WEPCo and the Funder(s) where this can benefit the Participants, particularly in the development of New Projects and the provision of best available value for money.
- (iv) Where appropriate (i.e. where a benefit to the Relevant Participants can be demonstrated), the active engagement of Funders in the New Project Approval Process from conception.

1.3.3 **Value for Money**

(a) **Required outcome**

The provision of value for money to the Participants, and the wider community, over the term of this Agreement in relation to the development of New Projects.

(b) **Scope**

Achieve value for money in the delivery of each New Project through the following:

- (i) effective options appraisal from the outset of each New Project to ensure the best available value for money outcome is selected and delivered in every case;
- (ii) provision and presentation of accurate, validated, transparent and detailed information in relation to the costs and other aspects of assessment of value for money of New Projects; and
- (iii) the development and use of effective methods of determining the value and the price of each New Project from the outset.

Strategic Support Partnering Services

1.4.1 Strategic Estate Planning

(a) Required outcome

- (i) With prior approval of the relevant Participant, the informed review and investigation by WEPCo and any of the Participants of all the estate development options available to deliver the SDP before identifying which New Project(s) to progress.
- (ii) The thorough appraisal of all practical options to ensure the best available value for money is realised in every case.
- (iii) The development of practical and affordable proposals for improvement to the Participant's estate, which will provide value for money for the Participant and facilitate the delivery of the services plan laid out in the latest revision of the SDP.

(b) Scope

Estate planning carried out by WEPCo, with the agreement of and in conjunction with the Participant will need to answer the following key strategic questions in respect of estate strategies for specific areas/sites proposed by the Participants:

- (i) where are we now? A comprehensive description of the current estate available for provision of Education Sector Services and, where requested, Community Services in terms of its condition, efficiency, statutory compliance, adequacy, capability and suitability;
- (ii) where do we want to be? Identification of the future estate requirements;
- (iii) how do we get there? Identification of the “gap” together with the provision of costed strategic options for closing it including as many alternatives as are appropriate in the particular circumstances to ensure the best available value for money option is identified in each case and/or estate masterplanning; and
- (iv) how will we know that we are making progress? A means of measuring progress towards the provision of the estate required to realise the SDP.

1.4.2 Service Planning

(a) Required Outcome

Successfully supporting the Participants to plan Education Sector Services and, where requested, Community Services across the Region.

(b) **Scope**

- (i) WEPCo shall work with the Participants to plan Education Sector Services and, where applicable, Community Services that meet the needs of the population in the Region.
- (ii) WEPCo shall support the Participants in the planning of education and Community Services across the Region to:
 - (1) help identify opportunities to improve the efficiency and cost effectiveness of the services to ensure they deliver value for money; and
 - (2) help support the Participants' achieve their sustainability aims and targets in the delivery of education and Community Services.

1.4.3 **Value for Money**

WEPCo shall ensure that, where Strategic Support Partnering Services are provided to any of the Participants, value for money for the services can be clearly demonstrated.

SECTION 2 - MANAGEMENT SYSTEMS

1. GENERAL

1.1 WEPCo may operate the quality, health & safety and environmental management systems required by this Section 2 (*Management Systems*) as independent systems or integrate common elements to form a single system.

1.2 WEPCo shall ensure that:

1.2.1 an audit of the system or systems required to be maintained pursuant to this Section 2 is carried out at regular intervals and the findings of such audit reported to the SPB; and

1.2.2 such system or systems are reviewed at intervals agreed by the SPB (excluding WEPCo's representative) to ensure continued stability and effectiveness.

2. MANAGEMENT SYSTEM GENERAL REQUIREMENTS

2.1 WEPCo shall establish, document, implement and maintain:

2.1.1 a quality management system for the purpose of ensuring and demonstrating that all aspects of the Partnering Services and all other matters for which WEPCo is responsible under this Agreement are carried out fully in conformity with the relevant provisions of this Agreement and WEPCo's quality management policies and objectives (as approved by the SPB from time to time);

2.1.2 an appropriate system for implementing its occupational health and safety ("**OH&S**") policies and objectives (as approved by the SPB from time to time) to enable it to control its OH&S risks and improve its OH&S performance over time; and

2.1.3 an appropriate system for achieving and demonstrating sound environmental performance by controlling the impacts of its activities, products and services on the environment, consistent with its environmental policy and objectives (as approved by the SPB from time to time).

2.2 Such management systems and relevant policies and objectives shall be reflected in:

2.2.1 quality plans (to be contained in a quality manual) which shall, as a minimum, be consistent with BS EN 9001 or 9002 (as the case may be) or any equivalent standard which is generally recognised as having replaced them (or either of them);

2.2.2 a health and safety manual which shall, as a minimum, be consistent with OHSAS 18001 or any equivalent standard which is generally recognised as having replaced it; and

2.2.3 an environmental manual which shall, as a minimum, be consistent with ISO 14001 or any equivalent standard which is generally recognised as having replaced it,

and otherwise be consistent with the terms of Appendix 1 (*Initial Management Systems*) to this Section 2.

2.3 Notwithstanding any other provisions of this Agreement, the manuals comprising WEPCo's management systems shall include the following or, as necessary, make reference to the location of documents describing:

- 2.3.1 the quality, OH&S and environmental (as the case may be) policies and objectives of WEPCo;
- 2.3.2 the scope of the relevant system;
- 2.3.3 organisational structure;
- 2.3.4 management arrangements;
- 2.3.5 responsibilities and authority of staff;
- 2.3.6 procedures for the control of documents and records;
- 2.3.7 procedures and method statements for the execution, measuring and valuing of the Partnering Services;
- 2.3.8 procedures for managing interfaces between WEPCo's own management systems and those of WEPCo's Supply Chain Members and, where applicable, Participants;
- 2.3.9 procedures for monitoring and measuring of performance against the Key Performance Indicators and, as necessary, other indicators to ensure conformity and to achieve value for money (including a procedure to monitor information relating to customer perception as to whether the WEPCo has met the Participants' Specific Requirements); and
- 2.3.10 the responsibilities and requirements for planning and conducting audits, and for reporting results and maintaining records at both WEPCo and Supply Chain Member level.

3. **MANAGEMENT SYSTEMS DIRECTOR**

3.1 WEPCo shall ensure that there is a suitably qualified, skilled and experienced individual fulfilling the role of WEPCo Management Systems Director as soon as reasonably practicable after the Commencement Date and in any case no later than [six months] after the Commencement Date. The Management Systems Director shall be responsible for:

- 3.1.1 ensuring that processes needed for WEPCo's management systems are established, implemented and maintained;
- 3.1.2 reporting to the WEPCo Board on the performance of WEPCo's management systems and any need for improvement; and
- 3.1.3 ensuring the promotion of awareness of customer requirements throughout the organisation.

3.2 **Audit**

- 3.2.1 The Management Systems Director shall arrange for internal audits to be conducted at planned intervals to determine whether WEPCo's management systems conform to the quality, OH&S and environmental management systems requirements established by WEPCo and are effectively implemented and maintained.
- 3.2.2 WEPCo shall ensure that actions are taken without undue delay to eliminate detected nonconformities and their causes. Follow-up activities shall include the verification of the actions taken and the reporting of verification results.

APPENDIX 1 - INITIAL MANAGEMENT SYSTEMS

The Initial Management Systems are attached hereto.¹³

¹³ Bidders to develop and to be agreed during dialogue.

SECTION 3 - PERFORMANCE MEASUREMENT

WEPCo shall, at its own cost and expense, regularly monitor and report the standard of performance of each of the Partnering Services and the Project Services and demonstrate continuous improvement wherever practicable in respect of Partnering Services. This will be achieved by the use of appropriate key performance indicators as set out below, as further developed in accordance with this Agreement from time to time.

APPENDIX - SCHEDULE OF KEY PERFORMANCE INDICATORS¹⁴

¹⁴ Refer to KPIs extract in the ITPDSB. Relevant KPIs, Significant Performance Failures, Track Record Tests and calibrations to be developed and agreed with Tenderers during dialogue and inserted prior to contract execution. The KPIs are described at high level for the purposes of dialogue and will be refined and developed at Selected Bidder stage (without altering the original purpose). Note the baseline community benefit requirements are mandatory and are not subject to dialogue.

SECTION 4 - PARTNERING SERVICES COSTS RATES¹⁵

1. Subject to paragraph 2, these rates and prices shall be index linked.
2. Additionally the rates and prices shall be reviewed by WEPCo on a date not earlier than three (3) months before the second anniversary of the Commencement Date (and every second year thereafter) by reference to other relevant local and national trends and to the rates and prices actually paid by WEPCo for similar services (where WEPCo has used Good Industry Practice to secure best value in respect of those services) and taking into account value for money objectives set out in the Key Performance Indicators and the outcomes of the Partnering Services Supply Chain Refresh. On completion of this review and in any event no later than one (1) month before the second (and each subsequent) second anniversary of the Commencement Date, WEPCo shall provide to the Participants a report on such review confirming whether WEPCo proposes an increase or decrease of, or no change to, these rates and prices (taking into account any adjustment which would fall to be made pursuant to paragraph 1) and demonstrating that any such proposal to adjust and/or renew the supply chain (taken together with the effect of paragraph 1) represents value for money and continuous improvement in value for money, for approval by the SPB.
3. Following agreement by the SPB (acting reasonably and in the context of the required outcomes in Section 1 of Schedule 3 (*Partnering Services*)) to any proposal submitted by WEPCo (or agreement on other terms between the Parties)), the table below (as updated from time to time) shall be updated to reflect the agreed rates. In the absence of such agreement, the annual adjustment pursuant to paragraph 1 above shall continue to be made.
4. For the purposes of the calculation of any Partnering Services Costs where any component of the rates or costs included in the calculation are not included in the rates below (as updated from time to time) (such rates or costs being "**Non Scheduled Costs**"), the Participants and WEPCo shall seek to agree the relevant rates for the Non Scheduled Costs. Failing such agreement, the Non Scheduled Costs shall be Tendered in accordance with the provisions of paragraph 5 (*Tender Process*) of Schedule 6 (*New Project Pricing Report*) which shall apply *mutatis mutandis* in relation to the Tender Process thereof (subject to any amendments to such provisions as may be necessary to reflect the particular circumstances).

The table below (as updated from time to time pursuant to paragraphs 1 to 3 above) shall be updated to include the rates agreed or produced by such Tender Process.

¹⁵ Partnering Services Cost Rates are solution specific and are to be developed and agreed with Bidders during dialogue. Partnering Services Cost Rates are expected to include rates for the development of New Project Requests through Stage 1 of the New Project Approvals Process.

SECTION 5 - PARTNERING SERVICES METHOD STATEMENTS

5A - ONGOING PARTNERING SERVICES

The Ongoing Partnering Services Method Statement is attached hereto¹⁶.

¹⁶ Method Statements are solution specific and are to be developed and agreed with Bidders during dialogue. These should include method statements for delivery of Community Benefit Requirement KPIs, CBR Enhancements and Additional Benefits.

5B - PROJECT DEVELOPMENT PARTNERING SERVICES

The Project Development Partnering Services Method Statement is attached hereto.¹⁷

¹⁷ Method Statements are solution specific and are to be developed and agreed with Bidders during dialogue. These should include specific sections dealing with each of the following:

- Community Benefits - method statements for procurement of commitments to deliver the Authority's Community Benefit Requirement KPIs, ACBR Enhancements and Additional Community Benefit Project Co's Proposals.
- Tender Process - establishment of supply chain, achievement of value for money and management of costs from appointment of the successful tenderer and handling conflicts of interest.
- Tenderers to submit BIM delivery method statements.
- The approach to procuring a common Construction and Operational Panel as referred to Template Project Agreement should also be addressed.

5C - STRATEGIC SUPPORT PARTNERING SERVICES

The Strategic Support Partnering Services Method Statement is attached hereto.¹⁸

¹⁸ Method Statements are solution specific and are to be developed and agreed with Bidders during dialogue.

SCHEDULE 4- PARTNERING SERVICES COSTS

1. PAYMENT FOR PROJECT DEVELOPMENT PARTNERING SERVICES

1.1 Payment for Project Development Partnering Services shall be by Project Development Fees. The process for calculating and payment of such Project Development Fees in relation to:

1.1.1 Qualifying Projects; and

1.1.2 any other Projects in respect of which a Project Service Provider is to provide the relevant Project Services and which WEPCo and a Relevant Participant have agreed is to be subject to the approval process set out in Schedule 5 (*Approval Process for New Projects*),

is set out in this paragraph 1. For other Projects, the relevant Participant and WEPCo shall agree an appropriate Project Development Fee and mechanic of payment.

1.2 A proposed Project Development Fee Estimate (including Project Development Fee Caps) for each proposed New Project (broken down for the entire New Project Approval Process, each stage of the New Project Approval Process and for each relevant component of the Project Development Partnering Services) must be submitted by WEPCo as part of the Stage 1 Submission using the Proforma 2 template and, once that New Project achieves Stage 1 Approval, the incurred development fees (together with the OPS Relevant Proportion) shall, subject to paragraph 1.3, paragraph 1.4 and paragraph 2 below, be the Project Development Fee for that New Project. The Project Development Fee Estimate submitted as part of the Stage 1 Submission shall be determined as follows (without any double counting or double recovery between Stages):

1.2.1 subject to paragraph 1.2.2, the estimated fee shall comprise the Partnering Services Costs associated with the provision of the Project Development Partnering Services relative to the New Project, to cover taking the proposed New Project through each stage of the New Project Approval Process (split between Stage 1 Approval and Stage 2 Approval) (for example, design costs, finance and legal advice, technical advice, planning costs, surveys (excluding any surveys specified in paragraph 4.2.3(b) to 4.2.3(q) of Schedule 5 (*Approval Process for New Projects*)) and costs associated with compliance with the requirements of Schedule 6 (*New Project Pricing Report*) in respect of the New Project) to financial close or contract award;

1.2.2 save to the extent adjustments are required and agreed between the Parties to give effect to Clause 19.1, the Project Development Fee Estimate for each element or component of the Project Development Partnering Services, for each stage of the New Project Approval Process and in respect of the New Project as a whole, can in no circumstances exceed the relevant Project Development Fee Cap, as arrived at using Tables 1 and 2 of Proforma 1 of Appendix 1 to this Schedule 4 (*Partnering Services Costs*) for the estimated value of the New Project;

1.2.3 these costs will be computed based on WEPCo's estimate of the time involved in taking the New Project through to contract completion and execution (including

time spent by WEPCo's own staff), applying the Partnering Services Cost rates or alternative basis as referred to in paragraph 1.3;

1.2.4 these costs may include:

- (a) costs reasonably and properly incurred by WEPCo in doing work which would otherwise have been required for a Stage 1 Approval in advance of issue by the Relevant Participant(s) of a New Project Request, where such work was done "at risk" by WEPCo with the express agreement of the Relevant Participant(s) on the understanding such work would be captured pursuant to this paragraph 1.2.4 should a Stage 1 Approval be given for the New Project in question; and/or
- (b) with the agreement of the Relevant Participant, costs reasonably and properly incurred by WEPCo in relation to a New Project in relation to which a Stage 1 Submission has been submitted but which did not receive Stage 1 Approval (other than for reasons related to WEPCo's failure to meet the requirements of this Agreement) (such consent not to be unreasonably withheld or delayed where the costs incurred relate to a previous attempt to obtain Stage 1 Approval for the New Project for which Stage 1 Approval is being sought);

1.2.5 for the avoidance of doubt the Project Development Fee Estimate shall also include the OPS Relevant Proportion allocated to the New Project; and

1.2.6 WEPCo shall not be entitled to include or recover any Non Scheduled Costs as part of any Project Development Fee or Incurred Project Development Fee where such costs have not been agreed or Tendered in accordance with Section 4 (*Partnering Services Costs Rates*) of Schedule 3 (*Partnering Services*).

1.3 The actual costs for providing the Project Development Partnering Services shall be calculated utilising the Partnering Services Costs rates specified in Section 4 (*Partnering Services Costs Rates*) of Schedule 3 (*Partnering Services*) or, where more beneficial to the Relevant Participant(s), on any alternative basis (such as fixed prices or volume discounts) agreed between WEPCo and the relevant Supply Chain Member and approved by the Relevant Participant for this purpose. In the case of an Approved Project, the costs should include (as a fixed sum) those costs anticipated to be properly and reasonably incurred in achieving financial close or contract award.

1.4 Within twenty (20) Business Days of a New Project achieving Stage 1 Approval and then after it becomes an Approved Project, WEPCo shall notify the Relevant Participant(s) of the actual costs (calculated on the basis specified in paragraph 1.3 above) of providing the Project Development Partnering Services in respect of that New Project and the OPS Relevant Proportion properly and reasonably incurred by WEPCo in obtaining such approvals (and, in the case of an Approved Project, anticipated to be properly and reasonably incurred in achieving financial close or contract award). WEPCo shall provide all necessary supporting information (including timesheets, invoices and the like) necessary to substantiate the levels of costs incurred (or anticipated to be incurred as aforesaid).

1.5 The Relevant Participant(s) and WEPCo shall seek to agree the costs to be paid pursuant to paragraph 1.4 within twenty (20) Business Days of WEPCo's notification, failing which WEPCo or the Relevant Participant(s) shall be entitled to refer the matter for consideration under the Dispute Resolution Procedure. Where such costs as agreed or determined are lower than the Project Development Fee Estimate for the relevant stage provided pursuant to paragraph 1.2 above, the Project Development Fee will be reduced accordingly. Where such costs as agreed or determined are higher than the Project Development Fee Estimate for the relevant stage provided pursuant to paragraph 1.2 above, the Project Development Fee will be increased accordingly, subject always to paragraph 2 below and the Project Development Fee Caps.

1.6 Subject to paragraphs 1.7 and 1.8, recovery of the full Project Development Fee is dependent on the relevant New Project becoming an Approved Project and a Project Agreement being entered into in relation to that Approved Project in which case WEPCo shall:

1.6.1 in MIM Projects, charge an amount equivalent to the Project Development Fee (under deduction of any sums paid under paragraph 1.7) as a lump sum to the Project Service Provider entering into the relevant Project Agreement and that Project Service Provider shall, in turn, recover such amount through the amounts to be paid to the Project Service Provider under the Project Agreement; and

1.6.2 for Approved Projects other than as referred to in paragraph 1.6.1, recover the Project Development Fee (under deduction of any sums paid under paragraph 1.7) in accordance with the terms of the relevant Project Agreement.

1.7 The Relevant Participant(s) shall pay WEPCo that part of the Project Development Fee in respect of a New Project which has obtained Stage 1 Approval that relates to the costs incurred in obtaining such Stage 1 Approval within thirty (30) Business Days of agreement or determination of the costs specified in paragraph 1.3 relative to such Stage 1 Approval.

1.8 WEPCo shall be entitled to reimbursement of the Incurred Project Development Fee in the circumstances referred to in paragraphs 4.8.2, 4.8.3, 5.10.1(a), 5.10.2(a), 6.1.2(a), 6.2 and 7 of Schedule 5 (*Approval Process for New Projects*) and/or (but without double counting or double recovery) as part of the Participant Event of Default Compensation Sum and/or Participant Event of Default Termination Sum.

1.9 The "**Incurred Project Development Fee**" is, in respect of each New Project, the actual development costs of the nature referred to in paragraph 1.2.1 above (calculated on the basis specified in paragraph 1.3 above) properly and reasonably incurred by WEPCo as at the relevant date in seeking to develop a Stage 1 Submission and/or Stage 2 Submission (and which WEPCo is not already entitled to be paid pursuant to paragraph 1.7 above), but in no circumstances shall the Incurred Project Development Fee for:

1.9.1 a stage of the New Project Approval Process in respect of a New Project exceed the Project Development Fee Cap for that stage; or

1.9.2 a New Project exceed the Project Development Fee Cap for that New Project set out in the Stage 1 Submission.

2. PROJECT DEVELOPMENT FEE CAP

2.1 The Project Development Fee Cap in respect of a New Project shall be:

2.1.1 in the case of Stage 1, the amount specified in the relevant row within Proforma 2 of the Pricing Data, based on the amount contained in Table 1 of Proforma 1 for the estimated capital value of the relevant New Project stated in the New Project Request; and

2.1.2 in the case of Stage 2, the amount specified in the relevant row within Proforma 2 and:

(a) calculated by multiplying the percentage value contained in Table 2 of Proforma 1 by the estimated capital value of the New Project stated in the New Project Request; or

(b) where applicable, based on the Stage 2 Fee Cap stated in monetary terms in Table 2 of Proforma 1.

2.2 The Project Development Fee Cap for the New Project as a whole shall be the aggregate of the fee caps for each stage agreed or determined pursuant to paragraph 2.1 above.

2.3 The Project Development Fee Caps shall, in all cases, be subject to such adjustment (carried out in accordance with the principles set out in Appendix 1 (*Pricing Data*) to this Schedule 4 (*Partnering Services Costs*)) as may be appropriate to reflect variances between the Comparator and the details of the Project, such adjustment to be agreed between the Relevant Participant and WEPCo.

3. PAYMENT FOR ONGOING PARTNERING SERVICES

3.1 Partnering Services Costs relative to the provision of Ongoing Partnering Services shall be paid through the OPS Relevant Proportion payable by the Relevant Participant(s) as part of the Stage 1 Project Development Fee and by Project Agreement Counterparties under Project Agreements as part of the Stage 2 Project Development Fee, calculated in accordance with the provisions of this Agreement.

3.2 The OPS Relevant Proportion should be clearly identified as part of the Stage 1 and Stage 2 Project Development Fee Estimates, as set out in paragraph 1.2 of this Schedule 4 (*Partnering Services Costs*).

3.3 WEPCo will be required to demonstrate the value for money of the approach taken to the level of OPS Relevant Proportion on an individual New Project as part of the Pricing Report required to be submitted in accordance with Schedule 6 (*New Project Pricing Report*) and subject to the approvals process described in Schedule 5 (*Approval Process for New Projects*).

APPENDIX 1 - PRICING DATA

1. The information set out in this Appendix 1 together with the capped amounts set out in Table 3 and Table 4 of Proforma 1 (as updated from time to time) comprises details of the information required to calculate the caps to be applied for the fixed cost elements (being the non-Tendered cost elements such as the Project Development Fees and equity returns) for New Projects coming forward through the New Project Approval Process.
2. Any adjustment to be made pursuant to this Agreement to the figures and/or percentages specified in this Appendix 1 (as updated from time to time) for the purposes of Schedule 4 (*Partnering Services Costs*) or Schedule 6 (*New Project Pricing Report*) shall be made in accordance with the following requirements:
 - 2.1 where adjustments are to be made, they shall be made on the basis that:
 - 2.1.1 both WEPCo and the Relevant Participant(s) shall act reasonably;
 - 2.1.2 the adjustment may be an increase or a decrease. Where an increase is required, the smallest practicable increase is to be made. Where a decrease is required, the greatest practicable decrease is to be made;
 - 2.1.3 full use is to be made of relevant benchmarking data for comparator projects or elements or components of comparator projects which are agreed between the Relevant Participants and WEPCo from time to time as being appropriate in accordance with Proforma 1;
 - 2.1.4 the best value for money to the Relevant Participant(s) and continuous improvement are to be obtained;
 - 2.1.5 WEPCo, insofar as is practicable, should be in a no better, no worse position as a result of such adjustment; and
 - 2.1.6 no adjustment shall be made to the "Project Equity Returns" specified in Proforma 1 until the seventh (7th) anniversary of the Commencement Date at which point adjustments may be made in accordance with this Appendix 1, save to the extent provided for in paragraph 2.2 or as required and agreed between the Parties to give effect to Clause 19.1;
 - 2.2 adjustments for inflation (other than in respect of the Partnering Services Costs, to which Section 4 (*Partnering Services Costs Rates*) of Schedule 3 (*Partnering Services*) shall apply) shall be made in accordance with the provisions of paragraph 2.15 of Schedule 1 (*Definitions, Interpretation and Construction*) on the basis that principal sums provided by WEPCo in the Proformas (but not sums determined by applying percentages to such sums) shall be index linked save that references in paragraph 2.15 of Schedule 1 (*Definitions, Interpretation and Construction*) to the Retail Prices Index (All Items Excluding Mortgage Interest) shall be construed as references to BCIS TPI or such other appropriate indices as

may be agreed between the SPB and WEPCo (as agreed from time to time with the Relevant Participant(s));

2.3 the Parties have agreed that only the following aspects may, on an individual New Project, be relevant considerations for suggesting adjustments to the figures or percentages specified in Proforma 1:¹⁹

2.3.1 **Complexity**

Where the specific details of a New Project in terms of design detailing, site specifics and/or buildability are materially more or less complex than the information on which the Pricing Data was based, it may be appropriate to adjust the Project Development Fee Caps in Proforma 1.

2.3.2 **Pathfinders/Preparatory Work**

Where Relevant Participants have carried out desktop studies in advance of issuing New Project Requests, the Project Development Fee Caps in Proforma 1 shall be adjusted as set out in the Partnering Services Method Statements²⁰.

Where the Relevant Participants have undertaken a significant degree of other preparatory work relative to a New Project which would reduce the scope of the Project Development Partnering Services in accordance with paragraph 3 of Schedule 5 (*Approval Process for New Projects*), the Project Development Fee Caps set out in Proforma 1 shall be adjusted as set out in the Partnering Services Method Statements.

2.3.3 **Planning Process**

Where the Site has been selected by the Relevant Participant notwithstanding advice by WEPCo that there is a there is a significant risk of any Planning Appeal, Planning Call-In or Planning Proceeding and, other than as a result of breach of this Agreement by WEPCo or any WEPCo Party or failure to comply with the Planning Act by WEPCo or any WEPCo Party, there is a significant risk of any Planning Appeal, Planning Call-In or Planning Proceeding, it may be appropriate to increase the Project Development Fee Caps specified in Proforma 1.

¹⁹ Bidders are expected to provide proposals as to methodologies for producing such adjustments within the relevant Partnering Services Method Statement (but are not expected to increase the scope of the possible grounds of adjustment).

²⁰ Bidders are required to include specific details.

The Pricing Data is attached hereto.²¹

Proforma 1

This Pricing Data shall be updated from time to time with benchmarking information agreed or determined, in accordance with the terms of this Agreement.

The total capped development fee for each proposed New Project shall be calculated by adding together the caps for Stage 1 and Stage 2 at Tables 1 and 2 below.

For the purposes of interpretation of this Proforma 1, subject to paragraph 2 of Schedule 4 of Schedule 4 (*Partnering Services Costs*), the capital value of each New Project shall be based on the estimated value of the New Project contained in the New Project Request. The Project Development Fee Cap for Stage 1 and the Project Development Fee Cap for Stage 2 (together with the Annual Project Management Fee Cap and the Project Equity Returns) shall be calculated based on the relevant banding of capital value, the project type and scheme type, as described in Tables 1 to 4 below.

Table 1: Project Development Fee Caps for Stage 1²²

| Scheme Type | Project Type | Capital Value | Stage 1 Fee Cap (£) |
|--------------------|-------------------------------|---------------|---------------------|
| College | [Low Value Single Project] | [up to £30m] | £ |
| | [Medium Value Single Project] | [£30m - £40m] | £ |
| | [High Value Single Project] | [£40m +] | £ |
| Secondary School | [Low Value Single Project] | [up to £30m] | £ |
| | [Medium Value Single Project] | [£30m - £40m] | £ |
| | [High Value Single Project] | [£40m +] | £ |
| | [Batch of Projects] | [£15m - £40m] | £ |
| All-through School | [Low Value Single Project] | [up to £30m] | £ |

²¹ Pricing Data is solution specific and is to be developed and agreed with Bidders during dialogue.

²² Stage 1 fee caps are exclusive of survey costs specified in paragraph 4.2.3(b) to 4.2.4(q).

| | | | |
|----------------|-------------------------------|---------------|---|
| | [Medium Value Single Project] | [£30m - £40m] | £ |
| | [High Value Single Project] | [£40m +] | £ |

Proforma 2

This Proforma 2 is to be completed on a per New Project basis, in accordance with paragraph 1.2 of Schedule 4. The total estimated Stage 1 and Stage 2 Project Development Fees for each proposed New Project shall be calculated by completing Tables 1 and 2 below using the relevant Partnering Services Cost rates set out in Section 4 of Schedule 3 (*Partnering Services Cost Rates*), as adjusted from time to time in accordance with this Agreement. The Project Development Fee Cap for each Stage shall be populated, where indicated in Tables 1 and 2.

SCHEDULE 5 - APPROVAL PROCESS FOR NEW PROJECTS

1. PURPOSE

The purpose of this Schedule 5 (*Approval Process for New Projects*) is to set out how WEPCo and the Participants will work together to agree which New Projects will be taken forward and approved for development by WEPCo and on what basis. It sets out a two-stage approval process for New Projects. The provisions of paragraphs 3 to 6 of this Schedule 5 shall apply in relation to Qualifying Projects whether or not the period of ten (10) years from the Commencement Date has expired. The Parties may agree to utilise this process (amended as appropriate) in respect of other Project Services under Clause 9.3 but are not obliged to do so.

2. GENERAL OBLIGATIONS OF THE PARTIES

2.1 WEPCo will, as an integral part of its overall service delivery in relation to the development and approval of New Projects and without entitlement to specific or additional payment:

- 2.1.1 work with the Participants to develop local delivery plans which will then form the basis of the updated SDP; and
- 2.1.2 work with the Participants to review the applicability of the SDP to the provision of Education Sector Services and Community Services in the Region and to decide which New Projects to proceed with,

so that Participants can make informed decisions as to which projects may become New Projects.

2.2 WEPCo will, as an integral part of its overall service delivery in relation to the development and approval of New Projects and without entitlement to specific or additional payment, work with the Participants and other members of the SPB to:

- 2.2.1 identify, analyse and discuss the Participants' collective and individual accommodation requirements;
- 2.2.2 assist in the development of local delivery plans and review their applicability to the provision of Education Sector Services and Community Services in the Region;
- 2.2.3 develop further the SDP, in particular to further refine the proposals contained in the SDP;
- 2.2.4 prioritise New Projects on a basis consistent with the decisions from time to time of the SPB under Clause 14.2;
- 2.2.5 identify and appraise available options for meeting the Participants' accommodation requirements and thereby recommend (on the basis of best available value for money) which New Projects to progress;
- 2.2.6 advise how best to bundle accommodation requirements within a New Project to ensure that the New Project is Affordable, offers value for money and provides a solution with an appropriate level of flexibility;

- 2.2.7 take into consideration the views of relevant stakeholders in relation to the SDP and actual or potential New Projects;
- 2.2.8 develop the Participants' requirements in relation to New Projects which, in due course, during the Stage 2 Approval process set out at paragraph 5, will be developed further to enable it to form the basis for the agreement of the relevant Project Agreement;
- 2.2.9 analyse and discuss the range of potential funding options for New Projects including the feasibility of third party funding such as sponsorship when considering and developing a New Project;
- 2.2.10 assist in the preparation of outline business cases and obtaining all necessary approvals; and
- 2.2.11 in addition to the requirements of Schedule 6 (*New Project Pricing Report*), agree with potential Relevant Participant(s):
 - (a) the appropriate Comparator for purposes of determining any adjustments to the Project Development Fee Cap pursuant to paragraph 2 of Schedule 4 (*Partnering Services Costs*) in respect of such Comparator; and
 - (b) each part of the Project Development Fee Estimate, including the OPS Relevant Proportion, for each stage set out in Proforma 2,

for any New Project in respect of which such Participant(s) has/have indicated an intention to submit a New Project Request.

2.3 Each Participant will co-operate with WEPCo in its performance of its obligations under paragraph 2.2 above, in relation to any New Project or potential New Project being developed by WEPCo, including (without limitation):

- 2.3.1 providing any information reasonably required by WEPCo to enable it to satisfy the requirements of paragraphs 4 and/or 5 ;
 - 2.3.2 identifying whether any requirements under paragraph 4.2 and/or 5.4 may not be required or what additionally may be required by the Participants;
 - 2.3.3 explaining any relevant considerations around the funding of and/or financial envelope for the proposed New Project;
 - 2.3.4 identifying suitable benchmarks for the New Project; and
 - 2.3.5 providing reasonable assistance to WEPCo in relation to the procurement by WEPCo of all relevant Consents and the entering into of Project Agreements,
- and agreeing with WEPCo the matters referred to in paragraph 2.2.11 above.

2.4 Where the potential Relevant Participant(s) and WEPCo are unable to agree the matters referred to in paragraph 2.2.11 above within a period of three (3) months, the SPB shall determine such matters.

3. NEW PROJECT REQUESTS

3.1 Any Participant wishing to procure a New Project ("**Relevant Participant**") shall submit a written request for WEPCo to produce a Stage 1 Submission for that New Project, including:

- 3.1.1 indicative funding proposals setting out the maximum available capital and/or revenue which can be committed to that New Project, together with high level detail of assumptions associated with this calculation (the "**Affordability Cap**");
- 3.1.2 any requirements in relation to a New Project that must be satisfied as part of a Stage 1 Submission and/or Stage 2 Submission, including any governmental or similar approval requirements (for example the requirement to comply with—the Welsh Government's ["Better Business Cases - using the Five Case Model"]), funding approvals or grant conditions ("**Specific Requirements**"); and
- 3.1.3 a clear, detailed Project brief setting out the scope of the work to be undertaken, supported by relevant information which is commensurate with any previous development work undertaken on the New Project, together with any key aims and objectives related to the delivery of the New Project and the project specific requirements. This should include (i) details of the curriculum model; (ii) education brief (including any key programming requirements); (iii) site brief (including location, red line plan, title details and any "Reserved Rights" "Title Conditions", existing facilities and the extent of any engagement on planning matters and/or other consents); (iv) the New Project Specific Project Agreement, including the Site Specific Brief within the Authority's Construction Requirements, the Schedule of Accommodation, Area Data Sheets, the ICT requirements, Equipment requirements and Thermal and Energy Efficiency Testing Procedures, each as referred to in the Template Project Agreement; (iv) in the case of Pathfinder Projects, as a minimum, desktop surveys; (v) any initial agreement that may be in place between the Participant and any relevant Government body (whether pursuant to the Welsh Government's ["Better Business Cases - using the Five Case Model"] or otherwise); (vi) the Strategic Outline Case approved by Welsh Government; (vii) RIBA Stage 1 design information; (viii) any Well-being of Future Generations (Wales) Act 2015 policy objectives; (ix) the Project BIM Agreement relative to the New Project; and (x) details of approach to revenue/capital funding; and (xi) the anticipated position on staff transfers. As part of its preparation for each Pathfinder Project the Relevant Participant shall procure a desktop study of the relevant site or sites and report the results of such studies. Such report shall be accompanied by the requirements as to what, if any further studies or investigations should be carried out by WEPCo for the purposes of producing a Stage 1 Submission.

(a "**New Project Request**"). From time to time, the Relevant Participant(s) may have undertaken a significant degree of preparatory work relative to a New Project which would reduce the scope of the Project Development Partnering Services required to be provided for such New Project pursuant to this Schedule 5 (*Approval Process for New Projects*). In such circumstances:

- (a) the Relevant Participant(s) shall indicate this in the New Project Request and shall provide details of the work done to date, any revised requirements for the Stage 1 Submission and/or Stage 2 Submission (or, in relevant cases, whether a Stage 1 Submission is required at all) and any proposed risk allocation including proposals for

novation or otherwise of the design and/or other consultancy contracts which the Relevant Participants may have in place;

- (b) WEPCo and the Relevant Participants shall agree the appropriate adjustments to the process set out in this Schedule 5 (*Approval Process for New Projects*) and Schedule 6 (*New Project Pricing Report*) necessary to reflect the circumstances of the Project, including timing and details of the proposed Project Development Fee (it being agreed that the Parties' intentions are for this process to be applied with least practicable adjustments); and
- (c) the period for WEPCo's confirmation under paragraph 3.3 shall be increased to thirty (30) Business Days.

3.2 WEPCo shall be entitled to raise queries and request clarifications from the Relevant Participant(s) following receipt of a New Project Request so that WEPCo is able to fully assess the request and provide a meaningful response. The Relevant Participant(s) shall provide all reasonable assistance and co-operation in this regard.

3.3 WEPCo shall confirm in writing within twenty (20) Business Days of receipt of a New Project Request whether or not it will submit a Stage 1 Submission to the Relevant Participant(s). If WEPCo confirms that it does not intend to submit a Stage 1 Submission (or fails to give the confirmation referred to in this paragraph 3.3):

3.3.1 where the reason for not proceeding is that the Affordability Cap provided by the Relevant Participants is unrealistically low, WEPCo and the Relevant Participant(s) shall work together in good faith to seek to agree an alternative Project brief and/or Affordability Cap which can form the basis for a revised New Project Request. Failing an agreement on such terms within six (6) months of WEPCo's original confirmation, the Relevant Participant(s) shall be entitled to procure such New Project outside the terms of this Agreement and shall not be or be deemed to be in breach of Clause 9 (*Exclusive Nature of this Agreement*) unless such New Project is a Qualifying Project and they commence to procure such New Project prior to the expiry of ten (10) years from the Commencement Date at a substantially greater cost than the Affordability Cap (adjusted, for these purposes to reflect changes in BCIS TPI (as specified by the Relevant Participant(s)) from the date of the New Project Request); and

3.3.2 in all other cases, the Relevant Participant(s) shall be entitled to procure such New Project outside the terms of this Agreement and shall not be or be deemed to be in breach of Clause 9 (*Exclusive Nature of this Agreement*).

3.4 Any specific requirements of the Relevant Participant(s) for demonstrating value for money in respect of a specific New Project shall be notified to WEPCo as a Specific Requirement.

4. **STAGE 1 APPROVAL**

4.1 WEPCo will, as part of the Project Development Partnering Services produce outline proposals for New Projects (a "**Stage 1 Submission**") which develop and are consistent with the SDP where so requested pursuant to a New Project Request which they have accepted pursuant to paragraph 3.3 above.

4.2

All Stage 1 Submissions will be produced within three (3) months (or such longer period, up to a maximum of six (6) months, where reasonably necessary to allow for invasive surveys or ground investigation reports) of the relevant confirmation under paragraph 3.3 unless another period is agreed between WEPCo and the Relevant Participant(s). Without prejudice to the generality of Clause 8.1.6, a Stage 1 Submission shall be produced in accordance with the relevant Partnering Services Method Statement and contain, as a minimum, the following information in sufficient detail to allow all requisite approvals to be obtained by the Relevant Participant(s):

4.2.1 a value for money assessment in respect of the New Project Request:

- (a) containing:
 - (i) the relevant Pricing Report produced in accordance with Schedule 6 (*New Project Pricing Report*);
 - (ii) an elemental cost plan (including defined contingencies for identified risks and matters not known); and
 - (iii) an indicative financial model or indicative Development Amount Analysis, as the case may be;
- (b) explaining, in accordance with the relevant provisions of the Partnering Services Method Statement relative to the value for money requirements of the Project Development Partnering Services and the assumptions underpinning the OPS Relevant Proportion, why WEPCo's proposals demonstrate value for money, taking into account known costs and all other relevant factors (cost related or otherwise); and
- (c) confirming that such proposals would meet the relevant targets and commitments in the Key Performance Indicators;

4.2.2 concept design (to RIBA Stage 2) of the New Project sufficient to:

- (a) demonstrate that the Participant's requirements (including the Affordability Cap) are likely to be met;
- (b) establish that the New Project is likely to provide value for money; and
- (c) enable a cost estimate to be prepared with sufficient accuracy to establish whether or not the New Project can be delivered within the Affordability Cap (subject to the inclusion of identified contingencies for matters not yet known);

4.2.3 the results of the following:

- (a) (save in respect of Pathfinder Projects), a desktop study meeting the requirements of the Partnering Services Method Statements,

and, where applicable, in terms of paragraph 4.5,

- (b) topographical survey;
- (c) Underground utilities report;
- (d) Coal mining risk assessment report;
- (e) Flood risk report;
- (f) Unexploded Ordnance report;
- (g) Site Investigation studies;
- (h) Geotechnical report;
- (i) Drainage CCTV report;
- (j) Archaeological report;
- (k) Asbestos report in accordance with paragraph 4.10 of this Schedule 5 (*Approval Process for New Projects*);
- (l) Acoustic report;
- (m) Air quality report;
- (n) Ecology desktop study and further recommended reports;
- (o) Arboricultural report;
- (p) traffic study and transport assessment; and
- (q) environmental impact report,

together with suitable reliance and/or warranty protection in respect of such report in favour of the Project Service Provider, the Relevant Participant and (where applicable) Funders, from the relevant consultant;

4.2.4 whether the New Project requires the transfer of properties by Participant(s) to WEPCo to a Project Service Provider or to a wholly owned Subsidiary of WEPCo and, if so, proposed terms for such transfer and details of the extent of any agreement reached with such Participant(s);

4.2.5 a schedule of all material amendments required to the New Project Specific Project Agreement and in respect of a New Project that is a MIM Project, the Template Project Co Shareholders' Agreement together with a statement of benefit made available to the Relevant Participant(s) by such amendments, completed in accordance with the "IMPORTANT NOTICE" set out on the Template Project Agreement and Template Project Co Shareholders' Agreement and to reflect such amendments as may be required in the

circumstances of that particular project, taking account of the Approval Criteria at paragraphs 5.5.5 and 5.5.6;

- 4.2.6 the identity of the Participant(s) and/or other parties who will become Project Agreement Counterparties and where applicable an indication of any other parties which would become occupants in the Facilities to be provided under the New Project;
- 4.2.7 an explanation of how the New Project fits into the service delivery strategy as set out in the SDP and evidence of how the New Project meets the Relevant Participant(s)' requirements including the Specific Requirements;
- 4.2.8 the effect (if any) on any employees of the Relevant Participant(s) or relevant third party service providers, including any potential transfer of any such employees to any Project Service Provider or their Supply Chain Members;
- 4.2.9 a planning brief, including confirmation that the proposals are aligned with local planning policy and details of pre-planning application discussions and engagement with key stakeholders;
- 4.2.10 a maximum time period for submission of a Stage 2 Submission on the assumption that the New Project achieves Stage 1 Approval (and indicating time periods to accommodate the Tender Process required pursuant to Schedule 6 (*New Project Pricing Report*));
- 4.2.11 the proposed Project Development Fee Estimate referred to in paragraph 1.2 of Schedule 4 (*Partnering Services Costs*);
- 4.2.12 the proposed corporate structure of the Project Service Provider and, where not WEPCo, identifying the basis on which such Project Service Provider would be a PSDP Related Party or Subsidiary of WEPCo (as applicable) as at the date of execution of the relevant Project Agreement; and
- 4.2.13 a BIM Execution Plan,

and shall be accompanied by a copy of the most recent WEPCo Performance Report and confirmation whether or not the Track Record Test has been passed at the date of submission of the Stage 1 Submission.

4.3 In developing a Stage 1 Submission:

- 4.3.1 WEPCo shall liaise with the Relevant Participant(s) and relevant end users (in the case of end users, such end users to be such persons or organisations as the Relevant Participant(s) in consultation with WEPCo consider appropriate) as necessary to ensure the best available value for money is achieved through the appropriate consideration of all viable options and informed choices by WEPCo, stakeholders and the Relevant Participant(s); and
- 4.3.2 WEPCo shall be obliged to enter into the Project BIM Agreement for the New Project and comply with its obligations thereunder.

4.4 Without prejudice to the requirements of Schedule 6 (*New Project Pricing Report*), the Relevant Participant(s) shall provide WEPCo with such information as to its/their requirements (including the Specific Requirements) and other inputs as WEPCo may reasonably require and shall assist WEPCo in the review of any draft designs and broad proposals in relation to the Stage 1 Submission. Any and all information and other input or feedback so provided shall be provided without warranty and on the same basis as the provision of any information pursuant to Clauses 14.4 to 14.6 and shall be without prejudice to the rights of the Relevant Participant(s) to approve or not approve any New Project as they, in their absolute discretion, deem fit under this Schedule 5.

4.5 Save in respect of Pathfinder Projects, as part of its preparation for each Stage 1 Submission, WEPCo shall carry out a desktop study of the relevant site or sites and report (in advance of the Stage 1 Submission) to the Relevant Participant(s) of the results of such studies. Such report shall be accompanied by the recommendations of WEPCo as to what, if any further studies or investigations (as listed in paragraph 4.2.3 above) should be carried out by WEPCo for the purposes of producing a Stage 1 Submission. The Relevant Participant(s) shall confirm to WEPCo which if any such studies and/or investigations are required and WEPCo shall procure such studies and/or investigations on terms and at prices agreed with the Relevant Participants (which terms shall include the Relevant Participant(s) having the right to rely on the same). Such further surveys shall be carried out at the cost of the Relevant Participant(s) and shall not form part of the Project Development Fee unless the Relevant Participant(s) and WEPCo agree to the contrary.

4.6 Following receipt of a Stage 1 Submission, the Relevant Participant(s) shall have a period of two (2) months from the date of receipt of the Stage 1 Submission (or such longer period as they may have agreed with WEPCo in writing, all acting reasonably) in which to notify WEPCo that it approves or rejects the Stage 1 Submission. It is expected that the SPB will provide a forum for discussion of such Stage 1 Submission. If following the date of the New Project Request, WEPCo has failed the Track Record Test and, as a result, the Relevant Participants reject the Stage 1 Submission which otherwise meets the requirements of paragraph 4.2, then paragraphs 4.8.3 and 4.9 shall apply.

4.7 Where the Relevant Participant(s) approve a Stage 1 Submission, that New Project shall be known as a "**Stage 1 Approved Project**" or as having received "**Stage 1 Approval**", as the context requires.

4.8 If a New Project in respect of which a Stage 1 Submission has been submitted in accordance with this paragraph 4 does not become a Stage 1 Approved Project then WEPCo's costs in relation to the preparation of such Stage 1 Submission shall be borne by WEPCo unless:

4.8.1 the New Project subsequently becomes an Approved Project and the relevant costs are included as part of the Project Development Fee for such Approved Project in accordance with paragraph 1.2.4 of Schedule 4 (*Partnering Services Costs*); or

4.8.2 the Relevant Participant(s) have neither approved nor rejected the Stage 1 Submission within one (1) month of a notice (served no earlier than expiry of the two (2) months period specified in paragraph 4.6 (or such longer period as WEPCo may have agreed in writing, acting reasonably)) by WEPCo on the Relevant Participant(s) referring to this paragraph 4.8 and confirming that WEPCo intends to withdraw the Stage 1 Submission in the absence of approval by the Relevant Participant(s) within such further one (1) month period, in which case where WEPCo subsequently notifies the Relevant Participant(s) in writing of such withdrawal, WEPCo shall be entitled to the Incurred

Project Development Fee in respect of such Stage 1 Submission calculated in accordance with paragraph 1.9 of Schedule 4 (*Partnering Services Costs*); or

4.8.3 such Stage 1 Submission is rejected by the Relevant Participant(s) solely on grounds that:

- (a) the Track Record Test has been failed; or
- (b) the Relevant Participant(s) have exercised a right to suspend exclusivity pursuant to Clause 23.3 or Clause 23.10.1,

in which case WEPCo shall be entitled to the Incurred Project Development Fee relative to such Stage 1 Submission in respect of such Stage 1 Submission in accordance with paragraph 1.9 of Schedule 4 (*Partnering Services Costs*).

4.9 If a Stage 1 Submission submitted in accordance with this paragraph 4 does not become a Stage 1 Approved Project:

4.9.1 in relation to a Qualifying Project where the period of ten (10) years from the Commencement Date has not expired and the Stage 1 Submission is rejected because:

- (a) WEPCo has failed the Track Record Test or the Relevant Participant(s) or any of them have exercised a right to suspend exclusivity pursuant to Clause 23.3 or Clause 23.10.1; or
- (b) WEPCo has not:
 - (i) demonstrated to the satisfaction of the Relevant Participant(s) that the New Project provides value for money, including demonstration of continuous improvement in value for money where appropriate; or
 - (ii) met the requirements of paragraph 4.2 relative to such Stage 1 Submission; or

4.9.2 where the New Project in question is not a Qualifying Project; or

4.9.3 where the New Project in question is a Qualifying Project but the period of ten (10) years after the Commencement Date has expired,

then the Relevant Participant(s) shall be entitled to procure the New Project outside the terms of this Agreement and shall not be or be deemed to be in breach of the provisions of Clause 9 (*Exclusive Nature of this Agreement*) unless, in the case of paragraph 4.9.1(a), they seek to commence the procurement of such New Project during any period when exclusivity in respect of the Relevant Participant(s) has been reinstated pursuant to Clause 9.7, Clause 23.3 or Clause 23.10.1. In all other cases the Relevant Participant(s) shall not be entitled to procure the Required Facilities and/or the provision of the relevant Project Services outside the terms of this Agreement and, if they do so, such action shall and shall be deemed to be a breach of Clause 9 (*Exclusive Nature of this Agreement*).

4.10 Where in respect of a New Project demolition of an existing facility is anticipated within the scope of a New Project and an Asbestos Management Survey has not been undertaken by the Relevant Participant and included within the New Project Request, WEPCo shall procure an Asbestos Management Survey with the support and guidance of the Relevant Participant, in accordance with the following provisions:

- 4.10.1 WEPCo shall seek competitive tenders from a minimum of [three (3)] licensed Asbestos surveyors and shall appoint the tenderer with the most economically advantageous tender and the necessary skills, qualification and experience to carry out an Asbestos Management Survey and prepare an Asbestos Management Survey Report.
- 4.10.2 The Asbestos Surveyor will be required to carry out an Asbestos Management Survey and complete the relevant columns of the Asbestos Schedule, to include within an Asbestos Management Survey Report. The Asbestos Surveyor shall include details of the following within the Asbestos Schedule:
 - (a) Asbestos containing materials that are identified by the survey or surveys; and
 - (b) where Asbestos containing materials have been identified within a survey or surveys, a description of whether Asbestos is "strongly presumed" or "presumed", taking into account any access restrictions.
- 4.10.3 Under the direction of the Relevant Participant, WEPCo shall be required to:
 - (a) price the Asbestos Schedule using benchmarked rates, for the purposes of establishing a provisional sum; and
 - (b) estimate the programme,in each case for the removal of Asbestos materials identified in the Asbestos Management Survey Report, such rates and programme duration being based on Good Industry Practice (the "**Asbestos Provisional Sum and Programme**").
- 4.10.4 The Asbestos Management Survey Report and Asbestos Provisional Sum and Programme shall be included in the Stage 1 Submission and Stage 2 Submission. The Relevant Participant does not expect this amount or programme duration to change between the point the report is produced and execution of the Project Agreement.
- 4.10.5 The Asbestos Management Survey Report shall be included in the Project Agreement.

5. **STAGE 2 APPROVAL**

5.1 Following approval under paragraph 4 above, WEPCo will, when requested so to do in writing by the Relevant Participant(s), provide further Project Development Partnering Services to proceed regularly and diligently to develop a Stage 1 Approved Project into a detailed submission meeting the requirements of this paragraph 5, to be put to the Relevant Participant(s) (copied to the SPB) (a "**Stage 2 Submission**"). The Stage 2 Submission shall be presented to the Relevant Participant(s) as soon as reasonably practicable and in any case within the maximum period specified therefor in the Stage 1 Submission.

5.2 In developing a Stage 2 Submission:

- 5.2.1 WEPCo shall continue to liaise with the Relevant Participant(s) and relevant end users (in the case of end users, such end users to be such persons or organisations as the Relevant Participant(s) in consultation with WEPCo consider appropriate) as necessary to ensure the best available value for money is achieved through the appropriate consideration of all viable options and informed choices by WEPCo, stakeholders and the Relevant Participant(s); and
- 5.2.2 WEPCo shall be obliged to comply with its BIM protocol obligations under the Project BIM Agreement and submit a BIM Execution Plan to the Relevant Participant within one month of commencing Stage 2.

5.3 The Relevant Participant(s) shall, without prejudice to the requirements of Schedule 6 (*New Project Pricing Report*):

- 5.3.1 provide WEPCo with such information as to its/their requirements (including the Specific Requirements) and other inputs as WEPCo may reasonably require and shall assist WEPCo in the review of any draft designs and proposals in relation to the Stage 2 Submission. Any and all information and other input or feedback so provided shall be provided without warranty and on the same basis as the provision of any information pursuant to Clauses 14.4 to 14.6 and shall be without prejudice to the rights of the Relevant Participant(s) to approve or not approve any New Project as they, in their absolute discretion, deem fit under this Schedule 5; and
- 5.3.2 generally co-operate with WEPCo in relation to any Stage 2 Submission, including (without limitation) promptly providing:
 - (a) written confirmation of the Affordability Cap and/or any Specific Requirements or any change to such Affordability Cap and/or Specific Requirements;
 - (b) any information reasonably required by WEPCo enable it to satisfy the requirements of paragraph 5.4; and
 - (c) reasonable assistance to WEPCo in relation to procurement by WEPCo of all relevant Consents (provided that this sub-paragraph shall not apply to a Relevant Participant which is a Local Planning Authority exercising its functions as such).

5.4 Subject to paragraph 5.2, and without prejudice to the generality of Clause 8.1.6, WEPCo shall produce each Stage 2 Submission in accordance with the relevant Partnering Services Method Statement and shall procure that a Stage 2 Submission shall address all issues that have a potential impact on risk and/or price in respect of the proposed New Project and shall include as a minimum:

- 5.4.1 a value for money assessment in respect of the option given Stage 1 Approval:
 - (a) containing:
 - (i) a Pricing Report prepared in accordance with Schedule 6 (*New Project Pricing Report*);

- (ii) an elemental cost plan updating the information provided at Stage 1, firming up on contingencies against identified risks and matters not known; and
 - (iii) financial model or Development Amount Analysis, as the case may be;
 - (b) explaining, in accordance with the relevant provisions of the Partnering Services Method Statement applicable to the Project Development Partnering Services and the assumptions underpinning the OPS Relevant Proportion, why WEPCo's proposals demonstrate value for money, taking into account construction and design cost, FM costs, lifecycle costs and all other relevant factors (cost related or otherwise); and
 - (c) confirming that such proposals would meet the relevant objectives and commitments in the Key Performance Indicators;
- 5.4.2 where the transfer of properties by Participants or third parties to WEPCo or to Project Service Providers are required for the New Project, the terms for such transfers as agreed between WEPCo and the relevant Participants or third parties;
- 5.4.3 a mark up of the New Project Specific Project Agreement which contains, inter alia, the completed WEPCo's Proposals or "Project Co's Proposals" (as the case may be) (as defined in the relevant Project Agreement) which meet the Facilities Requirements and/or Service Level Specifications as applicable, and which reflects all proposed changes or amendments that have been proposed by WEPCo and agreed by the Relevant Participant and approved by Welsh Government, all in accordance with the "IMPORTANT NOTICE" set out on the Template Project Agreement and taking account of the Approval Criteria at paragraphs 5.5.5 and 5.5.6;
- 5.4.4 detailed design work (to RIBA Stage 4) and submission of relevant building warrant applications;
- 5.4.5 warrant applications;
- 5.4.6 plans and drawings;
- 5.4.7 requirements for planning approvals and all associated costs, including either evidence of the Planning Permission for the New Project, (including a report on all conditions attached to such Planning Permission setting out WEPCo's recommended strategy for dealing with the same) or a programme by which such Planning Permission will be obtained, taking into account the provisions of Clause 5.1 (*Planning Matters*);
- 5.4.8 without prejudice to paragraph 5.4.1, an explanation (together with appropriate supporting evidence) as to why the Stage 2 Submission meets the Approval Criteria (as defined in paragraph 5.5);
- 5.4.9 commitment letters from any proposed tenants or sub-tenants of the Facilities, where applicable;

- 5.4.10 an assessment of the effect (if any) on any employees of the Relevant Participants or proposed Project Agreement Counterparty, including any potential transfer of any such employees to any Project Service Provider or their Supply Chain Member and the cost implications of such transfer;
- 5.4.11 a timetable setting out the stages and timescales for the period between achieving Stage 2 Approval (as defined in paragraph 5.7.1) and the execution of the Project Agreement in relation to that New Project;
- 5.4.12 details of the competency assessments undertaken and the results of the same, in respect of the potential "Principal Contractor" for purposes of the CDM Regulations;
- 5.4.13 [Site Waste Management Plan], incorporating design stage and construction phase actions, including the estimated total mass of waste and the estimated recovery rate before mitigating actions, with a list of actions to reduce waste and increase the level of recovery (distinguishing construction, demolition/strip-out and excavation wastes as appropriate) and increase reused and recycled content;
- 5.4.14 the corporate structure of the Project Service Provider and where not WEPCo, confirming that:
- (a) such Project Service Provider would be a PSDP Related Party or Subsidiary of WEPCo (as applicable) as at the date of execution of the relevant Project Agreement; and
 - (b) where the Project Service Provider is not WEPCo or a Subsidiary of WEPCo, that:
 - (i) WCo shall be entitled to subscribe for up to twenty (20) per cent of the issued share capital in the Project Service Provider; and
 - (ii) the proposed shareholders in the Project Service Provider (or its parent company) shall be given the opportunity to provide initial subordinated debt or other shareholder funding to the Project Service Provider on a basis pro-rata to their proposed shareholding and otherwise consistent with the principles set out in the Template Project Co Shareholders' Agreement.
- 5.4.15 a draft Project Co Shareholders' Agreement relating to any New Project which is a MIM Project, which reflects all proposed changes or amendments that have been proposed by WEPCo, agreed by the Relevant Participant and approved by Welsh Government, all in accordance with the "IMPORTANT NOTICE" set out on the Template Project Co Shareholders' Agreement and taking account of the Approval Criteria at paragraph 5.5.6;
- 5.4.16 fully developed sub-contracts for each of the Contractor and (in the case of MIM Projects) the Service Provider and any relevant [Key Sub-Contractors], clearly demonstrating robust and deliverable risk allocation and in a form agreed by the Relevant Participant and approved by Welsh Government;

- 5.4.17 details of the proposed security package, including draft parent company guarantees through which the Project Service Provider will be protected against financial or other failure of the principal Contractor and/or (in the case of MIM Projects) Service Provider, in a form agreed by the Relevant Participant and approved by Welsh Government; and
- 5.4.18 in the case of MIM Projects, commitment letters from the senior funders confirming acceptance of the documents submitted by WEPCo pursuant to paragraphs 5.4.3, 5.4.15, 5.4.16 and 5.4.17.²³

5.5 For the purposes of this Schedule 5 (*Approval Process for New Projects*), "**Approval Criteria**" means the criteria against which any New Project is judged in determining whether it achieves Stage 2 Approval. The criteria are:

- 5.5.1 that the cost of the New Project is within the Affordability Cap or any increased Affordability Cap notified to WEPCo by the Relevant Participant(s);
- 5.5.2 that it has been demonstrated to the satisfaction of the Relevant Participant(s) that the New Project provides value for money including demonstration of continuous improvement in value for money where appropriate;
- 5.5.3 that the New Project meets the Specific Requirements and each of the Relevant Participant(s)' other requirements (including for the avoidance of doubt: design quality; sustainability; and terms and conditions of the Project Agreement) as identified at the time a New Project became a Stage 1 Approved Project;
- 5.5.4 that the Stage 2 Submission contains all the information required pursuant to paragraph 5.4 and has been produced in accordance with the relevant Partnering Services Method Statement;
- 5.5.5 in the case of MIM Projects and D&B Projects that any proposed changes or amendments to the relevant Template Project Agreement (other than amendments contained in the New Project Specific Project Agreement issued by the Relevant Participant with the New Project Request) for project specific reasons are in accordance with the "IMPORTANT NOTICE" set out on the Template Project Agreement and are not Prohibited Amendments;
- 5.5.6 in the case of MIM Projects, that any proposed changes to the Template Project Co Shareholders' Agreement that have been proposed are in accordance with the "IMPORTANT NOTICE" set out on the Template Project Co Shareholders' Agreement and are not Prohibited Amendments.
- 5.5.7 that the implementation of the New Project would not breach Law;
- 5.5.8 that the Stage 2 Submission was submitted within the maximum period specified therefor in the Stage 1 Submission (failure to do so shall mean that the Relevant Participant(s) are entitled to deem that the Approval Criteria are not met);

²³ The list represents Welsh Government's minimum requirements. Other items to be discussed during dialogue to align with Bidders method statements.

5.5.9 that the proposed Project Service Provider is a PSDP Related Party in the case of MIM Projects, or otherwise is WEPCo or a Subsidiary of WEPCo, as at the date of execution of the Project Agreement and the confirmation required under paragraph 5.4.14(b) has been properly provided; and

5.5.10 that the Authority's Community Benefit Requirement KPIs are met.

5.6 WEPCo shall submit its Stage 2 Submission to the Relevant Participant(s), copied to the SPB. It is expected that the SPB will provide a forum for discussion of such Stage 2 Submission. The Relevant Participant(s) shall be entitled to call for such reasonable information as they consider appropriate to enable them to decide whether the Stage 2 Submission meets the Approval Criteria. WEPCo shall reply promptly to all such requests for further information and assistance. If, acting reasonably, the Relevant Participant(s) find that any material aspects of the Stage 2 Submission are unsatisfactory to them, the Relevant Participant(s) shall notify WEPCo of the same and offer reasonable assistance to WEPCo to address such deficiencies. If WEPCo addresses such deficiencies to the satisfaction of the Relevant Participant(s), acting reasonably, paragraph 5.7.1 shall apply. If WEPCo is unable to resolve such deficiencies to the satisfaction of the Relevant Participant(s) (acting reasonably) paragraph 5.7.2 shall apply.

5.7 Within sixty (60) Business Days of the later of submission to the Relevant Participant(s) of a Stage 2 Submission and the date on which WEPCo provides them with all reasonable further information that has been requested and provided pursuant to 5.6, the Relevant Participant(s) shall give written notice of whether they:

5.7.1 approve the relevant New Project (in which case the New Project shall be deemed to have received "**Stage 2 Approval**"); or

5.7.2 reject the New Project:

- (a) on grounds other than those set out in paragraph (b), (c) or (d); or
- (b) subject to paragraph (c), on the grounds that it has failed to meet one or more of the Approval Criteria;
- (c) because of any change to the Affordability Cap from that originally notified in the New Project Request, the New Project is not Affordable despite being within the Affordability Cap as originally notified in the New Project Request; or
- (d) because WEPCo has failed the Track Record Test or because the Relevant Participant(s) have exercised a right to suspend exclusivity pursuant to Clause 23.3 or Clause 23.10.1.

Where the Relevant Participant(s)/potential Project Agreement Counterparty have not received all relevant FBC and other funding approvals prior to a Stage 2 Submission, any approval under paragraph 5.7.1 shall be conditional upon the Relevant Participant/proposed Project Agreement Counterparty achieving all relevant FBC approvals. Where such FBC approvals are not received within a period agreed with WEPCo (being not less than four (4) months of the conditional Stage 2 Approval), the Relevant Participant(s) will be deemed to have rejected the New Project on grounds set out in paragraph 5.7.2(a).

5.8 If the Relevant Participant(s) fail to notify WEPCo of a decision within the period of sixty (60) Business Days referred to in paragraph 5.7, WEPCo shall notify the Relevant Participant(s) of that fact in writing, referring to this paragraph 5.8. If the Relevant Participant(s) have not notified WEPCo in writing of a decision to approve or reject the New Project within a further twenty (20) Business Days of such notification, they shall be deemed to have rejected the New Project on grounds set out in paragraph 5.7.2(a).

5.9 If the Relevant Participant(s) reject the New Project on the grounds set out in paragraph 5.7.2(b), the Relevant Participant(s) and WEPCo will work together to address the reasons for such failure and WEPCo will attempt in good faith to produce a revised Stage 2 Submission which WEPCo shall re-submit to the Relevant Participant(s) as soon as reasonably practicable and in any case within thirty (30) Business Days of such rejection, which re-submission shall be treated as a Stage 2 Submission. If no re-submission is made within the said (30) Business Day period or the resubmitted Stage 2 Submission is rejected by the Relevant Participant(s) on the grounds set out in paragraph 5.7.2(b) or 5.7.2(d), it shall be treated as having been rejected and, subject to paragraph 5.11, neither the Relevant Participant(s) nor WEPCo shall have any further obligations in relation to the relevant New Project under this paragraph 5.9.

5.10 Where the Relevant Participant(s) reject or are deemed to have rejected a Stage 2 Submission:

5.10.1 pursuant to paragraph 5.7.2(a) or paragraph 5.7.2(c):

- (a) WEPCo's Incurred Project Development Fee relative to the Stage 2 Submission will be paid by the Relevant Participant(s) within ten (10) Business Days of the date on which WEPCo receives written notice of the rejection (or the expiry of the four (4) month period referred to in paragraph 5.7 without the obtaining of all relevant FBC approvals for the Relevant Participant(s)/proposed Project Agreement Counterparty, if applicable); and
- (b) unless the period of ten (10) years after the Commencement Date has expired, to the extent the New Project in question is a Qualifying Project, the Relevant Participant(s) shall not be entitled to procure the Required Facilities and/or the provision of the Project Services outside the terms of this Agreement and, if they do so, such action shall and shall be deemed to be in breach of Clause 9 (*Exclusive Nature of this Agreement*); or

5.10.2 pursuant to paragraph 5.7.2(d):

- (a) WEPCo's Incurred Project Development Fee relative to the Stage 2 Submission will be paid by the Relevant Participant(s) within ten (10) Business Days of the date on which WEPCo receives written notice of the rejection; and
- (b) the Relevant Participant(s) shall be entitled to procure the New Project outside the terms of this Agreement and shall not be or be deemed to be in breach of the provisions of Clause 9 (*Exclusive Nature of this Agreement*) unless, prior to the expiry of ten (10) years after the Commencement Date, the New Project is a Qualifying Project and they seek to commence the procurement of such New Project after expiry of any suspension of exclusivity pursuant to Clause 9.7, Clause 23.3 or Clause 23.10.1.

5.11 Subject to paragraph 5.9, if the Relevant Participant(s) reject a New Project pursuant to the provisions of paragraph 5.7.2(b) in respect of which a Stage 2 Submission has been resubmitted, WEPCo shall be entitled to refer the matter for consideration under the Dispute Resolution Procedure within ten (10) Business Days after receiving written notice of the rejection by the Relevant Participant(s). If, following a referral to Schedule 22 (*Dispute Resolution Procedure*), it is agreed or determined that the New Project rejected by the Relevant Participant(s) pursuant to paragraph 5.7.2(b) met the Approval Criteria the Relevant Participant(s) shall either:

- 5.11.1 declare that the relevant New Project is an Approved Project and that such New Project shall proceed in accordance with paragraph 5.14; or
- 5.11.2 declare that its rejection of the relevant New Project be treated as a rejection pursuant to the provision of paragraph 5.7.2(a) and the relevant provisions of paragraph 5.10 shall apply.

5.12 If, following a referral to Schedule 22 (*Dispute Resolution Procedure*) under paragraph 5.11, it is agreed or determined that the New Project did not meet the Approval Criteria, or WEPCo does not refer the matter for consideration under the Dispute Resolution Procedure in accordance with paragraph 5.11, the provisions of paragraph 5.13 will apply.

5.13 Where, in terms of paragraph 5.12, this paragraph 5.13 applies, the Relevant Participant(s) shall be entitled either to procure the Required Facilities and/or the provision of the Project Services covered by the relevant Stage 2 Submission outside the terms of this Agreement (whether or not the New Project in question is a Qualifying Project and whether or not the period of ten (10) years from the Commencement Date has expired), or not to proceed with procurement of the Required Facilities/Project Services, and, for the avoidance of doubt shall not be or be deemed to be in breach of the provisions of Clause 9 (*Exclusive Nature of this Agreement*) in either case. In the event that the Relevant Participant(s) are so entitled pursuant to this paragraph 5.13, then where the Approval Criterion on Affordability has not been met, they shall not, prior to the expiry of the 10th anniversary of the Commencement Date, make any change to the Facilities Requirements which, had it been made prior to the submission of the relevant Stage 2 Submission, would have been reasonably likely to result in a material change in the sums payable by the relevant proposed Project Agreement Counterparty in respect of the Project.

5.14 If a New Project becomes an Approved Project, WEPCo will carry out further work to develop appropriate Project Agreements to implement the Approved Project on the terms of the Stage 2 Submission (as the same may be amended from time to time by agreement between WEPCo and the Relevant Participant(s)).

5.15 The Relevant Participant(s) shall notify WEPCo in writing as soon as they become aware of any matter which may adversely affect the viability of any New Project including any:

- 5.15.1 Unreasonable Conditions or other planning issues likely to cause a material delay in the anticipated programme for the New Project;
- 5.15.2 material cost increases (whether on an aggregate basis or on a line by line basis); or

5.15.3 changes to funding which any Relevant Participant receives or to the way in which funding may be applied, either or both which may affect whether a New Project is Affordable,

PROVIDED THAT this paragraph 5.15 shall not apply to a Relevant Participant which is a Local Planning Authority exercising its functions as such.

5.16 The Relevant Participant(s) shall provide reasonable assistance to WEPCo in relation to the procurement by WEPCo of all relevant Consents and the entering into of the relevant Project Agreement(s). This paragraph 5.16 and paragraph 5.15.1 shall not apply to a Relevant Participant which is a Local Planning Authority exercising its functions as such.

5.17 WEPCo shall be responsible for performing its obligations under Clause 5.1 (*Planning Matters*) in respect of such Approved Project.

5.18 WEPCo shall novate all of its past, present and future rights, obligations and liabilities under a Project BIM Agreement to the Project Service Provider on or prior to the date of execution of the Project Agreement for the Approved Project.

6. **CHANGES TO THE RELEVANT PARTICIPANT(S) REQUIREMENTS**

6.1 If the Specific Requirements, Affordability Cap or Approval Criteria are subject to any material variation in relation to a New Project by the Relevant Participant(s) after a Stage 1 Submission has been submitted then:

6.1.1 WEPCo and the Relevant Participant(s) shall negotiate in good faith as to the implications on the Stage 1 Submission and/or Stage 2 Submission (as the case may be) and shall seek to agree changes thereto to accommodate the variation (including any change to the Affordability Cap, the appropriate Comparators (or adjustments to Comparators) and/or to the Project Development Fee);

6.1.2 save where such changes have been made as a result of the advice given by WEPCo, if agreement has not been reached pursuant to paragraph 6.1.1 within twenty (20) Business Days (or such longer period as the parties may agree) then:

(a) WEPCo shall be entitled by notice in writing to the Relevant Participant(s) to withdraw the Stage 1 Submission or the Stage 2 Submission or to decline to submit a Stage 2 Submission (as the case may be) and to be paid the Incurred Project Development Fee with the relevant date for calculation being the date the change was notified to WEPCo; and

(b) unless the period of ten (10) years after the Commencement Date has expired, to the extent the New Project in question is a Qualifying Project, the Relevant Participant(s) shall not be entitled to procure the Required Facilities and/or the provision of the Project Services outside the terms of this Agreement without recommencing this New Project Approval Process and, if they do so, such action shall and shall be deemed to be in breach of Clause 9 (*Exclusive Nature of this Agreement*).

6.2 The Relevant Participant(s) may, at any time, give notice in writing to WEPCo that they propose to cancel a New Project (a Cancellation Notice) without completing the process set out in paragraphs 3 to 5, in which case the Relevant Participant(s) shall pay WEPCo the Incurred Project Development Fee in respect of the cancelled New Project with the relevant date for calculation being the date of the Cancellation Notice. In such circumstances, unless the period of ten (10) years after the Commencement Date has expired then, to the extent the New Project in question is a Qualifying Project, the Relevant Participant(s) shall not be entitled to procure the Required Facilities and/or the provision of the Project Services outside the terms of this Agreement without recommencing this New Project Approval Process and, if they do so, such action shall and shall be deemed to be in breach of Clause 9 (*Exclusive Nature of this Agreement*).

7. **SUSPENSION OF EXCLUSIVITY**

In circumstances where the Relevant Participant(s) exercise any right to suspend exclusivity pursuant to Clause 9.7, Clause 23.3 or Clause 23.10.1 while WEPCo is preparing a Stage 1 Submission or a Stage 2 Submission in respect of any New Project, the Relevant Participant(s) may (but shall not be obliged to) notify WEPCo at any time while such suspension subsists to cease work on producing the relevant Stage 1 Submission or Stage 2 Submission. In such circumstances WEPCo shall cease work forthwith and the Relevant Participant(s) shall pay WEPCo the Incurred Project Development Fee in respect of the relevant New Project with the relevant date for calculation being the date of the notice from the Relevant Participant(s).

8. **SURVEYS**

8.1 In accordance with paragraphs 4.2.3 and 4.5 above, where WEPCo recommends that surveys, studies and/or investigations (other than desktop studies) are required for the purposes of a Stage 1 Submission, WEPCo shall procure such surveys, studies and/or investigations on the terms and at prices agreed with the Relevant Participant (which terms shall include the Relevant Participant having the right to rely on the same).

8.2 The cost of such surveys, studies and/or investigations carried out pursuant to paragraph 8.1 shall be due and payable by the Relevant Participant to WEPCo within [twenty five (25)] Business Days of receipt of a valid invoice and such costs shall not form part of the Project Development Fee unless the Relevant Participant and WEPCo agree to the contrary. For the avoidance of doubt, desktop studies relating to the relevant site and carried out by WEPCo shall form part of the Project Development Fee.

SCHEDULE 6 - NEW PROJECT PRICING REPORT

1. DEFINITIONS

The following defined terms are used in this Schedule 6 (*New Project Pricing Report*):

| | |
|--|--|
| "Associated Entity" | means, in relation to any body corporate: <ul style="list-style-type: none">(a) any Associate of that body corporate;(b) any member, director or partner of such body corporate or any of their Associates;(c) any partner in any partnership or any person who participates in any profit sharing or joint purse arrangement, in each case to which that body corporate or any person mentioned in paragraph (a) or (b) is also a party;(d) any member, director, officer or employee of any of the persons referred to in paragraphs (a) to (c) or any of those persons' spouses, children, step-children or partners; or(e) any body corporate of which any person referred to in (c) above is a member, director, officer or employee; |
| "Compliant Tender" | means a tender received from a Tenderer which complies with the Tender Requirements; |
| "MEA Tender" | [means a tender that complies with the Tender Requirements and represents the most economically advantageous tender for the Relevant Participant(s), as determined pursuant to the evaluation criteria and methodology applicable to the relevant Tender Process, in accordance with the terms of this Agreement;] |
| "Potentially Conflicted Entity" | means [WEPCo, the PSDP, any B Shareholder Member, any Associate of WEPCo, the PSDP or any B Shareholder Member and any sub-contractor of such an Associate]; |
| "Preferred Tenderer" | means, following the Tender Process of any Tendered Element, any group of Tendered Elements or any part of any Tendered Element (as the case may be), the Tenderer selected to provide such services in accordance with the provisions of paragraph 5.2.4 below; |
| "Pricing Report" | means the report referred to in paragraph 4.1 below; |
| "Prohibited Act" | subject to paragraph 6 below, has the meaning given to it in |

Clause 25 (*Corrupt Gifts and Fraudulent Payments*);

| | |
|-------------------------------------|--|
| "Prospective Tenderers" | means those persons who express an interest in being included in any Tender Process of Tendered Elements, group of Tendered Elements or any part of any Tendered Element (as the case may be); |
| "Relevant Employees" | means in relation to any service comprised within a Tendered Element for which a Tenderer is tendering, any persons employed by any of the Relevant Participant(s) or any other organisation or body (including, for the avoidance of doubt, any sub-contractor or agent engaged by the Relevant Participant(s)) who will be wholly or mainly engaged in the provision of that service as at the relevant Transfer Date (as defined under any Project Agreement concluded in respect of the New Project in question should it become an Approved Project) and who will become an employee of the Project Service Provider or a Supply Chain Member providing the Tendered Element services in accordance with the relevant provisions of such Project Agreement; |
| "Tender Requirements" | means the form and requirements of the tender documents to be sent to Tenderers as agreed or determined in accordance with the Tender Process provisions of this Schedule 6 (<i>New Project Pricing Report</i>), in particular paragraph 5.2.1(a)(iv); |
| "Tender Validity Period" | means the period specified within the Tender Requirements as being the period within which final tenders from Tenderers must be received; |
| "Tendered Element" | means the element of a New Project [(whether a construction prime cost element, a construction non-prime cost element, design, funding, lifecycle, or facilities management services, management services cost elements or otherwise)] which would be required to be provided as part of the Project Services should the New Project in question become an Approved Project] ²⁴ ; |
| "Tendered Evaluation Report" | has the meaning given to it in paragraph 5.2.1(b) of this Schedule 6 (<i>New Project Pricing Report</i>); |
| "Tender Process" | means the carrying out of an open market competitive tendering process in accordance with the provisions of this Schedule 6 (<i>New Project Pricing Report</i>) and "Tendering" shall be construed accordingly; |

²⁴ Definition includes illustrative list of works/services to be competitively tendered. This will be refined during dialogue. In the case of MIM Projects, equity and sub-debt funding will not be competitively tendered and the equity IRR will be fixed for the first 7 years of the term of the Agreement.

| | |
|----------------------------|--|
| "Tenderers" | means those of the Prospective Tenderers that express an interest in the relevant Tender Process and that are invited to submit tenders following the pre-selection evaluation, in accordance with paragraph 5.2.2 and Appendix 1 below; |
| "TUPE Information" | means information relating to the terms and conditions, job title, age, length of service and benefits of the Relevant Employees; |
| "Welsh Language Standards" | means the Welsh Language Standards (No.1) Regulations 2015. |

2. PURPOSE

2.1 The purpose of this Schedule 6 (*New Project Pricing Report*) is to set out how WEPCo and the Relevant Participant(s) will work together to ensure that the Pricing Report to be produced in respect of each stage of the New Project Approval Process for each New Project provides Relevant Participants with robust, transparent, auditable information as to the costs, fees and prices included within WEPCo's proposals for such New Project, to assist the Relevant Participant(s) in making informed choices as to the best available value for money solution for their specified needs.

2.2 In considering comparable projects to produce relevant benchmarking information and in determining adjustments to be made to Comparators, account shall be taken of inflation in respect of the Pricing Data, in accordance with:

- (a) Section 4 (*Partnering Services Costs Rates*) of Schedule 3 (*Partnering Services*) in respect of those elements of the project calculated by reference to the rates specified in said Section 4; and
- (b) for all other elements of the project, the terms of Appendix 1 (*Pricing Data*) to Schedule 4 (*Partnering Services Costs*).

2.3 The proper costs of WEPCo reasonably incurred in meeting its obligations under this Schedule 6 (*New Project Pricing Report*) are Partnering Services Costs and shall be recovered in accordance with and subject to paragraph 1 of Schedule 4 (*Partnering Services Costs*).

3. COMPARATORS AND PROGRAMME

3.1 WEPCo and the Relevant Participant(s) shall, at the start of each stage of the New Project Approval Process for each New Project, agree a programme:

3.1.1 for WEPCo and the Relevant Participant(s) to meet and agree, no later than 4 weeks after the commencement of that stage:

- (a) in respect of each stage, the adjustment (if any) to be made to the relevant figure or percentage cap specified in Proforma 1 of the Pricing Data to reflect variances between the Comparator as identified in the Pricing Data and the details of the New Project, such adjustment to be carried out in accordance with the principles set out in Appendix 1 (*Comparator and Initial Pricing Information*) to Schedule 4 (*Partnering Services Costs*); and

- (b) where, for any one or more element or component of such New Project there is not an appropriate Comparator and in the case of all Tendered Elements, the approach and timescales for setting pricing, in accordance with the Tender Process set out in paragraph 5 and appropriate projects to act as a benchmark for production of the Pricing Report pursuant to paragraph 4.1.1(b) and paragraph 5.5,

and WEPCo and the Relevant Participant(s) shall attend such meetings and co-operate as may be necessary to reach agreement on said matters; and

3.1.2 for issue to the Relevant Participant(s) of a draft Pricing Report.

Where updated drafts of the Pricing Report are required to be submitted pursuant to paragraph 4.2, WEPCo and the Relevant Participant(s) shall agree the necessary changes to the programme to reflect such requirements.

3.2 The price proposed by WEPCo for each of the relevant stages of each New Project to which paragraph 3.1.1(a) above applies shall not exceed the relevant figure (or percentage if applicable) for the relevant Comparator specified in the Pricing Data as adjusted pursuant to paragraph 3.1.1 above.

4. **PRICING REPORT**

4.1 WEPCo shall produce a report for each New Project, which shall:

4.1.1 analyse:

- (a) for Stage 1 Approval, its predicted maximum cost of the relevant New Project (including all profit, overheads, contingencies and other costs chargeable to the relevant New Project) and in relation to the Partnering Services Costs, a completed Table 1 of Proforma 2, as set out in Appendix 1 to Schedule 4 (*Partnering Services Costs*);
- (b) for Stage 2 Approval, its predicted cost of the relevant New Project (including all profit, overheads, contingencies and other costs chargeable to that New Project) and in relation to the Partnering Services Costs, a completed Table 2 of Proforma 2, as set out in Appendix 1 to Schedule 4 (*Partnering Services Costs*),

based on appropriate assumptions provided with the report and in either case compared to:

- (i) the appropriate Comparators for the relevant elements or components of such overall cost (as adjusted pursuant to paragraph 3.1.1 above), including Partnering Services Costs in respect of Project Development Partnering Services and the OPS Relevant Proportion;
- (ii) the actual costs (and prices) of Approved Projects;
- (iii) other relevant projects agreed between the Relevant Participant(s) and WEPCo pursuant to paragraph 3 above;

- (iv) general market level of pricing, charges, costs and fees for all elements and components of similar projects;
- (v) other projects in the Region (outside of the WEP Strategic Partnering Delivery Model);
- (vi) other projects in the UK in the education sector or accommodation sector generally (outside of the WEP Strategic Partnering Delivery Model); and
- (vii) general market level of pricing, charges, costs and fees for all elements and components of similar projects in other territories, including information in respect of equivalent projects based on any benchmarking data and indices which may from time to time be provided by the Welsh Government,

and explain how such results, taking into account all aspects (whether or not cost related) of WEPCo's proposals for the New Project, demonstrate that the New Project would provide value for money to the Relevant Participant(s);

- 4.1.2 during Stage 1 include a fully costed risk register showing the allowances included within the predicted maximum cost to reflect matters which cannot be fully priced at that stage given the level of design development carried out to date or due to the fact they are Tendered Elements; and
- 4.1.3 during Stage 2 show how the matters included within the costed risk register submitted as part of the Pricing Report in the Stage 1 Submission have been resolved within the predicted cost.

The make up of the proposed costs for all elements and components of the New Project (as contained in the Pricing Report) shall be provided on an open book basis, with WEPCo providing evidence of the steps taken at each level of WEPCo's supply chain (including in relation to Funders, where applicable) to ensure value for money and, in the case of Project Development Partnering Services, continuous improvement in value for money (including those aspects of the proposed New Project which have been subject to a Partnering Services Supply Chain Refresh or the Tender Process).

4.2 WEPCo shall

provide the Relevant Participant(s) with drafts of the Pricing Report for comment in advance of the Stage 1 Submission or Stage 2 Submission, as the case may be, all in accordance with the programme referred to in paragraph 3.1.2 above.

4.3 At Stage 2 of the New Project Approval Process for each New Project, the costs contained in the Pricing Report shall, as a minimum, reflect the results of open book pricing exercise(s) undertaken by WEPCo from time to time pursuant to paragraph 1.2 of Section 1 (*Specification*) of Schedule 3 (*Partnering Services*).

4.3.1 WEPCo shall:

- 4.3.2 maintain a full record and audit trail of any benchmarking exercise and make all such records (including details of all tenders and information received) available for

inspection by each Participants and its authorised representatives (including, without limitation, the National Audit Office and the Wales Audit Office) upon reasonable notice from that Participant; and

- 4.3.3 provide to the Relevant Participant(s) and the SPB, in a comprehensive and accurate manner, all information necessary to enable the Relevant Participant(s) and/or the SPB to review and assess all matters relating to the benchmarking exercises undertaken or commenced by WEPCo.

5. TENDER PROCESS

5.1 Subject to paragraph 5.2, within [◆] Business Days of WEPCo being instructed to proceed with Stage 2 pursuant to paragraph 5 of Schedule 5 (*New Project Approval Process*), WEPCo shall carry out a Tender Process to establish supply chain and pricing for Tendered Elements and to secure commitment to contract terms at Supply Chain Agreement level, which align with the Approval Criteria. The Tender Process for each Tendered Element shall, notwithstanding any other provision of this Schedule 6 (*New Project Pricing Report*) (including, without limitation, the participation of the Relevant Participant(s) described in paragraph 5.2), be the responsibility of WEPCo (as between WEPCo and the Relevant Participant). WEPCo shall at all times establish and comply with arrangements that are reasonably satisfactory to the Relevant Participant(s) to ensure confidentiality of information in connection with any actual or potential Tender Process, in particular to ensure confidentiality as regards to any Potentially Conflicted Entity.

5.2 The requirements of this paragraph 5.2 shall apply in respect of every Tender Process to be carried out pursuant to the provisions of this Schedule 6 (*New Project Pricing Report*). The Relevant Participant may require WEPCo to carry out the Tender Process in respect of any single New Project (which of itself may include a number of batched facilities) or batch of New Projects.

5.2.1 Invitation to Tender and Tender Requirements

- (a) WEPCo must obtain the approval of the Relevant Participant(s) in each case for:
- (i) (subject to the provisions of paragraph 5.2.1(b)) any grouping or groupings of Tendered Elements or any division of any Tendered Elements into separate parts which will optimise the opportunity for the Participants to obtain best value for money;
 - (ii) the appropriate media for advertising the Tendered Elements and identifying the Prospective Tenderers (who should be wider than PSDP Associates but, for the avoidance of doubt, can include the PSDP and/or any PSDP Associate). Without prejudice to the Community Benefit Requirement KPIs relating to advertising of supply chain opportunities, WEPCo acknowledges the advertising requirements of [Procurement Policy Note "Supply Chain Visibility" dated 10 April 2018] and shall ensure that they are complied with in accordance with the principles of this Agreement;

- (iii) the developed tender evaluation criteria and award criteria pursuant to which the Tenderers shall be selected by WEPCo from among the Prospective Tenderers;
- (iv) the Tender Requirements which shall include, without limitation:
 - (1) a statement of the Tender Validity Period;
 - (2) requirements in respect of the possible grouping or groupings of Tendered Elements and any division of any Tendered Element into separate parts;
 - (3) details of the tender evaluation and award criteria, which shall:
 - (A) reflect the tender evaluation and award criteria methodology contained in Appendix 1 to this Schedule 6 (*New Project Pricing Report*); and
 - (B) be objective and impartial and must require Tenderers to demonstrate how they would conduct themselves as part of WEPCo's supply chain to ensure that the principles and objectives contained in Clause 2 (*Purpose and Conduct of the Parties*) are achieved;
 - (4) clarification request procedures and any requirement for draft tenders in advance of final tenders;
 - (5) any down-selection process;
 - (6) save where decided to the contrary by the Relevant Participant(s) (in their absolute discretion), a statement that Preferred Tenderers shall (where the Transfer Regulations do not otherwise apply) be required to offer employment to all employees who may qualify as Relevant Employees on terms and conditions as favourable as those they enjoy with their employer at the point of transfer;
 - (7) the TUPE Information (the Relevant Participant(s) shall procure that, in respect of any Tender Process, the employer of the Relevant Employees provides information for inclusion in the Tender Requirements to allow the consequences of the Transfer Regulations or compliance with the requirements relating to employees referred to in paragraph (4) to be assessed);
 - (8) in the case of construction and/or service related Tendered Elements, the form of Supply Chain Agreement(s) which the Preferred Tenderer will be required to accept, which shall

reflect the principles set out in Clause 2 (*Purpose and Conduct of the Parties*) and the other requirements of this Agreement;

- (9) the information Tenderers are required to provide by way of submission requirements, which shall include:
- (A) in the case of construction and/or service related Tendered Elements, a requirement to submit details of the proposed security package, including draft parent company guarantees through which the Project Service Provider will be protected against financial or other failure of the principal Contractor and/or (in the case of MIM Projects) Service Provider;
 - (B) in the case of construction and/or service related Tendered Elements, acceptance of/ or a mark-up of the form of the Supply Chain Agreement (including developed technical schedules) approved pursuant to paragraph 5.2.1(c) below, on the basis that WEPCo shall be entitled to exclude any Tenderer from the Tender Process that submits amendments or modifications akin to Prohibited Amendments.
 - (C) in the case of funding Tendered Elements, a term sheet and commitment letter from the Senior Funders confirming acceptance of the [Template Project Co Shareholders' Agreement and Template Project Agreement].²⁵

unless the Relevant Participant(s) otherwise agree in writing.

- (b) Unless WEPCo can demonstrate to the Relevant Participant(s) that it will optimise its ability to obtain best value for money for the Relevant Participant(s) if Tendered Elements are tendered separately or in particular groupings, or if any Tendered Element is divided into separate parts, the grouping of any Tendered Elements shall be limited to groupings of construction-related works, facility management related services and funding, and shall otherwise be left to the discretion of Tenderers on the basis that the Tender Requirements shall specify that:
- (i) Tenderers may submit tenders for all or any of the groups within the Tendered Elements; and

²⁵ The list represents Welsh Government's minimum requirements. Other items to be discussed during dialogue to align with Tenderers method statements.

- (ii) where a Tenderer submits a tender for a group or groups of Tendered Elements, it may be required to provide all or any of the services in such group or groups and shall, in any event, provide separate pricing for each service in such group or groups.
- (c) The Tender Requirements and form of Supply Chain Agreement (including technical requirements and schedules) required under the terms of this Agreement, approved by the Relevant Participant(s), shall be used for the Tender Process.

5.2.2 Selection of Tenderers

- (a) WEPCo shall use a pre-selection questionnaire and interview or presentation process for all Prospective Tenderers to ensure gateway compliance and to enable it to shortlist Tenderers in accordance with this paragraph 5.2.2.
- (b) The Relevant Participants shall have the opportunity to provide input into any such questionnaire and may attend any such interviews or presentations.
- (c) WEPCo (as between WEPCo and the Relevant Participant(s)) shall be responsible for compiling the list of Prospective Tenderers and for ensuring that the Tenderers are selected from the list of Prospective Tenders on the basis of the following criteria:
 - (i) the financial standing of the Prospective Tenderers; and
 - (ii) the technical, managerial and other relevant experience and ability of the Prospective Tenders (taking into account any relevant customer references).

Three Tenderers shall be selected, unless otherwise agreed with the Relevant Participant.

- (d) The Relevant Participants shall have a right to object to the selection of any person as a Tenderer if such person does not (or could not reasonably be considered) to comply with any of the criteria referred to in 5.2.2(c) above.
- (e) To avoid doubt, a Potentially Conflicted Entity shall not be disqualified from selection as a Tenderer merely by virtue of the existence of the contractual relationship reflected in the WEPCo Shareholders Agreement, Project Agreements or Supply Chain Agreements where the requirements of the relevant provisions of the Partnering Services Method Statements²⁶ have been complied with, subject to:
 - (i) compliance with all Laws; and

²⁶ See footnote at Section 5 of Schedule 3 regarding required content within Partnering Method Statements for dealing with supply chain assembly, tendering and conflicts of interest. Bidders will be expected to ensure that, where possible, the selection stage shall take account of whether a Bidder has a conflict of interest that may negatively affect performance under the relevant Supply Chain Agreement.

- (ii) the establishment of, and compliance with, arrangements reasonably satisfactory to the Participants to avoid any conflict of interest, breach of confidentiality or unfair advantage. Failure by WEPCo to comply with any such arrangements shall automatically lead to the disqualification of the Potentially Conflicted Entity and the provisions of paragraph 5.4 shall apply.
- (f) Without prejudice to paragraph 5.2.2(d) above, the Relevant Participant(s) shall, in their absolute discretion, have the right to veto the selection of any person as a Tenderer on the grounds that the Prospective Tenderer:
 - (i) has committed a Prohibited Act; or
 - (ii) [is directly responsible for WEPCo incurring a Significant Performance Failure or failing a Track Record Test;]
- (g) WEPCo shall (after consultation with the Relevant Participant(s)) procure that any Prospective Tenderer which is unsuccessful in being selected as a Tenderer is provided with an appropriate explanation of the reasons behind its non-selection, if so requested by the Prospective Tenderer in question.
- (h) Where, in respect of any Tendered Element or group of Tendered Elements or any part of any Tendered Element, there is only one Prospective Tenderer, WEPCo shall not be entitled to proceed with the Tender Process of the same without the prior written consent of the Relevant Participant(s), such consent not to be unreasonably withheld or delayed.

5.2.3 Tendering Process

- (a) WEPCo shall procure that:
 - (i) the Tender Process is managed and conducted in an efficient, fair and transparent manner in accordance with the requirements of this paragraph 5.2 and Appendix 1 and shall procure that only Tenderers selected in accordance with this paragraph 5.2 and Appendix 1 are invited to submit tenders;
 - (ii) the principle of equality of information to, and treatment of, Tenderers shall apply at all times;
 - (iii) all necessary documents and information (including, without limitation, the Tender Requirements) are sent to Tenderers in a timely manner;
 - (iv) Tenders are only assessed in respect of compliance with the Tender Requirements; and
 - (v) the Relevant Participant(s) are given the opportunity to attend any meetings held with Tenderers and, where applicable, to witness the opening of tenders.

- (b) The Parties agree that e-tendering is the preferred method for tenderers to submit their price. The e-tendering platform and associated protocols for this purpose shall be developed by or on behalf of WEPCo at its own cost and submitted to the Participants for their agreement.

5.2.4 Preferred Tenderers

- (a) Following expiry of the Tender Validity Period, WEPCo shall (subject to the provisions of this paragraph 5.2.4) conduct a tender evaluation in accordance with Appendix 1, to determine which Tenderer (the "**Preferred Tenderer**") offers the MEA Tender in respect of any Tendered Element, group of Tendered Elements or individual part of any Tendered Element.
- (b) Within [■] Business Days of the determination referred to in paragraph 5.2.4(a) being made, WEPCo shall supply to the Relevant Participant(s) a tender report (the "**Tender Evaluation Report**") which shall include, as a minimum:
 - (i) a section setting out an introduction and the purpose of the report, which for the avoidance of doubt shall support the evaluation of the Stage 2 Submission;
 - (ii) a review of the invitation to tender and Tender Requirements;
 - (iii) the Tender Validity Period;
 - (iv) an overview of the tenders received;
 - (v) observations, remarks and qualifications of tenders;
 - (vi) amount of contingency within the pricing tendered;
 - (vii) conclusions and recommendations for award; and
 - (viii) a copy of the tender evaluation together with sufficient other supporting information concerning the tender evaluation, compliance checks and the breakdown of the price and quality scores, to enable the Relevant Participant(s) to analyse and understand the basis for such determination.
- (c) If the Relevant Participant(s) does not agree with the notified determination of the MEA Tender, the Relevant Participant(s) may, within fifteen (15) Business Days of being provided with the Tender Evaluation Report pursuant to paragraph 5.2.4(b) above, dispute such determination and, if the WEPCo and the Relevant Participant(s) do not resolve such dispute within a further fifteen (15) Business Days, the dispute shall be referred for resolution in accordance with Schedule 22 (*Dispute Resolution Procedure*).

5.2.5 **Appointment**

- (a) Where the New Project receives Stage 2 Approval, WEPCo shall procure that all the Preferred Tenderers (as agreed or determined in accordance with paragraph 5.2.4 above and Appendix 1) are appointed by the Project Service Provider to provide the relevant Tendered Element or group of Tendered Elements or individual parts of any Tendered Element (as the case may be) on the basis set out in their MEA Tender.
- (b) Without prejudice to paragraph 5.2.2(h), where WEPCo believes that only one Compliant Tender is likely to be submitted, or where only one Compliant Tender is submitted, WEPCo shall not be entitled to proceed further with the Tender Process or (as the case may be) to appoint a Preferred Tenderer without the prior written approval of the Relevant Participants, such approval not to be unreasonably withheld or delayed.
- (c) WEPCo shall (after consultation with the Relevant Participant(s)) procure that any Tenderer which is unsuccessful in being selected as a Preferred Tenderer is provided with an appropriate explanation of the reasons behind its non-selection, if so requested by the party in question.

5.3 WEPCo shall:

- 5.3.1 maintain a full record and audit trail of each Tender Process and make all such records (including details of all tenders received) available for inspection by the Relevant Participants and their authorised representatives (including, without limitation, the National Audit Office and the Wales Audit Office) on reasonable written notice from the Relevant Participants;
- 5.3.2 provide to the Relevant Participant(s), in a comprehensive and accurate manner, all information necessary to enable the Relevant Participant(s) to review and assess all matters relating to the Tender Process;
- 5.3.3 certify to the Relevant Participant(s) within twenty (20) Business Days of expiry of the Tender Validity Period that:
 - (a) to the best of its knowledge and belief (having made due and diligent enquiry) no Potentially Conflicted Entity intends to or will obtain any direct or indirect financial or other benefit from such appointment (other than the benefit of the contract itself);
 - (b) to the best of its knowledge and belief (having made due and diligent enquiry) no Potentially Conflicted Entity has colluded in connection with the Tender Process; and
 - (c) there has been full compliance with all requirements relating to ensuring equality of information provided to, and treatment of, Tenderers.

5.4 WEPCo shall indemnify and keep each of the Relevant Participants fully indemnified at all times for and against all claims (including any claim made by any person (including any Prospective Tenderer,

Tenderer or Preferred Tenderer) that is not awarded a contract), demands or notices which may be brought or alleged or threatened against any of the Participants or a Participant Party and from and against all Direct Losses or fines which that Relevant Participant or relative Participant Party may suffer or incur in relation to any such claims, demands or notices which occur as a result of or in connection with:

5.4.1 the implementation of this paragraph 5.4.1; and

5.4.2 any breach of the provisions of this paragraph 5.4.2,

save and to the extent that any such breach or claim results from any failure of the Participant to comply with the express provisions of this paragraph 5.4 (*Tender Process*) or from any failure of the Participants in carrying out the initial competition which resulted in the entering into of this Agreement by the Relevant Participants and WEPCo.

5.5

[In considering comparable projects to produce relevant benchmarking information to test the construction cost of Tendered Elements and in determining adjustments to be made to Comparators for Project Development Fees, account shall be taken of inflation in respect of the Pricing Data, in accordance with:

(a) Section 4 (*Partnering Services Costs Rates*) of Schedule 3 (*Partnering Services*) in respect of those elements of the project calculated by reference to the rates specified in said Section 4; and

(b) for all other elements of the project, the terms of Appendix 1 (*Pricing Data*) to Schedule 4 (*Partnering Services Costs*); and

and for benchmark projects, in respect of construction (and where appropriate, property) prices with reference to BCIS TPI (as agreed from time to time with the Relevant Participant(s)) and such other appropriate indices as may be agreed between the SPB and WEPCo since the date of the comparison data.]

6. IRREGULARITY IN AWARD OF CONTRACTS

6.1

Acceptance by WEPCo

Where WEPCo is required by this Agreement to carry out Tender Process or procure that Tender Process is carried out, then for the purpose of Clause 25 (*Corrupt Gifts and Fraudulent Payments*) it shall be an additional Prohibited Act for WEPCo or the relevant Supply Chain Member or proposed Supply Chain Member or any Associated Entity (or anyone acting on its behalf) to:

6.1.1 accept or agree to accept any gift or consideration of any kind as an inducement or reward:

(a) for doing or not doing (or for having done or not having done) any act in relation to the obtaining or performance of any Supply Chain Agreement; or

(b) for showing or not showing favour or disfavour to any person in relation to any Supply Chain Agreement; or

6.1.2 enter into any Supply Chain Agreement in connection with which commission has been paid or has been agreed to be paid unless, before the Supply Chain Agreement is made, particulars of any such commission and of the terms and conditions of any such agreement for the payment of such commission have been disclosed in writing to the Participants and they have consented to the same (in their absolute discretion),

and the provisions of Clause 25 (*Corrupt Gifts and Fraudulent Payments*) (changed according to context) shall apply and be construed accordingly.

6.2

Offer by Tenderer

6.2.1 Where WEPCo is required by this Agreement to carry out or procure the carrying out of Tender Process and any Prospective Tenderer or Tenderer (or anyone acting on its or their behalf or any of its or their directors, officers or employees) offers or agrees to give to WEPCo or any Associated Entity any gift or consideration of any kind as inducement or reward:

6.2.2 for doing or not doing (or for having done or not having done) any act in relation to the obtaining or performance of any Supply Chain Agreement; or

6.2.3 for showing or not showing favour or disfavour to any person in relation to any Supply Chain Agreement,

the Relevant Participant(s) may (without prejudice to any of their other rights) by written notice to WEPCo require WEPCo to procure, as soon as practicable, the termination of that person's involvement in the Tender Process or, if discovered after the award of the relevant contract, the termination of the relevant Supply Chain Agreement(s) (and the provisions of Clause 25 (*Corrupt Gifts and Fraudulent Payments*) shall apply and be construed accordingly).

6.3

Without prejudice to Clause 25 (*Corrupt Gifts and Fraudulent Payments*) WEPCo shall notify the Participants in writing of the occurrence (and details) of any Prohibited Act promptly on WEPCo becoming aware of its occurrence.

APPENDIX 1 - TENDER PROCESS METHODOLOGY

Purpose

The purpose of this Appendix is to provide an outline framework for any Tender Process. The key requirements outlined below are prescriptive but specific methodologies will be developed based on these key requirements for each individual Tender Process exercise.

1. **RESPONSIBILITY**

The [Chief Executive] of WEPCo will establish the Tender Process project team (including any external technical input or requirements) and take overall responsibility for the management of the Tender Evaluation process. The [Chief Executive] of WEPCo will ensure that due process is followed at all times and that sufficient and appropriate resources are made available to ensure that the process is completed in a timely and efficient manner ensuring that probity is achieved at all times.

2. **CONTEXT**

Value for money is the essential test against which any Tender Process exercise is to be justified. It is essential that the evaluation methodology offers a robust, objective, transparent and fair process against which tender submissions are evaluated and that inherent in the process is a clear and comprehensive audit trail.

3. **AIMS OF THE TENDER PROCESS**

3.1 **Value for Money**

A balanced assessment of quality standards, service benchmarks and price is to be carried out so as to ensure that the most economically advantageous tender is selected. In determining the most economically advantageous tender the award criteria shall assess Price and Quality of the tender. in accordance with paragraph 7 below.

3.2 **Transparent Evaluation Regime**

All tenders must be evaluated in a consistent manner against agreed evaluation criteria. WEPCo shall treat Prospective Tenderers and Tenderers equally and without discrimination and shall act in a transparent and proportionate manner. The design of the Tender Process shall not artificially narrow competition. [WEPCo shall ensure that any electronic portal or system for communication with Tenderers or Prospective Tenderers in respect of an EU Regulated procedure (including for the submission of tenders and requests to participate) shall comply with the requirements of regulation 22 of the Public Contract Regulations 2015 (as amended), including in respect of technical and security requirements.]

3.3 **Welsh Language**

WEPCo must comply with Welsh Language Standards when conducting a Tender Process.

4. **PRE-SELECTION AND GATEWAY COMPLIANCE**

A pre-selection process will be undertaken in respect of each Prospective Tenderer to ensure that they have the [financial and technical] capacity to comply with the requirements of the contract in accordance with paragraph 5.2.2 of Schedule 6 (*New Project Pricing Report*). Such assessment shall include as a minimum assessment of those terms listed at paragraph 5.2.2(c) of Schedule 6 (*New Project Pricing Report*) to determine those Prospective Tenderers that will continue in the Tender Process as Tenderers.

5. INVITATION TO TENDER

Following receipt of signed non-disclosure agreements, the Tenderers shall be issued with the invitation to tender for the relevant New Project, which shall include the background and overview of the Project, together with details of the Tender Process and Tender Requirements,

6. TIMESCALES/RECEIPT OF TENDERS

Tender packages will be returned to a nominated person [within the Tender Process team] on a date and time to be specified [and in any event within [◆] days of the expiry of the Tender Validity Period. The nominated person or their duly authorised deputies will open them. A tender opening form will be completed which will include such information as:

- date and time of opening;
- name of tenderer;
- tender price;
- any comments pertaining to the tender; and
- signatures of those opening the tender.

The bids will then be separated to remove pricing issues as far as is practical and issued to the respective members of the Tender Process team. In this way a qualitative evaluation can be made independent of any pricing considerations.

7. EVALUATION METHODOLOGY

The Tender Process project team will be responsible for ensuring a robust objective transparent and fair evaluation throughout the Tender Process (including the pre-selection stage) of all tenders submitted. A "**Tender Evaluation Plan**" will be developed and agreed which will cover the following topics:

- evaluation criteria;
- evaluation methodology;
- evaluation process; and
- evaluation timescales.

Evaluation will be by way of pass/fail tests and weighted scores. The scoring methodology shall ensure that each part of the tender to be scored provides an objective basis for ranking tenderers

and shall provide a comprehensive audit trail of the process. Specifically, the evaluation of community benefits must also account for the following:

- (a) commitment to the relevant Authority's Community Benefit Requirement KPIs and robust, deliverable method statements for delivery, on a pass/fail basis;
- (b) scoring the value of any commitments toward ACBR Enhancements, together with assessment of the level of robustness and deliverability of method statements for delivery; and
- (c) scoring the scope and value of commitments toward Additional Community Benefit Project Co Proposals, including whether such proposals:
 - (i) are tangible and measurable KPIs, that set out a clear, objective and transparent method of calculation and target;
 - (ii) are linked to the subject-matter of the Project Agreement (within the meaning of Regulation 67(5) of the Public Contract Regulations 2015);
 - (iii) do not replicate the KPIs that are already captured in the Community Benefit Requirement KPIs (and are additional benefits in that sense); and
 - (iv) set out the calculation on an open book basis, reflecting the cost of delivery of such proposals using verifiable information; and
 - (v) achieve one or more of the Relevant Participant's Well-being of Future Generations (Wales) Act 2015 policy objectives outlined in the New Project Request (if any).

8. PREFERRED TENDERER

Following evaluation of tenders and clarification process the Tender Process panel will make a recommendation of Preferred Tenderer. The nominated person will notify the Preferred Tenderer and all unsuccessful Tenderers in writing. An opportunity for de-brief will be offered to all bidders.

9. AUDIT

A full documented audit trail will be maintained for each and every stage of the process.

SCHEDULE 7²⁷ - TEMPLATE PROJECT AGREEMENTS AND SHAREHOLDERS AGREEMENTS

SECTION 1 - MIM PROJECTS

THE PROJECT AGREEMENT FOR EDUCATION SECTOR MIM PROJECTS IS ATTACHED HERETO.

²⁷ Refer to ITPDSB. To be inserted before contract execution.

Section 2 - Design and Build Development Agreement²⁸

**THE DESIGN AND BUILD DEVELOPMENT AGREEMENT FOR EDUCATION SECTOR PROJECTS IS ATTACHED
HERETO.**

²⁸ Refer to ITPDSB. To be inserted before contract execution.

SECTION 3 - WEPCO SHAREHOLDERS' AGREEMENT²⁹

THE WEPCO SHAREHOLDERS' AGREEMENT IS ATTACHED HERETO.

²⁹ Refer to ITPDSB. To be inserted before contract execution.

SECTION 4 - PROJECT CO SHAREHOLDERS' AGREEMENT³⁰

THE PROJECT CO SHAREHOLDERS' AGREEMENT IS ATTACHED HERETO.

³⁰ Refer to ITPDSB. To be inserted before contract execution.

SCHEDULE 8

DRAFT 21ST CENTURY SCHOOLS AND COLLEGES (BAND B) MIM PROGRAMME³¹

³¹ Please refer to Appendix 2 of the Descriptive Document. Draft programme to be inserted before contract execution.

SCHEDULE 9 - INSURANCES

1. LIMITS OF INDEMNITY

- 1.1 The limits of indemnity required by this Schedule 9 (*Insurances*) shall be increased in multiples of £5,000,000 as follows. If on a renewal date the limits of indemnity figures stated in this Schedule 9 (*Insurances*) (index linked) shall exceed the existing limits of indemnity by £3,000,000, then the level of indemnity required by this Schedule 9 (*Insurances*) shall be increased by £5,000,000. To avoid doubt if on a renewal date the limits of indemnity figures stated in this Schedule 9 (*Insurances*) (index linked) shall not exceed the existing limits of indemnity by £3,000,000, then the level of indemnity required by this Schedule 9 (*Insurances*) shall remain unchanged.

2. MAXIMUM DEDUCTIBLES

The maximum deductibles required by this Schedule 9 (*Insurances*) shall be increased in multiples of £5,000 as follows. If on a renewal date maximum deductibles figures stated in this Schedule 9 (*Insurances*) (index linked) shall exceed the existing maximum by £3,000 or more, then the maximum deductibles required by this Schedule 9 (*Insurances*) shall be increased by an amount equal to the nearest multiple of £5,000 that exceeds such index linked figure. To avoid doubt if on a renewal date the maximum deductibles figures stated in this Schedule 9 (*Insurances*) (index linked) shall not exceed the existing maximum by £3,000 then the maximum deductibles required by this Schedule 9 (*Insurances*) shall remain unchanged.

3. THIRD PARTY LIABILITY (INCLUDING PRODUCTS LIABILITY)

3.1 Interest

Legal liability of the Insured for all sums (including claimants' costs and expenses) whether under contract or otherwise in respect of accidental:

- 3.1.1 death or bodily injury or illness or disease contracted by any person;
- 3.1.2 loss of or damage to property; including but not limited to Participants assets; and
- 3.1.3 interference to property or any easement, right of air, light, water or way or the enjoyment or use thereof by obstruction, trespass, loss of amenities, nuisance or any like cause,

happening or consequent upon a cause occurring during the Period of Insurance.

3.2 Insured

- 3.2.1 WEPCo.

3.3 Period of Insurance

From the Commencement Date until the expiry or earlier termination of this Agreement and renewable on an annual basis.

3.4 [Limit of Indemnity]

3.4.1 Not less than £[10,000,000]³² (index linked) any one occurrence, the number of occurrences being unlimited but in the annual aggregate in respect of pollution and products liability].

3.5 Maximum Deductibles

3.5.1 £10,000 (index linked) each and every occurrence of property damage (personal injury claims will be paid in full).

3.6 Principal Extensions

3.6.1 Cross liabilities clause;

3.6.2 Contractual liability clause;

3.6.3 Worldwide jurisdiction;

3.6.4 Contingent motor;

3.6.5 Legal defence costs in addition to the limit of indemnity;

3.6.6 Indemnity to principals clause; and

3.6.7 Waiver of subrogation in favour of the Participants, their employees and agents.

3.7 Principal Exclusions

3.7.1 Liability of any insured to its own employees;

3.7.2 Fines, penalties, punitive or exemplary damages;

3.7.3 Liquidated damages;

3.7.4 War, invasion, acts of foreign enemies, hostilities (whether declared or not), civil war, rebellion, revolution, insurrection of military or usurped power;

3.7.5 Seepage, pollution or contamination unless caused by a sudden, unintended and unexpected happening;

3.7.6 Liability of each of the Participants arising from their clinical negligence;

3.7.7 Nuclear risks;

3.7.8 Such other exclusions as are generally applied as a matter of current market practice in the relevant insurance market from time to time; and

3.7.9 Liability arising out of asbestos.

³² To be confirmed.

4. **[PROFESSIONAL INDEMNITY INSURANCE**

4.1 Interest

To indemnify the Insured for all sums which the Insured shall become legally liable to pay (including claimants costs and expenses) as a result of claims first made against the Insured during the period of insurance by reason of any negligent act, error and/or omission in connection with the provision of any advice or professional services in connection with the provision of the Partnering Services and in connection with this Agreement.

4.2 Insured

WEPCo

4.3 Period of insurance

From the Commencement Date (a) until the expiry or earlier termination of this Agreement and renewable on an annual basis unless agreed otherwise by the Participants in writing; and (b) for a period of 6 years thereafter.

4.4 Limit of indemnity

A limit of indemnity of not less than five million pounds (£5,000,000) in the annual aggregate with at least one (1) annual reinstatement, but five million pounds (£5,000,000) any one claim and in the aggregate per annum for liability arising out of pollution or contamination (to the extent insured by the relevant policy).

4.5 Maximum deductible threshold

Not to exceed £[**to be determined**] for each and every claim.

4.6 Cover features and extensions

4.6.1 Retroactive cover to apply to any "claims made policy wording" in respect of this Agreement or retroactive date to be no later than the Effective Date.

4.6.2 Legal defence costs in addition to the limit of indemnity.

4.6.3 Loss of documents.

4.7 Principal exclusions

4.7.1 War and related perils

4.7.2 Nuclear and radioactive risks]

5. **EMPLOYER'S LIABILITY**

5.1 In a form complying with current Law.

- 5.2 Minimum limit of liability - £10,000,000 (index linked), each and every occurrence, the number of occurrences being unlimited.
- 5.3 Incorporating a waiver of subrogation against the Participants, their employees and agents.

SCHEDULE 10 - DEED OF ADHERENCE

This is the Deed of Adherence referred to in Clause 32 (*Change in Parties to the Partnering Agreement*).

THIS AGREEMENT IS MADE ON

AMONG:

- (1) [] **LIMITED**, a company registered in England and Wales (Company Registration Number []) whose registered office is at [] ("**WEPCo**");
- (2) [] of [];
- (3) [] of [];

each of (2) and (3) being the "**Continuing Participants**"; and

- (4) [] of [].

IT IS AGREED AS FOLLOWS:

This Agreement is supplemental to the partnering agreement (the "**WEP Strategic Partnering Agreement**") dated [] 20[] between [WEPCo] and the Continuing Participants.

Words and expressions defined in the WEP Strategic Partnering Agreement have the same meanings when used in this Agreement.

[] hereby agrees with each other person who is or who becomes a party to the WEP Strategic Partnering Agreement at today's date that with effect on and from the date of its execution of this Agreement it is bound by the WEP Strategic Partnering Agreement in that capacity.

The address and details for notices of [name] for the purposes of Clause 40 (*Notices*) of the WEP Strategic Partnering Agreement are: [].

This Agreement is subject to and shall be construed in accordance with the law of England and Wales.

IN WITNESS WHEREOF the parties have executed this Agreement as a Deed the day and year first above written:

SCHEDULE 11 - STRATEGIC DELIVERY PLAN

Section 1 - Initial SDP³³

³³ Please refer to the Descriptive Document. To be inserted before contract execution.

Section 2 - Updated SDP

WEPCo shall prepare a draft SDP for submission to the SPB in accordance with Clause 14.4 taking into account the draft local plans and in accordance with Clause 8 (*Services Obligations*) and Schedule 3 (*Partnering Services*). The draft SDP shall identify proposed Qualifying Projects.

Where such projects are not Qualifying Projects, no such project shall be included within the SDP without the express written consent of the relevant Affected Participant(s) (which shall be provided to the SPB). Such consent will be subject to applicable Law prevailing at the relevant time and applicable procurement rules and guidance.

SCHEDULE 12 - PLANNING MATTERS

The provisions of this Schedule 12 (*Planning Matters*) are subject to Clause 5.1 (*Planning Matters*).

1. PLANNING MATTERS

- 1.1 Subject to the terms of specific Project Agreements, WEPCo shall be responsible for:
- 1.1.1 obtaining all Consents, Planning Permissions, Planning Agreements and Infrastructure Agreements which may be required for the performance of the Services;
 - 1.1.2 implementing or procuring that the relevant Project Service Provider and the relevant Supply Chain Members implement each Consent, Planning Permission, Planning Agreement and Infrastructure Agreement relevant to a Project Agreement within the period of its validity in accordance with its terms; and
 - 1.1.3 complying with or procuring that the relevant Project Service Provider and the relevant Supply Chain Members comply with the provisions of each Consent, Planning Permission, Planning Agreement and Infrastructure Agreement applicable pursuant to a Project Agreement,
- provided that to the extent that such Consents, Planning Permissions, Planning Agreements and Infrastructure Agreements can only be or, in terms of a Project Agreement, are required to be obtained, implemented and/or complied with by the Project Agreement Counterparty or any third party occupier of the Facilities and are not obtained, implemented and/or complied with, WEPCo shall not be in breach of this Agreement.
- 1.2 WEPCo shall use all reasonable endeavours to secure the grant of Satisfactory Planning Permission.
- 1.3 WEPCo shall not allow or agree with the Local Planning Authority any extension of the statutory period for determination of the Planning Application without the prior written consent of the Affected Authority (such consent not to be unreasonably withheld or delayed).
- 1.4 The Affected Authority hereby undertakes with WEPCo that subject to the provisions of this Schedule 12 it shall, at the request and cost of WEPCo, do all acts and things reasonably necessary and within the ability and control of the Affected Authority to facilitate a Planning Application and/or Planning Appeal and shall assist in dealing with a Planning Call In and/or Planning Proceedings and subject to the provisions of this Schedule 12 at all times at the request and cost of WEPCo support WEPCo in making pursuing and/or dealing with a Planning Application and/or Planning Appeal and/or Planning Call In and/or Planning Proceedings which WEPCo shall reasonably require to secure a Satisfactory Planning Permission.
- 1.5 WEPCo shall not object to or procure, support or encourage any other person to object to any Planning Application or Planning Appeal submitted by WEPCo or the Affected Authority in respect of any part or parts of the Affected Authority's land or its facilities or proposed facilities in respect of New Projects.
- 1.6 WEPCo shall comply with the provisions of a Satisfactory Planning Permission and any Planning Agreement entered into pursuant to the provisions of this Agreement. For the avoidance of doubt, to the extent that such Satisfactory Planning Permission and any Planning Agreements are not complied with by

any third party occupier of the Facilities (including any Project Agreement Counterparty), WEPCo shall not be liable and there will be no breach of this paragraph 1.6 unless, in terms of the relevant Project Agreement, such third party occupier is the responsibility of the Project Service Provider.

1.7 WEPCo and any Affected Authority shall enter into, comply with and perform any Planning Agreement and/or any Infrastructure Agreement necessary to obtain a Satisfactory Planning Permission or to facilitate the carrying out of the Project Services in accordance with the provisions of this Agreement and the relevant Project Agreement (in so far as they do not contain any Unreasonable Conditions that have not been resolved in accordance with this Agreement) with the intention and proviso that the Affected Authority shall only do so if it is necessary to do so in its capacity as the owner of the land concerned. Save where agreed to the contrary by the Affected Authority and approved by the Relevant Participant(s) as part of the New Project Approval Process WEPCo will be responsible for all costs involved in completing any Planning Agreement and Infrastructure Agreement including for the avoidance of doubt all legal and administrative costs of the Affected Authority.

1.8 The following procedure shall apply in relation to planning relating to an Affected Authority:

- 1.8.1 WEPCo shall prepare at its own expense draft Planning Application(s) in conjunction with the Affected Authority.
- 1.8.2 WEPCo shall ensure that it consults closely with the Affected Authority during the preparation and submission of any Draft Planning Application and shall ensure that the Affected Authority is satisfied with the suitability of the relevant Draft Planning Application.
- 1.8.3 WEPCo shall at its own expense submit a Planning Application in the joint names of WEPCo and the Affected Authority to the appropriate Local Planning Authority and shall use all reasonable endeavours to obtain Satisfactory Planning Permission in respect thereof.
- 1.8.4 If a Planning Application is:
 - (a) refused by the Local Planning Authority;
 - (b) deemed to have been refused under section 78(2) of the Town and Country Planning Act 1990; or
 - (c) the subject of a Planning Call-In,

WEPCo shall at its own expense as soon as practicable in the joint names of WEPCo and the Affected Authority lodge a Planning Appeal with the Welsh Ministers and prosecute the Planning Appeal (or in the case of a Planning Call-In, the Planning Application) to a conclusion with all reasonable speed and diligence and shall indemnify the Affected Authority in respect of any award of costs against the Affected Authority in its capacity as joint appellant, **UNLESS** a Planning Advocate has advised WEPCo and the Affected Authority that in all the circumstances, there is less than fifty (50%) percent chance of success of the Planning Appeal or of proceedings relating to a Planning Call-In resulting in the grant of a Satisfactory Planning Permission.

- 1.8.5 WEPCo shall keep the Affected Authority fully informed of the progress of any Planning Applications, Planning Agreements, Infrastructure Agreements or as the case may be a Planning Appeal, Planning Call-In or Planning Proceedings and in particular:
- (a) shall keep the Affected Authority advised of WEPCo's progress in prosecuting the Planning Appeal or as the case may be a Planning Call-In including where necessary securing a date for a hearing or inquiry into a Planning Appeal or as the case may be Planning Call-In and the date of that hearing or inquiry;
 - (b) shall provide the Affected Authority with copies of all material correspondence in respect of any Planning Applications, Planning Agreements, Infrastructure Agreements, Planning Appeals, Planning Call-In or Planning Proceedings;
 - (c) shall keep the Affected Authority advised of all meetings, discussions and negotiations in connection with a Planning Application or as the case may be a Planning Appeal, Planning Call-In or Planning Proceedings with the Local Planning Authority or any authority body or person consulted in connection with, or notified, of a Planning Application pursuant to the requirements of the Planning Act or with any third party or advisers and to allow the Affected Authority and such of its professional advisers as it shall direct to attend and to participate at all such meetings and to send to the Affected Authority and to such of its professional advisers as it shall direct copies of the minutes of all such meetings and copies of all correspondence with all such parties;
 - (d) shall permit the Affected Authority and/or such of its professional advisers as it shall direct to attend and participate at all conferences or, as the case may be, consultations with the Planning Advocate and at all meetings between WEPCo and its professional advisers in connection with a Planning Application or as the case may be a Planning Appeal, Planning Call-In or Planning Proceedings and to supply to the Affected Authority a copy of all instructions to the Planning Advocate and copies of all documents referred to therein (including WEPCo's precognitions);
 - (e) shall supply to the Affected Authority and such of its professional advisers as it shall direct a copy of all notes of conferences, or as the case may be, consultations with the Planning Advocate and minutes of all meetings between WEPCo and its professional advisers and all opinions and advice of the Planning Advocate and advice of WEPCo's experts in connection with a Planning Application or as the case may be a Planning Appeal, Planning Call-In or Planning Proceedings; and
 - (f) shall supply to such of the Affected Authority and such of its professional advisers as it shall reasonably direct copies of:
 - (i) all Planning Applications and Planning Appeals and all material documents relevant to a Planning Application or as the case may be Planning Appeal or Planning Call-In including any statements, objections or reports accompanying a Planning Application or as the case may be a Planning Appeal and all statements produced by or on

behalf of WEPCo or supplied by the Local Planning Authority or any third parties; and

- (ii) all applications, affidavits, judgements and all other relevant documents in connection with any Planning Proceedings;

1.9 WEPCo shall within five (5) Business Days of receipt of a Planning Permission:

- 1.9.1 send a copy of the Planning Permission to the Affected Authority; and
- 1.9.2 within fifteen (15) Business Days of receipt of such aforesaid Planning Permission the parties shall give notice in writing to each other whether in their reasonable opinion acting reasonably they consider the Planning Permission to be a Satisfactory Planning Permission or whether it is subject to an Unreasonable Condition and if so specifying such condition and giving the reason why it constitutes an Unreasonable Condition.
- 1.9.3 If either Party fails to so notify the other Party within that period the Planning Permission shall be deemed to be satisfactory to that Party.

1.10 WEPCo shall within five (5) Business Days of receipt of a draft Planning Agreement or Infrastructure Agreement:

- 1.10.1 send a copy of the draft Planning Agreement or Infrastructure Agreement to the Affected Authority; and
- 1.10.2 within fifteen (15) Business Days of receipt of such aforesaid draft Planning Agreement or Infrastructure Agreement the parties shall give notice in writing to each other whether in their reasonable opinion acting reasonably they consider the draft Planning Agreement or Infrastructure Agreement is subject to an Unreasonable Condition and if so specifying such condition and giving the reason why it constitutes an Unreasonable Condition.
- 1.10.3 If either Party fails to so notify the other Party within the period set out in paragraph 1.10.2 above the draft Planning Agreement or Infrastructure Agreement shall be deemed to be satisfactory to that Party;

1.11 If either WEPCo or the Affected Authority notify the other that it considers that the Planning Permission, Planning Agreement or Infrastructure Agreement contains an Unreasonable Condition and either the other party agrees that it is unreasonable or if the outcome of a referral of the dispute between the parties in accordance with Schedule 22 (*Dispute Resolution Procedure*) is that a condition is unreasonable, WEPCo shall at its own expense within twenty (20) Business Days of the agreement or determination either:

- 1.11.1 submit an application pursuant to section 73 of the Town and Country Planning Act 1990 or section 96A of the Town and Country Planning Act 1990 or Section 19 of the Planning (Listed Buildings and Conservation Areas) Act 1990, or Section 13 of the Planning (Hazardous Substances) Act 1990 to vary the Planning Permission to remove the Unreasonable Condition or for the development of the WEPCo Operations without complying with an Unreasonable Condition or Unreasonable Conditions subject to which the Planning Permission was granted (such application to be in a form previously

approved in writing by the Affected Authority) (and in the event that such an application is made such application shall for the purpose of this Agreement be treated as a Planning Application); or

1.11.2 (if the Affected Authority has given its consent in writing) lodge a Planning Appeal in the joint names of WEPCo and the Affected Authority with the Welsh Ministers and shall use all reasonable endeavours to prosecute the Planning Appeal or the Planning Application (as the case may be) with all speed and diligence and shall indemnify the Affected Authority in respect of any award of costs against the Affected Authority in its capacity as a joint appellant.

1.12 WEPCo shall where necessary use all reasonable endeavours to secure the earliest available date for a hearing or inquiry into a Planning Appeal or Planning Call-In and, unless otherwise agreed in writing by the Affected Authority, WEPCo shall accept the first date offered by the Directorate for Planning Inspectorate and Environmental Appeals for a hearing inquiry into a Planning Appeal or Planning Call-In.

1.13 WEPCo shall obtain the prior written approval (such approval not to be unreasonably withheld or delayed) of the Affected Authority to the appointment of the Planning Advocate and other appropriate expert witnesses proposed to be instructed in connection with a Planning Appeal or Planning Call-In or Planning Proceedings.

1.14 Where an Affected Authority is also the Local Planning Authority, this Schedule 12 (*Planning Matters*) shall (for the avoidance of doubt) be subject to Clause 27 (*Agency and Participants' Statutory Authority*).

SCHEDULE 13 - UNREASONABLE CONDITIONS

1. Any limitation, restriction and/or prohibition of use on any land or property owned or occupied by the Affected Authority not the subject of a Planning Application.
2. Any limitation, reduction and/or restriction of the height, area or volume of any proposed building or structure to less than that specified in a Planning Application.
3. Any requirement whether expressed positively or restrictively to carry out any work or works of whatever description on any land or public road or both not included within the land the subject of a Planning Application.
4. Any restriction on the times during and/or days on which any of the WEPCo Operations, and/or facilities or proposed facilities of the Affected Authority whether or not the subject of a Planning Application may be used and/or occupied.
5. Any limitation, restriction and/or prohibition which in the opinion of the Affected Authority would interfere with or prevent the efficient use of the WEPCo Operations and/or facilities or proposed facilities of the Affected Authority.
6. Any requirement whether expressed positively or restrictively to provide a greater area of landscaping than that specified in a Planning Application.
7. Any requirement whether expressed positively or restrictively to provide more or less vehicle parking spaces or facilities proposed for vehicles delivering goods and/or personnel than as specified in a Planning Application.
8. Any restriction, limitation and/or prohibition of the occupation and/or use of the whole or any part of the land the subject of the Planning Application to or by a designated occupier.
9. Any limitation, restriction and/or prohibition on the level of noise emanating from any land the subject of a Planning Application with which it would be, in the opinion of the Affected Authority, impracticable to comply.
10. Any requirement, limitation, restriction and/or prohibition which in the opinion of the Affected Authority would increase the cost of construction and/or operation of the building, structure, engineering operation or use the subject of a Planning Application.
11. Any restriction on the internal operating height of any building or structure the subject of a Planning Application to less than that specified in the Planning Application.
12. Any restriction on the number, type or size of vehicles which may be used and parked on the land the subject of a Planning Application otherwise as specified in the Planning Application.

SCHEDULE 14 - COMPENSATION ON PARTICIPANT EVENT OF DEFAULT AND TERMINATION

SECTION 1 - PARTICIPANT EVENT OF DEFAULT COMPENSATION SUM

1. Where:

1.1 WEPCo has served a Participant Default Notice; and/or

1.2 WEPCo terminates this Agreement with respect to one or more Participants pursuant to Clause 22.2.2(a),

each Participant responsible for the Participant Event of Default giving rise to the service of the Participant Default Notice shall pay to WEPCo the relevant Participant Event of Default Compensation Sum (if any) calculated in accordance with paragraph 2.

2. The Participant Event of Default Compensation Sum payable by a Participant responsible (in whole or in part) for the Participant Event of Default in question shall be an amount equal to:

2.1 the aggregate of the Partnering Service Costs (subject always to operation of the relevant Project Development Fee Caps) which WEPCo or the Supply Chain Members have properly and reasonably incurred in connection with the provision of Project Development Partnering Services to that Participant but which have not been paid by that Participant at the time of service of the Participant Default Notice ("**Unrecoverable Partnering Services Costs**") less an amount equal to the aggregate of:

2.1.1 any such Partnering Service Costs so incurred which would, on the assumption that all Project Agreements continue in full force and effect for the full period of their respective terms, be recovered by Project Service Providers as part of the payments they receive under or in connection with such Project Agreements; and

2.1.2 any sums which any Project Service Provider has received from any of the Participants or has received or is entitled to receive under any policy of insurance by way of payment of, reimbursement or compensation towards any Unrecoverable Partnering Services Costs;

2.2 where the Participant Event of Default giving rise to a Participant Default Notice and/or termination is under Clause 22.1.2, interest at the Default Interest Rate on WEPCo's Partnering Services Costs properly incurred (subject always to the applicable Project Development Fee Cap) in relation to the Approved Project which is the subject of the delay referred to in Clause 22.1.2 for the period of such delay; and

2.3 where the Agreement has been terminated with respect to that Participant as a result of a Participant Event of Default by that Participant under Clause 22.1.2:

2.3.1 anticipated loss of profits for WEPCo on the 'lost' New Project (it being agreed that where more than one Participant has been responsible for the Participant Event of Default, each shall be jointly and severally liable to WEPCo for such lost profits, but WEPCo shall not be entitled to recover in total from all Participants any more than such anticipated loss of profits); and

2.3.2 where the Participant in question would be the sole Relevant Participant for the next New Project projected to reach financial close or otherwise be subject to a concluded Project Agreement in terms of the most recent decision of the SPB in that regard, anticipated loss of profits of WEPCo on that New Project.

3. For the purposes of paragraph 2.3.2, where the next New Project is one of a number of New Projects which are due to reach financial close or otherwise be subject to a concluded Project Agreement at the same time, for which the Participant in question would be the sole Relevant Participant, the next New Project shall be the scheme with the highest capital cost.
4. Where more than one Participant is responsible for the Participant Event of Default, each such Participant shall be jointly liable for payment of the relevant Participant Event of Default Compensation Sum save as provided in paragraph 2.3.1 above.

SECTION 2 - PARTICIPANT EVENT OF DEFAULT TERMINATION SUM

1. If WEPCo's exercise of its rights pursuant to Clause 22.2 results in termination of this Agreement in its entirety, the Participant(s) responsible for the Participant Event of Default which gave rise to the termination shall, in addition to any liability under Section 1 (*Participant Event of Default Compensation Sum*) of this Schedule 14 (*Compensation on Participant Event of Default and Termination*), pay the Participant Event of Default Termination Sum as set out in paragraph 2.
2. The Participant Event of Default Termination Sum shall be an amount equal to the redundancy payments for employees of WEPCo that have been or will be reasonably incurred by WEPCo as a direct result of termination of this Agreement and any amounts payable to the Partnering Subcontractors under and in accordance with the relevant Supply Chain Agreements as a direct result of such termination.
3. The Participant(s) responsible for the Participant Event of Default in question shall be jointly and severally liable for payment of the Participant Event of Default Termination Sum.

SECTION 3 - PAYMENT AND INTEREST

1. PAYMENT AND INTEREST

1.1 In respect of the payments to be made pursuant to this Schedule 14 (*Compensation on Participant Event of Default and Termination*), as soon as practicable after, and in any event within twenty (20) Business Days of the date on which the Participant Default Notice is served, in the case of Section 1 of this Schedule 14 (*Compensation on Participant Event of Default and Termination*), or this Agreement is terminated, in the case of Section 2 (the "**Invoice Date**"), WEPCo shall give to the relevant Participant(s) an invoice for the relevant compensation or termination sum and sufficient supporting evidence, reasonably satisfactory to the Participant(s), justifying the amount of the relevant compensation or termination sum including a breakdown of each of the individual elements of such sum.

1.2 Each relevant Participant shall pay to WEPCo:

1.2.1 the relevant compensation or termination sum within forty (40) Business Days of the Invoice Date; and

1.2.2 interest on the relevant compensation or termination sum (or any part of such sum that remains outstanding) from the date on which the Participant Default Notice is served or on which this Agreement is terminated, as the case may be, in the case of Section 1 of this Schedule 14 (*Compensation on Participant Event of Default and Termination*), or this Agreement is terminated, in the case of Section 2 of this Schedule 14 (*Compensation on Participant Event of Default and Termination*), until the date of payment:

- (a) at [◆]% for the period from (but excluding) the date on which the Participant Default Notice is served, in the case of Section 1 of this Schedule 14 (*Compensation on Participant Event of Default and Termination*), or this Agreement is terminated, in the case of Section 2 of this Schedule 14 (*Compensation on Participant Event of Default and Termination*), to (and including) the date which is forty (40) Business Days after the Invoice Date; and
- (b) thereafter, at the Default Interest Rate.

2. EXCLUSIVITY OF REMEDY

The compensation payable under Sections 1 of this Schedule 14 (*Compensation on Participant Event of Default and Termination*) and Section 2 of this Schedule 14 (*Compensation on Participant Event of Default and Termination*) shall be the sole remedy of WEPCo against the Participants or any of them in connection with the termination of this Agreement but shall be without prejudice to any antecedent claims which any Party may have against any of the others pursuant to the terms of this Agreement.

3. NO DOUBLE RECOVERY

Where termination of this Agreement in respect of any Participant follows service of a Participant Default Notice in respect of such Participant, there shall be no double counting or double recovery pursuant to Section 1 (*Participant Event of Default Compensation Sum*) and 2 (*Participant Event of Default Termination Sum*) of this Schedule 14 (*Compensation on Participant Event of Default and Termination*) of any Partnering Services Costs or loss of profit.

SCHEDULE 15 - TRANSFER OF EMPLOYMENT AND PENSIONS

The provisions of this Schedule 15 shall apply in relation to each Relevant Transfer during the term of this Agreement. In relation to each such Relevant Transfer the provisions of this Schedule 15 shall apply save that WEPCo and the relevant Participant(s) (all acting reasonably) shall agree such amendments to the provisions of this Schedule 15 as are required to reflect the fact that any Transferring Employees may be Transferring Non-Participant Employees, but without imposing liability (actual, potential or contingent) on the relevant Participant in relation to any matter for which it does not have a corresponding right or remedy against the employer(s) of the Transferring Employees.

The provisions of this Schedule 15 shall not, save where expressly provided, apply on expiry or termination of this Agreement and the provisions of Schedule 20 (*Handover on Expiry or Termination*) shall apply in such regard.

Section 1 - General

1. TUPE AND EMPLOYMENT MATTERS³⁴

Relevant Transfer

- 1.1 WEPCo and the Participants agree that the Transfer Regulations may apply to the transfer on one or more dates agreed by the Parties (each a “**Relevant Service Transfer Date**”) to WEPCo of responsibility for provision of (or procuring the provision by any Partnering Subcontractor of) the Partnering Services in accordance with this Agreement and that a Relevant Transfer may take place on each Relevant Service Transfer Date (or such date as may be determined by Law). [The Relevant Service Transfer Date in respect of each of the Partnering Services is specified in Section 2 (*Relevant Service Transfer Dates*) of this Schedule 15 (*Transfer of Employment and Pensions*).]
- 1.2 In accordance with the Transfer Regulations, the contracts of employment of each Transferring Employee shall (subject to Regulation 4(7) of the Transfer Regulations) have effect after the relevant Transfer Date as if originally made between those employees and WEPCo or the relevant Partnering Subcontractor except insofar as such contracts relate to old age, invalidity or survivors benefit.
- 1.3 The Participants and WEPCo agree and intend and shall take all reasonable steps to procure that there shall be a Relevant Transfer on each occasion on which the identity of a service provider changes pursuant to this Agreement and that the contracts of employment of all those employees of the relevant service provider wholly or mainly engaged in the provision of the Partnering Services immediately before the change of identity of the service provider shall have effect (subject to Regulation 4(7) of the Transfer Regulations) thereafter as if originally made between those employees and the new service provider except insofar as such contracts relate to an occupational pension scheme and WEPCo shall and shall procure that both the former and the new service providers shall comply with their obligations under the Transfer Regulations.

³⁴ These provisions are drafted on the basis that the employer of the Transferring Employees is a party to the Strategic Partnering Agreement (i.e. a Local Authority Participant). In the event that the employer is not a party to the Strategic Partnering Agreement), then

1.4 Not used

1.5 Each of the Participants shall comply with their obligations under the Transfer Regulations in respect of each Relevant Transfer pursuant to this Agreement and WEPCo shall comply and shall procure that each Partnering Subcontractor shall comply with their obligations (including without limitation the obligation under Regulation 13(4) of the Transfer Regulations) in respect of each Relevant Transfer pursuant to this Agreement and each of the Participants shall indemnify WEPCo and WEPCo shall indemnify each Participant against any Direct Losses sustained as a result of any breach of this paragraph 1.5 by the party in default.

Offer of Employment

1.6 If the Transfer Regulations do not apply to any person who is a Transferring Participant Employee, WEPCo shall offer to or shall procure the offer by the relevant Partnering Subcontractor to each and every such employee of a new contract of employment commencing on the relevant Transfer Date under which the terms and conditions including full continuity of employment shall not differ from those enjoyed immediately prior to the relevant Transfer Date (except insofar as such terms and conditions relate to an occupational pension scheme) and the offer shall be in writing, shall be open to acceptance for a period of not less than ten (10) Business Days and shall be made:

1.6.1 if it is believed that the Transfer Regulations will not apply to a Transferring Participant Employee, not less than ten (10) Business Days before the relevant Transfer Date; or

1.6.2 if it is believed that the Transfer Regulations apply to a Transferring Participant Employee but it is subsequently decided that the Transfer Regulations do not so apply, as soon as is practicable and in any event no later than ten (10) Business Days after that decision is known to WEPCo.

1.7 Where any such offer as referred to in paragraph 1.6 is accepted, each Participant shall indemnify and keep indemnified in full WEPCo on the same terms and conditions as those set out in paragraphs 1.14 to 1.17 inclusive as if there had been a Relevant Transfer in respect of each and every Transferring Participant Employee relative to that Participant who has accepted any such offer.

1.8 Where any such offer as referred to in paragraph 1.6 is accepted, WEPCo shall act and shall procure that each relevant Partnering Subcontractor shall act in all respects as if the Transfer Regulations had applied to each and every Transferring Participant Employee who has accepted any such offer and shall comply with paragraph 2 in respect of each and every such employee who was immediately before the relevant Transfer Date, an LGPS Participant Employee.

Provision of Information

1.9 Not used.

1.10 Not used.

any employees who are to transfer will be considered to be Transferring Non-Participant Employees for the purposes of these provisions. This will need to be considered further on a case-by-case basis.

1.11 Each Participant shall and WEPCo shall procure that each and every Partnering Subcontractor shall take all reasonable steps, including co-operation with reasonable Requests for Information, to ensure that each and every Relevant Transfer pursuant to this Agreement takes place smoothly with the least possible disruption to the services to the Participants including the Partnering Services and to the employees who transfer from or who are retained by any Participant.

Union Recognition

1.12 Each Participant shall procure if they have the contractual or legal powers to do so and shall otherwise use all reasonable endeavours to procure that every relevant sub-contractor of that Participant shall supply to WEPCo no later than five (5) Business Days prior to the relevant Transfer Date true copies of its Recognition Agreement(s) and WEPCo shall procure that each and every Partnering Subcontractor shall in accordance with the Transfer Regulations recognise the trade unions representing Transferring Employees (as relevant to WEPCo or its Partnering Subcontractors) after the transfer to the same extent as they were recognised by the relevant Participant or the relevant sub-contractor before the relevant Transfer Date.

1.13 WEPCo shall procure that, on each occasion on which the identity of a Partnering Subcontractor changes pursuant to this Agreement, in the event that there is a Relevant Transfer, the new Partnering Subcontractor shall in accordance with the Transfer Regulations recognise the trade unions representing the employees whose contracts of employment transfer to the new Partnering Subcontractor to the same extent as they were recognised before the change of identity of the Partnering Subcontractor in respect of the provision of the Partnering Services at any of the Participants' premises.

Participant Indemnities

1.14 Each Participant shall indemnify and keep indemnified in full WEPCo (for itself and for the benefit of each relevant Partnering Subcontractor) against all emoluments and all other contractual or statutory payments due to any relevant Transferring Participant Employee or former employee of that Participant in respect of his or her employment by that Participant or its termination by that Participant which relate to any period of employment prior to or on the relevant Transfer Date even if the liability to make any such payment does not arise until on or after the relevant Transfer Date (which shall include any backdated pay award by that Participant), and against all income tax and pension and national insurance contributions payable thereon.

1.15 Insofar as paragraph 1.14 does not apply, each Participant shall indemnify and keep indemnified in full WEPCo against all Direct Losses sustained by WEPCo in consequence of any liability which transfers to WEPCo or the Partnering Subcontractors in accordance with the Transfer Regulations and/or the Directive in relation to any relevant Transferring Participant Employee or former employee of that Participant in respect of his or her employment by that Participant or its termination by that Participant which arises as a result of any act or omission by the Participant occurring before or on the relevant Transfer Date. The provisions of this paragraph 1.15 and of paragraph 1.14 shall not apply in respect of any claim that the terms and conditions of employment relating to Pay (as defined in paragraph 1.19) of Transferring Employees contravene the Legislation (as defined in paragraph 1.19) including but not limited to any claim in respect of an Equal Pay Ruling (as defined in paragraph 1.18).

1.16 Where any liability in relation to any Transferring Participant Employee, or former employee of a Participant in respect of his or her employment by a Participant or its termination which transfers in whole or part in accordance with the Transfer Regulations and/or the Directive arises partly as a result of any act

or omission occurring on or before the relevant Transfer Date and partly as a result of any act or omission occurring after the relevant Transfer Date, the relevant Participant shall indemnify and keep indemnified in full WEPCo against only such part of the Direct Losses sustained by WEPCo or any Partnering Subcontractor in consequence of the liability as is reasonably attributable to the act or omission occurring before the relevant Transfer Date.

1.17 The indemnities contained in paragraph 1.14 and paragraph 1.15 shall apply as if references in those paragraphs to any Transferring Participant Employee also included a reference to any Transferring Non-Participant Employee to the extent that the relevant Participant recovers any sum in respect of the subject matter of those indemnities from any sub-contractor of the Participant under any indemnity or other legal entitlement it has against such sub-contractor. Each Participant undertakes that it will use all reasonable endeavours to recover any sums under any such entitlement as is mentioned in this paragraph 1.17.

1.18 For the purposes of this paragraph 1:

"Equal Pay Ruling" means:

- (a) a determination by an employment tribunal or court of competent jurisdiction or the settlement or compromise to which the relevant Participant shall have consented in either case relating to any claim brought by any Transferring Participant Employee before the 1st anniversary of the Commencement Date against the Participant or WEPCo or the Partnering Subcontractor under the Legislation (as defined below) that the terms and conditions of employment relating to Pay (as defined below) of Transferring Participant Employees, contravene the Legislation; and/or
- (b) in relation to any LGPS Participant Employee any alteration to salaries and pay scales prescribed by the Single Status Agreement in order to settle, address or compromise threatened or extant claims under the Legislation against the Local Authority Participant) and/or employers engaged as at the Commencement Date or subsequently in the provision of services to the Local Authority Participant.

1.19 For the purposes of this paragraph 1:

"Legislation" means all and any anti-discrimination and equal pay opportunities laws, including but not limited to the Equal Treatment Directive (Recast) (Council Directive 2006/54/EC), Article 141 of the Treaty of Rome, the Part-Time Workers (Prevention of Less Favourable Treatment) Regulations 2000, the Fixed Term Employees (Prevention of Less Favourable Treatment) Regulations 2002 and the Equality Act 2010

"Pay" means the ordinary basic or minimum wage or salary and any other consideration, whether in cash or in kind, which a Transferring

Participant Employee receives either directly or indirectly in respect of his or her employment, from his/her employer

1.20 If there is an Equal Pay Ruling relating to Transferring Participant Employees then in respect of the period up to and including the relevant Transfer Date relating to such employees, the cost of such Equal Pay Ruling shall be borne by the relevant Participant in the manner set out in paragraph 1.22 and in respect of any subsequent period the cost shall be borne by WEPCo and the relevant Partnering Subcontractor.

1.21 If there is an Equal Pay Ruling relating to any employee of a Participant other than one described in paragraph 1.20 then the cost of such Equal Pay Ruling shall be borne by the relevant Participant even if such Equal Pay Ruling arises from a change to the terms and conditions of an employee of WEPCo or a Partnering Subcontractor.

1.22 Where the costs of an Equal Pay Ruling are to be borne by a Participant pursuant to the provisions of paragraphs 1.20 or 1.21 the Participant shall indemnify WEPCo and keep it indemnified against Direct Losses arising out of or in connection with the Equal Pay Ruling.

1.23 To avoid doubt Clause 16.3 (*Conduct of Claims*) applies to the indemnities under paragraphs 1.5, 1.14, 1.15, 1.16 and 1.22.

1.24 To avoid doubt, nothing in paragraphs 1.5, 1.14, 1.15, 1.16 and 1.22 shall impose any liability upon any Participant for any part of any statutory or contractual redundancy payment to any Transferring Employee which is payable as a result of any termination of employment of a Transferring Employee occurring after the relevant Transfer Date.

Compliance with Legislation and Participant Policies

1.25 WEPCo shall comply and shall procure that each Partnering Subcontractor and all persons employed or engaged by a Partnering Subcontractor in connection with the provision of any Partnering Services shall comply at all times with the Law on health and safety at work and on anti-discrimination and equal opportunities.

1.26 WEPCo shall procure that each Partnering Subcontractor takes all reasonable steps to procure that all persons including any employed or engaged by a Partnering Subcontractor in connection with the provision of any Partnering Services shall, so far as applicable, comply with the Participants' Policies as regards health and safety at work (including the Participants' Policies regarding smoking) and with those relating to anti-discrimination and equal opportunities (including those relating to harassment) and WEPCo shall take and shall procure that every Partnering Subcontractor shall take all such steps as each of the Participants may reasonably require, which shall include co-operation with action proposed or taken by any of the Participants, to ensure that each of the Participants comply with their duties under section 3(1) of the Health and Safety at Work etc Act 1974 regarding the conduct of the undertaking of that Participant.

WEPCo Indemnities

1.27 WEPCo shall indemnify and keep indemnified in full each of the Participants and, at any Participant's request, each and every Future Service Provider against:

1.27.1 claims in respect of all emoluments and all other contractual or statutory payments unpaid by WEPCo or a Partnering Subcontractor to any person entitled to such payments from WEPCo or a Partnering Subcontractor who is or has been employed or

engaged by WEPCo or any Partnering Subcontractor in connection with the provision of any of the Partnering Services which relate to any period of employment or engagement with WEPCo or any Partnering Subcontractor on or after the relevant Transfer Date but prior to the date of expiry or termination of this Agreement (or suspension of exclusivity, as the case may be) and all income tax and pension and national insurance contributions payable thereon; and

1.27.2 insofar as paragraph 1.27.1 above does not apply, all Direct Losses sustained by that Participant in respect of any claim against the Participant incurred as a consequence of the Transfer Regulations or the provision of this paragraph 1, who is or has been employed or engaged by WEPCo or any Partnering Subcontractor in connection with the provision of any of the Partnering Services which arises as a result of any act or omission of WEPCo or the Partnering Subcontractor occurring before the expiry or termination of this Agreement but after the relevant Transfer Date,

but the indemnities in paragraphs 1.27.1 and 1.27.2 shall not apply:

- (a) in respect of any sum for which the Participant is obliged to indemnify WEPCo or a relevant Partnering Subcontractor pursuant to paragraphs 1.14, 1.15 or 1.16; or
- (b) to the extent that the claim arises from a wrongful act or omission of that Participant.

1.28 Clause 16.3 (*Conduct of Claims*) shall apply where any claim is made in respect of the indemnities given by WEPCo under paragraph 1.27.

Staff Records

1.29 Each Participant shall deliver, subject to the requirements of the Law, to WEPCo as soon as reasonably practicable after the relevant Transfer Date all those records relating to the relevant Transferring Employees which were in its possession or under its control at the relevant Transfer Date, which shall include all such records relating to competence, qualifications and training.

1.30 No Participant gives any warranty as to the accuracy or completeness of any records referred to in paragraph 1.29 except that each of the Participants warrants that they have maintained all those records relating to their respective Transferring Employees who were employees of that Participant which the Participant themselves (but not any sub-contractor, predecessor body or previous employer) is required by Law to maintain to the extent which the Law requires.

Compliance with Code Obligations

1.31 Each of the Participants and WEPCo shall and WEPCo shall procure that any relevant Partnering Subcontractor shall have regard to the Code in interpreting and applying the Code Obligations.

1.32 Subject to paragraph 1.34, WEPCo shall procure that any New Employees shall be employed on terms and conditions of employment which are overall fair and reasonable and no less favourable than those of the Transferring Employees engaged in the provision of the Partnering Services who are working alongside and holding the same or a similar position to the New Employees.

1.33 WEPCo shall procure that any relevant Partnering Subcontractor shall consult with the recognised trade unions and where there is no recognised trade union any other employee representatives on the terms to be offered to the New Employees pursuant to paragraph 1.32.

1.34 In addition to its obligations under paragraph 1.32 above, WEPCo shall and shall procure that any Partnering Subcontractor shall offer to the New Employees either:

1.34.1 membership of the LGPS where the employer has Admission Body status within the LGPS and makes the requisite contributions; or

1.34.2 membership of a good quality employer pension scheme, being either:

(a) a contracted out final salary based defined benefit scheme; or

(b) a defined contribution scheme under which the employer must match employee contributions up to six percent (6%); or

1.34.3 a stakeholder pension scheme, under which the employer matches employee contributions up to six percent (6%).

1.35 During the term of this Agreement, WEPCo shall on request by any of the Participants provide or procure that the Participants are provided with such accurate and complete information as reasonably requested by the Participant as soon as reasonably practicable, including the terms and conditions of employment of Transferring Employees and the New Employees, where this is required to monitor WEPCo's compliance with its Code Obligations.

1.36 WEPCo shall and shall procure that any relevant Partnering Subcontractor shall support any central Government sponsored review and monitoring obligation programme on the impact of the Code and on request by any of the Participants provide the Participants with such accurate and complete information as reasonably requested by the Participant as soon as reasonably practicable in order to assist the Participants in doing this.

Disputes Relating to the Code

1.37 Each of the Participants and WEPCo shall in the first instance seek to resolve by discussions between them any complaints from any employee or any recognised trade union in relation to compliance by WEPCo or any Partnering Subcontractor with its Code Obligations.

1.38 Where it appears to a Participant or WEPCo that it is not possible to resolve the matter by continuing discussions between them pursuant to paragraph 1.37 or where an employee of WEPCo or any Partnering Subcontractor or any recognised trade union writes to the relevant Participant to confirm that it has been unable to resolve its compliance directly with WEPCo or any Partnering Subcontractor in relation to WEPCo's or the Partnering Subcontractor's Code Obligations:

1.38.1 the Participant shall first write to WEPCo to seek an explanation for the alleged failure by WEPCo or any Partnering Subcontractor to comply with its Code Obligations. WEPCo shall or shall procure that the relevant Partnering Subcontractor shall provide such an explanation within five (5) Business Days of receipt of the request from the Participant;

- 1.38.2 if the response provided by WEPCo or Partnering Subcontractor satisfies the Participant that the Code Obligations have been met, then the Participant will inform the complainant of this and the matter will be deemed to have been concluded;
- 1.38.3 in the event that the Participant is not satisfied with the response provided by WEPCo or any Partnering Subcontractor, the Participant shall write to WEPCo within five (5) Business Days to require WEPCo to take immediate action to resolve the Dispute; and
- 1.38.4 if, following such a request by a Participant, WEPCo or any Partnering Subcontractor still appears to the Participant not to be complying with its Code Obligations, the matter shall be dealt with in accordance with the New Employee Dispute Resolution Procedure.

Provision of Details and Indemnity

1.39 WEPCo shall as soon as reasonably practicable and in any event within five (5) Business Days following a written request by any Participant to the Participant details of any measures which WEPCo or any Partnering Subcontractor envisages it or they will take in relation to any employees who are or who will be the subject of a Relevant Transfer, and if there are no measures, confirmation of that fact, and shall indemnify each of the Participants against all Direct Losses resulting from any failure by WEPCo to comply with this obligation.

2. PENSION MATTERS

LGPS PARTICIPANT EMPLOYEES

WEPCo to become an Admission Body

2.1 Where WEPCo (or any relevant Partnering Subcontractor) employs any LGPS Participant Employees from a Transfer Date and wishes to offer those LGPS Participant Employees membership of the LGPS, WEPCo shall procure that it (and/or any relevant Partnering Subcontractor) shall become an Admission Body. WEPCo shall before the Transfer Date execute (and procure that any relevant Partnering Subcontractor executes) a Partner Admission Agreement which will have effect from and including the Transfer Date.

Partner Admission Agreement

2.2 Each relevant Local Authority Participant shall before the Transfer Date execute each of the Partner Admission Agreements referred to in paragraph 2.1 [and shall use reasonable endeavours to ensure that the Administering Authority executes each such Partner Admission Agreement before the Transfer Date³⁵.]

Indemnity for a breach of the Partner Admission Agreement

2.3 WEPCo hereby indemnifies the relevant Local Authority Participants and/or any Future Service Provider and, in each case, their sub-contractors on demand from and against all Direct Losses suffered or incurred by it or them which arise from any breach by WEPCo (or any relevant Partnering Subcontractor) of

³⁵ The relevant Local Authority Participant may also be the Administering Authority.

the terms of the Partner Admission Agreement to the extent that such liability arises before or as a result of the termination (howsoever caused), suspension or expiry of this Agreement.

Indemnity or bond

- 2.4 WEPCo shall procure that it (and any relevant Partnering Subcontractor) shall as soon as reasonably practicable obtain the indemnity or bond required in accordance with the Partner Admission Agreements.³⁶

Right of Set Off

- 2.5 The relevant Local Authority Participant shall have a right to set off against any payments due to WEPCo under this Agreement an amount equal to any overdue employer and employee contributions and other payments (and interest payable under the LGPS Regulations) due from WEPCo (or from any relevant Partnering Subcontractor (as applicable)) under the Partner Admission Agreement.³⁷

WEPCo ceases to be an Admission Body

- 2.6 If WEPCo or any relevant Partnering Subcontractor employs any LGPS Participant Employees from a Transfer Date and:

- 2.6.1 WEPCo (or any relevant Partnering Subcontractor) does not wish to offer those LGPS Participant Employees membership of the LGPS;
- 2.6.2 the relevant Local Authority Participant, WEPCo and/or any relevant Partnering Subcontractor are all of the opinion that it is not possible to operate the provisions of paragraph 2.1 to paragraph 2.5 inclusive; or
- 2.6.3 for any reason after the Transfer Date WEPCo or any relevant Partnering Subcontractor ceases to be an Admission Body other than on the date of termination or expiry of this Agreement or because it ceases to employ any LGPS Participant Employees (or any New Employees who join the LGPS pursuant to paragraph 1.34),

then the provisions of paragraph 2.1 to paragraph 2.5 shall not apply (without prejudice to any rights of the relevant Local Authority Participant under those clauses) and the relevant provisions of paragraph 2.7 shall apply in respect of the LGPS Participant Employees.

Membership of a Broadly Comparable Scheme for LGPS Participant Employees

- 2.7 The provisions of paragraphs 2.7.1 and 2.7.2 shall apply in relation to LGPS Participant Employees.

³⁶ Under Regulation 5(5)(a) of the LGPS (Administration) Regulations, the Local Authority (in the majority of cases) must carry out an assessment, taking account of actuarial advice, of the level of financial risk arising on premature termination of the provision of the service or assets by reason of the insolvency, winding up or liquidation of the transferee admission body and that where the level of risk identified by the assessment is such as to require it, the transferee admission body must provide an indemnity or bond to meet the level of risk identified.

³⁷ This clause seeks to mirror the right of set off which must be included in the Partner Admission Agreement under regulation 5(7) of the LGPS (Administration) Regulations.

- 2.7.1 WEPCo shall procure that each LGPS Participant Employee shall on the Transfer Date or the Cessation Date (as applicable) be offered membership of a pension scheme for future service operated by WEPCo (or the relevant Partnering Subcontractor) which must be:
- (a) established within three (3) months of the Transfer Date or the Cessation Date (as the case may be) and maintained until any payment to be made under Schedule 17 (*LGPS Bulk Transfer Terms*) is made;
 - (b) reasonably acceptable to the relevant Local Authority Participant (such acceptance not to be unreasonably withheld or delayed);
 - (c) a registered pension scheme for the purposes of Part 4 of the Finance Act 2004; and
 - (d) certified by the Government Actuary's Department as broadly comparable to the LGPS, assessed following the principles set out in the Statement of Practice issued by the Government Actuary's Department as current at the time.
- 2.7.2 WEPCo shall ensure that a certificate from the Government Actuary's Department referred to in paragraph 2.7.1(d) and 2.7.2(d) for the Broadly Comparable Scheme shall be delivered to the Participants on or before signature of this Agreement (or on or before the Cessation Date as applicable) and shall provide confirmation that the certificate(s) remain in force [three (3)] months before each Transfer Date or Cessation Date (as the case may be) in respect of each LGPS Participant Employee who is to be offered membership of the pension scheme to which the certificate relates.

GAD Certificate

- 2.8 each of the Participants shall provide WEPCo with such information as it (or any Partnering Subcontractor) may reasonably require in relation to the LGPS (as appropriate) to enable WEPCo (or any relevant Supply Chain Members providing any of the Partnering Services) to submit a proposal to the Government Actuary's Department to assess the comparability of the Broadly Comparable Scheme. The Participants may (at their option) provide such information directly to the Government Actuary's Department. WEPCo shall (and it shall procure that any Supply Chain Members providing any of the Partnering Services shall) provide such documentation as is required to enable the Government Actuary's Department to consider the question of comparability including, but not necessarily limited to, the Trust Deed and Rules of the Broadly Comparable Scheme, the latest actuarial valuation report, the latest trustees' report and accounts together with a statement giving details of the increases in pensions in payment and deferred pensions in each of the last ten years and details of any area where the trustees will operate discretion to improve benefits.

Liability for Costs

- 2.9 All costs incurred in connection with the Partner Admission Agreement and/or obtaining a certificate of broad comparability from the Government Actuary's Department shall be borne by WEPCo.

Bulk Transfers

2.10 WEPCo shall procure that each Broadly Comparable Scheme shall be able to accept bulk transfers from the LGPS (as appropriate). WEPCo shall comply with (and shall procure that each relevant Partnering Subcontractor shall comply with) the provisions of Schedule 17 (*LGPS Bulk Transfer Terms*) in respect of transfers from the LGPS following the Transfer Date and any subsequent bulk transfers on termination or expiry of this Agreement.

WEPCo Undertaking

2.11 WEPCo undertakes to each of the Participants (for the benefit of the Participants themselves and for the Participants as agent and trustee for the benefit of the LGPS Participant Employees) that it shall (and shall procure that any relevant Partnering Subcontractor shall) procure that:

- 2.11.1 the LGPS Participant Employees shall by three (3) months before the Transfer Date or the Cessation Date (as the case may be) be offered membership of the Broadly Comparable Scheme with effect from and including the Transfer Date (or Cessation Date (as the case may be)).
- 2.11.2 the Broadly Comparable Scheme shall provide benefits in respect of the LGPS Participant Employees' periods of service on and after the Transfer Date (or Cessation Date (as the case may be)) which the Government Actuary's Department shall certify to be the same as, broadly comparable to, or better than the benefits which the LGPS Participant Employees were entitled to under the LGPS (as applicable) at the Transfer Date (or the Cessation Date (as the case may be)).
- 2.11.3 if the Broadly Comparable Scheme is terminated, a replacement pension scheme shall be provided with immediate effect for those LGPS Participant Employees who are still employed by WEPCo or a relevant Partnering Subcontractor. The replacement scheme must comply with this paragraph 2.11 as if it were the Broadly Comparably Scheme.
- 2.11.4 Where the Broadly Comparable Scheme has not been established by the Transfer Date (or Cessation Date (as the case may be)) the LGPS Participant Employees shall be provided with benefits in respect of death-in-service which are no less favourable than the death-in-service benefits provided by the LGPS (as applicable) before the Transfer Date (or Cessation Date (as the case may be)). Such benefits shall continue to be provided until death-in-service benefits are provided by the Broadly Comparable Scheme.

Subsequent Transfers

2.12 Where during the term of this Agreement the employment of any LGPS Participant Employee is transferred on a second and/or subsequent occasion as a result of a change of service provider, WEPCo shall procure that each LGPS Participant Employee who is a member of, or eligible for membership of, the outgoing employer's pension scheme shall be offered membership of a pension scheme operated by the new employer which, as a minimum:

- 2.12.1 for future service offers the benefits which enabled the outgoing employer's pension scheme to be certified as being broadly comparable in accordance with the provisions of paragraphs 2.7; and

2.12.2 must be able to accept bulk transfers from the outgoing employer's pension scheme (where the pension schemes are different) in respect of benefits which the LGPS Participant Employee had accrued or been credited in the outgoing employer's pension scheme,

and WEPCo shall (and shall procure that any relevant Partnering Subcontractor) shall consult with and inform those employees of the pension provisions relating to the transfer.

Each of the Participants shall have the right, but not the obligation, on any second or subsequent transfer, to request the Government Actuary's Department to certify, in respect of any new employer's pension scheme, that the requirements of paragraph 2.7.1 or paragraph 2.7.2 as the case may be have been met. WEPCo shall procure that any new employer shall provide all such documentation as is required to enable the Government Actuary's Department to make the necessary assessment.

WEPCo shall further procure that where during the term of this Agreement the employment of any New Employee is transferred on a second and/or subsequent occasion as a result of a change of Partnering Subcontractor or any sub-contracting of the Partnering Services, the New Employee is offered membership of a pension scheme operated by the new employer which, as a minimum, complies with the requirements of paragraph 1.34.

Pension issues on Expiry or Termination

2.13 WEPCo shall (and shall procure than any relevant Partnering Subcontractor) shall:

2.13.1 maintain such documents and information as will be reasonably required to manage the pension aspects of any onward transfer of any person engaged or employed by WEPCo (or any relevant Partnering Subcontractor) in the provision of the Partnering Services on the expiry or termination of this Agreement (including without limitation identification of the LGPS Participant Employees and New Employees who have accepted the offer of pension provision pursuant to paragraph 1.34;

2.13.2 provide to Participants such documents and information mentioned in sub-paragraph 2.13.1 which any of the Participants may reasonably request in advance of the expiry or termination of this Agreement; and

2.13.3 fully co-operate (and procure that the trustees of the Broadly Comparably Scheme shall fully co-operate) with the reasonable requests of any of the Participants relating to any administrative tasks necessary to deal with the pension aspects of any onward transfer of any person engaged or employed by WEPCo (or any relevant Partnering Subcontractor) in the provision of the Partnering Services on the expiry or termination of this Agreement.

Discretionary Benefits

2.14 Where WEPCo (or a relevant Partnering Subcontractor) is an Admission Body, WEPCo shall (and/or shall procure that any relevant Partnering Subcontractor shall) award benefits (where permitted) to the LGPS Participant Employees under the LGPS (Compensation) Regulations and/ or the LGPS in

circumstances where the LGPS Participant Employees would have received such benefits had they still been employed by the relevant Local Authority Participant.

2.15 Where the award of benefits in paragraph 2.14 is not permitted under the LGPS (Compensation) Regulations and/or the LGPS or where WEPCo (and/or a relevant Partnering Subcontractor) is not an Admission Body, WEPCo shall (and/or shall procure that any relevant Partnering Subcontractor shall) award benefits to the LGPS Participant Employees which are identical to the benefits the LGPS Participant Employees would have received under the LGPS (Compensation) Regulations and/or the LGPS in circumstances where the LGPS Participant Employees would have received such benefits had they still been employed by the relevant Local Authority Participant.

2.16 Where under paragraphs 1.1 and 2.14 such benefits are of a discretionary nature, they shall be awarded on the basis of the relevant Local Authority Participant's written policy in relation to such benefits at the time of the Transfer Date (which the relevant Local Authority Participant shall provide upon request). Where the payment of such benefits is not, for whatever reason, possible, WEPCo shall (and/or shall procure that any relevant Supply Chain Member providing any of the Partnering Services shall) compensate the LGPS Participant Employees in a manner which is broadly comparable or equivalent in cash terms.

[Section 2 - Relevant Service Transfer Dates]

[APPENDIX 1 - NEW EMPLOYEE DISPUTE RESOLUTION PROCEDURE]

1. INTRODUCTION

This Appendix 1 to Schedule 15 (*Transfer of Employment and Pensions*) sets out the procedure to be followed in resolving any disputes arising in respect of the compliance or otherwise by WEPCo or any Partnering Subcontractor and/or their subcontractors with the provisions of paragraphs 1.32 to 1.38 inclusive of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*). The parties agree that the procedure should be the last resort and will make their best efforts to resolve any dispute by agreement. The parties support the Government criteria that the Alternative Dispute Resolution procedure (ADR) should be fast, efficient and cost-effective.

2. THE NEED TO EXHAUST LOCAL PROCEDURES

2.1 The parties shall exhaust all normal local procedures before invoking the ADR contained in this Schedule 15 (*Transfer of Employment and Pensions*). For the avoidance of doubt, this shall mean that:

- 2.1.1 where any complaints arise from employees and/or recognised trade unions those organisations should, in the first instance, seek to resolve any such complaints directly with WEPCo or any Partnering Subcontractor and WEPCo or any Partnering Subcontractor and/or their subcontractors shall enter into discussions with such employees and/or recognised trade unions and shall use their best endeavours to resolve any such dispute;
- 2.1.2 where it appears to any of the Participants that WEPCo or any Partnering Subcontractor and/or their subcontractors are not meeting its obligations under paragraphs 1.32 to 1.38 of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*), or where an employee of WEPCo or a Partnering Subcontractor and/or their subcontractors or any recognised trade union writes to any of the Participants to confirm that it has been unable to resolve its complaint directly with WEPCo or any Partnering Subcontractor and/or their subcontractors under paragraph 2.1.1 above, the Participant shall first write to WEPCo to seek an explanation for alleged failure by WEPCo or any Partnering Subcontractor and/or their subcontractors to comply with paragraphs 1.32 to 1.38 inclusive of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*). WEPCo shall provide such an explanation in writing within three (3) Business Days of receipt of the request from the Participant pursuant to this paragraph 2.1.2.
- 2.1.3 if the response provided by WEPCo under paragraph 2.1.2 satisfies the Participant that the terms of paragraphs 1.32 to 1.38 inclusive of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*) have been followed, then the Participant will inform the complainant of this and the matter will be deemed to have been concluded;
- 2.1.4 in the event that the Participant is not satisfied with WEPCo's response provided pursuant to paragraph 2.1.2, the Participant shall write to WEPCo within five (5) Business Days to require WEPCo to take immediate action to resolve this dispute; and

2.1.5 if, following such a request by the Participant pursuant to paragraph 2.1.4, WEPCo or any Partnering Subcontractor and/or their subcontractors still appears to the Participant not to be complying with the requirements of paragraphs 1.32 to 1.38 inclusive of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*), the matter shall be dealt with in accordance with the procedure set out in paragraphs 3 and 4 below.

3. **RESPONSIBILITY FOR RESOLVING DISPUTES**

The ADR procedure set out in this Appendix 1 shall be under the supervision of an independent person (the “**Independent Person**”) appointed by the parties from an approved list supplied by ACAS. If the parties so agree, they may appoint two “wing members”, with one being from an employer background and one being from trade union background, to assist the Independent Person.

4. **THE DISPUTE RESOLUTION PROCESS**

Disputes will be resolved using the following three-stage procedure:

Stage 1: Initial reference to the Independent Person

4.1 The parties shall invite the Independent Person to answer three questions:

- (i) Is this a dispute about compliance with paragraphs 1.32 to 1.38 inclusive of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*)?

If the answer to question (i) is no, the matter can proceed no further. If the answer to question (i) is yes, then the Independent Person will move to question (ii).

- (ii) Have the parties exhausted local procedures?

If the answer to question (ii) is no, then the Independent Person shall invite the parties to make further local efforts to resolve the dispute. If the answer to question (ii) is yes, then the Independent Person will conduct an independent assessment, by answering question (iii) and giving reasons for their answer.

- (iii) Do the terms and conditions of employment on offer to new employees comply with the requirements of paragraphs 1.32 to 1.38 inclusive of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*)?

If the answer to question (iii) is yes following the assessment by the Independent Person, then the matter is deemed to be concluded and WEPCo and any Partnering Subcontractor can continue to offer the same package of conditions to new employees. If the answer to question (iii) is no, then the dispute will proceed to Stage 2.

The Time limit for Stage One of the procedure is twenty (20) Business Days.

Stage 2: Discussions with a view to reaching an agreement on compliant terms and conditions

4.2 At the commencement of Stage 2 of the ADR process, the parties will be invited by the Independent Person to seek to resolve the matter through further discussions.

- 4.2.1 The Independent Person will make themselves available to the parties to facilitate the process or to facilitate a mediation by the parties of the issues in dispute. The parties shall also have the option of establishing other arrangements for mediation as they shall deem appropriate.
- 4.2.2 If the parties can reach an agreement consistent with the terms of paragraphs 1.32 to 1.38 inclusive of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*) following such further discussions or mediation under paragraph 4.2.1, then the matter is closed and the new package of conditions of employment will be applied both to new starters and to those employed during the dispute.
- 4.2.3 If no agreement can be reached within the allotted time then the dispute will proceed to Stage 3.

The time limit for Stage Two of the procedure is ten (10) Business Days. The parties may, by the agreement of all the parties to the dispute and with the consent of the Independent Person extend the time limit for this stage of the procedure by up to a maximum of a further fifteen (15) Business Days.

Stage 3: Final Reference to the Independent Person

4.3 In the event that the matter cannot be resolved within the periods specified at Stage Two of the procedure, the Independent Person shall invite the parties to make final written submissions concerning the points of dispute.

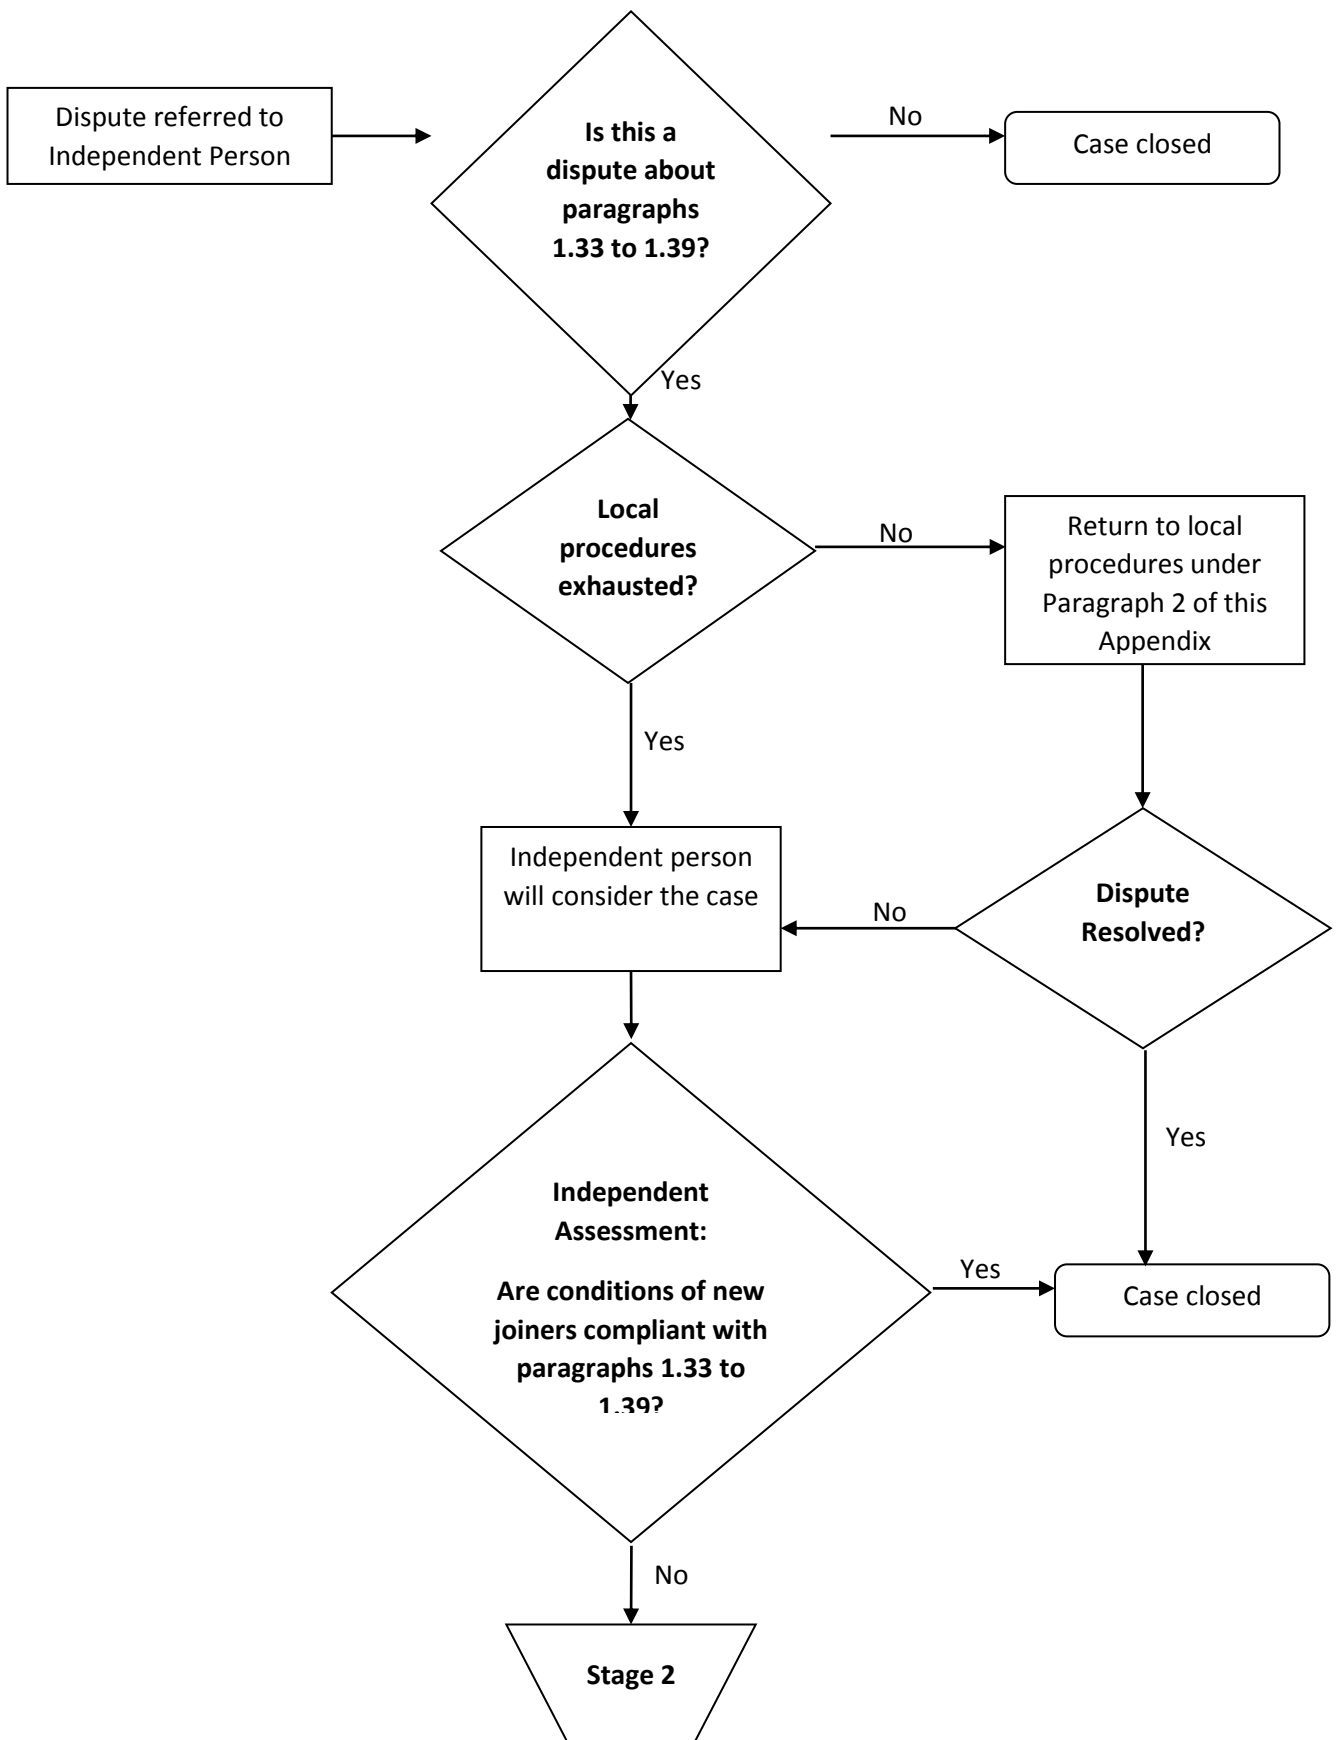

- 4.3.1 If the Independent Person then believes it would be worthwhile, the parties may be given a short period of further discussion of up to five (5) Business Days although the Independent Person may increase this period at their discretion.
- 4.3.2 If the Independent Person does not believe that the matter will not be resolved by allowing a further period of discussion or if during any additional period allowed for discussion the parties are unable to agree on how to bring the matter to a successful conclusion, then the Independent Person will proceed to a final binding arbitration.
- 4.3.3 The Independent Person shall hear such further evidence as the parties may choose to advance (either in writing or by oral submission) and having heard such evidence and reached a conclusion the Independent Person will impose a revised package of terms and conditions applicable to each of the affected employees. The parties agree to be bound by the decision of the Independent Person and shall adhere to the requirements of their decision.

The time limit for this final stage of the procedure is ten (10) Business Days. This period may be extended at the discretion of the Independent Person.

4.4 For the avoidance of doubt, following the resolution of any dispute at any stage of the procedure set out above, then the new package of conditions of employment will be applied both to new starters and

to those employed by WEPCo or any Partnering Subcontractor and/or their subcontractors engaged during the period during which the dispute was being resolved.

Stage 1: Referral to Independent Person and Execution of Independent Assessment (twenty (20) Business Days in total from the point when ADR is invoked)

Stage 2: Parties given time to resolve the dispute, with ongoing joint access to the Independent Person and with the option of mediation (ten (10) Business Days, extendable by agreement)

Stage 3: Final submissions and Arbitration (ten (10) Business Days)

SCHEDULE 16 - TEMPLATE PROJECT BIM AGREEMENT³⁸

³⁸ Welsh Government will share a draft of the Template Project BIM Agreement with bidders in the first round of dialogue. This will form the basis of dialogue with Bidders and Bidders responses will be evaluated.

SCHEDULE 17- [LGPS BULK TRANSFER TERMS]

The provisions of this Schedule 17 shall apply in relation to each Relevant Transfer during the term of this Agreement which affects LGPS Participant Employees. In relation to each such Relevant Transfer the provisions of this Schedule 17 shall apply save that WEPCo and the relevant Participant(s) (all acting reasonably) shall agree such amendments to the provisions of this Schedule 17 as are required to reflect the specifics of the transfer in terms of details of the Administering Authority's Actuary, the Funds, the Due Date and Actuary's Letter, the matters identified herein and any comments from the Administering Authority.

1. DEFINITIONS

1.1 In this Schedule 17 (*LGPS Bulk Transfer Terms*) the following expressions shall, unless the context otherwise requires, have the following meanings:

| | |
|-------------------------------------|--|
| "Actuary's Letter" | means, in respect of each Fund, the letter from the Administering Authority's Actuary, stating the methods and assumptions to be used for the purposes of this Schedule 17 (<i>LGPS Bulk Transfer Terms</i>), a copy of which is set out as Appendix 1 (<i>Actuary's Letter</i>) to this Schedule 17 (<i>LGPS Bulk Transfer Terms</i>) |
| "Administering Authority's Actuary" | means [name of actuary] of [name of firm], or another actuary appointed by the relevant Administering Authority for the purposes of this Schedule 17 (<i>LGPS Bulk Transfer Terms</i>) |
| "AVCs" | means AVCs or SCAVCs as defined in the LGPS Regulations |
| "Broadly Comparable Scheme" | means the pension scheme or schemes to be provided by the Employer in accordance with paragraph 2.7.1 of Section 1 (<i>General</i>) of Schedule 15 (<i>Transfer of Employment and Pensions</i>) (or, where the context so requires, the trustees for the time being of such scheme) |
| "Due Date" | means the date [] days after the last of the conditions in paragraph 3.6 has been satisfied |
| "Employer" | means WEPCo and/or any Partnering Subcontractor who employs a LGPS Participant Employee from the Transfer Date |
| "Employer's Actuary" | means [name of actuary] of [name of firm], or another actuary appointed by the Employer for the purposes of this Schedule 17 (<i>LGPS Bulk Transfer Terms</i>) |
| "Fund" | means each of the [] and [] Funds within the LGPS ³⁹ |
| "Transfer Amount" | means the amount or amounts referred to in paragraph 3.1 |

³⁹

Drafting will require to be reviewed and updated where there is more than one LGPS Participant Fund

"Transferring Member" means an LGPS Participant Employee who agrees to a transfer of benefits being made for him or her from the relevant Fund to the Broadly Comparable Scheme under paragraph 2

1.2 In this Schedule 17 (*LGPS Bulk Transfer Terms*) other defined terms shall, unless the context otherwise requires, have the meanings given to them in Schedule 1 (*Definitions, Interpretation and Construction*).

2. THE BROADLY COMPARABLE SCHEME

WEPCo shall procure that the Employer shall invite each LGPS Participant Employee who joins the Broadly Comparable Scheme in accordance with paragraph 2.7.1 of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*) to consent to a transfer of benefits being made for him from the relevant Fund to the Broadly Comparable Scheme. The Employer must issue this invitation no later than [one] month after the Transfer Date. The invitation must be in a form that is acceptable to the relevant Local Authority Participant and the relevant Administering Authority (such acceptance not to be unreasonably withheld or delayed by the relevant Local Authority Participant) and that complies with any requirements of the LGPS Regulations. Any LGPS Participant Employee wishing to consent to a transfer of benefits must notify the Employer of this consent in writing no later than [three] months after the date of the invitation. The Employer shall provide the relevant Local Authority Participant and the relevant Administering Authority with the names of the Transferring Members no later than [four] months after the Transfer Date.

3. TRANSFER PAYMENT FROM THE FUND

3.1 In respect of its own LGPS Participant Employees, each Local Authority Participant shall use reasonable endeavours to ensure that the relevant Administering Authority transfers from the Fund to the Broadly Comparable Scheme on the Due Date an amount in respect of the relevant Transferring Members' service in the Fund before the Transfer Date calculated in accordance with the Actuary's Letter and Part 9 of the LGPS Regulations.

3.2 As soon as reasonably practicable following the Transfer Date, WEPCo shall procure that the Employer shall promptly provide all data within its possession or under its control which the relevant Administering Authority and the Administering Authority's Actuary may require for the calculation of the Transfer Amount and shall warrant that this data is in all material respects true, complete and accurate.

3.3 As soon as reasonably practicable following the Transfer Date, the relevant Local Authority Participant shall promptly provide all data within its possession or under its control which the relevant Administering Authority and the Administering Authority's Actuary may require for the calculation of the Transfer Amount In respect of its own Transferring Members, and shall warrant that this data is in all material respects true, complete and accurate.

3.4 The relevant Local Authority Participant shall use its reasonable endeavours to procure that:

3.4.1 as soon as reasonably practicable after the Administering Authority's Actuary has been provided with the necessary data and information, the Administering Authority's Actuary shall calculate the Transfer Amount In respect of its own Transferring Members, in accordance with the Actuary's Letter and the LGPS Regulations; and

3.4.2 within [one week] of completing this calculation, the Administering Authority's Actuary shall notify the Employer's Actuary in writing of the particulars of the calculation and the data on which the calculation is based.

The Employer's Actuary will then have [one month] (or such longer period as the parties may agree) from the date on which those particulars and data have been supplied to him in which to object in writing that the calculation is incorrect or not in accordance with the Actuary's Letter. The calculation shall be final and binding on the parties if the Employer's Actuary raises no objection within this stated period.

3.5 If the Employer's Actuary objects in writing under paragraph 3.4 and the Administering Authority's Actuary and the Employer's Actuary cannot subsequently agree the relevant Transfer Amount within [one] month (or such longer period as shall be agreed between the parties) of the objection, then the amount shall be determined by an independent actuary to be nominated by the relevant Administering Authority and the Employer jointly or, if they cannot agree, by the President of the Faculty of Actuaries on application by either party. The independent actuary shall act as an expert and not as an arbitrator, and his decision shall be final and binding on the parties. The independent actuary's costs shall be payable equally by the relevant Administering Authority and the Employer.

3.6 Payment to the Broadly Comparable Scheme of the Transfer Amount shall only be made on the following conditions:

3.6.1 the Transfer Amount has been agreed or determined under paragraph 3.4 or 3.5 and in accordance with the LGPS Regulations;

3.6.2 the Employer has complied with all its obligations under this Schedule 17 (*LGPS Bulk Transfer Terms*); and

3.6.3 the trustees of the Broadly Comparable Scheme have confirmed in writing that:

(a) a payment should be made in accordance with the LGPS Regulations and that they shall accept payment on the terms set out in paragraph 4;

(b) they shall accept liability for each Transferring Member's accrued contracted out rights under the Fund; and

(c) they shall accept the Transfer Amount in full and final settlement of all claims against the Fund in respect of each Transferring Member.

3.7 [The payment of the relevant Transfer Amount shall be satisfied by the transfer of readily marketable stocks and shares of the relevant Fund as agreed by the relevant Administering Authority and the trustees of the Broadly Comparable Scheme having a mid-market value on the day before the Due Date equal to the relevant Transfer Amount. If the relevant Administering Authority and the trustees of the Broadly Comparable Scheme are not able to agree some or all of the particular assets to be transferred, or the mid-market value of any such assets, the payment of the Transfer Amount (or the appropriate part of

it) shall be satisfied by the relevant Fund transferring cash equal to []% of that part of the relevant Transfer Amount in respect of which there has been no agreement as to the assets to be transferred.]⁴⁰

4. PAST SERVICE BENEFITS

4.1 WEPCo shall procure that the Employer shall ensure that:

4.1.1 the Broadly Comparable Scheme provides in respect of each Transferring Member such benefits as the Administering Authority's Actuary certifies to be of actuarially equivalent value [(in accordance with the Actuary's Letter)]⁴¹ to the benefits which would have been payable under the LGPS in respect of the Transferring Member's service before the Transfer Date if he had remained a member of the LGPS; [and

4.1.2 the Transfer Amount will, subject only to any HM Revenue & Customs limits that may still apply, be wholly applied in the Broadly Comparable Scheme for the provision of the benefits mentioned in this paragraph 4.1 ⁴²] and

4.1.3 the Broadly Comparable Scheme provides in respect of each Transferring Member such benefits as the Administering Authority's Actuary certifies to be of actuarially equivalent value [(in accordance with the Actuary's Letter)]⁴³ to the benefits which would have been payable under the LGPS in respect of the Transferring Member's service before the Transfer Date if he had remained a member of the LGPS.

5. ADDITIONAL VOLUNTARY CONTRIBUTIONS

5.1 Nothing in this Schedule 17 (*LGPS Bulk Transfer Terms*) shall apply to AVCs or to benefits secured by them. However, the relevant Local Authority Participant shall use reasonable endeavours to ensure that the assets representing each Transferring Member's AVCs in the Fund (if any) shall be transferred to the Broadly Comparable Scheme. WEPCo shall procure that the Employer shall ensure that the Broadly Comparable Scheme provides benefits for each relevant Transferring Member which are equivalent to the assets transferred.

6. NO ASSISTANCE

6.1 WEPCo shall procure that the Employer shall not encourage or initiate or assist or facilitate any action or provide any financial assistance for the purpose of requiring the relevant Fund to pay an amount

⁴⁰ The form of payment and discount for cash needs to be discussed with the Administering Authority. If this is to be covered in the Actuary's Letter, this clause can be deleted.

⁴¹ It may be necessary to refer to the Actuary's Letter to determine what 'actuarially equivalent value' means. 'Actuarially equivalent value' is the term used in the HM Treasury Guidance 'A Fair Deal for Staff Pensions : Procurement of Bulk Transfer Agreements and Related Issues'.

⁴² The Local Authority may wish to consider whether it wants to seek to ring-fence any Transfer Amount within the Broadly Comparable Scheme. The Local Authority should consult with its professional advisers regarding this option.

⁴³ It may be necessary to refer to the Actuary's Letter to determine what 'actuarially equivalent value' means. 'Actuarially equivalent value' is the term used in the HM Treasury Guidance 'A Fair Deal for Staff Pensions : Procurement of Bulk Transfer Agreements and Related Issues'.

larger than the relevant Transfer Amount to the Broadly Comparable Scheme in respect of the Transferring Members.

7. [EXIT PROVISIONS]⁴⁴

7.1 WEPCo undertakes on its own behalf and on behalf of the Employer to the relevant Local Authority Participant (for the benefit of the relevant Local Authority Participant itself and for the relevant Local Authority Participant as agent and trustee for the benefit of its LGPS Participant Employees)⁴⁵ that on:

- 7.1.1 the expiry or termination of this Agreement or of the relevant Supply Chain Agreement (in the case of Partnering Subcontractors); or
- 7.1.2 the employment of any LGPS Participant Employee transferring to a new employer in accordance with paragraph 2.12 of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*) (or otherwise),

WEPCo shall procure that the Employer shall procure that the trustees of the Broadly Comparable Scheme offer bulk transfer terms in respect of the relevant LGPS Participant Employees' service in the Broadly Comparable Scheme to the pension scheme of the relevant Local Authority Participant or any Future Service Provider (or their sub-contractors) which are no less favourable (in the opinion of the Administering Authority's Actuary or an actuary appointed by the relevant Local Authority Participant) than the bulk transfer terms set out in the Actuary's Letter, subject to a reasonable adjustment in respect of market fluctuations since the date of the Actuary's Letter.

7.2 If the transfer payment paid by the trustees of the Broadly Comparable Scheme is less (in the opinion of the Administering Authority's Actuary or an actuary appointed by the Local Authority) than the transfer payment which would have been paid had paragraph 7.1 been complied with, the Employer shall pay to the relevant Local Authority Participant or any Future Service Provider (or their sub-contractor) (as appropriate) (or as such person shall direct) the amount of the difference.^{46]}

⁴⁴ The exit provisions aim to reflect as far as possible the exit requirements of HM Treasury Guidance 'A Fair Deal for Staff Pensions : Procurement of Bulk Transfer Agreements and Related Issues'. The Local Authority could consult with its professional advisers regarding these provisions and the Guidance and the requirements it wishes to impose.

⁴⁵ HM Treasury have indicated that the exit provisions in HM Treasury Guidance 'A Fair Deal for Staff Pensions : Procurement of Bulk Transfer Agreements and Related Issues' may cover not only Transferring Members but also LGPS Participant Employees who did not transfer their benefits from the LGPS under the initial bulk transfer but did join the Broadly Comparable Scheme for future service only. The Local Authority should consult with its professional advisers regarding the scope of the employees it wishes to protect under this paragraph.

⁴⁶ HM Treasury Guidance 'A Fair Deal for Staff Pensions : Procurement of Bulk Transfer Agreements and Related Issues' provides that onward bulk transfer requirements can be imposed on the pension scheme and/or the sponsoring employer. The Local Authority will need to consider whether it wants to include a shortfall obligation of this type on the Employer.

APPENDIX 1 - [ACTUARY'S LETTER]

[To be inserted on a case by case basis for each Relevant Transfer to which this Schedule 17 applies]

SCHEDULE 18- [PARTNER ADMISSION AGREEMENT]

[To be inserted on a case by case basis for each Relevant Transfer requiring a Partner Admission Agreement]

SCHEDULE 19- CONFIDENTIAL INFORMATION

SECTION 1 - COMMERCIALLY SENSITIVE INFORMATION⁴⁷

Column 1

Column 2

Commercially sensitive contract provisions

For the period ending on the date below.

⁴⁷ To be completed at Selected Bidder stage.

SECTION 2 - COMMERCIALY SENSITIVE MATERIAL⁴⁸

Column 1

Column 2

Commercially sensitive material

For the period ending on the date below

⁴⁸ To be completed at Selected Bidder stage.

SCHEDULE 20 - HANDOVER ON EXPIRY OR TERMINATION

1. PROVISIONS UPON TERMINATION

- 1.1 On the expiry or earlier termination of this Agreement, in respect of one or more Participant, each of the Participants and WEPCo agree that it is their intention that the Transfer Regulations shall apply in respect of the provision thereafter of any service equivalent to a Partnering Services but the position shall be determined in accordance with the Law at the date of expiry or termination as the case may be and this paragraph is without prejudice to such determination. For the avoidance of doubt, for the purposes of this Schedule 20 (*Handover on Expiry or Termination*), the term "Supply Chain Member" shall be construed as including any subcontractors engaged by WEPCo or any Supply Chain Member in connection with the delivery of the Partnering Services.
- 1.2 On the expiry or earlier termination of this Agreement in respect of one or more Participant, where the Transfer Regulations apply, the contracts of employment of all employees who immediately prior to the Transfer Event are wholly or mainly engaged on the service or services which are the Partnering Services and which are the subject of the Transfer Event ("**Assigned Staff**") shall transfer on the basis of the Transfer Regulations and have effect after the Transfer Event as if originally made between the Assigned Staff and the relevant Participant(s) and/or any new Contractor.
- 1.3 Where the Transfer Regulations apply as aforesaid, the relevant parties shall take all reasonable steps to ensure that a smooth transition is effected in respect of the transfer of the contracts of employment of the Assigned Staff from the Transfer Event and the relevant Participant shall comply and procure that, where appropriate, any new Contractors shall comply with their obligations under Regulation 13 of the Transfer Regulations.
- 1.4 If the Transfer Regulations do not apply on expiry or earlier termination of this Agreement in respect of one or more Participant, the relevant Participant(s) shall ensure that each new provider (if any) of a service equivalent to a Partnering Service on or after expiry or termination of this Agreement (including the relevant Participant(s)) shall offer employment to the persons employed by WEPCo or a Supply Chain Member providing any of the Partnering Service in the provision of the Partnering Services immediately before the expiry or termination of this Agreement and shall indemnify WEPCo or a Partnering Subcontractor for Direct Losses any of them suffer or incur as a result of its failure to do so, and for any costs, claims or liabilities for redundancy payments (whether statutory or contractual)⁴⁹.
- 1.5 If an offer of employment is made in accordance with paragraph 1.4 above, the employment shall be on the same terms and conditions (except for entitlement to membership of an occupational pension scheme, which shall be dealt with in accordance with paragraph 2 of Section 1 (*General*) of Schedule 15 (*Transfer of Employment and Pensions*) as applied immediately before the expiry or earlier termination of this Agreement including full continuity of employment, except that the relevant Participant(s) or other new service provider may at its absolute discretion not offer such terms and conditions if there has been any change to the terms and conditions of the persons concerned in breach of paragraph 1.9 below.
- 1.6 Save where any such Direct Losses are as a result of any act or omission of a Participant or its subcontractors, WEPCo shall indemnify, and keep indemnified, each Participant and, at the Participant's request, each and every service provider who shall provide any service equivalent to any of the Partnering

⁴⁹ Participants should ensure that this obligation is passed on to the new service provider by way of contract.

Services after a Transfer Event against all Direct Losses sustained by the Participant arising in connection with:

- 1.6.1 any act or omission in respect of any of the Assigned Staff by WEPCo or a Partnering Subcontractor prior to the Transfer Event (including without limitation the employment or termination of the employment of any of the Assigned Staff), and WEPCo's or a Partnering Subcontractor's obligations under Regulation 13 of the Transfer Regulations but excluding in relation to any occupational pension scheme;
- 1.6.2 any claim by any person arising from any negligent act or omission of any of the Assigned Staff prior to the Transfer Event;
- 1.6.3 any claim for personal injury sustained by any of the Assigned Staff the cause of action of which arose during their employment prior to the Transfer Event save that in this respect the indemnity given by WEPCo shall extend only to such sum as is referable to the period of employment with WEPCo or a Partnering Subcontractor;
- 1.6.4 any employees or former employees of WEPCo or of any provider of a service or services which are Partnering Services who are not identified to the relevant Participant(s) as being Assigned Staff prior to the relevant Transfer Event arising out of any claim that their employment or any liability in respect of their employment or its termination has or should have transferred to the relevant Participant(s) and/or any new Contractor pursuant to the Transfer Regulations and/or the arrangements contemplated by the relevant agreement; and
- 1.6.5 all emoluments and other contractual or statutory payments or parts thereof due to any Assigned Staff member arising before the Transfer Event or which fall due for payment after the Transfer Event but which relate to any period before that date (including, for the avoidance of doubt, any liabilities arising in relation to any equal pay claims relating to the Assigned Staff).

1.7 Clause 16.3 (*Conduct of Claims*) shall apply where any claim is made in respect of the indemnities given by WEPCo under paragraph 1.6.

1.8 For the avoidance of doubt, nothing in paragraph 1.6 shall impose any liability on WEPCo for any part of any statutory or contractual redundancy payment to any Assigned Staff member which is payable as a result of any termination of employment occurring on or after the Transfer Event.

1.9 Subject to its obligations under the Data Protection Act 2018 no less than twelve (12) months prior to a Transfer Event, WEPCo shall supply or shall procure the supply of details of the Assigned Staff to the relevant Participant(s) and/or at the direction of the relevant Participant(s), to any new Contractor, and shall advise the relevant Participant(s) and any new Contractor of any alteration thereto occurring prior to the Transfer Event. These details (being the "**Retendering Information**") are to include the names of the Assigned Staff and in respect of each one, the:

- 1.9.1 terms of employment (including full particulars of emoluments and benefits);
- 1.9.2 date of commencement of employment;
- 1.9.3 current job title and details of proportion of time spent working on the Partnering Services;

- 1.9.4 any professional bodies, trade unions and other bodies of which the Assigned Staff are members and the identity of any representatives of such bodies of which WEPCo and the relevant Partnering Subcontractor is aware; and
- 1.9.5 full details of any actions, claims or disputes involving any Assigned Staff of which WEPCo and any of the Partnering Subcontractor is aware or anticipates.

1.10 WEPCo shall inform the Participants of any changes to the information given pursuant to this paragraph 1.10. WEPCo shall indemnify and keep indemnified in full each Participant and at the Participant's request any new Contractor against all Direct Losses arising from any claim by any party as a result of WEPCo or Partnering Subcontractor failing to provide or promptly to provide the Participant or at the Participant's request any new Contractor with any Retendering Information and/or Employee Liability Information or to provide full Retendering Information and/or Employee Liability Information or as a result of any material inaccuracy in or omission from the Retendering Information and/or Employee Liability Information.

1.11 From the later of the period beginning twelve (12) months prior to the Transfer Event or from the date on which notice of termination is served WEPCo shall not and shall procure that any Partnering Subcontractor shall not:

- 1.11.1 enter into any negotiation with or make any offer to the Assigned Staff or any of them concerning the terms of their employment other than in the normal course of business without the Participants' consent (which shall not be unreasonably withheld). Nothing in this paragraph shall prevent WEPCo or its Partnering Subcontractor from implementing any statutory requirements or any terms and conditions agreed with the workforce collectively prior to this period;
- 1.11.2 seek or make any alteration to the numbers of Assigned Staff or those employees identified as Assigned Staff without the Participant's consent (which shall not be unreasonably withheld) save in the event of resignation or dismissal for misconduct or poor performance;
- 1.11.3 transfer any of the Assigned Staff to another part of its business or move other employees from elsewhere in its or their business who have not previously been engaged in providing the Partnering Services to provide the Partnering Services save with the Participants' consent (which shall not be unreasonably withheld).

1. Where two or more Asbestos Management Survey Reports are in place then individual quantities columns should be included within the Schedule with each column headed to identify the particular contract asbestos survey report.
2. Where two or more Asbestos Refurbishment and Demolition Survey Reports are in place then individual quantities columns should be included within the Schedule with each column headed to identify the particular post contract asbestos survey report.
3. Where individual items are located within a common environment (for example, pipe lagging, debris and residue within a floor duct) then these should be grouped together for pricing purposes.
4. The benchmark rate will be provided by the WEPCo and will be based on library rates for comparable asbestos items.
5. Tendered rates to be obtained from three separate specialist sub-contractors.
6. In completing this section, the Asbestos Surveyor should consider including at least the following:
 - i. Asbestos containing materials that are identified within the Asbestos Management Survey.
 - ii. Asbestos containing materials that have been identified within the Asbestos Management Survey or surveys and described as strongly "presumed".

The Asbestos Surveyor must consider each individual asbestos item on a case by case basis and use their knowledge and experience to determine whether "presumed" asbestos identified in the survey report should be included. In drawing conclusions, the reasons why asbestos is "presumed" must be fully considered.
7. In completing this section, the contractor should include at least the following:
 - i. All Asbestos containing materials identified within the post contract survey or surveys and categorised as either identified or "strongly presumed".

The contractor must consider each survey on a case by case basis and use their knowledge and experience to determine whether "presumed" asbestos identified in the survey should be included. In drawing conclusions, the reasons why asbestos is "presumed" must be fully considered.
8. The overall programme to be entered is to be the period for the removal of asbestos materials included within this section of the "Blue Form" based on the scope of Asbestos materials identified within the Asbestos Management Survey Report including periods for the following activities which are to be separately programmed:
 - Procurement, instruction and the undertaking and reporting of an Asbestos Refurbishment and Demolition (R&D) Survey;
 - Tendering, Reporting and Instruction of the Asbestos Removal Works as identified by the Asbestos R&D Survey;
 - Preparation of Plans of Work; and
 - Statutory Notification Periods.

WEPCo is to separately show the above individual periods within this Programme.
9. The period to be entered is to be the varied tendered period for the removal of Asbestos materials included within this section of the "Blue Form" based on the scope of Asbestos materials identified within the Asbestos Refurbishment and Demolition Survey Report only.

SCHEDULE 22- DISPUTE RESOLUTION PROCEDURE

1. This Dispute Resolution Procedure shall apply to any dispute, claim or difference between any two or more Parties arising out of or relating to this Agreement ("**Dispute**").
2. This Dispute Resolution Procedure shall not impose any pre-condition on any party or otherwise prevent or delay any party from commencing proceedings in any court of competent jurisdiction in relation to any Dispute in which that party requires either:

2.1 an order (whether interim or final) restraining the other party from doing any act or compelling the other party to do any act; or

2.2 a judgement for a liquidated sum to which there is no arguable defence.

3. **CONSULTATION**

3.1 Subject to paragraph 2 of this Schedule 22, if a Dispute arises, the relevant Parties shall first consult in good faith in an attempt to come to an agreement in relation to the disputed matter.

3.2 If the relevant Parties fail to come to an agreement through such consultation, each relevant Party shall refer the matter to its [*Participants to confirm escalation point*]⁵⁰ or, in the case of WEPCo, its [*Bidders to specify*] for resolution.

4. **MEDIATION**

4.1 If the relevant Parties have been unable to resolve the Dispute within ten (10) Business Days of referral in accordance with paragraph 3.2 above, they may (if the relevant Parties so agree) refer the Dispute to mediation in accordance with this paragraph 4. Any mediation shall be completed within forty (40) Business Days (or such longer period as the Parties may agree, acting reasonably) of such referral and any agreement reached by the parties and recorded in writing by them shall be binding upon the parties.

4.2 Mediation shall not be a precondition to the commencement of Arbitration.

4.3 Mediation may be conducted using a sole mediator or (where the Parties agree acting reasonably that more than one mediator is required) co-mediators (the "**Mediator(s)**") (such expression not to exclude the presence of a pupils or assistant mediators).

4.4 The Parties shall agree to conduct the mediation in or substantially in accordance with the Centre for Effective Dispute Resolution ("**CEDR**") Model Mediation Procedure 2018 Edition ("**MMP**") for the time being used and the terms of the Model Mediation Agreement attached as Appendix 1 (*CEDR Mediation Agreement*) to this Schedule 22.

4.5 The Mediator(s) shall be accredited mediator(s) agreed between the parties to the Dispute, or in the absence of agreement within fourteen (14) days of notice to mediate served pursuant to paragraph 4.7, appointed by CEDR.

4.6 During the course of the mediation the relevant Parties shall co-operate fully, promptly and in good faith with CEDR and the Mediator(s) in the performance of their obligations under this paragraph 4,

⁵⁰ Participants to consider and confirm.

including the signing of CEDR's standard agreement to mediate subject to any reasonable amendments agreed by the parties to the Dispute. Any breach or default by any relevant Party to the Dispute of this paragraph 4 shall forthwith release:

4.6.1 the other(s) from further compliance with this paragraph 4; and

4.6.2 CEDR and the other relevant Parties from any mediation agreement signed between them (save for any accrued financial obligations to CEDR and/or the Mediator(s)),

and the mediation shall be deemed to be abandoned.

4.7 Mediation shall commence by any Party to the dispute serving on the other(s) written notice to mediate pursuant to this paragraph (a "**Notice to Mediate**").

4.8 Unless they agree otherwise, the Parties shall share equally the fees, costs and expenses relating to the mediation and each Party shall pay its own expenses of preparation for, and participant and representation in, the mediation.

5. **ARBITRATION**

5.1 All Disputes, to the extent not finally resolved pursuant to the procedures set out in the foregoing paragraphs of this Schedule 22, shall subject to any agreement of the relevant Parties to the Dispute to resolve the Dispute by the commencement of legal proceedings, be referred to Arbitration pursuant to the provisions of this paragraph 5.

5.1.1 The Arbitration shall be governed by the Arbitration Act 1996 and the CI Arb Arbitration Rules, as amended; varied or replaced from time to time, save that the relevant Parties shall procure that the Arbitrator complies with, where appropriate, paragraph 8 (*Joinder of Disputes*) of this Schedule 22.

5.2 The Party initiating the Arbitration shall give a notice of Arbitration to the other Party to the Dispute (copied to the other Parties) (the "**Notice**") stating:

5.2.1 that the dispute is referred to Arbitration;

5.2.2 details of the issues to be resolved; and

shall invite the other Party to concur in the appointment of a sole arbitrator who shall be a solicitor or barrister or arbitrator recognised by the Chartered Institute of Arbitrators of not less than ten (10) years' standing as an arbitrator. If the relevant Parties are unable within fourteen (14) days to agree the identity of the Arbitrator, the initiating Party shall request that the Chartered Institute of Arbitrators make the appointment in accordance with Article 8 of the CI Arb Arbitration Rules. Arbitration proceedings shall be deemed to have been instituted on the date on which the Notice has been given.

5.3 Any party to the subsisting Arbitration proceedings may apply to the Chartered Institute of Arbitrators to challenge the office of Arbitrator in accordance with the CI Arb Arbitration Rules.

5.4 If it is required that the Arbitrator is replaced in terms of paragraph 5.3 above, the office shall be reconstituted in accordance with Article 14 of the CI Arb Arbitration Rules.

5.5 The Arbitration is to be held in England, in the English language and London shall be the seat of Arbitration.

5.6 Subject to any further agreement, the Parties agree that the following Articles of the CI Arb Arbitration Rules shall not apply to any Arbitration raised in accordance with this paragraph 5:

5.6.1 [List any Articles that parties do not wish to apply]

5.7 The Arbitrator shall have the power to open up, review and revise any opinion, certificate, instructions, determination or decision of whatever nature given or made under this Agreement.

5.8 Unless this Agreement has already been terminated, the Parties shall, (notwithstanding that any dispute is subject to the Dispute Resolution Procedure set out in this Schedule 22), continue to carry out their obligations in accordance with this Agreement.

6. SUBMISSIONS

6.1 If any Dispute between WEPCo and a Participant raises issues which relate to any dispute between WEPCo and any Partnering Subcontractor arising under a Supply Chain Agreement or otherwise affects the relationship or rights of WEPCo and/or the Partnering Subcontractor under such Supply Chain Agreement (the "**Supply Chain Agreement Dispute**") then WEPCo may include as part of its submissions made to the Arbitrator, submissions made by the Partnering Subcontractor as appropriate.

6.2 The Arbitrator shall not have jurisdiction to determine the Supply Chain Agreement Dispute but the decision of the Arbitrator shall be binding on WEPCo and the Partnering Subcontractor insofar as it determines the issues relating to the Supply Chain Agreement Dispute.

6.3 Any submissions made by the Partnering Subcontractor shall:

6.3.1 be made within the time limits applicable to the delivery of submissions by WEPCo to the Arbitrator; and

6.3.2 concern only those matters which relate to the Dispute between the relevant Participant and WEPCo.

6.4 Where a Partnering Subcontractor makes submissions in any reference before the Arbitrator, the costs of the Arbitration shall be at the discretion of the Arbitrator.

6.5 No Participant shall have liability to any Partnering Subcontractor arising out of or in connection with any decision of the Arbitrator or in respect of the costs of the Partnering Subcontractors in participating in the resolution of any Dispute under this Agreement.

6.6 WEPCo shall not allow any Partnering Subcontractor access to any document relevant to the issues in dispute between any Participant and WEPCo save where:

6.6.1 the document is relevant also to the issues relating to the Supply Chain Agreement Dispute as the case may be; and

6.6.2 WEPCo has first delivered to the relevant Participants a written undertaking from the Partnering Subcontractor addressed to the relevant Participants that they shall not use any such document otherwise than for the purpose of the dispute resolution

proceedings under this Agreement and that they shall not disclose such documents or any information contained therein to any third party other than the Arbitrator or any professional adviser engaged by the Partnering Subcontractor (as appropriate) to advise in connection with the Dispute.

7. **NO LOSS**

Where any Participant would otherwise be expressly liable to make a payment by way of compensation to WEPCo including amounts which, in turn, comprise compensation to any Partnering Subcontractor payable by WEPCo and/or which will be payable by way of compensation to any Partnering Subcontractor by WEPCo, the Participant shall not be entitled to withhold, reduce or avoid any such payment to WEPCo in reliance only on the fact that the amount which is due from WEPCo to the Partnering Subcontractor or the entitlement of the Partnering Subcontractor to payment of such amount, as a result of the circumstances giving rise to the Participant's obligation to pay such compensation, is conditional on the entitlement of, or receipt of payment by WEPCo from the Participant.

8. **JOINDER OF DISPUTES**

8.1 If a Dispute to which paragraph 5 applies (the "**Original Dispute**") raises issues which are substantially the same as or connected with issues in a Dispute between a party to the Dispute and any other party to this Agreement in connection with or arising out of this Agreement (the "**Related Dispute**"), a party to the Original Dispute may cause the Original Dispute to be joined with the Related Dispute in the manner provided in this paragraph 8.

8.2 A party wishing to join the Original Dispute with a Related Dispute shall, within five (5) Business Days of giving or receiving the Notice in respect of the Original Dispute, serve on each other party to the Original Dispute and to the Related Dispute, and the Arbitrator, a notice (a "**Related Dispute Notice**") stating they wish to join the Original Dispute with the Related Dispute. The Related Dispute Notice shall include:

8.2.1 a concise summary of the Related Dispute and issues arising therefrom, including a preliminary statement setting out the basis and grounds for joining the Related Dispute with the Original Dispute, together with (where applicable):

- (a) a statement of claim from each party to the Related Dispute;
- (b) details of each Related Dispute party;
- (c) a statement of the relief sought by any party to the Related Dispute;
- (d) reference to any reports relating to the subject matter of the Related Dispute;
- (e) a statement of any matters which the parties to the Related Dispute have already agreed in relation to the Related Dispute; and
- (f) copies of all documents not exceeding, where possible, one lever arch file in total which have a direct bearing on the issues in the Related Dispute, and on which the party serving the Related Dispute Notice intends to rely (or a list of such documents if each party to the Related Dispute has already seen them).

8.3 The party giving notice under paragraph 8.2 shall give each Related Dispute party a copy of the following documents:

8.3.1 the Notice relative to the Original Dispute together with any counterclaims given or received, and any further notices to/from the other party to the Original Dispute; and

8.3.2 the Notice relative to the Related Dispute.

8.4 Within five (5) Business Days after receiving a Related Dispute Notice, any party to the Original Dispute or Related Dispute may make written representations to the Arbitrator objecting to the joinder of the Related Dispute with the Original Dispute, simultaneously providing copies to all parties to such disputes.

8.5 If no representations are made in accordance with paragraph 8.4, the Arbitrator shall immediately order that that the Original Dispute shall be joined with the Related Dispute.

8.6 Where the Arbitrator receives objections under paragraph 8.4, the Arbitrator shall consider whether or not in his or her opinion there is any reasonable basis or ground for the objection received and shall render a final and binding written decision within three (3) Business Days of receiving an objection as to whether the Related Dispute shall be joined with the Original Dispute.

8.7 Subject to the provisions of this paragraph 8, the provisions of paragraph 5 (*Arbitration*) shall apply to the resolution of a Related Dispute and the Arbitrator shall, insofar as practicable, apply the same reasoning and analysis in reaching a decision on both the Original Dispute and the Related Dispute.

8.8 When a Related Dispute is joined to an Original Dispute, the Arbitrator shall consider both Disputes together but shall render separate decisions on the Original Dispute and the Related Dispute.

APPENDIX 1- CEDR MEDIATION AGREEMENT

Model Mediation Agreement

CEDR Model Mediation Agreement

THIS AGREEMENT dated _____ **IS MADE BETWEEN**

Party A

.....*of*

Party B

..... *of*

(together referred to as “**the Parties**”)

The Mediator

..... *of*

(a term which includes any agreed **Assistant Mediator**)

and

CEDR Solve of IDRC, 70 Fleet Street, London EC4Y 1EU

in relation to a mediation to be held

on

at

(“**the Mediation**”)

concerning a dispute between the Parties in relation to

.....
.....
.....

(“the Dispute”)

IT IS AGREED by those signing this Agreement THAT:

The Mediation

1 The Parties agree to attempt in good faith to settle the Dispute at the Mediation. All signing this Agreement agree that the Mediation will be conducted in accordance with its terms and consistent with the CEDR Solve Model Mediation Procedure and the CEDR Code of Conduct for Mediators current at the date of this Agreement.

Authority and status

2 The person signing this Agreement on behalf of each Party warrants having authority to bind that Party and all other persons present on that Party’s behalf at the Mediation to observe the terms of this Agreement, and also having authority to bind that Party to the terms of any settlement.

3 The Mediator is operating as an independent contractor (unless an employee of CEDR Solve), and neither the Mediator nor CEDR Solve is an agent for any of the Parties in relation to the Dispute or this Agreement.

4 Neither the Mediator nor CEDR Solve shall be liable to the Parties for any act or omission in relation to the Mediation unless the act or omission is proved to have been fraudulent or involved wilful misconduct.

Confidentiality and without prejudice status

5 Every person involved in the Mediation:

5.1 will keep confidential all information arising out of or in connection with the Mediation, including the fact and terms of any settlement, but not including the fact that the Mediation is to take place or has taken place or where disclosure is required by law to implement or to enforce terms of settlement; and

5.2 acknowledges that all such information passing between the Parties, the Mediator and/or CEDR Solve, however communicated, is agreed to be without prejudice to any Party's legal position and may not be produced as evidence or disclosed to any judge, arbitrator or other decision-maker in any legal or other formal process, except where otherwise disclosable in law.

6 Where a Party privately discloses to the Mediator any information in confidence before, during or after the Mediation, the Mediator will not disclose that information to any other Party or person without the consent of the Party disclosing it, unless required by law to make disclosure.

7 The Parties will not call the Mediator or any employee or consultant of CEDR Solve as a witness, nor require them to produce in evidence any records or notes relating to the Mediation, in any litigation, arbitration or other formal process arising from or in connection with the Dispute and the Mediation; nor will the Mediator nor any CEDR Solve employee or consultant act or agree to act as a witness, expert, arbitrator or consultant in any such process. If any Party does make such an application, that Party will fully indemnify the Mediator or the employee or consultant of CEDR Solve in respect of any costs any of them incur in resisting and/or responding to such an application, including reimbursement at the Mediator's standard hourly rate for the Mediator's time spent in resisting and/or responding to such application.

8 No verbatim recording or transcript of the Mediation will be made in any form.

Settlement formalities

9 No terms of settlement reached at the Mediation will be legally binding until set out in writing and signed by or on behalf of each of the Parties.

Fees and costs of the Mediation

10 The Parties will be responsible for the fees and expenses of CEDR Solve and the Mediator ("the Mediation Fees") in accordance with CEDR Solve's Terms and Conditions of Business current at the date of this Agreement.

11 Unless otherwise agreed by the Parties and CEDR Solve in writing, each Party agrees to share the Mediation Fees equally and also to bear its own legal and other costs and expenses of

preparing for and attending the Mediation (“each Party’s Legal Costs”) prior to the Mediation. However, each Party further agrees that any court or tribunal may treat both the Mediation Fees and each Party’s Legal Costs as costs in the case in relation to any litigation or arbitration where that court or tribunal has power to assess or make orders as to costs, whether or not the Mediation results in settlement of the Dispute.

Legal status and effect of the Mediation

12 Any contemplated or existing litigation or arbitration in relation to the Dispute may be started or continued despite the Mediation, unless the Parties agree or a Court orders otherwise.

13 This Agreement is governed by the law of [England and Wales] and the courts of [England and Wales] shall have exclusive jurisdiction to decide any matters arising out of or in connection with this Agreement and the Mediation.

14 The referral of the dispute to the Mediation does not affect any rights that exist under Article 6 of the European Convention of Human Rights, and if the Dispute does not settle through the Mediation, the Parties’ right to a fair trial remains unaffected.

Changes to this Agreement

15 All agreed changes to this Agreement and/or the Model Procedure are set out as follows:

Signed

Party A _____

Party B _____

Mediator

CEDR Solve

APPENDIX 2 - CEDR MODEL MEDIATION PROCEDURE

Model Mediation Procedure

CEDR Solve Mediation Model Procedure

1 What is mediation?

Mediation is a flexible process conducted confidentially in which a neutral person actively assists the parties in working towards a negotiated agreement of a dispute or difference, with the parties in ultimate control of the decision to settle and the terms of resolution.

The principal features of mediation are that it:

- involves a neutral third party to facilitate negotiations;
- is quick to set up and is inexpensive, without prejudice and confidential;
- involves party representatives with sufficient authority to settle;
- is flexible, with no set procedure, enabling the process to be designed and managed by the Mediator to suit the parties, in consultation with them;
- enables the parties to devise solutions which are not possible in an adjudicative process such as litigation or arbitration, and which may benefit all the parties, particularly if there is the possibility of a continuing relationship between them;
- can be used in both domestic and cross-border disputes, two-party and multi-party disputes, and whether or not litigation or arbitration has been commenced.

Many commercial and government contracts now require parties to use mediation in accordance with CEDR's Model Procedure. While mediation is essentially flexible, the Model Procedure set out in this document, taken with the CEDR Solve Mediation Agreement, will give sufficient certainty to enable the process to be set up and used.

If settlement terms cannot be agreed at a mediation, the parties are free to revert to litigation or arbitration.

2 Referral to mediation

Referral of a dispute to a mediator or to CEDR Solve for mediation may be as a result of:

- voluntary referral by all parties;

- referral by one party who asks CEDR Solve to secure the involvement of other parties into a mediation;
- responding to a Pre-action Protocol, the Civil Procedure Rules 1998, a Court Order or a recommendation by a judge before trial or appeal;
- the provisions of a clause in a commercial or government contract requiring the use of mediation as a step in the parties' agreed dispute resolution process.

3 Choosing the mediator

Parties may choose their own mediator directly, or may ask CEDR Solve to nominate one or more persons to act as mediator for a dispute in accordance with the wishes of the parties or any relevant Court Order (a copy of which must be supplied to CEDR Solve by the parties as soon as possible after CEDR Solve has been instructed). If the parties require it, more than one mediator can be appointed to work as co-mediators, or the parties can agree on an independent neutral expert to advise the mediator on technical matters.

CEDR Solve will only nominate or appoint a mediator who, in their view, possesses the relevant skills and experience to mediate the dispute for the parties effectively, and who will comply with the CEDR Solve Code of Conduct for Third Party Neutrals (“the Code”). Any nominated mediator will be required to confirm immediately to CEDR Solve if there is any matter which might prevent the nominated mediator from complying with the Code in relation to the mediation of the dispute, such as a conflict of interest. CEDR Solve will then notify the parties of any such matter immediately it is disclosed to them.

If required by either the parties or the Court, or under the published terms of any CEDR Solve dispute resolution scheme, CEDR Solve will **appoint** a mediator to be used in relation to a dispute, subject always to that mediator not being prevented from complying with the Code in relation to the mediation of that dispute.

The parties may be asked by CEDR Solve to approve the appointment by them of an assistant mediator (who will be a CEDR Accredited Mediator) or an observer to attend a mediation at no cost to the parties, provided that they too comply with the Code in respect of the mediation of that dispute. The identity of any assistant mediator or observer proposed to attend the mediation will be made known in advance of the mediation to the parties, who are free to object to any such nomination or decline any such appointment. The mediator’s signature of the mediation agreement binds any assistant mediator or observer to its terms.

4 Preparation for the mediation

Depending on the CEDR Solve service selected by the parties, either CEDR Solve or the mediator when agreed or appointed, will make the necessary arrangements for the mediation as required or agreed by the parties or under the terms of any scheme, including:

- drafting the agreement, submitting it for approval by the parties and preparing the final form for signature, incorporating any agreed amendments;

- facilitating agreement as to the date, venue and start time for the mediation;
- organising exchange of case summaries and document bundles between the parties and the mediator;
- setting up any pre-mediation meetings agreed by the parties and the mediator.

The parties will:

- agree the appointment of the mediator or a process to select or appoint the mediator;
- agree with CEDR Solve the date, venue and start time for the mediation;
- pay CEDR Solve's fees and expenses as agreed under CEDR Solve's Terms and Conditions of business;
- each prepare and exchange a case summary in respect of their approach to the dispute at the mediation and endeavour to agree with all other parties what documents are needed for the mediation;
- send to the mediator (direct or through CEDR Solve) a copy of their case summary and two copies of the document bundles no less than two weeks before the date set for the mediation, making clear whether case summaries have or have not yet been exchanged, whether or not and when CEDR Solve is to effect exchange, and whether all or any part of any case summary or documentation is intended to be confidential for the mediator only;
- notify the mediator direct or through CEDR Solve of the names and roles of all those attending the mediation on their behalf, so that CEDR Solve can inform all Parties and the mediator in advance of the mediation;
- ensure that a lead negotiator with full authority to settle the dispute (or not) attends the mediation to sign the mediation agreement;
- alternatively notify the mediator, CEDR Solve and (unless very good reason exists to the contrary) the other parties of any limitation on authority to settle, for instance lack of legal capacity, or the need for ministerial committee or board ratification, in which case the lead negotiator will need to have power to recommend acceptance of any settlement. Late disclosure of limited authority to settle can call into question that party's good faith involvement in the mediation process, and have detrimental effects on the prospects of success of any mediation.

The mediator will:

- ensure at all times that the Code is complied with in respect of the mediation of the dispute, reporting any conflict of interest or other relevant matter, if any, to CEDR Solve

and (subject to any question of confidentiality or privilege) the parties immediately it emerges;

- attend any pre-mediation meetings on terms and agenda agreed by the parties;
- read each case summary and document bundle submitted in advance of the mediation by the parties;
- make contact with a representative of each of the parties before the mediation to assist in preparation for the mediation.

5 Documentation

Documentation intended to be treated as confidential by the mediator or CEDR Solve (such as a counsel's opinion, an undisclosed expert report, a draft proof of evidence or a confidential briefing for the mediator) must be clearly marked as such, and will not be circulated further without express authority.

One of the advantages of mediation is that its success is not dependent on exhaustive disclosure of documents. Bundles can usually be relatively limited in size, containing only key documents, and case summaries can be quite brief, and can to advantage be prepared jointly by the parties. The parties can ask CEDR Solve to effect simultaneous exchange of case summaries if required.

While documents brought into existence for the purpose of the mediation, such as case summaries, are clearly privileged from later production in those or other proceedings, the fact that a document which is otherwise disclosable in proceedings is produced for the first time during the mediation does not normally confer privileged status on it. The parties must take legal advice on such matters if they arise.

6 The mediation agreement

The agreement to mediate provides the essential legal basis for the mediation. Its signatories (the parties to the dispute, the mediator and CEDR Solve) all agree by signing it that the mediation is to be conducted consistent with both this CEDR Solve Model Procedure and the Code.

A draft mediation agreement will be sent for approval to the parties as part of the preparation process for the mediation, and any proposed amendments can then be discussed and inserted if agreed. The mediation agreement will normally be signed at the beginning of the mediation day on behalf of each of the parties and the mediator, having been pre-signed on behalf of CEDR Solve. In any pre-mediation contact with the parties, CEDR Solve staff and any CEDR mediator once appointed will observe its terms as to confidentiality, even though the agreement has not yet been signed.

7 The mediation

It is normal for each of the parties to have a private room for confidential consultations on their own and with the mediator during the mediation. There should also be a further room large enough for all parties to meet with the mediator jointly.

The mediator will chair and take responsibility for determining the procedure at the mediation, in consultation with the parties.

The likely procedure will comprise:

- preliminary meetings with each of the parties when they arrive at the venue;
- a joint meeting of all attending the mediation, at which each of the parties will normally be invited to make an oral presentation;
- a mix of further private meetings and joint meetings (which may involve all or some of each party's team), as proposed by the mediator and agreed by the parties.

Professional advisers, particularly lawyers, can and usually do attend the mediation. Such advisers play an important role in the exchange of information and opinion on fact, evidence and law; in supporting their clients (particularly individuals) in the negotiations; in advising clients on the implications of settlement; and in drawing up the settlement agreement and any consent order.

Although the agreement provides that no verbatim recording or transcript will be made of the whole mediation by the parties or the mediator, they can make their own private notes which will be undisclosed to anyone else, including in any subsequent litigation or arbitration.

Mediations can last beyond a normal working day and it is important that the key people present for each of the parties remain present or at worst available by telephone for so long as the mediation continues. Any time constraints should be reported to CEDR Solve or the mediator as soon as known, as any unexpected departure can be detrimental to the progress of the mediation and perceived as disrespectful by other parties.

8 Confidentiality in relation to the mediation

The CEDR Solve standard agreement provides that what happens at the mediation is to be treated as confidential by the parties, the mediator and CEDR Solve, including the fact and terms of settlement. However, the fact that the mediation is to take place or has taken place is not normally made confidential, as either or both of the parties may wish to claim credit for agreeing to engage in the process. If it is desired to make the fact that the mediation is taking place confidential also, the agreement can be amended.

Apart from where the parties agree in writing to consent to disclosure of what would normally be confidential, there may be rare circumstances in which the confidentiality of the mediation process cannot be preserved, such as where:

- the mediator or any party or their representative is required by law to make disclosure;
- the mediator reasonably considers that there is a serious risk of significant harm to the life or safety of any person if the information in question is not disclosed; or
- the mediator reasonably considers that there is a serious risk of being personally subject to criminal proceedings unless the information in question is disclosed.

Such questions might arise in relation to duties under the Proceeds of Crime Act 2002 or related legislation or under any other legislation. Legal representatives (who may themselves be under a comparable duty of disclosure in their own capacity) must take full responsibility for advising their clients of the implications of disclosure in relation to any such matters at a mediation.

9 Conclusion of the Mediation

The mediation may end in a number of ways:

- by settlement of the dispute in whole or part, when all agreed matters must be written down and signed by the parties to be binding;
- by one or more parties leaving the mediation before settlement is achieved;
- by an agreed adjournment for such time and on such terms as the parties and the mediator agree;
- by withdrawal of the mediator in accordance with the mandatory and optional circumstances set out in the Code.

The mediator will facilitate the drawing up of any settlement agreement, though the drafting is normally done by the lawyers representing each of the parties. Where proceedings **have not** been started in respect of the dispute, the settlement agreement will (if so intended and

drafted) be a contract enforceable by legal action. Where proceedings **have** been issued in relation to the dispute, it is normal for a Consent Order to be agreed either at or after the mediation and later lodged to end the proceedings on the terms agreed.

Where the mediation does not end in complete settlement, the Mediator may make contact with the parties thereafter to see whether further progress might be possible. Many disputes which do not settle at the mediation settle later, usually as a result of what occurred or was learned at the mediation.

CEDR Solve endeavours to make contact with all the parties after every mediation to obtain their feedback on both the process itself and, in particular, the mediator. Any feedback obtained regarding the mediator will be given in full to the mediator as part of the mediator's continuing learning and development.

10 Complaints

Any formal complaint about CEDR Solve or any mediator nominated by CEDR Solve should follow the procedure set out on the CEDR website at www.cedr.com.

July 2019

Background Note

This background note is provided in this Standard Form Version but should be deleted prior to incorporation into the Project Agreement.

The Authority's Construction Requirements comprise Part 1 (including Annex 1 and Annex 2) and Part 2 of Section 3 of Schedule 6 (*Construction Matters*) of the Template MIM Education Project Agreement. It incorporates the Generic Design Requirements at Part 1 including Statutory Requirements and Guidance Annex 1 and the Site Specific Brief for the relevant Facilities at Part 2. The Site Specific Brief(s) sets out the site-specific requirements including the overarching requirements, Schedule of Accommodation, Loaded Room Layout Drawings, ICT Solution Summary and any agreed derogations to the Generic Design Requirements.

Reference should be made to the "Important Note" at the start of the Template MIM Education Project Agreement for general background to the drafting approach taken throughout the Template MIM Education Project Agreement including the ACRs. Where the project is for maintained community school(s) it is anticipated that some of the references to the "Authority" in Part 1 of the ACRs (which it is envisaged will be the relevant local authority in this context) should be read in some instances as meaning the relevant "School Entity/(ies)", or "the Authority and the School Entity/(ies)", or "the Authority or the School Entity/(ies)". A matrix should be included within the derogations to be set out in [Annex 6] of the Site Specific Brief(s) providing any such additional or alternative references where appropriate..

Part 2 of the ACRs (the Site Specific Brief(s)) will include further requirements applicable to each specific Facility that Project Co will be required to comply with and is to be drafted on a project specific basis. These could be specifically related to the curriculum that will be delivered at the Facility, such as specific subjects delivered at a further education college. They could also be specific to the Site(s) such as any Ground Physical and Geophysical Investigations (where relevant in the context of Clause 10.3 (*Responsibility for Ground Conditions and Contamination*)).

The Site Specific Brief(s) and each of the annexes will be developed in accordance with Schedule 5 of the WEP Strategic Partnering Agreement.

Loaded Room Layout Drawings shall be prepared by Project Co as part of their Stage 2 submission which shall become part of the relevant Site Specific Brief. The Loaded Room Layout Drawings shall be prepared at a scale of 1:50 or as otherwise agreed with the Authority. The Loaded Room Layout Drawings shall show the proposed Equipment layouts for each space and Services Infrastructure including specifically the location of data and power sockets. The Loaded Room Layout Drawings will provide a plan view, elevations of each of the walls and where appropriate a ceiling view of each space. The Loaded Room Layout Drawings shall also include a schedule on the drawing detailing the Equipment (including ICT Equipment) to be placed in the room and also define what Group specification for the Equipment in accordance with Table 41 in section 3 of Part 1 of these ACRs. The Loaded Room Layout Drawings shall also confirm where blinds are to be provided to rooms and their specification.

The Equipment schedule included on the Loaded Room Layout Drawings shall also be included on the respective Area Data Sheet (in Part 6 of Schedule 6 (*Construction Matters*)).

The requirements for ICT design are set out in Section 4 of Part 1 of these ACRs. The positioning of Equipment will be developed by the Authority and its ICT Installer and will also have a significant impact on shaping the building's design and services provision. Project Co shall engage with the Authority to

ensure that the requirements of the ICT design and use of ICT is also captured on the Loaded Room Layout Drawings.

Project Co shall also be required to ensure that the requirements detailed within the Service Level Specification (contained in Section 1 of Schedule 12 (*Service Requirements*)) are also captured within their design.

Project Co shall agree a Loose Equipment Purchase Protocol with the Authority. The protocol shall set out how the procurement of Loose Equipment will be co-ordinated between the Authority (and the relevant School Entity in the case of a School(s) project) and Project Co, what Loose Equipment will be procured by the Authority and what by Project Co and all associated arrangements and programme.

SECTION 3
AUTHORITY'S CONSTRUCTION REQUIREMENTS

Part 1
Generic Design Requirements

Part 1: Generic Design Requirements

Interpretation

The requirements in Part 1 of these ACR's (Generic Design Requirements) apply equally to Primary School, Secondary School and College Facilities unless specifically excluded from a requirement. There are also a number of requirements that are referenced as specifically only applying to each category of Facility, such as covered external play requirements to reception classrooms in Primary Schools.

Where an All-through School (comprising both Primary and Secondary Students) is proposed the requirements for both Primary Schools and Secondary Schools will apply.

Should there be discrepancies between the requirements of Part 1 (Generic Design Requirements) and Part 2 (Site Specific Brief) of these ACRs, Part 2 will take precedence. Within Part 2, the following order of precedence shall apply:

- Site Specific Brief
- Schedule of Accommodation
- Loaded Room Layout Drawings
- Area Data Sheets

Should there be discrepancies between the Area Data Sheets and the Loaded Room Layout Drawings in respect of:

- the details of Equipment; and/or
- the data and power socket numbers listed;

then the Loaded Room Layout Drawings will take precedence.

Where any provision of these ACRs requires a particular standard, specification or other requirements to be observed or achieved in connection with the design and/ or construction of a Facility, the Works or in relation to a Site (or any part thereof) it shall be Project Co's responsibility to ensure that such standard, specification or other requirement is met.

Overarching Requirements

1.1 Definitions

In this Part 1 (*Generic Design Requirements*) of Section 3 (*Authorities Construction Requirements*) of Schedule 6 (*Construction Matters*) and elsewhere in this Agreement (save where Schedule 1 (*Definitions and Interpretation*) provides to the contrary) the following words shall have the following meaning:

All-Through School

Generally, a mainstream School for Students aged 4 to 16 or 4 to 18 covering 4 or 5 educational stages: Foundation Phase (3 to 7 years) and Key Stage 2 (7 to 11 years), Key Stage 3 (11 to 14 years), Key Stage 4 (14 to 16 years) and in some cases the sixth form). For the purposes of these Generic Design Requirements, all the requirements that apply to Primary and Secondary Schools would equally apply to an All-Through School;

Access Statement

A description of how inclusive design principles have been incorporated into a development, to be produced in conjunction with a planning application;

Active ICT Infrastructure

Means infrastructure items defined as Active within the ICT Responsibilities Matrix (Table 45) set out in paragraph 4 (*ICT Design Requirements*) of these ACRs;

Administration offices

Permanently occupied offices, including general office, head teacher's/ principal's office, PA to head/ principal;

Approved Document (AD)

Guidance Documents which support the technical parts of the Building Regulations which apply in Wales and have been approved by Welsh Ministers, referred to as 'Approved Documents', as amended from time to time.

AFFL

Means above finished floor level;

Additional Learning Needs (or ALN)

Means additional learning needs or SEN(D);

Area Data Sheets (or ADS)

Means the excel spreadsheets in respect of the relevant Facility set out in Part 2 (*Site Specific Brief*) of these ACRs. They should identify the requirements for each generic space listed in Annex 2 Schedule of Accommodation of these ACRs and should include dimensions, areas, services and environmental performance and fixed Equipment and ICT Equipment and each external space;

Atria

A College space consisting of fully enclosed, usually, glass covered spaces that are a minimum of double floor height and of sufficient width to offer the opportunity of use as multi-functional space. The total area of College Atria must not exceed 10% of the justified gross internal area;

Authority Requirements and Guidelines

Means the guidance and requirements of the Authority Set out in Annex 1 to Part 2 of these ACRs (*Site Specific Brief*);

Automated Energy Data Collection Portal

Means the automated energy data collection portal is that is required for each scheme for ongoing energy monitoring, targeting, and benchmarking, the requirements for which are detailed in the ACRs (at 2.10.1.5).

Balance Areas

Areas serving the whole school or college that are not associated with a particular Suite of Spaces, such as a Secondary School dining area or College canteen;

Basic Teaching

The aggregate of all timetabled teaching spaces (except for Halls and PE spaces): including General Teaching spaces, Classrooms, Practical Teaching spaces and Performance Spaces;

BIM

Means Building Information Modelling and is a process for creating and managing information on a construction project across the project lifecycle. One of the key outputs of this process is the Building Information Model, the digital description of every aspect of the built asset. This model draws on information assembled collaboratively and updated at key stages of a project;

Building

Means any building at any time at the relevant Site;

Building Elements

Different parts of any building, including roof and floor structure and coverings, stairs, ceilings, walls, finishes and doors;

Building Management System (BMS)

A control system to manage the automatic operation of building systems and plant services with the required functions detailed in [2.11.39]

Building Regulations

Means the regulations applicable to Wales (or England and Wales) made pursuant to the Building Act 1984.

Building Services

Gas and water services, heating, ventilation, air conditioning, controls, access, security and alarm systems and electrical plant and installations including pipework, ductwork and cabling;

Building User Guide

is a simple to use non-technical guide for the Facilities Premises Team about how their Building operates and how the local room controls work;

Calming Room

A small room provided in some special units for Students to calm down, designed to safeguard against self-harm;

CIBSE

Means the Chartered Institution of Building Services Engineers;

Circulation

Corridors, stairways and lobbies;

Classroom

A space designed to accommodate a form or class of Students for the purposes of General Teaching, which may also be their registration or teaching base;

College

A further education Facility;

Curriculum

Means the relevant curriculum in Wales and any replacement or revision that is known about prior to entering into this Agreement, including where relevant, the new Curriculum for Wales coming into effect from September 2022 and any updates or subsequent curriculum referred to in the SSB;

Department

A Department or faculty within a Secondary School or College based on a subject (e.g. English) or a group of subjects (e.g. humanities);

Designated Unit

Additional specialist facilities on a School Site for a small number of Students, typically less than 30, who usually have an Education and Health Care (EHC) Plan or a statement of special educational need. Students would usually spend the majority of their time there, only attending mainstream classes for a few lessons, such as PE, for assembly or for lunch;

Design and Technology (D&T)

A blanket term for a number of practically based subjects requiring specialist equipment and associated space for safe operation e.g. resistant materials, textiles and graphics;

Dining and Social

Dining spaces which include Secondary School and College dining/canteen and café areas and social areas;

Education and Health Care (EHC) Plan

A plan that identifies the educational, health and social needs of children and young people, and sets out the additional support needed. EHC Plans are gradually replacing statements of special educational need;

Energy Management System (EMS)

A control system to allow energy use at the Facility to be managed with the required functions detailed in [2.11.40]

Existing Buildings

The Buildings at the Facility prior to the relevant Actual Completion Date but excluding any new facilities comprising the Works;

Facility Premises Team

Means the team of Facility Liaison Persons;

Facility User(s)

Means any person who works in, attends or uses the relevant Facility;

FEI

Means further education institutions;

Final Baseline Energy Model

Means the energy model forecasting energy consumption at the Facility based on the actual design and systems proposed, the final model having been updated prior to [Financial Close] to include all the design information for the School/ College including actual profiles, predicted equipment performance and management factors for the actual School/ College Building and Site;

Foundation Phase

Refers to children aged 3 to 7 years. In Schools this is typically children in Nursery, Reception, Year 1 and Year 2;

General Teaching

School and College teaching that typically doesn't involve practical activities or specialist equipment, for example primary classrooms or classbases, shared teaching areas and large Group rooms, Secondary School and College general Classrooms, seminar rooms, ICT-rich Classrooms and music rooms, drama studios;

Generic Design Requirements

Means these Generic Design Requirements which comprise Part 1 of Section 3 (*Authorities Construction Requirements*) of Schedule 6 (*Construction Matters*) of this Agreement, including Annexes [1 to 2].

Gross Area

The overall area of the Buildings, taken to the inside face of the external walls and measured over internal walls, as Gross Internal Area by the Royal Institution of Chartered Surveyors (RICS). As defined for Schools in BB98 and BB99 and defined for Colleges in Welsh Government Addendum to the Estate Strategy Guidance 2007 and the LSC Guidance on the Management of Floor Space 2007 for FEIs in Wales, the minimum Gross Area required includes Plant Area for boiler rooms and a server room, as well as hub rooms and vertical ducts, but further area will be needed if ventilation plant, chimneys or sprinkler tanks are included in the final Gross Area of the designed Building. This excludes the area of voids in Atria and lightwells;

Group rooms and study areas

Teaching rooms generally provided for small group work or private study including Primary School Small Group Rooms, Secondary School and College music group/practice rooms, local resource areas, sixth form and general study areas;

Halls Large teaching spaces including Primary School halls and studios, Secondary School main halls, College lecture theatres and Secondary School and College activity, fitness studios and sport halls;

Grounds

Means all areas of the Site excluding the footprint of the buildings;

Handover and Mobilisation Plan

A plan which sets out the methodology and detailed programme to achieve ICT Handover and Final Handover to comply with Schedule 10 (*Outline Commissioning Programmes*) of this Agreement

Hygiene Room

A specially equipped room for changing and showering Students who have severe physical or Profound and Multiple Learning Disabilities;

ICT Equipment

Means all:

- (a) hardware, software, networking equipment, telecommunications equipment, telephone systems, projectors, screens, digital signage, interactive whiteboards, video playback equipment, stage lighting control systems, audio systems, assisted hearing systems, technological sports equipment, cashless catering equipment, registration systems, internal CCTV equipment, peripherals, manuals, documentation and related ICT products and materials; and
- (b) the Active ICT Infrastructure;

ICT Infrastructure

Means the Passive ICT Infrastructure and the Active ICT Infrastructure, telephony and internet provision;

ICT Solution Summary

Means the summary of the Facility's ICT solution as set out in [Annex V] to the relevant Site Specific Brief;

Initial Baseline Energy Model

Means the energy model initially developed to forecast energy consumption at the Facility based on the proposed design and systems, the initial model to be submitted at Stage 1 submissions and updated regularly during Stage 2 to develop into the Final Baseline Energy Model;

Initial ICT Equipment

Means the ICT Equipment which are either Legacy ICT Equipment or New ICT Equipment;

Key Stage (KS)

The specific part of a child's education and relating to their age and year group;

Key Stage 2 (KS2)

Refers to children aged 7 to 11 years. In Schools this is typically children in Year 3, 4 5 and 6;

Kitchen Suite

Spaces comprising Kitchen preparation areas including area of the Facility Kitchen used for preparing food and drink, and washing up afterwards, as well as any workstation for administration and the main servery; and other Kitchen areas including food store rooms; facilities for catering staff, including changing areas and toilets;

Learning Resources

Material that supports learning including printed material and equipment;

Learning Resource Areas

Teaching spaces including Libraries, learning resource centres (LRCs), Group rooms, study areas and practical resource areas including dark rooms, control rooms, kiln rooms and sensory rooms, practical learning resource areas;

Legacy

Items which have been used at the existing site which are considered suitable for use in the Project;

Legacy ICT Equipment

Means existing ICT Equipment which Project Co is required to Decant from an Existing Facility to a Facility as identified as such in the ICT Solution Summary in Annex 5 of the relevant Site Specific Brief and on the Area Data Sheets;

Libraries

Teaching spaces that provide Learning Resources including Primary School Libraries and Secondary School and College learning resource centres (LRCs);

Loaded Room Layout Drawings

Means those drawings set out in [Annex 4] to the relevant Site Specific Brief;

Local Exhaust Ventilation (LEV)

Local ventilation of a practical activity, as near to the source of pollutants as possible, such as a fume cupboard or a wood dust extract system, or a heat bay fume extract system;

LTHW

Means low temperature hot water in the context of heating systems

Loose Equipment Purchase Protocol

The protocol which will form part of the Project Co's Proposals to be agreed between the Authority and the Project Co for the procurement of Loose Equipment set out in [Annex 6] of the relevant Site Specific Brief;

Maintenance Access Strategy

The access strategy and methodology developed by Project Co to ensure that all elements of the building can be safely accessed to undertake maintenance in accordance with the Law and Good Industry Practice;

Minimum Life Expectancy

The period of time for which an element, item, or product can be expected to satisfy minimum performance requirements associated with that element, item, or product, when subject to typical

conditions, wear, and usage (Malicious Damage is not deemed 'typical' for the purpose of this definition);

Minimum Residual Life Expectancy Requirement

Means the Minimum Life Expectancy for an element, item or product at the Expiry Date as set out in in Column 4 of [Table 1] of these ACRs;

Mobility Equipment

Means a wheelchair, a motorised wheelchair, a walking stick or a standing frame or any other mobility aid required to be used within the Facility;

M&T

Means monitoring and targeting;

Multi-use Games Area (MUGA)

A fenced area with an all-weather surface designed to accommodate a range of sports;

Net Area

The usable area within the Gross Area comprising: Basic Teaching Area; Halls, Dining and Social and PE spaces; Learning Resource Areas; staff and administration; and storage. It includes everything except Non-net Areas;

New Replacement ICT Equipment

Has the meaning given in paragraph [4.11.12] of Part 1 (*Generic Design Requirements*) of these ACRs;

Non-net Area

Part of the Gross Area of Buildings not included in the Net Area, comprising: Toilets and personal care, Hygiene Rooms, showers, changing rooms, Kitchen suites, Circulation, plant including boiler, server and hub rooms and plant rooms, and the area taken up by internal walls, comprising all spaces in the Gross Area not included in the Net Area;

Non-net Site Area

Part of the Gross Site Area which supports the functioning of the Site and includes the footprint of buildings and access areas such as paths, roads and parking;

Nursery Classroom

Means a General Teaching space designed to accommodate a form or class of Students below the age of 5 ;

Nursery and Reception Outdoor Play

An external space directly outside Nursery and Reception Classrooms for outdoor learning and play;

P1 Infrastructure Tests

Means the ICT infrastructure tests set out in [Annex 2] of Part 1 (*Generic Design Requirements*) of these ACRs required prior to ICT Handover, as undertaken by the Project Co;

P2 Infrastructure Tests

Means the ICT infrastructure tests set out in [Annex 2] of Part 1 (*Generic Design Requirements*) of these ACRs required prior to Payment Commencement Date, as undertaken by the School/College ICT specialist installer;

Passive ICT Infrastructure

Means infrastructure items defined as Passive within the ICT Responsibilities Matrix set out in paragraph 4 at 4.2.6, 4.4 and table 45] of Part 1 (*Generic Design Requirements*) of these ACRs;

Performance in Use (PIU) Targets

Means the targets set out in the Service Level Specification, Annex 1 to which the Building is required to perform;

Performance Space

An (often) large space designed with acoustic properties to accommodate performance to an audience, also designed to accommodate other activities as well;

Personal Emergency Egress Plans (PEEPs)

A plan developed in consultation with a disabled individual in relation to their escape from a building in an emergency where such person is not capable of making his/her way out of a building without assistance;

Plant Areas

Plant rooms, hub rooms, server rooms, risers and ducts;

Practical Teaching

Teaching that involves Students doing (or watching) practical activities and often requiring access to Service Infrastructure and specialist equipment, for example Primary School specialist practical spaces, Secondary School and College light practical teaching spaces including science labs, art and Design and Technology rooms (such as hair and beauty, graphics, textiles and electronics), heavy practical teaching spaces (such as food rooms and Design and Technology workshops) and College Vocational Teaching spaces;

Preparation areas

Secondary School and College science preparation rooms and preparation rooms for workshops and vocational spaces;

Primary School

Generally, a mainstream School for Students aged 4 to 11 covering 2 educational stages: Foundation Phase (3 to 7 years) and Key Stage 2 (7 to 11 years);

Profound and Multiple Learning Disabilities

People with Profound and Multiple Learning Disabilities have severe and complex learning difficulties as well as other disabilities such as sensory or physical disabilities, complex health needs or mental health difficulties. This range of needs also includes specific learning difficulties which encompasses a range of conditions such as dyslexia, dyscalculia and dyspraxia;

Reception Classroom

Means a General Teaching space designed to accommodate a form or class of Students in their reception year.

Room User Guide

Means a simple guide or pictogram provided by Project Co for staff (e.g. teachers) on how to use room systems e.g. lighting, ventilation, heating. This shall be provided for each occupied space;

Schedule of Accommodation (SoA)

Means the Excel spread sheet listing all the spaces in the Facility, the size of each space and (for teaching spaces) the maximum group size they will accommodate as set out in [Annex 2] of the relevant Site Specific Brief. Spaces are listed under Net and Non-net Area (ref). The Schedule of Accommodation also indicates the number of Students and the Facility type. The Schedule of Accommodation will also list all external spaces, including the area of each external space.

On multi-facility projects, reference to Schedule of Accommodation or SoA means the Excel spread sheet in respect of the relevant Facility.

School

Means a Primary School or a Secondary School;

Secondary School

Generally, a mainstream school for Students aged 11 to 16 or 19 covering 2 or 3 educational stages: Key Stage 3 (11 to 14 years), Key Stage 4 (14 to 16 years) and in some cases the sixth form). For the purposes of these General Design Requirements, a Secondary School includes middle-deemed Secondary Schools that provide for Students aged 8 to 13;

Secure Line

The agreed demarcation between secure and public areas of the Facility Buildings and Grounds for the purposes of safeguarding and security;

Service Infrastructure

Means the infrastructure associated with Building Services, including but not limited to pipework, cables, wires, sockets and conduits;

SEN (D)

Special educational needs (and/or disability), also referenced as Additional Learning Needs (ALN);

Site Specific Brief (SSB)

Means the site specific brief comprising Part 2 of Section 3 (*Authority's Construction Requirements*) of Schedule 6 (*Construction Matters*) (including Annexes [I to V]) provides key data for a specific Facility and sets out any requirements for that Facility which are additional or alternative to the ACR;

Small Group Room

A teaching space designed to accommodate an individual or a part of a class that is a discrete, quiet spaces for learning support, behaviour management or private counselling. Small Group Rooms designed for individual or small group music activities are sometimes called music practice rooms;

Soft Services

Means Grounds maintenance; caretaking and portering; cleaning, resource and waste management, and pest control; catering; health and safety; fire safety management and security; and management of the Soft Services;

Specially Resourced Provision

Additional specialist facilities in a mainstream School Site for a small number of Students, typically less than 30, who usually have EHC plans or statements of special need. Students spend most of their time in mainstream classes, attending the SRP facilities for individual support, to learn a specific skill, to receive medical or therapeutic support or to access specialist equipment. The facilities can be in a suite or dispersed throughout the school;

Staff Areas

Staff utilised spaces including Interview room, sick bay or sick room, reprographic facilities, staff room, staff work rooms, offices, meeting or conference rooms, offices / workshops for facilities manager or ICT technician;

Storage

Means teaching storage, including chemical and material stores; and non-teaching storage, including cloakrooms and lockers;

Soft Landings Framework

means the BSRIA-led process designed to assist the construction industry and its clients deliver better buildings;

Suite of Spaces

A group of spaces, which could be teaching or non-teaching, associated by type of activity, such as General Teaching or Practical Teaching, and supported by smaller support spaces such as store rooms and toilets. Spaces can be grouped in different ways to form a suite;

Teaching Resources

Material that supports teaching and learning including printed material and equipment;

Toilets and personal care (non-net)

Facilities for staff, Students and visitors including toilets, accessible toilets and Hygiene Rooms and changing rooms and showers;

Useful Daylight Illuminance (UDI)

UDI is the annual occurrence of illuminances, for the hours of operation, across the work plane that are within a range considered “useful” by occupants as further defined in paragraph [2.9.10.1] of the Generic Design Requirements and in CIBSE Lighting Guide 10;

VOC

Means volatile organic compounds;

Vocational Teaching

A blanket term for a number of vocational and work-based subjects requiring light and heavy practical spaces with specialist equipment, predominantly in Colleges, including, but not limited to, hair and beauty, health and beauty, construction, hospitality and catering and automotive mechanics;

UPS

Means an uninterruptable power supply meeting the requirements of paragraph [4.3.17] of the Generic Design Requirements;

1.2 Key Principles

- 1.2.1 Project Co shall and Project Co's Proposals shall comply with and address all elements of the Authority's Construction Requirements, including the Generic Design Requirements, the relevant Site Specific Briefs, the SoA and the ADS in Section 3 of this Schedule 6 (*Project Co's Proposals*) of this Agreement.
- 1.2.2 Project Co shall also be required to ensure that the requirements detailed within the Service Level Specification (contained in Section 1 of Schedule 12 (*Service Requirements*)) are also captured within their design.

1.3 Compliance

- 1.3.1 Project Co shall ensure that the Buildings, Grounds and Equipment provided for all the Site[s] comply with all relevant and current regulations, Welsh, British and European standards and policies including without limitation those referenced in footnotes and/or listed in the Site-specific Annexes. Many of these, but not all, are referenced in footnotes and/or listed in Annex 1 and in the annexes to the relevant Site Specific Briefs (local and planning for each Facility).
- 1.3.2 Where specific references are made to the parts of the Building Regulations, they are usually denoted as Part L, Part M etc. Where references are made to Approved Documents, they are noted as AD A, AD B etc.
- 1.3.3 Equipment manufacturers used by Project Co shall have current BS EN ISO 14001 compliance.
- 1.3.4 Where the Project is to be undertaken at an Existing Facility, Project Co shall be responsible for ensuring that the whole Facility within the Site[s] shall comply with all requirements in these ACRs. Where there are retained Building Elements, structures, facilities and Grounds, Project Co shall replace or upgrade these to comply with these ACRs.

- 1.3.5 Where the requirements refer to an area, space or Suite of Spaces, these requirements shall apply to all spaces in any Facility. Any area or space within Facilities shall conform to all relevant requirements in these ACRs.
- 1.3.6 The requirements in these ACRs in respect of external space and Grounds:
- a. shall always apply to the external areas adjacent to any Building(s) which are required for access or which are affected or removed due to the proposed Works, including any informal and social area adjacent to Foundation Phase Classrooms or Primary School Classrooms;
 - b. shall apply to existing Grounds within the Site except for any part that is specifically described in the SSB; and
 - c. shall not apply to existing Grounds beyond the Site except for any part that is specifically described in the SSB (for instance for consequential work).
- 1.3.7 Where it is agreed that Project Co is not able to meet the requirements of these Generic Design Requirements in full, due to the limitations of the Site[s] or the Buildings on the relevant Site prior to the Works, details of the derogation from the specific provision of these Generic Design Requirements and any replacement requirement will be set out in the Site Specific Brief.. Project Co will not be required to comply with such requirements where the Authority's agreement to such derogation from these Generic Design Requirements is specifically recorded in each Site Specific Brief.

1.4 Key Outcomes

- 1.4.1 Project Co shall ensure that the design and construction of all Facilities, and any Equipment and ICT Infrastructure provided by Project Co, meets the following six overarching outcomes of functionality; health and safety; standardised approach; future proofing; Minimum Residual Life Expectancy Requirements and sustainable design and construction.
- 1.4.2 Functionality
- 1.4.2.1 The Works and the Facilities shall be suitable for their intended purpose and provide an environment appropriate to a School or College, which supports the Education Drivers outlined in [paragraph 2.3] of each Site Specific Brief. The design shall also meet the educational and organisational requirements of each Site Specific Brief, taking account of the age ranges of the Students, and of the constraints of each Facility and of any Buildings on the relevant Site prior to the Works.
- 1.4.3 Health and Safety
- 1.4.3.1 The layout and design of the Site, the Buildings, including Building Services, ICT Infrastructure, Plant and Equipment, are to provide a safe and secure environment for Students and staff. People with SEN (D), including those using Mobility Equipment and those with a visual or hearing impairment, must not be placed at a disadvantage by the design of the Works or the Facilities.
- 1.4.3.2 All Works shall be designed and constructed in line with The Construction (Design and Management) Regulations 2015.
- 1.4.4 Future Proofing
- 1.4.4.1 The Buildings, Grounds, any Equipment and ICT Infrastructure provided by Project Co shall be designed, constructed or procured so that later changes can be achieved easily and cost-effectively. These would be in response to changes in Curriculum priorities

including the new Curriculum for Wales 2022, organisation, technology and, where required in the relevant Site Specific Brief, Student numbers. Essential changes in the sizes of teaching rooms in the future should be achievable without major Building work.

1.4.5 Minimum Life Expectancy and Residual Life

- 1.4.5.1 The Buildings shall have Minimum Life Expectancy of 60 years or more.
- 1.4.5.2 Column 1 of Table 1 sets out the Minimum Life Expectancy of key Building Elements, the purpose of which is to reduce the frequency at which the Lifecycle Replacement takes place.
- 1.4.5.3 Project Co shall ensure that the Works are designed and constructed such that the Handback Requirements in Schedule 18 can be met. Project Co will co-operate with the Authority in its arrangements for the Handback Surveys to be carried out in accordance with the provisions of these ACR's and Schedule 18 (*Handback Requirements*) of this Agreement. The Handback Works shall be carried out in accordance with Good Industry Practice, the Joint Operating Protocol and such that the Facility, meets the Minimum Residual Life Expectancy Requirements set out in column 4 of Table 1 of these ACRs .
- 1.4.5.4 At the Expiry Date the Facilities should be handed back in a state so that they comply with the Minimum Residual Life Expectancy Requirements as set out in column 4 of Table 1 of Part 1 of these ACRs and the Handback Requirements.
- 1.4.5.5 Project Co shall note that although Passive ICT Infrastructure may have a lifecycle exceeding 15 years it is anticipated that the infrastructure will be technologically obsolete after 15 years. Project Co shall replace this infrastructure once during the term of the Project, timing to be agreed with the Authority and again as part of the Handback Works.

TABLE 1 MINIMUM LIFE EXPECTANCY AND MINIMUM RESIDUAL LIFE REQUIREMENTS

| Building Element | Building Element Sub-type | Minimum Life Expectancy Requirement (at the Actual Completion Date [in respect of the Main Works or Actual Post Completion Works Date in respect of the Post Completion Works]) | Minimum Residual Life Expectancy Requirements (at the Expiry Date) |
|-------------------------|--|--|---|
| Substructure | Foundations | 60 years | 35 years |
| | Slab | 60 years | 35 years |
| Structure | Walls | 60 years | 35 years |
| | Upper Floors | 60 years | 35 years |
| | Roof structure | 60 years | 35 years |
| | Structural frame | 60 years | 35 years |
| | Stairs | 60 years | 35 years |
| Underground Drainage | Tanks, leaf filters, SUDs attenuation cells and systems, | 60 years | 35 years |

| Building Element | Building Element Sub-type | Minimum Life Expectancy Requirement (at the Actual Completion Date [in respect of the Main Works or Actual Post Completion Works Date in respect of the Post Completion Works]) | Minimum Residual Life Expectancy Requirements (at the Expiry Date) |
|----------------------------------|---|--|---|
| | Pipes, inspection chambers | | |
| External envelope | Roof coverings | 30 years and easily overlaid, over-coated, upgraded or replaced without affecting the structure or deck below | 5 years |
| | External walls / cladding | 40 years | 15 years |
| | Windows and external doors | 25 years | 10 years |
| | Roof lights | 25 years | 10 years |
| Rainwater disposal installations | Rainwater pipes, hoppers and gutters | 25 years | 10 years |
| Canopies | Frame and roof covering | 20 years | 10 years |
| Internal partitions | Non-loadbearing partitions | 30 years | 10 years |
| Internal doorsets | Internal doors | 20 years | 10 years |
| Internal ironmongery | Internal ironmongery (including finger guards) | 10 years | 5 years |
| Roller Shutters | Between the Kitchen server and hall and Facility reception hatch. These may be need to be fire-rated depending on the Contractor's ire strategy | 20 years | 10 years |
| Internal Guarding | Internal Guarding to stairs and ramps | 20 | 5 years |
| Internal Finishes | Floor finishes | 10 years | 5 years |

| Building Element | Building Element Sub-type | Minimum Life Expectancy Requirement (at the Actual Completion Date [in respect of the Main Works or Actual Post Completion Works Date in respect of the Post Completion Works]) | Minimum Residual Life Expectancy Requirements (at the Expiry Date) |
|----------------------------|--|---|--|
| | Decorations | 5 years ¹ | 3 years |
| | Tiling | 15 years | 5 years |
| | Ceiling finishes (suspended and plasterboard) | 20 years | 10 years |
| | Sanitary fittings | 20 years | 5 years |
| | Integrated plumbing system (IPS) | 15 years | 5 years |
| Building Services | Engineering services (major components) and Sprinklers | In accordance with CIBSE Guide M Table Appendix 12.A1 and below | See below |
| | Waste installations | 30 years | 5 years |
| | HVAC installations | 20 years | 10 years |
| | Electrical installations | 30 years | 5 years |
| | Security and communication installations | 15 years | 5 years |
| | Catering Kitchen ventilation canopy | 20 years | 10 years |
| | Photo-voltaics and other renewables | 20 years | 15 years |
| Passive ICT Infrastructure | Wired and wireless infrastructure including cabling, containment and routing | 15 years ² | 15 years |
| | Sockets | 10 years | 5 years |

¹ Time to first repaint. Some finishes allow partial repaint and touching up before first repaint is required.

² Note paragraph [1.4.5.5] above

| Building Element | Building Element Sub-type | Minimum Life Expectancy Requirement (at the Actual Completion Date [in respect of the Main Works or Actual Post Completion Works Date in respect of the Post Completion Works]) | Minimum Residual Life Expectancy Requirements (at the Expiry Date) |
|--------------------------------|---------------------------|---|--|
| Sanitary and Catering Fittings | | 20 years | 10 years |
| Lifts (including controls) | | 15 years | 5 years |
| External Space | Roads and paving | 40 years | 10 years |
| | Fencing | 15 years | 5 years |
| | Hard surfaced play areas | 20 years | 10 years |
| | External furniture | 10 years | 5 years |
| | Door barriers | 20 years | 10 years |

1.4.6 Sustainable Design and Construction

1.4.6.1 A sustainable approach to the design, construction of the Works and the Facilities, must deliver a cost-effective and resource-efficient facility that:

- a. optimises passive design measures, including fabric first principles;
- b. prioritises natural ventilation over mechanical ventilation;
- c. if natural ventilation is provided, cross flow or double sided natural ventilation should be used for classrooms and large space. Single sided natural ventilation should only be used for small single offices and server rooms.
- d. minimises the use of all resources;
- e. reduces the demand for energy and water use during the Construction Phase and the Operational Term;
- f. minimises waste and CO₂ emissions during the Construction Phase and Operational Term; and
- g. allows opportunities for recycling during the Construction Phase and Operational Term.

1.4.6.2 All aspects of the Works and the Facilities should optimise the use of low-energy solutions and be designed and constructed to respond to specific Site constraints and opportunities³, and to the future impact of climate change.

1.4.6.3 Project Co shall provide the means for the effective measuring and monitoring of the performance of the relevant Facility in operation.

³ See CIBSE TM 36, Climate Change and the Indoor Environment.

- 1.4.6.4 Project Co shall design build and operate the Facilities in accordance with BS EN ISO 14001 including the maintenance of an 'Environmental Management Plan' that records all agreed targets for the key aspects of environmental performance identified in these ACRs and the Service Level Specification. This will include assessment and reporting of the agreed environmental performance criteria for the project. This will include an assessment against BREEAM New Construction Education criteria, being a Welsh Government requirement, to achieve the BREEAM “excellent” target.
- 1.4.6.5 Project Co shall design the Works and the Facilities so that an efficient approach to Maintenance Works, Lifecycle Replacement, facilities management and the provision of Soft Services, such as cleaning and security, can be provided in a cost-effective way. There should be no inaccessible areas which are either difficult to clean or difficult to supervise.
- 1.4.6.6 Project Co shall ensure that they achieve a minimum recycled and reused content of at least 15% of the total value of the materials used in the Works.
- 1.4.6.7 Project Co shall design the Works to maintain and enhance biodiversity and the resilience of ecosystems on the Site in so as to be compliant with the obligations and duties placed on public authorities under s6 of The Environment (Wales) Act 2016. This includes but is not limited to:-
- the resilience of ecosystems
 - diversity between and within ecosystems;
 - the connections between and within ecosystems;
 - the scale of ecosystems;
 - the condition of ecosystems (including their structure and functioning); and
 - the adaptability of ecosystems.
- 1.4.6.8 Project Co will provide such support and reasonable assistance as the Authority may reasonably require in connection with its obligation and duties under the Environment (Wales) Act 2016.
- 1.4.7 BIM
- 1.4.7.1 Project Co is required to provide Level 2 BIM.
- 1.4.7.2 Project Co shall comply with the Soft Landings Framework and BS8536
- 1.4.7.3 Project Co shall also comply with the Project BIM Agreement .
- 1.4.7.4 Project Co must ensure the BIM model has all relevant and required construction, operation and maintenance information provided at the required stages of design and construction and in accordance with the best practice guidance outlined above.

1.5 Educational Drivers

- 1.5.1 Project Co shall ensure that the design of the Works and each Facility meets the Educational Drivers of these ACRs detailed in the relevant Site Specific Brief.

1.6 Curriculum and Organisation

- 1.6.1 Project Co shall design each Facility provide for Suites of Spaces for teaching, each with enough adaptable space to be able to accommodate a range of learning scenarios, both now

and in the future. For Schools, Project Co shall take account of the requirements of the new School Curriculum for Wales planned for September 2022 (and any updates or any replacement curriculum referred to in the SSB).

- 1.6.2 Project Co shall also provide accommodation that supports and encourages learning outside the formal timetable through innovative and thoughtful design of the outdoor space and Dining and Social area.

1.7 Teaching and Pedagogy

- 1.7.1 Project Co shall design all Facilities and Grounds to create an environment conducive to effective teaching through the provision of:
- a. work-space in each suite that enables teachers to plan and prepare in groups and individually;
 - b. Learning Resource Areas in each suite for small group work and for staff to have individual discussions with Students so that feedback can be given to them on their progress;
 - c. ICT Infrastructure and building design which allows the best use of ICT equipment that is available now and in the future;
 - d. designs which allow a range of potential Loaded Room Layout Drawings, which is well co-ordinated with Equipment, ICT Infrastructure and Building Services;
 - e. some internal transparency between the central Circulation and teaching spaces, wherever possible, so that Facility Users are visible to others in that suite;
 - f. a design that allows Facility Users to engage and interact with the external environment, where possible, so as to create practical hands-on learning, with a direct connection to the outdoors in Foundation in Primary Schools and for some Specially Resourced Provision or designated settings; and
 - g. a design that relates to the community, particularly where SSB's identify Vocational Teaching facilities that replicate working environments.

1.8 Behaviour and Pastoral Care

- 1.8.1 Project Co shall design each Facility to create an environment that supports behaviour and pastoral care and allows for passive supervision through the provision of:
- a. entrance and Circulation areas that allow space for safe and comfortable movement;
 - b. offices and staff workrooms that are located and designed to support passive supervision;
 - c. distinct Suites of Spaces that break down the scale of large Facilities; and
 - d. toilets that are positioned for easy access and to facilitate passive supervision.

1.9 SEN (D)

- 1.9.1 Project Co shall design any Facilities and Grounds provided such that a Student with SEN (D) or ALN is not placed at a disadvantage in terms of access to teaching, learning and social spaces. Project Co shall provide the SEN(D) facilities listed in the Schedule of Accommodation, including in Schools any associated Specially Resourced Provision or Designated Units, and to meet the particular requirements of the SSB.

1.9.2 Project Co shall ensure that the environmental design and the building fabric are appropriate to the needs of Students and others with SEN (D) or ALN, including any SEN (D) or ALN specific needs described in the these ACRs.

1.9.3 Project Co shall make every space in a suite accessible, for an accessible toilet to be available from each Suite of Spaces.

1.10 Health and Well-Being

1.10.1 Project Co shall provide an effective healthy indoor environment with daylight and electric lighting, ventilation, thermal comfort and acoustics which are designed to support educational attainment. Project Co shall ensure that themes in The Wellbeing of Future Generations (Wales) Act, 2015 and the proposed changes to Curriculum for Wales which introduces health and well-being as one of the six areas of learning are reflected in their design statement.

1.10.2 Project Co shall provide a healthy, safe environment with an area that can accommodate a civilised dining experience, linked to a catering area within which healthy meals can be prepared and delivered.

1.10.3 Project Co shall ensure that sport facilities may be open to the community outside the Core Sessions without adversely affecting the Facility's security.

2. Buildings and Grounds

2.1 Overarching Requirement

- 2.1.1 This paragraph gives the generic requirements for Facilities and Grounds which apply to each Facility. In producing the Project Co's Proposals, Project Co shall consider and address all elements of these ACRs. Although Project Co may suggest alternative approaches, these ACRs shall only be changed or relaxed where specific derogations are agreed by the Authority and included in Annex 7 (*Derogations*) of the relevant Site Specific Brief.

2.2 Site Plan - Overarching Requirement

- 2.2.1 Project Co shall ensure that the design maximises the potential use of the Sites, locating and orientating any Buildings in a manner that will create suitable internal and external spaces and allow possible future extensions. All Facility Users must be able to find their way safely and easily around Buildings and Grounds. Project Co shall ensure that the design makes good use of the Site, balancing the needs of pedestrians, cyclists and vehicles and dealing with any Site-specific constraints. All Facility Users must be able to find their way safely and easily around Buildings and Grounds in accordance with AD M and BS 8300-1:2018, and BS 8300-2:2018.

2.3 Site Layout

- 2.3.1 Project Co shall ensure that the layout of any Building(s) and Grounds on the relevant Site:
- a. takes account of the character of the area and topography of the relevant Site, including its shape, contours and subsoil; and the local vegetation, ecology and micro-climate;
 - a. takes account of existing utilities service routes;
 - b. orientates the Facility Buildings on the site to optimise passive environmental design principles;
 - c. takes account of biodiversity on the site with particular attention to resident species and plants, including undertaking surveys for the presence of bats and endangered species and acting upon the findings;
 - d. mitigates the effects of adverse environmental conditions, such as traffic noise, including any highlighted in the relevant Site Specific Brief;
 - e. locates quieter activities away from noisier activities and neighbourhood noise, wherever possible;
 - f. takes into account the needs of neighbours in close proximity;
 - g. ensures the safety and security of Students, staff and visitors;
 - h. provides clearly defined boundaries which discourage trespass and vandalism and provide good visibility to facilitate surveillance across the site;
 - i. provides car parking, in line with the planning requirements;
 - j. (for Secondary Schools in particular) provides easy movement between changing rooms and outdoor PE facilities, and between parking areas and parts of the Buildings and Grounds likely to be used outside the Core Day; and

- k. protects existing Site features worthy of retention where desirable and practicable, including existing trees in accordance with BS 5837:2012 'Trees in relation to design, demolition and construction – Recommendations'.

2.3.2 Site Access

- 2.3.2.1 Project Co shall ensure that the design of all Sites takes account of access needs of the emergency services and seeks to resolve potential conflicts between different movements, ensuring the safety and security of Students, staff and visitors. The landscape and layout shall be designed to give priority to pedestrians while allowing appropriate access for vehicles.
- 2.3.2.2 Project Co shall ensure that the design of each Site provides for:
 - a. safe and convenient access for pedestrians, cyclists and vehicles, including emergency vehicles, balancing the demands of different users and keeping vehicular movement within the Grounds to a minimum, and as far as possible separate from pedestrian routes;
 - b. fire and emergency escape routes leading to safe places of assembly (on existing sites, the construction project should maintain or improve the accessibility of emergency vehicles on and around the Sites);
 - c. access to and through soft landscape areas along defined pathways that do not require special footwear and are easily maintained, with any all-weather surfaces provided being located so that Facility Users do not have to cross grass to reach them;
 - d. access for service vehicles and secure storage for goods and waste awaiting collection;
 - e. separate and safe access for deliveries, maintenance vehicles and waste removal and collections from site, appertaining to the execution of the Works and/or Services; and
 - f. suitable access around the Building for maintenance of the Grounds and building façade.
- 2.3.2.3 Project Co shall produce and comply with a monitored process of entry and exit agreed with the Authority, either through security or physical barriers to entry or exit with acknowledgement and authorisation processes.
- 2.3.2.4 Project Co shall demonstrate the availability of safe drop-off and pick-up points, for school buses and private vehicles and comply with the Active Travel Design Guidance. These can be off-site, if appropriate walking routes exist. The Active Travel (Wales) Act 2013 seeks to increase the numbers of everyday journeys made on foot and by bike, such as the journey to school. As a result of the Act, local authorities need to plan and develop integrated active travel networks, connecting key trip generators, including Schools and Colleges. The Works shall be designed and constructed so as to ensure that each Site includes provision of safe and convenient walking and cycling access.
- 2.3.2.5 Project Co shall manage deliveries and collections to and from each Site so as not to interfere with the delivery of education at the Facility or the movement of Facility Users about the Site.

- 2.3.2.6 Students with SEN (D) are likely to be less aware of traffic risks and may not see hear vehicles, and Project Co shall make relevant adjustments when designing access routes to accommodate their particular needs.
- 2.3.2.7 Project Co shall ensure that main and secondary Site entrances are located to take account of pedestrian and vehicular routes adjacent to the Site (including public transport). The entrances shall incorporate controlled access and allow clear visual supervision in order for the Facility to manage the movement of Students and visitors onto and off the Site.
- 2.3.2.8 Project Co shall ensure that there shall be no more than two easily controlled access points to each School/ College site where possible (and other access points as specified in the the relevant Site Specific Brief), located so that they allow clear visual supervision in order for the Facility to manage the movement of Students and visitors onto and off the Site.
- 2.3.2.9 Ensure that access complies with these ACRs. Consideration to be given to the location context as Colleges are more likely to have areas open to the public; access and security will be detailed in the SSB.
- 2.3.2.10 Where required, Project Co shall provide updates to security systems, for example number plate recognition at a reasonable cost.
- 2.3.2.11 Project Co shall design the Site for accessibility and this shall be reflected in the Access Statement that Project Co provides. All main access routes including roads, paths, ramps and entrances shall be fully negotiable, including by people with limited mobility in accordance with Part M and BS 8300-1:2018, and BS 8300-2:2018.
- 2.3.2.12 Ensure that all Buildings and Grounds are designed to include suitable guarding and barriers where there is a risk of falling, including pedestrian and vehicle barriers, and suitable requirements to prevent injury from (opening) doors and windows in accordance with AD K.
- 2.3.2.13 Project Co shall provide a clear hierarchy of Circulation routes with easily-supervised and clearly identified entry points to all Buildings and signage directing visitors from the entry of each Site to the visitor's reception. Project Co shall ensure that entry/exit points for Students are controllable either within the Building or within the overall Site.
- 2.3.2.14 Ensure that when a Building is some way back from the public highway, road access for fire appliances (and other large vehicles i.e. waste collection) is provided, and that any entrances through which appliances may need to pass satisfy AD B requirements, and that there is adequate space to enable appliances to turn.
- 2.3.2.15 Where a Nursery and Reception Classroom is provided, Project Co shall ensure that parents and/or carers can gain access to the nursery to collect & drop-off children throughout the day without entering the main School and without crossing any external play space, including the nursery play area. There shall be sufficient space close to this entrance for 15 parents with buggies to gather before gaining access or as otherwise required in the relevant Site Specific Brief.

2.4 Organisation and Layout - Overarching Requirement

- 2.4.1 Project Co shall ensure that the Buildings provide all the teaching, support and other spaces specified in the SoA, to suit the Curriculum and organisation for the number of Student places planned. Project Co shall ensure that all such spaces are the right size, proportions and specification for their functions, as defined in the ADS.

- 2.4.2 Project Co shall ensure that the design and construction of any internal spaces complies with the guidance in Building Bulletin 98 – ‘Building Framework for Secondary School projects’ (BB98), Building Bulletin 99 - Building Framework for Primary School projects (BB99), and Building Bulletin 104: ‘Area guidelines for SEN (D) and alternative provision’ (BB104) and for College projects the LSC Guidance on the Management of Floor Space 2007 for FEIs in Wales.
- 2.4.3 Project Co shall ensure that the layout of the Facilities allows the Facilities to be used outside of Core Sessions. As a minimum, security systems, fire alarm systems, heating and cooling shall be zoned so that the following are provided with separate zones:
- a. sports facilities, including change areas and toilets;
 - b. main hall, including any catering facilities, and toilets;
 - c. community use adult education teaching facilities, including toilets; and
 - d. any other spaces as identified in these ACRs e.g. Nursery classroomscommunity rooms, areas used for before and after school clubs, and areas of College Facilities to be open at evening and weekends such as a restaurant.
- 2.4.4 Typical Organisation
- 2.4.4.1 Project Co shall ensure that all spaces are located so that there is a clear spatial diagram for the Building that is appropriate for the Curriculum and organisation of each Facility, in line with any adjacency diagrams in the relevant Site Specific Brief. Spaces shall be linked by well organised Circulation space that suits the likely movement and numbers of Students.
- 2.4.4.2 Project Co shall ensure that the Building’s layout provides the right balance and distribution of space, in line with the SoA and the adjacency diagrams in the relevant Site Specific Brief. Each Facility will comprise appropriate Suites of Spaces depending on the type of and/or requirements of the Facility. The SoA for each Facility will be organised in a number of Suites of Spaces, avoiding small independent groups of rooms wherever possible. Any exceptions to this generic requirement will be identified in each of the Site Specific Briefs.
- 2.4.4.3 Project Co shall ensure that all internal spaces are numbered with recognisable labels and shown on the Buildings and Grounds layout plans. They shall also include the identification of spaces identified for the delivery of the Services along with a statement of their function (e.g., office, cleaning stores etc). The door signs shall be updatable, e.g. for change of staff names.
- 2.4.4.4 Project Co shall ensure that the design and layout of Buildings and Grounds will include the space requirements to deliver the Soft Services including storage and office space as defined in the ADSs. They will be organised to enable delivery of the required services, to the service levels required to positively support the Facility's Curriculum delivery.
- 2.4.4.5 Project Co shall design these Suites of Spaces to accommodate the model of education that each Facility is proposing in the relevant Site Specific Brief, taking into account the possibility of future changes. In particular:
- a. each Suite of Spaces shall provide the right number of spaces;
 - b. each suite of teaching spaces, other than a hall and Performance Spaces, shall be adjacent to other similar spaces wherever possible;
 - c. each suite of teaching spaces shall be able to be linked to, or expanded into, an adjacent suite of teaching spaces in the future; and

- d. the configuration of spaces must be able to expand, contract and reform in as many ways as is economically feasible.
- 2.4.4.6 Project Co shall provide teaching spaces that are visible from the Circulation area in that Suite of Spaces, for instance by providing vision panels in doors. Any exceptions to this shall be specified in the SSB. Project Co shall ensure that all spaces may be accessed from an adjacent Circulation area except store rooms and (where appropriate) toilet and hygiene facilities that are accessed directly from learning spaces or as stated otherwise in these ACRs.
- 2.4.4.7 Project Co shall not design long lengths of dark or narrow corridor with teaching spaces on both sides. Where long corridors are needed, Project Co shall relieve the impact by introducing light and views through teaching spaces, glazed offices and staircases.
- 2.4.4.8 In designing the Facilities, Project Co shall comply with Part M; 'Access to and Use of Buildings'. Project Co shall ensure that all new Buildings are fully accessible to all people including those with impaired movement or other disabilities. Where Buildings are to be refurbished Project Co shall ensure that all Students have full access to the Curriculum. There shall be clarity in the arrangement and location of entrances, main Circulation routes and key spaces. The Building layout shall be clearly organised to enable ease of circulation for Students, visitors and staff, and to aid orientation and ease of movement to external areas – particularly in event of emergency. This shall be achieved through the layout of the Building and not just rely on signage.

2.5 Internal Space - Overarching Requirement

- 2.5.1 Project Co shall ensure that each Facility has sufficient teaching and support spaces to suit the Curriculum and organisation for the number of Student places planned, as specified in the SoA. Project Co shall ensure that:
- a. all such spaces are the right size, proportions and design for their functions, as defined in the ADS;
 - b. that areas for catering, Dining and Social space are sufficient to allow for healthy and civilised eating and recreation; and
 - c. the design of the Building layout, zoning of the Building Services and security shall contemplate that the Facility will be used outside of the Core Sessions, for example by the community.
- 2.5.2 Dimensions and Proportions
- 2.5.2.1 The Net Area of any space shall be at least that required in the SoA excluding:
- a. the area of any through Circulation to adjacent spaces;
 - b. any area outside of the orthogonal shape that provides only Circulation (i.e. a lobby without a second door); and
 - c. the Net Area of any support area within the space such as coats and bags storage or teaching storage in a Classroom.
- 2.5.2.2 Access to service risers within small rooms such as offices or stores shall not limit the required occupancy or furniture layout.
- 2.5.2.3 Project Co shall ensure that the proportions and dimensions of any stores provided, and the location of store doors, allow ergonomically appropriate access to all shelves and an efficient shelving layout.

- 2.5.2.4 Project Co shall ensure that spaces are an appropriate shape as well as size to accommodate the Authority's Construction Requirements. Any teaching spaces specified in the SoA shall be rectangular in plan and no narrower than 2:1 in either direction. The proportion of any other space (other than music practice rooms) shall be orthogonal and will be suitable for the required activities to take place.
- 2.5.2.5 Spaces shall be at least the minimum depth shown in the ADS and teaching spaces shall be based on the following depths (from the inside face of the external wall to the internal face of the opposite wall) to optimise the room's functionality and facilitate future adaptation. Where Project Co proposes alternative dimensions, the functionality shall be demonstrated with Loaded Room Layout Drawings;
- a. For Halls and 'large spaces', as defined in, over 115m², a depth of 10m, 12m or 18m;
 - b. For Primary School spaces between 35m² and 70m², a depth of 7.2m;
 - c. For Secondary School and College spaces between 70m² and 115m², a depth of 7.8m, as covered in BB 98/99; and
 - d. For Colleges, where possible, room depths should not exceed 7.8m unless in Vocational Teaching spaces where workplace standards are to apply as required in the Site Specific Brief or ADS.
- 2.5.2.6 The proportions of any Performance Space shall allow the audience a clear view of the performance area.
- 2.5.2.7 Each space shall have at least the minimum ceiling height specified in the ADS. This shall be as set out below:
- a. for teaching spaces (and medium-sized spaces such as a staff room or library) between 35m² and 115m², a minimum floor-to-ceiling height of 2.7m, and minimum clear height of 2.7m in workshops and resistant materials prep rooms;
 - b. for primary Halls, drama, dance and activity studios over 80m², a minimum floor-to-ceiling height of 4.5m;
 - c. For secondary and College main Halls: a minimum floor-to-ceiling height of 6.9m;
 - d. for a sports hall over 300m² a minimum floor to ceiling height of 7.5m or 6.9m if less than 300m², unless different in the SSB;
 - e. For Dining areas: a minimum floor-to-ceiling height of 3.0m. Where dining halls are located next to main halls the ceiling levels in both shall be the same to allow joining of the spaces; and
 - f. For College specialist spaces the design should align with HSE requirements and where identified in these ACRs the relevant industry standards for specialist spaces/Vocational Teaching spaces.
- 2.5.2.8 The minimum ceiling height above shall be to the underside of the ceiling or soffit. Isolated elements such as individual light fittings, sprinkler heads, fire and smoke detectors, beacons, public address and voice alarm speakers, PIR sensors, grilles, diffusers, and WiFi points can protrude up to 150mm below the ceiling height, except in Design and Technology, PE spaces and Dining and Social spaces, where the ceiling height specified in the ADS shall be a clear height. A bulkhead can protrude below the ceiling line to 150mm below this height if it covers no more than 25% of floor area within the space.
- 2.5.2.9 Where there are light fittings in rafts or acoustic panels suspended below the ceiling, the ceiling height shall be measured to the underside of these elements.

- 2.5.2.10 Using the Loaded Room Layout Drawings specified in these ACRs Project Co shall demonstrate in the Project Co's Proposals that:
- a. the activities and Equipment required in the ADS can be accommodated (Loaded Room Layout Drawings options shall be provided to demonstrate functionality);
 - b. the daylight and the ventilation requirements of the these ACRs can be met;
 - c. the range of dimensions proposed is limited, supporting a standardised approach; and
 - d. the associated structural grid and the fenestration system will allow adaptability in all teaching spaces.
- 2.5.2.11 Project Co shall ensure that spaces are an appropriate shape as well as size to accommodate the Authority's Construction Requirements. Except where Project Co can identify specific advantages to designing otherwise, any teaching spaces specified in the SoA will generally be orthogonal in plan, and in any case no narrower than 2:1 in either direction. The proportion of any non-teaching space will be suitable for the required activities to take place.
- 2.5.2.12 The proportions of any Performance Space must allow the audience a clear view of the performance area.
- 2.5.2.13 The Net Area of any space should be at least that required in the SoA and not include the area of any Circulation to other adjacent spaces. This is especially important for small areas such as cloakrooms and the entrance/ reception area.
- 2.5.3 Tolerances and Accuracy of Build
- 2.5.3.1 General tolerances shall comply with the requirements of BS 5606, tables 1 and 2
- 2.5.4 Entrances and Circulation
- 2.5.4.1 The layout of any Building shall be clearly organised and work efficiently to enable ease of Circulation for Students, visitors and staff, and to aid orientation and ease of movement to external areas, particularly in the event of emergency. This shall be achieved through the design of the Building and not just rely on signage.
- 2.5.4.2 Separate access shall be provided for deliveries, maintenance vehicles and waste removal.
- 2.5.4.3 In designing any Facilities, Project Co shall meet the following requirements:
- a. the main entrance is clearly defined, accessible and secure;
 - b. as public buildings, new Facilities should emphasise their main entrance to provide legibility and facilitate their recognition as buildings of civic status;
 - c. the Building provides shelter at principle entrances in line with AD M;
 - d. unauthorised access to the main Facility Buildings is not possible beyond the main entrance lobby, with visitors being subject to access control operated from the general office;
 - e. the main entrance, any main Student entrance, any community entrance is through a draft lobby to avoid draughts and heat loss from the Building;
 - f. all Buildings are fully accessible to all people including those with impaired movement or other disabilities, in line with AD M;
 - g. people with disabilities are able to use the same entrances and Circulation routes as able-bodied users and sufficient space is provided on either side of doors to allow for operation by Mobility Equipment users;

- h. all Circulation routes (including corridors) are of a suitable width as defined in these ACRs;
 - i. stairways meet the requirements of these ACRs and Law;
 - j. all relevant Law relating to fire safety is adhered to, to allow safe egress from the Building in the event of a fire, taking account of any bags and coat storage pegs located off Circulation areas (where this is agreed by the Authority); and
 - k. in a multi-storey Building, Project Co shall ensure that every space in the Building is accessible to all. In a multi-storey refurbished Building, the Project Co shall ensure that all the Students can access every type of space in the Building, to ensure that all the Students have full access to the Curriculum.
- 2.5.4.4 Project Co shall also ensure that Circulation and linking areas work efficiently and that suitable access control mechanisms are provided externally to the main reception area.
- 2.5.4.5 Project Co shall ensure that the clear width of any main Circulation routes, including corridors, shall:
- a. be at least 1.9m in any Facility;
 - b. in Secondary Schools and Colleges, allow for the increased traffic flow where Basic Teaching spaces are opposite each other;
 - c. be measured between walls, any permanent projections (such as a radiator) or the balustrade to voids, excluding skirting and small electrical fittings;
 - d. be unobstructed by opening doors e.g. from an accessible toilet;
 - e. excludes a minimum width of 0.75m for the Net Area required for any lockers, coat hooks or wheelchair storage, adjacent to the Circulation route; and
 - f. excludes any other Net Area immediately adjacent to the Circulation route, to a sufficient width. This will include open-plan areas and space in front of reception desks;
- 2.5.4.6 The Circulation shall also:
- a. allow for Circulation space at the entrances to halls and dining areas such that congestion is avoided at peak times; and
 - b. allow for corridor doors to be held open to provide the required opening width.
- 2.5.4.7 Secondary Circulation routes leading from a main Circulation route to habitable spaces shall have a clear width of:
- a. at least 1.2m where there is an access route through a space to another room and a 'strip' of Circulation is discounted from the usable Net Area of the space;
 - b. at least 1.2m if leading to one or two spaces of 25m² or less;
 - c. at least 1.5m if leading to three or more spaces of 25m² or less; and
 - d. at least 1.8m if leading to any teaching spaces.
- 2.5.4.8 Where lifts are provided, the clear lobby dimensions required by AD M at each level shall not reduce the minimum width requirements for Circulation within the lift's vicinity, and internal finishes shall be suitable for Facility use.
- 2.5.4.9 Project Co shall ensure that:
- a. sufficient space is provided either side of doors to allow for operation by users with reduced mobility;
 - b. all Facility Users are able to find their way safely and easily around the Facility Buildings. There is clarity in the arrangement and location of entrances, main Circulation routes and key spaces; and

- c. Frequently used external doors have draught lobbies configured to avoid draughts and heat loss from the Building.

2.5.5 Passive Supervision

- 2.5.5.1 Project Co shall ensure that the design allows for passive supervision, and the design ensures that:
 - a. internal glazed screens are provided in staff work rooms and offices and are located to allow passive supervision of corridors and staircases;
 - b. internal glazed screens are provided in Staff Areas, teaching or learning spaces, where passive supervision of any parts of corridors or Circulation cannot be achieved through staff work rooms or offices, except where it is recognised in these ACRs that internal glazed screens are not required;
 - c. unsupervised areas are immediately adjacent to (and visible from) main Circulation routes, and close to Staff Areas where possible, including open washing areas in toilets, wheelchair/ appliances bay, open lobby areas into the sides of halls, waiting areas in front of lifts and secondary corridors to smaller rooms;
 - d. vision panels in the door leaf are provided as identified in these ACRs;
 - e. for schools, toilets suites are planned so that the hand-washing areas can be seen from the Circulation space without jeopardising privacy; and
 - f. for Facilities with Nursery and Primary Reception Classrooms the toilet areas are visible from the relevant teaching areas.

2.5.6 Suites of Spaces

- 2.5.6.1 Project Co shall design each Facility to a standardised approach involving a number of Suites of Spaces, each of which will contain different types of space.
- 2.5.6.2 Primary Schools shall be provided with the following Suites of Spaces:
 - a. Classrooms (including specialist spaces);
 - b. Hall, performance and Dining and Social, including the Kitchen Suite; and
 - c. Administration.
- 2.5.6.3 Secondary Schools shall be provided with the following Suites of Spaces:
 - a. General Teaching;
 - b. Practical Teaching (art, science, D&T);
 - c. Music;
 - d. Hall and performance;
 - e. Dining and Social areas;
 - f. Kitchen;
 - g. Indoor PE (usually including a sports hall); and
 - h. Administration.
- 2.5.6.4 Colleges shall be provided with the following Suites of Spaces defined in the SSB which may include, but not limited to:
 - a. General Teaching;
 - b. Practical Teaching (art, science, D&T);

- c. Vocational Teaching (e.g. health and beauty, construction, hospitality and catering, mechanics);
 - d. Music (audio-visual / media);
 - e. Hall and performance;
 - f. Dining and Social, café;
 - g. Kitchen;
 - h. Indoor PE (usually including a sports hall); and
 - i. Administration.
- 2.5.6.5 There are also a number of Balance Areas not included in the Suites, including library, SEN (D) resource areas, medical spaces, therapy spaces and toilets. Where a Designated Unit or Specially Resourced Provision is described in the SSB as part of a Facility, there will be a further Suite of Spaces for additionally resourced SEN (D) Students listed on the SoA.
- 2.5.6.6 There are common issues that shall be addressed within each Suite of Spaces. Project Co shall take into account the following points in conjunction with the more detailed requirements set out in the ADS and the relevant Site Specific Briefs.
- 2.5.6.7 Classrooms, General Teaching and Practical Teaching Suites of Spaces, together with differing levels of support spaces, need to be accommodated within adaptable zones. These shall have a suitable consistent depth (from external wall with windows to internal wall) and an uninterrupted length sufficient to allow a number of rooms of differing sizes and types (see 'Dimensions and Proportions' above).
- 2.5.6.8 Classrooms, General Teaching and Practical Teaching spaces should be standardised sufficiently so that the function of these spaces can be altered to suit changes in Student numbers or Curriculum need, without structural change.
- 2.5.6.9 In Secondary Schools and Colleges, staff accommodation within teaching Suites of Spaces, such as work-rooms and pastoral offices, should be located so that it facilitates passive (informal) supervision of the suite and preferably any space outside toilets.
- 2.5.6.10 Teaching storage in any Suite of Spaces (in addition to local storage in furniture) should be designed to be in secure, enclosed and separate store rooms of the area required in the SoA.
- 2.5.6.11 Storage space should be provided for personal items, such as coats and bags, Mobility Equipment and other appliances. These spaces are identified in the SoA and must be additional to, and not impede, Circulation space, although they will often be directly 'off' the Circulation route.
- 2.5.7 Classroom Suites
- 2.5.7.1 Each School will have Suites of Spaces, typically comprising Classrooms, and Practical Teaching spaces. These may include the option of shared teaching areas, able to accommodate a broad range of teaching activities and subjects as well as providing a registration base for a class group. They should be designed to suit the age range of the Students using them and to allow staff to arrange furniture and equipment to meet the varying needs of Students.
- 2.5.7.2 The requirements for Building Services are specified in the ADS, and will include power, ICT Infrastructure and water unless specified otherwise in the ADS.
- 2.5.8 Classroom Suites (Primary Schools)

- 2.5.8.1 Any Classroom suites for a Primary School shall comprise Classrooms and Practical Teaching spaces as listed in the SoA. Where these include the option of shared teaching areas, they shall be able to accommodate a broad range of teaching activities. Classroom suites shall be designed to suit the age range of the Students using them.
- 2.5.8.2 The requirements for services are specified in the ADS, but will typically include power, ICT Infrastructure and water.
- 2.5.8.3 Classroom Suites of Spaces shall have the following support spaces (unless specified otherwise in the SoA):
- a. storage space for coats and bags and, where required, Mobility Equipment or other specific aids required by Students with disabilities;
 - b. a store for Teaching Resources, directly off the Classroom;
 - c. toilets (and where required changing facilities), with appropriate access from Classrooms;
 - d. in suites for Nursery and Reception Classrooms, toilets (and where included in the SoA, Hygiene Rooms), immediately adjacent to Classrooms;
 - e. Small Group Rooms - discrete, quiet places for learning support, behaviour management or private counselling - within easy reach of Classrooms; and
 - f. direct access to the outdoors where possible, particularly for Nursery and Reception Students.
- 2.5.9 General Teaching Suites (Secondary Schools)
- 2.5.9.1 Project Co shall design each Secondary School with Suites of Spaces able to accommodate a range of General Teaching activities and subjects as well as providing a registration, and perhaps social, base for a year or mixed-age group. While they are not usually expected to be serviced with more than power and ICT Infrastructure, the option to easily add water and drainage services in some General Teaching spaces at a later date, to enable some light practical activities, would be an advantage.
- 2.5.9.2 Any General Teaching spaces shall have the following support spaces (unless specified otherwise in the SoA):
- a. a store for Learning Resources, close to the General Teaching spaces;
 - b. toilet facilities easily accessible from the Suite of Spaces; and
 - c. Small Group Rooms.
- 2.5.9.3 Some Schools with a sixth form (usually those with a large post-16 cohort) will have a distinct General Teaching suite accommodating General Teaching spaces for teaching and study activities as well as providing a registration, and perhaps, social base for sixth form Students. This will be supported by storage and toilet facilities. Alternatively, sixth-form seminar rooms will be distributed around the General Teaching suites with study areas attached to the library. Project Co shall ensure that the provision meets the requirements described in the relevant Site Specific Brief and as shown in the SoA.
- 2.5.9.4 In a Designated Unit or Specially Resourced Provision with secondary age Students, there should be practical spaces designed to suit the range of SEN (D) at the School.
- 2.5.9.5 Practical Teaching spaces in Schools with Designated Units or Specially Resourced Provision should have the flexibility to accommodate an individual's specialist equipment where necessary; and the adaptability to be used in other ways in the future. A room used for teaching food technology may also be used for some aspects of life skills training.

2.5.10 General Teaching Suites (Colleges)

- 2.5.10.1 Any Suites of Spaces provided for a College shall accommodate the range of General Teaching activities and subjects identified in the College-specific SoA.
- 2.5.10.2 Any General Teaching suite provided shall include the following support spaces, unless specified otherwise in the SoA:
 - a. A store for Teaching Resources, close to the General Teaching spaces; and
 - b. A staff work area, typically department-based.

2.5.11 Practical Teaching Suites (Secondary Schools and Colleges)

- 2.5.11.1 Any Practical Teaching suites for a Secondary School or College shall comprise Practical Teaching spaces listed in the SoA which shall be serviced, at least with power and water, as identified in the ADS.
- 2.5.11.2 Project Co shall ensure that Practical Teaching suites will include light and (for Design and Technology) heavy Practical Teaching spaces that provide a larger area for each workplace and are serviced, at least with power and water, as identified in the ADS.
- 2.5.11.3 Project Co shall ensure that the shape and proportions of these spaces are designed to allow flexibility in the range of possible Loaded Room Layout Drawings and enough space should be provided around Equipment for Students to work safely.
- 2.5.11.4 Project Co shall ensure that all Practical Teaching spaces are designed to meet the requirements of the ADS and to support safe practices.
- 2.5.11.5 Some Practical Teaching spaces have specific ventilation and extraction requirements, and Project Co shall ensure that these are provided in accordance with the requirements of these ACRs, the latest version of BB101, and the ADS. Project Co shall ensure that any services in Practical Teaching spaces are fitted with sufficient local master controls, as specified in the ADS, to control services in lessons and for cutting off supplies in an emergency. Such master controls should not isolate fridges, freezers, ICT equipment and 13A sockets provided for cleaners.
- 2.5.11.6 Light Practical Teaching spaces should be usable for non-practical activities, such as registration. Heavy Practical Teaching spaces that are fitted with fixed, serviced equipment such as lathes or cookers are unlikely to be usable as registration bases and may provide less flexibility than other teaching areas.
- 2.5.11.7 Any Practical Teaching spaces should have the following support spaces (unless specified otherwise in the SoA):
 - a. teaching stores (additional to storage in furniture in the room itself) adjacent to the Practical Teaching space, for resources and (where specified in the ADS) for work in progress;
 - b. Preparation areas/storage rooms to service science, resistant material and food spaces;
 - c. Learning Resource Areas such as kiln rooms (kilns shall not be in the teaching space itself) and Small Group Rooms; and
 - d. toilet facilities easily accessible from the Practical Teaching spaces.
- 2.5.11.8 In addition to the requirements for Practical Teaching spaces above any rooms used predominantly for Art should have:
 - a. good daylight (ideally from the North) and views out (for instance from upper floors); and

- b. space for both horizontal and vertical display of two- and three-dimensional work.
- 2.5.11.9 Any Suite of Spaces used for Science should have appropriately positioned central Preparation areas, with an easy route for the delivery of hazardous materials and to Practical Teaching spaces, but not limiting adaptability between laboratories. Separate, secure storage should be provided (as specified in the ADS) for:
 - a. hazardous chemicals and other dangerous material, in a dedicated chemical store, ideally within the Preparation area;
 - b. gas cylinders; and
 - c. radioactive sources.
- 2.5.11.10 Any Practical Teaching spaces used for working with wood, metals and plastics should have suitable Local Exhaust Ventilation, in accordance with the requirements of these ACRs on LEV systems, the latest version of BB101, and the ADS.
- 2.5.11.11 Fume cupboards should be of the ducted type and should be fixed in position in the preparation rooms and able to be pulled out from the wall on flexible connections in the teaching spaces for demonstration purposes. Any fume cupboards provided in teaching spaces shall be ducted but able to be pulled out from the wall on flexible connections for demonstration purposes. Fume cupboards shall be provided in the ratio 1 per 3 science teaching spaces or as otherwise referenced in these ACRs, rounded up, and meet the ventilation requirements in these ACRs and the latest version of BB101.
- 2.5.11.12 Storage for D&T or engineering should be provided in a preparation room designed with appropriate proportions, accessibility and safety, such that materials can be delivered, stored and cut to size. This room should be located to allow easy and level access to the Practical Teaching spaces it serves.
- 2.5.11.13 Practical Teaching suites shall be designed to suit the range of SEN (D) at the School.
- 2.5.11.14 Any Practical Teaching spaces provided in Designated Units or Specially Resourced Provision shall have the flexibility to accommodate an individual's specialist equipment where necessary; and the adaptability to be used in other ways in the future. These spaces shall meet the requirements of these ACRs.
- 2.5.12 Vocational Teaching Suites (Colleges)
 - 2.5.12.1 Any Vocational Teaching suites for a College shall comprise Vocational Teaching spaces listed in the SoA which shall be serviced, at least with power and water, as identified in these ACRs.
 - 2.5.12.2 Project Co shall ensure that Vocational Teaching spaces have the shape and proportions to allow flexibility in the range of possible Loaded Room Layout Drawings and that all Vocational Teaching spaces provided have enough space around Equipment for Students to work safely, according to the requirements of these ACRs.
 - 2.5.12.3 Project Co shall ensure that all Vocational Teaching spaces are designed to meet any requirements in the ADS and to support safe practices.
 - 2.5.12.4 Any Vocational Teaching suite shall include the following support spaces, unless specified otherwise in the SoA:
 - a. stores (additional to storage in furniture in the room itself) adjacent to the Vocational Teaching space, for resources and (where specified in the ADS) for work in progress;
 - b. Preparation areas/storage rooms to service health and beauty, engineering, catering rooms or otherwise specified in the SoA; and

- c. Learning Resource Areas and Small Group Rooms as specified in the SoA.

2.5.12.5 Suites for the following subjects will have some or all of the following spaces;

- a. hair and beauty – hair salon, reception to salon, beauty therapy rooms and dispensary;
- b. media – recording suite, live studio, pre-production, control rooms, live room, vocational booths, tv studio, control room for tv studio, radio pre-production rooms and radio station live;
- c. catering and hospitality – specialist catering Kitchen and training restaurant;
- d. engineering and construction – fabrication, welding, plumbing, brickwork and carpentry;
- e. automotive – body shop, prep room, spray booth, engineering workshop and test track; and
- f. please note: Other specialist suites may be required and will be described within these ACRs.

2.5.13 Music Suites

2.5.13.1 Project Co shall ensure that any rooms used for music are designed to avoid sound disturbance to and from neighbouring spaces (including the outside), taking particular account of other spaces used for examinations. Rooms used for music should have acoustic properties that satisfy the requirements of the ADS and of Building Bulletin 93: 'Acoustic design of schools – performance standards' (BB93), including the reduction of standing waves from parallel walls.

2.5.13.2 The following support spaces should be provided for music suites in Secondary Schools and Colleges (unless specified otherwise in the SoA):

- a. secure instrument storage, positioned to allow access from a Circulation area;
- b. Small Group Rooms/practice rooms, easily accessed and supervised from the main music rooms while being acoustically discrete and meeting the performance standards of BB93; and
- c. one large group/practice room, designed to accommodate a drum kit, located to minimise disturbance and directly accessible from a Circulation area;

2.5.14 Hall, Performance and Dining and Social Suites

2.5.14.1 Project Co shall provide each Facility with a hall and performance suite and Dining and Social and Kitchen Suite, easily reached from the main entrance and reception, and other support spaces.

2.5.14.2 Each Facility should have a main hall and, where specified in the SoA, there should be a second space that may be predominantly for dining or indoor PE. These spaces may also be used outside the Core Sessions, for events such as performances and parent evenings. Smaller teaching spaces for music and drama, and associated support spaces such as for storage, may also be required for performances to act as green room and dressing room facilities which should form part of the zoning arrangements.

2.5.14.3 The main hall should be designed to accommodate the activities specified in the Site Specific Brief, which may include assemblies, religious worship and Secondary School examinations, as well as presentations and activities for large groups, such as projects for a year group. In Primary Schools the main hall should be designed to also accommodate dining and the requirements relating to dining in these ACRs shall also apply.

- 2.5.14.4 Any main hall suite for secondary Students shall include the following spaces, unless specified otherwise in the SoA:
- a. a main hall with retractable bleacher seating and a floor-level performance area;
 - b. an adjacent smaller teaching space for drama which can be used as a 'green room' for the hall;
 - c. storage spaces for equipment, furniture and costumes, which may be positioned to act as an acoustic buffer and lobby between the main hall and drama spaces; and
 - d. a control room which is located centrally at the back of the Performance Space, is capable of being open to the main hall (e.g. with opening glazed screen) and provides a view over the performance area. If accessed from within the main hall, is accessible when the bleacher seating is retracted.
- 2.5.14.5 Halls, Performance Spaces and any other spaces identified as being used for performance in the Site Specific Brief shall have the specific attributes of volume and/or acoustics identified in BB93 in the ADS. Where a Hall is used for a wide range of activities such as performance, PE and dining (most often in a Primary School) Project Co shall ensure that it is designed so that these functions are not unduly compromised by the different uses.
- 2.5.14.6 The entrance doors from adjacent corridors shall be central to the side walls of the Hall, between the audience and performance area (within a Performance Space), while doors to stores will typically provide access from the rear corners of the Performance area (within the Performance Space) to the adjacent drama space.
- 2.5.14.7 Project Co shall ensure that any rooflights provided are coordinated with the layout of the Hall, so they are not over the performance area (within the Performance Space).
- 2.5.14.8 Blackout blinds should be provided to all glazing, including rooflights, doors and windows. Blackout blinds should not impinge on any natural ventilation provision.
- 2.5.14.9 The main hall shall accommodate the maximum occupancy given in the SoA and the Site Specific Brief and the range of activities listed in the ADS and the Site Specific Brief, including performance, assembly and exams. Project Co shall ensure that the proposed furniture can be manoeuvred into a store adjacent to the main hall without difficulty.
- 2.5.14.10 Halls should have the following support spaces (unless specified otherwise in the SoA):
- a. storage spaces for equipment, furniture and costumes;
 - b. an adjacent control room (in Secondary Schools) which provides a view over the performance area; and
 - c. easy access to toilet facilities, including an accessible toilet.
- 2.5.15 Dining (Schools), Canteens/ Cafés (Colleges) and Social Areas
- 2.5.15.1 Project Co shall ensure that the areas of the main dining space, or spaces are as identified in the SoA and are sufficient to meet the catering arrangements of the Facility as set out in the relevant Site Specific Brief. Specific requirements, including whether dining will be in a single location or dispersed around the Facility, are given in these ACRs. Where a specific Dining and Social area is required in the SoA, Project Co shall design it to suit appropriate alternative uses during the Core Sessions where specified in these ACRs. Where dining takes place in a Hall or other designated area, such spaces should be able to accommodate all activities specified such as performance and PE (most often in a Primary School). As well as responding to the specific requirements in these ACRs, Project Co shall ensure that any area used as a dining space will:

- a. be easily accessible from all areas, conveniently positioned in relation to the Kitchen and serving areas and be designed so that the space can be used during timetabled lessons without disturbing Students who are working nearby;
 - b. accord with other general requirements in these ACRs;
 - c. have sufficient Circulation or other space next to the dining area for queuing and Circulation at meal times, including for those using Mobility Equipment, without impinging on the dining tables;
 - d. have an efficient layout with adequate seating capacity;
 - e. provide enough space to allow people (including those using Mobility Equipment) to move between tables freely without disturbing those eating;
 - f. have an efficient serving area layout, whether permanent or moveable;
 - g. for Schools, provides sufficient seating for Students based on two sittings during the lunch period;
 - h. servery design should identify menus and products for sale, whilst minimising the potential for theft;
 - i. have an efficient layout with adequate seating capacity based on uptake, length of lunch period and acceptable eating times for diners are achieved as detailed in these ACRs;
 - j. For Schools, provides seating capacity for Students who bring their own lunch to eat in the Dining and Social room; and
 - k. be located close to external hard informal and social areas.
- 2.5.15.2 Project Co shall provide a flow diagram to demonstrate that the logical flow of movement around the Dining and Social space meets the specified requirements in the the relevant Site Specific Brief for each Facility.
- 2.5.15.3 Where a specific Dining and Social area is required in the SoA, Project Co shall ensure that it is designed so that there is adequate space for till points and serving areas to service the number of diners in any sitting, as given in these ACRs and in accordance with best practice to maximise throughput and minimise queuing times. Efficient design may include separating hot and cold service. Where required in these ACRs, Project Co shall also design the space to facilitate the requirements for distribution of food to Dining and Social areas in other areas of the Facility.
- 2.5.15.4 Where a separate Dining and Social area is identified within the SoA, it shall be provided as a discrete space to the main hall to enable the two areas to be used separately, for different functions, where the activities in one will not impinge on the requirements of the other space.
- 2.5.15.5 Any primary Circulation within or across the Dining and Social area (for instance from a corridor area to the main hall) shall not be part of the Dining and Social area provided, in accordance with the area required in the SoA.
- 2.5.15.6 Where re-locatable furniture is used in Dining and Social spaces, Project Co shall provide storage for it when not in use.
- 2.5.15.7 Dining and Social spaces should provide privacy for those that need it.
- 2.5.15.8 Project Co shall involve a specialist consultant in the design and location of the main Kitchen/catering area and associated areas, including a servery, offices, toilets, changing and Staff Areas. A specialist consultant shall liaise with the Authority (and its catering provider) to determine the requirements. The Kitchen Suite shall have:

- a. all catering equipment in the Kitchen area, classed as Group 1 Equipment, necessary for the preparation of hot and cold meals in a cost effective and efficient manner both in terms of staffing and energy use to allow the Authority to deliver the number of meals in accordance with the preparation model, at the frequencies required as specified in these ACRs;
- b. a functional layout that allows for efficient operations and any special dietary requirements, by arranging the main activity areas of delivery, storage, preparation, cooking and wash-up in a logical sequence to ease work flows;
- c. all electric cooking appliances and induction hobs as standard, unless School-specific electrical infrastructure limitations dictate that alternative gas fuelled cooking is required;
- d. free-standing self-contained fridges and freezers, in multiple units to meet the required food storage capacity. Walk in type fridges/freezers with remote refrigeration plant would only be acceptable where there is a project specific requirement;
- e. a sensible 'flow' from the self-clearing facility linking to kitchen pre-clean area and dish wash, and from dishwasher to crockery/cutlery/tray storage;
- f. adequate but secure servicing access for deliveries of ingredients and equipment, unpacking, storage of ingredients and equipment and disposal, recycling and collection of waste;
- g. the capability to prevent unauthorised access;
- h. minimal impact on the Facility's educational functions, including avoiding noises and smells in adjacent areas;
- i. durable, hygienic, easily cleanable materials;
- j. adequate ventilation;
- k. design in accordance with best practice as described in CIBSE TM50 Energy Efficiency in Commercial Kitchens, and DW/172 'Specification for Kitchen ventilation systems';
- l. best practice design as described in these ACRs; and
- m. the provision of adequate staff accommodation including a toilet for catering, with a lobby between the toilet and main Kitchen area providing a changing area and a room or bay for catering staff to do admin work.

2.5.15.9 The Authority may agree with Project Co to re-use items of Legacy Equipment where they are in good condition, within warranty, fit in with the kitchen design solution and do not compromise the energy performance or functionality of the Kitchen design. If Legacy Equipment is to be re-used Project Co shall arrange for the Legacy Equipment to be fully serviced prior to re-installation.

2.5.16 Sports Hall Suite (Secondary Schools and Colleges)

- 2.5.16.1 Project Co shall provide each Secondary School with a sports hall with changing areas and showers (located for easy access to internal and external sports spaces) as well as associated support spaces including storage. Where additional indoor PE and sports spaces are required, such as an activity studio, these are included in the SoA.
- 2.5.16.2 The Project Co shall provide for Colleges sports Halls and other indoor PE spaces, such as an activity studio, as required in the SoA.
- 2.5.16.3 Any Secondary School sports hall suite shall include changing facilities with showers for half a year group with equal and separate facilities for boys and girls in co-educational

schools, located for easy access to internal and external sports spaces. There shall also be accessible/staff changing rooms, storage and toilets.

- 2.5.16.4 Any College sports hall suite shall include changing facilities with showers for the capacity of Students identified in the SoA with equal and separate facilities for male and female Students, located for easy access to internal and external sports spaces. There shall also be accessible/staff changing rooms, storage and toilets.
- 2.5.16.5 Any sports hall shall be designed to allow examinations as well as sporting activities to take place, with the internal environment designed to cater for these different activities.
- 2.5.16.6 Project Co should assume that all sports facilities are available to the local community outside the Core Sessions, so they should be designed to be accessed and used safely and easily by members of the community.
- 2.5.16.7 Project Co shall design storage in PE and sports areas to ensure that:
 - a. storage adjacent to the sports hall, if specified, is easily accessible for storage of large items of equipment; and
 - b. in Facilities with a Designated Unit or Specially Resourced Provision, if sports are to be played, a convenient and secure store shall be provided for sports Mobility Equipment.

2.5.17 Administration Suite

- 2.5.17.1 Project Co shall design the Facility so that accommodation for administration staff and some Administration offices, such as a general office and principal/ head teacher's office, and other identified senior management offices are centrally located yet close to the front of the Building and the reception area. There are usually other staff offices located locally in teaching suites, as specified in these ACRs. The staff room does not need to be within the administration suite.
- 2.5.17.2 Project Co shall design the School/ College so that:
 - a. the general office is next to the main entrance/reception area via a reception desk, as well as being close to other administrative staff offices or work areas;
 - b. the main entrance is clearly defined, accessible and secure;
 - c. the external doors lead into the entrance/reception area which accommodates a waiting area and space to access the reception desk, as well as the Circulation route from the external doors to the internal doors leading into the Facility;
 - d. unauthorised access to the School Buildings should not be possible beyond the main entrance lobby, with visitors being subject to some form of access control operated by reception staff before they reach the entrance/reception area;
 - e. for Colleges, for Student entrances whether or not shared with visitors, an access control gate or turnstile system that is overseen by a reception and linked otherwise to access control systems in the Building and wider Facility, details of which are included in these ACRs;
 - f. an interview room is directly accessible from the entrance/reception area;
 - g. the Net Area identified for reception in the SoA and/or these ACRs shall used as the waiting and sitting area exclusive of other Circulation areas within the reception area;
 - h. the main entrance suits visitors as well as the Facility, taking account of disabled users, including those requiring Mobility Equipment;

- i. the entrance/reception area is adjacent to the general office and linked by a reception desk staffed from within the office area but accessible to visitors to sign in, via a secure hatch;
- j. the entrance/reception area is designed to ensure comfortable draught-free conditions and is separated from the rest of the Facility by doors which are remotely operated from the reception desk;
- k. an accessible toilet for use by visitors is easily accessible from the entrance/reception area, either directly or (in smaller Primary Schools) close by, such that visitors can be easily escorted; and
- l. is designed to accommodate displays and signage and generally create a welcoming and attractive appearance.

2.5.17.3 Project Co shall ensure that any general office provided is designed such that:

- a. there is a secure means of viewing the entrance from the general office;
- b. there is a sick bay or sick room, for the short-term care of sick and injured Students, adjacent to the general office for supervision, and with easy access to a toilet;
- c. the reception desk meets the recommendations set out in BS 8300;
- d. there is an openable and lockable glazed screen into the reception area; and
- e. where the general office is designed for more than four staff, the reception desk provides one workstation and is acoustically and visually screened from the rest of the general office, to ensure privacy for confidential communication; the balance of space shall accommodate the number of staff specified in the SoA.
- f. Access to service risers within staff rooms, offices and other administration spaces shall not limit the required occupancy or furniture layout.

2.5.18 Balance Areas

2.5.18.1 Project Co shall ensure that all Facilities have Balance Areas and shall ensure that these are set out in the SoA.

2.5.19 Studios and Small Halls (Primary)

2.5.19.1 Any studio provided in a Primary School shall be designed as a flexible space that can accommodate music and drama. Where a 'small hall' is listed in the SoA, it shall be able to accommodate PE without apparatus and any other activities required by these ACRs.

2.5.20 Library and Learning Resource Areas

2.5.20.1 Unless specified otherwise in the relevant Site Specific Brief, each Facility shall have at least one library, positioned for easy access by all Students. This will be additional to other Learning Resource Areas such as Small Group Rooms, located locally in other Suites of Spaces. The requirement for a library, LRC or resource area in a College will be identified in the SoA.

2.5.20.2 Project Co shall ensure that the in each Facility the Library or main LRC is designed:

- a. to accommodate formal and informal learning including individual study (using ICT and printed material) and reading;
- b. to be accessible to all including those using Mobility Equipment;
- c. with good sight lines for easy supervision;
- d. to have an adjacent secure store room;

- e. so that mezzanine areas are avoided, unless there is a specific purpose for them that can be utilised without needing supervision from the main area;
- f. so that lighting illuminates both vertical and horizontal surfaces, with a means to control sunlight in order to avoid solar gain and damage to books; and
- g. to have one entrance and exit via a book security system unless otherwise specified in the ADS.

2.5.20.3 And in Secondary Schools only, be designed:

- a. to accommodate a whole class within a Secondary School whilst part of the library should be capable of remaining a quiet space; and
- b. to be close to any central ICT resource and may be adjacent to sixth form and other study areas within a Secondary School if required by these ACRs.

2.5.20.4 And in Primary Schools only, be designed:

to accommodate half a class within a Primary School;

2.5.21 SEN (D), Medical and Therapy Spaces

2.5.21.1 Project Co shall provide medical and therapy facilities and support spaces for SEN (D) to include a room(s) that can be used for SEN (D) therapy and general medical inspection (MI) and a SEN (D) resource base and/or other Small Group Rooms as required in the SoA for small group and individual support work with Students with SEN (D). In a College project these facilities and support spaces will be identified in the SoA.

2.5.21.2 These should be located for easy access whilst maintaining privacy for Students.

2.5.21.3 Any SEN (D)/ therapy/ MI room provided shall be designed for the primary function of medical examination and treatment of Students and shall include a sink. This space shall also be designed to enable therapy activities for Students requiring this, when not required for its primary function;

2.5.21.4 Project Co shall design each Facility with:

- a. a medical/therapy room for the medical examination, therapy and treatment of Students, which includes a washing facility; and
- b. a sick-bay or sick-room a space for the short-term care of sick and injured Students, which should be near to a toilet.

2.5.21.5 In a Designated Unit or Specially Resourced Provision the Project Co shall provide one or more of the following specialist facilities, as contained in the SoA and relevant Site Specific Brief:

- a. a physiotherapy room, which will be a functional space designed to accommodate a range of physiotherapeutic activities, including lifting of children by the use of ceiling-mounted equipment. There should be space for the use and storage of Mobility Equipment, while direct access to a secure and sheltered outdoor space is an advantage. There should be an accessible toilet/changing room nearby;
- b. a soft-play room, which allows children to move without inhibition and fear of injury. It should be naturally lit and ventilated, wherever possible, and internal spaces should be avoided. There should be clear circulation space for Mobility Equipment and the ceiling height should allow for a ceiling-mounted hoist. The room should be fitted out by a specialist;
- c. a multi-purpose therapy room, which is designed to provide a quiet private place for a range of therapies including speech and language and occupational therapy. There should be an equipment store and an accessible toilet/changing room nearby;

- d. a Calming Room, which will provide a quiet place with good sight lines. Materials, fittings and finishes should be chosen to safeguard against self-harm;
- e. a sensory room, which will be an internal room equipped for a variety of multi-sensory experiences, there should be sufficient space within the sensory room to allow a choice of equipment to be used; and
- g. a medical/nurse's office, which should provide a hygienic environment and include secure and appropriate storage for medicines.

2.5.21.6 Where a store for medical gases is specified, it should be:

- a. close to its point of use with clear access for delivery;
- b. clearly marked, well ventilated, lockable and not vulnerable to Malicious Damage;
- c. ideally located at ground level, not underground (for example in a basement); and
- d. fitted with outward opening doors.

2.5.21.7 Project Co shall obtain specialist advice on the use and storage of medical gas cylinders.

2.5.22 Storage

2.5.22.1 Project Co shall provide central and secure stores, for instance for Students' records, which are lockable.

2.5.22.2 Where there is storage for examination papers, it shall be secure, shall be accessed from a lockable office and meet relevant exam board criteria (Joint Council for Qualifications or equivalent), or as listed in these ACRs including compliance with the required wall structure.

2.5.22.3 In addition to this, and the storage included on the ADS, storage should be provided for the following:

- a. waste materials, including facilities for separation and recycling;
- b. external equipment, e.g. for maintenance; and
- c. combustible waste materials, securely located in accordance with relevant Law.

2.5.22.4 Project Co shall identify the size and location of the above provision, to demonstrate that it will provide easy access and be efficient to use.

2.5.23 Toilets

2.5.23.1 Project Co shall ensure that the following requirements, which apply to toilets in all Schools⁴, are met:

- a. the number of toilets and Hygiene Rooms for Primary and Secondary Schools shall be as Building Bulletin 98 and 99, the Schools Premises Regulations 1999 and the Workplace Health, Safety and Welfare Regulations, Approved Code of Practice and Guidance, L24; The number required for Colleges shall also be calculated based on this guidance. The number of toilets and Hygiene Rooms for SRP and Designated Units shall be as required by Building Bulletin 104: 'Area Guidelines for SEN (D) and Alternative Provision' (BB104);
- b. the statutory requirements for toilets and washing facilities included in the School Premises Regulations 1999 ;

⁴ Statutory requirements for toilets and washing facilities are included in the school premises regulations and in *Standards for School Premises* – see Annex I

- c. the toilets are designed and fitted out to a standard that discourages anti-social behaviour and Malicious Damage;
 - d. toilets are located in areas around the Building that provide easy access by Students and allow for informal supervision by staff, without compromising Students' privacy;
 - e. staff toilets are provided separate from Students' toilets, according to the SoA. Some of these will be located near the Administration offices and staff room and they may be used by visitors. Any additional visitor toilets specified in the SoA should be close to the main entrance without breaching Facility security;
 - f. non-gender specific toilets shall be provided where requested by the Facility; and
 - g. where sports facilities are used by the community, sufficient toilets shall be accessible to community users without breaching Facility security.
- 2.5.23.2 Project Co shall provide that each Facility has sufficient toilets for disabled Students, as specified in the SoA and the relevant Site Specific Brief. Each toilet for disabled Students shall contain one toilet and one washbasin and, where specified in the relevant Site Specific Brief, a shower or other wash down facility, and have a door opening directly onto a Circulation space (other than a staircase) which can be secured from the inside. The Facility shall be designed such that any accessible toilet beyond the 'secure' line of the Facility will be for the use of Students and staff but not visitors (except after Facility hours). Accessible toilets shall be designed to meet AD M.
- 2.5.23.3 Project Co shall provide a Hygiene Room to suit a mix of Student disabilities, with a shower, toilet, wash hand basin, suitable handrails, a changing bed and space for assistants. The ceiling shall be designed to accommodate ceiling-hoist tracking which must take the weight of a Student (200kg) using the hoist.
- 2.5.23.4 Project Co shall provide for the following additional requirements in relation to toilet provision in Secondary Schools:
- a. except where individual toilets are specified, hand-washing facilities shall be made visible by being located as a direct extension to the Circulation space, separate from the cubicle area;
 - b. at least one set of toilets shall be positioned to allow easy access from outdoor spaces used during lunch and break times and for sports events, as well as from indoor sports facilities and spaces used for examinations or performances; and
 - c. each suite of teaching spaces should contain a suite of toilets.
- 2.5.23.5 Project Co shall provide for the following additional requirements in relation to toilet provision in Primary Schools:
- a. the toilets should be located for easy access from the Classrooms and from the playground;
 - b. toilets for Nursery and Reception Students should be located directly off the Classroom to allow staff supervision without leaving the Classroom as well as being easily accessible from the playground;
 - c. the design of the partitions in toilets for Foundation Phase Students should give children privacy whilst allowing teachers to supervise them. The SoA includes one wider cubicle in each group of Foundation toilets to allow staff to give assistance, if required; and
 - d. where there is a Nursery and Reception the Hygiene Room shall double as a 'wash-down' facility for Nursery and Reception Students which is directly accessible both from the Nursery and Reception Classrooms and the Circulation space.

- 2.5.23.6 Project Co shall provide for the following additional requirements in relation to toilet facilities in Specially Resourced Provision and Designated Units:
- 2.5.23.7 Provision should meet the particular needs of the children at the Facility and the Facility's specified approach to managing toileting arrangements, as outlined in the relevant Site Specific Brief:
- a. sufficient Hygiene Rooms shall be provided to suit the mix of Student disabilities, with a shower, sluice and / or wash down changing bed, toilet, a changing bed and space for assistants. Where ceiling hoists are specified, the ceiling will have to be designed to accommodate the tracking which must take the weight of a Student using the hoist;
 - b. there is a toilet facility immediately available to Students on arrival into the Building;
 - c. a unisex accessible toilet is provided close to the main entrance to allow a carer of either sex to provide assistance;
 - d. extract ventilation is in line with legislative and statutory guidance and the requirements of these ACRs, and the latest version of BB101;
 - e. in all-age Schools, separate facilities for younger and older children;
 - f. the provision of a self-contained laundry, where specified in the SoA;
 - g. accessible toilet and hygiene facilities should be conveniently dispersed around the Facility, with suitable way-finding and clear sightlines; and
 - h. the provision of somewhere to store waste (for soiled nappies/liners, sanitary products or soiled dressings) prior to collection, unless a macerator is specified.

2.5.24 FM Spaces

- 2.5.24.1 Project Co shall provide adequate FM space in the Facility to support the delivery of Services by to support the delivery of Services by Project Co and other FM services which the Authority provides or procures at the relevant Facility.

2.5.25 Server Room and Hub Rooms

- 2.5.25.1 When the size of a Building permits, Project Co may use a single space to house all server and infrastructure equipment without the need for separate hub rooms. This is subject to the maximum distance allowed by the performance specification of the cabling to be installed.
- 2.5.25.2 Project Co shall provide a secure hub room for any new external sports Building, together with wired and wireless infrastructure for the teaching spaces (including the sports hall) and administrative spaces included.
- 2.5.25.3 The dimensions of the spaces provided shall be sufficient to accommodate the equipment being installed and to allow adequate Circulation space for service and maintenance activities to be performed. Access for any envisaged maintenance purpose must be possible without moving the rack system.

2.5.26 Community Use

- 2.5.26.1 The Building shall be designed to facilitate community use of the facilities specified in these ACRs as being open for community use. This shall include:

- a. providing easy access to facilities identified in these ACRs as being open for community use, including the ability zone these parts of the Buildings in terms of Service Infrastructure;
- b. be able to secure the remaining parts of the Building and Grounds not being used at these times, no rooms should be located off corridors accessible to community users unless they are to be used by the community;
- c. ensure that the community have access to the appropriate toilets and changing facilities when using the community facilities;
- d. provide for passive supervision of community areas from a community reception area; and
- e. ensure facilities are easily accessible from the main site entrance and not provided deep into the site such that facilities and parts of the Building not open for community use become vulnerable to damage (including Malicious Damage).

2.6 External Space and Grounds - Overarching Requirement

- 2.6.1.1 Project Co shall ensure that the design of any external spaces for Schools meets the guidance in Building Bulletin 98 – ‘Building Framework for Secondary School projects’ (BB98), Building Bulletin 99 - Building Framework for Primary School projects (BB99) and Building Bulletin 104: ‘Area guidelines for SEN (D) and alternative provision’ (BB104). Project Co shall also ensure that the external spaces meet the requirements within this section [2.6] of the Generic Design Requirements.
- 2.6.1.2 Project Co shall ensure that the Grounds of each Facility:
- a. Provide a safe and attractive environment for children and young people, offering a variety of different settings for sports, outdoor teaching, social and recreational activities;
 - b. provides secure play areas for Schools relative to the needs of the different age ranges of Students and satisfying the School’s safeguarding policies;
 - c. provides facilities for physical and non-physical activities to meet Students’ needs;
 - d. maximises opportunities for passive supervision, making positive use of overlooking, interaction and encounters with staff and other Students;
 - e. ensures all sports facilities are to be designed to facilitate use by the local community to increase community integration; this includes access to changing and toilet facilities; and
 - f. take account of climate change adaptation measures in planning transitional and external spaces, to reduce internal temperatures and provide outdoor shelter. Transitional spaces range from unheated Atria and covered walkways to more minor spaces, such as covered verandas and porches. Shelter for outdoor space can be provided by planting as well as structures such as canopies; shelter for outdoor space can be provided by vegetation as well as by structures; reduce risk of surface water flooding; to reduce water consumption.
- 2.6.1.3 Project Co shall ensure that the external spaces provide facilities for physical and non-physical activities to meet Students’ needs. All areas accessible to Students must be capable of being easily supervised and/or overlooked from internal spaces, and links between indoor and outdoor spaces are optimised. Attention must be given to disabled access, including provision of level thresholds. In Schools where there are Students with complex health needs, there must be adequate shelter from the sun and from prevailing winds.

- 2.6.1.4 Project Co shall ensure that the design of external spaces supports and encourages community use of the Building through:
- a. easy entry to the site for community users for pedestrian and vehicular access and clear separation between pedestrian and vehicle users;
 - b. clear signposting following entry into the relevant Site to the main community access point to access facilities that will be open to community use;
 - c. provision of parking spaces adjacent to the main community access point to encourage ease of use facilities that will be open to community use including external pitches; and
 - d. developing a Secure Line which prevents unauthorised access to, external areas and elevations of the Buildings that are not open to for community use, when a Facility is being used for community use outwith the Core Sessions, thereby discouraging damage (including Malicious Damage) to these external spaces and the Buildings from such users and other third parties.

- 2.6.1.5 Project Co shall ensure that any materials or finishes used in external spaces:
- a. are selected with due regard to their suitability for purpose and performance, durability, ease of cleaning, maintenance and repair, resistance to accidental damage or Malicious Damage and to their environmental impact;
 - b. take account of any planning conditions; and
 - c. are sufficiently robust to stand up well to heavy use typical of a Facility and prevailing weather conditions

2.6.2 Typical Organisation

- 2.6.2.1 For Schools projects, Project Co shall contemplate the following types of outdoor space in the design, to accommodate the formal Curriculum and the informal and social activities of Students, as outlined in these ACRs:

- a. informal and social areas, including soft grassed/planted areas and hard-surfaced recreational space, areas for formal learning activities to meet the School's Curriculum needs and Nursery and Reception Outdoor Play;
- b. outdoor PE including hard-surfaced games area, marked out for games such as netball and tennis, in the form of a MUGA wherever possible;
- c. sports pitches to meet the School's Curriculum needs;
- d. habitat areas, including supervised spaces and resources for teaching and learning to meet the School's Curriculum needs; and
- e. Non-net Site Areas; such as access areas, paths, cycle routes, roads, delivery, emergency access and bin storage areas, drop-off and parking.

- 2.6.2.2 In any College Project, the Project Co shall include the following types of outdoor space, to accommodate the informal and social activities of Students, as outlined in these ACRs;

- a. informal and social areas, including soft grassed/ planted areas and hard-surfaced social space, areas for formal and informal learning and study activities;
- b. outdoor PE provision as identified in the relevant SoA and Site Specific Brief;
- c. sport pitches as identified in the relevant SoA and Site Specific Brief;
- d. habitat areas and external teaching facilities to meet the College's Curriculum needs; and
- e. Non-net Site Areas; such as access areas, cycle routes, roads, delivery, emergency access and bin storage areas, drop-off and parking.

- 2.6.2.3 The layout of the relevant Site should allow for some overlap in the use of these areas. For example, the spaces around hard surfaced games courts may be used for informal and social activities.
- 2.6.2.4 The design and layout of these areas should take account of the hierarchy of outdoor sports facilities identified by each Facility in the relevant Site Specific Brief.
- 2.6.2.5 The design and layout shall provide for any facilities identified in these ACRs for Students with SEN (D).
- 2.6.2.6 Any hard-surfacing materials used shall meet the standards relevant to the proposed use.
- 2.6.3 Hard and Soft Informal and Social Areas
 - 2.6.3.1 Any informal and social areas provided shall:
 - a. be at a safe distance from windows and avoid low level trip hazards and physical barriers such as external fire escapes in accordance with AD K;
 - b. drain well with no ponding or standing water and have an even surface, free of obstructions; and
 - c. be level, with the exception of any isolated play mounds which shall be at a height agreed with the Authority and smooth contoured with a maximum gradient of 1 in 3 and edges flush with surrounding surfaces.
 - 2.6.3.2 Any new or relocated play equipment shall be on surfacing which is suitable for the equipment being used and which provides a safe environment for Students which adheres to BS EN1176 'Playground equipment and surfacing General safety requirements and test methods' and 'BS EN1177 Impact attenuating playground surfacing. Determination of critical fall height'.
 - 2.6.3.3 Project Co shall ensure that informal and social areas cater for Students according to their age and needs. Project Co shall provide the following in relation to the Informal and social areas:
 - a. for Schools, hard surfaces are marked out for activities such as games courts, preferably within a single enclosed area to assist with supervision. A Specially Resourced Provision or Designated Unit may also have an area providing a sensory experience or be laid out for mobility training; this is covered in the Site Specific Briefs;
 - b. there must be areas of shade for summer months which can be achieved through several existing mature tree canopies or a permanent shade structure which covers a similar area to the tree canopy;
 - c. Nursery and Reception Outdoor Play space shall be provided for Nursery and Reception class Students, directly outside and with direct access from Classrooms at a minimum area of 1m² per FTE Nursery and Reception Student place. The space shall be provided with secure, tamperproof water outlets and adult height electrical outlets. One space each shall be provided per Classroom with even surfaces with no abrupt changes of level and fenced and gated to control access. Where a nursery is provided in these ACRs, the required area will be provided for both nursery and reception Classrooms; and
 - d. Nursery and Reception Outdoor Play areas provided shall have an external canopy to Nursery and Reception Classrooms which shall:
 - i. provide at least 0.5m² per FTE Nursery and Reception Student places and be at least 2.4m wide;

- ii. have a structure that is robust and corrosion resistant, and able to resist dead, live, wind and snow loads relevant to its location and be provided with appropriate footings;
 - iii. be adjacent to the Classroom and designed so as not to obstruct the Building's method of ventilation and daylight design;
 - iv. have a roof that is robust, transparent and resistant to UV degradation, thermal creep and sun bleaching as well as protecting Students from UV light;
 - v. collect rainwater and connect into a surface water drainage system (no surface discharge to gullies); and
 - vi. include lightning protection, if required following an assessment by Project Co.
- e. other supporting hard informal and social areas where required in these ACRs, such as outside Classrooms in Foundation Phase or outdoor dining space in Secondary Schools and Colleges;
 - f. any playgrounds provided for a School shall be laid out to avoid small enclosed spaces and areas that make supervision difficult. They shall be of a size and shape to accommodate a typical range of playtime games and allow supervisory staff to deal quickly with any instances of bullying or undesirable behaviour. In Primary Schools in particular, playgrounds shall be accessed easily by Students, but located so that activities do not disturb teaching in ground floor Classrooms or in outdoor areas directly outside Classrooms such as Nursery and Reception Outdoor Play to Nursery and Reception Classes;
 - g. for any playgrounds, Project Co shall provide external furniture/play equipment. Any outdoor Equipment provided shall be positioned for ease of access and supervision, and to minimise the risk of theft and vandalism. The specification and location of seating in social areas must include provision for use by Students with physical disabilities and be suitable for the age range;
 - h. hard surfacing materials must meet the standards relevant to the proposed use. Playgrounds in schools are laid out to avoid small enclosed spaces and areas that make supervision difficult. They are of a size and shape to allow playtime games to carry on unhindered and allow supervisory staff to deal quickly with any instances of bullying or undesirable behaviour. Any outdoor equipment provided shall be positioned for ease of access and supervision, and to minimise the risk of theft and vandalism;
 - i. where possible, the specification and location of seating in social areas is suitable for use by Students with physical disabilities. Any planted areas should both conserve and enhance biodiversity where possible and be designed to allow site management without the use of hazardous pesticides; and
 - j. a portion of the informal and social area should not be developed but provide a framework to allow Schools to develop parts of their Grounds gradually in the future, with the participation of Students.

2.6.4 Hard Surfaced Games Courts

- 2.6.4.1 Project Co shall ensure that hard surfaced areas for games courts, and any adjacent or overlapping skills practice areas, accord with the areas identified in the SoA for each Facility. Surfaces must comply with the evenness requirements of BS7044 part 4⁵. They must be level, drain well and have an even surface, which is free of obstructions. Unless otherwise specified in the relevant Site Specific Brief, areas are of a shape and size

⁵ BS7044 part 4: 1993 gives detailed guidance on surface evenness and other aspects, such as finished profile.

suitable to allow courts to be marked out, with reasonable margins, to the dimensions set out in the ADS.

- 2.6.4.2 The surfaces of any hard-outdoor PE area provided shall be designed in accordance with Sport England 'Artificial Surfaces for Outdoor Sport'. Courts shall be defined with thermoplastic line markings.

2.6.5 MUGAs

- 2.6.5.1 Project Co shall ensure that where several courts are provided, these are combined wherever possible to provide a Multi-Use Games Area and are of appropriate dimensions to suit a wide range of sports, including five-a-side football, basketball, hockey, netball, tennis (or short tennis) and volleyball. Where some sports require a higher priority, this is reflected in the relevant Site Specific Brief.

- 2.6.5.2 To be fenced on all sides to a minimum 3m high with gates to suit access and evacuation

2.6.6 Sports Pitches

- 2.6.6.1 Project Co shall ensure that any pitches provided are capable of sustaining both summer and winter use. Specialist advice should be sought to ensure an adequate pitch construction is provided.

- 2.6.6.2 If new or extended pitches are provided to replace existing pitches, they shall be designed and drained to be 'like for like'.

- 2.6.6.3 Project Co shall ensure that, as well as meeting the requirements of the Site Specific Brief(s), any sports pitches to be provided:

- a. are located and orientated to suit the activities;
- b. provide sufficient pitch margins to ensure Student safety;
- c. provide sufficient pitch margins and run-offs which may overlap for the same type of pitch, but overlap between heavily used winter pitch areas (e.g. goal mouths) and heavily used summer pitch areas (e.g. cricket squares or athletics track) shall be avoided;
- d. are designed and constructed to a standard that allows the minimum use specified in the Site Specific Brief(s) for the Authority/(or in the case of a Schools Project) each School Entity's year-round Curriculum needs; and
- e. are economic to maintain, with easy access for maintenance equipment (and for irrigation if needed).

- 2.6.6.4 Project Co shall provide that the location, size and shape of any individual pitches, courts and practice areas are based on a number of considerations, including:

- a. safety, providing sufficient pitch margins and allowing for the direction of play (for example for cricket nets);
- b. gradient (a uniform fall of about 1:100 is ideal, but an even fall of up to 1:80 is allowable, or up to 1:40 if it is across the line of play);
- c. orientation of any pitches (a roughly north-south direction is generally desirable for most games)
- d. dimensions, surfaces and markings as recommended for 'Community' use in Sport England guidance 'Comparative Sizes of Sports Pitches & Courts (OUTDOOR)', 'Natural Turf for Sport' and 'Artificial Surfaces for Outdoor Sport' (restricted sites may follow the Sport England design guidance on 'Compact Athletics Facilities'); and

- e. all external soft landscaping/planting is complete (appropriate to the season), free of weeds, moss or other extraneous growth, free from litter, standing water and other foreign matter (such as stones, brick, glass and animal faeces), in healthy growth with no bare patches, free from ruts and other disruptions to the normal contour of the surface, at a height and lined in accordance with the sport to be played and available for use by the Authority.
- 2.6.6.5 Where no Works are to be carried out to the pitches Project Co shall ensure that at the Actual Completion Date the pitches are in the same or a better condition than prior to the commencement of the Works.
- 2.6.6.6 In Secondary Schools where there is sufficient sports pitch area, Project Co shall demonstrate that there is adequate space provided for winter pitches for team games such as soccer, rugby and hockey to be as identified in the relevant Site Specific Brief. Project Co shall make an allowance so that cricket pitches and a 400m running track can be provided during the summer term on Schools Projects. Project Co shall locate the cricket square and the running track so as to avoid the most heavily used areas of the winter pitches, such as goal-mouths. Project Co may fence off cricket squares in winter to protect surfaces, provided that the winter pitches can still be utilised.
- 2.6.6.7 Pitches and courts that are going to be used by the community must be sized in accordance with the relevant parameters detailed within Sport England 'Comparative Sizes of sports Pitches and Courts (Outdoor), 2015'. After-hours access will require detailed consideration and shall be in accordance with any requirements in these ACRs and any planning requirements.
- 2.6.6.8 Where any existing outdoor PE facilities are used by the community, the existing support facilities must be retained, such as parking, access routes and lighting.
- 2.6.7 Soil Condition
- 2.6.7.1 Project Co shall ensure the soil condition of the areas to be used for playing fields and pitches is capable of sustaining both summer and winter use. Specialist advice should be sought by Project Co to ensure an adequate pitch construction is provided.
- 2.6.7.2 Best practice for sub-structure preparation, cultivation, topsoil storage and placement, and for the alleviation of compaction during construction, will be followed for all areas to be grassed
- 2.6.8 All-weather Pitches
- 2.6.8.1 Project Co shall ensure that the construction and performance of artificial surfaces for sport, such as synthetic turf pitches, comply with the relevant British Standard and with Sport England 'Artificial Surfaces for Outdoor Sport' and the requirements of the National Governing Body for the primary sport to be played on that surface, e.g. for rugby WRU guidance on compliance with IRB Reg 22.
- 2.6.8.2 Allow for appropriate markings, margins and run-off for the layout for hockey, football and five-a-side football or the range of sports, in line with Sport England guidelines and guidance produced by national governing bodies for the relevant sport.
- 2.6.8.3 The choice of surface is based on performance, safety and durability, through:
- a. the properties best suited to the types of games to be played, such as the 'ball bounce';
 - b. slip resistance and abrasiveness;
 - c. wear resistance; and

d. ease of maintenance.

2.6.8.4 Where artificial pitches are provided, floodlighting shall also be provided to facilitate community use.

2.6.9 Habitat Areas

2.6.9.1 Project Co shall ensure that suitable outdoor spaces are included to provide various teaching and Learning Resources across the whole Curriculum in accordance with any areas identified in these ACRs and the Site Specific Brief, depending on the School or College's Curriculum and the natural opportunities of the Site.

2.6.9.2 Any habitat areas provided in Facilities shall be fenced, such that they can only be accessed by Students when supervised, and can include meadowland, wildlife habitats, ponds, gardens and outdoor science areas.

2.6.9.3 A portion of this habitat area in each Facility should not be developed but allow the School or College scope for developing the area themselves in the future, with the participation of Students.

2.6.9.4 Any planted areas should as a minimum conserve (and if possible enhance) biodiversity and be designed to allow site management without the use of hazardous pesticides.

2.6.10 Access Areas

2.6.10.1 Project Co shall ensure that all access roads are of sufficient width and have geometry to give easy and safe access to all car parking areas and delivery points to the relevant Facility without risking the safety of Students, staff or visitors..

2.6.11 Emergency Access

2.6.11.1 Project Co shall ensure that when the Building is some way back from the public highway, road access for fire appliances is provided. Any entrance through which appliances may need to pass shall be a clear 3.1m in width with a minimum 3.7m headroom and there must be adequate space to enable appliances to turn.

2.6.12 Paths, Roads and Delivery Areas

2.6.12.1 Project Co shall ensure that pedestrian routes and cycle routes are separated from vehicular access routes, and that they are obvious, well-lit and visible, with clear lines of sight, and, where possible, not be surrounded by high vegetation or outbuildings.

2.6.12.2 Project Co shall provide access and turning facilities to suit delivery and refuse vehicles, buses and cars for staff and visitors. Project Co shall seek appropriate advice in respect of road widths, turning radii and adequacy of construction from the relevant statutory bodies. Roadways are arranged to eliminate reversing movements in the vicinity of Students, wherever possible.

2.6.12.3 Project Co shall provide an intercom at the delivery gate for every Facility to facilitate access.

2.6.12.4 Paths used for both pedestrians or cyclists are adequately dimensioned, and marked to show a separation.

2.6.12.5 Account is taken of any local requirements specified in these ACRs

2.6.12.6 Any routes that could be used for maintenance vehicles and equipment, including mobile elevating work platforms (MEWP), shall be designed and constructed for this purpose, this shall include providing:

- a. sufficient space for safe movement, off-loading and delivering;
- b. safe ground conditions (terrain and gradient);
- c. safe ground-bearing capacity along the route and where working; and
- d. clear passage between street furniture for access for MEWP equipment of appropriate size for the Building.

2.6.12.7 Access routes for MEWP shall meet the requirements in the HSE General Information Sheet No. 6: 'The section, management and use of mobile elevating work platforms'.

2.6.12.8 Access to any new or relocated outbuildings, including storage sheds, garages or plant (such as tanks storage) shall be suitable for the equipment stored and/or those likely to be using the spaces. There shall be controlled and locked access to any outbuildings.

2.6.13 Drop-off and bus turn around provision

2.6.13.1 Project Co shall ensure that:

- a. a clear drop-off point is provided at each Facility entrance area. The Project Co shall ensure that the Works are acceptable to the relevant highways/ roads authorities and planning authorities;
- b. the boarding and disembarkation of Facility buses shall be sited away from other traffic movements. Any specific requirements of individual Facilities are covered in the relevant Site Specific Brief;
- c. any pick up/ drop off area is visible from the highway to enable drivers to estimate whether there is space for them to enter; and
- d. car parking and the pick-up/drop off area should not be the main feature of the vista of the Site.

2.6.13.2 The Site[s] shall have dedicated vehicle drop-off areas of a size and location to meet the Facility's arrangements set out these ACRs.

2.6.14 Parking and cycle storage

2.6.14.1 Project Co shall design the Site[s] so that:

- a. parking is segregated wherever possible from other traffic movements;
- b. the number of parking spaces meets planning requirements and local requirements specified in the relevant Site Specific Brief;
- c. the parking area is carefully positioned so that it does not dominate the main arrival area and entrance points round the Building, while being open and visible, where possible, from the main entrance;
- d. separate bays are provided for disabled users and visitors; and
- e. cycle storage is easily accessible to cyclists and include means of securing bikes, but the storage should be located so that it is overseen from Buildings, ideally including from the main Facility office. It should be accessible without crossing vehicular routes wherever possible.

2.6.15 Outbuildings and External Storage

2.6.15.1 Project Co shall provide appropriate external storage for the following:

- a. waste materials, including facilities for separation and recycling;
- b. external equipment, e.g. for maintenance;
- c. combustible waste materials, securely located in accordance with Law;

- d. Secure storage for goods and waste awaiting collection shall be positioned at least 10m from the outer walls of the Building or adjacent premises in a location that does not obstruct sightlines for pedestrians, drivers or cyclists and which negates the need to impede footpaths or roadways with temporary storage of bags or containers. Where it is not possible to locate the secure storage 10m from the outer walls of the Building or adjacent premises, Project Co shall still comply with the fire safety management responsibilities of the Regulatory Reform (Fire Safety) Order 2005; and
 - e. Any outbuildings or external storage used by the Facility that are affected by the Works shall be relocated or re-provided by Project Co.
- 2.6.15.2 Project Co shall ensure that any new or relocated outbuildings or external storage, shall be located far enough from Buildings to prevent risk of spread of fire. Any new outbuildings shall be:
- a. selected with due regard to their suitability for purpose and performance, durability, ease of cleaning, maintenance and repair and resistance to accidental or Malicious Damage;
 - b. in accordance with local planning requirements or conditions; and
 - c. sufficiently robust to stand up well to heavy use and prevailing weather conditions.
- 2.6.16 Landscaping and Groundworks
- 2.6.16.1 All external soft landscaping/planting is complete (appropriate to the season), free of weeds, moss or other extraneous growth, free from litter, standing water and other foreign matter (such as stones, brick, glass and animal faeces), in healthy growth with no bare patches, free from ruts and other disruptions to the normal contour of the surface.
- 2.6.16.2 Any planting shall be designed to both conserve and enhance biodiversity and allow site management without the use of hazardous pesticides. Tree planting shall be in accordance with BS 8545:2014 'Trees: from nursery to independence in the landscape: Recommendations'.
- 2.6.16.3 All shrubs shall be planted in accordance with BS 3936-1:1992: 'Nursery stock. Specification for trees and shrubs'. All planting shall be non-toxic in accordance with the series of BS 3936 'Nursery stock', and Good Industry Practice.
- 2.6.16.4 Any tree planting in hard landscaped areas shall include appropriate permanent and permeable material or grille at the base of the trunk. Bark chipping or other loose material in access, play or social areas is not acceptable.
- 2.6.16.5 For all areas that are to be grassed, seed experts and seed providers should be consulted to inform seed selection depending on soil type, condition, seasons and topography.
- 2.6.16.6 For the alleviation of compaction during construction, Good Industry Practice shall be followed for all areas to be grassed, in accordance with Defra: 'Construction Code of Practice for the Sustainable Use of Soils on Construction Sites' (2009); Sport England guidance: 'Natural Turf for Sport' (2011); BS 7370-4; and BS 4428 shall be followed.
- 2.6.16.7 Project Co shall ensure that the materials used for the preparation of landscaped areas (whether imported or re-used from the relevant Site[s]) are free of pests and disease, corrosive materials, fragments of aggressive weeds, sticks, straw, pieces of brick, concrete, glass, lumps of vegetation, rubbish and the like.
- 2.6.16.8 Seeding and turfing shall only be undertaken in suitable growing seasons and/or when an appropriate watering regime is in place. Seeded/turfed areas shall be protected with

temporary fencing for a minimum of 6 months from germination and maintained by Project Co until successful establishment occurs.

- 2.6.16.9 In accordance with Sport England’s Design Guidance Note, ‘Natural Turf for Sport’: “As soon as the grass has started to establish, a rigorous programme of aftercare must commence with a sequence of operations to encourage the development of a strong dense sward. This must continue until the surface is ready for play.” Project Co shall carry out this aftercare with a suitable maintenance regime of regular inspection, maintenance, stone picking, cutting, watering and any required remedial work to turfed/seeded areas as required to meet these ACRs and the SLS for three years following the Actual Completion Date or the first acceptance of the planted area, whichever is the later.
- 2.6.16.10 Project Co shall further be responsible for maintaining all of the landscaping to meet these ACRs and the SLS for a period of three years following the Actual Completion Date or the first acceptance of the planted area, whichever is the later, with a suitable maintenance regime of
- a. regular inspection, maintenance, cutting, pruning, watering and any required remedial work to replace trees, shrubs and planting that are not in accordance with Project Co’s specification, species, size or are dead or not in healthy growth;
 - b. regular inspection, maintenance, cutting, watering and any required remedial work to turfed/seeded areas other than grass pitches referenced above, and ensuring that grass, wildflower meadows, and other such soft play and habitat areas are established in accordance with Project Co’s specification, including mix of species; and
 - c. Regular inspection maintenance and remedial work to ensure that any planting areas and beds are free from foreign matter as described above.
- 2.6.16.11 Project Co shall take account of the drainage conditions of the land and changes in water flows addressed wherever levels are being amended and/or spoil is being retained on site, so as to avoid excessive flooding, ponding of water on landscape areas and/or top soil washing onto low lying/paved areas.

2.6.17 Boundary Fencing

- 2.6.17.1 Project Co shall provide a secure and continuous perimeter fence line which may include use of the Building to create the Secure Line. All fencing to the perimeter shall be new unless otherwise agreed with the Authority. Project Co shall be responsible for the maintenance of all boundary treatments with the exception of hedges which remain the responsibility of the Authority.
- 2.6.17.2 All fencing to the site boundary shall be designed to meet the security requirements in these ACRs which will be based on a risk assessment and shall:
- a. be a minimum of 2.4m in height;
 - b. be constructed of appropriately spaced posts and panels of anti-climb weldmesh with no horizontal footholds;
 - c. be in accordance with local design standards and any additional requirements of these ACRs;
 - d. have gates at agreed locations; the design, height and construction of which match the corresponding fencing system and maintain the same level of security; and
 - e. ensure perimeter fencing, boundaries and gates are visible from the immediate vicinity of the Building such that intruders trying to gain access over these are not hidden from view

2.6.17.3 Planting in association with boundary fencing shall not facilitate scaling of fences. Boundary planting should allow good visibility along fence lines and there shall be no dense planting which could obscure intruders and impede passive supervision by passers-by. Any fixed external equipment shall not be located where it could provide a climbing aid over a fence.

2.6.18 Fencing to MUGAs and Hard-surfaced Games Courts

2.6.18.1 Fencing to MUGAs and hard-surfaced games courts shall be in accordance with the appropriate sections of BS 1722 and comply with the requirements of SAPCA Code of Practice for the Construction and Maintenance of Fencing Systems. Fencing to MUGAs shall also comply with the following requirements:

- a. to be in heavy-duty steel mesh with panels hot dip galvanised to BS EN ISO 1461 and polyester powder coated to standard colour agreed with the Authority;
- b. to be 3m high unless otherwise stated in these ACRs;
- c. kick boards to be a nominal 250mm high x 50mm thick, pressure treated, 40yr weather resistant smooth planed timber with chamfered top edge; and
- d. rebound boards (where required in these ACRs) to be 1.2m high by at least 12mm thick, homogenous resin based exterior grade boarding.

2.6.18.2 Gates in fencing to a MUGA or hard-surfaced games court shall be provided to afford access at locations to suit adjacent roads, paths and directions of travel. Where provided they shall:

- a. be fully infilled with weldmesh/rebound boards/kick boards as appropriate, and provided with a suitable locking mechanism;
- b. open outwards for the safety of players;
- c. have boot cleaning facilities at main access gates, to prevent contamination of the playing surface with mud and material from outside the playing area;
- d. have level or slightly ramped (i.e. not stepped) thresholds;
- e. be positioned so as not to create 'tight' gathering or milling points, especially where pitch/games area team changeovers are scheduled; and
- f. be 1.2m wide (single gates) or 3.0m wide with a removable lintel panel above for ease of access with soccer goals (double gates).

2.6.19 Fencing to Informal and Social Areas

2.6.19.1 Fencing provided to define activity zones or enclose activities shall suit the location and function. These could include bow top fencing to separate Nursery and Reception Outdoor Play, weldmesh fencing for perimeter and play-courts, galvanised metal vertical bar railings, timber palisade fencing, timber post and rail fencing, rebound fencing, ball stop fencing, etc. as appropriate. The use of hedges instead of fencing or alongside temporary fencing may be used where appropriate if agreed with the Authority.

2.6.19.2 Project Co shall provide protection to any exposed elevations to new Buildings by the use of protective planting or low fencing of at least 1.2m high, to avoid casual disturbance, such as balls striking windows or Students banging on windows.

2.6.19.3 Appropriate street furniture and/or landscape detailing shall be provided to prevent accidental or deliberate vehicular contact with Buildings or structures.

2.6.20 Environment and Fabric

- 2.6.20.1 Project Co shall ensure that external envelope and structure should be used to achieve the internal environment required based on a passive approach, that is building fabric and orientation first before active (mechanical and electrical) systems are considered. The principles being for a passive approach to assist the achievement of the internal environment by:
- a. choosing optimum building orientation for the relevant Site;
 - b. building shape;
 - c. building mass to achieve an efficient envelope-to volume ratio;
 - d. material selection; and
 - e. optimising the benefits of daylight and natural, hybrid or mixed- mode ventilation.
- 2.6.20.2 Project Co shall ensure that the Building Services and components of the Building are well co-ordinated, work well in full use and are easy to operate. The Facility Users should be able to easily adjust or operate components that affect their comfort, such as lighting switches, ventilation controls and opening windows. Wherever possible, systems should default to 'off'.
- 2.6.20.3 Project Co shall ensure that the Building, and Service Infrastructure are designed to allow for changes in configurations to be made easily and economically, in particular that:
- a. the partitions most likely to change, which are likely to be perpendicular to the external wall, are not load-bearing;
 - b. columns in the middle of spaces are avoided;
 - c. lighting systems are suitable for different partition positions, with minimal change to switching circuits and luminaire positions, (shall be in accordance with paragraph 2.9 of these Generic Design Requirements and do not interfere with AV technology, particularly data projectors);
 - d. heating and other Service Infrastructure are suitable for different partition positions with minimal change;
 - e. fenestration, shading devices and any ventilation chimneys or ducts proposed, do not obstruct daylight or the use of AV technology or ventilation or the repositioning of partition walls (for instance against mullions);
 - f. noise reduction between rooms is not adversely affected by adaptation works, taking account of sound travelling through ductwork, openings, screeds and ceilings;
 - g. sound absorption in each room continues to provide a suitable reverberation time, following any adaptation works;
 - h. internal doorsets are suitable for different plan arrangements with minimal change;
 - i. floor and other finishes are suitable for different plan arrangements with minimal adaptation work; and
 - j. replaceable components must be easy and safe to replace when necessary.

2.7 Form and Structure - Overarching Requirement

- 2.7.1.1 Project Co shall ensure that the Building is well composed, with form and massing appropriate to the site and passive design principles. Project Co shall design the Building to have an efficient structure that allows future adaptability; weathers well and withstands wear and tear in use, including minor vandalism and Malicious Damage.
- 2.7.1.2 Project Co shall ensure that the Building's structure meets the following requirements:

- a. the structural grid or layout must allow adaptability in all General Teaching spaces and light Practical Teaching spaces; and
- b. projections such as structural columns and piers in large spaces (such as Halls) and Circulation routes should be limited. Where these are unavoidable appropriate measures should be in place to ensure safety; the structural design and choice of materials should take account of potential future changes to mechanical and electrical services, so far as can reasonably be foreseen, and to their potential impact on changes to ICT systems, such as the introduction or expansion of wireless technology.

2.8 Building Fabric and Materials - Overarching Requirements

- 2.8.1.1 Project Co shall ensure that the design includes a simple palette of robust materials and finishes that are resilient and durable and weather and wear well and provide protection against potential malicious or physical abuse.
- 2.8.1.2 Project Co shall ensure that all materials are detailed to shed water away from vulnerable junctions and avoid uneven weathering, including pattern staining, streaking, or shading due to rainwater, airborne pollutants, and wind. Components manufactured off-site are to be protected from water penetration during transit and whilst awaiting installation. Components that have absorbed water are not to be used.
- 2.8.1.3 Materials and finishes shall prevent the ingress of ground and surface water and maintain acceptable appearance in line with prescribed Minimum Life Expectancy Requirements as set out in these ACRs. The Works shall be designed and constructed so that exposure of any aspect of the Works to sunlight over the relevant Minimum Life Expectancy Period does not reduce the performance or visual appearance of that element / component, taking into account expected solar performance under varying conditions of solar radiation and external air velocity.
- 2.8.1.4 The building fabric shall meet the requirements set out in table 1 of these ACRs (Minimum Life Expectancy and Minimal Residual Life Requirements tables), without failure resulting from defects in design, materials, or workmanship. Failure shall be defined as breakage, disengagement of components, deflection beyond acceptable values or reduction in performance.
- 2.8.1.5 Project Co will ensure that each Building will be designed to achieve low levels of infiltration, (less than 3.0m³/hr per m² of façade at 50pa). Project Co is not to rely on remedial works to achieve the targets such as the use of mastic. In the event any Building fails to achieve the target infiltration level first time, the infiltration targets to be achieved must be lowered by 15%.
- 2.8.1.6 As required by the SLS, Project Co shall undertake an air tightness test on the Building two years following the Payment Commencement Date and every five years thereafter (or at the specific request of the Authority) to assess any degradation of the air tightness of the Building due to uncontrolled infiltration and control the air entering and leaving the Building, which will affect energy consumption. Should the test show a reduction in excess of the acceptable level of reduction detailed in the table below compared with the original test undertaken prior to handover, Project Co shall undertake remedial works to restore the air tightness of the Building back to achieve its original level.
- 2.8.1.7 In Facilities where there are Students with complex health problems, particular account must be taken of safety and hygiene. Project Co shall take account of the possibility of accidental or Malicious Damage, including the wear and tear caused by Mobility Equipment, the affect that certain colours, patterns and textures can have on some people, and the higher risk of harm and infection for the most vulnerable children and

young people. Further requirements in this respect will be included within the relevant Site Specific Brief

- 2.8.1.8 Where the building fabric (external walls, ground floor and roof) are the primary means of controlling the internal environment, Project Co shall ensure that the design follows the fabric first principles through:
- a. minimising the use of all resources, including building materials and operational resources;
 - b. reducing the demand for energy and water use during the Works p and the services period;
 - c. minimising waste and carbon dioxide emissions during the Works and the services period;
 - d. achievement of low elemental U-values resulting from insulation optimisation;
 - e. achievement of a minimum overall building air tightness of $3.0 \text{ m}^3/(\text{m}^2.\text{hr})@50\text{Pa}$ (tests prior to the Actual Completion Date; 2 years after the Actual Completion Date; and every 5 years thereafter, or at the specific request of the Authority will be carried out to check air tight) ; and
 - f. Detailed calculation, assessment and minimisation of thermal bridging.
- 2.8.1.9 Project Co shall ensure that products and materials are not specified that do not comply with:
- a. The Montreal Protocol on Substances that Deplete the Ozone Layer; and
 - b. Welsh and British standards or equivalent European industry standards as amended.
- 2.8.1.10 Project Co shall not specify products and materials that:
- a. are generally known within the European Union at the time of specification to be deleterious to the environment, and/or health and safety, or diminish the durability of other structures, finishes, plant and/or machinery;
 - b. are on the lists of banned materials available from the European Commission's Enterprise and Industry website (<http://ec.europa.eu/enterprise>) or the Health and Safety Executive (www.hse.gov.uk) websites; and
 - c. contain substances that deplete the ozone layer, as identified by the United Nations Development Programme.
- 2.8.1.11 Project Co shall ensure that:
- a. all internal finishes and fittings shall be such that levels of VOCs in the air do not exceed $300\mu\text{g}/\text{m}^3$ averaged over 8 hours;
 - b. all materials are selected with due regard to their suitability for purpose and performance, durability, ease of maintenance and repair, resistance to accidental or Malicious Damage and to their environmental impact. The materials used must also take account of any particular local requirements or planning conditions specified in the relevant Site Specific Brief; and
 - c. materials and finishes are used that stand up well to the prevailing weather conditions, the ingress of ground and surface water and heavy use, whilst maintaining acceptable appearance over the long term. All areas of the Building must be easily and safely accessible for cleaning and maintenance whilst preventing unauthorised access.

2.8.2 Roofs

- 2.8.2.1 Project Co shall provide pitched roofs to all Buildings, unless otherwise substantiated (e.g. due to Planning requirements) and agreed by the Authority.
- 2.8.2.2 Project Co shall ensure that the chosen roof system satisfies the following minimum acoustic, thermal, fire, durability and safety performance requirements:
- a. the thermal performance of roof coverings is to be as specified in the latest version of AD L2;
 - b. where possible the increase in the indoor ambient noise levels in teaching and examination spaces for noise intrusion from external sources during 'heavy' rainfall, calculated using laboratory test data with 'Heavy' rain noise excitation as defined in BS EN ISO 140-18, in accordance with *Acoustic Design of Schools*, shall be no more than 25 dB $L_{Aeq,30 mins}$ above the appropriate indoor ambient noise level given in the ADS;
 - c. fire - internal surfaces are to be Class 1 to BS 476⁶ Part 7 or EU Class C-s3, d2 or better; Project Co shall design the roof and the fire resistance of the inner surface taking into consideration any requirement for fire resistant cavity barriers, including junctions with fire compartments;
 - d. fire - external surfaces are to be AA, AB or AC to BS 476 Part 3 or EU Class B roof (T4) to ENV 1187 Part 4 external fire exposure classification;
 - e. roofs are to be capable of being easily replaced, overlaid, over-coated, upgraded or replaced without affecting the deck or structure below; and
 - f. roofing materials shall not be used below a height of 2.5m above adjacent external ground level in situations where they could be subject to Malicious Damage.
- 2.8.2.3 Project Co shall ensure that roof construction and design address movement, compatibility of components and lightning protection and comply with the following requirements:
- a. any roof system shall include insulation, and an underlay is provided for discontinuously supported slate or tiled roofs;
 - b. in cold roof constructions, the eaves must have a proprietary continuous ventilator in accordance with AD C; roof drainage should be designed to have a simple layout, with free flowing, short and direct routes to rainwater outlets, which are fully accessible for maintenance and replacement; all penetrations through the roof and roof level plant are co-ordinated at an early stage in the design and are provided so as to minimise roof penetrations. Access required to the roof is designed to minimise the possibilities of damage to the roof;
 - c. where any green roofs are proposed the maintenance involved should be assessed, and Project Co shall make these requirements clear to the Authority in its proposals. Project Co shall clarify with the Authority the performance it requires from any green roof: whether it is in response to storm water mitigation, biodiversity, or planning constraints; and
 - d. Ethylene tetrafluoroethylene (ETFE) should not be used at low level, be easily accessible or used in situations where it is likely to be subject to Malicious Damage.

⁶ BS 476-7: 1997: Fire tests on building materials and structures.

- 2.8.2.4 In line with the CDM Regulations⁷ and HSE guidance, Project Co shall design roof access to minimise the possibility of damage to the roof and to ensure safety on roofs during the lifecycle of the Building by:
- a. designing out unnecessary access to the roof as part of the Maintenance Access Strategy with the risks assessed and described within the health and safety file. Project Co shall seek solutions, wherever practicable, that eliminate the need to access plant and equipment on roof areas;
 - b. considering carefully the location of the siting of roof plant, rainwater outlets and rooflights to positions on the roof where safe access is provided;
 - c. providing a permanent staircase from within the Building where safe access is required for planned preventative maintenance, including the breakdown of roof plant and equipment, as described in the 5 Year Maintenance Plan;
 - d. providing a protected walkway to access the area of roof where safe access is required as part of the Maintenance Access Strategy;
 - e. providing glazing that can be cleaned from inside the Building where this is a practical solution as part of the Maintenance Access Strategy and as described in the Planned Maintenance Plan;
 - f. mitigating the risk of persons and objects falling from height, providing edge protection providing guard railing or parapet to perimeter to the area of the roof and stairs/door access as part of the Maintenance Access Strategy; and
 - g. All rooflights, plant equipment, and outlets provided shall be readily and safely accessible for inspection, maintenance, and cleaning.
- 2.8.2.5 Safe access to roofs is required, by means of permanent non-retractable staircase access from within the Building, complying with the Building Regulations, to carry out planned preventative maintenance , as described in the 5 Year Maintenance Plan, without the use of elevated platforms or other mobile access equipment (MEWP's) for the purposes of:
- a. inspection and maintenance of roof plant and equipment
 - b. cleaning, inspection and maintenance of rooflights; and
 - c. cleaning, inspection and maintenance of rainwater goods, water collection and drainage outlets. Consideration shall be given to resolve maintenance access for the possible exception of small canopy roofs.
- 2.8.2.6 Access must be secure to ensure that only maintenance personnel can gain access on to the roof.
- 2.8.2.7 Access to the roof from a hatch with a drop-down ladder arrangement or via a fixed vertical ladder is not deemed to be an acceptable means of access.
- 2.8.2.8 Flat roofs shall be designed with appropriate means of passive protection ie. parapets, guardings or balustrades, to mitigate the risk of falling from height, at changes in level. Mansafe or other fall arrest systems are not permitted as a solution.
- 2.8.2.9 Project Co shall design the roofs with fixings that provide safe access and allow for future maintenance, eg repair or re-covering of roofs without the removal of mechanical electrical and public health (MEP) plant, ductwork and service runs. This includes the location and method of fixing of MEP plant, and zero or low carbon

⁷ The Construction (Design and Management) Regulations 2015

technologies, eg photovoltaic cells, where requirements have been identified in the SSB, eg to meet planning requirements or local authority initiatives, or environmental standards.

2.8.2.10 Plant shall not be located in areas subject to severe weather or on exposed plant decks and shall be in accordance with any particular local requirements or planning conditions specified in these ACRs.

2.8.2.11 Project Co shall also ensure that roof design and construction complies with the following requirements:

- a. rainwater should be discharged externally where possible. The discharge of rainwater through any discharge systems shall not be audible inside the Building;
- b. overhanging eaves and canopies should not provide shelter for animals or birds, or cover for intruders and they should be formed with non-combustible materials;
- c. adequate fire barriers are maintained to ensure an externally-set fire cannot enter the roof space through the eaves or elsewhere, or that an internal fire does not spread;
- d. the overall design of roofs and surrounding elements shall not allow unauthorised access;
- e. the positioning and use of access hatches, inspection points, control gear, valves etc. is such that it minimises disruption to the everyday running of the Facilities. Openings are robust, vandal-resistant and secure against entry by intruders. Measures should be taken to minimise solar overheating and glare from roof lights;
- f. roof void ventilation is in accordance with relevant codes of practice;
- g. ventilators are installed in accordance with the manufacturer's instructions and in accordance with relevant codes of practice and British Standards at date of construction;
- h. openable vents and their control systems shall be designed to provide ease of use, inspection and maintenance considering both manual and/or automated mechanisms. The design shall be considered as part of the Maintenance Access Strategy with the risks assessed and described within the Health and Safety File;
- i. any openable rooflights provided shall be designed to provide ease of use by the Facility staff. Where these are electrically operated, they shall be provided with rain sensors, and with wall mounted key controlled override controls for use by Facility staff that cannot be operated by Students; and
- j. the positioning of any access hatches, inspection points, control gear, etc. shall be such that when in use disruption to the everyday running of the Building is minimised.

2.8.2.12 Thermal insulation in the roof void must:

- a. not impede roof void ventilation;
- b. be free from damage and breaks in continuity and integrity; and
- c. provide acoustic insulation and fire protection no less than that specified by current Building Regulations.

2.8.3 Rainwater Goods

- 2.8.3.1 Project Co shall ensure that guttering and rainwater pipe work provision shall have a simple layout, with free flowing, short and direct routes to be fully accessible for maintenance. The layout shall be coordinated with the layout of all parts of the external walls and comply with the following requirements:
- a. gutters are located so that the eaves do not obstruct access for maintenance;
 - b. all joints are to be sealed and secured, in accordance with relevant British Standards;
 - c. roof drainage, including gutter outlet and pipe dimensions is calculated using guidance in BS EN 12056⁸;
 - d. on flat roofs, box gutters within the roof area are to be avoided;
 - e. all gutters are laid to falls, and be provided with overflow pipes to discharge away from the Building in an obvious place to give an early warning of blocked rainwater outlets and designed to prevent staining of external fabric; and
 - f. no part of the roof is to rely on one outlet alone.
- 2.8.3.2 Where internal rainwater pipes are proposed these shall be able to be safely maintained from the roof and from an external manhole/inspection chamber. All internal rainwater pipes shall be maintainable with cleaning rods. Where it is appropriate to provide internal access this shall be made from easily accessible rooms and spaces that will not affect teaching and learning.
- 2.8.3.3 In designing a flat roof drainage solution consideration should be given to the material vulnerability of the external wall construction and the long term risks of passing rainwater pipes through these external walls. Where secondary means of drainage are necessary i.e. via weirs and overflows, a fully sealed proprietary systems shall be used to transfer rain water through external walls.
- 2.8.3.4 Rainwater and other drainage pipes shall not be built into external walls.
- 2.8.3.5 Downspouts, hoppers and gutters shall be fitted with mechanically fixed leaf guards. shall be provided to all outlets. These will act as a guard against blockages from balls, vegetation, birds nests and other objects with potential to block outlets.
- 2.8.3.6 Where drainage and discharge stacks pass through teaching occupied spaces, they are acoustically insulated to prevent noise breakout into the space.
- 2.8.3.7 Project Co shall ensure that rainwater pipes are detailed and arranged so that they:
- a. are not vulnerable to vandalism;
 - b. prevent climbing;
 - c. are easy to maintain;
 - d. have uniform finishes and do not show signs of oxidation on their external surfaces at completion;
 - e. are robust enough to withstand accidental damage (for instance from ladders) during Maintenance Works, as well as Malicious Damage;
 - f. prevent water discharge from being audible from within the Building; and
 - g. have minimum bends with all horizontal runs being laid to fall; All down pipes must have rodding eyes at floor level, positioned so that a blockage between the down pipe and the surface water drainage system can be easily cleared.

⁸ BS EN 12056: 2000: Gravity drainage systems inside buildings.

2.8.4 Stairs and Ramps

2.8.4.1 Project Co shall ensure that the planning and design of each stairway:

- a. contributes to an efficient and balanced Circulation provision, with fire escape stairs (especially enclosed ones) being available for normal usage (unless otherwise agreed with the Authority);
- b. takes account of the effect of the staircase locations on potential for future expansion;
- c. provides fire escape stairs with a level exit directly to the outside of the Building;
- d. minimises travel times between lessons;
- e. minimises congestion by being sized to enable efficient flow of Students and staff during class changeovers, providing the greatest widths where Student flows will be highest and avoiding single stairs and/or corridors in locations where it is likely that a majority of Students will circulate during class changeovers;
- f. allows carry-down evacuation for Mobility Equipment users where necessary;
- g. supports passive surveillance and the feeling of security; and
- h. assists navigation so that stairs are easy to find and clearly differentiated.

2.8.4.2 Project Co shall ensure that the design and construction of all stairs comply with the following requirements:

- a. all aspects of the design (including handrail height, colour and texture) are to meet the needs of a wide range of disabilities, including reduced mobility and visual impairment, to comply with The Equality Act 2010, Part B, Part M and BS 8300⁹;
- b. materials for handrails/balustrades are to be self-finished and chosen to contrast with the background against which they will be viewed, and not be highly reflective;
- c. Offset treads shall be provided to accommodate continuous handrails;
- d. Building Services within stairway enclosures are minimised. Where they are unavoidable, the Project Co is to agree this with the Authority, and ensure their presence should not lower the required performance of the stairway, particularly in terms of sound insulation and fire resistance;
- e. if wall-mounted heat emitters or lights are required, they are robust, and located so as not to obstruct use of the stair, the landings, the refuge or the designated escape route. They should also be easy to maintain whilst preventing tampering by Students;
- f. fire refuges are provided in each fire-protected stairway on each upper storey, as required by AD B;
- g. any additional requirements identified in these ACRs shall be provided; and
- h. additional requirements for Schools with Specially Resourced Provision or Designated Units may include a full height solid wall with applied handrail to the centre of stairwells or an additional handrail to both sides of all stairs at a height of 600mm to the top of the rail, above the nosing line of the stairs.

2.8.4.3 Project Co shall ensure that prevention from falling is addressed in the design of staircases and guarding.

⁹ BS 8300: 2009: 'Design of buildings and their approaches to meet the needs of disabled people.'

- 2.8.4.4 All guarding provided shall meet the requirements of AD K and BS6180:2011.
- 2.8.4.5 Glass to balustrades and guarding shall be laminated, toughened and heat soak tested and fixed with bolt-through fixings in accordance with BS6180:2011. Balustrades shall be provided by a BSI kitemark registered manufacturer and installed by qualified, accredited and certified installers
- 2.8.4.6 The design of stairs and handrails shall be coordinated so that handrails are continuous without vertical steps in the handrails
- 2.8.4.7 In addition:
- a. guarding of walkways or staircases with voids on both sides shall be 1250mm high;
 - b. guarding of walkways or staircases with a void on one side shall be 1250mm high;
 - c. any occupied, furnished mezzanine area (such as a Learning Resource Area) shall have guarding 1500mm high adjacent to any void;
 - d. any additional requirements for the height of guarding based on a risk assessment and specified in these ACRs shall be met; and
 - e. The maximum gap between stair strings shall be 200mm.
- 2.8.5 External Walls
- 2.8.5.1 Project Co shall ensure that external walls and the materials chosen for them are designed and constructed to:
- a. be secure, robust, vandal-resistant and suitable for the particular circumstances and proposed location for their use and superimposed loadings applied;
 - b. allow for the easy removal of graffiti without damaging the surface of the material;
 - c. require minimum maintenance, and only periodic cleaning, to avoid future disruption to the relevant Facility;
 - d. prevent unauthorised access to roofs or secure or restricted areas;
 - e. resist abrasion from cleaning methods and maintenance systems without any noticeable change in surface appearance;
 - f. utilise a fixing method for cladding which adheres to the same robust performance of the material itself (where face fixing methods are used, they must match the visual appearance of the cladding material used and be tamper-proof);
 - g. include a damp proof course in the outer face at a minimum of 150mm above adjacent external ground level, to prevent the penetration of ground moisture; and
 - h. achieve Class 0 classification of Building Regulations or EU Class B-s3, d2 or better.
- 2.8.5.2 Brick slip systems should not be used.
- 2.8.5.3 Generally, any surfaces shall be sufficiently hard to resist applied or transferred impacts that occur during normal use:
- a. without sustaining damage or noticeable change to the surface appearance;
 - b. without deterioration of performance; and
 - c. minimising the risk of hazard to people inside the building or people outside of the Building due to impact.

- 2.8.5.4 The adjacent external function, during normal use, shall inform the choice of external walling materials. Materials, which are vulnerable to impact damage e.g. by people or balls, shall not be used where Students come into normal contact with them e.g. on main access routes, games areas, and social spaces.
- 2.8.5.5 Building Elements of a structural nature such as structural frames, columns and loadbearing walls are required to achieve 60 minutes fire resistance.
- 2.8.5.6 The external envelope of a Building should not provide a medium for fire spread. Combustible materials are not permitted in the external walls of School and College Buildings with a storey at least 18m above ground level. All buildings must comply with the requirements of The Building (Amendment) Regulations 2018 (SI 2018 No.1230)
- 2.8.5.7 Where Buildings may be prone to Malicious Damage, consideration should be given to ensuring cladding for ground floor external walls is not combustible to reduce the risk of external fire damage to the structure.
- 2.8.5.8 Materials and systems up to 2.5m above ground level shall achieve at least Classification B rating when tested for hard and soft body impact in accordance with the requirements of Category I when tested in accordance with the requirements of ETAG 004:2011 – ‘External Thermal Insulation Composite Systems with Rendering’, or a similar equal and approved performance standard.
- 2.8.5.9 Materials and systems at heights over 2.5m above ground level must achieve at least Classification E rating when tested for hard and soft body impact in accordance with the requirements of Category II when tested in accordance with the requirements of ETAG 004:2011, or a similar equal and approved performance standard.
- 2.8.5.10 Plastic fittings in ground floor external walls, particularly those in timber-framed Buildings, can act as weak spots where an external fire occurs. Such fittings include airbricks, vent covers, ducts and waste pipes. Project Co shall use appropriate materials in these situations to prevent the ingress of fire due to the materials.
- 2.8.5.11 Any external walls and associated materials and elements shall not have small openings or sharp edges that could result in injury, e.g. Student fingers being trapped.
- 2.8.5.12 Where sheet or panel cladding is provided, elements of the Works shall be individually and independently removable ensuring access for maintenance and/or replacement of cladding units and other components in the event of breakage. The removal of any cladding units shall not affect the performance or safety of adjacent units or any other parts of the Works.
- 2.8.5.13 The flow of rainwater over the surface of any cladding shall be controlled. All Works shall be detailed and installed to ensure that performance is not impaired, and that the visual appearance shall uniformly age.
- 2.8.5.14 Where external walls are provided in areas subject to vehicle movement, Project Co shall incorporate additional measures to protect the façade from damage (including malicious damage).
- 2.8.6 External Doors and Windows
 - 2.8.6.1 Project Co shall ensure that the positions of external doors, windows and vents are co-ordinated with the ventilation strategy and general requirements for daylight in spaces.
 - 2.8.6.2 Measures shall be taken to reduce the effects of direct sunlight and glare through external glazing to satisfy the requirements set out in these ACRs.

- 2.8.6.3 Where required by the ADS Project Co shall provide external doors in accordance with the following requirements:
- a. be robust enough to withstand heavy usage, with minimal maintenance, be weatherproof, and to maintain the safety and security of the facility;
 - b. to take into account the different ages and abilities of all Facility Users;
 - c. to be vandal-resistant and incorporate appropriate controls and/or fittings to discourage misuse, but afford safe operation and adequate security;
 - d. to allow disabled access, including access for Mobility Equipment;
 - e. to have flush door thresholds suitable for wheelchair access to comply with BS8300;
 - f. all doors shall adhere to the principle of PAS 24 – Product Assessment Specification produced by BSI for enhanced security performance of doors or independently certified to the recognised security standard Loss Prevention Standard LPS1175 Security rating 2;
 - g. the principle entrance doors to the Building shall be power-operated, either manually activated by a push pad or automatically activated by means of movement sensors. These doors shall have a ‘hold-open’ facility, interlinked to the fire alarm system, and be fitted within an emergency manual override; and
 - h. inner doors to the entrance lobby of the principle entrance to the Building shall be designed to maintain security.
- 2.8.6.4 Inner doors which form the Secure Line shall:
- a. be operable by a remote control from the reception desk or general office;
 - b. include for out-of-hours operation;
 - c. have a proximity reader to both sides, including interlinking with the fire alarm system;
 - d. be fitted within an emergency manual override; and
 - e. the door from a Foundation Phase Classroom to outdoor play areas shall be fully glazed such that the glazing line is no higher than 450mm above finished floor level (AFFL);
- 2.8.6.5 Outward opening doors to Foundation Phase Classrooms and Dining and Social areas shall have a robust means of securing them in an open position, taking into account the adjacent external function to avoid creating a hazard;
- 2.8.6.6 Where louvre doors are provided they shall be faced to suit the performance requirements of the external fabric and have integral insect mesh where necessary; and
- 2.8.6.7 External doors in Foundation Phase areas, and Designated Units or Specially Resourced Provision areas (if specified in these ACRs), used by Students shall be fitted with anti-finger trap door profiles and hinges. Provision shall be made to prevent doors slamming shut when open. Project Co shall consider how to minimise heat loss where doors open directly from the classroom to external areas such as through the provision of thermal strip curtains.
- 2.8.6.8 Project Co shall ensure that the following requirements are met for external door ironmongery:
- a. the automated principle entrance doors to the Building shall be fitted with pull type handles/push plates to facilitate the manual opening/closing at the beginning and end of the School or College day;
 - b. pull type handles shall not be fitted to the push side of doors;
 - c. includes locks for all doors, including those to stores, with a suited key system or other system (e.g. card access) that shall be agreed with the Authority [;

- d. suitable locking mechanisms shall be provided for escape doors to prevent unauthorised egress/entrance. The design shall be fully coordinated with the Access and security strategy and fire strategy prepared by Project Co;
 - e. ironmongery is robust and heavy duty; and
 - f. the inclusion of letterboxes, where appropriate, of a style and type (anti-arson) to be agreed with the School/Authority.
- 2.8.6.9 Where door closers are used, Project Co shall ensure that they are be suitable for the age and needs of the Students operating the doors.
- 2.8.6.10 Where the ADS specify security shutters, grilles or bars on external doors or windows, these must comply with BS 822010 or have Loss Prevention Certification Board (LPCB) approval.
- 2.8.6.11 Project Co shall ensure that windows, vents and shading are designed and constructed to:
- a. provide sufficient light and natural ventilation (or supplement other ventilation as required in these ACRs, the latest version of BB101, and the ADS) with a minimum of 5% of the effective opening free area (A_{eff}) of the window to be openable;
 - b. be of a type that does not create a noise nuisance;
 - c. take account of the acoustic requirements set out in these ACRs and have regard to local acoustic conditions;
 - d. prevent/minimise glare which disrupts teaching (computer screens, electronic whiteboards etc.);
 - e. allow for blinds to be fitted where required;
 - f. be safe in closed or open positions, and not be hazardous to persons passing by windows internally or externally;
 - g. prevent children from falling out at all levels;
 - h. allow for the safe and efficient cleaning of windows;
 - i. require minimum maintenance to avoid future disruption to the Facilities; and
 - j. not compromise the security of the Building.
- 2.8.6.12 Project Co shall ensure that ironmongery and shading and ventilator actuators or mechanisms are robust and tamper proof and shall be easy to operate from floor level. Project Co shall ensure that window shading shall be of a type that does not create a noise nuisance.
- 2.8.7 Window Retainers
- 2.8.7.1 Upper floor windows are to be fitted with opening restrictors or similar devices to restrict the clear opening to no greater than 130 mm for windows below 1500mm above finished floor level (AFFL) in areas used by Students (making allowance for furniture placed against external walls).
- 2.8.7.2 Project Co shall carry out a risk assessment and window restrictors should only be fitted where the risk assessment shows that they are needed - in some Facilities the risk of

¹⁰ BS 8220:2004: Guide for security of buildings against crime.

falling from windows may be more than the accidental risk and may include falls related to a confused mental state (e.g. some Students with SEN (D)) or deliberate harm¹¹.

- 2.8.7.3 Some lower level windows will require restricted openings for health and safety or security reasons. In this case louvre vents can be provided that offer a much larger openable free area for ventilation. High level opening windows should not require restrictors to be fitted for health and safety and can be designed to overcome the security risks and can therefore be designed to open fully under summertime conditions. Building Regulations Approved Document K, Requirement K4 requires consideration of restriction of opening windows or other means to prevent collision with open windows.

2.8.8 Sill Heights

- 2.8.8.1 In order to provide views out for as many Students as possible, Project Co shall ensure that sill heights to any windows in Basic Teaching spaces are as follows:

- a. for spaces used by secondary and College Students: sill height should be no higher than 1050mm AFFL and glazing line (the lowest edge of the glass) no higher than 1100mm AFFL;
- b. for spaces used by Foundation Phase Students (nursery playrooms, nursery group rooms, reception and Year 1 and 2) and KS2 Students: sill height should

¹¹ Judgements need to be made on areas of the Site where greater risks may be realised – taking account of the age and nature of the pupils who will use the Facilities and the School’s intended use of particular parts of the Buildings. Factors in Facilities that could give rise to a higher risk of falling from windows include:

- a. where vulnerable pupils are educated, which could include mainstream, Designated Units and Specially Resourced Provision
- b. where pupils may display more challenging behaviour and discipline e.g. Student referral units
- c. where there are windows that Students may foreseeably use to gain access/egress to remain undetected e.g. onto roof areas etc; bedrooms in boarding schools
- d. where the design of the window creates additional risk e.g. where Students could sit on window sills/window seating/ radiators/ cupboards etc with wide opening windows, particularly in unsupervised or busy thoroughfares.

Where higher risks of falling from opening windows are identified, the risks can be reduced by restricting the window in some way. Guidance on the amount of restriction to prevent the risk from falls in a range of situations is given in:

- a. BS 8213 – 1: 2004 Windows, doors and roof lights – Part 1: Design for safety in use and during cleaning of windows, including door-height windows and roof windows – code of practice. Paragraph 4.2 recommends that a risk assessment should be carried out on the building to establish the relative priority needs of the building's windows including the design for safety in use. The risk assessment should take into account the type of occupancy and age range of both occupants and visitors to the building, where this can reasonably be predicted. If a significant change of use of the building occurs, the risks should be reassessed. Paragraph 5.4.1 recommends the fitting of safety restrictors to accessible opening lights where children or adults are at risk of falling out. Paragraph 3.14 defines a safety restrictor as a mechanical device, which is intended to limit the initial movement of an opening light so that a clear opening of not more than 100mm is achieved at any point and
- b. BS 6180 'Barriers in and about buildings – Code of practice' contains advice re: barriers and window openings.

be no higher than 750mm AFFL and glazing line no higher than 800mm AFFL;
and

- c. for spaces used only by Foundation Phase Students (nursery playrooms, nursery group rooms and reception and Years 1 and 2), the fully glazed external door shall facilitate views out whilst carrying out floor-based activities.

2.8.9 Internal Elements and Finishes

- 2.8.9.1 Exposure to sunlight during its lifetime shall not affect the properties of any element or component provided to the extent that its associated minimum performance requirements cannot be achieved. Visual appearance of any element or component should also not be detrimentally affected during this period, taking into account expected solar performance under varying conditions of solar radiation.
- 2.8.9.2 Any materials and finishes shall perform without failure resulting from defects in design, materials, or workmanship. Failure shall be defined as breakage, disengagement of components, deflection beyond acceptable values, reduction in performance or breakage.
- 2.8.9.3 All internal finishes and fittings provided shall be such that levels of Volatile Organic Compounds in the air do not exceed 300µg/m³ averaged over eight hours.
- 2.8.9.4 Project Co shall refer to these ACRs in order to identify specific requirements for internal finishes and elements for Students with SEN (D).
- 2.8.9.5 Project Co shall take account of:
 - a. the possibility of accidental or Malicious Damage including the wear and tear caused by Mobility Equipment;
 - b. the effect that certain colours, patterns and textures can have on some people; and the higher risk of harm; and
 - c. infection for the most vulnerable children and young people (refer to these ACRs).
- 2.8.9.6 Any hydrothermal performance required in doorsets, ceilings and wall finishes shall be met through the achievement of a satisfactory performance when subject to the environmental conditions in Table 2, as measured in accordance with DD171:1987 'Guide to specifying performance requirements for hinged or pivoted doors (including test methods)', test 10 and 11.

TABLE 2 MINIMUM HYGROTHERMAL PERFORMANCE REQUIREMENTS

| ADS code | Rating | Environmental conditions to be accommodated |
|----------|--------|--|
| 0.1 | normal | One Side - 25% RH at 10°C Opposite Side - 65% RH at 25°C |
| 0.2 | humid | One Side - 25% RH at 10°C Opposite Side - 85% RH at 25°C |
| 0.3 | wet | One Side - 25% RH at 10°C Opposite Side - 98% RH at 25°C |

2.8.10 Internal Walls

- 2.8.10.1 Project Co shall ensure that partition walls are fit for their intended use, that their finishes comply with the requirements of the ADS, and that the design and construction of internal partition walls comply with the following requirements:

- a. the robustness duty rating for all areas is to be 'severe duty' (SD) as defined by BS 5234-2¹²: Table 1, to withstand impact damage (including Malicious Damage) from equipment and Mobility Equipment;
- b. the minimum support for fixtures and fittings is to be 100N for pull out and 250N for pull down (as measured in accordance with BS 5234) and be able to support the finishes, fixtures and equipment specified in the ADS;
- c. in any studwork partitions, patressing shall be provided for all wall-fixed fixtures, pipework, fittings, furniture or equipment provided by the Project Co, or listed on the relevant ADS, requiring a secure fixing to the wall (such as wash hand basins and shelving);
- d. all teaching walls to have a three-meter section centred on the room space, or agreed alternative placement, from floor to ceiling, to be designed to take A/V equipment (whether for Legacy Equipment or new equipment or for future fixings outside of the Works) to allow a total loading of up to 125kg. The ceiling above the teaching wall is to allow for Legacy A/V equipment to be fixed, so that the projected image is clear and is not disturbed by vibration from impact above;
- e. the acoustic insulation in the partition wall will be suitable to satisfy the requirements of the acoustic performance standards for schools and given in the ADS. Where the rating of the wall is different, depending on which room is the source room, the higher of the two acoustic specifications should be provided;
- f. the abutment of a partition to adjacent walls, floors or structural soffits must not reduce the overall required acoustic performance of the wall or reduce its fire performance;
- g. surface spread of flame rating and fire resistance are to be as specified in Approved Document B (in support of the Building Regulations);
- h. the partition fire ratings specified in the ADS should not be taken in isolation. If the adjoining room has a fire resistance or is a protected stair/fire escape route, or the partition forms a fire compartment, then the partition is appropriately fire rated. In all cases, the most onerous fire rating must be applied to the partition; and
- i. partitions to exam stores shall meet the requirements of the relevant qualification provider's criteria, including the Joint Council for Qualifications Regulations, or equivalent.

2.8.10.2 Reference shall be made to these ACRs for any additional requirements for Students with SEN (D), for example robustness.

2.8.10.3 Manufacturer's standard construction details are to be followed during design and installation.

2.8.10.4 If a moveable partition is used, Project Co shall adhere to the following general specifications:

- a. the moveable partition must not be a fire compartment, nor need any fire rating;
- b. If the moveable partition forms part of an escape route, the surface spread of flame ratings and fire resistance are to be as specified in AD B.;
- c. the moveable partition shall wherever possible meet the sound insulation required between the room types as specified in BB93. In the case of Classrooms, a $D_{nT,w}$ of at 45-50dB is achieved and in the case of large volume spaces such as sports

¹² BS 5234: Part2: 1992 – Partition Grading.

halls $D_{nT,w}$ 40-45 dB is achieved, depending on the room types and their intended uses;

- d. where there is a moveable partition between a drama studio and a hall the minimum $D_{nT,w}$ between the spaces is to be 45dB;
- e. the locking mechanism should not be of a spring-loaded type, which can cause injury when released; and
- f. the moveable partition must have removable key locks to prevent unauthorised people from casually dismantling or tampering with it.

2.8.10.5 Project Co shall ensure that the finishes of all internal walls, and the internal face of external walls, shall:

- a. conform to the specification in the ADS;
- a. be resistant to heavy use and easy to clean and maintain; and
- b. be adequately protected from damage, especially on corners vulnerable to impact by Mobility Equipment and teaching equipment.

2.8.11 Internal Door Sets

2.8.11.1 Project Co shall ensure that the minimum standards defined in the ADS are achieved in all internal door sets, and that the performance specifications, as set out in the seven types of door set and the seven types of hardware, are achieved for the relevant type of door set and hardware specified for the room or space. Project Co shall ensure that internal door sets comply with the following general requirements.

2.8.11.2 Materials and finishes must:

- a. be suitably robust for normal use in a School or College environment (as relevant use and perform their necessary protective and decorative functions);
- b. take into account the capability of the user (in terms of dexterity, strength and visual acuity);
- c. not prevent the door set providing the performance defined in the ADS; and
- d. be from sustainable sources, wherever possible, and able to be recycled at the end of the product's life.

2.8.11.3 Surface finishes must:

- a. be suitably robust and perform their necessary protective and decorative functions. Surface finishes shall have a resistance to marking of at least class 3 when tested to methods 2 to 6 in BS 3962-6: 1980 and shall be capable of withstanding cleaning with hot water containing mild non-abrasive detergents and disinfectants as part of a regular cleaning programme; and
- b. not create any reflections likely to disturb Students or affect visually impaired people's ability to use the door set.

2.8.11.4 The Project Co shall take measures to prevent damage to faces and edges of doors, particularly from impact with mobility and teaching equipment, especially in high traffic areas or when there is regular movement of equipment and materials, for example in Kitchens, workshops and laboratories, or in non-ambulant Specially Resourced Provision or Designated Units.

2.8.11.5 Project Co shall ensure that:

- a. the door sets have good perimeter sealing in order to provide the desired airborne sound insulation;

- b. the size of any gaps between doorframes and the walls in which they are fixed are minimised by the use of manufactured door sets and are filled and sealed in a manner to satisfy the requirements for fire safety, security and acoustic performance specified;
- c. the gaps between door frames and the surrounding walls are filled and sealed in a manner to satisfy the requirements for fire safety, security and acoustic performance specified in these ACRs and the ADS;
- d. the door sets are not to be located in partitions between rooms requiring sound insulation values above 35 R_w dB, for example between music rooms;
- e. the interface between the door sets and surrounding substrate do not reduce the fire performance of the partition; door sets that achieve higher fire and smoke classifications than those specified in the ADS are used if they are to be needed in areas of higher fire risk or to provide greater protection to emergency escape routes;
- f. the capability of the user (in terms of dexterity, strength and visual acuity) is taken into account;
- g. visual clutter is avoided, and elements should contrast visually with one another by the minimum differences in light reflectance value (LRV) specified in BS 8300¹³; and
- h. the door sets are wide enough to allow Mobility Equipment access (where specified in the ADS), with good visibility maintained on both sides of the door.

2.8.11.6 Project Co shall provide fire rated doorsets where required. Information shall be provided to enable each fire rated doorset to be individually identified. This must confirm the manufacturer, the date of manufacture, and the designated fire rating and smoke seal requirement of the doorset. Smoke seals to be installed off-site in accordance with manufacturer's instructions. Fire rated doors shall be identified on the fire and access strategy drawings.

2.8.11.7 Where the need is identified within these ACRs, a stable type door may be used to provide access to Administration offices or a technicians' area, where the fire and access strategy allows. This may be where space for a second internal reception desk to the main office is constrained, or where Student access to a technician's space is preferred. Any stable door shall be based on doorset type D1.1.a in Table 2.

¹³ BS 8300: 2009: Design of buildings and their approaches to meet the needs of disabled people.

TABLE 3 - MINIMUM PERFORMANCE REQUIREMENTS – DOOR SETS

| In door type code: First digit: dimensions, durability and strength Second digit: refer to table 2 Letters: a-o: ironmongery, Table 5 Letter v = vision panel | | | Minimum clear opening width - opening angle greater than 90 | Minimum clear opening height | Mechanical durability (Class defined in BS EN 12100:2002) | Mechanical strength (BS EN 1125:2002) | Hydrothermal performance required, as specified in Table 2 | Bolts & push plates required to slave leaf | | Vision panels to Part M required (No = not required unless for | All doors to have a clear opening width of 825 through one leaf. Fire and smoke resistance dependent on fire strategy Acoustic properties are dependent on the acoustic strategy |
|---|------------------|---|---|------------------------------|---|---------------------------------------|--|--|---------------------------|--|---|
| Door Type s | Description | Required locations | | | | | | | Ironmongery (see Table 5) | | Notes |
| D1.1 a | private | Head and senior staff offices | 825 | 2000 | 5 | 3 | Normal | No | a: general | No | |
| D1.1 av | general | General Teaching, light practical, Libraries, Small Group Rooms, most staff and admin spaces | 825 | 2000 | 5 | 3 | Normal | No | a: general | Yes | |
| D1.1 ev | Foundation years | In primary: teaching, Libraries and Small Group Rooms used by Foundation (nursery, reception and infant) Students | 825 | 2000 | 5 | 3 | Normal | No | e: Foundation years | Yes | |
| D2.1 av | strong | Resistant materials and engineering and adjacent spaces of similar humidity | 825 | 2000 | 5 | 4 | Normal | No | a: general | Yes | |
| D2.2 av | strong | Food or catering rooms, food store, and Kitchen preparation areas | 825 | 2000 | 5 | 4 | Humid | No | a: general | Yes | |
| D2.2 d | strong | Accessible toilets, accessible changing, and Hygiene Rooms | 825 | 2000 | 5 | 4 | Humid | No | d: accessible toilet | No | Ergonomic handle and access control system to be agreed with Authority. If door leaf opens inwards, it shall be openable outwards in an emergency |

| In door type code: First digit: dimensions, durability and strength Second digit: refer to table 2 Letters: a-o: ironmongery, Table 5 Letter v = vision panel | | | Minimum clear opening width - opening angle greater than 90 | Minimum clear opening height | Mechanical durability (Class defined in BS EN 12400-2:2002) | Mechanical strength (BS EN 12400-2:2002) | Hydrothermal performance required, as specified in Table 2 | Bolts & push plates required to slave leaf | | Vision panels to Part M required (No = not required unless for | All doors to have a clear opening width of 825 through one leaf. | | | Spaces (double doors - not lobbied doors) | | | | | | | | | |
| DD6.1fv | special Circulation | In Specially Resourced Provision and Designated Units: general purpose for Circulation routes and zoning | 1650 | 2000 | 5 | 4 | Normal | Yes | f: Circulation | Yes | Ergonomic handle and access control system. Override to hold open device to be provided in an access restricted location |

- 2.8.11.8 Project Co shall ensure that vision panels are fitted to all door leaves wider than 450mm, except those leaves on doorsets leading into: changing rooms; medical inspection rooms/sick bays; plant rooms; service ducts; and store cupboards. Project Co shall ensure that vision panels provided must:
- be located towards the leading edge of the door;
 - provide effective zones of visibility, to comply with AD K and AD M;
 - comply with BS 8300 and incorporate glazing in accordance with BS EN 12600¹⁴;
 - be covered by the evidence of conformity provided for the door set in relation to the performance requirements contained in BS EN 12600, such as those relating to fire, acoustic and security; and
 - Any spaces that are required to have blackout or dim-out blinds on external glazing shall also have blackout or dim-out blinds to any internal glazed screens or vision panels.

2.8.12 Internal Glazed Screens

- 2.8.12.1 Project Co shall ensure that internal glazed screens are provided as required in Table 4 and where passive supervision is required.
- 2.8.12.2 Internal glazed screens may be immediately adjacent to the main door, as part of the doorset, or designed as internal windows with separate frames, but shall be:
- designed with a consistent approach, for instance in relation to doorset and screen configurations within corridors;

¹⁴ BS EN 12600: 2002: Glass in building.

- b. designed to ensure that the bottom edge of the glass is set at no more than 1100mm above finished floor level; and
- c. a minimum of 900mm high and 600mm wide.

2.8.12.3 Internal glazed screens adjacent to a door may be deemed to have the same minimum Rw requirement as the doorset, provided that the total area of vision is no greater than that of the opening leaf of the doorset.

2.8.12.4 Permanently occupied administrative offices and other spaces listed in Table 4 shall have an internal blind on any internal glazed panel and any vision panel in the door leaf, for privacy.

TABLE 4 - INTERNAL GLAZED SCREEN AND INTERNAL BLINDS REQUIREMENTS

| ADS codes | Space name | Internal glazed screen (at least 600mm wide) | Internal blind to any internal glazed screen or vision panel |
|----------------------------------|--|---|--|
| OFF00 OFF10 OFF20 | Office or office/ meeting room, office/ pastoral room (SEN (D), learning support) | Required | Required |
| OFF33 OFF35 | Staff work room | Required | Not required |
| OFF41 ADM11 | Conference/ meeting room, head/ principal's office (meeting room), | Not required, unless located for supervision | Required if vision panel provided |
| OFF15 | Office/ workroom (technical staff, ICT staff or premises) | Not required, unless located for supervision | Not required |
| OFF32 ADM02 ADM04 ADM08 | Staff room (social), interview room, sick room, reprographics room | Not required | Required if vision panel provided |
| ADM05 ADM06 ADM13 | General office / finance / Student services, admin office (PA to head) | Not required | Not required |
| | Staircase | Required | |

2.8.13 Internal Door Hardware

2.8.13.1 Project Co shall ensure that the hardware/ironmongery to internal door sets is in accordance with the requirements of the ADS, and that the following general requirements are met:

- a. all doors to rooms, stores etc. are to be lockable, with a suited manual key system unless otherwise stated in these ACRs;

- b. the detail of the locking and suiting requirements to individual rooms is agreed with the Authority, and evidence of this is given to the Authority;
- c. all hardware including door closers and door seals takes account of the age of the Students operating the doors;
- d. controlled (staff operated) emergency release locks should be provided for toilet and shower cubicle doors, released from outside by hexagon or star key (not coin-slot); and
- e. nameplates and numbers are fitted to all internal doors. The detailed requirements for individual rooms are described in the ADS.

2.8.13.2 Project Co shall ensure that the design and installation of hardware to door sets comply with the following requirements:

- a. where ironmongery is provided, Project Co shall conform to the specifications in Table 5, to match the relevant doorset code in the ADS;
- b. the ironmongery shall be to the relevant specifications below and complement the strength and durability classification of the doors to which they are fitted;
- c. all hardware must provide functionality and performance appropriate to that door set's intended use and must not undermine the performance of the sets to which they are fitted;
- d. door leaves that are neither steel nor timber with laminated finish are provided with protection plates that shall be sufficient to protect the doors from damage from Mobility Equipment and, where relevant, trolleys. These shall be on both sides of all door leaves and a minimum of 200mm high, or 450mm in any schools with non-ambulant Specially Resourced Provision or Designated Unit Students;
- e. push plates shall be provided to each door leaf on the face used to push the door open. These shall be a minimum of 90mm x 1400mm in size, or if a single plate is not compatible with other hardware fitted to the door, two minimum 90mm width plates fitted above and below the lock position shall be provided to protect to an equivalent extent;
- f. anti-finger trap door profiles and hinges shall be fitted to all doors to teaching, learning, and halls used by Foundation Phase Students, except where it is very unlikely for Students to be present; and
- g. where anti-finger trap fittings and profiles are required, both edges of the doors shall be treated to prevent young children getting their fingers caught and injured. The proposed solution shall not require frequent maintenance or replacement.

2.8.13.3 Door stops are fitted such that they prevent the door leaf damaging adjacent surfaces and prevent damage to the door leaf itself. They shall be fitted to adjacent skirting boards as close to the leading edge of the leaf as possible and not less than two thirds of the door width away from the hinge line. Stops must not be located in positions where they may constitute a trip hazard.

2.8.13.4 Project Co shall ensure that:

- a. all ironmongery inside sports halls, activity and dance studios and other spaces housing energetic physical activity shall be flush fitting;
- b. accessible and staff WCs require a method of limiting access to staff and disabled users only and which meets the requirements of AD M for limited dexterity;
- c. door handles shall satisfy the requirements of BS 8300 'Design of buildings and their approaches to meet the needs of disabled people' to ensure they are suitable for people with reduced manual dexterity or visual impairment;

- d. the server room shall be secured via a lock and key, of a type that cannot be duplicated without authority;
- e. six keys shall be provided for the server room at the Actual ICT Handover Date (1 x network manager, 1 x technician, 1 x site manager, 1 x Disaster Recovery plan to be kept within the safe, and 2 x spare to be kept in a safe);
- f. if there is more than one door to the server room, then both doors shall contain suited locks so that a single key can open both doors;
- g. reference shall be made to these ACRs for any additional requirements such as access control or anti-finger trap fittings and profiles;
- h. hinges must meet the requirements of BS EN 1935¹⁵. Account should be taken of any door closers that will affect the specification of the hinge;

2.8.13.5 locks shall be as listed in Table 5 as one of the following types:

- a. lever lock – suitable for use with lever handles, operated by key from outside and thumb-turn inside, note: Classroom locks are to be unlockable but not lockable from the Classroom side;
- b. dead lock – suitable for use without lever handles; in double doors the slave leaf will require flush bolts to top and bottom;
- c. bathroom lock – lock that can be locked from the inside by turn or lever and can be released from outside by hexagon or star key (not coin-slot); and
- d. ergonomic lock - as bathroom lock but operable by users with limited dexterity;

2.8.13.6 Locking arrangements for examination stores shall comply with relevant exam board criteria (Joint Council for Qualifications or equivalent) given in these ACRs.

2.8.13.7 Project Co shall ensure that door closers must meet the requirements of BS EN 1154¹⁶ as well as the following additional requirements:

- a. door closers (and door seals) must take account of the age of the Students operating the doors;
- b. the closer shall incorporate an adjustable tensioner which is set such that the door provides optimum fire resistance and acoustic performance when closed and as far as possible the operating forces are within the limit permitted in BS 8300;
- c. any delayed action closers should not delay the closing action more than that required for its use (for example, for the ease of disabled people). Where the device is fitted to a fire door, this delay must not exceed 25 seconds, as specified in BS EN 1154; and
- d. any door closers fitted on fire door sets on Circulation routes must incorporate electro-magnetic hold-open devices linked to (and compatible with) the automatic fire detection and alarm system.

2.8.13.8 Project Co shall ensure that electro-magnetic hold-open devices must meet the requirements of BS EN 1155 and should not be fitted to door sets required to be self-closing in order to provide appropriate privacy, such as door sets to changing rooms. Electro-magnetic devices shall only be provided on self-closing fire doors, and only on

¹⁵ BS EN 1935: 2002: Building hardware. Single-axis hinges.

¹⁶ BS EN 1154: 1994: Building hardware. Controlled door closing devices.

those devices which release automatically. Measures are taken to prevent accidental impact with the leading edge of the door leaf, when in the open position. Edges of all doors that stand open shall contrast visually with the surrounds, and protection of the leading edge of the door shall be provided to prevent the creation of a hazard.

- 2.8.13.9 Project Co shall ensure that lever handles must meet the requirements of BS EN 1906¹⁷, be compatible with the locks with which they are to be used and satisfy the requirements of BS 8300: 2001 (to ensure they are suitable for people with reduced manual dexterity or visual impairment). Lever handles shall have a diameter of between 19mm and 35mm, be offset from the door leaf by at least 45mm, be at least 95mm long, have a return end, and contrast with the door leaf by a minimum of 20 LRV points. All lever handles shall have bolt-through fixings.
- 2.8.13.10 Project Co shall ensure that pull handles on doors meet the requirements of BS 8424 – ‘Building hardware. Pull handles. Requirements and test methods’. Pull handles shall have a diameter of between 19mm and 35mm, be offset from the door leaf by at least 45mm, be at least 400mm long, and contrast with the door leaf by a minimum of 20 LRV points. Additionally, pull handles must be located so their lower end is 1000mm above FFL or 1100mm above FFL if clashing with other door hardware. All pull handles shall have bolt-through fixings. Pull type handles shall not be fitted to the push side of doors.
- 2.8.13.11 Project Co shall ensure that any access control device shall:
- a. be designed and installed to BS EN 60839 11 1: 2015;
 - b. not undermine the performance provided by the door sets on which they are fitted;
 - c. not inhibit escape in the case of a fire or other emergency;
 - d. comply with relevant directives for electronic devices;
 - e. be able to be operated by disabled Facility Users;
 - f. offer appropriate durability;
 - g. offer the range of functionality required; and
 - h. be easily repairable or replaceable.

¹⁷ BS EN 1906:2010: Building hardware. Lever handles and knob furniture.

TABLE 5 – MINIMUM SPECIFICATION REQUIREMENTS FOR IRONMONGERY

| Ironmongery Sets | type | Hinges: S-standard P-parliament | Finger guards required | Through-fix lever handles | Through fix vertical pull handle & push plate | Locks (see 5.2.1.2): L-Lever locks, D-Dead lock, B-Bathroom, E-ergonomic | Staff-only access control system | Electromagnetic hold open device required with override in access restricted location | Closer required |
|------------------|--------------------------------|------------------------------------|------------------------|---------------------------|---|--|----------------------------------|---|-----------------|
| a | general | S | No | Yes | No | L | No | No | No |
| b | mainstream toilet ¹ | S | No | Yes | No | B | No | No | No |
| c | mainstream changing | S | No | No | Yes | D | No | No | Yes |
| d | accessible toilet | S | No | No | Yes | E | Yes | No | No |
| e | Foundation years | S | Yes | Yes | No | L | Yes | No | No |
| f | Circulation | S | No | No | Yes | D | No | Yes | Yes |
| g | lobby & stairs | S | No | No | Yes | None | No | No | Yes |
| h | halls & plant | S | No | No | Yes | D | No | No | No |
| k | sports hall | S | No | No | Yes, flush | D | No | No | No |
| m | special | S | Yes | Yes | No | L | Yes | No | No |
| n | special toilet | S | Yes | Yes | Yes | B | Yes | No | No |
| o | special changing | S | Yes | No | Yes | D | Yes | No | Yes |
| p | parliament | P | No | Yes | No | L | No | No | No |

Note 1: 'mainstream toilet' excludes Foundation years.

2.8.14 Floors

2.8.15 Floor Structure

2.8.15.1 Project Co shall limit floor vibration and sound transmission.

2.8.15.2 To eliminate the risk of “bouncy” floors, all floors must consist of a composite screeded construction, and must meet the following vibration criteria:

- a. all Basic Teaching spaces, staff and admin areas office and any Circulation to these areas are limited to a minimum fundamental natural frequency of 5Hz or justified by other means (e.g. response factors or analysis as described in the SCI publication P354 -Design of Floors for Vibration: A New Approach); and
- b. any Halls, drama spaces, studios or areas that may be subjected to unusual vibration characteristics are justified through calculation and/or justification using SCI P354 or other similar industry standard documentation.
- c. flanking paths shall be identified in the BB93 acoustic report and adequate structural isolation provided;

2.8.15.3 Rooftop playdecks and MUGAs shall be designed to minimise structure borne vibration and airborne sound transmission to occupied rooms. A specialist structural and acoustic report is required to prove there is adequate structural isolation and attenuation of sound and vibration.

2.8.16 Floor Finishes¹⁸

2.8.16.1 Project Co shall ensure that the choice and installation of floor finishes comply with the following requirements in all internal areas of the Buildings, in addition to any required in these ACRs:

- a. durability: able to maintain its characteristics and performance for at least 5 years under normal conditions;
- b. resilience: able to support the furniture and equipment listed in the Legacy Equipment survey summary and Facility-Specific ADS; withstand pedestrian traffic without undue deformation or permanent marking; able to accommodate thermal and structural movement in both the finish and the sub-floor;
- c. continuity: having minimal joints, and flush joints between different finishes;
- d. cleaning - the ease and frequency of cleaning is taken into account, as well as the level of hygiene required;
- e. suitability - the finish including texture and colour is suitable for the age and needs of Students including those with SEN (D); and
- f. safety - including slip resistance where specified in the ADS

2.8.16.2 Project Co shall ensure that the floor finishes conform to the performance specifications set out in the five types of floor finish in the technical annex of the ADS, taking account of all British and European standards relevant to the material type and where there is

¹⁸ Project Co to note that some aspects of finishes such as colour are likely to be subject to the review procedure in Schedule 8 of this Agreement but that the Range of Finishes submitted under Schedule 8 of this Agreement will need to continue to comply with these ACR provisions.

under-floor heating, floor finishes are able to withstand the effects of temperatures up to 27°C. (ref BS 8203, CP 1018, BS EN 14041)¹⁹.

- 2.8.16.3 Project Co shall ensure that the floor finish is appropriate to the activities taking place in the space it serves, and any particular needs of the Students, in terms of:
- a. cleanliness - all finishes must as a minimum achieve a basic level i.e. be non-porous, reasonably joint free (ceramic tile with epoxy-based grout and carpet tiles are both acceptable), with smooth welds in sheet materials; those rated 'high' within Table 6 shall have no dirt traps and shall incorporate coved skirting;
 - b. smoothness- with minimal abrasion characteristics against the skin;
 - c. sound absorption and transmission- ensuring good acoustic properties and performance floor finishes should be considered as a whole alongside other internal surfaces to achieve the performance criteria specified in BB93;
 - d. impact resistance;
 - e. slip resistance- ensuring minimal tripping hazards;
 - f. chemical and heat resistance- where the need is identified in the ADS;
 - g. static resistance- where the need is identified in the ADS, for example in the server room;
 - h. area elastic performance of A3 or A4 in sports or activity spaces;
 - i. durability- to BS EN ISO 10874: 2012;
 - j. suitability for Mobility Equipment users and others with a physical disability or sensory impairment;
 - k. colour and pattern – in terms of maintenance, way-finding and in Specially Resourced Provision and Designated Units, sensitivity; and
 - l. having a low Volatile Organic Compounds (VOC) finish.
- 2.8.16.4 Project Co shall provide and maintain suitable barrier matting at external entrances in order to remove dirt and moisture from the soles of shoes and wheeled traffic to assist with cleanliness of internal floor coverings. The draft lobby to the main Facility entrance shall have as a minimum: a 2.1m length of barrier matting in the direction of travel, in compliance with BS 7953:
- a. in entrances where high levels of ingress are expected (e.g. main Student entrance), Project Co shall demonstrate that the extent of barrier matting provided is based on an analysis of use; and
 - b. barrier matting shall be provided to any external doors in Foundation Phase Classrooms.
- 2.8.16.5 Barrier matting shall also:
- a. not present a hazard to the user in normal use and not become slippery when wet;
 - b. remove and retain moisture and dirt, preventing it being transferred to internal floor coverings;
 - c. be of a 'heavy duty' type, catering for high flow rates at key times within the Core Day;

¹⁹ BS 8203: 2001: Code of Practice for the installation of resilient floor coverings.
BS EN 14041: 2004: Resilient, textile and laminate floor coverings.

- d. be of a recessed or floor fixed type, except at external doors to Foundation Phase Classrooms where loose mats with a non-slip backing are permitted; and
 - e. not impede the movement of Mobility Equipment or non-ambulant Facility Users.
- 2.8.16.6 For any server room and hub rooms provided, Project Co shall provide anti-static flooring and all extraneous metal parts, including door frames, shall be electrically earth bonded.
- 2.8.16.7 Where retractable bleacher seating is provided, the floor finish shall be capable of carrying the weight of this equipment, with special attention paid to sprung floor construction loading abilities, and the point loads imposed by rollers used. The floor finish shall be homogenous, if vinyl, and shall be capable of resisting wear associated with this equipment.
- 2.8.16.8 Where timber floor finishes are provided they shall be finished with a 2-pack polyurethane flexible lacquer/sealant (no acrylic mixes).
- 2.8.16.9 where vinyl, lino or other surface sheet material is to be laid, the surface onto which the sheet is to be fixed shall be free of surface irregularities in line with BS 8203:2017 to standard SR1 set out in this British Standard; and in addition, trowel lines, adhesive comb lines, indentations, manufacturing and construction joints including volumetric module joints (where all these joints are not intended movement joints) shall not be visible or identifiable through the sheet covering when construction is complete.
- 2.8.16.10 All floors in General Teaching rooms and Circulation areas in Primary Schools shall be finished in lino, rubber, or vinyl in line with Table 6. Project Co shall supply for each General Teaching room a 3 x 3m carpet square mat with a weighted and ramped edging in order to minimise trip hazards.
- 2.8.16.11 All floors in Secondary Schools and College General Teaching rooms and Circulation areas shall be finished in carpet, lino, rubber, or vinyl in line with Table 6.
- 2.8.16.12 In Table 6, there are three levels of water resistance required, defined as follows:
 - a. water resistance 1 - to withstand a reasonable degree of spillage and dampness from footwear etc;
 - b. water resistance 2 - to allow frequent spillage or wetting without damage, staining or absorption. Requirements for resilience covered in BS EN 661 1995 and BS EN 662 1995; and
 - c. water resistance 3 - to allow regular wetting without damage, staining or absorption. Requirements for spreading of water covered in BS EN 661 1995 and BS EN 13553 for vinyl in wet areas.

TABLE 6 - MINIMUM PERFORMANCE REQUIREMENTS - FLOOR FINISHES

| BS EN 14041:2004 Essential characteristics always apply for rubber or vinyl Fire and smoke resistance dependent on fire strategy Min reflectance value (LRV) for all floors = 0.05 (5%) | | | Slip Resistance (Ramp test rating, or R value) | Slip Resistance Value (SRV) and surface roughness | BS EN 14041:2004 Electrostatic Rating | Heat Resistance | Area elastic (A3) sports floor to BS EN 14904: 2006 | BS EN ISO 10874:2012 European Flooring Use classification (for durability) |

| Floor Finishes | Description | Area | | | | | | |
| Type F6.2h | multi-purpose dining | multi-purpose hall, used for dining | Yes | Yes | No | No | High | Suitable for movable bleacher seating where specified |
| Type F7.3h | wet area | changing rooms, showers, toilets, Hygiene Rooms | Yes | Yes | Yes | Yes | High | Barefoot areas shall be 'barefoot slip resistance category B' |
| Type F8.4h | Kitchen | Kitchen preparation | Yes | Yes | No | Yes | High | |
| Type F9.2 | entrance | entrance lobbies | Yes | Yes | No | No | Moderate | Barrier matting |

2.8.17 Ceilings and Soffits

- 2.8.17.1 Project Co shall ensure that any ceilings and soffits are smooth and free from holes and that all service runs are neat and tidy and where visible painted or otherwise finished such that they do not specifically draw the attention of the room user.
- 2.8.17.2 Where ceilings or soffits are provided, the Project Co shall conform to the specifications listed in Table 7 for each space, to match the relevant code in the ADS. These requirements include moisture resistant ceilings in areas such as Kitchens, changing rooms, showers and toilets.

TABLE 7 - MINIMUM PERFORMANCE REQUIREMENTS - CEILING FINISHES

| Code | Area | Description | Hygrothermal performance |
|---|--|-------------|---|
| First digit: type: grid, monolithic, exposed soffit Second digit: hygrothermal letters Fire and smoke resistance dependent on fire strategy Acoustic treatment dependant on Acoustic Strategy Min reflectance value (LRV) for all ceilings = 0.7 (70%) | | | |
| Type C1.1 | all areas not subject to humid/ wet conditions or high hygiene requirements | general | clipped, grid ceiling or exposed soffit with exposed Service Infrastructure |
| Type C1.2 | food room, Kitchen preparation areas, Kitchen staff and store rooms, staff toilets | humid areas | clipped, grid ceiling with no exposed Service Infrastructure below |

| | | | |
|------------------|--|-------------|--|
| Type C2.1 | sports halls | robust | monolithic ceiling with no exposed Service Infrastructure or clipped, grid ceiling |
| Type C2.2 | student toilets, changing rooms and other areas where Students are left unattended | humid areas | monolithic ceiling with no exposed Service Infrastructure or clipped, grid ceiling |
| Type C2.3 | showers, Hygiene Rooms | wet areas | monolithic ceiling with no exposed Service Infrastructure |
| Type C3.2 | Plant Areas | humid areas | exposed soffit with exposed Service Infrastructure |

2.8.17.3 Project Co shall ensure that exposed soffits and ceilings are finished such that:

- a. they have a light surface with reflectance of more than 70%;
- b. where an exposed soffit is to be unpainted then the reflectance of the finished surface shall be used in the lighting calculations. It is likely an unpainted surface will have a lower reflectance than a painted surface;
- c. any finishes to the soffit should not compromise the thermal performance of the surface in relation to the radiant heat exchange;
- d. the acoustic performance of ceilings and soffits is considered as a whole alongside other internal surfaces, to satisfy Building Bulletin 93: 'Acoustic design of schools – performance standards' (BB93);
- e. where a concrete soffit is painted a high emissivity paint finish is required with emissivity >0.85;
- f. exposed soffits shall have a smooth finish, free from surface blemishes or shrinkage cracks with any jointing clean and precise to maintain the smooth finish; and
- g. weepholes to exposed concrete soffits shall be filled to maintain the smooth finish

2.8.17.4 Project Co shall ensure that:

- a. Service Infrastructure runs should be neat and tidy and typical Service Infrastructure coordination and layout drawings for all room types and corridors shall be provided; and
- b. Service Infrastructure and horizontal surfaces shall be accessible for cleaning.

2.8.17.5 Project Co shall ensure that where suspended ceilings are designed, specified and installed they will:

- a. be level and flush at joints, adequately secured and provide surface spread of flame performance in accordance with the relevant statutory codes;
- b. not be readily damaged by impact or be easily defaced;
- c. use insulation that is non-combustible, where provided;
- d. be easily levelled following access;

- e. be easy to maintain; and
 - f. have a low VOC finish.
- 2.8.17.6 Project Co shall provide moisture resistant ceilings in areas such as Kitchens, changing rooms, showers and toilets, as specified in the ADS.
- 2.8.17.7 Ceilings for unsupervised spaces such as WC and shower cubicles shall be continuous and monolithic or suspended with clips to keep tiles in place and to prevent unwanted access. Ceilings in areas that are supervised such as changing rooms and wash hand basin areas can be suspended in type, subject to moisture resistance criteria being satisfied.
- 2.8.17.8 Project Co shall ensure that ceilings within toilets and changing rooms are robust, moisture resistant, easy to clean and inaccessible to Students.
- 2.8.17.9 Ceiling finishes in Kitchen and food room areas should be capable of being cleaned to maintain a hygienic finish with no dirt traps.
- 2.8.17.10 Where equipment or plant is located within a false ceiling, a suitable, robust, permanent means of access for maintenance is provided.
- 2.8.17.11 In Specially Resourced Provision and Designated Units, Project Co must comply with the following additional requirements, where specified in the relevant Site Specific Brief:
- a. where specified in the ADS, ceilings are robust and inaccessible to Students;
 - b. where ceiling-mounted hoists or physiotherapy equipment are provided, tracking shall be coordinated with other ceiling Service Infrastructure and the ceiling structure is able to support the equipment and the person using the equipment; and
 - c. where specified in the ADS, ceilings in medical treatment rooms are homogeneous with recessed light fitting;
- 2.8.18 Decorations and Finishes
- 2.8.18.1 Project Co shall comply with the wall and floor finishes specified in the ADS. Project Co will need to consider acoustic properties and noise reduction capabilities in line with paragraph 2.9.67 when choosing wall and floor finishes.
- 2.8.18.2 Project Co shall ensure that decoration and finishes:
- a. fulfil the requirements in the ADS;
 - b. take account of safety and fitness for purpose;
 - c. are suitable for the activities taking place in the area, and for the age and any special needs of the occupants;
 - d. are able to withstand heavy usage and potential Malicious Damage typical of a School or College (as relevant)
 - e. Light surface marking to be removed using warm water and mild detergent only. Special cleaners or solvents should not be required to remove normal marking but may be used to remove graffiti such as permanent marker.;
 - f. are resilient to impact and minimise noise;
 - g. are easy to clean and maintain;
 - h. contribute to the level and quality of light in a space and ensure visual comfort, concrete soffits are painted white; and
 - i. shall have VOC limits that comply with Schedule 2 of the The Volatile Organic Compounds in Paints, Varnishes and Vehicle Refinishing Products Regulations 2012, SI 1715, 2012. For example, water-borne one pack performance coatings

shall have a maximum VOC content of 140g/l of ready to use product in accordance with The Volatile Organic Compounds in Paints, Varnishes and Vehicle Refinishing Products Regulations 2012, SI 1715, 2012..

- 2.8.18.3 Project Co shall also take account of the requirements of Students with SEN (D) and all those with disabilities, such as providing suitable colour schemes, textures and contrasts on walls, floors, stairs and doors to assist those with visual impairments to orientate themselves. Where children are especially vulnerable to infection, all surfaces shall be smooth and easy to clean to minimise the collection of dust and pathogens. Any specific requirements are given in the relevant Site Specific Brief.
- 2.8.18.4 Project Co shall ensure that all surfaces are appropriately prepared and smooth prior to the application of decoration and finishes and that decoration and finishes are not left in a rough, unfinished condition following completion of the Works.
- 2.8.18.5 Additionally, Project Co shall ensure that external finishes shall:
 - a. be durable and resistant to weathering; and
 - b. enable the easy removal of graffiti; and internal finishes should contribute to the level and quality of light in a space.
- 2.8.18.6 Project Co shall take account of the requirements of Students with SEN (D) and all those with disabilities, such as providing suitable colour schemes, textures and contrasts on walls, floors, stairs and doors to assist those with visual impairments to orientate themselves. In Specially Resourced Provision and Designated Units, where children are especially vulnerable to infection, all surfaces shall be smooth and easy to clean to minimise the collection of dust and pathogens. Anti-bacterial coatings may be necessary in places where there are children with health problems. Any specific requirements are given in the SSB.
- 2.8.18.7 Project Co shall ensure that minimum surface reflectance levels are to be as follows:
 - a. Walls: 0.5;
 - b. Painted and exposed soffits and ceilings in new or existing areas: 0.7; and
 - c. Floor: 0.05 and not higher than 0.4 to avoid scuff marks. Where areas of the room are carpeted the average surface reflectance of the floor can be reduced.
- 2.8.18.8 Daylight and visual amenity calculations should include light reflectance values for the actual floor finish chosen and for horizontal reflective surfaces, which can be of higher reflectance than the floor.
- 2.8.18.9 Project Co shall consider that lighter surface finishes will improve the visual quality of the space and will aid in delivering daylight deeper into the rooms where lit from one side.
- 2.8.18.10 For any analysis undertaken in relation to daylight the 70/50/50 reflectance's shall be used unless alternative reflectance's are known at the time of the design. The preference is always to use actual reflectance's in place of the 70/50/50 criteria. Floor reflectance and desk reflectance can be combined for daylight calculations; however, the combined reflectance for a carpeted room shall not exceed 20%.
- 2.8.18.11 Project Co shall ensure that the 60° gloss factor of window sills, furniture and flooring is less than 15%. This information shall be sourced from the manufacturers of the window sills, furniture or floor coverings.
- 2.8.18.12 Project Co shall ensure that ceiling and wall brightness is adequate to allow for visual comfort. In order to achieve this, ceilings should be lit such that the ceiling luminance is at least 30% of the illuminance on work surfaces. The light on the ceiling shall be delivered from a combination of direct and reflected light. Walls should be lit such that

the wall illuminance is at least 50% of the illuminance on the work surfaces. Light Reflectance Values (LRV) shall comply with the requirement for 30 percentage points of difference in contrast between foreground and background for visual orientation of pupils with visual impairments in accordance with Equality Act AD M

2.8.18.13 Where circumstances preclude the use of water-based paints, Project Co shall ensure that appropriate risk assessments and method statements are prepared and submitted to the Authority prior to the Actual Completion Date for all paints and coatings to ensure the safety of Students, staff, visitors and operatives who may be exposed to solvents and water-borne and solvent-borne materials.

2.8.18.14 Project Co shall ensure that decorations and finishes in Circulation spaces:

- a. are robust enough to withstand the impact of normal daily impact by Students' bags and shoes;
- b. are robust enough to withstand regular cleaning;
- c. the design of the walls in the Circulation spaces shall allow for touching up or for sections of wall to be maintained without the need to carry out works to the full wall to maintain an acceptable finish. For example corridor lengths can be split into manageable bays with dado rails, movement joints, expressed joints, etc or a type of finish can be chosen which allows for small areas to be repainted without spoiling the overall appearance of the wall;
- d. are water-borne unless use of solvent-borne finishes for particular uses are agreed with the Authority;
- e. heavy duty areas are classed as the walls within reach of Students (ie, up to at least 1.2m height for Primary Schools and 1.5m for Secondary Schools and colleges) in the following areas: corridors, stairways, student entrances and reception areas, halls, drama rooms, dining queues, science, DT, art, vocational spaces and stores.
- f. finishes in heavy duty areas shall be easy to clean. They shall be capable of achieving the minimum decoration cycle of 5 years in Table 1 before first repaint. The minimum expected standard of performance of the wall finish in heavy duty areas shall be as:
 - a. Dulux , Crown or Johnstones: high performance, durable trade acrylic eggshell, single pack clear or coloured protective performance coating or single pack protective performance glaze over the manufacturer's approved base;
 - b. approved trade performance coating;
 - c. approved durable high performance wall finish;
 - d. a trade high performance easily cleanable durable acrylic matt finish if agreed with the employer;
- g. all colours should be agreed with the Authority. Brilliant white should be avoided in main corridor areas and replaced with either an off white, or colour as agreed with the Authority;
- h. normal duty areas are those areas not classed as heavy duty. Normal duty areas shall be finished in a minimum of a trade high performance matt acrylic paint;
- i. where water-based paints are used there shall be a minimum requirement for wall paints to be tested under BS EN 13300 and gain a class 1 classification using the BS EN ISO 11998 test method or a class C classification using the BS 7719 test method;

- j. In areas subject to humidity such as changing rooms mould resistant finishes shall be used;and
 - k. No products shall be used that require disposal of excess paint or solvent used in cleaning at hazardous waste sites. All empty cans should be recycled using the appropriate can-recycling scheme through the applicable paint merchant.
- 2.8.18.15 Corners that are exposed in heavy duty areas, and on columns, shall be protected with upvc or stainless steel corners glued to the substrate. Where there are graphics on the wall transparent corner pieces may be needed.
- 2.8.18.16 In Table 8, there are three levels of finish specified, which are defined as follows:
 - a. Finish 1 - impervious - able to resist the penetration of water, solutions containing detergents, disinfectants and other liquids likely to be encountered in School or College buildings;
 - b. Finish 2 - jointless / flush impervious joints - without joints, or having joints that are sealed by methods which make the whole surface impervious and prevent the collection of dirt and bacteria; and
 - c. Finish 3 - smooth - no coarser than brush-applied matt emulsion paint on a flat plastered surface without projections, indents or holes part-way through the material.
- 2.8.18.17 Project Co shall refer to the SSB for any additional requirements for Students with SEN (D), such as colour or texture and may seek paint manufacturer assistance for colour schemes.
- 2.8.19 Basin splashbacks
 - 2.8.19.1 A splashback or an upstand shall be provided to a minimum height of 300mm above all basins, wash troughs and sinks, and shall be formed from water resistant, cleanable, and durable materials.
- 2.8.20 Workmanship
 - 2.8.20.1 High performance primers shall be used on corner edge beading of plastered walls.
 - 2.8.20.2 The painting contractor shall apply the dry wall sealing primer coat to all plasterboard walls, not the plastering contractor.
 - 2.8.20.3 NBS M60 paint finish specifications shall be certified as suitable by the paint manufacturer and shall be accompanied by full manufacturers paint specifications. Manufacturers' specifications shall include information that shall be included in the Building Users Guide on the means of day to day cleaning and removal of graffiti and more stubborn marks. This shall include the types of sponges/cloths/wipes and solvents that can be used.
 - 2.8.20.4 Manufacturers specifications shall include instructions for repair of damage such as gouges and scratches and loss of sheen due to cleaning of stubborn marks. The finishing schedules shall include mist out and bring forward filled areas. Mist or primer coat to be a suitable product to compliment the top coats in-line with manufacturers' guidelines for standard plasterboard substrates or a fully dry board and skimmed surface. PVA shall not be used to seal plasterboard surfaces for painting.
 - 2.8.20.5 Where surface spread of flame needs to be controlled, generally providing a Class O fire rating, refurbishment projects shall have a flake test carried out by the paint manufacturer to determine if the fire resistance of the paint finish requires a specialist flame retardant coating system to be applied.

- 2.8.20.6 Paint shall not be applied when the ambient or substrate temperature is below 8°C. The humidity level of the substrate shall be tested before paint application and shall be recorded. Painting shall not take place if the substrate humidity level is below manufacturer's recommendations.
- 2.8.20.7 Sample rooms shall contain benchmark paint finishes and shall be approved by the manufacturer. The manufacturer shall also be asked to carry out programme checks during paint application.
- 2.8.20.8 The O&M manual shall include a schedule of paint finishes together with:
- the contract paint specifications including colour codes for all surfaces in all types of spaces;
 - instructions for day to day cleaning and removal of graffiti and more stubborn marks. This shall include the types of sponges/cloths/wipes and solvents that can be used;
 - instructions for repair of damage such as gouges and scratches and loss of sheen due to cleaning of stubborn marks; and
 - instructions for redecoration

TABLE 8 MINIMUM PERFORMANCE REQUIREMENTS - WALL FINISHES

| First digit: impervious, jointless, smooth second digit: hygrothermal 1-3 letters: - | Fire and smoke resistance dependent on fire strategy | | Finish 1 - Impervious | Finish 2 - Jointless / flush impervious joints | Finish 3 - Smooth | Hygrothermal performance |
|--|--|-------------------------|-----------------------|--|-------------------|--------------------------|
| | Acoustic treatment dependant on Acoustic Strategy | | | | | |
| | Min reflectance value (LRV) for all walls = 0.5 (50%) | | | | | |
| Type | Area | Description | | | | |
| Type W1.1 | all areas not subject to humid/ wet conditions or high hygiene requirements including classrooms | general | N/A | N/A | yes | normal |
| Type W2.1 | science laboratories, science prep rooms, Dining and Social and sandwich areas | science | yes | N/A | yes | normal |
| Type W2.2 | cleaners' stores, Kitchen staff and store rooms, toilets, changing rooms, chemical stores | humid areas and toilets | yes | N/A | yes | humid |
| Type W3.2 | food room, Kitchen preparation, MI, sick bay | humid | yes | yes | yes | humid |
| Type W3.3 | showers | wet areas | yes | yes | yes | wet |

| | | | | | | |
|---|---|--------------------|------------------------------|--|--|---------------------------------|
| First digit: impervious, jointless, smooth second digit: hygrothermal 1-3 letters: - | Fire and smoke resistance dependent on fire strategy | | Finish 1 - Impervious | Finish 2 - Jointless / flush impervious joints | Finish 3 - Smooth | Hygrothermal performance |
| | Acoustic treatment dependant on Acoustic Strategy | | | | | |
| | Min reflectance value (LRV) for all walls = 0.5 (50%) | | | | | |
| Type | Area | Description | | | | |
| Type W4.1 | all areas not requiring a smooth wall finish, such as DT workshops and DT prep rooms, plant rooms | rough | N/A | N/A | no | normal |
| Type W5.1 | Circulation, corridors | Circulation | N/A | average-flush jointed fair faced dust sealed or painted blockwork acceptable | average-flush jointed fair faced dust sealed or painted blockwork acceptable | normal |
| Type W6.1 | sports hall (up to 3.2m above FFL) | sports | N/A | average-flush jointed painted blockwork acceptable | average-flush jointed painted blockwork acceptable | normal |

2.9 Indoor Environmental Requirements

- 2.9.1 Project Co shall ensure that the design of the internal environmental conditions of all spaces meet the requirements in these ACRs, Building Bulletin 93: 'Acoustic design of schools – performance standards' (BB93) and the requirements within this section.
- 2.9.2 Project Co shall ensure that the design provides suitable, comfortable environmental conditions for all occupied spaces, including good lighting with optimum use of daylight, good air quality and acoustics, unobstructed ventilation and suitable temperatures throughout the year.
- 2.9.3 Project Co shall ensure that there is an appropriate level of local control over ventilation, heating, glare and light levels, and the needs of very young and vulnerable children and young people shall be taken into account.
- 2.9.4 Project Co shall develop the environmental design strategy in parallel with planning the Site and designing each Building's form and fabric to deliver comfort to the Facility Users in both winter and summer. Project Co shall employ an integrated design approach which takes account of local site conditions and exploits natural resources like daylight, ground temperature, night time air temperature, solar energy, rainfall and wind. Project Co shall choose environmental strategies that are appropriate for the level of expertise of the Facility Users and the Facility Premises Team.
- 2.9.5 In Designated Units or Specially Resourced Provision, Project Co shall take account of the particular needs of the Students, as specified in the relevant Site Specific Brief. For example, some children may be more sensitive to light or to infection or need higher levels of sound insulation.
- 2.9.6 Project Co shall ensure that internal spaces and engineering systems shall be designed and constructed to meet the ADS, ACRs, Availability Standards and other Service Level Specification requirements including the PIU Targets for light quality, room temperatures, ventilation and indoor air quality, acoustics, described in the Services Level Specification, Annex 1, and energy efficiency and functionality requirements so that all spaces are available and fit for purpose.
- 2.9.7 Daylight and lighting
- 2.9.7.1 Project Co shall ensure that the quality of light provided supports a positive teaching and learning environment. Project Co shall ensure that any lighting system provided:
- a. creates a sufficient, effective and pleasant visual environment whilst minimising glare;
 - b. meets the needs of Students with SEN (D) as required in these ACRs;
 - c. exploits energy saving opportunities without compromising the quality of the visual environment; and
 - d. employs low maintenance solutions.
- 2.9.7.2 These criteria shall be read in conjunction any additional requirements in these ACRs.

- 2.9.7.3 Project Co shall ensure that the lighting design complies with Law and Part L²⁰ and takes account of best practice guidance²¹ and Good Industry Practice. In addition, Project Co shall ensure that the design provides good visibility for all teaching activities, in particular for whole class presentations using the whiteboard, which is one of the most demanding visual tasks. Project Co's design shall provide that the visual environment is under the control of the teacher and light shading devices and dimming controls are important to achieve this.
- 2.9.7.4 Project Co shall ensure that the design:
- a. integrates the design of daylight and electric light to provide a comfortable environment and minimise energy use;
 - b. provides controls for daylight and electric light to suit activities and control glare, that are easy to use and effective;
 - c. provides ways of controlling the effects of direct sunlight, to create a balance of useful internal illuminance in the teaching space and avoid excessive summertime overheating;
 - d. provides ways of allowing the whiteboard to be viewed clearly and without reflections whilst retaining a space which is predominantly daylit;
 - e. provides ceiling and wall brightness adequate for good visual comfort;
 - f. provides an electrical lighting solution which creates a bright ambient lighting level and in particular good lighting levels on the faces of the teachers and Students;
 - g. provides views from occupied rooms to the outside or, where this is not possible, across an internal space (without obstructions) to a distance of at least 10m to help avoid eye strain;
 - h. incorporates energy efficient lighting and controls to reduce energy use; and
 - i. includes emergency lighting, where specified in the relevant Site Specific Brief.

2.9.8 Daylight Design

- 2.9.8.1 Project Co shall optimise the Building form and orientation with respect to daylight provision, views out and views of the sky. In doing this the design should maximise the number of spaces where daylight is provided from two or more sides, or by roof lights, since it is possible for these spaces to be substantially daylit for the majority of the Academic Year.
- 2.9.8.2 In rooms with single sided daylighting it may be necessary to increase the ceiling heights and window head heights to achieve the daylight performance specified below.
- 2.9.8.3 If the room must be extended in depth, then secondary daylight from an atrium or rooflight will be required and/or the room height will need to be increased with a higher percentage of glazing used.
- 2.9.8.4 Window heads must be no more than 200mm from the finished head to the underside of the ceiling or soffit.
- 2.9.8.5 Project Co shall ensure that the annual provision of daylight in a space is to be predicted directly using climate-based daylight modelling (CBDM) as described in Section 3.3.1 of LG5²², or similar methods that take into account the effects of direct and indirect sunlight

²⁰ Part L, AD L2A and AD L2B, and The Non-domestic Building Services Compliance Guide.

²¹ Lighting Guide 5 (LG 5): Lighting for Education, available from the society of Light and Lighting.

²² Lighting Guide 5 (LG 5): Lighting for Education, available from the society of Light and Lighting.

and can provide better modelling of daylight than daylight factor calculations. Project Co must produce calculations for main spaces designed to be substantially daylit, e.g. Halls and each teaching space type and orientation.

- 2.9.8.6 CBDM provides two key measures on which spaces will be accessed as compliant. Daylight Autonomy (DA) and Useful Daylight Illuminance (UDI).
- 2.9.8.7 Note: CBDM takes precedence over any requirement for daylight factor-based design, e.g. as referred to in BREEAM.
- 2.9.8.8 Table 9 below specifies the performance criteria for daylight.
- 2.9.8.9 Percentages of spaces are defined by room quantities not area. For example, 80% of total teaching spaces, refers to 80% of the quantity of these spaces in the new Buildings.
- 2.9.8.10 It is recognised that the primary performance criteria may not be able to be met in every space. Where the primary performance criteria are not met, spaces are expected to be as close to full compliance as is feasible and daylight access is required in Basic Teaching spaces (excluding drama studios), Halls, Dining and Social and PE spaces, Libraries and permanently occupied Administration offices. See Table 9.
- 2.9.8.11 Daylight access shall be demonstrated through spaces receiving daylight directly or indirectly that enhances the visual environment. The level of daylight access provided shall take into account the activities in the space. For Basic Teaching spaces (except drama studios), it should be as near the DA and UDI levels quoted as possible.
- 2.9.8.12 For Halls, Dining and Social and PE spaces, Libraries, corridors and Circulation areas a lower level of daylight is acceptable to provide daylight access, see Table 9
- 2.9.8.13 Basic Teaching spaces calculation plane heights shall be 550 mm for Primary Schools and 700 mm for Secondary Schools and Colleges.
- 2.9.8.14 Daylight Autonomy and Useful Daylight Illuminance is to be calculated based on daily occupation of spaces from 08:30 – 16:00.
- 2.9.8.15 In refurbishment projects the CBDM analysis should be carried out for sample rooms and the aim should be to achieve the UDI-e for a new Building, i.e. illuminance above 2000 Lux for no more than 20% of the time, whilst achieving as good UDI and DA as is feasible given the constraints of the Existing Building.

TABLE 9 DAYLIGHT PERFORMANCE CRITERIA BY AREA TYPE

| Types of space | ADS code | Spaces requiring primary performance criteria | Primary performance criteria | | Requirements for spaces that do not meet primary performance criteria |
|---|----------|---|---|---|--|
| | | | Daylight Autonomy (sDA) | Useful Daylight Illuminance (UDI) | |
| Basic Teaching spaces (excluding drama studios); and Administration offices | L1 | 80% of spaces | 300 lux on task planes for 50% of occupied hours. To be achieved for 50% of the task plane. | 100-3000 lux to be achieved on average, for 80% of the time across the task plane, during occupied hours. | Daylight access required to achieve levels as near to those for compliant spaces as possible and visual connection to adjoining daylit spaces to provide visual comfort. |

| Types of space | ADS code | Spaces requiring primary performance criteria | Primary performance criteria | | Requirements for spaces that do not meet primary performance criteria |
|--|----------|---|------------------------------|--|---|
| | | | Daylight Autonomy (sDA) | Useful Daylight Illuminance (UDI) | |
| Halls; Dining and Social and PE spaces; large study areas and social spaces; and Libraries | L2 | 75% of spaces | No requirement | 100-3000 lux to be achieved, on average, for 80% of the time across the task plane, during occupied hours. | Daylight access |
| Group rooms and study areas; Staff Areas and offices; conference and meeting rooms | L3 | 60% of spaces | No requirement | 100-3000 lux to be achieved, on average, for 80% of the time across the task plane, during occupied hours. | None |
| Circulation, Kitchen preparation areas; changing rooms | L4 | Stairwells, and wherever possible elsewhere | Daylight access required | | None |
| Store rooms; toilets and Hygiene Rooms; other Kitchen areas; Plant Areas; and kiln rooms | L5 | 100% of spaces | No requirement | | n/a |
| Drama studio, dark room, control room, sensory room | L6 | 100% of spaces | Daylight to be excluded | | n/a |

2.9.9 Daylight Autonomy

2.9.9.1 This is the percentage of time a point in a space can expect to reach or exceed a target illuminance level on the working plane.

2.9.10 Useful Daylight Illuminance

2.9.10.1 UDI is defined as the annual occurrence of illuminances, for the hours of operation, across the work plane that are within a range considered “useful” by occupants. The UDI measurement is divided into three elements;

- a. UDI-s = UDI-supplementary, i.e. additional task lighting may be required;
- b. UDI-a = UDI-autonomous, i.e. the daylight illuminance should be sufficient for task; and
- c. UDI-e = UDI-exceeded, i.e. daylight illuminance may be higher than preferred causing occupants to lower blinds.

2.9.11 Shading Devices

2.9.11.1 Project Co shall also ensure that the design allows for the following:

- a. blinds or other means of solar glare and daylight control shall be provided to all exterior glazing (including rooflights) in all Basic Teaching spaces, Learning Resource Areas and Staff Areas (L1, L2 & L3). The type of blind(s) employed will be dependent on factors such as window orientation, daylight performance and visual environment requirements of each space. The blinds shall not adversely affect the ventilation of the space. Blinds are expected to be used in either a fully up or fully down (undeployed or fully deployed) by the user for the purposes of glare control, and the Daylight modelling calculations undertaken by the Project Co shall reflect this, i.e. partially drawn blinds will not be allowed. For horizontal or vertical adjustable blinds, the calculations may assume that the blinds are deployed and set to allow glare free useful daylight penetration;
- b. external shading devices such as brise soleil, overhangs, louvres or vertical fins, and/or an internal blind solution such as venetian, vertical or roller blinds (screen, blackout, etc.) are acceptable. However vertical blinds shall not be used in teaching areas or any areas generally accessible to Students as they can be easily damaged;
- c. roller blinds should not be used to control glare where the window facing, or orientation receives direct sunlight during the occupied part of the Core Day, and where deployment will block out useful daylight. Where roller blinds are used, the material shall be a screen (dim-out) type with a total visible light transmittance of 5-7%. The exception to this requirement is given below. In rooms where the blinds are for solar glare control, i.e., not north facing Classrooms, the openness of the weave of the material shall not be greater than 3%;
- d. blinds can have a higher overall transmission and a higher openness or can be excluded, if Project Co can demonstrate that the visual environment will be adequate. The primary method of demonstration is by showing that the glazing orientation is within 15 degrees of absolute North and all visual display equipment in the space can achieve a contrast ratio of at least 3000:1. Alternatively Project Co may provide a disability glare analysis to justify the choice of blinds with a higher transmission or the exclusion of blinds on a particular façade;
- e. roller blinds shall be provided in science laboratories and science studios to allow for black-out for experiments. They shall have a maximum transmittance of 5%, a maximum openness of 1% and side tracks to limit light spillage at the edges of the blinds. Alternatively, black-out blinds with no side runners may be used if they oversail the opening;
- f. sports halls require solar glare control. Where there are rooflights, the use of a diffusive glass is an acceptable alternative to blinds as long as Project Co coordinates the rooflight layout with the layout of the sports courts and provides a disability glare assessment to show that the rooflights are positioned to avoid solar glare (e.g. they are located between badminton courts);
- g. drama studios may be daylit as long as it is possible to exclude daylight using blackout blinds or curtains;
- h. window ventilation openings should not be obstructed by blinds or curtains when these are opened;
- i. where dim-out blinds are required, they should provide a suitable daylight illuminance in the space and should not restrict ventilation;
- j. where acoustic panels are placed in the room then the panels shall not negatively interfere with the daylight distribution and in particular they shall not restrict the distribution of daylight to the rear of the room; and
- k. sports halls and main halls shall be day-lit.

2.9.12 Glare

- 2.9.12.1 Project Co shall ensure that the design minimizes glare as this is very important for accomplishing difficult visual tasks such as viewing whiteboards or projected images and for viewing screens. Project Co shall ensure that the design enables control of daylight glare on computer monitors, whiteboards and projection screens and to ensure that the teacher or speaker need not face glare sources or be seen against a glare source. If this is not done the familiar “blinds down - lights on” scenario will result in poor visibility, high lighting energy consumption and minimal use of daylight.
- 2.9.12.2 Project Co shall also take account of any special requirements that Students may have, such as having a visual impairment.
- 2.9.12.3 Project Co shall ensure that the design of the space should first take into account the position of the whiteboard, smart board or projector. The daylight design and control of the daylight should then respond to the display equipment positions and the viewing angles of the Students. Project Co shall meet the requirements for day-lighting and shall not provide a “blinds down, lights on solution”.
- 2.9.12.4 In designing the Building, Project Co shall also consider the following and advise the Authority and each School Entity in the case of a School(s) project] on the type of equipment to purchase and the limitations of Legacy Equipment:
- a. the intensity and contrast ratio of the smart board or projector will play a big role in the clarity and comfort for the viewer. Equally the viewing angle is critical;
 - b. the brighter the screen, the higher the ambient lighting can be before blinds need to be closed. However, brighter screens generally mean more powerful lamps with consequent increases in energy consumption. For new installations, the brightness of the screen when presented with a white image should be in the range of 300 to 600 cd/m². The brightness from any seated viewing position in the room should not be less than 300 cd/m². The diffuse and specular properties of the screen material need to be carefully considered to ensure that there is not a direct view of the light source which would wash out the image, nor that the brightness and clarity of the surface reduces with acute viewing angles;
 - c. for existing installations, the brightness may be as low as 50-80 cd/m² and the preference would be to replace the Legacy Equipment. If this is not possible, control of the daylight and ambient light needs to be considered to ensure the presentation is not washed out and unclear; and
 - d. the contrast ratio of new equipment should be at least 3000:1.
- 2.9.12.5 Project Co shall ensure that wherever possible, to improve visual contrast, ceilings are to be light coloured and window frames, bars and reveals are to be light coloured or white and splayed. A light colour would be in the range of reflectance of 0.7 to 1.0. The window wall in particular should be light in colour.

2.9.13 Internal lighting systems

- 2.9.13.1 An interior lighting system shall be provided in accordance with the criteria given in these ACRs.
- 2.9.13.2 Where Unified Glare Rating (UGRL) calculations are not possible, compliance shall be demonstrated through luminaire intensity being limited to 3000 cd/m² above 65 degrees from a downward vertical.
- 2.9.13.3 In Basic Teaching spaces, Learning Resource Areas and storage areas, surfaces shall be illuminated in accordance with Table 11 below.

2.9.13.4 For SEN (D) areas and exclusion rooms tuneable white lighting should be provided to help provide a calming environment.

TABLE 10 INTERIOR HORIZONTAL AND CYLINDRICAL ILLUMINATION CRITERIA

| Types of Space | Horizontal Illuminance | | | Cylindrical Illuminance (WP height 1.2m) | | Glare | ADS Code |
|--|--------------------------------------|-------|----------------------------------|---|-------|------------------|----------|
| | \bar{E}_m lx | U_o | Task height (m) | \bar{E}_z lx | U_o | UGR _L | |
| Primary Classrooms and specialist spaces and group rooms | 300 | 0.6 | 0.55 | 150 | 0.1 | 19 | a |
| Secondary and College Basic Teaching and group rooms | 300 | 0.6 | 0.70 | 150 | 0.1 | 19 | b |
| Practical spaces where higher lighting level is needed: D&T workshops and preparation rooms, art rooms, science laboratories and science Preparation areas, Vocational Teaching classbases and preparation rooms | 500 | 0.6 | 0.85 | 150 | 0.1 | 19 | c |
| Libraries / study areas | 300 200 for shelving | 0.6 | 0.7 On vertical edge of books | 150 | 0.1 | 19 | d |
| Darkrooms ⁽¹⁾ | 200 | 0.6 | 0.85 | 50 | 0.1 | 19 | e |
| Sensory rooms ⁽²⁾ | 200 | 0.6 | 0 | 50 | 0.1 | 19 | f |
| Control rooms | 300 | 0.6 | 0.7 | 150 | 0.1 | 19 | g |
| Dining/ Canteen and Social areas | 200 | 0.4 | 0.7 | 50 | 0.1 | 22 | h |
| Main halls, lecture theatres, primary halls, drama, dance, activity and fitness studios | 300 (switchable to 500 for exams) | 0.6 | 0 (0.7 for exams) | 100 | 0.1 | 19 | i |

| Types of Space | Horizontal Illuminance | | | Cylindrical Illuminance (WP height 1.2m) | | Glare | ADS Code |
|--|-----------------------------|-------|-------------------------|---|-------|------------------|----------|
| | \bar{E}_m lx | U_o | Task height (m) | \bar{E}_z lx | U_o | UGR _L | |
| Sports halls | 500 switchable to 300 | 0.6 | 0 (0.7 for exams) | 100 - 150 | 0.1 | 22 | j |
| Staff and Administration offices, including reception area | 300 | 0.6 | 0.75 | 50 | 0.1 | 19 | k |
| Storage (excluding preparation rooms) | 100 | 0.4 | 0 | - | - | 25 | l |
| Kitchen preparation and servery areas | 500 | 0.6 | 0.9 | - | - | 22 | m |
| Circulation | 100 | 0.4 | 0 | 50 | 0.1 | 25 | n |
| Lockers, cloakrooms toilets and changing, | 100 | 0.4 | 0 | - | - | 25 | o |
| Plant Areas and server room | 200 | 0.4 | 0 | - | - | 22 | p |

Notes
(1) General lighting installation to be duplicated with a safelight installation for print development
(2) Additional specialist SEN (D) lighting is required

TABLE 11 SURFACE ILLUMINATION CRITERIA

| Areas | Vertical Illuminance | |
|------------------------|--|-------|
| | \bar{E}_m lx | U_o |
| Whiteboards | 150 | 0.6 |
| Shelving and racking | 100 | 0.4 |
| Teaching spaces: walls | 50% of horizontal task illuminance or E_v min>100lx | 0.1 |
| ceilings | 30% of horizontal task illuminance or E_h min>50lx | 0.1 |
| Offices: walls | 75 | 0.1 |
| ceilings | 50 | 0.1 |

| | | |
|--------------------|----|-----|
| Circulation: walls | 50 | 0.1 |
| ceilings | 30 | 0.1 |

- 2.9.13.5 Project Co shall ensure that the maintained illuminance levels should comply with CIBSE Lighting Guide 5 (LG5): Lighting for Education. Calculations of the maintained illuminance shall utilise maintenance factors which are relative to the relevant Site, the rooms, the luminaires and the lamps selected. Default software maintenance factors shall not be used simply to avoid calculating the actual figures.
- 2.9.13.6 Project Co shall ensure that the ceiling is illuminated in accordance with CIBSE LG5 and recessed luminaires are avoided. Within corridors vertical illuminance should also be considered as detailed within Table 11 above.
- 2.9.13.7 Project Co shall ensure that luminaire layouts are co-ordinated with ceiling and structural planning grids to facilitate the relocation of partition walls within each Suite of Spaces. Switches are easily reconfigurable, and luminaires easily repositioned.
- 2.9.13.8 Project Co shall also design the Building so that:
- a. teacher's boards shall be adequately lit to ensure good visibility when used for whole class presentation;
 - b. the number of different types of luminaires shall be limited to ease maintenance; and
 - c. lighting should not be located over pools, where it is difficult and costlier to repair and replace.
- 2.9.13.9 Where higher levels of illuminance are identified in the ADS or relevant Site Specific Briefs for more visually demanding tasks, such as for office desks, task lighting should be provided, wherever possible. Task lighting includes a ceiling recessed, surface or suspended luminaire dedicated to a particular task, a floor standing luminaire local to the task or a table mounted luminaire local to the task.
- 2.9.13.10 Where a number of functions take place in the same space Project Co shall ensure that the lighting is suitable for the range of activities specified. Where the activities have conflicting lighting requirements, priority should be given to the main function of the space. The lighting solution within larger spaces should add to the visual aesthetics of the environment along with achieving the required lighting levels.
- 2.9.13.11 Project Co shall provide switching for sports halls where some activities require higher lighting levels so as to achieve both higher and lower lighting levels and the default shall be the lower level.
- 2.9.13.12 Project Co shall supply cages to all electrical equipment in areas where impact from sports games is likely.
- 2.9.14 Lighting Efficiency
- 2.9.14.1 Project Co shall produce Lighting Energy Numeric Indicator (LENI) predictions for the energy performance of the Buildings in accordance with the methodology described in BS EN 15193²³ with a total LENI for all internal lighting and separate LENI calculations for each of the room types identified in the ADS and SoA. The LENI prediction figures form the basis for auditing the energy performance and consumption of the internal lighting

²³ BS EN 15193: 2007 – energy performance of buildings – energy requirements for lighting.

systems in the Final Baseline Energy Model and In-Use Energy Model, and will be used by Project Co to compare energy performance and consumption with the design intent, and will be reported to the Authority as part of the breakdown of the annual energy performance figures provided to the Authority.

- 2.9.14.2 Project Co shall ensure that the maximum lighting energy load in Classrooms, General Teaching spaces and Practical Teaching spaces shall be less than 1.4W/m²per 100 lux of illumination.
- 2.9.14.3 In order to monitor the maximum lighting load and the LENI, the internal lighting is separately metered.
- 2.9.14.4 Lighting equipment for interior environments shall be provided in accordance with the criteria given in Table 12 below. LED lamps shall be used where possible to improve the life of the installation and help maintenance in line with CIBSE guide M. Fittings shall be selected to allow for the LED lamp to be replaced rather than the whole fitting.

TABLE 12 LIGHT SOURCE CRITERIA FOR INTERIOR ENVIRONMENTS

| Criteria | LED | Non-LED ⁽³⁾ |
|---------------------------|--|---|
| Colour | CCT: 3500 to 4000K CRI: >=80 MCAD: 3 | CCT: 3500 to 4000K CRI: >=80 MCAD: 5 |
| Efficacy | Greater than 90 luminaire lumens per circuit Watt | Greater than 90 luminaire lumens per circuit Watt |
| Design Life | Rated life: >30,000 hours <u>Occupied Spaces</u> L:80%, B10% @ >= 50,000 hours, 25°C ambient <u>Unoccupied spaces</u> L70, B50 @ >= 30,000 hours, 25°C ambient | Rated life: 20,000 hours min Lamp survival factor: 80% Lamp lumen maintenance factor: 80% |
| Driver | Power Factor: > 0.9 Flicker factor: <15% Dimming range: 1-100% | Power Factor: > 0.9 Frequency: 16,000Hz min Dimming range: 1-100% |
| IP | General Areas: IP2X WCs, science areas: IP44 Plants Space: IP65 | |
| Luminaire Warranty Period | 5 years ⁽¹⁾ | 5 years ⁽²⁾ |
| Notes | | |

| Criteria | LED | Non-LED ⁽³⁾ |
|----------|--|------------------------|
| | (1) For luminaires using LED sources the warranty shall include all LEDs, componentry, optics and body (2) For luminaires to include all major componentry (3) Non-LED fittings must not be used unless expressly agreed in writing with the Authority | |

2.9.14.5 Project Co shall provide external lighting systems that:

- a. ensure safe pedestrian and vehicular access;
- b. are designed in accordance with LG5: covering car parks; sports facilities; walkways and roads; entrances; particular building features such as cycle stores, outbuildings and refuse collection areas; and security requirements;
- c. support community use of the Building and facilities;
- d. is provided with central BMS timeclock controls and daylight level photocell controls; and
- e. minimise light pollution (for example due to sports facilities or security lighting) and ensure light levels are kept within the limits as required by BS 5489 and to meet the requirements of BREEAM and avoid nuisance to the adjacent neighbourhood.

2.9.14.6 If required in the relevant Site Specific Brief, Project Co shall provide underground ducts to enable the future provision of floodlighting to MUGAs.

2.9.14.7 Lighting equipment for exterior environments shall be provided in accordance with the criteria given in Table 13. LED lamps shall be used where possible to improve the life of the installation and help maintenance in line with CIBSE guide M. Fittings shall be selected to allow for the LED lamp to be replaced rather than the whole fitting.

TABLE 13 LIGHT SOURCE CRITERIA FOR EXTERIOR ENVIRONMENTS

| Criteria | LED | Non-LED ⁽³⁾ |
|-------------|---|--|
| Colour | CCT: 3000 to 4000K CRI: 60 MCAD: 5 | CCT: 3000 to 4000K CRI: 60 MCAD: 5 |
| Efficacy | Greater than 90 luminaire lumens per circuit Watt | Greater than 90 luminaire lumens per circuit Watt |
| Design Life | Rated life: 30,000 hours L:80%, B10% @ >= 50,000 hours, 25°C ambient | Rated life: 20,000 hours LSF: 80% LLMF: 80% |
| Driver | Power Factor: > 0.9 Flicker factor: < 15% Dimming range: 10-100% | Power Factor: > 0.9 Flicker factor: > 15% Dimming range: 10-100% |
| IP | Exterior Areas: IP65 | |

| | | |
|---|------------------------|------------------------|
| Warranty Period | 5 years ⁽¹⁾ | 5 years ⁽²⁾ |
| <p>Notes:</p> <p>(1) For luminaires using LED sources the warranty to include all LEDs, componentry, optics and body</p> <p>(2) For luminaires to include all major componentry</p> <p>(3) Non-LED fittings must not be used unless expressly agreed in writing with the Authority</p> | | |

2.9.14.8 Project Co shall ensure that the design and installation of lighting equipment takes account of the relevant parts of the following standards (or updated documents if relevant). Where criteria are conflicting, precedence shall be given to the most recent publication:

- a. BS EN 60598 Luminaires (and all relevant subsections);
- b. IEC 62717 LED-modules for general lighting - Performance requirements;
- c. IEC 62722-2-1 Particular requirements for LED luminaires; and
- d. Building Regulation AD L.

2.9.15 Lighting Controls

2.9.15.1 Project Co shall ensure that each space provided has an appropriate control strategy that will optimise the teaching and learning experience and minimise energy consumption. Project Co shall provide user override and control over all automated systems throughout.

2.9.15.2 In order to meet the maximum allowable LENI energy consumption for internal lighting in the School/College, Project Co shall provide effective and appropriate lighting controls.

2.9.15.3 Project Co shall ensure that controls and switching suit both the operational requirements of each School/College and the energy efficiency requirements. In general, Project Co shall ensure that lighting does not switch on automatically. In toilets however, the lights may be switched on automatically.

2.9.15.4 Project Co shall ensure that daylight level and presence detection controls and systems are designed to suit the intended occupancy patterns and to take account of daylight calculations. In addition, Project Co shall ensure that the design allows for:

- a. automatic absence detection or time controls to switch lights off in unoccupied rooms;
- b. short term manual overrides with their function clearly indicated; and
- c. the organisation of the lighting circuits to relate to the daylight distribution and to the use of the space.

2.9.15.5 Occupancy sensing controls sensors should be provided for each row of lights in Basic Teaching spaces. Sensors should be located and positioned to ensure that hand movement of occupants is picked up in all areas of the room. Light switches to be located adjacent to doors from corridors, and to be operable by Facility Users. Short term manual over-ride facilities to be provided for any automatic lighting controls. Dimming to be provided to reduce the lighting level in spaces fitted with data projectors or interactive whiteboards.

- 2.9.15.6 Automatic dimming and daylight control will usually be needed to meet the required LENI. Where LEDs are dimmable the Project Co shall ensure that the percentage of flicker is less than 15%. For SEN(D) spaces this should be further reduced, to avoid altogether it is advised that the overall lighting level could be reduced by turning off luminaires rather than dimming them.
- 2.9.15.7 Project Co shall provide luminaires switched in rows, via PIR and/or Photocell away from windows so as to be dimmed in response to the presence and the availability of daylight up to a point where they can then be switched off during the daytime. The dimming of daylight requires separate control for each row of lights parallel with the window wall up to a room depth where daylight illuminance reduces to less than 100 lux. Daylight control sensors shall be located where they correctly sense the levels of daylight in the room.
- 2.9.15.8 Automatic lighting controls shall be provided to all spaces except stores in order to facilitate control of the visual environment and energy savings, to comply with AD L and to achieve BREEAM credits. Control devices are to be simple and intuitive with clear and robust labelling of the lighting switches showing the function of each input. Sensors coverage shall include all of the usable space minus a 500mm perimeter margin.
- 2.9.15.9 Building spaces shall be categorised and controlled based on the definitions in Table 14 below.
- 2.9.15.10 In temporarily and permanently owned spaces of up to 35m² (L0.1), automatic controls shall deactivate, but not activate the lighting system. The lighting system shall include motion sensors to switch the lighting in response to space vacancy. Manual controls shall override the automatic controls for a period of 40 minutes.
- 2.9.15.11 Lighting control rooms in Secondary Schools and Colleges will include for duplicate controls for main hall light switching including for switching between pre-determined house lighting levels and manual dimming of the house lighting.
- 2.9.15.12 In temporarily and permanently owned spaces of over 35m² (L0.2), automatic controls shall deactivate, but not activate the lighting system. The lighting system shall include motion and constant illuminance sensors to switch and dim the lighting in response to space vacancy, daylight and initial over-lighting (resulting from maintenance factors used in calculations). Manual controls shall override the automatic controls for a period of 40 minutes.
- 2.9.15.13 In daylit corridors, stairs and lobbies which are classified as unowned transient spaces (L0.3), automatic controls shall activate and deactivate the lighting system. The lighting system shall include motion and illuminance sensors to switch and lighting in response to space vacancy and daylight level. Manual local controls shall be provided to override automatic controls.
- 2.9.15.14 In unowned transient spaces (L0.3 and L0.4), including corridors, stairs and lobbies which are not daylit, toilets, Hygiene Rooms and changing rooms, automatic controls shall activate and deactivate the lighting system. The lighting system shall include motion sensors to switch the lighting in response to space vacancy. Manual local controls shall be provided to override automatic controls.

TABLE 14 LIGHTING CONTROL CATEGORIES

| Types of Space | Description | CIBSE category reference | Control method | ADS code |
|--|---|--------------------------------------|---|----------|
| Admin offices, Staff Areas, Learning Resource Areas including group rooms, reception areas, primary Libraries | Temporary or permanently owned rooms for individuals and small groups | Owned spaces | Manual on, absence off | L0.1 |
| Basic Teaching spaces, including Classrooms, staff rooms and admin offices, Learning Resource Areas, study areas | Temporary or permanently owned rooms for larger groups | Owned spaces | Manual on, absence off, daylight dimmed (only in a daylit space) | L0.2 |
| Corridors, stairs and lobbies | Transient spaces | Un-owned spaces | Presence on, absence off, daylight off (only in a daylit space) | L0.3 |
| Toilets, Hygiene Rooms, changing rooms, non-daylit corridors, stairs and lobbies | Transient spaces | Un-owned spaces | Presence on, absence off | L0.4 |
| Store rooms, dark rooms, control rooms, sensory rooms, kiln rooms, plant rooms | Infrequently used areas or temporarily owned spaces | Un-owned or temporarily owned spaces | Manual on, manual off | L0.5 |
| Halls, lecture theatres and PE spaces, sports halls, Dining and Social areas, Libraries | Spaces where individuals do not expect to control the lighting | Managed spaces | Key switch staff control with override on; presence on, daylight dimming (only in a daylit space) and absence off | L0.6 |
| Note: Spaces for Students with SEN (D)s require particular care. Absence off should not be used where there are non-ambulant Students or where required in these ACRs. | | | | |

2.9.15.15 In store rooms that are occasionally visited, dark rooms, control rooms and sensory rooms for Students with SEN (D)s, automatic controls are not required (L0.5). If automatic controls are provided Project Co shall ensure that:

- a. automatic controls activate and deactivate the lighting system;
- b. the lighting system includes motion sensors to switch lighting in response to space vacancy; and
- c. manual controls override the automatic controls for a period of 30 minutes.

2.9.15.16 In managed spaces (L0.6) the lighting system shall be fully controllable by a member of staff, but controls shall not be accessible to Students. Automatic controls shall deactivate, but not activate the lighting system. The lighting system shall include motion and constant illuminance sensors to switch and dim the lighting in response to space vacancy, daylight and initial over lighting (resulting from maintenance factors used in calculations). Manual controls shall override the automatic controls for a period of 40 minutes. Where exams take place, it should be possible to override the automatic control for a longer period.

2.9.16 Basic Teaching Spaces

- 2.9.16.1 Manual control shall override automatic control and facilitate group switching.
- 2.9.16.2 Each luminaire row shall be independently controllable via manual inputs and the automatic system. A sensor device shall cover approximately 30m². A 55 m² or 62 m² Classroom shall include at least 1no. photocell sensor device located within 3.9m from the main window wall. Where a sensor controls multiple rows, dimming shall be algorithmic in order to factor the rows' distances from the window.
- 2.9.16.3 Project Co shall ensure that the design and installation of lighting controls takes account of the relevant parts of the following standards (or updated documents if relevant). Where criteria are conflicting, precedence shall be given to the most recent publication:
 - a. CIBSE - LG14 'Controls for Electric Lighting';
 - b. IEC 62386 Pts 101-209 'Digital Addressable Lighting Interface (DALI)';
 - c. IEC 60929 Annex E 0-10v; and
 - d. CIBSE Commissioning Code L: 'Lighting'.

2.9.17 Emergency Lighting

- 2.9.17.1 Project Co shall ensure that functional and serviceable emergency lighting is provided to ensure safe evacuation in an emergency and/or in the event of mains failure, and that it is integrated with escape routes and doors.
- 2.9.17.2 Project Co shall follow guidance and carry out a risk assessment as required by BS 5266 on emergency lighting²⁴ and fire safety²⁵ and the extent of out of hours community use. The emergency lighting design is based on the fire and emergency evacuation risk assessments carried out for the Building[s] and details included in the Fire Safety Management Plan produced in consultation with the Authority in order to meet their responsibilities under the Regulatory Reform (Fire Safety) Order 2005 for each Facility.
- 2.9.17.3 As a minimum, Project Co shall provide emergency lighting in specified areas including:
 - a. escape routes, stairways and corridors; areas with dangerous machinery;
 - b. areas identified in the ADS that are accessible to the public in the hours of darkness, including the main hall;
 - c. Project Co shall ensure that the emergency lighting shall be of the switched maintained type, meaning that the lamps contained in a luminaire operate from the normal supply or from the emergency supply at all times;
 - d. emergency lighting systems shall meet the requirements given in Table 15, Table 16 and Table 17 below; and
 - e. emergency lighting performance (including possible exclusions) shall be based on the area specification and a risk assessment carried out with the Facility.

²⁴ BS 5266: 2016, 'Emergency lighting – Part 1: Code of practice for the emergency lighting of premises'.

BS EN 60598-2-22: 1999, 'Luminaires for emergency lighting'.

BS EN 50172: 2004, 'Emergency escape lighting systems'.

Lighting Guide 12 (LG 12) Emergency lighting design guide.

²⁵ BB 100

TABLE 15 OPEN AREA EMERGENCY LIGHTING CRITERIA

| Item | Value | Notes |
|---|---|-------|
| Area size | Generally, $\geq 60 \text{ m}^2$ except in places of public assembly or where a sufficient risk is identified | (1) |
| Design illuminance | Minimum design value 0.5 lx on empty floor excluding 0.5 m wide perimeter margin | |
| Diversity (U_d) | <40 (max/min) | |
| Response time | 50% design value in 5 s and 100% design value in 60 s until the end of the rated duration | |
| Minimum duration | 3 hours | |
| Colour rendering | Lamp $R_a \geq 40$ | |
| <p>Notes</p> <p>(1) Classrooms used outside the Core Day (adult education for example) shall have emergency lighting</p> | | |

TABLE 16 DEFINED ESCAPE ROUTES EMERGENCY LIGHTING CRITERIA

| Item | Value |
|-----------------------------------|---|
| Route size | $\leq 30 \text{ m}$ long, up to 2 m wide (each 2 m wide strip if route is wider) |
| Design illuminance on centre line | Minimum design value of 1 lx, on the floor along the centre line of the route |
| Design illuminance on centre band | Minimum design value 0.5 lx, on the floor of the centre band (i.e. at least 50% of the route width) |
| Diversity (U_d) | Illuminance on centre line < 40 (max. /min.) |
| Response time | Design value within 5 s of supply failing, until the end of the rated duration |
| Minimum duration | 3 hours |

| | |
|------------------|--------------------|
| Colour rendering | Lamp $R_a \geq 40$ |
|------------------|--------------------|

TABLE 17 HIGH RISK TASK AREA EMERGENCY LIGHTING

| Item | Value | Notes |
|--|--|---------|
| Area size | As defined by task size, location and plane | 1, 2, 3 |
| Design illuminance | Minimum 10% of maintained illuminance on the reference plane but at least 15 lux | |
| Uniformity | >0.1 (minimum/average) | |
| Response time | Design value in 5 s or faster if the risk requires it | |
| Duration | Period for which the risk to people exists | |
| Colour rendering | Lamp $R_a \geq 40$ | |
| Notes Typical high-risk areas include catering Kitchens, in the immediate vicinity of rotating machinery, and above fire alarm panels. High-risk task lighting is in addition to open area lighting Further advice in BS5266 Part 10 | | |

2.9.17.4 Emergency battery packs shall be internal or external to luminaires. Central or distributed batteries shall be located in environments with ambient temperature of 25°C or lower. Battery duration shall be at least 3 hours.

2.9.17.5 Project Co shall identify whether he is providing an emergency lighting automatic testing and monitoring system. Project Co shall provide details of its responsibilities for testing the emergency lighting system aligned with the Regulatory Reform (Fire Safety) Order 2005 in the operation and maintenance manuals. The emergency lighting testing and monitoring system shall consist of one of the following options:

- a. manual key-switches for each individual lighting final sub-circuit;
- b. a proprietary luminaire self-test system based upon individual luminaires;
- c. a centralised dedicated proprietary emergency lighting test and monitoring system; and
- d. emergency lighting test and monitoring control algorithms as part of a centralised lighting control system.

2.9.17.6 All systems shall comply with the testing and monitoring requirements of BS 5266 for self-contained or centralised power supply systems and provide auditable test results in both hard and soft copy formats.

2.9.18 External Lighting

2.9.18.1 Project Co shall provide external lighting systems that:

- a. ensure safe pedestrian and vehicular access;
- b. are designed in accordance with LG5, covering car parks, sports facilities, walkways and roads, entrances, particular building features and security requirements;
- c. are fitted with both BMS time clock controls and daylight level photocell controls (including for BMS alarm reporting for 'out of normal range' energy usage);

- d. have minimum lamp and gear efficacy of 80lm/W for colour rendering Ra ≤ 60 and 70lm/W for light sources Ra > 60;
- e. minimise light pollution (for example due to sports facilities or security lighting) and ensure light levels are kept within the limits as required by BS 5489²⁶ and avoid nuisance to the adjacent neighbourhood. Lighting levels for CCTV cameras (where provided) shall be limited to 2 lux;
- f. LED lamps shall be used where possible to improve the life of the installation and help maintenance in line with CIBSE guide M. Fittings shall be selected to allow for the LED lamp to be replaced rather than the whole fitting; and
- g. shall be provided in accordance with the criteria given in Table 13 and Table 18.

TABLE 18 EXTERIOR ILLUMINATION CRITERIA

| Areas | Horizontal Illuminance | | | Glare |
|---|------------------------|-------|---------------|-----------------|
| | \bar{E}_m lx | U_o | WP height (m) | GR _L |
| Walkways exclusively for pedestrians | 5 | 0.25 | 0 | 50 |
| Traffic areas for slowly moving vehicles (max 10 km/h, e.g. Bicycles) | 10 | 0.40 | 0 | 50 |
| Pedestrian passages, vehicle turning, loading and unloading points | 50 | 0.40 | 0 | 50 |
| Parking areas | 10 | 0.25 | 0 | 50 |
| Security | 5 | 0.25 | 0 | 50 |

2.9.19 Obtrusive Light

- 2.9.19.1 Light spill shall be controlled to a level appropriate to the surrounding environment. This is demonstrated through compliance with ILP guide GN01 - Guidance Notes for the Reduction of Obtrusive Light. The foundation of this method is to agree an environmental zone with the local planning authority.
- 2.9.19.2 The zoning definitions and performance criteria are summarized in Table 19 and Table 20 however, Project Co shall also refer to the ILP guide GN01 - Guidance Notes for the Reduction of Obtrusive Light.

²⁶ BS 5489 Code of practice for the design of road lighting.

TABLE 19 ENVIRONMENTAL ZONING FOR OBTRUSIVE LIGHT

| Zone | Surrounding | Lighting environment | Examples |
|------|-------------|----------------------|---|
| E0 | Protected | Dark | UNESCO Starlight Reserves, IDA Dark Sky Parks |
| E1 | Natural | Intrinsically dark | National parks and AONB |
| E2 | Rural | Low brightness | Village or dark outer suburban areas |
| E3 | Suburban | Medium brightness | Small town centre or suburban locations |
| E4 | Urban | High brightness | Town/city centres with high levels of night-time activity |

TABLE 20 PERFORMANCE CRITERIA FOR OBTRUSIVE LIGHT

| Parameter | Application conditions | Value of parameter for stated environmental zone | | | | |
|--|---|--|------|------|-------|-------|
| | | E0 | E1 | E2 | E3 | E4 |
| Upward light ratio (ULR) | Maximum permitted percentage of luminous flux that goes directly into the sky | 0 | 0 | 2.5 | 5 | 15 |
| Illuminance in vertical plane (E_v) (lux) | Pre-curfew | 0 | 2 | 5 | 10 | 25 |
| | Post-curfew | 0 | 0 | 1 | 2 | 5 |
| Luminous intensity emitted by luminaires (I) (cd) | Pre-curfew | 0 | 2500 | 7500 | 10000 | 25000 |
| | Post-curfew | 0 | 0 | 500 | 1000 | 2500 |
| Building facade luminance (L_b) (cd/m^2) Ave | Pre-curfew | 0 | 0 | 5 | 10 | 25 |
| Sign luminance (L_s) (cd/m^2) Max | Up to 10m ² | 0 | 100 | 400 | 600 | 600 |

| Parameter | Application conditions | Value of parameter for stated environmental zone | | | | |
|-----------|------------------------|--|----|-----|-----|-----|
| | | E0 | E1 | E2 | E3 | E4 |
| | Over 10m ² | 0 | 0 | 200 | 300 | 300 |

2.9.19.3 Project Co shall ensure that the design and installation of electric lighting takes account of the relevant parts of the following standards (or updated documents if relevant). Where criteria are conflicting, precedence shall be given to the most recent publication:

- a. SLL Lighting Guide 5: 'Lighting for Education';
- b. BS EN 12464-1: 'Light and lighting. Lighting of work places. Indoor work places';
- c. BS EN 12464-2: 'Light and lighting. Lighting of work places. Outdoor work places' and
- d. ILP GN01 Guidance.

2.9.20 Specialist Lighting

2.9.20.1 Project Co shall refer to these ACRs in order to identify any specific lighting requirements. Where lighting is designed by a specialist (such as theatre lighting), Project Co shall:

- a. provide infrastructure as required by the specialist;
- b. provide general lighting to the entire space; and
- c. ensure Project Co's design is co-ordinated with the specialist's design.

2.9.20.2 Project Co shall provide a stage lighting system in any Primary School hall, Secondary School main hall Performance Spaces or drama studio. Unless otherwise stated in these ACRs, these stage lighting systems shall use Digital Multiplex (DMX 512 Standard) controlled LED lights appropriate for the purpose.

2.9.20.3 Project Co shall provide at least the following:

2.9.20.3.1 For a Primary School hall:

- a. one internally wired lighting bar with power and control outlets to support at least 6 DMX controlled LED lights; and
- b. four DMX controlled LED lights.

2.9.20.3.2 For a Secondary School main hall:

- a. three internally wired lighting bars with power and control outlets to support at least 18 DMX controlled LED lights; and
- b. twelve DMX controlled LED lights.

2.9.20.3.3 For a drama studio:

- a. one internally wired lighting bar with power and control outlets to support at least 6 DMX controlled LED lights; and
- b. 6 DMX controlled LED lights.

2.9.20.4 Where stage lighting is provided in College Performance Spaces, it shall provide lighting bars and lights in accordance with these ACRs.

- 2.9.20.5 All stage lighting systems shall be capable of being connected to a mobile lighting control system that can be used by Students and teachers for educational purposes.
- 2.9.20.6 The position of the lighting bars and the selection of the lights must be carried out in such a way as to provide the Facility Users with the ability to cast light from a range of physical positions, change colours without need for working at height and use differing types of light fittings for creative effect, for example wash lights, profile lights and special effect lights.
- 2.9.21 Lighting of Designated Units or Specially Resourced Provision
- 2.9.21.1 Project Co shall ensure that the lighting design in Designated Units and Specially Resourced Provision meets the particular requirements of the relevant Site Specific Brief, which take account of Students' individual needs, such as:
- a. Students with a hearing impairment needing higher light levels/clear visibility for lip-reading and signing;
 - b. Students with a visual impairment needing higher light levels to facilitate way-finding and minimise the risk of accidents;
 - c. Students being very sensitive to glare from direct or reflected sunlight;
 - d. automatic sensors that switch off lighting when no movement is detected not being suitable for children with limited mobility and some other special needs;
 - e. light fittings are low glare, avoiding any flicker and unwanted noise;
 - f. light sources shall not give off any disabling glare over changing beds or therapy couches; and
 - g. Project Co shall ensure that advice from a lighting specialist is used where there are pupils with complex visual needs²⁷.
- 2.9.21.2 Project Co shall ensure that the guidance on design of lighting for SEN (D) in CIBSE LG5 Sections 3.8 and 5.17 is followed, and that advice from a lighting specialist is taken for spaces for Students with hearing impairments, visual impairments and complex visual needs. In particular, modelling index and visual contrast shall be increased to suit their needs.
- 2.9.21.3 The lighting strategy and luminaires chosen shall be set out in Schedule 6 Section 4.
- 2.9.22 Calculation Specifications
- 2.9.22.1 Daylighting calculations shall be in accordance with Tables 21 to 25 below.

TABLE 21 CALCULATION SPECIFICATIONS

| Criteria | Description | Notes |
|--------------------|---|----------|
| Calculation method | Radiosity, raytracing | (1), (2) |
| Analysis method | Climate based daylight modelling | (2) |
| Weather file | EPW climate-based file, nearest to Site | (2), (3) |

²⁷ The Royal National Institute for the Blind (RNIB) or similar organisations can advise on specialist environments for children with visual or multiple impairments.

| | | |
|--|--------------|-----|
| Maximum time increments | ≤ 15 minutes | (2) |
| Notes Raytraced calculations require at least 5 light bounces Applicable to daylighting calculations only There are two EPW weather files appropriate for Wales, these are Birmingham (west-mid), and Aughton (north west coast-Lancashire). | | |

TABLE 22 MODEL GEOMETRY AND SURFACE SPECIFICATIONS

| Criteria | Description | Notes |
|--|---|----------|
| Model geometry detail | Main structural elements, window fenestration and external obstructions shall be included in the calculations | (1) |
| Wall reflectance | Wall reflectance to be area-weighted, to allow for the fact that 20% of the surface will be covered with items at 0.2 reflectance | (2), (3) |
| Notes Examples include pillars, beams, window reveals, window frames, overhangs, etc. For example, if a paint finish is 0.7 reflective, factoring 20% of this area is covered with items 0.2 reflective results in a weighted average of 0.6 reflectance ($0.7 * 0.8 + 0.2 * 0.2 = 0.6$) 20% of the area at 0.2 reflectance allows for the impact of posters, Student work etc., on the walls. | | |

TABLE 23 CALCULATION GRID SPECIFICATIONS

| Criteria | Value | Notes |
|---|---|-------|
| Maximum point offset from wall | 500 mm | (1) |
| Distance between calculation points | 250 to 500 mm | |
| Height of working plane above finished floor level | Classrooms for: Primary School: 550 mm Secondary School/College: 750 mm Circulation and temporarily owned spaces: 0 mm | |
| Notes (1) The offset can include large, fixed pieces of furniture such as cupboards | | |

TABLE 24 MAINTENANCE FACTORS

| Criteria | Description | Notes |
|--------------------------------------|--|-------|
| Lamp Lumen Maintenance Factor (LLMF) | Calculations shall include a reduction factor to allow for a reduced light output resulting from lamp depreciation and failure rates | (1) |

| | | |
|--|--|----------|
| Luminaire Maintenance Factor | Calculations shall include a reduction factor to allow for a reduced light output resulting from dirt build-up on luminaires | |
| Room Surface Maintenance Factor | Manufacturers' surface reflectivity specifications shall be reduced by 10% in order to factor impact of dirt build up. | (2), (3) |
| Glazing Maintenance Factor | Calculations shall allow a 5% reduction to manufacturers' surface transmissivity specifications to factor impact of dirt build up. | (4) |
| <p>Notes</p> <p>LLMF: use manufacturers depreciation figures at 30,000 hours for proposed LED equipment</p> <p>Applicable to daylight calculations only</p> <p>For example: 0.8 reflectance with a 10% maintenance factor is 0.72 reflectance ($0.8 * 0.9 = 0.72$)</p> <p>For example: 0.7 transmittance with a 5% maintenance factor is 0.67 transmittance ($0.7 * 0.95 = 0.67$)</p> | | |

2.9.23 Calculation Reports

2.9.23.1 An electric lighting and daylighting calculation report/drawing shall be provided in order to demonstrate compliance with the performance criteria for all spaces. A single calculation can be used to validate multiple spaces where the results can be meaningfully extrapolated. Calculation reports shall include the data as listed in Table 25 below.

TABLE 25 REQUIRED DATA IN CALCULATION REPORTS

| Criteria | Notes |
|--|-------|
| Software and calculation method used (raytracing or radiosity) | |
| Data sheets for luminaires included in calculation. To show product reference, luminaire lumen output, polar curve and luminaire wattage | (1) |
| Room name (as shown in the project drawings) that the calculation is simulating and additional rooms the calculation is validating | |
| Dimensioned luminaire layout in space | |
| Type and location of weather file used | (2) |
| Results for horizontal, vertical and cylindrical illuminance and for glare calculations | (1) |
| Space geometry and surface properties | |
| Calculation summary figures including the calculation grid average, minimum, maximum task illuminance and task uniformity | (1) |
| Iso-contour or pseudo-colour diagram of the results | |
| Maintenance factors applied to calculation | |
| Specification of the calculation grid | |
| <p>Notes</p> <p>Electrical lighting calculations only</p> | |

| Criteria | Notes |
|----------------------------|-------|
| Daylight calculations only | |

2.9.24 Equipment Submittals

2.9.24.1 A datasheet or schedule shall be submitted in order to demonstrate compliance with the performance criteria for all proposed lighting equipment. The datasheet/schedule shall clearly show the information in Table 26.

TABLE 26 REQUIRED DATA IN LUMINAIRE SUBMITTALS

| Criteria | | Notes |
|--|--|-------|
| Luminaire | Reference as shown on drawings | |
| | Manufacturer and model | |
| | Image of product | |
| | Dimension of product | |
| | Mounting type (surface/recessed/suspended) | |
| | Material and finish (including colour) | |
| | Optics (louvre, lens, diffuser) | |
| | IP/IK (where appropriate) | |
| | Median rated useful life | |
| | Warranty | (1) |
| Light Source | Correlated Colour Temperature | |
| | Colour Rendering Index | |
| | Macadam Ellipse | |
| | Luminaire Lumens/Circuit Watt | |
| | L value; B50 value | (2) |
| | Lamp depreciation and failure percentage at lamp design life | |
| Driver/Ballast | Power Factor | |
| | Frequency | |
| | Driver DC Ripple Current | |
| | Dimming range | |
| Notes | | |
| For luminaires using LED sources the warranty to include all LEDs, componentry and luminaire | | |
| Applicable to LEDs only | | |

2.9.25 Thermal comfort

- 2.9.25.1 Project Co shall ensure that all spaces provided are designed to meet the requirements for design criteria for thermal comfort.
- 2.9.25.2 All parts of new and refurbished Buildings shall comply with the temperature requirements set out in these ACRs.
- 2.9.25.3 For summertime thermal comfort, Project Co shall carry out an Overheating Risk Assessment (ORA) of free running designs and shall design and install all heating systems so as to limit the maximum internal temperatures.
- 2.9.25.4 For wintertime thermal comfort, Project Co shall design all heating systems so as to ensure that the minimum temperatures are in line with the design conditions set out in these ACRs.
- 2.9.25.5 Project Co shall ensure that systems provided to control thermal comfort for Students with SEN (D)s are designed such that:
- a. they take into account any specialist requirements of the Students described in these ACRs;
 - b. they do not have a detrimental effect on the learning environment of the Students; and
 - c. they provide a safe and secure environment for the occupants.
- 2.9.25.6 Project Co shall demonstrate by thermal modelling how all parts of the Buildings will comply with the minimum and maximum temperature requirements as shown in the ADS.
- 2.9.25.7 Project Co shall ensure that there are sufficient temperature control mechanisms provided to enable the staff and Students to adjust their environment and maintain a satisfactory level of thermal comfort throughout each term. This is especially important in spaces subject to high heat gains.
- 2.9.25.8 In naturally ventilated spaces, Project Co shall provide mixing of ventilation air with room air to avoid cold draughts in the occupied zone during wintertime. In wintertime the minimum air temperature of air delivered to the occupied zone at 1.4m above floor level shall be not more than 5°C below the normal maintained air temperature. Further detailed guidance shall be followed from the latest version of BB101.
- 2.9.26 Maximum summertime temperatures
- 2.9.26.1 Project Co shall refer to the detailed guidance given in the latest version of BB101.
- 2.9.26.2 Project Co shall design the Building so as to limit the maximum internal temperature. Project Co shall assess its design for overheating using the most relevant weather files from CIBSE's Reference Design Summer Years DSY1 2050 weather file.
- 2.9.26.3 Naturally ventilated teaching spaces and offices is the default preferred solution for controlling summertime temperatures and for providing background ventilation. Project Co shall provide sufficient natural ventilation and night cooling where necessary. Natural ventilation shall be by cross flow, double sided, and/or stack ventilation, to eliminate the need for mechanical cooling.
- 2.9.26.4 Teaching spaces and offices shall not be provided with mechanical comfort cooling, without prior approval from the Authority. Systems shall utilise passive measures such as reducing solar gain and internal gains to eliminate the need for comfort cooling. Where some cooling is required, free cooling through providing a higher ventilation rate is the preferred option for the majority of rooms in a School or College.

- 2.9.26.5 Where active cooling is proposed, the contractor shall demonstrate that all other measures, in line with the energy and cooling hierarchy, have been explored and demonstrated as not feasible. This includes, but is not limited to:
- a. minimise internal heat generation through energy efficient design;
 - i. minimising lighting gains
 - ii. low energy equipment loads
 - b. reduce the amount of heat entering a building in summer through orientation, shading, albedo, fenestration, insulation;
 - i. optimised G-Values
 - ii. Shading features, such as Blinds (but not to limit air flow from windows)
 - iii. landscaping
 - c. manage the heat within the building through exposed internal thermal mass and high ceilings;
 - d. passive ventilation solutions;
 - i. cross flow and stack effect ventilation, thermal chimneys, etc, (this should be considered when developing the Architectural design solution at feasibility)
 - e. mechanical ventilation solutions (a mechanical ventilation solution may be proposed to mitigate the risks of cold drafts however where the site allows natural ventilation should be the preferred option for reducing the risk of overheating);
 - i. including limited periods of boost which exceed the upper indoor ambient room noise level, but this cannot be considered as part of the normal thermal comfort design strategy;
 - f. active cooling systems (ensuring they are the lowest carbon options) shall be used for peak lopping not full cooling. Interlocks shall be provided to the heating and/or cooling systems to prevent heating and cooling at the same time; and
 - g. a non-technical description of the air conditioning controls for summertime use shall be provided in the Building User Guide.
- 2.9.26.6 Project Co shall ensure that mechanical ventilation is not the sole method of summer-time ventilation in occupied spaces and that occupied space should also have opening windows or vents, with an effective opening free area (A_{eff}) equal to at least 5% of floor area. Project Co should also provide controls in each room to switch the mechanical ventilation on or off as required.
- 2.9.26.7 Project Co shall design the Building to allow the air movement to be increased during the summer through opening windows or vents, switching on fans, or increasing the rate of mechanical ventilation systems. Project Co may use ceiling fans. Project Co will otherwise design the Classrooms to allow for fitting of two ceiling fans in the future which will include suitable fixing points on the ceiling, with a suitable wall switch and wiring.
- 2.9.26.8 Project Co shall carry out an Overheating Risk Assessment (ORA) of free running designs by following the procedure set out in CIBSE Technical Memorandum 52. The design of mechanically cooled Buildings should be in accordance with the CIBSE guidelines for air-conditioned Buildings.
- 2.9.26.9 Project Co should incorporate thermal mass and night cooling into the design where necessary to prevent summertime overheating.
- 2.9.26.10 Project Co shall position carbon dioxide sensors to ensure that the readings are approximately representative of the occupied zone, e.g., not situated adjacent to doors, vent openings, etc.

- 2.9.26.11 Project Co shall maintain the required ventilation during room dim-out/blackout, and it shall not be impaired by security or safety requirements. Project Co shall ensure that when outside air is introduced into a teaching space ventilation air and room air will be mixed to avoid cold draughts during wintertime. In wintertime the minimum air temperature of air delivered to the occupied zone at 1.4m above floor level shall be not more than 5°C below the normal maintained air temperature.
- 2.9.26.12 Project Co shall ensure that the control of natural ventilation systems in densely occupied spaces such as Classrooms is provided by means of:
- a. an indoor air quality or carbon dioxide sensor that provides a clear and easily understood indication of indoor air quality to alert the teacher and possibly the pupils to the need to increase the ventilation by opening windows or vents; or
 - b. an indoor air quality or carbon dioxide sensor linked to a ventilation system or an electrically driven automatic window or louvre actuator.
- 2.9.26.13 Project Co shall ensure that all ventilation systems are:
- a. capable of dealing with localised conditions and responding to changes in demand;
 - b. integrated into the Building[s], whether natural, passive or mechanical, and co-ordinated with the fire alarm, (e.g., for smoke control) and gas supplies where required; and
 - c. easily controllable to allow reduced ventilation rates when required, for example with low occupancy or out of hour's use, and to allow for increased ventilation in summertime.

2.9.27 Temperatures and Humidity in ICT suites and Server rooms

- 2.9.27.1 Project Co shall refer to the detailed guidance given in the latest version of BB101. Project Co shall provide ICT cabinets that are mesh fronted to allow good air flow. Project Co shall ensure that server room power loads are separately metered. Project Co shall aim for a target annual Power Utilisation Efficiency (PUE) for the ICT server installation of better than 1.5. The ICT Equipment load should be metered after any uninterruptible power supply (UPS) units and the intake power to the IT server room shall be measured before the UPS units.
- 2.9.27.2 It may be more economical for Project Co to purchase new ICT Equipment for the School /College where the potential savings on capital and running costs of the provision of mechanical cooling equipment provides a more cost-effective solution. For example, by purchasing up to date server equipment which can run at a higher temperature and therefore requires less cooling. Project Co shall in all cases where the provision of Equipment and design are integrated undertake option appraisals to recommend the most economic option is adopted by the Authority.
- 2.9.27.3 Project Co shall supply background ventilation to server rooms at 0.3 air changes an hour to allow for ICT staff who are servicing equipment to work in the server room; or as required by UPS systems for the safe operation of the batteries to allow for the release of inflammable or corrosive gases; whichever is the higher ventilation rate.
- 2.9.27.4 Project Co shall design an energy efficient ventilation system and minimise the hours of operation of any mechanical cooling provided.
- 2.9.27.5 Project Co shall ensure that, where possible, and more energy efficient than mechanical cooling, ICT suites are cooled by natural ventilation or forced mechanical extract

ventilation with fresh air free cooling. Inlet air will be suitably filtered, and tempered in cold weather, either by mixing with room air, or by the use of cross flow heat exchangers.

2.9.27.6 Where possible, Project Co shall locate server rooms so that in winter heat from server rooms can be used to heat adjoining parts of the Building.

2.9.28 Heating and Cooling systems

2.9.28.1 The Welsh Government's preferred methods of heat generating systems for Schools and Colleges are:

- a. connection to an available existing or planned heat distribution network;
- b. gas fired condensing boilers; and
- c. low or zero carbon (LZC) technologies.

2.9.28.2 Project Co may propose an alternative form of heat generating plant, but shall provide appropriate energy analysis, capital and running cost analysis and justification for the proposed system(s) e.g. oil, LPG.

2.9.28.3 Project Co shall ensure that any heat generating system provided is designed and installed appropriately. This shall include, but not be limited to, the following:

- a. heat loss calculations;
- b. main plant selection;
- c. emitter selection and sizing;
- d. pipework distribution design based on max pipework linear pressure drop of 300Pa/m for pipework up to 50 mm diameter and max 200 Pa/m for diameters over 65 mm diameter;
- e. heating system ancillaries and valve selections; and
- f. a setback temperature of 5°C shall be used for the heating systems.

2.9.29 Energy Networks

2.9.29.1 Where a connection to a new or existing energy network or the use of an energy centre is to be used, Project Co shall supply and design the associated systems to all relevant current standards applicable in Wales and Good Industry Practice generally.

2.9.29.2 Where Project Co is proposing to construct an energy centre, as part of the development, then Project Co shall ensure that it is appropriately designed and installed to allow for future developments in technology to be utilised where appropriate.

2.9.30 Low and Zero Carbon Heat Sources

2.9.30.1 Low and zero carbon (LZC) technologies may be required for either;

- a. to comply with Welsh Building Regulations AD L;
- b. to meet BREEAM targets;
- c. to meet local planning requirements; and
- d. as part of an alternative fuel source strategy.

2.9.30.2 The following details the requirements for the preferred LZC technologies, as a primary or secondary heat source, within Facilities in the event that LZC technologies are required as part of the Energy Strategy.

- a. Project Co shall establish an Energy Strategy for the site;

- b. LZC sources shall be provided with sub meters for fuel input, power output and heat output; and
 - c. CHP units shall be installed to TR/37 'Guide to good practice: installation of combined heat and power' (BESA, 2015).
- 2.9.30.3 Project Co shall ensure that the controls to the CHP units are sequenced such that they operate as the primary heat source to ensure optimum usage and run time.
- 2.9.30.4 If a ground source heat pump is selected, then Project Co shall ensure that the geology and environmental factors are appropriate for a ground source heat pump system to be installed.
- 2.9.30.5 If air source heat pumps are being considered, then Project Co shall ensure that the system design criteria and system selection will provide the best possible seasonal efficiencies.
- 2.9.30.6 The use of integral air-source heat pumps (IASHP) within air handling units should be considered a design priority where there is a need for a balanced supply and extract central air handling plant of any size and type with conditioned or tempered supply air with heat recovery being required.
- 2.9.30.7 Project Co shall undertake:
 - a. a heat loss assessment to establish the required heating load of the Works, the predicted thermal performance of the building fabric shall meet or exceed Part L and local planning requirements; and
 - b. an overheating risk assessment (ORA); from this Project Co shall establish whether cooling and/or enhanced mechanical or natural ventilation is required within any part of the Works.
- 2.9.30.8 Project Co shall ensure:
 - a. the heating and cooling systems cater for any specialist requirements (including any highlighted in these ACRs) in the proposed development including areas of high density ICT, server rooms or specialist teaching spaces such as Practical Teaching spaces and Vocational Teaching spaces;
 - b. any heating or cooling plant and/or emitters are appropriately sized for the application within the proposed development; and
 - c. the heating and cooling system is capable of intermittent operation with appropriate automation and capacity to ensure the Facility is raised to the design temperature by the start of the Core Day or when the Students arrive following a weekend, holiday or normal day; the systems shall be designed and controlled to allow for flexibility in the patterns of usage of the Facility.

2.9.31 Operative Temperature Range

- 2.9.31.1 Project Co shall refer to the detailed guidance given in the latest version of BB101. Project Co shall ensure that there are sufficient temperature control mechanisms provided to enable the Facility Users to adjust the internal temperature, influence the environment, and maintain a satisfactory level of comfort throughout the year. Temperature, ventilation and lighting controls in Schools and Colleges shall be Classroom based and simple to operate.
- 2.9.31.2 Project Co shall design any heating system provided to achieve the operative temperatures in the heating season listed in Table 27 below:

TABLE 27 OPERATIVE TEMPERATURES TO BE ACHIEVED DURING THE HEATING SEASON MEASURED AT 1.4M FROM THE FLOOR IN THE CENTRE OF THE ROOM

| Type of space/activity | ADS Code | Normal maintained operative temperature – °C | Maximum operative temperature during the heating season at maximum occupancy - °C |
|---|----------|--|---|
| Stores not normally occupied | T1 | 5°C | N/A |
| Areas where there is a higher than normal level of physical activity (such as sports halls) and sleeping accommodation | T2 | 17°C | 23°C |
| Toilets, Circulation spaces and store rooms that are normally occupied | T3 | 17°C | 24°C |
| Kitchen preparation areas | T4 | 20°C | N/A |
| Spaces with normal level of activity, including all Basic Teaching Areas (including practical and ICT-rich spaces), study and social space, Learning Resource Areas, Halls used for exams, admin and Staff Areas, prep rooms. | T5 | 20°C | 25°C |
| Spaces with less than normal level of activity or clothing, including sick, MI or therapy rooms, changing rooms and gymnasias and dance and activity studios | T6 | 21°C | 26°C |
| Designated Units or Specially Resourced Provision, Students have physical disabilities or Profound and Multiple Learning Disabilities | T7 | 23°C | 25°C |
| Not used | T8 | | |
| Where young children or those with physical disabilities may be wet or partially clothed for a significant length of time. More rapid air movement leads to greater chilling by evaporation and to compensate, a higher design temperature is required. | T9 | 25°C The air speed in these environments should be as low as possible and not exceed 0.15 m/s at 25°C | 30°C |
| <p>Note: Students with SEN (D) can be very sensitive to temperature and it may be necessary to adjust the normal operative temperature and maximum temperature in the heating season depending on the needs of the Students. The heating system shall have sufficient flexibility to adjust the heating in spaces to be occupied by Students with SEN (D) as described.</p> | | | |

2.9.31.3 Project Co shall ensure that:

- a. for all pumped systems, the initial stage of frost protection is to enable the pumps in the event that the internal temperature of the Building drops to 5°C (this temperature shall be adjustable);
- b. in the event that the temperature drops to below 2°C, (this temperature shall also be adjustable) then the second stage of frost protection commences and the heat generating plant circulates the heating medium around the system; and
- c. in addition, trace heating is provided on systems at a higher risk to frost protection (for example systems that run externally fabric or in unconditioned areas of the Building).

2.9.32 Heating Emitters

2.9.32.1 Project Co shall ensure that any space or area can be heated by one or more of the following emitter types:

- a. natural convectors and radiators;
- b. warm air, including over-door air curtains;
- c. radiant heating (LTHW radiant heating allowable only where the heat source supports higher flow temperatures, i.e; biomass boiler, CHP engines. For gas fired boilers maximising the condensing operation must be paramount and therefore LTHW radiant heating will not be allowed with this type of central plant, nor with ASHP/GSHP heat sources);
- d. underfloor heating; and
- e. forced convection fans.

2.9.32.2 Where proposing an alternative form of heat emitter where appropriate for the installation, Project Co shall provide the Authority with detailed reasons and justification.

2.9.32.3 Project Co shall select any heat emitter based on the following requirements:

- a. heating capacity required;
- b. the responsiveness required due to change of use in the space;
- c. thermal comfort requirements;
- d. space available (whether space is available on the floor, around the perimeter or at high level);
- e. safety requirements (including low surface temperature);
- f. robustness; and
- g. running cost.

2.9.32.4 Project Co shall ensure that:

- a. the materials used in any heat emitters are appropriate for the pipework and boiler systems connected e.g. steel radiators, steel pipe, stainless steel heat exchangers;
- b. appropriate water treatment corrosion inhibitors are used;
- c. the heat emitters and system are selected with the ventilation and cooling strategy in mind in order to reduce energy loss e.g. heating energy lost through open windows in mid-season and wintertime;
- d. an even temperature gradient is achieved in the room for thermal comfort and that draughts are reduced or eliminated in the teaching spaces;

- e. all emitters are accessible for cleaning, especially those mounted at high level, and measures shall be taken to prevent dust build-up in/on the heat emitters. All trench heaters shall be provided with a removable grille for ease of maintenance;
- f. heat emitters do not create noise in the occupied space above the indoor ambient noise level given in BB93 for the type of space; and
- g. heat emitters must be located in an appropriate position within the room to ensure an even distribution of heat. Where natural ventilation openings or hybrid fan assisted ventilation, units are used for ventilation in winter, heat emitters must be positioned locally (within 1.5m in plan) to the window or fan assisted device to ensure a local heat source is available to offset cold draughts.
- h. all major building entrances and exits with high frequency of use or traffic during class change or at the start and end of each day, including visitor doors, are provided with an over-door air curtain, fed from the buildings LTHW heating system (electric air curtains not to be used unless written approval from the Authority) and suitably sized to cover the entire width of the door opening +150mm over each end, and selected to provide sufficient terminal velocity at floor level to offset cold draughts whilst operating in accordance with relevant acoustic design criteria.
- i. all other external doors in regular use to teaching spaces and occupied rooms may be provided with either over door air curtains (as described above) or to use LTHW warm air fan convectors as the primary heat source for the room/space, sized to provide a quick reaction to open door heat loss whilst operating in accordance with relevant acoustic design criteria.

2.9.32.5 Project Co shall ensure that the following requirements are met:

- a. where radiators are provided in Nursery and Reception Classrooms and in SEN (D) dedicated spaces, Designated Units or Specially Resourced Provision, they are low surface temperature (LST);
- b. all radiators are provided with lockable thermostatic valves (TRVs) or other control device which shall not allow the room to be heated more than 2°C above the normal room temperature, but also afford frost protection if the valve is closed;
- c. adequate wall space is available for radiators to be coordinated with fixed furniture allowing unobstructed heat output; and
- d. where trench heating is installed, it is of a robust nature to withstand furniture and changes of use in the space.

2.9.32.6 Project Co shall ensure that where a sports hall is served by LTHW radiant heaters, they are provided with adequate protection from damage by sports equipment.

2.9.32.7 Project Co shall size radiant panels in accordance with these ACRs and the latest version of BB101 to show that radiant heating complies with the thermal comfort criteria for radiant temperatures.

2.9.32.8 Any underfloor heating shall be based on a LTHW rather than an electric system in order to conserve energy.

2.9.32.9 Fan convectors shall be designed to be robust and easily maintained to prevent dust build up.

2.9.32.10 Where heating is provided via air handling units, integral air source heating pumps shall be used in preference to LTHW and electrical heater batteries.

2.9.33 Radiant Temperature Difference

- 2.9.33.1 In any space where the heating system incorporates overhead radiant panels, Project Co shall undertake calculations as described in the latest version of BB101 to determine the Radiant Temperature Asymmetry (RTA) within each space.
- 2.9.33.2 The design shall take account of the mean water temperature, size of radiant panels and the available mounting height. Mounting too low can result in occupants complaining of excessive temperatures above their head and if mounted too high, occupants may not feel the full heating benefit.
- 2.9.33.3 Once the mounting height is established within a space, the arrangement of radiant panels shall allow sufficient separation between the units to provide an even spread of heat throughout the space whilst preventing a crossover of the radiant flow of heat between panels resulting in zones of intense heat.
- 2.9.33.4 Radiant panels shall not be located directly above teaching walls or other areas where a teacher or other occupant is likely to be standing for prolonged periods of time, unless RTA calculations can demonstrate that the installation is suitable and would not result in excess temperature differences.
- 2.9.33.5 If the radiant panels are offset from the preferred layout as part of the Service Infrastructure coordination, the impact on RTA shall be assessed. The options of integrating luminaires and acoustic absorbers within radiant panels shall be considered.
- 2.9.33.6 The surface temperature of ceiling mounted radiant panels in Classrooms or offices and in normal height teaching spaces shall be limited to meet BS EN 15251, which requires that for a category III Building the vertical air temperature difference in the space during the heating season shall be less than 2 K/m in the occupied zone in order to avoid discomfort and to conserve energy. Where radiant panels are used in spaces over 4m in height, measures shall be taken where necessary to reduce stratification.
- 2.9.33.7 In single storey spaces, the vertical air temperature difference in the space during the heating season shall be $<2\text{K/m}^{-1}$ and the asymmetric radiant temperature difference to hot ceilings shall be less than 10°C except for a short recovery period after outside doors are closed. It will be necessary to limit the surface temperature of ceiling mounted radiant panels in Classrooms or offices and in normal height teaching spaces to achieve this (Ref: CIBSE Guide A, 1.5.6 and 1.5.9); account is taken of heat gains to spaces so that heat emitters are not over-sized.

2.9.34 Underfloor Heating

- 2.9.34.1 If under-floor heating is used, Project Co shall be able to demonstrate that all spaces will neither take too long to recover their temperature following sudden heat losses, nor overheat due to increased heat gains following sudden heat loss (for example where external doors are opened), changes in occupancy or equipment heat load.
- 2.9.34.2 Project Co shall ensure that, where underfloor heating is provided, the following requirements are met:
 - a. maximum surface temperatures: comply with these ACRs and the latest version of BB101;
 - b. where there are nursery-age children, children with complex health needs, Project Co shall ensure that the maximum surface temperature of floors with under-floor heating shall be $26^{\circ}\text{C} \pm 2^{\circ}\text{C}$, the comfort temperature for low activity. This temperature shall also not be exceeded where children are likely to be sitting on the floor;

- c. top of screed temperature sensors are installed into each underfloor circuit or zone of control to monitor and control the maximum screed surface temperature, all as part of the underfloor heating temperature control system. The temperature sensors shall be a thin film or bulb type inserted into a shallow recess directly on top of the screed and beneath the floor finish so as to be easily accessible for maintenance and replacement. Cast in temperature sensors shall not be used;
- d. the floor covering is appropriate for underfloor heating to allow effective heat transfer to the room;
- e. the design and installation is fully coordinated with other under-floor Service Infrastructure such as drainage and electrical cables, and any fixed Equipment;
- f. actuators and manifolds are located in a dedicated cupboard or robust boxing adjacent to the space being heated but inaccessible to Students and the public; and
- g. the pipework, valves and connections are designed in order to avoid in-screed or underfloor leaks;

2.9.34.3 If the screed depth is reduced to increase the response time, consideration is given to the static and dynamic loads placed on the floor. The construction method and materials proposed to provide a reduced screed depth shall be submitted to the Authority for approval.

2.9.34.4 Project Co shall not install underfloor heating where:

- a. the room use, and heating profile will change quickly since underfloor heating is a slow response system;
- b. floors may be covered with mats (e.g. in soft play rooms in a Designated Unit);
- c. regular spillages can cause hygiene and odour problems (e.g. in toilets, changing rooms or Hygiene Rooms);
- d. the positions of partition walls are likely to change in future years such as in Basic Teaching spaces;
- e. fixings are required into the screed for furniture (e.g. lab benches) or equipment (e.g. in Design and Technology); and
- f. there is bleacher seating.

2.9.35 LTHW Pipework

2.9.35.1 Project Co shall ensure that, in all LTHW systems provided meet the following requirements:

- a. the main heating distribution pipework is routed such that it is concealed throughout, except for final drops to heat emitters. Pipework, valves and ancillaries are accessible for maintenance;
- b. pipework drops on low surface temperature (LST) pipework are concealed;
- c. the main heating pipework is run in corridors at high level and branches off to serve individual rooms;
- d. wherever possible pipework runs at high level and drops to low level to connect to heat emitters as required. This does not preclude emitters being served from below in the event that this is the optimum route. Where it is proposed to serve emitters from below this shall be approved by the Authority;
- e. all distribution pipework is installed with drain down and isolating valves, to allow the system to be drained in its entirety;

- f. automatic air vents are provided at the top of all risers and on high points within the system. Pipework is laid to fall wherever possible to minimise the number of high points;
- g. pipework is installed to allow easy self-venting and commissioning. The flushing of hot and cold-water systems complies with BS EN 806-4;
- h. any concealed underfloor heating system pipework is pressure tested and witnessed before any final floor covering is applied; and
- i. all indoor AC units and DX coils are fitted with a condensate drain. Condensate wastes shall be connected to the main drainage system via a running trap in a waste guaranteed to carry waste regularly.

2.9.36 LTHW Valves, Fittings and Components

2.9.36.1 Project Co shall ensure that, in any LTHW valves, fittings and components provided, the following requirements are met:

- a. a micro-bubble de-aerator, dirt separator and strainer are installed on the common heating return pipe of all heating systems;
- b. micro-bubble de-aerators, dirt separators and strainers are installed on the primary and secondary heating return pipes where plate heat exchangers are installed;
- c. provision for expansion/contraction of water within the system and cold-water feed is provided either by a packaged pressurisation unit with heating system quick fill facility or a feed and expansion tank. The “make-up” water to heating systems shall be independently sub-metered and monitored by the Building Management System (BMS) to alert the Authority and the relevant School Entity in the case of a school(s) Project] to any unexpected water usage which would indicate a leak in the system;
- d. quick fill units and expansion tanks are located and insulated so that they cannot easily freeze;
- e. expansion vessels are adequately sized for the full water content of the circuit, with at least 2no. independent vessels provided for resilience;
- f. where a feed and expansion tank is installed, it is of sufficient capacity and in suitable condition for the proposed development;
- g. heating circuit design enables flow balancing under all load conditions;
- h. differential pressure control valves are provided on the heating supplies to groups of radiators in order to provide system stability and flow control;
- i. isolating valves, check valves, expansion valves and double regulating valves are installed appropriately to aid commissioning, giving consideration for access and maintenance;
- j. test points, temperature and pressure relief valves, temperature and pressure gauges and draining devices are provided to aid commissioning and balancing;
- k. automatic air vents are provided to aid balancing in the system;
- l. pipework and supports take account of axial expansion;
- m. dosing pots are provided in the plant room for addition of corrosion inhibitors and other water treatment chemicals; and
- n. adjustable valves are provided in break tanks to allow the storage quantity to be adjusted.

2.9.36.2 Project Co shall pressure test all pipework systems.

- 2.9.36.3 Project Co shall include details of the water treatment regime to prevent corrosion and sludge formation in heating systems in the operation and maintenance manual, together with details of commissioning tests and routine tests and dosing. Project Co shall also provide a means of dosing the system.
- 2.9.36.4 Project Co shall ensure that the design and installation of the heating system:
- a. is robust and durable, to withstand accidental or Malicious Damage;
 - b. includes duty and standby boilers and pumps, to ensure that the Facility can function when minor failures of the system occur. Two boilers sized at 66% of the full load and twin head pumps are adequate provision;
 - c. is flexible enough to provide multi-functional use, including third party use of the Buildings (where specified in the relevant Site Specific Brief), without loss of energy efficiency and the use of complex control and operating systems;
 - d. routes heating pipes in co-ordination with other Service Infrastructure and the Building's structure so that major disruption to the Facility is avoided as a result of Programmed Maintenance or Unprogrammed Maintenance
 - e. routes piped water services so as to avoid rooms or areas where leaks would cause considerable disruption and financial loss;
 - f. ensures surface temperatures of heat emitters and associated pipework are safe (see below);
 - g. includes valve isolation such that isolation of circuits/ sub-circuits does not disrupt heating to the remaining Building; and
 - h. includes frost and anti-condensation protection.
- 2.9.36.5 For standard radiators, a surface temperature of 60-70°C is commonly used. If this is proposed for a Project, Project Co shall carry out a risk assessment for young children and children with SEN (D). Students' additional requirements are described in the relevant Site Specific Brief. Where there are nursery-age children or those with complex needs, Project Co will provide low surface temperature radiators (not greater than 46°C) and protection from hot pipework where they are within reach of Students.
- 2.9.36.6 Project Co shall provide zoned systems matched to occupancy areas. Occupied zones must have variable temperature controls and permit zoning for out of hours use. Individual thermostatic control shall be provided to each occupied room or space, e.g., by thermostatic radiator valves
- 2.9.36.7 Heating and thermal comfort in Designated Units or Specially Resourced Provision
- 2.9.36.8 Where children are non-ambulant, or have low activity rates, Project Co shall provide individual tamper-proof room controls, in any space that is used for more than a transitory period. Where Students are likely to overheat at a lower temperature than other Students or are vulnerable to the effects of dust and to infection, this will be noted in the relevant Site Specific Brief and Project Co shall take measures to ensure Students remain comfortable. See paragraph 2.9.42 on Infection Control.
- 2.9.36.9 Project Co shall provide:
- a. localised supplementary heating and cooling if necessary to achieve the required temperatures; and
 - b. measures to control heat gains, such as shading devices for solar control.
- 2.9.36.10 Project Co shall take account of any specialist equipment that could raise the temperature of a space.

2.9.36.11 Project Co shall ensure that heating, ventilating and air conditioning (HVAC) systems are suitable for the needs of the children, for example, where children are particularly sensitive to background noise,

2.9.36.12 Project Co shall not leave Service Infrastructure exposed where they would be difficult to clean for example cable trays, horizontal pipe runs and horizontal ductwork or upper surfaces of horizontal acoustic baffles.

2.9.37 Ventilation (Air Quality)

2.9.37.1 Project Co shall ensure that the indoor air quality and ventilation systems shall be in line with the requirements of these ACRs and the latest version of BB101. In addition, the design criteria CO₂ levels for either natural ventilation, hybrid ventilation, and mechanical ventilation as set out in BB101, shall be improved upon by +20%, and in accordance with the targets below:

TABLE 28 VENTILATION TARGETS

| CO ₂ level design criteria item | BB101 target | This ACR target |
|--|--------------|-----------------|
| Mechanical and hybrid ventilation systems control set points | 1,000 ppm | 800 ppm |
| Mechanical and hybrid ventilation systems Maximum daily average | 1,500 ppm | 1,200 ppm |
| Natural ventilation systems maximum daily average | 1,500 ppm | 1,200 ppm |
| Natural ventilation systems maximum concentration not to be exceeded for more than 20 consecutive minutes each day | 2,000 ppm | 1,600 ppm |

2.9.37.2 Project Co shall ensure that systems are provided to monitor indoor air quality and that systems are designed and installed to effectively control the indoor air quality within the spaces.

2.9.37.3 Project Co shall ensure that the following aspects of indoor air quality are effectively controlled in all spaces:

- a. odour control;
- b. carbon dioxide content;
- c. particulate and/or pollution control; and
- d. dust, moisture and fumes.

2.9.37.4 Project Co shall provide dedicated Local Exhaust Ventilation and local extract ventilation.

2.9.37.5 Project Co shall ensure that systems provided to monitor and control the indoor air quality for Students with SEN (D)s are designed and installed, such that:

- a. they take into account the specialist requirements of the Students as described in these ACRs;
- b. there is no detrimental effect to the learning environment of the Students;
- c. they provide a safe and secure environment for the occupants; and
- d. In any space, Project Co shall provide ventilation by natural ventilation, by a mixed-mode or hybrid system or by mechanical ventilation.

2.9.37.6 Full mechanical ventilation systems shall only be considered where natural and assisted natural systems are not feasible because of outdoor noise, pollution, security or other environmental issues.

- 2.9.37.7 Any ventilation system provided shall be developed to provide fresh air for occupants and maintain/control the indoor air quality (pollutants, CO₂, odours, VOCs) throughout the year. Ventilation should also be considered to meet the requirements for purge and night time cooling as part of the summertime cooling strategy. VOC sensors are not required as part of the system.
- 2.9.37.8 Project Co shall ensure that external noise levels from any ventilation and extract systems provided do not exceed local planning requirements in accordance with the Institute of Acoustics/Acoustic Noise Consultants School Design Guide. Mechanical ventilation shall not create excessive noise. Indoor ambient noise levels shall comply with BB93.
- 2.9.37.9 Any and all mechanical ventilation systems must be designed to operate on a balanced building approach such that the sum of all extract rates shall match the sum of all supply rates. Internally, local regimes can still be applied to promote negative imbalance or air movement towards sources of smells and odours, such as Kitchens and toilets, but overall, the Building must be in balance.
- 2.9.37.10 Any mechanical ventilation systems provided shall be either centralised systems serving multiple rooms or local room-level systems.
- 2.9.37.11 Project Co shall design and provide a balanced supply and extract ventilation system for the whole Building. A single supply and extract air handling unit with heat recovery serving a centralised ventilation system is the preferred solution, with tempered fresh air supply to occupied rooms that need it, and air transfer via ducted and attenuated grilles to corridors, being used as make up air for WC extract. Where internal rooms require additional ventilation to meet thermal comfort criteria, Project Co shall consider whether it is more economic to increase the ventilation rate using outside air at summertime temperatures and increase plant and ductwork distribution sizes appropriately or introduce peak lopping cooling using integral IAHP's within the air handling unit.
- 2.9.37.12 For centralised systems, the use of IAHP air handling units, with both indoor and outdoor coils in the supply and extract air streams, are to be the primary consideration when selecting any such air handling unit (AHU). Where peak lopping cooling may also be required to supply air streams, then the IAHP should be a reversible type to operate in either heating or cooling mode.
- 2.9.37.13 Any air handling unit used in centralised systems shall be located in plant rooms or accessible roof voids, rather than externally mounted on roof areas.
- 2.9.37.14 Mechanical ventilation shall be used to negatively pressurise any areas where there are unwanted odours, including Dining and Social areas, Kitchens, food rooms, and toilets. Where appropriate, ventilation systems shall be interlocked with the gas supply in accordance with IGEM/UP/19.
- 2.9.37.15 All ductwork and plenums shall be fully accessible for cleaning.
- 2.9.37.16 Project Co shall ensure that where mechanical ventilation is used enough fresh air is provided to achieve a daily average concentration of carbon dioxide during the Core Day of less than 800ppm and so that the maximum concentration does not exceed 1,200ppm for more than 20 minutes each day.
- 2.9.37.17 Project Co shall ensure that where natural ventilation is used, the system is capable of providing enough fresh air so that the average concentration of carbon dioxide during the Core Day is less than 1,200ppm and so that the maximum concentration does not exceed 1,600ppm for more than 20 minutes each day.

- 2.9.37.18 Project Co shall endeavour to design natural, mechanical or hybrid ventilation systems to meet the space heating and thermal energy targets given in the Energy and Utilities paragraphs of these ACRs.
- 2.9.37.19 Natural ventilation may be provided through one or more of the following, or through an alternative as long as full justification is provided, and agreed to by the Authority:
- a. openable windows (actuated or manual);
 - b. louvres with dampers (actuated or manual);
 - c. openable inwards windows (actuated or manual) with external louvres; and
 - d. roof mounted units that utilise the stack and wind effect (may be fan assisted).
- 2.9.37.20 Project Co shall ensure that any openable windows and vents provided are designed to avoid inhibiting the effective use of any blinds used for glare control, or for blackout in Practical and Vocational Teaching areas and Performance Spaces.
- 2.9.37.21 Where actuators are used, for actuated window or louvre natural ventilation openings, these shall be electrically driven from low voltage 24v DC regulated power supplies and designed to be appropriate and suitably rated for the type of opening that they are driving open and/or closed. They shall be normally quiet in operation so as not to distract the occupants of the space. They shall be continuously rated for a minimum of 10,000 cycles. If more than one actuator is provided to a single opening the actuators must be synchronised for speed and time of operation. All actuators must include for entrapment monitoring and release functions. All actuators must be fully modulating to be able to be controlled either automatically or manually to within 1mm. All actuators must include for fault monitoring and reporting to the BMS. In multiple occupancy rooms, the default operation of an actuated opening should be automatic. Where actuators are to be automatically controlled they shall be operated and modulated in response to demand driven temperature and/or CO₂ level sensors, as such they must be controlled via the BMS and include for local over-ride controls accessible only by the Authority (or the the relevant School Entity staff in the case of a School(s) project).
- 2.9.37.22 Actuator local over-ride controls shall comprise a single or twin-gang switch plate with a retractive push button and indicator lights to cycle through either automatic operation, manual operation (with separate push buttons for open/close) or over-ride off. The manual controls will default to auto at the end or start of the next BMS timeclock period.
- 2.9.37.23 Where actuated openings are automatically operated, and they are subject to external weather penetration, they shall include for BMS networked rain-sensing controls to over-ride close. This may be manually over-ridden by the occupant via the manual over-ride control as described before. Where louvres are used as part of a natural ventilation strategy, their visual free area and discharge coefficient (Cd) are to be taken into account when calculating and determining the overall equivalent free area. All such data used will be accredited tested data provided by the louvre manufacturer.
- 2.9.37.24 Where possible, the Building geometry should be designed to allow cross-ventilation or stack effect ventilation.
- 2.9.37.25 Attenuation of natural ventilation shall be provided where necessary to meet BB93 indoor ambient noise levels where external noise levels are high.
- 2.9.37.26 Project Co shall ensure that:
- a. restrictors or external louvres are installed on all windows to prevent falls;
 - b. secure louvres or openings are provided for night cooling where an exposed soffit and/or thermal mass has been used as part of the thermal strategy;

- c. any openable roof lights or roof vents shall be designed to provide ease of use by the Authority or the School Entity/(ies) staff in the case of a School(s) Project, and
- d. any natural ventilation systems to large spaces, or serving multiple spaces, such as Halls and Atria shall be designed to be electrically driven and automatically operated by CO₂ and temperature sensing demand controls, as described before. They shall also be provided with wind speed and wind direction compensation controls, to further modulate the actuator to reduce over-shoot and draughts.

2.9.38 Fans

2.9.38.1 Where a mechanical or mixed-mode system is installed, the options to provide ventilation through fans to a Facility include:

- a. fan assisted natural ventilation (either through a facade, atrium system or roof);
- b. local ventilation supply and/or extract fans;
- c. specialist Local Exhaust Ventilation; and
- d. anti-stratification fans.

2.9.38.2 Project Co shall ensure that any fans provided:

- a. are energy efficient and comply with Building Regulations AD L;
- b. where serving multiple rooms or spaces they are provided with velocity sensors to control the fan operation and speed by inverter speed controls; and
- c. where mounted at high level are accessible for installation, maintenance and removal.

2.9.39 Air Handling Units

2.9.39.1 Centralised mechanical ventilation shall be provided through one or more air handling units . Air handling units shall include filters, inverter controlled variable speed plug fans with velocity sensors to control the fan operation and speed by inverter speed controls, acoustic insulation and attenuators as necessary to meet BB93 noise levels. Project Co shall ensure that the correct level of filtration is provided in line with Regulations including AD F and local planning requirements.

2.9.39.2 The air handling Units shall include a remote filter status indication.

2.9.39.3 Where an air handling unit provides mechanical supply and extract it shall contain heat recovery, except when used for Kitchens. Heat recovery can either be achieved through:

- a. cross flow or plate heat exchanger; or
- b. thermal wheel.

2.9.39.4 Where an air handling unit provides balanced mechanical supply and extract and requires a leaving air temperature at peak design higher than can be provided by the heat recovery device alone, or it is required to provide peak lopping cooling, it shall contain an integral air source heating pumps (IASHP), except when used for Kitchens. The IASHP removes any requirement for wet coils within air handling units and is therefore not subject to any risk of freezing. The IASHP air handling unit will comprise of the following components:

- a. Evaporator coil in exhaust air stream, and condenser coils within supply airstreams, after heat recovery device, reversible if required for heating and/or cooling operation;

- b. Integrated compressor enclosure with at least 2no. scroll compressors on 2no. independent refrigeration circuits, and with a minimum of 50% of the load being met by a digital scroll compressor for variable output at part load conditions; and
 - c. Fully packaged integral control panel for synchronised operation of air stream controls with the refrigeration controls.
- 2.9.39.5 Project Co shall ensure that an appropriate air handling unit is selected based on energy efficiency and space requirements.
- 2.9.39.6 Project Co shall position any discharge air terminals to prevent re-circulation into the Building.
- 2.9.39.7 Any exhausts or intakes provided shall be adequately separated when exhaust air is contaminated or polluted, e.g. exhausts from Kitchens, toilets and fume cupboards.
- 2.9.39.8 In accordance with DW/172, Kitchen extract discharge points shall be positioned such that the extracted air cannot be entrained into a supply system. The ductwork shall discharge at least 1.0 m above any openable window or any ventilation inlet or opening. Kitchen extract air will be exhausted to atmosphere by a high velocity vertical discharge duct arrangement.
- 2.9.39.9 Flues shall be high enough above any roof so as to ensure that the fumes are discharged clear of the roof recirculation zones and cannot re-enter the Building or any adjoining Building in accordance with the latest version of BB101.
- 2.9.39.10 For any hazardous fume exhaust systems provided, the methods described in 'Fume Cupboard Exhausts' shall be used to determine height and location of fume cupboard exhausts.
- 2.9.39.11 Where stack heights are limited, e.g., by planning constraints, it will be necessary to increase the plume height by increasing the efflux velocity.
- 2.9.39.12 Fire dampers shall not be installed in exhaust discharge ductwork from fume cupboards or other fume exhaust systems or Kitchen exhaust systems except where Project Co allows for an intumescent type only where when using plastic extract ductwork in science labs it will otherwise be difficult to provide alternative fire protection.
- 2.9.39.13 Project Co shall ensure window and vent operating mechanisms in Classrooms are virtually silent to avoid distraction during lessons. To be acceptable in Classrooms, the noise of actuators (at normal speed) when measured in the occupied zone in the middle of the room shall not give rise to more than a 3 dB increase in the indoor ambient noise level specified for the space over the period of operation.
- 2.9.39.14 Project Co shall ensure that the School is designed so that the air speed flowing across occupants in winter is <0.3 m/s in all teaching spaces. Where pupils may be partially clothed this should be reduced to < 0.15m/s.
- 2.9.39.15 In naturally ventilated Classrooms, Project Co shall provide effective coupling of the ventilation air with thermally massive elements intended to provide passive cooling through use of thermal mass. This will prevent summertime overheating of the room and excess asymmetric radiation from a warm ceiling. Project Co shall design an effective free opening area (A_{eff}) of at least 5% of the floor area with the top of the opening within 200mm of ceiling or exposed soffit level, whichever is the higher. This is required for effective summertime ventilation and cooling of the ceiling or soffit. Project Co will not include downstand beams which prevent this. Project Co shall control any night cooling of thermal mass in soffits or ceilings to prevent over-cooling of the thermal mass, for example, by means of a temperature sensor embedded in the first 70mm of the surface.

- 2.9.39.16 Project Co shall ensure that the rejection of energy laden warm or cool air is minimised in the Building through the use of ventilation systems which limit the pre-heating of ventilation air and exploit the heat gains from occupancy and equipment and by control of the ventilation heat loss through external doors. Project Co shall provide all main entrance doors with draft lobbies.
- 2.9.39.17 Project Co shall ensure that HVAC systems are easily accessible for maintenance, so that measures can be taken to ensure children are not exposed to the bacteria found in moist conditions in ductwork.
- 2.9.40 Local Extract Ventilation
- 2.9.40.1 Project Co shall provide intermittent extract ventilation in accordance with these ACRs and the latest version of BB101 to:
- a. sanitary accommodation and washrooms;
 - b. rooms containing printers and photocopiers in substantial use; and
 - c. food and beverage preparation areas.
- 2.9.40.2 Project Co shall ensure that extract ventilation is taken to the outside and provided with appropriate time and occupancy controls and where possible, extract ventilation shall include a means of heat recovery.
- 2.9.40.3 Project Co shall ensure that ventilation to offices is in accordance with AD F1 Table 6.1b, which requires the total outdoor supply rate for offices to be 10l/s/person. Project Co shall take into consideration the appropriate CIBSE guidance for the ventilation of various types of accommodation including, assembly halls, Atria, plant rooms, laboratories²⁸, sports centres and swimming pools.²⁹
- 2.9.40.4 For any toilet area, or where all toilet cubicles open directly off the corridor, extract shall be provided by using the central air handling unit system (with heat recovery), with the make-up air taken from the surrounding corridors and internal spaces.
- 2.9.40.5 The air handling unit will supply tempered fresh air to the occupied rooms that require it. This air will transfer into corridors, via grilles and ducted and attenuated transfer paths, to be then used as makeup air for the WC extract. Using the fresh air in this manner will assist with ventilating Circulation corridors, recover heat from the WC exhaust air and will provide energy saving for reduced whole Building ventilation rates.
- 2.9.40.6 A whole Building single ventilation air handling unit with heat recovery will provide the optimum solution, with tempered fresh air supply to occupied rooms that need it, and air transfer via ducted and attenuated grilles to corridors, being used as make up air for WC extract.
- 2.9.40.7 All extract air will be provided with heat recovery to the supply air stream using either cross plate heat recovery devices or thermal wheels, with minimum heat recovery efficiencies to EU regulation 1253/2014 (more commonly known as the Ecodesign Directive or the ErP Directive).
- 2.9.40.8 Where full height cubicle partitions are specified in toilets, make up air shall be provided either by a ventilation air path that preserves acoustic and visual privacy including from mobile phone cameras, or supply air must be provided to the cubicle.

²⁸ See also CLEAPSS guide **G14 Designing and planning laboratories (05/09)**, www.cleaps.org.uk

²⁹ Refer to Table 6.3 of Approved Document AD F1 2010.

- 2.9.40.9 In any Kitchen, extract fans shall be fitted with a variable speed inverter control, attenuation and grease and particle filtration. The Kitchen extract system shall be interlinked with the gas supply.
- 2.9.40.10 Project Co shall ensure that adequate and controlled make-up air is provided where extract ventilation is used.
- 2.9.40.11 This section gives the requirements for any extract ventilation, e.g. from toilets, washrooms, photocopiers and printers. Minimum local air extract ventilation rates are given in BB101 table 5-1.
- 2.9.40.12 Project Co shall note the rates of ventilation for sanitary accommodation and wash rooms required as detailed in Table 29 below, which improve on those in BB101.

TABLE 29 MINIMUM WASHROOM EXTRACT VENTILATION RATES

| Room | Local extract |
|--|--|
| Sanitary accommodation and washrooms. | <ul style="list-style-type: none"> • 15 l/s per shower head/bath; or 8 ac/hr of room volume* (whichever is greater) • 6 l/s per WC/urinal; or 6 ac/hr of room volume* (whichever is greater) <p>Individual facilities can use intermittent air-extract but combined facilities opening off Circulation areas shall have continuous extract with a peak rate of 6 achr; a reduced continuous background rate of 4l/s/appliance can be used where there is occupancy sensor control of the higher peak rate.</p> |
| Notes: * Room volume is the total toilet or shower and changing room area, not just the cubicle area | |

- 2.9.40.13 Extract ventilation shall be taken to the outside and provided with appropriate time and occupancy controls.
- 2.9.41 Ventilation for SEN (D)
 - 2.9.41.1 The following is a minimum specification for the design and installation of ventilation in Designated Units or Specially Resourced Provision.
 - 2.9.41.2 The design of ventilation systems for Students with SEN (D) in non-ambulant Designated Units or Specially Resourced Provision shall:
 - a. minimise recirculation to mitigate risk of cross-infection; areas with complex health and hygiene requirements may require precise control of air flows with pressure regimes, depending on the needs of the Students; and
 - b. ensure allergen and pollutant circulation is kept as low as necessary, this may require filtration depending on the needs of the Students and the local external air quality.
 - 2.9.41.3 Project Co shall ensure that the ventilation for teaching spaces in a Designated Unit or Specially Resourced Provision takes account of the typical occupant density (typically around 8 Students compared to 30 in mainstream School accommodation). A design rate per person is not always appropriate, although the general requirements and advice on ventilation shall be adopted.
 - 2.9.41.4 Project Co shall ensure that an assessment of the requirements of the occupants is undertaken before commencing the ventilation system design. This is to ensure that any

specific needs of the occupants are catered for, as the requirements of SEN (D) accommodation vary considerably depending upon the nature of the occupants.

- 2.9.41.5 Ventilation in SEN (D) accommodation shall provide the minimum ventilation rates given in BB101 Table 5-6
- 2.9.41.6 Laundries, soiled holding or waste, and cleaners' rooms shall be ventilated by means of mechanical extract with natural or mechanical make-up air. Toilets for Students with complex health needs and Hygiene Rooms shall be ventilated by means of mechanical extract to outside, with make-up air, heated and filtered. Toilets, showers, changing areas, laundries, cleaners' rooms and spaces holding soiled clothes or clinical waste shall be mechanically ventilated to achieve a slight negative pressure relative to adjacent spaces.
- 2.9.41.7 Ventilation design shall not compromise acoustic performance, particularly where Students have additional sensitivities to noise.
- 2.9.41.8 Ventilation systems shall be controllable and adjustable, according to the needs of individual Students. Air conditioning shall be avoided.

2.9.42 Infection Control

- 2.9.42.1 Where there are Students with complex health needs, ventilation systems shall be designed for infection control and to maintain standards of hygiene in accordance with the latest version of BB101. Staff shall be able to control ventilation for comfort, and draughts shall be minimised so as not to affect vulnerable and immobile Students. Legionella is a higher risk to people with complex health needs, some of whom may be immuno-compromised. Particular attention needs to be paid to legionella prevention in domestic hot water systems and in any adiabatic cooling systems in these schools.
- 2.9.42.2 Where mechanical ventilation is specified, Project Co shall provide filtration, depending on external air quality and design exposure levels.
- 2.9.42.3 Some Students in Designated Units or Specially Resourced Provision may be very vulnerable to infection. In these cases, Health Technical Memoranda, specifically HTM 03-01 Part A, published by NHS Estates shall be consulted and it is essential that infection control policies are in place and implemented. Managing cross-infection is a complex subject, but the risks of cross-contamination can be reduced through adequate source control.

2.9.43 Specialist ventilation

- 2.9.43.1 The following sections detail the technical requirements for a number of specialist ventilation systems within the Facilities.

2.9.44 Kitchen Ventilation:

- 2.9.44.1 Project Co shall design the Kitchen ventilation system in accordance with DW/172 and the latest version of BB101 and ensure:
 - a. maximum internal ambient noise levels shall be in accordance with BB93, 50 LAeq, 30mins dB for new build and 55 LAeq, 30mins dB for refurbishment or remodelling;
 - b. the method set out in DW/172 for calculating the required extract airflow rate for the Kitchen canopy or for a ventilated ceiling is used;
 - c. dedicated supply make-up air systems shall be designed at 85% of the extract flow rate and leakage paths are to be properly managed; and

- d. the method set out in BS 6173 in order to calculate the required ventilation to support combustion for gas appliances is used.

2.9.44.2 Project Co shall ensure that the following requirements are met:

- a. sufficient ventilation is provided to safeguard against the possibility of incomplete combustion;
- b. an interlock is provided between gas supply and mechanical ventilation to ensure that gas will not be supplied when an inadequate airflow rate is provided. This is for safe operation of appliances and the safety of personnel;
- c. the system is fully compliant with the requirements set out in IGEM/UP/11 'Gas Installations for Educational Establishments', IGEM/UP/19 and the requirements for gas services set out in these ACRs;
- d. the system does not cause discomfort to the occupants via draughts. The incoming supply air shall be pre-heated and distributed within the Kitchen area in accordance with DW/172;
- e. the discharge from the exhaust of the system is appropriately positioned;
- f. the discharge from the exhaust of the system does not cause discoloration or damage to any part of the Building's structure or any noise or odour problem to neighbouring rooms or properties;
- g. maintenance and cleaning schedules shall be included in operation and maintenance manuals and a Kitchen user guide shall be produced as part of the Building User Guide;
- h. the Kitchen extract ventilation rate is automatically variable, controlled by an intelligent control module with sensors in the hood and extract ductwork for:
 - a. an optic sensor detecting smoke and steam (in hood);
 - b. a temperature sensor (in ductwork); and
 - c. A carbon dioxide sensor (for gas fueled cooking),the supply air flow rate at either condition is tracked to the extract air flow rate to always be 85% of the extract rate; and
- i. HSE Catering Information Sheet 23 details the risk assessment process that shall be applied by the contractor for refurbishment and upgrading of installations that do not meet the requirements for new installations.

2.9.45 Grease Filters and Odour Control

- 2.9.45.1 Removable baffle type grease filters shall be installed so that they are accessible for cleaning and maintenance. Grease extracted by the ventilation system shall be collected and removed so that it does not accumulate in either the canopy or the ductwork system.
- 2.9.45.2 DW/172 and Defra guidance summarise the available odour control, filtration, and noise control technologies. The priority should be to provide simple technologies that are easily maintained by the Facility and to provide adequate efflux velocity and flue height to provide good dispersal rather than to employ expensive odour control and filtration systems with a lower flue height and efflux velocity. In general, the flue shall terminate at least 1m above the roof or any air inlet at an efflux velocity of at least 10m/s as recommended in DW/172.

2.9.46 Food Room Ventilation

- 2.9.46.1 The following section provides a minimum specification for the design and installation of the ventilation and associated systems in any Secondary School or College food rooms.

- 2.9.46.2 Project Co shall use the following criteria:
- a. there is a door between the food room and any linked space such as a food Preparation Area to prevent contamination from dust;
 - b. exhaust ventilation rates shall be calculated taking account of room size and usage;
 - c. during normal cooking activities, noise generated by extraction systems shall not be loud enough to prevent the Students from hearing the teacher, or the teacher from hearing the Students' voices, as this poses a significant hazard. If possible, it shall be kept below 50 dB or (10dB above the maximum indoor ambient noise level of 40 dBA required by BB93) in accordance with Section 2.12.2 of the IoA/ANC 'Acoustics of Schools: a design guide', 2015. Where this is not possible, higher noise levels of up to 55 dBA will only be acceptable where the teaching staff have control over the ventilation system and can switch it off locally as required for teaching. Noise levels during normal teaching and practical activities shall comply with Section 1.1.3 of BB93. IoA/ANC 'Acoustics of Schools: a design guide', 2015 gives guidance on the higher noise levels allowed during process related Local Exhaust Ventilation, such as from cooker fume extract systems;
 - d. the room shall be kept under a negative pressure during cooking activities;
 - e. displacement ventilation systems which extract the hot air from high level and supply cooler tempered air at low level help to remove heat gains from the occupied zone and limit the ventilation rates required during cooking activities. For ventilation of domestic cookers in food rooms where there are up to 13 cookers in the space, there shall be minimum supply and extract of 42 l/s (150m³/hr) of air per appliance, in accordance with IGEM/UP/11. This may be reduced where displacement ventilation of high effectiveness is used, and a lower rate is shown to be adequate;
 - f. exhaust ventilation may be in the form of individual extraction hoods, but if used, these must not obstruct Student sightlines to the whiteboard. Where separate canopies are used above individual appliances, they shall be designed to have a flow rate exceeding 42 l/s (150m³/hr). This figure is inclusive of the 8 l/s required for CO₂ control.
- 2.9.46.3 In these spaces the assumption is that gas hobs will never all be used at the same time at their full rate and will only be used with Students for periods of less than one and a half hours at a time.
- 2.9.46.4 Mechanical ventilation systems shall be interlocked with the gas supply in accordance with IGEM/UP/11 and IGEM/UP/19.
- 2.9.46.5 Opening windows will require fly guards to prevent insect contamination unless there is mechanical ventilation providing filtered supply air. Fly guards are required where a ventilation system relies on natural ventilation openings at all times. In this case, the resistance to airflow, or discharge coefficient (Cd) of the fly guards must be taken into account in calculations of effective areas (A_{eff}) of openings.
- 2.9.46.6 If refrigerators or freezers are kept in storerooms, ventilation must be sufficient to maintain temperatures in accordance with manufacturers recommended ambient temperatures for the siting of the equipment.
- 2.9.46.7 Heat recovery on supply and extract systems may be provided to minimise heat losses associated with high ventilation rates when cooker hoods are running.
- 2.9.46.8 General room extract systems needs to be positioned to avoid excessive build-up of grease with provision made for easy replacement/cleaning of filters.

- 2.9.46.9 Whilst cookers/hobs are not in operation, the ventilation standards shall be the same as a General Teaching space. However, during cooking where using gas fuel, the levels of CO₂ given in these ACRs shall be achieved.
- 2.9.46.10 Project Co shall ensure that the system does not cause discomfort to the occupants via draughts. The incoming supply air shall be pre-heated and distributed within the space as per the guidance set out in DW/172.
- 2.9.46.11 Project Co shall also ensure that the discharge from the exhaust does not cause discoloration or damage to any part of the Building's structure.

2.9.47 Gas Interlocks

- 2.9.47.1 An interlock is required between gas supply and mechanical ventilation to ensure that gas will not be supplied when there is an inadequate airflow. This is to ensure the safe operation of appliances and the safety of personnel.
- 2.9.47.2 Where there are only Type A appliances i.e., there are no flued gas appliances such as deep fat fryers, interlocking may be achieved by environmental monitoring of carbon dioxide as described in IGEM/UP/19, BS 6173 and these ACRs.
- 2.9.47.3 HSE Catering Information Sheet 23 details the risk assessment process that shall be applied by the contactor for refurbishment and upgrading of installations that do not meet the requirements for new installations.

2.9.48 ICT Server Room Ventilation

- 2.9.48.1 The following section is a minimum specification for the design and installation of the ventilation and associated systems in Information and Communications Technology (ICT) server rooms and hub rooms within the Facilities.
- 2.9.48.2 Project Co shall implement environmental control to provide a stable condition for ICT (Air-conditioning (as required)).

2.9.49 General Requirements

- 2.9.49.1 Typical server rooms can produce high-density heat loads which can affect ICT equipment. Project Co shall ensure that environmental conditions are maintained in line with the manufacturer's recommendations for the equipment to be housed within, or any respective warranty requirements. Security of ventilation openings in the façade shall comply with the ACR.

2.9.50 Ventilation Systems, Air Flow Rates and Heat Loads

- 2.9.50.1 The type of ventilation system required and the strategy to cool the server room will be dependent on the heat loads generated by the equipment.
- 2.9.50.2 If a mechanical ventilation system is used this shall be provided with filtration to prevent dust ingress.
- 2.9.50.3 Project Co shall ensure that server room cooling units provided are sized on the sensible heat loads provided by the manufacturers of the equipment to be installed (allowing for diversity) or the actual measured power consumption of the equipment. Where this information is unavailable half the nameplate ratings of the equipment can be used. Project Co should not normally need to provide more than 250 Watts of cooling per square metre of floor area of the server room. An additional load of 10% should be included for future expansion. For modern server rooms it should not be necessary to

- provide more than 250 W/m² of cooling. Typically, the cooling duty will be in the range of 1.2kW - 6kW for Secondary Schools and Colleges and 400W – 1kW for Primary Schools.
- 2.9.50.4 Where natural ventilation is not sufficient alone for maintaining room temperatures, and cooling is required, a mechanical ventilation system taking advantage of fresh air free cooling is to be prioritised over any refrigeration based mechanical cooling system.
- 2.9.50.5 Where a mechanical ventilation system is used this shall be provided with filtration to prevent dust ingress, and will be designed and installed to extract heat from high level above cabinets (see item above) via an extract air fan arrangement, and with filtered and tempered make up fresh air provided at a low level; so as to promote temperature stratification within the room and to aid heat removal at a high level. Mechanical ventilation will be controlled automatically via a wall mounted internal temperature sensor, to be enabled if room temperatures rise above set-point, typically 22°C.
- 2.9.50.6 All server/hub cabinets to be provided with high capacity/high volume flow rate integral rack roof mounted cabinet cooling fan decks for mechanical ventilation, powered from the cabinet power supply and complete with integral demand led temperatures sensors variable speed controls; to promote air circulation through all rack mounted equipment and to assist with removing heat from the rack to a high level within the server or hub room.
- 2.9.50.7 Where mechanical peak lopping cooling is provided, Project Co shall ensure air conditioning units are positioned for easy maintenance and units and their pipework shall not be located above equipment cabinets in case of leakage. The condensate should be taken to the nearest drain outside the room. Their operation should only be enabled at a higher temperature set point (minimum 5°C dead-band of operation) than that for the mechanical ventilation systems, and their supply airflow should minimise the disruption to the room temperature stratification design philosophy (direct all air discharges to point to a low level within the room). Project Co should demonstrate in their Project Co Proposals how the position of the mechanical cooling systems supports the overall cooling strategy of the server cabinets.
- 2.9.50.8 DX or VRF or alternative cooling shall be provided where required to meet the temperatures specified in Equipment warranties in peak summertime periods. Equipment shall be selected to achieve a Seasonal Energy Efficiency Ratio (SEER) of 6.1 or better when in cooling mode.
- 2.9.50.9 The normal operating range (set point) shall be designed to meet manufacturer's recommended requirements. Temperatures may not exceed this range for more than 200 hours a year. The maximum temperature of the room measured at high level above the server racks shall not exceed 28 °C. The minimum temperature of supply air shall be 15°C. Inlet temperature will be controlled to this level either by mixing with warm room air, or by the use of a ventilation air heat exchanger. Heater batteries will not be used.
- 2.9.50.10 Project Co shall minimise the ventilation and cooling required, for example by locating server rooms on the north façade or in areas of the Building where there are lower thermal gains and on an outside wall. As a minimum there must be an adjacency to an external roof. A ventilation opening to outside or locally controlled extract fan shall be provided to allow for ventilation for occupancy and battery failure.
- 2.9.50.11 As part of a room mechanical ventilation system, or in addition to it, a ventilation opening to outside or locally controlled extract fan shall be provided to allow for ventilation for occupancy and battery failure. This shall allow for ICT staff who are servicing equipment in the server room; and ventilation required by UPS systems for the safe operation of the batteries to allow for the release of inflammable or corrosive gases. Non-gassing valve

- regulated batteries are required for the UPS and do not off-gas except under fault conditions.
- 2.9.50.12 Project Co shall ensure air conditioning units are positioned for easy maintenance and units and their pipework shall not be located above equipment cabinets in case of leakage. The condensate shall be taken by gravity to the nearest drain outside the room.
- 2.9.50.13 UPS systems and server room ICT equipment shall be capable of operating continuously in an A3 classification environment as stated within ASHRAE TC 9.9 2011 'Thermal Guidelines for Data Processing Environments'. This is defined as:
- a. room temperatures of up to 27 °C;
 - b. up to 200 hours per year at up to 30 °C; and
 - c. maximum temperature of 35 °C
- 2.9.50.14 Project Co should demonstrate how the position of the environmental control systems (e.g. air conditioning unit) supports the cooling strategy of the server cabinets.
- 2.9.50.15 The server room and hub room power supply shall be provided with a sub-meter.
- 2.9.51 Design Technology (D&T) / Vocational Teaching Spaces
- 2.9.51.1 The following section is a requirement for the design and installation of the ventilation and associated systems in workshops including fumes from heat bays and wood dust extract where provided. Project Co shall also refer to the detailed guidance provided in the latest version of BB101.
- 2.9.51.2 Ventilation for D&T rooms will require controllable systems designed for dust and fumes that may be produced from equipment and processes. This section includes requirements for varying needs depending on the equipment present:
- a. wood dust extract systems;
 - b. hot metal and foundry ventilation systems; and
 - c. laser cutting and 3-D printing fume extraction systems
- 2.9.51.3 Some Specialist Vocational Teaching spaces may have specialist ventilation requirements, and where required will need to be provided in line with appropriate and relevant commercial and industrial ventilation requirements for such spaces, such as for:
- a. vehicle workshops, or vehicle engine test bays. This can also include for associated specialist activities such as paint spray booths, media/grit blasting, acid etching, plating baths, powder coating, etc.;
 - b. construction and engineering workshops. This can also include for associated specialist activities such as gas engineering workshops, thermodynamics labs, thermofluids labs, electrical or electronics workshops, painting and decorating;
 - c. health and beauty treatment rooms, hair dressing salons, etc; and
 - d. washing and laundry rooms, including for dry cleaning machinery, steam presses and ironing, etc.
- 2.9.52 Design Criteria
- 2.9.52.1 The three major concerns for D&T and Vocational Teaching spaces are dust, fume and heat extraction. These pollutants can be present simultaneously. Design, installation and maintenance requirements for D&T rooms shall comply with BS 4163: Health and safety for Design and Technology in educational and similar establishments.

- 2.9.52.2 A requirement for D&T spaces is to have a centralised airflow rate or the sum of the local extract flow rates of 2.5 l/s/m² when practical activities are occurring. This shall be controllable by staff. This area-based ventilation rate in l/s/m² applies to spaces of 2.7m height or higher. The equivalent air change rate per hour (ach) can be calculated from $ach = (l/s/m^2 \text{ rate}) \times 3.6 / (\text{Room height (m)})$. For spaces below 2.7m in height, the equivalent air change rate to a 2.7m high space shall be used.
- 2.9.52.3 Noise generated by extraction systems should not be loud enough to prevent the normal teacher's voice from being heard by Students, or the Students' voice being heard by the teacher. It should be kept below 50 dB or (10 dB above the maximum indoor ambient noise level of 40 dBA) in accordance with Section 2.21.2 of the IoA/ANC 'Acoustics of Schools: a design guide', 2015. Higher noise levels of up to 55 dBA will only be acceptable where the teaching staff have control over the ventilation system, and it can be switched off locally as required for teaching. Noise levels during normal teaching and practical activities shall comply with Section 1.1.3 of BB93. It is a requirement to achieve the minimum exhaust rates given in 7.5.2.2 within the noise levels given in BB93, Section 1.1.3. IoA/ANC 'Acoustics of Schools: a design guide', 2015 gives guidance on assessing and limiting the higher noise levels allowed during process related Local Exhaust Ventilation such as use of fume or dust extract.
- 2.9.52.4 Fume extraction is required for but not limited to:
- a. hot metal work and heat treatment processes, including for gas fired kilns or hearths, oxy-acetylene welding stations, MIG/TIG welding stations, arc welding stations, etc;
 - b. laser cutters, plasma cutters, etc;
 - c. 3-D printers and CNC machines;
 - d. surface cleaning and finishing and printed circuit board manufacturing (etching);
 - e. soldering of circuit boards;
 - f. for some paints and adhesives, including spray fix as used in art rooms;
 - g. Vocational Teaching spaces, bays, or suites, with ventilation requirements in line with appropriate and relevant commercial or industrial ventilation requirements, such as for vehicle workshops, vehicle engine test bays, paint spray booths, media/grit blasting, acid etching, plating baths, powder coating, gas engineering workshops, thermodynamics labs, thermofluids labs, electrical or electronics workshops, health and beauty treatment rooms, hair dressing salons, dry cleaning machinery, etc; and
 - h. dust extraction shall be provided to all fixed machines provided in D&T, engineering, or construction workshops that might produce dust.

2.9.53 Local Exhaust Ventilation (LEV) Systems

- 2.9.53.1 Project Co shall also refer to the detailed guidance provided in the latest version of BB101. LEV systems local to individual machines shall either be interlocked with the machine so that they will not start without the LEV running or provided with a local switch adjacent to the machine.
- 2.9.53.2 The effectiveness of Legacy LEV systems shall be assessed as required by COSHH and if they do not meet current standards, new LEV systems shall be provided in accordance with HSG 258 Controlling airborne contaminants at work: A guide to local exhaust ventilation. LEV risk assessments and specifications should identify the processes, contaminants, hazards, sources to be controlled and exposure benchmarks. Exposure

benchmarks should be based on EH40 and on CLEAPSS guidance on risk assessments for science and D&T.

- 2.9.53.3 Make up air shall not create draughts or disturb the airflow into LEV hoods and fume cupboards. Ventilation openings shall be designed to minimise such effects and they shall be sited away from LEV hoods and fume cupboards.
- 2.9.53.4 Wherever dust is produced, a risk assessment must be undertaken and, if necessary, a control measure shall be put in place, including for the emptying and disposal of dust from LEV systems.
- 2.9.53.5 Project Co shall ensure that machine-based extract equipment is fit for purpose, meeting with Atmosphere Explosive (ATEX) European Regulations where required, specifically ATEX 137 Workplace Directive, (as integrated into the Dangerous Substances and Explosive Atmosphere Regulations, 2002, (DSEAR)), and ATEX 95 Equipment Directive, (as incorporated into the Equipment and Protective Systems Regulations, 1996, (EPS)).
- 2.9.53.6 Clear management systems and proper, safe work routines including the use of PPE shall be included in operation and maintenance manuals and health and safety log books, and BB101.

2.9.54 Laser Cutters and 3-D Printers

- 2.9.54.1 Project Co shall also refer to the detailed guidance provided in the latest version of BB101. The use of laser cutters and 3-D printers can cause potential health and safety risks. Harmful fumes containing nanoparticles and Volatile Organic Compounds (VOCs) can be produced.
- 2.9.54.2 Laser cutters and 3-D printers must be housed in well-ventilated rooms and provided with efficient fume ventilation systems. There are two types of systems that can be used as shown in BB101 Table 5-3.

2.9.55 Wood Dust Extract Systems

- 2.9.55.1 Project Co shall also refer to the detailed guidance provided in the latest version of BB101. Wood dust extract systems vary, and different Facilities may require differing solutions. Wood dust can be hazardous and particulate matter is required to be cleared and filtered from the air.
- 2.9.55.2 Centralised wood dust extract systems shall be provided for multi-materials Preparation Rooms and adjoining practical spaces, Vocational Teaching spaces and any office/workshop (premises). Low volume, high velocity (LVHV) LEV centralised systems shall be provided. However, individual machine-based extract systems shall be provided in teaching areas where this is identified in the relevant Site Specific Brief. Type selection should be considered in tandem with risk assessment criteria.

2.9.56 Centralised Wood Dust Extract Systems

- 2.9.56.1 Centralised extract systems to machinery shall be designed to meet the requirements of BB101.
- 2.9.56.2 A variable air-flow system should be provided in new installations to limit energy use and noise. Air flow depends on the number of machines in use.
- 2.9.56.3 Project Co shall ensure that machine-based extract equipment is fit for purpose, meeting with Atmosphere Explosive (ATEX) European Regulations where required, specifically ATEX 137 Workplace Directive, (as integrated into the Dangerous Substances and Explosive Atmosphere Regulations, 2002, (DSEAR)), and ATEX 95 Equipment Directive, (as

- incorporated into the Equipment and Protective Systems Regulations, 1996, (EPS)). ATEX rated expansion relief panels should be incorporated into the design of the LEV system.
- 2.9.56.4 See Section 2.21 of IoA/ANC 'Design Guide on School Acoustics of Schools: a design guide', 2015 for guidance on operational noise.
- 2.9.56.5 Issues to consider when designing LEV systems are shown in BB101 Table 5-4, as adapted from CLEAPSS Publication L225.
- 2.9.57 Science Laboratory and Fume Cupboard Ventilation
- 2.9.57.1 The following section provides a minimum specification for the design and installation of any ventilation and associated systems in science laboratories and fume cupboards. Project Co also refer to the detailed guidance provided in the latest version of BB101.
- 2.9.58 General Requirements
- 2.9.58.1 The general requirements for the science laboratories and fume cupboard ventilation systems shall be to:
- a. remove contamination from the extract air caused by chemical processes;
 - b. provide background ventilation for the occupants;
 - c. ensure sufficient ventilation in areas where increased CO₂ and CO levels can be observed; and
 - d. ensure sufficient ventilation for combustion.
- 2.9.59 Design Criteria
- 2.9.59.1 Science laboratories are sometimes used as conventional Classrooms and shall be designed for such as well as for use for practical activities when additional ventilation is required during experiments.
- 2.9.59.2 Practical experiments are carried out in science laboratories in the open teaching space as well as in fume cupboards. The ventilation design shall address the following:
- a. the use of Bunsen burners;
 - b. chemical fumes produced during experiments; and
 - c. the safe and effective use of fume cupboards.
- 2.9.59.3 Table 5-2 from BB101 Aug 2018 gives the required minimum exhaust rates for various sized science and practical spaces.
- 2.9.59.4 Noise levels during normal teaching and practical activities shall comply with Section 1.1.3 of BB93. It is a requirement to achieve the minimum exhaust rates given in Table 5-2 from BB101 for normal experimental conditions within the noise levels for practical activities given in BB93 Section 1.1.3. IoA/ANC 'Acoustics of Schools: a design guide', 2015 gives guidance on limiting the higher noise levels allowed during purge/boost and LEV such as use of fume cupboards.
- 2.9.59.5 Mechanical or hybrid ventilation systems shall be used to provide adequate ventilation during teaching and practical activities in science laboratories to provide the minimum exhaust ventilation rates whilst meeting the cold draught criteria. However, the cold draught criteria do not apply during purge ventilation.
- 2.9.59.6 The levels of CO₂ during practical's can be higher than those allowed during teaching activities but must comply with the gas safety requirements give in IGEM/UP/11, BB101, and these ACRs.

2.9.60 Preparation Rooms

- 2.9.60.1 In preparation rooms where chemicals are stored, ventilation at the minimum exhaust rate shall be continuous during normal working hours, with an override function for use out of these hours. Additional make-up air is required when a ducted fume cupboard is switched on. Ducted fume cupboards shall be used in preparation rooms wherever possible.
- 2.9.60.2 Airflow rates will be high in small preparation rooms and air velocity could be more than the normal face velocity of a fume cupboard in the closed position. At such high airflow rates, the fume cupboard can spill chemicals therefore a long air inlet slot and careful positioning of fume cupboards relative to windows and vents is needed in a small preparation room to keep the airflow velocities down in the space and to avoid chemical fumes being drawn out of the cupboard into the room.

2.9.61 Chemical Stores

- 2.9.61.1 Chemical stores require continuous ventilation 24 hours a day. Air supply shall be at low level and with extract at high level. See section 5.7.5 and Table 5.2 in BB101 Aug 2018.

2.9.62 Ventilation Controls

- 2.9.62.1 Air management systems with programmable controllers can accommodate a wide variety of room arrangements. Fume cupboard extract alongside room extract and supply shall be controlled locally to ensure airflow rates are kept at acceptable levels for varying equipment and room usage.
- 2.9.62.2 Supply-and-extract systems supplying the normal ventilation rate i.e., when the ducted fume cupboards are off shall reuse the heat from the room by mixing or heat recovery to minimise ventilation heat losses.
- 2.9.62.3 Blackout blinds required for physics experiments can interfere with natural ventilation paths, and therefore this needs to be taken into account when designing a ventilation system. During blackout experiments, the ventilation rate can be relaxed to 5 l/s/person.

2.9.63 Fume Cupboard Exhausts

- 2.9.63.1 Exhausts from fume cupboards shall discharge at a safe height above the highest part of the Building. BS EN 14175-3 gives recommendations on the installation of fume cupboards. It recommends that the discharge shall be at 1.25 times the height or 3m above the highest point of the Building and the minimum efflux velocity shall be 7m/s or preferably 10m/s. Where flues are lower than recommended the efflux velocity will need to be increased to overcome downdrafts and design calculations will be needed to prove that the flue height and efflux velocity comply with good practice as described in ASHRAE and CIBSE design guidance.

2.9.64 Mechanical Air Conditioning Systems

- 2.9.64.1 Teaching spaces shall not be provided with mechanical comfort cooling, without prior approval from the Authority. Systems shall utilise passive measures such as reducing solar gain and internal gains to eliminate the need for comfort cooling.
- 2.9.64.2 Where some cooling is required, free cooling through providing a higher ventilation rate is the preferred option for the majority of rooms in a Facility. For some spaces, ICT suites, and/or internal land-locked rooms, peak-logging cooling using the general ventilation fresh air supply may be considered. Typically, a supply air temperature of around 17 or

18°C at the occupancy ventilation rate (either 8 or 10 l/s/person) will be sufficient to meet the thermal comfort requirements of a space.

2.9.64.3 Air conditioning refers to the control of temperature and humidity in the air. In comfort cooling without humidity control, where temperature only is controlled, is required in each Facility.

2.9.65 Refrigerant Based System

2.9.65.1 Where a refrigerant-based system is used the Project Co shall ensure that:

- a. the amount of refrigerant in the system is minimised to reduce the potential environmental impact;
- b. condensing units are sited in accessible positions for maintenance;
- c. the length of refrigerant pipelines is minimised;
- d. pipework is insulated throughout its length and where exposed to sunlight is provided with suitable UV resistant insulation rather than a painted finish;
- e. all indoor AC units and DX coils shall be fitted with a condensate drain connected to the main drainage system via a running trap in a waste guaranteed to carry waste regularly; and
- f. Variable Refrigerant Flow (VRF) and split systems

2.9.65.2 Where VRF or split systems are used, Project Co shall ensure that:

- a. pipe lengths are minimised to reduce the volume of refrigerant;
- b. leak detection is installed to minimise refrigerant losses;
- c. maximum total pipe lengths from outdoor to indoor units, furthest indoor unit from the outdoor unit, maximum height difference between outdoor unit and lowest indoor unit are all within the recommended manufacturer's lengths; and
- d. the equipment is easily accessible for maintenance.

2.9.65.3 VRF should not be used in teaching spaces unless all other options have been exhausted. The following hierarchy should be in place:

- a. natural ventilation;
- b. natural ventilation with fan assistance;
- c. mechanical ventilation;
- d. mechanical ventilation with peak lopping cooling via integral air source heating pumps air handling unit's;
- e. VRF or split systems; and
- f. VRF and split systems should be normally restricted to use in server/comms rooms only.

2.9.66 Finishes and Workmanship

2.9.66.1 Where internal mechanical, electrical, and public health services installations are designed to be exposed, all Service Infrastructure and insulation finishes are to be finished to a very high level in terms of the standard, coordination, quality, and neatness of workmanship, with an emphasis on a clean and tidy finish, coordination with other Service Infrastructure and finishes, and the overall aesthetic. All exposed Service Infrastructure must be carefully coordinated from the outset with all high level exposed Service Infrastructure distribution and infrastructure to be carefully coordinated so as

they do not clash with the Building's structure, architectural finishes, and final M&E fixtures and fittings, including for but not limited to:

- a. acoustic rafts;
 - b. suspended or surface fixed light fittings, including lighting track (lighting layouts and spacing will generally take priority over other exposed Service Infrastructure routes and layouts);
 - c. warm air curtains, or other heating equipment;
 - d. escape signage (lit or unlit); and
 - e. grilles and diffusers
- 2.9.66.2 All exposed Service Infrastructure shall be run straight and true, parallel to internal wall, partitions, or other adjacent constructions. Any Service Infrastructure bends, sets, and cross-overs will be consistent in their offset, and neat in their appearance. Unnecessary bends, sets and cross-overs will not be accepted. All pipework and ductwork ancillaries shall be neatly installed, plum and vertical, and if required otherwise at increments of 45° or 90°.
- 2.9.66.3 All exposed hangers, Unistrut, Gripple wire, and any other fixings and supports shall be neatly cut and centred and positioned at a regular spacing. All Unistrut supports shall be provided with proprietary black plastic caps, and all drop rods will be cut of at 1" of the u/s of the levelling nut and provided with a black plastic cap. All Gripple wire shall be adjusted and excess ends neatly clipped off.
- 2.9.66.4 All exposed cable tray and cable basket shall be neatly cut and centred, with close attention paid to the quality and neatness of cuts and mitres at any changes in direction, sets, tees, and crossovers, etc. All cables shall be neatly fixed, dressed, clipped and tied with either:
- a. final circuit power wiring: cable coloured cable ties;
 - b. comms/data cable: coloured Velcro straps;
 - c. fire alarm cable: fire rated metal clips; and
 - d. sub-mains cables: proprietary cleats.
- 2.9.66.5 All such exposed cable ties and fixings shall be of the same grade and thickness throughout the installations and spaced at regular and consistent centres and always adjacent to neighbouring ties and fixings.
- 2.9.66.6 For any exposed Service Infrastructure requiring insulation, such as ductwork and pipework, Project Co shall set out all Service Infrastructure so as to allow for the final insulation thicknesses and finishes, and when applied insulation between different Services Infrastructure must not be touching.
- 2.9.66.7 All insulation finishes will be neatly undertaken, with neat runs of tape on joints, neatly cut and finished cuts on corners, bends, and sets, etc. Identification banding and direction of flow arrows will be neatly applied at a regular spacing. Rips and tears in insulation to be avoided by protection of finishes and properly sequenced working, but where they occur they will all be repaired neatly with cleanly cut self-adhesive silver tape. At hand-over, all exposed Services Infrastructure and insulation finishes will be fully deep cleaned to remove any grease or dust, marks, pen, paint, etc.

2.9.67 Acoustics

2.9.67.1 Project Co shall ensure that the design of all spaces:

- a. complies with sound insulation, reverberation time and internal ambient noise levels, in BB93, unless alternative performance standards are proposed and agreed with the Authority;
- b. complies with BB93 for speech intelligibility and STI standards in all open plan teaching areas unless alternative performance standards are proposed and agreed with the Authority;
- c. limits noise intrusion through the external envelope from traffic, pedestrians, nearby industry and weather-related noise;
- d. takes into account site and internal room layout, provision of noise attenuation barriers and choice of ventilation systems;
- e. accommodates the needs of Students with SEN (D) and disabilities such as hearing impairments, where additional requirements are highlighted in the relevant Site Specific Briefs; and
- f. for Colleges where spaces are not addressed in BB93 or BB86DFE 'Music Accommodation Design Guide', compliance with the Building Regulations, BS 8233(2014): Guidance on sound insulation and noise reduction for buildings, HTM-0801: Health Technical Memorandum Acoustics, and CIBSE Guide A as referenced in these ACRs is required.

- 2.9.67.2 The ANC/loA guide 'Acoustics of Schools: a design guide' 2015 on how to achieve the standards in BB93 should be taken into account for all Facilities.
- 2.9.67.3 Project Co shall ensure that the maximum indoor ambient noise level including noise from Building Services plant and equipment and internal drainage shall not exceed the levels given in Table 1.1 of BB93, and the tolerances set out in Table 2 of BB93.
- 2.9.67.4 Project Co shall carry out pre-completion and post-completion testing in accordance with the 'Good Practice Guide for the Acoustic Testing of Schools' published by the Association of Noise Consultants and provide all test certificates and submit other details in order to demonstrate compliance with the acoustic requirements. Project Co will be required to remediate problems and retest if the required design standards are not met.
- 2.9.67.5 Project Co shall liaise with the Authority on the specification of data projectors, ICT Equipment and other equipment that the Facility will be running during teaching activities in order to limit the operational background noise levels in accordance with Section 2.21 of the ANC/ loA guide. The Authority shall present these specifications in the ICT Solution Summary. If a Facility has Legacy Equipment which would result in excessive background noise levels in the teaching and learning spaces, Project Co shall advise the Authority accordingly prior to Commencement Date and further advise how it can improve the performance of spaces, for example, by fitting acoustic absorption and acoustic barriers or by providing partial enclosures.
- 2.9.67.6 Project Co shall provide information as described in BB93 to demonstrate compliance with the acoustic standards specified in BB93 in accordance with Section 2 of BB93. This shall include plans, construction details, material specifications, and calculations, as appropriate for each area of the Facility. These shall be included in the acoustics section of the Environmental Strategy Report, and on acoustics drawings and calculations for Building Regulation approval.
- 2.9.67.7 Project Co shall carry out pre-completion and post-completion testing in accordance with 'the Good Practice Guide for the Acoustic Testing of Schools and Colleges' published by the Association of Noise Consultants. 50% of all Classrooms should be tested in line with the aforementioned guidance.

2.9.68 Acoustics for Designated Units or Specially Resourced Provision

- 2.9.68.1 Project Co shall ensure that the acoustic design takes particular account of the needs of any children with communication difficulties, hearing impairment or sensitive hearing. Where necessary, specialist advice shall be sought from acousticians or audiologists specialising in hearing impairment, teachers of the deaf, and/or other specialists. Specialist provision such as radio aids shall be provided as specified in the relevant Site Specific Brief.
- 2.9.68.2 If alternative performance standards are required, Project Co shall put forward a full alternative performance standard in accordance with BB93 to the Authority, clearly outlining the practical implications of the suggested alternatives.

2.10 Energy and utilities

2.10.1 Optimising Energy Use

- 2.10.1.1 Schools and Colleges must be designed to meet the relevant regulated and unregulated carbon dioxide standards, local planning conditions and national regulations. School and College design must ensure resilient energy infrastructure and a reliable energy supply which, where feasible, incorporates low and zero carbon technologies.
- 2.10.1.2 Project Co shall aim to reduce the energy consumption and the operational costs of the School/College's Buildings in line with the energy efficiency hierarchy: be lean, be clean, be green further described below.
- 2.10.1.3 Project Co shall ensure that the Building operates within the energy targets detailed below, and an automated building Energy Management System (EMS) in conjunction with an Automated Energy Data Collection Portal will be provided to help achieve this.
- 2.10.1.4 The portal should use an interface and methodology as developed for the iSERV programme, now operated at k2energy, or k2n (<http://www.k2energy.com/>) and which will be used for the duration of the MIM programme. Alternative and similar systems may be used, such as CarbonBuzz (<https://www.carbonbuzz.org/>), or other industry available proprietary EMS or M&T applications and systems, but they must be agreed with and approved by the Authority before commencement of any services.
- 2.10.1.5 Fundamentally, the Automated Energy Data Collection Portal must comprise an automated cloud based data collection and management system, either as part of or separate from the BMS/EMS, but intrinsically linked to it for information and data collection purposes. It must be able to gather the following information from the BMS/EMS:
- all meter and sub-meter readings (1/2 hourly collection)
 - all external and internal space (room) temperature sensor logs (1/2 hourly collection)
 - all internal space (room) CO₂ sensor logs (1/2 hourly collection)
 - all corresponding building/service/zone timeclock start and end periods
 - LTHW system all flow and return temperature sensor logs (1/2 hourly collections)
 - DHWS system all temperature sensor logs (1/2 hourly collections)
 - any other sensor log relevant to energy use (1/2 hourly collections)
- 2.10.1.6 k2n have a standardised inputs spreadsheet which can be used for guidance, and all data collection should be in an industry standard .xls file format. It must be able to provide automated reports (at least monthly) with easy to understand graphical reporting and kpi's to enable the layperson end user to easy review, understand, and digest appropriate building energy performance data for the entire facility;

- 2.10.1.7 To demonstrate compliance and aid energy efficient design decisions, Project Co shall develop two models for the Buildings: The Concept Energy Model and the Developed Energy Model.
- 2.10.1.8 Project Co shall include an energy performance prediction for Building in the environmental strategy report. The statement will detail the approach to energy efficient design, analyse the results from the energy models produced and explain the energy management and targeting strategy.

2.10.2 Be Lean

- 2.10.3 Passive design considerations. The following are some of the least complex and most cost-effective measures which should be incorporated to help reach carbon dioxide targets. Project Co should consider and include the following measures:

- a. Optimise daylight – including through dual aspect, optimal cill heights and window sizes, higher floor to ceiling heights, shallow floorplates, the use of light shelves, lightwells and rooflights;
- b. Control solar gain, benefitting from the heat when required but not at the expense of overheating in the summer. Optimise the size and depth of windows on each elevation to control and enhance the effect of solar gain;
- c. Optimise the use of shading – limit overshadowing of windows to areas that require daylight or could benefit from solar gain or of the roof if solar renewable technologies are planned. Use shading devices and low g-value glazing to limit solar gains to areas which may be susceptible to overheating;
- d. Optimise the thermal envelope – an efficient thermal envelope is key to reducing the energy performance of the Building;
- e. Insulate the Building, this is one of the most cost-effective ways to make a building more energy efficient, reducing the impact of external temperatures on the internal environment;
- f. Eliminate thermal bridging to prevent the loss of heat and to prevent the development of cold spots which can lead to condensation and mould;
- g. Maximise air tightness (maximum of $3.0 \text{ m}^3/(\text{m}^2 \cdot \text{hr})@50\text{Pa}$) to minimise the impacts of uncontrolled infiltration and control the air entering and leaving the Building (as tested prior to Actual Completion Date handover and with further tests 2 years after Actual Completion Date handover, and every 5 years thereafter, or at the specific request of the Authority);
- h. Optimise the use of thermal mass – which can help retain heat and reduce internal temperature fluctuations. Use light coloured materials where possible to reduce the absorption of heat therefore reducing the likelihood of overheating;
- i. Maximise the potential for natural ventilation – including through openable windows, shallow floorplates, dual aspect units, designing in the ‘stack effect’ system where pressure differences are used to draw air through a building; and
- j. Maximise the efficiency of heating infrastructure by increasing pipe and storage insulation and minimising the length of pipe runs. Size pipes appropriately to reduce pressure losses and select efficient pumps and motors capable of variable flow solutions.

2.10.4 Active system considerations

- 2.10.4.1 Once the passive design of the Building has been maximised, the required mechanical systems must be optimised. Project Co should consider and where practical include the following measures:

- a. include low emission and carbon dioxide efficient heating systems – such as ultra-low NOx and/or condensing gas boilers for small schools and Colleges and community heating systems for larger school and College developments;
- b. include heat recovery – collecting waste heat to pre-heat air or water increasing the efficiency of heating or hot water systems. Consider the use of integral air source heating pumps within air handling units air handling unit, in addition to the normal passive heat recovery device, for total heat recovery of exhaust air stream waste heat;
- c. maximise the use of passive cooling techniques and if mechanical cooling is required, use efficient systems, such as integral air source heating pumps, or heat recovery VRF systems with variable evaporating temperature/pressure controls;
- d. select efficient ventilation systems with low total system pressure losses, high efficiency fans and motors and high ventilation efficiency within occupied zones; and
- e. maximise energy efficient lighting systems. Project Co shall produce Lighting Energy Numeric Indicator (LENI) predictions for the energy performance of the buildings in accordance with the methodology described in BS EN 1519322, with a total LENI for all internal lighting and separate LENI calculations for each of the room types identified in the ADS. The Lighting Energy Numeric Indicator (LENI) prediction figures form the basis for auditing the energy performance and consumption of the internal lighting systems in the Final Baseline Energy Model and In-Use Energy Model, and will be used by Project Co to compare energy performance and consumption with the design intent, and will be reported to the Schools and Colleges as part of the breakdown of the annual energy performance figures provided to the Schools and Colleges and used for the purposes of producing a predicted design stage Display Energy Certificate (DEC).

2.10.4.2 Project Co shall ensure that the maximum lighting energy load in Classrooms and Practical Spaces shall be no more than 1.4 W/m² per 100 lux of illumination.

2.10.4.3 Project Co shall incorporate other energy efficient and energy saving equipment such as heating controls, individual controls, zoning, movement sensors, photo sensors, timers, metering, building management and monitoring systems.

2.10.4.4 Careful consideration needs to be given to what areas of the Building are likely to need light, need to be warm or cool and the activities that will generate their own heat such as the use of IT equipment. Consideration should also be given to when heat will be needed so that a hot water is not being distributed through the school or College during hot weather potentially increasing overheating.

2.10.4.5 Further details on measures to prevent overheating are provided in Building Bulletin 101: 'Guidelines on ventilation, thermal comfort and indoor air quality in schools' (BB101). Active measures should be designed to meet the needs of the School or College so that plant can run efficiently. Oversized plant can lead to the inefficient use or unnecessary use of the equipment. Project Co should be satisfied that the proposed design and energy strategy is satisfactory for the intended use and should secure the appropriate design and technological measures as part of the energy strategy.

2.10.5 Be Clean

2.10.5.1 Once the energy demand has been reduced, the supply of energy must be addressed. Project Co shall assess the potential for the Works to:

- a. connect to an existing district heating network;
- b. expand an existing district heating network and connect to it; and
- c. establish a site wide network and enable the connection of Existing Buildings near the development.

- 2.10.5.2 Where opportunities arise, developments generating energy or waste heat should maximise long term carbon dioxide savings by feeding the decentralised energy network with low or zero carbon hot water.
- 2.10.5.3 The Be Clean energy strategy is likely to be relevant to larger schemes with a substantial heat load comprising two or more Buildings. However, it should be considered for all schemes. When determining whether it is feasible to connect to an existing district heating network, Project Co shall consider the following measures, as appropriate:
- a. the size of the development, and the heat load and energy demand throughout the year;
 - b. the distance of the development to the nearest district heating network or proposed networks;
 - c. the presence of physical barriers such as major roads or railway lines in making a connection to the network; and
 - d. the cost of connection and the impact this has on financial viability of the heat supply.
- 2.10.5.4 When determining whether it is feasible to install an energy centre and establish a heating network, Project Co shall consider the following measures, as appropriate:
- a. the size and density of the scheme, and the heat load and energy demand throughout the year;
 - b. the heat load and energy demands throughout the year and density of surrounding built environment;
 - c. the proximity of and potential supply to any public-sector estates and buildings with communal heating systems; and
 - d. the ability to secure agreements for the connection of nearby buildings or estates.
- 2.10.5.5 Information about existing and planned heat networks across the UK can be found through the Department for Business, Energy & Industrial Strategy website. See <https://www.gov.uk/guidance/heat-networks-delivery-support>.
- 2.10.5.6 Project Co should investigate the feasibility of district heating and include relevant calculations and analysis in the Energy Strategy Report.
- 2.10.6 Be Green
- 2.10.6.1 Low and zero carbon technologies may be required to comply with Building Regulations AD L and local planning requirements to reduce carbon emissions.
- 2.10.6.2 Project Co shall ensure that the low zero carbon technology incorporated into a scheme complements the primary heating equipment.
- 2.10.7 BREEAM
- 2.10.7.1 BREEAM is a Welsh Government and an Authority's Requirement and Project Co should include for this as necessary.
- 2.10.7.2 Project Co is required to achieve a BREEAM rating in accordance with the building floor area in accordance with Welsh Government guidance being a BREEAM "Excellent" rating, with a minimum standard of 'Excellent' for Energy Credits (ENE01) and/or Part L+10%*, whichever the higher improvement.
- 2.10.7.3 [*Part L +10%' refers to a 10% improvement over the Target Emission Rate (TER) for current Part L of the Building Regulations]
- 2.10.7.4 Project Co should refer to the WG BREEAM Briefing Document to identify which credits may or may not be targeted in achieving the required rating.

2.10.8 Energy and water efficiency plan

- 2.10.8.1 Project Co shall develop an Energy and water efficiency plan which will initially form part of the Environmental Strategy Report Stage 1. After the Actual Completion Date this plan forms part of the Energy and Utilities Management Plan (See the Service Level Specification).
- 2.10.8.2 The Energy and water efficiency plan shall form part of the Project Co's Proposals and be developed and implemented from early design stage and be a tool to continuously monitor and benchmark the energy and water efficiency of the as-built installations. The Energy and water efficiency plan shall be developed and improved throughout the Operational Term.
- 2.10.8.3 The plan will include effective monitoring of energy and water to influence user behaviour and ensure efficient operation over time.
- 2.10.8.4 The plan will include key design parameters by which the water consumption target will be achieved, e.g. by reducing the risk of uncontrolled water use, minimising the risk of leakage and by minimising the energy associated with the generation, storage and supply of hot water;
- 2.10.8.5 Project Co shall ensure that the design allows for the predicted water use in the building and Grounds to be less than 2.8m³/person per annum total use for a School or College without a pool. A cost-effective School-specific target for water consumption shall be developed by the Project Co.
- 2.10.8.6 Water meters shall be provided to measure the annual water consumption and, if applicable, the amount of rainwater harvested.
- 2.10.8.7 Project Co shall compare annual water consumption with the project specific target referenced at 2.10.8.72.10.8.5 in the Annual Service Report for discussion at the Annual Service Review. To the extent that the target is being exceeded, Project Co shall investigate the reasons for the increased consumption exceeding the project specific target and put in place measures to achieve the project specific target unless otherwise agreed with the Authority.
- 2.10.8.8 Project Co shall provide Building logbooks and Energy Performance Certificates as required by AD L and its associated guidance 'Non-Domestic Building Services Compliance Guide', 2010 edition.
- 2.10.8.9 Project Co shall ensure that any on-site energy generation, water recycling and harvesting included in the solution is appropriate and proportionate to the needs of the School or College. Any on-site energy generation shall ensure energy efficiency and low carbon output.
- 2.10.8.10 Project Co shall ensure that the overall hot water service operating efficiency (defined as energy contained in the hot water exiting from the tap or shower head, related to the supply side energy used for hot water generation) shall not be less than 65% on an annual basis. Annual calculations shall be provided to the Authority comparing energy in hot water used compared to fuel input for hot water adjusted for efficiency.
- 2.10.8.11 Project Co shall ensure that standing losses for electrically heated hot water services for hand washing must not exceed 10W/basin and that heating of hot water by trace heating of pipework must not be used for legionella prevention.
- 2.10.8.12 The Energy and water efficiency plan shall include the:
 - a. design stage energy and water end use analyses;

- b. a Measurement and Verification Plan which includes details of all sub-meters, a meter and loads schematic diagram, commissioning, data collection, storage and transmission of data and the mechanisms for dealing with any loss of data, e.g., assumptions or interpolations made in the case of missing or incomplete data;
- c. Initial Baseline Energy Model; This energy model will accurately reflect the proposed design and will include system simulation. This must include detailed representations of each system in the building; including for but not limited to individual fans, pumps, system circuits, boilers, chillers, air handling unit's, heat pumps, etc., the control systems, strategies including outside air optimisation, dead bands and proportional bands. Project Co must demonstrate the level of detail that the controls have been incorporated within the model and that simple standardised controls templates have not been solely used. The treatment of thermal bridging must be either designed out or a separate calculation showing what impact this is having on the overall U-Values. An arbitrary percentage allowance within the software used to create the model will not be accepted; and
- d. actions to be taken in design, specification, construction, commissioning and occupancy to reduce water and energy consumption and carbon emissions and ensure effective implementation, with clearly identified responsibilities of relevant parties;

2.10.8.13 At Financial Close the Energy and water efficiency plan will be updated to include the:

- a. Final Baseline Energy Model to at least the same level of detail as the initial baseline energy model updated to represent the developed and finalised design;
- b. Upload energy data to the Automated Energy Data Collection Portal;
- c. as built record drawings showing all meters and connected loads; and
- d. predicted operational water use and energy use and associated carbon emissions for the school site in a format similar to a DEC rating (including regulated and unregulated emissions).

2.10.8.14 Project Co shall produce and continue to develop integrated continuous benchmarking, measurement and verification, and reporting protocols based on best practice tools, methodologies and reporting procedures. The energy and water efficiency plan shall document changes to these protocols through the life of the contract.

2.10.9 Summary of approach to energy modelling

2.10.9.1 At the end of each year the Target energy consumption figures for the Building Load during Core Energy Hours predicted by the Final Baseline Energy Model initially and the In-Use Energy Model once it has been agreed with the Authority will be compared against the actual energy figures for these end uses (once allowable adjustments have been made) and [Section 7] (*Utilities Management*) of the Payment Mechanism will be applied.

2.10.10 The Final Baseline Energy Model

2.10.10.1 Project Co shall develop the Initial Baseline Energy Model throughout the design to produce the Final Baseline Energy Model that includes all the design information for the School/ College including actual profiles, predicted equipment performance and management factors for the actual School/ College. Project Co shall provide the Final Baseline Energy Model to the Authority (as part of the Project Co's Proposals) at Financial Close, together with supporting design simulation assumptions and results. This shall be included in the energy and water efficiency plan.

2.10.10.2 The Final Baseline Energy Model will include an energy analysis of all of the equipment to be installed, based on predictions and equipment surveys. Before the Completion Date, Project Co shall use the Final Baseline Energy Model to confirm that the design meets the

energy cap and the design energy target subject to allowable adjustments to the Initial Baseline Energy Model and to predict the total energy consumption and carbon emissions of the School/ College in the format of a DEC rating for the School/ College. This predicted DEC shall be exported to the Carbon Buzz website.

2.10.10.3 Project Co shall aim for this rating to be equivalent or better than a DEC Rating of C. Where this is not possible Project Co should identify means to achieve the equivalent of a C Rating in future by implementation of efficiency measures, for example by procuring replacement equipment (where it is the Project Co’s responsibility to supply) or recommending replacement items to the School/ College to replace inefficient Legacy Equipment.

2.10.11 Design Parameters

2.10.11.1 The following criteria should be assumed ‘fixed’ unless stated otherwise.

2.10.12 Operational Hours

2.10.12.1 The operational hours are based on an NCM typical school year year and the hours detailed in Appendix 1 of Schedule 18 (*Payment Mechanism*) and provide the details of HVAC operational hours throughout the year. Outwith Core Sessions and Additional Periods when the School or College is closed, systems will be set to the setback temperatures.

TABLE 30 WORKING WEEK

| Timetable | Detail |
|---|-----------------|
| Opening timetable | 07:00 – 17:00 |
| Dining timetable | 12:00 – 14:00 |
| Working week* | Monday – Friday |
| Additional Periods per Academic Year (in blocks of 5 hours) | 60 (300 hours) |

TABLE 31 SCHOOL/ COLLEGE CALENDAR

| From (inclusive) | To (inclusive) | Status |
|------------------|----------------|--------|
| January 01 | January 08 | Closed |
| January 09 | February 12 | Open |
| February 13 | February 19 | Closed |
| February 20 | March 19 | Open |
| March 20 | April 02 | Closed |
| April 03 | May 28 | Open |
| May 29 | June 04 | Closed |
| June 05 | July 23 | Open |
| July 24 | September 03 | Closed |
| September 04 | October 22 | Open |

| | | |
|-------------|-------------|--------|
| October 23 | October 29 | Closed |
| October 30 | December 21 | Open |
| December 22 | December 31 | Closed |

2.10.13 Construction Data

2.10.13.1 All values in Table 32 are limiting values. Project Co shall be expected to design to this value or better.

TABLE 32 CONSTRUCTION DATA

| Construction | Limiting Value |
|---------------------------------|---|
| External roof U –Value | 0.15 W/(m ² .K) |
| External wall U-Value | 0.15 W/(m ² .K) |
| Ground floor U-Value | 0.15 W/(m ² .K) |
| Windows* U-value | 1.4 W/(m ² .K) |
| North G-value | 55% |
| East, west & south G-Value | 40% |
| Air-permeability | 3m ³ /(h.m ²) @ 50Pa |
| * Inclusive of all glazed areas | |

2.10.14 System Options

2.10.14.1 System types should be entered on a room by room basis based on the requirements of the individual space.

TABLE 33 SYSTEM OPTION TYPES

| Main System | Ventilation System | Cooling SSEER* | Heating SCoP** | Auxiliary Energy | | Notes |
|------------------------------------|---|----------------|----------------|------------------------------------|-----------------------------|---|
| | | | | Per Floor Area (W/m ²) | Per Volume Flowrate (W/l/s) | |
| Heated and naturally ventilated | N/A | N/A | 0.55 | 1.23 | N/A | Auxiliary energy, calculated for operational hours. |
| Heated and mechanically ventilated | Centralised balanced mechanical ventilation | N/A | 0.55 | N/A | 3.0 | Auxiliary energy, calculated for operational hours. |
| | Zonal supply system | | | | 1.8 | |
| | Zonal extract system | | | | 1.1 | |
| | Local extract | | | | 0.75 | |

| | | | | | | |

2.10.14.2 Summertime design temperatures given shall only be applicable if the room is being cooled. The requirement for cooling will be established with regards to thermal comfort, in line with these ACRs and public health engineering.

2.10.14.3 All ventilation rates given in (l/s)/m² are based on a standard room height of 2.7m, if this room height is not representative of the room being modelled. The ventilation rate shall be re-calculated using the actual room height.

2.10.15 The In-Use Energy Model and Energy Reporting

2.10.15.1 Project Co shall produce the In-Use Energy Model from the Final Baseline Energy Model.

- 2.10.15.2 Project Co shall produce the Measurement and Verification Plan used to calibrate the Final Baseline Energy Model. This will include the metering strategy, the completed Automated Energy Data Collection Portal facilities and services spreadsheet, and the as built drawings showing all meters and connected loads.
- 2.10.15.3 Pre-Handover checks: Project Co shall ensure that the energy targets will be met from the first day of operation. A standard list of energy related items is to be prepared for the Independent tester to check³⁰. There should also be an energy focussed section on the Snag list. The independent tester, in conjunction with the Commissioning manager, should in particular be checking that the BMS and EMS are correctly set up, that the core hours and term dates have been inserted properly, and that all metering systems are in place and functioning correctly.
- 2.10.15.4 For the first twelve (12) month period after the Actual Completion Date [in respect of the relevant Facility], Project Co will monitor energy consumption. After six (6) months Project Co will compare the actual energy consumption of the school/ college with the predicted energy consumption by the Final Baseline Energy Model on a system by system basis. If there is a significant discrepancy³¹, Project Co will determine the cause of the differences. At the end of the initial twelve (12) months, Project Co will again compare the actual energy consumption with that predicted by the Final Baseline Energy Model and demonstrate that the energy targets are being achieved.
- 2.10.15.5 In subsequent years, Project Co shall refine the In-Use Energy Model to achieve greater accuracy and better energy management and to reflect benchmarks and agreed energy reductions for example through invest to save measures for energy efficiency improvements.
- 2.10.15.6 Allowable adjustments that can be made to the Final Baseline Model, include: changes to Buildings, plant and equipment, weather, and hours of use. For example: excess lighting energy consumption due to operation of blinds, e.g. due to poor visibility of Legacy data projectors; requests from the school/ College to increase temperature set points above the normal maintained air temperatures given in these ACRs; and changes to equipment loads and length of the school day.
- 2.10.15.7 The predicted end use consumptions are compared with actual metered consumption figures and benchmarks or other school/ College end use benchmarks where possible to identify areas where energy is being wasted and to apportion payments in a fair and transparent way.
- 2.10.15.8 In order to claim weather adjustments, Project Co's baseline projections for heating energy consumption must accurately reflect actual consumptions with a reasonable statistical confidence. . Project Co shall use IPMVP Volume I, Appendix B which summarizes basic uncertainty quantification techniques to guide decisions about the level of rigour suitable for each M&V process. Project Co shall also follow ASHRAE Guideline 14 on monitoring.³²
- 2.10.15.9 The metering, monitoring and reporting of the data must be independent of the School/ College's IT system.

³⁰ and Schedules 10 and 13 of the Project Agreement should be updated accordingly

³¹ ie greater than 10%

³² The IPMVP and ASHRAE 14 are complementary documents that provide guidance and instruction to those interested in quantifying the results from energy savings projects.

2.10.15.10 Project Co will provide a screen in a readily accessible location within the Facility which will continuously display the energy data from the EMS

2.10.16 Energy Payment Mechanism – Consumption Risk

2.10.16.1 Project Co shall take the volume risk on the actual consumption of the Building Load during Core Energy Hours $A_{\text{building CEH}}$ to the extent that it is greater than Project Co’s predicted Target energy consumption for the Building Load during Core Energy Hours $T_{\text{building CEH}}$. Project Co’s predicted consumption $T_{\text{building CEH}}$ shall initially be based on the Final Baseline Energy Model and on the In-Use Energy Model once it has been agreed with the Authority, after allowable adjustments have been made, e.g., for weather or changes to Core Energy Hours.

2.10.17 Obligation to produce and agree the In-Use Energy Model

2.10.17.1 As soon as practicably possible following the Services Availability Date, but in any event by the end of the second (2nd) year following the Services Availability Date, Project Co shall use recorded data including actual metered energy consumption data to calibrate the In-Use Energy Model used to predict the Building Load during Core Energy Hours $T_{\text{building CEH}}$, which takes into account allowable adjustments. Calibration and allowable adjustments shall be in accordance with best practice for measuring and reporting on energy and water consumption based on actual weather patterns, the hours that the Facility is open and examples set out in these ACRs. Adjustments to the In-Use Model that affect the Building Load $T_{\text{building CEH}}$ during Core Energy Hours must be agreed with the Authority as they will form the basis of energy payments throughout the Contract Period.

2.10.17.2 Project Co’s Initial Energy Model prediction of the Target Building Load during Core Energy Hours $T_{\text{building CEH}}$ must be less than of **38 KWhe** for both Primary and Secondary Schools and **70 KWhe** for Colleges without pools as in [3.5] of Section 7 (*Utilities Management*) of Schedule 14 (*Payment Mechanism*) of this Agreement.

2.10.17.3 Where kWhe is the equivalent electrical kWh calculated by multiplying the different fuel kWh consumptions for different energy sources by the following standard energy weighting factors:

TABLE 35 STANDARD ENERGY WEIGHTING FACTORS

| Category | Description | Energy Weighting Factor |
|----------------|--|-------------------------|
| Electricity | includes mains electricity, electricity from combined heat and power and renewable energy | 1.0 |
| All Fuels | includes, gas, oil, and biofuels | 0.4 |
| Thermal Energy | includes geothermal, district heat and heat from combined heat and power and solar thermal | 0.5 |

2.10.17.4 At a School or College in which the Core Sessions commence at 07:00 the Core Energy Hours are

- a. all School/ College Day Mornings and all School/ College Day Afternoons on School/ College Days only; and
- b. the hours of 12:00 a.m. midnight to 07:00 a.m. every day of the year.

- 2.10.17.5 The School Day Core Energy Hours shall be 07:00 to 17:00 for 195 days for the initial design and as subsequently agreed with the School/Authority. At a School/ College in which the Core Sessions commence at a different time, the timings given in this paragraph will be adjusted forwards or backwards by the same amount as the commencement time.
- 2.10.17.6 Project Co will share the risk with the Authority on the volume exceeding Project Co's predicted Target Building Load consumption $T_{\text{building, CEH}}$, of 38 kWh (70 kWh for Colleges) and take 100% of the risk on the volume exceeding the energy cap $C_{\text{building, CEH}}$ of 46 kWh for a Primary or Secondary School (85kWh for Colleges). with no pool before adjustments after allowable adjustments have been made and will pay for the extra energy consumed in accordance with [Section 8] of the Payment Mechanism.
- 2.10.17.7 At the annual review meeting the Authority and Project Co should agree that the In-Use Energy Model end use systems targets are achievable and realistic for the school/ Colleges' operation. During the meeting, Project Co shall document, so that the Authority can understand, the discrepancies, if any, between the Final Baseline Energy Model, the In-Use Energy Model, an Automated Energy Data Collection Portal benchmarks and the actual energy consumption figures of the School/College so that the energy consumption may be improved the following year as incorporated into the Energy and Utilities Management Plan. Project Co shall report annually to the Authority on the total fuel consumption figures. At the annual review meeting Project Co shall report on the actual energy consumption figures as compared with the target predicted consumption figures in accordance with [Section 8] of the Payment Mechanism.
- 2.10.17.8 Where Project Co and the Authority cannot agree Project Co's proposed adjustments to produce the Target Building Load during Core Energy Hours, $T_{\text{building, CEH}}$ that determines the Energy Payments, the Authority will employ a suitably qualified independent third party energy assessor, to be agreed with Project Co, to review the Project Co's proposals, the Automated Energy Data Collection Portal benchmarks and the energy and weather data to determine payments. The International Performance and Measurement Protocol (IPMVP) and ASHRAE Guideline 14³³ will be used to resolve any disputes about adjustments to energy payments. Project Co shall subject to clause 57 (Dispute Resolution Procedure) of this Agreement be bound by the findings of such independent third party. Project Co shall upon written request permit the Authority and/or such independent third party energy assessor to inspect any part of the Buildings and/or access to all the Project Co 's records, receipts, invoices, reports, drawings, technical specifications and performance logs relating to the Building Load E_{building} energy consumption figures, so as to enable the Authority and/or such independent third party energy assessor to obtain an accurate assessment of any of the figures quoted. Project Co shall provide all reasonable co-operation and assistance to the Authority and any

³³ See the International Performance and Measurement Protocol (IPMVP) published by the Efficiency Valuation Organization and freely available from www.evo-world.org. Volume I, 2012 Edition describes the methodology and Volume III Part I gives examples of some current applications of IPMVP to new build construction projects.

IPMVP is a framework of definitions and broad approaches whereas ASHRAE Guideline 14 provides detail on implementing M&V plans with the framework.

IPMVP makes a provision for limited metering under Option A whereas ASHRAE requires metering for all options. IPMVP's discussions on balancing of Uncertainty and Cost (Volume 1 Chapter 4.11) are enhanced by ASHRAE's definition of ways to quantify uncertainty so that M&V design decisions can consider costs in light of the best available methods for quantifying uncertainty.

independent third party energy assessor and shall allow them access to such documents and information and shall in a bona fide manner respond promptly to all reasonable requests for further documents and information made by the Authority and/or any independent third party energy assessor in respect of the Building Load E_{building} energy consumption figures, the Project Co's proposals and the projected Energy Payments.

2.10.17.9 The **Target Building Load, $T_{\text{building CEH}}$** on which Project Co and the Authority shall share the volume risk during Core Energy Hours comprises:

- a. **Space Heating** - The temperatures to be used for predicting the initial baseline heating consumption are the normal maintained air temperatures given in Table 27. The minimum room temperature in any serviced area shall be 5°C at which temperature the heating system will be automatically switched on for a minimum of thirty (30) minutes for frost protection. Adjustments can be made where the School/ College chooses to run parts of the building at higher temperatures. This energy end use shall be separately metered;
- b. **Internal lighting and emergency lighting excluding external lighting** - This energy end use shall be separately metered. Hours of use are those in the input parameter data set for the type of school/ College but can be adjusted for actual hours of use where the School/ College chooses to use the lighting out of hours, for example, they may leave all the corridor lights on all night for security purposes;
- c. **[Swimming Pool heating** - including pump and water treatment, and pool related ventilation and air conditioning loads; and]
- d. **Building related services:** including protection systems, fire alarms, sprinkler systems and intruder alarms – lifts - ventilation plant including that serving changing rooms, toilets and Kitchen, boiler plant and pumps and other plant and any air conditioning loads, i.e. to server room or teaching areas. – Project Co shall meter the total electrical load/s for these energy end uses.

2.10.17.10 The **End User Loads**, which are not counted as part of the Building Load for the purposes of the Payment Mechanism are:

- a. **External sports and flood lighting** – This energy end use shall be separately metered;
- b. **External security and amenity lighting** – This energy end use shall be separately metered;
- c. **Hot water** consumption – The domestic hot water loads shall be metered;
- d. catering gas, electricity and water consumptions – These end uses shall be separately metered;
- e. **Server and hub room loads** including all ICT equipment but excluding internal lighting and heating, ventilation and any air conditioning equipment required to achieve the conditions specified in Table 27. Electrical loads to server rooms shall be separately metered; and
- f. **Miscellaneous power loads** - including local extract ventilation such as dust and fume extract (including fume cupboards), ICT equipment outside server rooms and power and equipment loads such as hand driers, kilns, and theatre lighting including small power, Legacy Equipment and equipment provided by Project Co.

2.10.17.11 The Authority is permitted to bring additional power consuming equipment into the Facility. The changes must be notified to Project Co who may need to adjust the In-Use Energy Model end uses accordingly.

2.10.17.12 Project Co and the Authority shall work together to achieve:

- a. an Initial Baseline Energy Model design target in electricity equivalent kilowatt hours, KWhe for $T_{\text{buildingCEH}}$ + Hot Water consumption + Small Power Consumption during Core Energy Hours of less than the following figures depending on the type of Facility;
- b. Secondary School with no pool 66 KWhe;
- c. Primary School with no pool 52 KWhe; and
- d. Colleges with no pool 108kWe
- e. a carbon rating for the [relevant] Facility's total energy consumption equivalent to a DEC rating of C.

2.10.17.13 Project Co and the Authority shall also work together to limit all energy end uses to best practice benchmarks. These benchmarks for large (>10,000m²) Secondary Schools and are currently:

- a. lighting 12 kWh/m²/annum;
- b. external Lighting 2 -12 kWh/m²/annum;
- c. heating 34.5 kWh/m²/annum;
- d. hot water 9 kWh/m²/annum;
- e. fans and pumps (depends massively on extent of HVAC, figures normalised across school/ College total floor area, however range is) 6-15 kWh/m²;
- f. server rooms 8 kWh/m²;
- g. lifts 1 kWh/m²;
- h. IT circa 8-10 kWh/m² (although depends on pupil to PC/laptop ratio and charging method)
- i. miscellaneous and small power 5-10 kWh/m²;
- j. catering 7-14kWh/m²; and
- k. current K2energy/iSERVcmb or similar industry benchmarks for the various energy end uses should be used, where available.

2.10.17.14 Project Co and the Authority shall also work together to limit all energy end uses to best practice benchmarks. These benchmarks for large (>10,000m²) Colleges and are currently:

- l. lighting 15- 30 kWh/m²/annum;
- m. external Lighting 2 -12 kWh/m²/annum;
- n. heating 45 kWh/m²/annum;
- o. hot water 13 kWh/m²/annum;
- p. fans and pumps (depends massively on extent of HVAC, figures normalised across school/ College total floor area, however range is) 6-16 kWh/m²;
- q. server rooms 8 kWh/m²;
- r. lifts 3 kWh/m²;
- s. IT circa 8-10 kWh/m² (although depends on pupil to PC/laptop ratio and charging method)
- t. miscellaneous and small power 15-30 kWh/m²;
- u. catering 7-14kWh/m²; and
- v. current K2energy/iSERVcmb or similar industry benchmarks for the various energy end uses should be used, where available.

2.10.18 Project Co predicted loads

- 2.10.18.1 Project Co shall predict the annual energy and utilities consumptions of the following Service Infrastructure and report on them annually in accordance with the Energy and Water Efficiency Plan. ProjectCo shall report on the:
- a. Building Load end uses identified in these ACRs;
 - b. end user load end uses identified in these ACRs;
 - c. total hot and cold-water consumption; and
 - d. catering hot and cold-water consumption.
- 2.10.18.2 The energy and water consumption of legacy Facilities and Buildings or parts of Buildings which may be let out to the community on a commercial basis, may be used out of the Core Days for community use such as sports or leisure facilities and shall be separately accounted for in energy and water prediction calculations and may be separately zoned and metered
- 2.10.19 Energy and Utilities Monitoring and Reporting
- 2.10.19.1 Metering and sub meters shall be provided as described below.
- 2.10.19.2 Project Co shall ensure that Building Services systems are effectively zoned to reflect the operational use of the different areas of the Facility development to ensure effective control and in order to minimise energy consumption.
- 2.10.19.3 Project Co will provide an EMS which will automatically collect, store energy data, room temperature, CO₂ data as well as data from the site weather station. This is to be capable of transmitting the data offsite independently of the school/ College's IT system.
- 2.10.19.4 The monitoring will be able to display energy consumption on a system by system basis, separated out into individual floors, intuitively labelled so that the area and system can easily be identified. This will used as a diagnostic tool and will use a data collection platform to display the energy consumption.
- 2.10.19.5 Project Co shall use the Automated Energy Data Collection Portal, to monitor and report on the Facility's energy, water, CO₂ and temperature, via the buildings EMS. Project Co shall train the Facility's Premises Team how to use the EMS and the Automated Energy Data Collection Portal monitoring system as part of the building performance evaluation and Soft Landings phases, taking account of any requirements in these ACRs about the way in which the training is delivered.
- 2.10.19.6 The Automated Energy Data Collection Portal must comprise an automated cloud based data collection and management system, either as part of or separate from the BMS/EMS, but intrinsically linked to it for information and data collection purposes. It must be able to gather the following information from the BMS/EMS:
- a. all meter and sub-meter readings (1/2 hourly collection)
 - b. all external and internal space (room) temperature sensor logs (1/2 hourly collection)
 - c. all internal space (room) CO₂ sensor logs (1/2 hourly collection)
 - d. all corresponding building/service/zone timeclock start and end periods
 - e. LTHW system all flow and return temperature sensor logs (1/2 hourly collections)
 - f. DHWS system all temperature sensor logs (1/2 hourly collections)
 - g. any other sensor log relevant to energy use (1/2 hourly collections)

All data collection should be in an industry standard .xls file format. It must be able to provide automated reports (at least monthly) with easy to understand graphical reporting and KPI's to enable the layperson end user to easy review, understand, and digest appropriate building energy performance data for the entire Facility;

- 2.10.19.7 In addition to the data collection platform, a simple energy display app will be provided for the school/ college to use to access headline environmental and energy parameters. It will use MQTT or similar application, to access the parameters for display on phone or tablet devices.
- 2.10.19.8 Following the Actual Completion Date, the Project Co shall monitor the energy use against the installed meters and will provide the Authority via the Automated Energy Data Collection Portal with on line data and benchmark information on at least a monthly basis and a daily basis when required by the Authority, by means of data exchange with the Automated Energy Data Collection Portal .
- 2.10.19.9 The Automated Energy Data Collection Portal reports should be used to provide the feedback interface for the Facility Users by means of the monthly reporting templates. Providing these monthly reports to the Authority will enable them to provide appropriate control over those energy consumers which they influence, helping the overall School/ College energy targets to be achieved. Alternatively, with the Authority's approval, Project Co can choose to use other energy management reporting software to produce similar feedback reports for the School or College.
- 2.10.19.10 ProjectCo shall also commence reporting to the Authority on energy use from the Actual Completion Date using the Monthly Energy Report and Energy Report required under Schedule 14 (*Payment Mechanism*) of this Agreement. The Monthly Energy Report will be set out to report progress monthly against a designated end of year month. This enables progress against contractual targets to be assessed as part of BPE, and early corrective action to be taken if needed.
- 2.10.19.11 To enable the Authority to participate in benchmarking the data from each Facility shall be submitted to the Automated Energy Data Collection Portal by Project Co in a compatible format. Project Co shall also fully describe each Facility with the data requested by the Automated Energy Data Collection Portal.
- 2.10.19.12 The operational data required for the meters and sensors described in the asset spreadsheet shall be automatically exported via the Buildings EMS system to the Automated Energy Data Collection Portal , to enable inclusion in the automated reports which will be sent to Project Co and the Authority (and each School Entity in the case of a School(s) Project). Accessing this data must be independent of the Building's own ICT system. Manual transmission of the data will not be acceptable.
- 2.10.19.13 The minimum level of sensor data required is space temperature, carbon dioxide and lux sensor data for each heating zone (in an occupied space, not circulation), and data from an outside weather station. This allows energy performance and building systems performance to be evaluated. Project Co may choose to include additional sensor data, e.g. room temperature and CO₂ sensor data for each room, in order that further insights into the effectiveness of the Building Services HVAC systems can be provided to the Authority and Project Co. The Automated Energy Data Collection Portal shall be capable of assessing energy use per space by these appropriate sensors being in place.
- 2.10.19.14 Correlating the internal conditions with energy consumption enables the identification of avoidable energy use, building performance issues and sensors or meters that are likely to be out of calibration. This is a powerful means of remote system diagnosis. Project Co

can use this data to aid seasonal commissioning adjustments during the 12-months following the Actual Completion Date and thereafter as required.

- 2.10.19.15 Project Co shall provide monthly exception reporting to identify and isolate incidences of avoidable utilities consumption regardless of who is responsible for the cost of utilities. Project Co shall identify instances where consumption exceeds the predicted end use or established benchmarks, e.g., by more than 15% and additional utilities payments are likely to be incurred. Examples would be if Project Co noticed that: all lights in corridors are left on all night; loads are left on during holiday periods, or there is high consumption overnight or during holiday periods.
- 2.10.19.16 The actual against anticipated use and previous years' data when available will be reported quarterly by Project Co.
- 2.10.19.17 At the end of each Contract Year the actual energy end use consumption figures shall be compared with the predictions from the In-Use Energy Model and the Automated Energy Data Collection Portal benchmarks for other Facilities.
- 2.10.19.18 Project Co shall provide the Authority and their agents with full access with unrestricted use of and rights to energy, heating, hot water, lighting and water consumption metering data. At least the last three years' historic data shall be available in a suitable on-line format designed to be understood by Students and school/ College staff. Project Co shall agree with the Authority the level and type of real time data, including weather data, to be provided for Curriculum use.
- 2.10.19.19 Energy and utility use data shall be acquired and stored on the local EMS every thirty (30) minutes. The data shall be uploaded at least every month, and preferably every day, to the Automated Energy Data Collection Portal for energy management purposes.
- 2.10.19.20 Project Co shall ensure that Facilities are metered separately for all utilities in line with Approved Document L (AD L) in support of the Building Regulations and CIBSE TM39. Automatic Meter Readings (AMR) must be provided on all incoming Service Installations and sub-metering to report energy end use consumptions.
- 2.10.19.21 Project Co shall ensure that the energy use data has separate data streams (usually meters) for all the meters identified above and for each of the following HVAC components that are installed:
- 2.10.19.22 Fixed Building Services Meters:
- a. boiler energy use (electrical and fossil fuel separated);
 - b. hot water pumps;
 - c. domestic hot water pumps and temperature maintenance tapes;
 - d. any separate heat rejection fans;
 - e. individual air handling units (if applicable);
 - f. cooling Systems: e.g., packaged a/c systems and split systems (if applicable);
 - g. heat pumps; (if applicable);
 - h. lighting Distribution Boards; and
 - i. motor Control Panels.
- 2.10.19.23 Additional Meters:
- a. domestic Hot water supplies;
 - b. cold water consumption; and
 - c. small Power Distribution Boards.

2.10.19.24 Specialist Meters:

- a. catering facilities (Gas, domestic hot water, and electricity);
- b. server Room equipment, including UPS;
- c. external lighting;
- d. multi-surface sports facilities and external sports lighting; and
- e. swimming pools (process and lighting loads)

2.10.19.25 Theoretical corrections to end use consumptions where individual metering of that end use is required will not be permitted.

2.10.19.26 The data is usually provided by meters but many HVAC components, e.g., pumps are now fitted with in-built sensors and meters which can be connected to the internet and data collected from them directly. Use of in-built meters will be acceptable to the Authority where they meet the requirements detailed in these Authority's Construction Requirements for meters. Duplicate metering and data collection systems should be avoided where the components can already provide the required data.

2.10.19.27 Project Co shall ensure that data from the AMR system and headline output data from the Building Controls and Energy Management Systems in respect of each Facility, for example room temperatures and heating and hot water flow/return temperatures, is uploaded to the Automated Energy Data Collection Portal and available to the Authority (and the relevant School Entity in the case of a School(s) project) via the web for use in energy management and monitoring energy performance and consumption.

2.10.19.28 The Authority will have responsibility for day to day energy management at the Facility and Project Co will have overall responsibility for energy monitoring at the Facility and shall report findings to the Authority. Project Co and the Authority shall work together to overcome any inefficiencies in system operation identified by the Project Co or the Authority.

2.10.19.29 The Authority may appoint a person with overall responsibility for energy management at the Facility. This person shall report his findings to the Authority and Project Co. Project Co and the Authority shall work together to overcome any inefficiencies in system operation identified by the relevant person responsible for energy management.

2.10.19.30 Renewable energy contracts, payments and incentives must be agreed by the Authority.

2.10.19.31 The energy consumption in run and standby conditions for all equipment shall be estimated by Project Co for the purposes of calculation of energy end use loads. For this purpose, Project Co shall obtain information on Legacy Equipment, including name plate loads, manufacturer's names and serial numbers and shall provide the information to the Authority.

2.10.19.32 Project Co may meter any item of equipment where they would like to determine the actual energy or water use.

2.10.19.33 Project Co shall monitor the individual energy end uses. Project Co shall produce a metering schematic and upload the data to the Automated Energy Data Collection Portal . This will be fully completed by the commencement of the Operational Term. End use data and meter readings will subsequently be uploaded to the Automated Energy Data Collection Portal continuous monitoring and benchmarking website. Project Co shall provide commissioning records for the metering and monitoring system including test data uploads and reports from the Automated Energy Data Collection Portal database. Project Co shall provide as built meter schematic record drawings showing all the meters and the loads connected to each meter.

2.10.19.34 Annually, the Contractor shall report actual consumption figures and DEC ratings on the Carbon Buzz and iSERVcmb websites or similar on-line systems approved by the Authority in order to benchmark the Facility's energy profile.

2.10.20 Weather data

2.10.20.1 Project Co shall:

- a. provide and monitor a weather station at the [/each] Facility that will be in a location regarded as suitable for collecting weather data; and
- b. where available may reference local Met Office data.

2.10.20.2 Project Co shall specify the type and location of weather station to be used.

2.10.20.3 Project Co shall use the weather data:

- a. to calibrate the Final Baseline Energy Model after the first year of operation;
- b. to make adjustments to energy consumption figures for comparison with the In-Use Energy Model;
- c. to record and report weather variations; and
- d. to provide to parties, that require this information, as part of a dispute resolution regarding adjustments to the Building Load, E_{building} .

2.10.20.4 As a minimum the following weather data is required; Outdoor Dry Bulb Temperature, Outdoor Humidity, Wind Speed, Wind Direction, Dew Point and Solar Radiation over a maximum of 1-hour averages.

2.10.20.5 The weather data shall be available for Curriculum use by the Authority [and the School Entity].

2.11 Building Services

2.11.1.1 Project Co shall ensure that the design of Building Services meets the requirements within this section.

2.11.1.2 Project Co shall ensure that the Building Services are designed to comply with Law and best practice guidance.³⁴ Project Co shall ensure that they:

- a. are designed and installed to be effective, safe, clean and hygienic for all users;
- b. are easy to use and avoid complex systems that require specialist maintenance;
- c. are energy efficient in line with current best practice; and
- d. are zoned in accordance with these ACRs.

2.11.1.3 Project Co shall ensure that the use of passive measures are considered before active measures are proposed as part of the integrated building design.

2.11.1.4 Project Co shall ensure that the requirements listed above are in the Environmental Strategy Report included in Project Co's proposals in Schedule 6 Part 4.

2.11.1.5 Project Co shall ensure that the distribution of Service Infrastructure throughout provides flexibility for future refurbishment, expansion and renovation. The Service Infrastructure distribution shall allow ease of access for maintenance but should also be concealed

³⁴ In particular CIBSE and DfE and the Worcestershire County Council Trade Preambles for mechanical and electrical Service Infrastructure which provide a source of good practice guidance for installations in Schools and other public buildings.

throughout, where possible, to enhance the aesthetics of the Facility and to reduce the risk of personal injury, Malicious Damage and harm.

- 2.11.1.6 Project Co shall ensure that the Building Services engineering design and installation:
- a. takes account of the requirements of the end Facility Users and occupants, including those with SEN (D);
 - b. is robust and fit for purpose; and
 - c. is tamper-proof and not easily vandalised or adjusted to the detriment of the system, users or Building itself.
- 2.11.1.7 Any utility services shall follow Good Industry Practice and be compliant with all relevant Law including the 'Environmental Protection Act 1990'.
- 2.11.1.8 Project Co shall notify the relevant authority in accordance with Law, obtain any required approvals for the installation and negotiate new provisions where required to meet these ACRs.
- 2.11.1.9 Project Co shall comply with utility company infrastructure work requirements, undertaking any necessary reinstatement, protection or diversions of existing Service Infrastructure within the Site[s] with minimal disruption to Service Infrastructure and surrounding public and Facility activities.
- 2.11.1.10 Project Co shall ensure that any incoming utility supplies run within the Site boundary and are routed in accessible locations throughout the Site. Project Co shall install the incoming Service Infrastructure from the Site boundary to the Facility Building to follow roadways, paths etc. Project Co shall avoid routing of incoming Service Infrastructure across sports fields.
- 2.11.1.11 Project Co shall locate any electrical substations and gas meter houses on the Site boundary in an accessible, unobtrusive and convenient location to allow for out of hours access by the relevant Service Provider. Project Co shall liaise with the relevant Service Provider to ensure that the locations and design of the substations and gas meter housings are in line with the relevant Service Provider's specific requirements.
- 2.11.1.12 Project Co shall ensure that the following requirements are met:
- a. Service Infrastructure is to be located and routed in order to provide flexibility and choice for room layout;
 - b. pipe work, cables and equipment are easily accessible for maintenance, while allowing that in Specially Resourced Provision and Designated Units services may need to be concealed;
 - c. all connections, distribution systems, components and containment systems are safely protected, tamper-proof, correctly insulated, free from exposed contacts and clearly labelled;
 - d. all visible pipe work and cable containment finishes are complete, clean and hygienic;
 - e. all plant, machinery and switchgear is guarded and locked where appropriate;
 - f. locks and interlocks are fitted as required by the appropriate statutory bodies;
 - g. the integrity of fire breaks within ceiling and roof voids cannot be breached by the installation of Service Infrastructure; and
 - h. Service Infrastructure default is set to 'off'.

2.11.2 Boiler plant

2.11.2.1 Project Co shall ensure that:

- a. all boiler loads are based on the results of an hourly heat demand model for the Building³⁵;
- b. all tanks are designed for future use with bio-fuel;
- c. all burners are commissioned by an engineer employed by the burner or boiler manufacturer;
- d. carbon monoxide (CO) detection equipment interlocked with safety shut-off valves is installed in all boiler rooms;
- e. all chimney flue systems except those serving direct gas fired boilers operate under negative pressure without flue fans;
- f. there is an adequate gas supply available for the proposed installation. Project Co shall be responsible for all aspects of liaising with the relevant Service Provider to provide the necessary gas connection. The gas supply shall be without the use of gas boosters wherever possible;
- g. boilers are provided to give a margin to allow for maintenance; to be sized as 2 boilers at 66%; or 3 at 40%; or modular boilers sized so that N boilers provide 100% capacity and N+1 are installed;
- h. the burner control is modulating type in accordance with AD L and that the boilers are controlled to optimise the efficiency of the system;
- i. direct 'Weather compensation' is used to vary the boiler flow rate and leaving water temperature according to the outdoor air temperature to maximise energy saving (constant temperature boiler operation with downstream mixing valves is not allowable for gas fired condensing boilers, only allowable for higher temperature heat sources such as biomass boilers or CHP engines);
- j. condensing boilers make full use of the condensing mode of the boilers during part load conditions, i.e., the boilers operate with a design return temperature of no higher than 50°C at peak full load operation and have a weather compensation schedule (as item c. above) to reduce the return water temperature to 20°C at mid-season part loads; and
- k. the boilers have maximum NO_x emissions of 40 mg/kWh unless otherwise stated in the planning application or other relevant standards documents.

2.11.2.2 Project Co shall ensure that there is an appropriate flue provision for any boiler installation that is manufactured by a Member of the British Flue and Chimney Manufacturers Association (BFCMA). The flue shall be twin walled and insulated. The flue system shall be designed to manufacturer's recommendations and comply with the requirements of The Clean Air Act 1956 and the local planning authority.

2.11.2.3 Project Co shall ensure that any boilers provided are located in a dedicated main plant room or purpose formed boiler room. The Plant Area shall be naturally ventilated, including the air required for combustion purposes, via louvres and/or louvered doors. The ventilation shall comply with the requirements of current Building Regulations, IGEM standards, Welsh and British Standards and UKLPG recommendations. Permanent ventilation openings at high and low level will be provided to the external wall of the boiler plant room as necessary to comply with IGEM/UP/10 and BS 6644.

³⁵ An example is the heat demand model used in the carbon trust biomass boiler sizing tool.

- 2.11.2.4 Welsh and British Standards and UKLPG recommendations. Permanent ventilation openings at high and low level will be provided to the external wall of the boiler plant room as necessary to comply with IGEM/UP/10 and BS 6644.
- 2.11.3 Commissioning/Acceptance/Annual Tests for boiler/flue systems
- 2.11.3.1 For all boiler plant and direct-fired hot water generators of output greater than 4kW, Project Co shall carry out commissioning and annual performance tests for emissions and combustion efficiency and record the results in a logbook. Tests shall be in accordance with professional-level guidance such as that published by the Carbon Trust and the Chartered Institution of Building Services Engineers (CIBSE).
- 2.11.3.2 Project Co shall ensure that the boiler/flue system is tested during commissioning once the boiler can be brought up to full fire for a sustained period as follows:
- a. by flue gas analysis with an EN 50379:2³⁶ compliant instrument;
 - b. at full fire and at low fire;
 - c. for O₂, CO, CO₂, HC measured in mg/m³;
 - d. to record the temperature of the incoming combustion air and of the flue gases;
 - e. for pressure differential to verify the performance of the flue. The flue system is tested to ensure that its leakage rate does not exceed that designated according to EN1443³⁷ for the particular flue type; and
 - f. the flue gas loss % (i.e. - % energy loss up flue [Siegert Formula]), lambda (the degree to which the fuel air mix approaches the ideal), boiler efficiency and dew point shall be recorded.
- 2.11.3.3 Where there is no permanent monitoring of flue gas analysis, flue gas temperature, mass flow, flue gas velocity and draft there is an opening with readily removed, gas-tight cap into the side of the primary connecting flue of 12 – 22mm for a Flue Gas Analysis probe. This is within 500mm of the boiler connection or according to the boiler manufacturer's instruction and upstream of any draft stabiliser or anything which might alter the temperature or composition of the flue gas.
- 2.11.4 Annual monitoring
- 2.11.4.1 Project Co shall design the system to enable annual repetition of the above test to provide an independent check on the system's efficiency and its emissions (as required by the Service Level Specification).
- 2.11.5 Biomass and biofuel systems
- 2.11.5.1 Biomass boilers should only be used with the explicit written permission of the Authority, and dependent upon a detailed business case being provided to demonstrate how a biomass boiler would represent best value for the Facility in terms of energy reduction and whole life operational costs.
- 2.11.5.2 Project Co shall assess the feasibility of using any biomass boiler systems using the Carbon Trust Biomass Boiler sizing tool. The tool should be used to prove that the heating system balance temperature, the utilisation factors for the boilers, the sizes of buffer vessels and/or thermal stores and the seasonal heating system efficiency justify the use

³⁶ BS EN 50379.2

³⁷EN 1443 Flue leakage

of biomass as a fuel and justify the key parameters of the system design. Account shall be taken of Law and design advice³⁸.

- 2.11.5.3 For biomass and biofuel systems to function efficiently, a reliable and consistent supply of quality-controlled fuel is required³⁹. Project Co is expected to demonstrate that local sources of suitable such fuel are readily available from a minimum of three (3) independent sources or providers to ensure competitive fuel supply and delivery costs.
- 2.11.5.4 The feasibility assessment and planned fuel supply shall be recorded in heating strategy in the [] Environmental Strategy Report included in the Project Co's Proposals in Schedule 6 Part 4.
- 2.11.5.5 Project Co shall complete the design and installation of biomass boiler systems to all relevant current standards and regulations including CIBSE AM15 - Biomass Heating Application Manual, 2014.
- 2.11.5.6 Project Co shall provide biomass boiler units installed in line with the manufacturer's requirements.
- 2.11.5.7 Project Co shall ensure safe, suitable and efficient fuel storage and delivery and ash handling is in place to accommodate the biomass installation.
- 2.11.5.8 Where biomass is proposed, the day-to-day management of this installation must be fully discussed and agreed with the Authority.

2.11.6 Water supplies

- 2.11.6.1 Project Co shall design, supply, install, test and commission a potable/non-potable cold-water service system capable of providing an adequate supply of potable and/or non-potable water to draw off points throughout the Building.
- 2.11.6.2 The system will be designed to the following parameters:
 - a. maximum velocity of water in pipework - 2 m/sec; and
 - b. maximum water temperature in accordance with L8
- 2.11.6.3 Project Co shall design and install public health Engineering Services in accordance with these ACRs and public health engineering. Drinking water facilities and hot and cold-water supplies shall comply with the School Premises Regulations 1999.
- 2.11.6.4 Project Co shall comply with the School Premises Regulations for drinking water facilities and for hot and cold-water supplies.

2.11.7 Drinking water

- 2.11.7.1 Project Co shall design and install any domestic water services systems provided to serve the Works to be:
 - a. sufficient to accommodate the proposed level of occupancy and in line with all relevant standards and statutory requirements;
 - b. robust and fit for purpose;
 - c. not routed such that the location of pipework and connections impact on the learning environment within the Facility;

³⁸ Guidance on what load is suitable to be met with which type of biomass system, burning which fuel and on system design is available from CIBSE and the Carbon Trust.

³⁹ BS EN 15234-1:2011 Solid biofuels. Fuel quality assurance. General requirements.

- d. designed and installed to be safe, clean and hygienic for all Facility Users; and
 - e. designed and installed such that they minimise unnecessary water usage.
- 2.11.7.2 Project Co shall ensure that wholesome supplies of fresh palatable drinking water are provided around the Facility, both internally and externally, and that these outlets:
- a. are adequate for the number of Student places;
 - b. may be taps over Classroom sinks, fountains or bottle fillers;
 - c. are located in line with the relevant Site Specific Brief;
 - d. are positioned to be easily accessible by all Students at all times, but physically separate from toilets and hand washing areas;
 - e. are clearly and correctly marked as drinking water;
 - f. shall have appropriate drainage facilities and be sufficiently robust to deter casual vandalism; and
 - g. shall be provided in every Dining and Social area.
- 2.11.7.3 Project Co shall ensure that, due to the difficulties of meeting all the conditions for water quality, wherever possible drinking water supplies in Facilities shall be connected directly to the cold water main and that water supplies fed from storage tanks not designed for potable water provision shall be clearly labelled as “not drinking water”.
- 2.11.7.4 Project Co shall ensure that:
- a. drinking water outlets and fountains should be located to avoid misuse, spillages and waste;
 - b. drinking water installations should be designed to permit Facility Users to recharge water bottles using spigots and the supply system should incorporate a ‘dead’ handle system to minimise spillages and prevent the water supply being left on;
 - c. drinking fountains must have appropriate drainage facilities and be sufficiently robust to deter casual vandalism;
 - d. details of drinking water provision are included in the water efficiency plan as part of the Environmental Strategy Report in Project Co’s Proposals in Schedule 6 Part 4;
 - e. in Secondary Schools and Colleges, a drinking water fountain shall be provided on each floor of each Building, with one drinking water fountain serving a maximum floor area of 1000m²;
 - f. in Primary Schools, drinking water shall be supplied to all Classroom sinks via a labelled tap. In any Suite of Spaces where there are no Classroom sinks, drinking water fountains shall be provided that are easily accessible to all Students in that suite; and
 - g. a drinking water fountain shall be provided in an inside area easily accessible from external areas used for play and sport.
- 2.11.8 Rainwater for use (Rainwater Harvesting)
- 2.11.8.1 Rainwater for use, or rainwater harvesting, should be prioritised and designed in accordance with Sustainable Drainage Systems Standards for Wales 2018, and all other current codes of practice and Good Industry Practice.
- 2.11.8.2 Acceptable uses are for toilet flushing and external irrigation. All distribution pipework must be undertaken in a physically different material and colour of pipework, such as

black HDPE with green stripes, and with the text “Rainwater” imprinted on pipe wall for additional identification, and so as not to be confused with other water services.

2.11.8.3 Project Co shall ensure that rainwater supplies:

- a. Provide active rainwater attenuation, whereby storm water attenuation is combined with rainwater for use, with controlling devices linked to the Met Office short/medium term rain prediction system, to actively and automatically control the level of stored rainwater, and to predict for future rainfall events requiring additional attenuation capacity.
- b. Includes for a below ground water storage tank, with leaf filtration, suction filtration, access covers, primary pumping using duplex submersible pumps, and packaged controls
- c. Includes for an above ground break (buffer) tank, with all level sensors, fine gauge filtration, WRAS compliant mains water top up, twin duplex pumps for final distribution, and all packaged controls.

2.11.9 Hot and cold-water services

2.11.9.1 Domestic hot and cold water shall be provided to toilets, changing rooms and showers, Kitchens and food rooms and cleaners’ stores which have sinks. The hot water generation system must be able to be operate independently of the space heating system to prevent heat loss increasing the risk of overheating.

2.11.9.2 Project Co shall ensure that hot and cold-water supplies shall:

- a. be chosen to fit with the relevant Facility's requirements as set out in the relevant Site Specific Brief, considering such issues as storage availability, pressure and emergency provision;
- b. be provided with automatic meter reading on incoming supply and a metered supply to the Kitchen;
- c. provide mains or tanked cold water to external areas, for Grounds maintenance, landscaping and firefighting;
- d. provide mains water or tanked potable water direct to internal areas, including Kitchens, staff/rest rooms, technology rooms, vending machines and medical rooms, as detailed in the ADS; and
- e. provide water service to outlet points that comply with BS6700⁴⁰ and BS6465⁴¹.

2.11.9.3 Hot water system design and installation shall prioritise the use of local non-storage (or low storage) point of use electric hot water heaters, in order to reduce standing losses from centralised systems, and to prevent pipework heat loss increasing the risk of overheating. Centralised hot water generator systems shall be used only where:

- Site specific electrical infrastructure limitations are present where it is not economically viable or sufficient to support electric hot water heating loads.

⁴⁰ BS 6700 Design, installation, testing and maintenance of services supplying water for domestic use within buildings and their curtilages.

⁴¹ BS 6465 Sanitary installations. Code of practice for the design of sanitary facilities and scales of provision of sanitary and associated appliances.

- a Low and Zero Carbon system is acting as the lead heat source for heating and/or hot water generation and requires to act as the baseload for improved system utilisation (i.e, ASHP, GSHP, solar HWS, CHP or Biomass heat sources)
- a large single point of use of hot water exists, such as a main cooking Kitchen facility, and the gas fired DHWS generator can be located immediately adjacent to it. (School changing rooms are not considered as a large single point of use as the showers will invariably not be used. Point of use electric showers to be provided)

Where a centralised gas fired hot water generator system is provided, it must use a fully condensing burner system, it must be demonstrated that all system and standing losses are minimised, and that the optimum overall energy solution for generating domestic hot water has been provided.

- 2.11.9.4 Hot water temperatures at the point of use must not pose a scalding risk to Facility Users. This means that for baths and showers, and in all cases where the occupants are severely disabled, the hot water should not be above 43°C. For all hot water generation equipment, the discharge from any pressure and temperature relief valves must be fitted with correctly sized tundishes and routed to drain in insulated copper pipework so as to remove the risk of scalding to any person in the event of a discharge.
- 2.11.9.5 Hot water supplies to washbasins in Nursery Schools and Primary Schools should also be limited to 43°C.
- 2.11.9.6 Where domestic hot water is supplied without local thermostatic control, all taps shall be appropriately labelled and shall not be located in areas where Students have unsupervised access.
- 2.11.9.7 Particular care shall be taken to avoid problems which might be caused when cold water pipe work shares a distribution route (such as a ceiling void) where it can be warmed by adjacent heating and hot water pipe work to an unacceptably warm temperature.
- 2.11.9.8 Water tanks, where required, shall have the minimum possible capacity to prevent stagnation and are suitably located to allow for cleaning. For Primary Schools, water storage shall equate to no more than 3 litres per person; for Secondary Schools and colleges water storage shall equate to no more than 5 litres per person. All water tanks shall be provided with adjustable delayed action type float valves to allow for easy adjustment of the stored water volume of between 25% and 100% of nominal tank storage capacity.
- 2.11.9.9 Hot water loads, and annual energy consumption figures shall be based on accurate predictions of all water consuming appliances with their predicted use profiles and actual efficiencies of the hot water generation systems used including predictions of standing losses. They shall not be based on benchmark figures or default figures.

2.11.10 Prevention and control of Legionellosis

- 2.11.10.1 Project Co shall ensure that hot and cold-water systems shall be installed, commissioned and maintained in accordance with the provisions of the HSC Approved Code of Practice for the Prevention and Control of Legionellosis, L8. Particular account should be taken of the vulnerability of Students with SEN (D).
- 2.11.10.2 In conjunction with the Authority, Project Co shall produce, a legionella risk assessment and management scheme for controlling the risk of exposure to legionella bacteria in accordance with HSE approved code of practice L8: 'Legionnaires' disease. The control of legionella bacteria in water systems'.

- 2.11.10.3 A written scheme shall be produced for controlling the risk of exposure to legionella bacteria in accordance with HSC Approved Code of Practice L8⁴².
- 2.11.10.4 Project Co shall produce a water quality policy document setting out the guidance and strategy that will be followed to protect staff, Students and visitors against the risk of legionella infection. It shall include the framework of the procedures designed to achieve this aim. It shall specify the management, operational and specialist responsibilities and lay down a clear management and communication structure to ensure that it is fail safe.
- 2.11.11 Water supplies in Science accommodation
- 2.11.11.1 Water supplies in new science accommodation serving sinks and dishwashers used for science equipment shall be designed to cater for Fluid Category 5. This requires a separate circuit served from a tank with an air gap. Alternatively, Project Co must agree the Fluid Category and the protection against back-syphonage with the local Water Company and a Fluid Category 4 type installation may be acceptable (preferred method)⁴³. Where CAT 5 break tanks are provided these shall be limited in capacity to not exceed 100 litres storage to reduce potential water stagnation issues.
- 2.11.11.2 Water supplies in science labs shall be provided with central isolation operable by the teacher. This generally will be integral to any control unit also providing the science lab lag proving and isolation, and any electrical circuit central isolation
- 2.11.11.3 Adapters fitted to taps to provide an air gap are not acceptable in science as they prevent many experiments from being carried out
- 2.11.12 Water supplies in Designated Units or Specially Resourced Provision
- 2.11.12.1 Project Co shall ensure that all hot water delivered at outlets such as basins, sinks and showers used by vulnerable Students shall not be above 43°C. This shall be achieved through the use of local fail-safe thermostatic mixing valves.
- 2.11.12.2 Project Co shall ensure that any hydrotherapy and warm water pools provided should be designed and installed by specialists, having regard to their previous reliable performance and the guarantees or warranties available.
- 2.11.13 Domestic Hot and Cold-Water Pipework
- 2.11.13.1 Project Co shall ensure that, for any domestic hot and cold-water pipework provided, the following requirements are met:
- a. all distribution pipework is installed with drain down valves to allow the system to be drained in its entirety. Automatic air vents are provided at the top of all risers and on high points within the system. Pipework is laid to falls wherever possible to minimise the number of high points and installed to allow easy self-venting and commissioning;
 - b. the design and detailing of hot and cold-water systems complies with BS 8558 and BS EN 806-2 and in accordance with HSE publication 'The control of legionella bacteria in water systems approved code of practice and guidance', L8;

⁴² See Appendix 9 of Worcestershire County Council Water Quality guide *Water quality, management arrangements for the control of Legionella and maintenance of wholesome water quality in County Council buildings*.

⁴³ More details regarding the Fluid Categories can be obtained from the Water Regulations Advisory Scheme, www.wras.co.uk

- c. the domestic hot water supply system incorporates the facility to pasteurise the system during periods when there is little or no use to prevent the growth of legionella within the system;
- d. calorifiers have de-stratification pumps;
- e. the cold-water supply is in line with BS 8558, BS EN 806-2;
- f. the pipeline sizes for hot and cold-water systems shall be calculated to meet simultaneous demand for the Building in accordance with BS EN 806-3;
- g. pipe sleeves comply with BS EN 1057; and
- h. installation, hydraulic pressure testing, flushing and commissioning shall be in accordance with BS 8558, BS EN 806-4, BSRIA BG 2/2010 and CIBSE Commissioning Code W. Sample points shall be at the main supply to CAT5 tanks; hot water storage cylinders; and cold-water storage tanks.

2.11.13.2 Project Co shall produce the following.

- a. in conjunction with the Authority, a legionella risk assessment and management scheme for controlling the risk of exposure to legionella bacteria in accordance with HSE approved code of practice L8: 'Legionnaires' disease. The control of legionella bacteria in water systems'; and
- b. a water quality policy document setting out the guidance and strategy that will be followed to protect staff, Students and visitors against the risk of legionella infection. It shall include the framework of the procedures designed to achieve this aim. It shall specify the management, operational and specialist responsibilities and lay down a clear management and communication structure to ensure that it is fail-safe.

2.11.14 Domestic Hot and Cold-Water System Valves, Fittings and Components

2.11.14.1 Project Co shall ensure that, for any domestic hot and cold-water system valves, fittings and components, the following requirements are met:

- a. pressure gauges are installed in line with BS EN 837-1 and temperature gauges installed in line with BS EN 13190;
- b. WRAS approved pipeline strainers are installed;
- c. floats for ball valves comply with BS 1968 for copper and BS 2456 for plastic. Ball valves shall be brass copper alloy;
- d. lift type check valves are provided in copper alloy and in line with BS 5154;
- e. thermostatic mixing valves are installed in line with BS EN 1111 TMV3. Project Co shall ensure that thermostatic balancing valves (Type A) are installed in line with BS 7350;
- f. draining taps (Type A) are installed in line with BS 2879;
- g. direct hot water storage cylinders are installed in line with BS 1566-1 and shall be Kitemark certified;
- h. immersion heaters are installed in line with BS EN 60335-2-73 and be BEAB Approved;
- i. valve tests are conducted in line with BS EN 12266-1;
- j. the domestic hot and cold-water systems are provided with draw off taps and stop valves;
- k. ball isolating valves and lift type check valves are provided;

- l. water meters in line with BS EN 14154-1 and meter accessories are in line with BS EN 14154-2;
- m. backflow prevention devices are provided and comply with BS EN 13959. Anti-pollution check valves shall comply with BS EN 14454 and hose unions shall comply with BS EN 14451 for in-line anti-vacuum valves;
- n. copper alloy body, diaphragm type float operated valves are installed that comply with BS 1212-2;
- o. drainage taps (type A) are installed to comply with BS 2879;
- p. glass fibre reinforced tanks and cisterns are designed and installed in line with BS EN 13280 and are designed to have a minimum of one cycle per day;
- q. magnetic water conditioners are provided where the calcium carbonate content of the incoming mains water supply is greater than 200mg/l or 14 on the Clark scale;
- r. valves of nominal sizes, 54mm and less have ends screwed and threaded to BS EN 10266 or have capillary ends to BS 1254; and
- s. larger valves have flanged ends, complying with BS 4504 or BS EN 1092 as appropriate and are similar to those selected for the pipework.

2.11.15 Drainage installations

2.11.15.1 Project Co shall design and install separate foul and rain water drainage systems to serve the proposed development. Project Co shall ensure that the drainage installations are sufficient to accommodate the proposed level of occupancy and operate under gravity to connect to the public utility sewer, rather than utilise pumped systems.

2.11.15.2 Project Co shall ensure that the foul and rain water drainage systems are robust and fit for purpose throughout. Project Co shall ensure that the systems are not routed such that the location of pipework, downpipes and other drainage connections impact on the learning environment in the Facility. This shall include but not be limited to the acoustic breakout caused by the water within the pipework and thus Project Co should make all necessary provisions to minimise this.

2.11.15.3 Project Co shall ensure that the drainage systems provided:

- a. achieve hygienic conditions and the effective disposal of wastewater, surface water and all liquid waste from the Schools and their facilities' activities; and
- b. are designed in accordance with Sustainable Drainage Systems Standards for Wales 2018 and the Flood and Water Management Act 2010, and all other current codes of practice;
- c. prioritise surface water and rainwater runoff to be collected for use;
- d. prioritise the use of active rainwater attenuation and harvesting systems, whereby rainwater collection for use is an integral part of the rainwater attenuation system storage capacity.

2.11.15.4 In addition, Project Co shall ensure that:

- a. all drainage runs (including land drainage) shall be clear of obstructions, set in line to the necessary falls and show no signs of pipe displacement;
- b. all manholes shall be designed to receive the relevant imposed load, whether it is pedestrian or vehicular; and
- c. all internal manholes shall be double sealed.

2.11.15.5 Project Co shall ensure :

- a. that prior written agreement is obtained from the relevant authorities for discharge into the public system. Such written agreement shall include confirmation that the existing system has the capacity to accept the increased discharge, and shall include the negotiation of any wayleaves required;
 - b. that all necessary detailed surveys, inspections and appraisals of all existing systems are carried out by Project Co, including the use of CCTV where required;
 - c. that adequate provision is made for the diversion of any existing below ground drainage or other Service Infrastructure, if necessary;
 - d. the efficiency and sound condition of any existing drainage to be utilised; and
 - e. the Environment Agency has agreed the planned methodology for surface water drainage.
- 2.11.15.6 Project Co shall ensure that in Specially Resourced Provision and Designated Units, the design of the site surface water and foul drainage systems shall take account of any specific requirements identified in the relevant Site Specific Brief.
- 2.11.15.7 Project Co shall design and construct drainage to playing fields and MUGAs to ensure that the Authority [and/or School Entities in respect of schools projects] are able to use them as regularly as required to meet their Curriculum requirements.
- 2.11.16 Sanitaryware and fixtures
- 2.11.16.1 The following standards and guidance shall be applied:
- a. BS 6465-3:2006 – ‘Sanitary installations. Code of practice for the selection, installation and maintenance of sanitary and associated appliances’;
 - b. BS 6465-1:2006+A1:2009 – ‘Sanitary installations. Code of practice for the design of sanitary facilities and scales of provision of sanitary and associated appliances’;
 - c. School toilets: Good practice guidance for schools in Wales, Welsh Government 2012;
 - d. all the components of the overall design shall meet the standards set out BS ISO 15686 and BS 7543:2015 – ‘Guide to durability of buildings and Building Elements, products and components’;
 - e. sanitary fittings, integrated plumbing systems, sanitaryware shall meet the requirements set out in Table 1 of these ACRs, without failure resulting from defects in design, materials or workmanship. Failure shall be defined as breakage, disengagement of components, and deflection beyond acceptable values or reduction in performance.
- 2.11.16.2 Project Co shall ensure the needs of Students with SEN (D) described in these ACRs are addressed, and particular account must be taken of specific safety and hygiene requirements.
- 2.11.16.3 Project Co shall take account of the possibility of accidental or Malicious Damage to sanitaryware, including the wear and tear caused by Mobility Equipment, the effect that certain colours, patterns, textures and noises can have on some people, and the higher risk of harm and infection for the most vulnerable children and young people.
- 2.11.16.4 Project Co shall ensure that all serviced sanitaryware is integrated with the artificial lighting, power and other systems in the Building.
- 2.11.16.5 Urinals are not to be provided unless identified in these ACRs.
- 2.11.16.6 Project Co shall ensure that all user controls on sanitaryware in accessible toilets shall be comprehensible, accessible and quietly responsive. All controls shall be securely fixed to

- the item of sanitaryware or the internal fabric of the Building (i.e. not remote controls) and shall not rely upon batteries for power.
- 2.11.16.7 Controls such as isolator switches shall be located at high level on walls or, where necessary, fixed furniture and allow use by authorised personnel only.
- 2.11.16.8 All materials used shall enable easy cleaning.
- 2.11.16.9 Project Co shall ensure that the sanitaryware does not have any sharp edges or corners that may cause injury and finishes are suitable for the activities taking place.
- 2.11.16.10 Complicated corners, edges, frames, and details that can trap dirt, and hence compromise hygienic performance, shall be avoided.
- 2.11.16.11 Sanitaryware and appliances shall be assembled, installed and fitted so that Service Infrastructure will drain as intended and as recommended by the manufacturer.
- 2.11.16.12 All components shall be jointed and bedded using compounds and methods recommended by the manufacturer.
- 2.11.16.13 For science laboratory and science Preparation Area drainage, either all laboratory pipework shall be polypropylene and a dilution trap fitted before the below ground drainage connection, or a polypropylene dilution trap of minimum 4.5 litres capacity shall be fitted to each laboratory sink. No other waste shall be connected into the science laboratory above ground drainage runs.
- 2.11.16.14 In Kitchens, a suitable method of grease interception and/or dispersion are provided. Grease traps where provided shall be in an accessible position. Grease traps and/or grease dispersant dosing shall be provided. Any floor gulleys and floor traps shall be easy to maintain.
- 2.11.16.15 All soil stacks shall rise to roof level where they safely discharge to atmosphere with a durable and secure domical cage which is resistant to bird nesting and movement by vermin. Automatic Air Vents (AAVs) shall only be used by agreement where there is no practicable way to provide a roof stack. AAVs are only permitted for isolated rooms. Heads of drains in kitchens shall be taken to air wherever possible.
- 2.11.16.16 Project Co shall ensure that any integrated plumbing systems (IPS) comply with the following:
- a. The surface shall be one which can be wiped clean. The material shall be waterproof solid laminate; moisture resistant laminate on manufactured board with an ABS (or similar) edging; recycled plastic, or a material which can be demonstrated to perform equally well;
 - b. the joint between the system and the integral coved skirting shall be sealed against water and dirt;
 - c. all access panels shall be lockable with a master key and have tamper proof fittings; and
 - d. a wall hanging fixing frame shall be provided as part of the integrated plumbing systems where recommend by the manufacturer in compliance with BS EN 997:2012+A1:2015 WC Pans and WC Suites with Integral Trap.
- 2.11.16.17 Project Co shall ensure that any cubicles provided to toilets and showers comply with the following:
- a. all standard toilet cubicles shall be at least 1500mm deep x 800mm wide. All standard shower cubicles shall be 1800mm deep x 900mm wide;

- b. all panels shall be pre-drilled to accommodate the required fittings; redundant drill holes for fittings within panels are not acceptable;
- c. all fittings shall be anti-rust and vandal proof;
- d. all systems shall facilitate cleaning to prevent the build-up of dirt and germs;
- e. all cubicle doors shall be capable of being locked and opened manually from the inside. Emergency release locks should be provided all doors, capable of released from outside by hexagon or star key (not coin-slot). Any inward opening doors shall be able to open outwards through use of a releasable door hinge or a lift-off facility to facilitate emergency assistance to someone who has fallen against the door inside the cubicle (blocking the door from opening). The emergency release function shall be designed to limit operation to Facility staff only, thereby not compromising the privacy of the user under general circumstances;
- f. all cubicles shall be fitted with occupation indicator signs, and the 'cubicle occupied' indicator shall be clearly visible from the outside of the cubicle door. This shall be suitable for people with visual impairments and colour blindness i.e. a red/green indicator is unsuitable;
- g. cubicle locking devices shall be suitable for use by people with impaired manual dexterity (i.e. a simple closed fist action);
- h. the lock shall be designed so that it is the weakest element in the door assembly i.e. if force is applied it shall break rather than damaging the cubicle system. Project Co shall provide the Facility with a number of spare locks to help reduce the time that cubicles are out of action;
- i. the inside of each cubicle door shall have a coat hook with a rubber buffer, designed to serve as a doorstop to the cubicle door. The hook shall be securely fixed with hidden fixings to avoid damage;
- j. all hinges shall be designed to eliminate the potential for finger trapping, and shall be self-closing, except for toilets in Foundation Phase provision, which shall be self-opening; and
- k. all cubicle doors shall be of a contrasting colour to pilasters to allow for use by partially sighted Students.

2.11.16.18 In addition to the requirements above, Project Co shall ensure that the design and construction of all toilet cubicle systems shall meet the following requirements:

- a. ambulant and enlarged cubicle provision shall comply with AD M and adopt the relevant guidance in BS 8300:2009+A1:2010;
- b. the design of both the partitions and doors in toilets for Foundation Phase Students shall give children privacy whilst allowing teachers to supervise them. Cubicle partitions shall have a maximum height of 1500mm. Cubicle doors shall have a maximum height of 1300mm;
- c. cubicle partitions in toilets for KS2 Students shall extend to a maximum height of 1950mm from finished floor level. Cubicle doors shall have a maximum height of 1500mm;
- d. in Secondary Schools and Colleges, a floor to ceiling cubicle system shall be used for increased Student privacy. Project Co shall also ensure that Students with hearing difficulties can be alerted to the Authority's (and/or the relevant School Entity's in the case of a School(s) Project) alarm system whilst using the cubicles, as required by AD M. The exception to a floor to ceiling cubicle system is where an alternative is required in these ACRs. In this case, cubicle partitions shall be a maximum height of 1950mm from finished floor level and cubicle doors a maximum height of 1800mm; partitions and doors shall be spaced a maximum of 150mm off the floor finish level;

- e. to ensure privacy, it shall not be possible to see from the adjacent Circulation route into a cubicle when the door is open (for example doors should be perpendicular to the main flow of Circulation); and
- f. all shower cubicle systems shall be constructed from waterproof solid laminate. All toilet cubicle systems shall be constructed from waterproof solid laminate, moisture resistant laminate on manufactured board with an ABS (or similar) edging, recycled plastic, or a material, which can be demonstrated to perform equally well.

2.11.16.19 Project Co shall ensure that the following requirements for sanitaryware are met:

- a. is manufactured from durable materials, and easy to clean and maintain;
- b. is suitable for different ages and any special needs as detailed within these ACRs;
- c. is simple in construction, to reduce maintenance and replacement costs;
- d. is easy to operate where adjustable (but difficult to misuse), repair or replace;
- e. is housed in such a way that it is easy to access or remove for maintenance purposes;
- f. the sizes and fixing heights of sanitary ware are appropriate for the relevant user age groups and take account of the needs of disabled persons or Students with SEN (D);
- g. fixtures and fittings in the pupils' toilet areas are sufficiently robust to avoid Malicious Damage;
- h. showers are self-draining and allow users privacy;
- i. where provided, urinals are to be individual rather than trough to allow privacy for users; and specific requirements for Specially Resourced Provision and Designated Units are given in the relevant Site Specific Brief.

2.11.17 Toilet Pans

2.11.17.1 Any toilet pans and exposed cisterns shall be constructed from vitreous china as set out in BS 3402 'Specification for quality of vitreous china sanitary appliances', or a material which can be demonstrated to perform equally well.

2.11.17.2 All parts of the toilet construction shall be sourced from a single manufacturer.

2.11.17.3 The cistern and associated pipe work shall be easily accessible for maintenance and made tamper-proof. They should avoid dirt and germ build up and shall remove the potential for interference or Malicious Damage.

2.11.17.4 The toilet shall have an internal overflow system.

2.11.17.5 All Facilities require a dual flush which shall be either a 6/4 litre, 4.5/3 litre or 4/2.6 flush. The flushing mechanism shall be a dual flush plate with separate buttons for low and standard volume flush. This shall meet the requirements set out in BS 1125:1987 'Specification for WC flushing cisterns (including dual flush cisterns and flush pipes)'. The British Standard Flush test shall be achieved to comply with Water Regulation Guide WRAS. The UK class 2 flush test must be achieved to cover any part flush performance in line with EN997.

2.11.17.6 Toilet pans shall be sufficiently robust for use within a School/College environment and shall be easy to clean as set out in BS EN 997:2012+A1:2015 – 'WC pans and WC suites with integral trap'.

2.11.17.7 Toilet pan seats and lids shall be top fitting and meet the requirements set out in BS 1254:1981 – 'Specification for WC seats (plastics)'. Seats are to have strong fixings to pans and be of a size appropriate to the relevant user age group.

2.11.17.8 Low-level cisterns to WCs are to be concealed, where possible, and designed and installed to resist unauthorised access and for ease of maintenance;

2.11.18 Wash Troughs and Basins

2.11.18.1 Plugs are not required for wash troughs and hand basins in pupils' toilets and should not be provided;

2.11.18.2 There is an integral upstand against the wall to troughs and basins, providing a minimum of 300mm splash back, the design of which shall avoid the build-up of grime.

2.11.18.3 Robust and tamper proof mixer taps should be fitted, with timed delivery or infra-red control;

2.11.18.4 Wash-hand basins shall be constructed from vitreous china or a material, which can be demonstrated to perform equally well. Basins shall meet the requirements set out in BS EN 14688:2015 – 'Sanitary appliances. Wash basins. Functional requirements and test methods'

2.11.18.5 Runs of wash hand basins shall have all relevant Service Infrastructure such as traps and waste pipes concealed, for example through vanity units. Access to Service Infrastructure shall be via a removable panel using tamper-proof fixings.

2.11.18.6 Wash troughs shall meet the requirements set out in BS EN 14296:2015 – 'Sanitary appliances. Communal washing troughs'. Project Co shall ensure any wash troughs also meet the following requirements:

- a. the troughs are constructed from solid surface material, recycled plastic, vitreous china, or a material, which can be demonstrated to perform equally well;
- b. the troughs are constructed to achieve an even and smooth surface, free from acute corners or projections, such that they can be cleaned effectively, thus preventing dirt and germ build up. Seam welded joints in metal troughs are acceptable but must be ground down to provide a smooth finish;
- c. all fixings through the trough shall be both watertight and inconspicuous to discourage Student interference and minimise dirt and germ build up;
- d. the trough is supported off the wall such that there are no legs or other connections to the floor for ease of cleaning; and
- e. a downstand is provided to conceal relevant Service Infrastructure, whilst permitting access to them for maintenance and emptying. The downstand shall be accessible via a removable panel using tamper-proof fixings.

2.11.19 Accessible Toilet Sanitaryware

2.11.19.1 Where sanitaryware is in an accessible toilet or Hygiene Room, the following requirements shall be met;

- a. there shall be a visual contrast between the sanitaryware, grab rails, alarm cord and the wall finish. This is to enable people with visual impairment to locate the fittings;
- b. the toilet seat shall be in a contrasting colour so visually impaired people can see if it is up;
- c. Project Co shall provide robust and tamper proof single mixer extended lever spray taps to all basins and showers to incorporate integral TMV2/3 compliant thermostatic mixing valves wherever practicable; and
- d. all fittings shall be set out to comply with AD M and adopt the relevant guidance stipulated in BS 8300:2009+A1:2010.

2.11.20 Toilet Paper Dispensers

- 2.11.20.1 Where these ACRs identify that the Authority wish to provide their own dispensers through a Service Contract, Project Co shall allow for fixing only.
- 2.11.20.2 Where Project Co provides toilet paper dispensers, they shall be provided for every toilet pan, and shall be:
 - a. a 'sheet type' dispenser rather than rolls;
 - b. fitted with a tamper-proof lock to prevent Student interference; and
 - c. all fixings shall be concealed to avoid tampering and potential dirt and germ build up.

2.11.21 Soap Dispensers

- 2.11.21.1 Where these ACRs identify that the Authority wish to provide their own dispensers through a Service Contract, Project Co should allow for fixing only.
- 2.11.21.2 Where Project Co provides cartridge type soap dispensers, they shall be provided at every Wash-hand basin or for every 500mm of wash trough.
- 2.11.21.3 All fixings shall be concealed to avoid tampering and potential dirt and germ build up.

2.11.22 Hand Drying

- 2.11.22.1 Where these ACRs identify that the Authority wish to provide hand drying facilities through a Service Contract, Project Co should allow for fixing and infrastructure servicing only.
- 2.11.22.2 Where Project Co provides hand drying facilities, electric hand dryers shall be provided at up to one per run of up to five WCs, unless paper towel dispensers are identified in these ACRs.
- 2.11.22.3 Electric hand dryers shall have a drying time of less than 30 seconds, with infrared control for no contact start, auto-off and noise level less than 65 dBA at 1m.
- 2.11.22.4 Where paper towel dispensers are provided (as identified in these ACRs) the paper towel dispensers shall be the hands-free type, which allows only one sheet at a time to be used, reducing the likelihood of misuse. Space should be allocated for a waste disposal bin.

2.11.23 Sanitary Products

- 2.11.23.1 A sanitary product vending machine shall be located in each block of female toilets for Students from age 8 onwards. Where these ACRs identify that the Authority wish to provide the machines through a Service Contract, Project Co should allow for fixing only. For maximum privacy, the machine shall be situated so that Students can use it without being visible from the Circulation areas. It shall be located in a common area used only by females, rather than within an individual cubicle.
- 2.11.23.2 There should be sufficient space beside the toilet pan to allow space for a sanitary product disposal bin, provided through a service contract. This space shall be allowed for in each female cubicle in each toilet, block of toilets or accessible toilets used from age 8 upwards.

2.11.24 Taps for Hand Washing

- 2.11.24.1 Non-concussive press taps to incorporate integral TMV2/3 compliant thermostatic mixing valves wherever practicable shall be selected and fitted to avoid germ transfer. Where they are sensor-operated, they shall turn off automatically with less than one litre of use.

The exception to this is in non-ambulant Designated Units or Specially Resourced Provision where only sensor-operated taps shall be provided. Either option shall comply with DEFRA WTL scheme in terms of flow performance (4lpm) and be WRAS approved.

2.11.24.2 Deck mounted taps shall be provided that allow an even surface when fixed to the sink or trough, such that they can be cleaned effectively. Alternatively, taps can be wall mounted with the necessary robust wall panelling construction.

2.11.25 Cleaners' Sinks

2.11.25.1 Any cleaners' sinks shall be a heavy-duty floor mounted stainless steel or ceramic unit with a stainless steel hinged grating and wall mounted taps above.

2.11.26 Mirrors

2.11.26.1 All mirrors provided shall:

- a. be toughened glass or an alternative suitable material;
- b. be backed with an impact-resistant safety layer to allow them to be fixed directly to the timber framework behind;
- c. have tamperproof fixings, preferably with adhesive;
- d. have no sharp edges or corners; and
- e. be in accordance with the Facility specific ADS.

2.11.27 Hygiene Room Equipment

2.11.27.1 Hygiene Rooms are to be designed to accept an overhead ceiling track hoist system. Mobile hoists are not acceptable. Project Co shall ensure the roof/floor slab shall be designed to accept the loading of a track hoist system, which could be fitted to take a Legacy hoist and track from the Existing Facility, or a future hoist and track installed outside of the Works. Project Co shall install the track and hoist system if identified as part of the Works in these ACRs. The loading should allow for a hoist and track system to meet the following requirements:

- a. the track shall be an 'X-Y system' (also known as an 'H system'), with a pair of ceiling mounted parallel side beams supporting a moving track (boom);
- b. all hoists shall be motorised with remotely controlled hoist operation up and down, and remotely controlled traverse of hoist along the length of the track;
- c. the maximum loading capability of the hoist and track shall be 200kgs;
- d. the track shall allow a Student to be transferred between a wheelchair and the WC, the shower and the changing bed (where included);
- e. the hoist shall have a lifting height of 2.1m;
- f. an electric or manually operated turntable shall be provided if needed to ensure full access to the areas required;
- g. the hoist should return to the end of the track where the battery-charging unit is housed from a mains supply;
- h. the hoist must allow for at least 3 spreader connections to the sling to ensure comfort for the Student;
- i. the hoist shall have an emergency stop or a pull cord, which provides an emergency cut out;
- j. a hand-held remote-control device, which controls lifting, and lowering should be provided;

- k. Project Co shall ensure that any slings and accessories owned by the Authority (and each School Entity, in the case of a School(s) project), are compatible with the hoist and tracking system;
- l. in Specially Resourced Provision or Designated Units, they may require a removable hoist, which can be relocated onto ceiling mounted tracks in other rooms as identified in these ACRs;
- m. Any hoist and tracking system shall carry the CE mark and comply with EC Directives: Medical Devices Directive (93/42/EEC) as amended 2007/47/EC and BS EN ISO 10535:2006 'Hoists for the transfer of disabled persons. Requirements and test methods';
- n. each Hygiene Room shall contain a shower with adjustable shower head on a rail. Level access is required into the shower area to allow for the use of the shower whilst a Student may be on a changing trolley. Project Co shall install the shower as part of a wet room construction;
- o. Project Co, and their specialist suppliers, shall refer to these ACRs for any specialist equipment requirements listed on the Facility specific ADS for Hygiene Rooms. There shall be a defined space in the Hygiene Room for storing clinical waste (soiled nappies/liners or dressings etc.) The detailed requirement will depend on the service contract that the Authority (and/or the relevant School Entity, in the case of a School(s) project), has for waste disposal, this will be identified in these ACRs;
- p. the Hygiene Rooms shall be designed in accordance with the guidance in BS8300: 2009 'Design of buildings and their approaches to meet the needs of disabled people' and Changing Places: 'The Practical Guide';

TABLE 36 SANITARYWARE – REQUIRED PROVISION

| Code | | | Dimension | Height from floor | | | | | |
|---------|------------------------|-------|-----------|-------------------------------|------------------|------------------|---------|---------------------------------|--------|
| | | | | Nurser y/ Recepti on | Year 1 and 2 | KS2 | Primary | Secondary /College /Adult | |
| SANT001 | Toilet pan (w/o seat) | Floor | Var | 305 ¹ | 355 ¹ | 355 ¹ | 305/355 | 395 | Toilet |
| SANE001 | Soap dispenser | Wall | Var | 700 | 700 | 850 | 850 | 1000 | |
| SANE002 | Toilet paper dispenser | Wall | Var | 500 | 550 | 600 | 600 | 800-1000 | |
| SANT002 | Wash hand basin | Floor | 500x400 | 500 | 500 | 550 | 550 | 750-850 | |
| SANT003 | 2 persons wash trough | Floor | 1000x400 | 500 | 500 | 550 | 550 | 750-850 | |
| SANT004 | 3 persons wash trough | Floor | 1500x400 | 500 | 500 | 550 | 550 | 750-850 | |
| SANE003 | Hand dryer | Wall | Var | 650 | 775 | 850 | 850 | 1000 | |
| SANE004 | Paper towel dispenser | Wall | Var | 650 | 775 | 850 | 850 | 1000 | |

2.11.28 Gas and compressed air installations

2.11.28.1 The design, installation and maintenance of any gas and compressed air installations provided shall comply with the Gas Safety (Installation and Use) Regulations (GSIUR) and shall be in accordance with the guidelines set out in IGEM/UP/11 'Gas installations for educational establishments' and other applicable IGEM standards, relevant British standards and UKLPG documents.

2.11.28.2 Project Co shall ensure that the following requirements are met:

- a. gas supplies are interlocked with ventilation systems as required by the GSIUR and IGEM standards;
- b. gas installations are certified on completion to comply with the GSIUR, IGEM standards and British standards and all HSE and UKLPG recommendations and requirements;
- c. automatic Isolation Valves in accordance with IGEM/UP/11 are fitted to science gas supplies, and positioned near the teacher's desk/board, or next to main light switches or at the entrance to the laboratory;
- d. design and installation of emergency control valves (ECVs), additional emergency control valves (AECVs) and automatic isolation valves (AIVs) complies with IGEM/UP/11; and
- e. where gas pipework runs in ceiling spaces or behind or inside furniture, a high and low-level vent is provided to avoid a build-up of gas as described in IGEM/UP/11 and IGEM/UP/2.

2.11.28.3 Gas appliances can be of three types:

- a. Type A appliances are those that do not require a flue to be fitted to them and include Bunsen burners, flue less appliances, e.g., some types of flueless gas fire, and most domestic and catering cookers/ranges;
- b. Type B appliances are those appliances that require a flue pipe and are referred to as open flued appliances (such as a gas fire, a kiln, gas fired boilers or hot water heaters, appliances in gas fitting workshops in Colleges or some types of larger specialist cooking appliance, e.g., fish fryer ranges); and
- c. Type C appliances are referred to as room sealed (or balanced flue) and are typical of modern domestic or commercial gas boilers and may be used for heating or as appliances in gas fitting workshops in Colleges'.

2.11.29 Gas Interlocks

2.11.29.1 An interlock is required between gas supply and mechanical ventilation to ensure that gas will not be supplied when there is an inadequate airflow. This is for safe operation of appliances and equipment and the safety of personnel.

2.11.29.2 For Type B appliances, Regulation 27(4) of GSIUR requires that any mechanical extract system that is required for safe operation of the appliances must be interlocked with the gas supply. IGEM/UP/19 provides more detailed requirements for interlock systems. It states that:

"For Type B appliances, environmental monitoring such as CO₂, temperature or humidity may be used in conjunction with variable speed drive (VSD) systems. However, fan flow/pressures switches or power monitoring shall always be used in conjunction with Type B catering appliances. CO₂, temperature or humidity monitoring is not acceptable as the main interlock for Type B catering appliances."

2.11.29.3 For Type A appliances, where an appliance is served by a mechanical extract system that is required for safe operation of the appliances, IGEM/UP/19 'Design and application of interlock devices and associated systems used with gas appliance installations in commercial catering establishments' 2014, requires that the mechanical extract system must be interlocked with the gas supply. IGEM/UP/19 states that:

“For new installations, CO₂ monitoring would normally be used in conjunction with either a fan flow/pressure switch or fan power monitoring but may be used alone with Type A appliances. For Type A appliances, environmental monitoring measuring CO₂ may be used in conjunction with other air quality sensors such as temperature or humidity to provide information to be included in an interlock system. It may also be used as part of a demand control ventilation system.”

2.11.29.4 Type A appliances such as domestic cookers with their associated mechanical ventilation system(s) may therefore use CO₂ detectors or fan flow/pressures switches or power monitoring interlocks.

2.11.29.5 Section 4.2 of IGEM/UP/19 describes CO₂ and other interlock systems for catering establishments and should be referred to when designing CO₂ interlocks for food rooms in schools/ Colleges.

2.11.29.6 For Type A appliances, a common extract duct from extraction canopies can be used with a wall mounted CO₂ interlock system, as IGEM/UP/19 requires the ventilation system to be interlocked and must be in operation before gas is available to cookers.

2.11.29.7 For Type B appliances a wall mounted CO₂ interlock can be used with a common extract duct from extraction canopies but only as a secondary interlock and not as the primary interlock which shall be as described in IGEM/UP/19.

2.11.29.8 Table 37 below summarises the choices of different types of gas safety interlocks for the Facilities.

TABLE 37 SUMMARY OF INTERLOCK REQUIREMENTS ACCORDING TO APPLIANCE TYPE

| Appliance Type | Type A | Type B | Type C | Comments |
|---|-------------------------------------|--|------------|--|
| Interlock System Type | Interlock System Application | | | |
| Flow switch or air pressure switch | Yes | Yes, as a <i>primary interlock</i> | Not needed | Simple system. Does not prove environmental conditions. |
| Mechanical ventilation fan power monitoring | Yes | Yes, as a <i>primary interlock</i> | Not needed | Simple system, may be slightly better than above. Does not prove environmental conditions. |
| CO₂ monitoring | Yes | Yes, as a <i>secondary interlock</i> but only with a primary interlock | Not needed | Not permitted alone with Type B. Provides positive proof/control of the environment for Type A. Suitable system for teaching spaces in which there are only Type A appliances. Easy to apply in schools/ Colleges having environmental control system. |
| VSD with CO₂ monitoring and control | Yes | Yes, as a <i>secondary interlock</i> but only with a | Not needed | Reduces power consumption and fan noise. - Demand Controlled Ventilation. Most suitable system for teaching spaces in which there are only Type A appliances. |

| Appliance Type | Type A | Type B | Type C | Comments |
|------------------------------|-------------------------------------|-------------------|--------|----------|
| Interlock System Type | Interlock System Application | | | |
| | | primary interlock | | |

2.11.29.9 Central school/ College catering must comply with IGEM/UP/19 and BS 6173.

2.11.29.10 Boiler plant rooms and gas equipment fitting workshops in Colleges including gas, CHP and gas fired plant must comply with IGEM/UP/3, IGEM/UP/10, BS 6644 and other associated standards for different plant types.

2.11.30 Gas Safety Interlocking by Environmental/ CO₂ Monitoring

2.11.30.1 There are only Type A appliances, i.e. there are no flued gas appliances such as deep fat fryers, interlocking should be achieved by environmental monitoring of carbon dioxide as described in IGEM/UP/19.

2.11.30.2 Environmental CO₂ monitoring should be used in most food rooms, i.e. spaces that only contain Type A appliances and in science as Bunsen burners are classed as Type A appliances.

2.11.30.3 In accordance with IGEM standards, gas interlocks by environmental monitoring of CO₂ shall operate as follows:

- a. during practical activities, the appliances shall not cause the CO₂ level to exceed 2,800ppm, which will produce a high-level warning signal. An automatic gas shut down shall initiate when 5,000ppm of CO₂ is detected;
- b. at 2,800ppm supply and extract systems shall be automatically switched on or boosted and the teacher shall be warned that ventilation needs to be increased. Systems to control the ventilation to keep it under 2,800ppm can include individual canopies vented externally, supply air fans and opening windows. Below 2,800ppm these ventilation systems can be under automatic demand control with teacher or user override control so that noise levels can be easily controlled, and energy use can be minimised. Opening windows alone is not an adequate means to control CO₂ levels; and
- c. when practical activities are not taking place, and gas is not in use the ventilation in practical spaces shall be controlled to meet the normal CO₂ levels for teaching and learning spaces.

2.11.31 Carbon Monoxide, Carbon Dioxide and Flammable Gas Detectors

2.11.31.1 Any carbon monoxide (CO) or carbon dioxide (CO₂) detection system shall comply with a standard suitable for its use and must be regularly maintained.

2.11.32 Carbon Monoxide Detectors

2.11.32.1 Inaccessible chimneys/flues shall be avoided. Chimneys/flues shall be designed and installed so that they are in a position that allows for suitable inspection and checking in the future. IGEM/UP/11 recommends CO detection systems are located in any occupied spaces through which or adjacent to which chimneys/flues pass. This protects against leakage from within chimneys which may not always be totally accessible for visual and other inspections. However, for new installations, this practice shall be avoided unless

suitable and detailed plans for ongoing inspection and maintenance of the chimney/flue have been developed.

- 2.11.32.2 IGEM/UP/11 recommends that CO detectors are located adjacent to kilns, positioned in accordance with the detector manufacturer's instructions, as even during normal use they can produce significant levels of CO as part of the process of obtaining colours in the glazes.
- 2.11.32.3 There is no need for CO detection in boiler houses that have been correctly designed and ventilated in accordance with current industry practice (such as the guidance contained in IGEM/UP/10). Where a site-specific risk assessment identifies the need for CO detection in a boiler house, the equipment shall be fit for purpose and installed and located in accordance with the manufacturer's instructions and compliant with relevant standards. CO alarms compliant with BS EN 50291 are specifically designed and tested for domestic and recreational spaces. This standard is not intended for detectors for use in Schools, Colleges or workplaces.
- 2.11.32.4 Detectors complying with BS EN 45544-3 shall be used. Note that not all the requirements of this standard may be necessary as the standard covers much more arduous industrial environments than Schools/Colleges. The variety of applications for CO detection within all educational establishments requires the selection by a competent person of the most appropriate CO detector for that location. For example, it could be that a detector declaring compliance with only some aspects of BS EN 45544-3 would be appropriate within a boiler room adjacent to a corridor. Whereas more of the requirements or clauses might be relevant for a more process combustion orientated location.
- 2.11.32.5 CO detectors in new installations shall be hard wired.

2.11.33 Carbon Dioxide Detectors

- 2.11.33.1 CO₂ detectors used for gas safety interlocking shall be designed to operate in commercial catering environments. These are required in catering Kitchens, science labs, Design and Technology heat bays and food rooms. They are required to give an audible alarm and be linked with an automatic gas shut off system, which will be fail-safe and require manual intervention in order to restore the gas supply.
- 2.11.33.2 Where CO₂ monitors are used as part of the ventilation control or alarm strategy, the monitors shall be placed in an area that reflects the general CO₂ levels within the practical area or cooking area. Typically, they should be fitted horizontally between 1 m and 3 m from cooking or practical areas and approximately 2.5 m above floor level. They shall not be located in high velocity air streams such as close to the edge of a canopy or adjacent to an air supply or extract position.
- 2.11.33.3 CO₂ detectors must be hard wired and installed in accordance with manufacturer's instructions.

2.11.34 Flammable Gas Detectors

- 2.11.34.1 Flammable gas detection shall be provided in the boiler room if it is LPG fired or if it is not possible to lock the boiler room. However, all boiler rooms should be lockable. Particular attention needs to be given to the selection and location of flammable gas detection systems where LPG is supplied to boiler rooms.

2.11.35 Gas Systems in Food Rooms

2.11.35.1 Where there are only Type A appliances, i.e there are no flued gas appliances such as deep fat fryers, interlocking may be achieved by environmental CO₂ monitoring of carbon dioxide as described in IGEM/UP/19.

2.11.35.2 Where provided for in the Site Specific Brief, Project Co may provide gas-free, electric based food teaching rooms. However, in most Schools/Colleges a mixture of electric and gas cookers is traditionally required, to enable Students to experience both gas and electric cooking. Rooms for teaching catering will need gas, as that is what is used in industrial Kitchens.

2.11.36 Laboratory Gas Systems

2.11.36.1 Gas interlocking should be achieved by environmental CO₂ monitoring as described in IGEM/UP/19.

2.11.36.2 Project Co shall ensure that gas and compressed air installations and appliances are provided where stated in the ADS and that they are designed, commissioned and maintained in accordance with the requirements of the Institute of Gas Engineers and Managers (IGEM)⁴⁴.

2.11.36.3 Project Co shall ensure that:

- a. gas supplies to Kitchen equipment are interlocked with the mechanical ventilation system as appropriate;
- b. gas and CO₂ detection equipment interlocked with safety shut-off valves are installed in all boiler rooms; and
- c. gas installations are certified on completion to comply with all HSE and IGEM recommendations and requirements.

2.11.36.4 Central Automatic emergency shut off valves without leak detection shall be provided on gas supplies in each science laboratory and science prep room and as specified in the ADS. These shall preferably be positioned near the teacher's desk/board, next to main light switches or at the entrance to the laboratory. Gas valves shall comply with Gas installations for educational establishments, IGEM/UP/11 Edition 2 published by IGEM, www.igem.org.uk 'Gas installations for educational establishments' and other applicable IGEM standards.

2.11.37 Controls, Building, and Energy Management Systems

2.11.37.1 Project Co shall ensure that the design of any Building Services controls, Building Management Systems (BMS), and Energy Management Systems (EMS) meets the requirements within this section.

2.11.37.2 The principal aims of the controls systems for the Facilities shall be:

- a. the effective management of the Building Services systems installed;
- b. to maintain a comfortable environment for occupants that are appropriate to the activity within the space;
- c. to manage energy consumption and minimise carbon emissions through efficient use of installed Building Services systems;
- d. to enable user control without undue complexity;

⁴⁴ Gas installations for educational establishments, IGEM, *IGEM/UP/11 Edition 2, 2010* www.igem.org.uk

- e. effective automated monitoring and targeting of energy consumption and associated carbon emissions, via the Automated Energy Data Collection Portal;
- f. easy to understand graphical interfaces for building operators, teachers and Students to inform them about the environmental conditions that affect their thermal comfort. This also extends to informing the Facility Users about energy consumption and carbon emissions;
- g. space flexibility – to ensure the environmental conditions of the internal spaces are flexible where required; and
- h. safe operation – to ensure the Building Services systems are safe to operate and maintain.

2.11.37.3 Project Co shall ensure that:

- a. the Building Services control systems are fit for purpose and appropriate to the proposed application;
- b. Building Services control systems are as simple as possible and complex inter-connected control systems are avoided;
- c. the control of the Building Services systems is operable within the affected space and local to the end users; and
- d. the controls and monitoring arrangements meet the requirements listed in Table 38 below which provides a summary of the expectations all Facilities. Where Existing Buildings are retained on the Site[s], these will need to be integrated with the controls and monitoring systems and any site-wide controls and monitoring strategies, e.g., BMS and alarm systems, of the Existing Facility as far as possible, and shall meet the relevant parts of the Table 38 below.

TABLE 38 SUMMARY OF REQUIREMENTS FOR CONTROL AND MONITORING

| System | Requirement |
|---|---|
| Heating circuits – Weather compensation | <ul style="list-style-type: none"> • Centralised control from boiler control panel either optimiser or time clock control with automatic daylight-saving correction (BST/GMT changeover) • Boiler control should be direct weather-compensated as well as based on spaces served e.g. if all air handling unitair handling units or thermostats indicate no heat required then heating boiler and pumps should turn off |
| Heating circuits –Zoning | <ul style="list-style-type: none"> • To allow operation of rooms out of normal core hours without heating the whole Building • As a minimum the zones listed in paragraph 2.4.1.1 • Any key rooms that are used outside normal core hours e.g. nursery, facilities open for community use or Administration Offices, etc., will be identified in the relevant Site Specific Brief and shall be zoned separately |
| Heating, ventilation and centralised domestic hot water – central time and temperature control | <p>Central time and temperature control to suit building occupation pattern</p> <ul style="list-style-type: none"> • Control panel, located in the boiler house, with local override to enable out of hours additional usage positioned within the reception office/FM office • Ensure centralised control of all Building Services to the level of master control i.e. on and off times which are capable of being set and overridden by a non-expert <p>Plant run time extension</p> <ul style="list-style-type: none"> • Manual operation of plant extension switch: Provide local controls for plant extension for zones that are used outside normal core hours e.g. nursery, facilities open for community used, or Administration Offices, etc. |

| System | Requirement |
|---|---|
| | <ul style="list-style-type: none"> All alarms to be monitored during extension period |
| Centralised ventilation system | <ul style="list-style-type: none"> Trend logging and indication from a central point (BMS) of all supply temperatures, return temperatures, CO₂, hours run with monthly automatic data upload to the Automated Energy Data Collection Portal Filter status indication Control and monitoring of night purge ventilation and free cooling |
| Local/room-based ventilation system | <ul style="list-style-type: none"> Manually openable windows, teacher-controlled window actuators or demand control based on CO₂ level Local control with display of Classroom temperature and CO₂ levels and trend logging where demand control is provided. Monthly automatic data upload to the Automated Energy Data Collection Portal Filter status indication Control and monitoring of night purge ventilation and free cooling All associated central plant (boiler, pumps etc.) enabled for core hours only from central control, depending on zoning Mechanical ventilation enabled centrally where there are more than 10 Classrooms Dust and fume extract systems for: D&T equipment, 3D printers, laser cutters, photocopiers – local stand-alone control Kitchen ventilation and extract systems – local stand-alone control interlocked with gas supplies (where provided) |
| Temperature monitoring | <ul style="list-style-type: none"> External air temperature Internal temperatures and CO₂ levels of all teaching spaces, (including all group rooms, sports halls, Dining and Social halls and areas, activity studios, drama, Practical Teaching spaces, etc) and multiple occupancy staff room or staff office (2no. or more occupants as defined in the ADS) via the BMS Domestic hot water flow and return via BMS Domestic hot water temperature monitoring tape correct operation and immersion sensors in each major branch via the BMS Heating flow and return via BMS Mains water or cold-water storage tank via BMS All sensor readings taken at ½ hourly intervals and automatically uploaded at least monthly to the Automated Energy Data Collection Portal. |
| Local control of temperature – classrooms, practical spaces, etc | <ul style="list-style-type: none"> Override of centrally set temperature by +/-2 °C to provide local comfort adjustment through thermostatic radiator valve (TRV) or thermostat. TRV's shall be lockable and set to allow occupant control up to 20 °C or the normal maintained temperature for the space |
| Boilers | <ul style="list-style-type: none"> Minimum 2 boilers Fully modulating burners Automatic lead/lag sequence control Boiler fault Boiler house fire safety circuit operated |
| Emergency Shut off | <ul style="list-style-type: none"> Shut off at point of entry to Building for main incoming gas/water/electricity/oil supplies |

| System | Requirement |
|----------------------------|---|
| Pumps | <ul style="list-style-type: none"> • Duty and standby with auto changeover rotation for heating, sewage • Each pump to have hand/auto/off local control for heating, hot water system, boosted cold water system, sewage • Indication of pump failure at BMS/boiler panel/locally |
| Pressurisation sets | <ul style="list-style-type: none"> • Pressurisation set fault • System high/low pressure alarm |
| Sub-metering | <p>Meters for:</p> <ul style="list-style-type: none"> • gas to boilers • gas to Kitchen • water supply • heating system mains water top up to break tank or pressurisation unit • main electrical intake • Kitchen general power • external lighting/power • HVAC control panel for centralised mechanical ventilation systems • server room general power • plant room general power • each floor general power • each floor lighting • any low or zero carbon energy sources (heat metering to biomass boilers) • Trend comparison between each day/week for all meters • Local display on the sub-meter with centralised recording, monitoring and trend logging, with sampling at a minimum of every 15mins • Automatic monthly data upload from all sub meters to the Automated Energy Data Collection Portal |
| Fire strategy | <ul style="list-style-type: none"> • Fully addressable centralised alarm panel located in reception • Interlocks as part of fire safety strategy: door hold-open devices/Kitchen ventilation/gas solenoid valve • Break glass units or smoke or heat detectors • Fire shutter activation • Smoke clearance system • Sprinkler system interlink |
| Emergency lighting | <ul style="list-style-type: none"> • Local testing facility via key switch/self-testing or centralised testing |
| External lighting | <ul style="list-style-type: none"> • photocell controlled with central BMS time clock, with alarm reporting for for 'out of normal range' energy usage. |
| Lighting | <ul style="list-style-type: none"> • Manual local switching to each room or absence detection/daylight control. (Refer to lighting section Table 14) |
| BMS | <ul style="list-style-type: none"> • Provided for all Facilities with system heating loads in excess of 40kW and/or a floor area in excess of 500m². Graphics to be provided for each major plant item; menu driven for selection; monitoring and control of all major plant items; global and individual control and adjustment of |

| System | Requirement |
|---|---|
| | <p>operating times/temperatures for each operating zone; monitoring and reporting of fault/trip conditions and critical alarms</p> <ul style="list-style-type: none"> Boilers/heating schematic; ventilation schematic; domestic hot water schematic; gas schematic; electrical schematic, sub-metering and energy graphic. All graphics to show live values and allow historical review of energy usage for the previous 2-week period as a minimum. Automatic uploading of sub-metering, zone temperature and CO₂ data monthly to the Automated Energy Data Collection Portal to allow data analysis with feedback to School and College staff for monitoring and benchmarking purposes and to assist with the formal BPE reviews at 6 and 12 months following the Actual Completion Date handover Web enabled to allow remote access to all data Option to provide a BMS head end or access information via a user interface display on the boiler house control panel |
| EMS | <ul style="list-style-type: none"> Provided for all Facilities in excess of 500 m², and for the efficient management of gas, electricity and water services, a comprehensive Energy Management System (EMS) shall be provided. This shall log, monitor, and compile reports for all sub-metered services, and shall automatically upload data to the Automated Energy Data Collection Portal |
| Lifts | <ul style="list-style-type: none"> Stand-alone local control |
| Automatic doors/gates | <ul style="list-style-type: none"> Stand-alone local control unless a site-wide door access control system is specified as a result of the security risk assessment and included in these ACRs |
| Access controls | <ul style="list-style-type: none"> Stand-alone local control unless a site-wide door access control system is specified as a result of the security risk assessment and included in these ACRs |
| Domestic hot water | <ul style="list-style-type: none"> Local control point of use or centralised system with local TMV's |
| Cooling | <ul style="list-style-type: none"> Passive cooling with the exception of server rooms Local control of DX/AC units where fitted in server rooms |
| Blinds | <ul style="list-style-type: none"> Local manual or electric control |
| Local emergency knock-off of gas/electricity | <ul style="list-style-type: none"> Local gas knock-off buttons at entrances/exits to Kitchen Emergency gas/electricity knock-off in science, Design and Technology |
| Local extract in toilets and chemical store | <ul style="list-style-type: none"> Local stand-alone control |
| Security: intruder alarms, panic alarms | <ul style="list-style-type: none"> See relevant section of these ACRs |
| Disabled toilet alarms | <ul style="list-style-type: none"> Stand-alone system |

2.11.37.4 Project Co shall ensure that all controls systems are fully commissioned and set up effectively and that all settings are recorded in the operation and maintenance documentation.

2.11.37.5 Project Co shall ensure that the design intent of the controls strategy is implemented through effective end user and facilities management team training through demonstrations and documentation including controls Building User Guides. Project Co

shall undertake seasonal commissioning and adjust the installed Service Infrastructure settings accordingly throughout the 12 months following the Actual Completion Date.

2.11.38 Site-wide Strategy

- 2.11.38.1 Project Co shall consider the Site as a whole when assessing the controls strategy. Simplicity and ease of use should prevail when designing the site-wide strategy.
- 2.11.38.2 Project Co shall ensure that the site-wide controls strategy takes into account the occupied periods of the various zones and offers an energy efficient solution.
- 2.11.38.3 Project Co shall ensure that all Building Services control systems allow for optimum start up and shut off.
- 2.11.38.4 Project Co shall ensure that the Building Services control systems for relevant plant items are interlinked with the fire alarm interface in accordance with the fire strategy to shut down plant in the event of fire as required.
- 2.11.38.5 The following sections detail Building Services that may be controlled on/at a local level. There are some systems that are not appropriate for local control and shall be controlled and planned on a site-wide or building-wide scale to have a coordinated strategy. Project Co shall ensure that the following systems are controlled on a site-wide or building-wide scale:
 - a. fire detection and alarms;
 - b. external lighting;
 - c. security; and
 - d. access control: where there are existing site-wide access control systems on the Site, new systems shall integrate with the existing systems, where it is safe to do so. Where this is not feasible Project Co shall notify the Authority.

2.11.39 Building Services Control Systems and Energy Management Systems (EMS)

- 2.11.39.1 Project Co shall install controls to allow automatic operation of systems and plant; a BMS and EMS or controls of similar sophistication. Systems must include facilities for remote monitoring, optimisation, weather compensation, scheduling, time extension, frost protection and holiday setting with simple user interfaces. Local control systems shall be IP compatible for future remote connection which may not be supplied initially.
- 2.11.39.2 Details of the Building Services control systems and energy management systems(EMS) shall be included in the Environmental Strategy Report to be included in Schedule 6 Part 4.
- 2.11.39.3 A stand-alone control system is provided for all small HVAC systems of limited complexity, which do not warrant being remotely monitored.
- 2.11.39.4 Headline output data, for example temperatures and heating and hot water flow/return temperatures, is available via the web, interfaced with the AMR data, for use in energy management and in the School/College Curriculum.
- 2.11.39.5 Project Co shall provide:
 - a. detailed specifications and commissioning schedules for the BMS and EMS;
 - b. centralised monitoring of mechanical systems through the BMS;
 - c. a web-based interface to control systems;
 - d. structured security access coding to prevent unauthorised access to the system;

- e. provisions for remote dial in by a third party; and
 - f. control zones which match the building and system operational zones.
- 2.11.39.6 A Building Management System (BMS) shall be provided for all Facilities with system heating loads in excess of 40kW and/or a floor area in excess of 500m² (or extended Buildings which reach this figure).
- 2.11.39.7 Graphics shall be provided for each major plant item, menu driven for selection; monitoring and control of all major plant items; global and individual control and adjustment of operating times/temperatures for each operating zone; monitoring and reporting of fault/trip conditions and critical alarms.
- 2.11.39.8 Lighting controls and fire and security systems shall be independent of the BMS.
- 2.11.39.9 On smaller projects where BMS is not involved, controls shall be simple stand-alone controllers or Programmable Logic Controllers (PLC). Web based monitoring of systems is an alternative for BMS for local monitoring.
- 2.11.39.10 The use of BMS should only be used in preference to a simpler system in a small building where it can be demonstrated that the BMS will provide greater benefit to outweigh the drawbacks of the BMS being a more complex system to operate and maintain.
- 2.11.39.11 On very small installations, a domestic-type control system or the boiler manufacturer's own controls may be sufficient, so long as the Authority (or each relevant School Entity in the case of a School(s) project), is given the additional facility to select a holiday period with frost protection.
- 2.11.40 Energy Management System (EMS)
- 2.11.40.1 For the efficient management of gas, electricity and water services a comprehensive energy management system (EMS) shall be provided, to include for the following functionality:
- a. automatic energy/service usage data collection, including for automated upload to the Automated Energy Data Collection Portal independent of the Authority's (or the relevant School Entity's in the case of a School(s) project) IT system. Project Co shall liaise with the Automated Energy Data Collection Portal to establish and agree the data collection requirements and methodologies;
 - b. differentiate between core hours energy use and out of hours and holiday period energy use;
 - c. early warning of potential overuse or out of normal range values;
 - d. analysis of usage to highlight inefficient practices, out of hours usages, etc.;
 - e. archiving and back-up of all received data for a minimum of 36 months;
 - f. calculate heating degree day values based upon local weather data;
 - g. align the M&T reporting with CIBSE TM54 protocols; and
 - h. retain all current collected data values.
- 2.11.40.2 The EMS software and hardware may be stand-alone from the BMS but must be interlinked to it for ease of navigation from any central supervisor PC or web-access portal. At all instances of BMS to EMS data inter-connection this shall be through a standard open protocol.
- 2.11.40.3 Refer also to functionality and in-use requirements for the EMS as described in the Service Level Specification.

- 2.11.40.4 All gas, water and electricity meters will report to the EMS. All usage data collected shall be analysed through the EMS system software on a monitoring and targeting (an M&T) basis to indicate areas where action will bring an improvement in energy use and establish usage patterns, identify bad practices and potential overload or phase imbalance problems. M&T related visual alarms and reports shall assist in control actions.
- 2.11.40.5 M&T reporting facilities shall be provided that will provide precise information on levels and patterns of use and running costs. These reporting facilities will be graphically based with easy to use and understand for the general staff user summary pages for each service, and shall enable the user to:
- a. monitor core hours usage and out of hours usage separately, and provide internal billing reporting for each third-party client usage;
 - b. display period by period data over a user selected date ranges for each different building zone and service;
 - c. identify peak demand levels with times so that causes can be determined and removed;
 - d. show consumption trends over user selected date ranges and for core hours vs. out of hours use;
 - e. analyse real usage against target levels through graphical based M&T;
 - f. determine potential supply capacity and power factor problems;
 - g. identify the need for maintenance due to increased levels of energy use through M&T;
 - h. automatically supply all relevant energy data for monitoring the building performance against others on the Automated Energy Data Collection Portal;
 - i. produce automated weekly, monthly, and annual energy/service usage reports; and
 - j. identify and report peak demands against utility provider constraints.
- 2.11.40.6 Project Co shall submit for approval all proposals for the entire EMS functionality and graphics pages.

2.11.41 Zoning

- 2.11.41.1 Project Co shall ensure that the Facility is zoned appropriately to ensure that:
- a. spaces are flexible in use;
 - b. spaces can be used in isolation out of hours where required;
 - c. Service Infrastructure can be controlled to account for differing weather/solar gain characteristics; and
 - d. as a minimum, ensure that the heating and cooling is zoned so that the following are provided with separate zones:
 - i. the main catering Kitchen;
 - ii. sports facilities, including changing areas, showers, and toilets;
 - iii. main hall, including any catering facilities, toilets and connecting corridors;
 - iv. any other spaces as identified in these ACRs e.g. Nursery, Community use rooms, and before and after school clubs; and
 - v. each floor/level of the Building except in Buildings under 500m².
- 2.11.41.2 If centralised mechanical ventilation is used, Project Co shall ensure that the same zones are provided as that for heating or cooling. However, the zones for mechanical ventilation

may not be provided through separate systems but can be met through dampers and other controls methods.

2.11.42 Controls Operability and ease of use

2.11.42.1 Project Co shall ensure that all user controls shall be easy to use, well labelled, and intuitive to operate and understand. The design Guide “Controls for end users”⁴⁵ shall be used by Project Co to succinctly inform the design, installation, training, and handover of the various building controls systems.

2.11.43 Sub-Metering Requirements

2.11.43.1 Sub-meters provided should be intelligent digital MODBUS or M-Bus sub-meters, providing sampling at a minimum of every 30 minutes. Basic pulse output sub-meters will not be acceptable. All sub-meters shall be suitable for billing purposes in accordance the measuring instruments directive (MID) 2004/22/EC

2.11.43.2 Project Co shall ensure that:

- a. all data collected from the sub-meters shall be logged, recorded and analysed in line with the requirements set out in these ACRs; and
- b. automatic meters shall be installed complete with interface units for connection to the EMS to allow for automatic meter reading and data collection and automatic monthly uploading of data to the Automated Energy Data Collection Portal

2.11.44 Heating System Controls

2.11.44.1 Project Co shall ensure that the heating system/s are adequately controllable to give good thermal comfort while maximising energy efficiency and minimising carbon emissions.

2.11.44.2 The control options for switching on and off include manual, time switch, optimisers and programmable controllers. A compensator, used to regulate the operating temperature of a heating system in response to the outside air temperature, shall be used for variable temperature circuits.

2.11.44.3 Project Co shall ensure that the following requirements are met:

- a. room sensors are positioned appropriately, out of draughts and direct sunlight and at an appropriate height in the room and that the space is suitably zoned to be controlled by room sensors;
- b. weather compensated heating and centralised control from the boiler control panel is provided as either optimiser or time clock control with automatic daylight-saving correction (BST/GMT changeover);
- c. control override is provided to enable out-of-hours use;
- d. the particular thermal comfort needs of Students with complex disabilities or SEN (D) are taken into consideration when designing the heating system. in accordance with Building Bulletin 101: ‘Guidelines on ventilation, thermal comfort and indoor air quality in schools’ (BB101);

⁴⁵ “Controls for end users: A guide for good design and implementation (BCIA/2007)”, as published by the Building Controls Industry Association in conjunction with BSRIA and the UBT.
<http://www.bcia.co.uk/documents/Controls%20for%20End%20Users%20guide.pdf>

- e. space heating control is provided using air and immersion sensors to operate principal items of Plant, control valves and pump/fan motors or their drives;
- f. weather compensation control, optimum start control, frost protection and condensation protection is provided; this will require space temperature, outside air temperature, and flow and return temperature sensors;
- g. the heating system is responsive enough to changes in use in the spaces served; and
- h. the operational hours of the different zones of the Facility are taken into account when designing the heating system and predicting energy use, since it is likely that some or all areas will be used for after-school activities.

2.11.44.4 Table 39 details the heating control on a room level, it does not include building-wide control. Project Co shall consider the heating controls on a building or site- wide scale for central Plant.

TABLE 39 SUMMARY OF HEATING EMITTER CONTROLS AT ROOM LEVEL

| | Automatic | Manual | Manual and Auto. | On/Off | Modulating | System Type | Control Options |
|--------------------------------|-----------|--------|------------------|--------|------------|----------------------|---|
| Natural Convectors & Radiators | x | | | | x | Variable Temperature | Wall mounted temperature detector measures the room air temperature and sends the signal to the control valves which reduce flow through the emitter/s. |
| | | | | | | | Thermostatic Radiator Valve(s) (TRVs) are used to reduce the flow to the emitter/radiator. TRV's shall be lockable and set to allow occupant control up to 20 °C or the normal maintained temperature for the space. |
| Warm Air | x | | | | x | Variable temperature | Wall mounted temperature detector measures the room air temperature and sends the signal to the control valves which reduce flow through the emitter/coil in the terminal unit. BMS interlock to automatically enable/disable unit according to time-clock schedule |
| | | | | | | | Duct mounted or return air temperature detector measures the room air temperature and sends the signal to the control valves which reduce flow through the emitter/coil in the terminal unit. BMS interlock to automatically enable/disable unit according to time-clock schedule |
| Radiant Heaters | x | | | x | | Constant Temperature | Wall mounted black bulb sensor detects the room air radiant temperature and sends the signal to turn the panel on/off. BMS interlock to automatically enable/disable heaters according to time-clock schedule |
| Over-door Air curtain | | | x | | | Variable Temperature | Wall mounted controller in a position only accessible to staff to control operation of air-curtain and speed. Integral air return temperature sensor sends signal to the control valves which reduce flow through the |

| | | | | | | |
|---------------------------------|---|--|--|--|---|---|
| | | | | | | emitter/coil. BMS interlock to automatically disable outside of core hours |
| Underfloor | x | | | | x | Variable Temperature Wall mounted sensor detects the room air temperature and sends the signal to turn the underfloor heating on/off. A screed sensor also acts to provide a high-limit over-ride function. BMS interlock to automatically enable/disable heating according to time-clock schedule |
| Forced Convection-Fan Convector | x | | | | x | Variable temperature Wall mounted sensor detects the room air temperature and send the signal to turn the fan convector on/off. BMS interlock to automatically enable/disable unit according to time-clock schedule |
| | | | | | | Integral sensor detects the room air temperature and send the signal to turn the fan convector on/off. BMS interlock to automatically enable/disable unit according to time-clock schedule |

2.11.45 Controllers/control equipment

2.11.45.1 Project Co shall specify all of the controllers, sensors, thermostats, emergency/safety buttons, links, and any other control equipment required to complete the scheme. A schedule for the control equipment shall be required to form part of the specification for the controls systems⁴⁶.

2.11.46 Local environmental controls

2.11.46.1 Project Co shall provide local control for teaching staff over their immediate environment for lighting, heating and ventilation. All user controls shall be easily comprehensible, accessible and quiet in operation⁴⁷.

2.11.46.2 Project Co shall ensure that:

- a. controls are clearly labelled, easy to use by untrained Authority (or School Entity in the case of a Schools project) staff, reliable and as far as possible automatic (while allowing for some degree of local override – see below);
- b. thermostats and room sensors are tamper-proof, as required by AD L;
- c. where specific controls are required to be operated by authorised personnel only, they will be located accordingly;
- d. all controls should be located so as to deter unauthorised use by Students;
- e. controls must suit the operational requirements of the Authority (or the School Entity in the case of a School(s) project);
- f. control systems shall be provided with the facility for remote monitoring of the system;

⁴⁶ Project Co may wish to consult Worcestershire County Council's guidance and specification. See Section 8 of the mechanical Service Infrastructure Trade Preambles on BEMS systems, which has proved suitable for Local Authority maintained Schools.

⁴⁷ Controls for End User, a guide for good design and implementation, Building Controls Industry Association, <http://www.bcia.co.uk/documents/Controls%20for%20End%20Users%20guide.pdf>

- g. local control for Facility Users should not be provided over heating temperature set-point, start time, finish time, regular day omission, or holiday days omission;
- h. temperature set-points for zones of the Building shall only be changed by Project Co. However, control systems are to be designed to be centrally operable by the Facility Premises Team to allow short-term time and temperature overrides, defaulting to automatic operation once a pre-determined period (of up to 24 hours) has elapsed. Changes to the main heating and cooling system temperature set-points and time schedules must be carried out by Project Co in consultation with the Authority (or the relevant School Entity in the case of a School(s) project);
- i. there will be fine trim control provided for room users to change room temperatures by providing approximately +/-2°C differential from the temperature set centrally, e.g., by operation of a thermostatic radiator valve or room controller;
- j. ventilation systems are easily controllable to reduce or increase ventilation rates in response to room temperature and occupancy; and
- k. all space temperature control sensors and thermostats shall be positioned and arranged so that the maximum difference to the air temperature in the centre of the room at 1m above the floor is always <3°C. (This does not apply to sensors in under-floor heating systems that are embedded under-floor to sense floor surface temperature.)

2.11.47 Ventilation System Controls

2.11.47.1 Project Co shall provide control, trend logging, indication and monitoring of the following for the ventilation systems:

- a. supply temperatures and return temperatures;
- b. CO₂ concentration;
- c. filter status;
- d. electrical energy consumed for centralised ventilation systems only;
- e. night purge ventilation and free cooling (where applicable); and
- f. fault detection.

2.11.47.2 Project Co shall ensure that air quality detectors are provided (usually CO₂ sensors). Training shall be provided to ensure that staff understand the implications of the detected levels and the appropriate action to take.

2.11.47.3 These ACRs provide specific ventilation control requirements for:

- a. catering Kitchens;
- b. food technology rooms;
- c. science laboratories;
- d. Design and Technology (D&T) workshops and Practical and Vocational Teaching Spaces, where dust and fume extract systems are provided for D&T equipment, 3D printers and laser cutters; and
- e. photocopiers, where an extract system is provided.

2.11.47.4 In all cases above, local stand-alone control shall be provided.

TABLE 40 SUMMARY OF VENTILATION CONTROLS AT ROOM LEVEL

| | Automatic | Manual | Manual and Auto. | On/Off | Modulating | System Type | Control Options |
|--|-----------|--------|------------------|--------|------------|------------------------|--|
| Natural ventilation | x | x | x | | x | Natural Local | For actuated: a wall mounted air quality/ CO ₂ detector and temperature sensor, senses a demand and sends the signal to the actuators to open/close the window or louvre. Manual override to also be provided. |
| | | | | | | | For manual: a wall mounted air quality/ CO ₂ detector and thermostat senses a change and sends the signal to illuminate an LED to indicate to the occupant to open/close the window. For manual: where external noise ingress is an issue, natural ventilation through louvres with attenuators and dampers may be manually opened/closed. For manual: the window opening may be manually opened when the occupant feels it is required. For manual: a manual opening could be one that is opened by a handle, a Teleflex winder or an electric actuator or motor that is operated by a manual switch and with no automatic function |
| Natural Ventilation | x | | x | | x | Natural Central | For actuated: Averaging wall mounted air quality/ CO ₂ detector and temperature sensors, senses a demand and sends the signal to the actuators to modulate open/close the window or louvre. Weather compensation to be provided manual override to also be provided. |
| Fan assisted natural ventilation | x | | x | | x | Natural Local/ Central | A wall mounted air quality/ CO ₂ detector and thermostat senses the change and sends the signal to the fans to increase/ decrease speed to change the air flow. To be provided with a manual boost option, and an override off function. These options to be selected by a retractive push switch or other non-latching switch so that the control system can revert back to automatic operation after a pre-determined time period. |
| Local stack and wind effect roof ventilation units | x | x | | x | x | Natural Local | If fan assisted: a wall mounted air quality/ CO ₂ detector and thermostat senses the change and sends the signal to the fans to increase/ decrease speed to change the air flow. Usually provided with a manual boost option. |
| | | | | | | | In manual; manually operated automatic damper control to open/close opening. |
| Anti-stratification fans | x | x | | x | x | Mixing | A wall mounted thermostat (where on/off or temperature detector where modulating) senses the change and sends the signal to the fans to turn on/off or increase/ decrease speed. |
| | | | | | | | If manual, then the occupant would turn the fan on/off when felt appropriate. |
| Mechanical | x | | | x | | Mechanical | Constant volume ventilation: for permanent ventilation requirement No room level control, only building level, to provide a set amount of ventilation. For use in transient spaces with no fixed user, i.e. Reprographics, SEN (D) resources, Hygiene rooms, etc |

| | | | | | | | |
|--------------------------------------|---|---|--|--|---|---------------------------------|--|
| | x | | | | x | Mechanical | Constant volume ventilation: For when occupied ventilation requirement PIR room level control, to provide a set amount of ventilation when the room is occupied. For use in occupied spaces with a fixed user, or small class sized groups i.e. offices, classrooms, meeting rooms, seminar rooms, etc. |
| | x | | | | x | Mechanical | Variable volume ventilation: For when occupied ventilation requirement PIR, CO ₂ , and temperature sensor room level control and to provide a set amount of ventilation when the room is occupied. For use in occupied spaces with variable occupancy and group sizes i.e. Dining and Social, main halls, sports halls, drama, activity, etc. |
| General local extract ventilation | x | x | | | x | Local/ Central Mechanical | Presence detector or manual switch for fan, usually connected to the electric lighting e.g. in WCs. Local only for WCs/changing rooms. |
| Specialist local extract ventilation | x | x | | | x | Local Mechanical | Occupant manually switches on fan when activity is commencing e.g. fume cupboards. Extract fan may be automatically linked to other systems or to a time schedule. Make-up air may need to be interlocked with extract system to avoid pressure issues. |

2.11.48 Mechanical cooling systems

Mechanical cooling should not be necessary in the majority of Facilities. The exception is in the server room for peak lopping in summertime conditions where a local controller will be provided. Where cooling is provided, there must be an interlock with the heating system so that the two systems do not operate simultaneously. If multi-room comfort cooling is provided each room shall be monitored via a central BMS only.

2.11.49 Frost protection

2.11.49.1 Project Co shall allow for 2-stage frost protection on all pumped systems as follows:

- a. the initial stage of frost protection shall be to enable the pumps in the event that the internal temperature of the Building drops to 5°C. This temperature shall be adjustable on the control system; and
- b. in the event that the temperature drops to below 2°C (this temperature shall be adjustable on the control system), the second stage of frost protection shall commence, and the boiler plant and plate heat exchangers shall enable to circulate LTHW around the system.

2.11.50 Gas Services Controls

2.11.50.1 Project Co shall:

- a. ensure that where a flammable gas detection system is installed within a Plant Area for boiler control the system can detect any gas leaks and set off an alarm locally (lamp and sounder) and communicate an alarm to both the fire alarm panel and the BMS where installed;

- b. ensure that the flammable gas detection system complies with IGEM UP/2, that a fail-safe gas solenoid valve on the gas main is provided and that in the event of a gas leak being detected this valve will close;
- c. provide emergency push buttons on all exits of Plant Areas which when pressed close the gas valve and this condition is communicated to the BMS where one is used;
- d. ensure that in the event of a fire alarm, the gas valve in Plant Areas will close and that a time delay (adjustable) is included so that during fire alarm testing the boilers are not shut down;
- e. ensure that emergency push buttons are provided in any laboratories by the teacher's desk and Preparation Areas by the exit and that when pressed the gas valve will close and a local reset is provided;
- f. ensure that each science lab/ Preparation Areas / catering Kitchen/ Classroom is fitted with a gas isolation/pressure proving system where required by IGEM UP/11, and that gas proving valves are fitted to each branch serving a science lab/ Preparation Areas ; and
- g. provide gas safety interlocks in Kitchens, science labs, food technology, Design and Technology areas which comply with IGEM UP11, IGEM UP19 and BB101.

2.11.51 Control Commissioning

2.11.51.1 Project Co shall:

- a. ensure that the controls systems are fully commissioned throughout prior to the Actual ICT Handover Date, and ensure that the whole building system commissioning is undertaken such that the Building Services controls systems that interact with each other are commissioned at the same time;
- b. ensure that the Building Services control systems are commissioned in accordance with CIBSE Commissioning Code C: Automatic controls;
- c. provide a commissioning programme prior to construction allowing for 2 weeks' notice prior to witness testing;
- d. ensure that inspection and testing are undertaken in line with BS 7671:2008 'Requirements for electrical installations. IET Wiring Regulations';
- e. commission the controls system in accordance with BSRIA AG 9/2001 'Standard specifications for BMS';
- f. carry out Building Performance Evaluation and seasonal commissioning in accordance with these ACRs; and
- g. carry out performance testing/proving during the 12-months following the Actual Completion Date.

2.11.51.2 Project Co shall conduct seasonal commissioning of the control systems during the 12 months after the Actual Completion Date handover and fine tune control settings.

2.11.51.3 Project Co shall also run, monitor and maintain all Building Services and control systems for a minimum period of one full week before the Actual ICT Handover Date, demonstrating that all systems will operate automatically without fault in normal modes of operation. During this period Project Co. shall:

- a. undertake the required demonstration of the system and controls in line with the Soft Services Training Plan set out in Schedule 10 of this Agreement.
- b. specifically monitor, measure, and calculate all domestic hot water system standing losses and demonstrate that there are within the calculated and

acceptable design parameters and limits as set out in these ACRs and the Final Baseline Energy model.

2.11.52 Electrical Installations

2.11.52.1 Project Co shall ensure that the design of electrical services meet the requirements for the design, installation and commissioning of the electrical services and the requirements below.

2.11.53 Power, Connections, Supply and Generation

2.11.53.1 Project Co shall make due allowance in the design for the safe access to, and maintenance of, all parts of the electrical installation. The electrical services shall be arranged so that they do not impede access to other Service Infrastructure.

2.11.53.2 Project Co shall arrange for an electrical connection to the public electrical supply (PES) and make allowance for Distribution Network Operator (DNO) equipment to be located on the Site if necessary.

2.11.53.3 Project Co shall:

- a. liaise with the distribution network operator (DNO) to establish the incoming electricity supply, and determine if the supply should be at high voltage or low voltage', establish the rating of the DNO overcurrent device at the point of supply, and provide the DNO with all characteristics of the load which the DNO may request (for example harmonic content and characteristics of large loads);
- b. establish the location of DNO equipment, make allowance for it to be located on the site if necessary, and submit drawings to the Authority showing the layout of the DNO equipment including high voltage switchgear, transformers, low voltage switchgear and space for metering following DNO guidelines;
- c. establish and take into account the characteristics of the supply including prospective short-circuit current, external earth fault loop impedance and earthing arrangements;
- d. ensure connections to a low voltage (LV) supply are designed in accordance with BS 7671 IET Wiring Regulations;
- e. ensure electrical supplies are 3 phase, 400V, 50Hz; and
- f. ensure the power factor is no less than 0.95 lagging and provide power factor correction equipment to achieve this power factor, as necessary on incoming electrical supplies as well as on low voltage distribution systems with balanced loads for each phase, as necessary.

2.11.53.4 Project Co shall assess the required capacity of the new electrical supply taking into account diversity factors and the anticipated load profile. Electrical supplies shall be of appropriate voltage and phase for the size of premises.

2.11.53.5 Where the Works are a modification or adaptation of Existing Facilities, Project Co shall assess the capacity of the existing electrical supply and if necessary shall arrange for an enhancement to the supply.

2.11.53.6 Where it is proposed to connect to existing electrical systems, Project Co shall evaluate those electrical systems. Project Co shall make an assessment of their capability and suitability to be connected to or modified in accordance with a valid Electrical Installation Condition Report (EICR).

2.11.53.7 Project Co shall, in consultation with the Authority, make an assessment of potential expansion and change throughout the life of the Building and shall make appropriate

provision in the design of the electrical distribution system. In the absence of guidance from the Authority, or any Student number forecasts as part of these ACRs, Project Co shall allow for 20% future expansion of the Facility.

2.11.53.8 Project Co shall ensure that selected energy using equipment and the electrical installation comply with appropriate directives and standards and is installed following good Electro Magnetic Compatibility (EMC) installation practice.

2.11.54 Power Generation Systems

2.11.54.1 Where these systems attract subsidies in the form of feed-in tariffs or similar, Project Co shall ensure that these are registered with the appropriate body (acting as agent for the Authority (or the relevant School Entity/(ies) in the case of a School(s) project), so that the Authority or the School Entity (as relevant) are able to receive the subsidies due.

2.11.55 Standby Generation

2.11.55.1 Generators shall only be provided where they are required to be installed by Law, for example, for firefighting lifts and for life-safety and fire-fighting applications.

2.11.56 Photovoltaic Systems

2.11.56.1 Welsh Government would expect that all new Buildings to be provided with Photovoltaic panels (PV) as part of the buildings Energy strategy, over and above any minimum requirements to meet Welsh Building Regulations AD L, or as part of BREEAM credits, or other local planning conditions.

2.11.56.2 Within practical and funding limitations, all appropriately orientated pitched roofs and all available flat roofs should be provided with PV arrays. Where these are pitched roofs, the orientation shall be no more than 30° off of true south facing. Where these are flat roof, appropriated pitched and ballasted supports shall be used to align panels to be true south facing. Appropriate and reasonable allowances for roof walkways and access and maintenance space to all roof plant, fixtures and fittings is expected, otherwise all areas of available roof are to be provided with the maximum available area of PV arrays.

2.11.56.3 Project Co shall engage an independent specialist PV designer/installer to review each scheme and advise upon the optimum position and area of PV panels and arrays that can be provided on the roofs. Project Co shall take full account of these recommendations and coordinate the overall design of the Building, including for any roof mounted Service Infrastructure and equipment, and demonstrate that Project Co has provided the maximum coverage of PV panels and arrays as is practical.

2.11.56.4 For all schemes Project Co shall:

- a. undertake the complete design of the system;
- b. ensure the system is designed and installed to BS EN 62124 and in accordance with ENA G59/3 and ENA G83/1 and to BS EN 61427-1, as well as BS 7671 IET Wiring Regulations;
- c. produce calculations showing estimated annual energy yield, based upon a PV module efficiency of at least 17% using a Monocrystalline type panel, or better, from an established manufacturer;
- d. ensure that the design life of the system is 20 years;
- e. provide for a minimum of 10 year manufactures module warranties, power supply warranty of 80%+ after 25 years, and 10-year manufacturers inverter warranties;

- f. ensure the mode of operation is grid connected and undertake all necessary liaison and negotiations with the DNO; and
- g. ensure that the positioning of PV panels is such that they are easily and safely accessible for maintenance and cleaning.

2.11.57 Small Scale Wind Generating Systems

2.11.57.1 Where small scale wind generating systems are required as part of a strategy to meet Welsh Building Regulations AD L or planning conditions, Project Co shall:

- a. undertake the complete design of the system;
- b. ensure the system is designed and installed to BS EN 61400-2 and Renewable UK 'Small Wind Turbine Standard' as well as BS 7671 IET Wiring Regulations;
- c. ensure the mode of operation is grid connected and undertake all necessary liaison and negotiations with the DNO;
- d. ensure that the design life of the system is a minimum of 20 years;
- e. provide for a minimum of 10 year manufactures warranties;
- f. ensure that the specialist designer and installer are Microgeneration Certification Scheme accredited; and
- g. submit details to the Authority of the proposed type of wind turbine, its mounting axis, support structure and foundations, electronic and electrical components, cabling and cable containment.

2.11.58 Mains Distribution

2.11.58.1 The distribution strategy adopted shall be well-planned, logical, maintainable and cost effective.

2.11.58.2 Electrical rooms and cable routes shall be determined during the early stages of the design to ensure that adequate floor space and horizontal and vertical distribution zones are provided.

2.11.58.3 Cable containment shall be selected and arranged taking into account EMC considerations. Each containment run shall carry cables of only one voltage band and cable containment shall not be suspended from other Service Infrastructure.

2.11.58.4 Steel cable trays, baskets, ladders and trunking shall have an appropriate finish, shall be electrically continuous where metallic and shall have fire barriers where appropriate.

2.11.58.5 Project Co shall ensure that:

- a. main switchboards, sectional switchboards and distribution boards satisfy all electrical and mechanical criteria and that the switchgear provides for future extension affecting cabling and electrical loads up to a minimum of 20% above the base load for the completed Facilities;
- b. all switchboards are installed in secure locations;
- c. new switchboards shall have an appropriate form of separation taking into account the nature of the loads supplied and any requirements for continuity of supply. Where it is required that cables may need to be terminated adjacent to live cables, then the form of separation shall be Form 4b Type 7. Where it is not required that cables may need to be terminated adjacent to live cables then the form of separation shall be Form 4 Type 2 or better;
- d. the system achieves the required disconnection times under fault and is properly graded to achieve full discrimination / selectivity between upstream and

downstream devices both on mains operation, and discrimination is demonstrated using time-current coordination curves in a study report;

- e. where distribution boards are located in accessible locations, such as corridors, they are tamper proof and fitted with a lockable door; and
- f. all Equipment shall be provided with durable labels, clearly marked with details of the equipment's function and designation.

2.11.58.6 Project Co shall provide a main switch panel for the incoming supply that has:

- a. full metering and EMS connections for monitoring and controls;
- b. sufficient switch fuses / moulded case circuit breakers (MCCBs) for sub-main distribution, lifts, heating, ventilation and air conditioning (HVAC) and fire alarm along with a minimum of 10% spare capacity;
- c. automatic power factor correction shall be provided where necessary to achieve a power factor of at least 0.95 in normal use;
- d. local panel boards for larger loads that are remote from the main incoming panel are fitted with sub-metering and have a minimum of 20% spare capacity and shall have BMS and EMS connections for monitoring and control; and
- e. local power and lighting distribution boards shall have a minimum of 10% spare load capacity and 20% spare breaker ways to allow for future expansion of the system.

2.11.58.7 Project Co shall ensure that:

- a. in all science labs, Preparation Rooms and design technology Practical Teaching rooms, automatic central isolation of electrical supplies is provided which isolates all circuits except those provided for ICT equipment;
- b. the following rooms and spaces shall be fed by dedicated distribution boards: ICT-rich teaching rooms, Practical Teaching rooms with emergency shut off on electrical supplies, large offices, communications centres, server rooms, Kitchens and stage lighting rigs;
- c. the server room distribution board serving ICT Equipment is on a separate supply from the main distribution board so that the server room can be left running while other areas are shut down for maintenance;
- d. the server room power consumption is separately metered and monitored by the EMS; and
- e. ICT equipment in the server room is metered after the UPS so that the PUE can be calculated for energy monitoring purposes. Data projectors and local ICT equipment in teaching spaces should be on the same phase as all other small power.

2.11.58.8 Project Co shall provide external weatherproof vehicle charging points to at least 4no. or 10% of the designated on-site car parking spaces (whichever the greater number), including disabled bays, using a 'pod point' type charging system, with a minimum of 2no. twin 3.6kW single phase pod points or equivalent serving four car parking bays. For larger sites and quantity of charging points a charging array system may be more economical and should be considered.

2.11.59 Earthing and Bonding Systems

2.11.59.1 Project Co shall:

- a. provide an earthing and bonding installation in accordance with BS 7671 and BS 7430;

- b. liaise with the DNO to determine the type of earthing system required and to establish the demarcation of responsibilities;
- c. provide all earthing and bonding including main incoming earthing, main earth electrode, main earth terminal (MET), main equipotential bonding, supplementary equipotential bonding, circuit protective conductors, clean earths where appropriate and functional earths where appropriate; and
- d. only where generators are required, ensure that the design of standby generator earthing ensures that sufficient earth fault current is generated to operate protective devices.

2.11.60 Inspection and Testing of Low Voltage Electrical Installations

2.11.60.1 Project Co shall:

- a. ensure that test equipment is calibrated annually and that inspection and testing of electrical installations are in accordance with BS 7671 and IET Guidance Note 3; and
- b. confirm that materials comply with the relevant standards, that the installation is erected correctly, and that the installation is free from defects; and measure the electrical continuity of cable containment.

2.11.61 Low Voltage Distribution Systems

2.11.61.1 Project Co shall ensure that the following requirements are met.

- a. sub-mains and final circuit cables have copper conductors. The outer sheath of sub-mains cables is black and cable core colours are as defined by BS 7671;
- b. sub-mains cables are compliant with BS 6724: 'Electric cables. thermosetting insulated, armoured cables of rated voltages of 600/1 000 V and 1 900/3 300 V for fixed installations, having low emission of smoke and corrosive gases (Low Smoke Zero Halogen (LSZH)) when affected by fire' in accordance with BS EN50267-1: 'Common test methods for cables under fire conditions.' Cabling is of an approved type tested by British Approvals Service for Electrical Cables (BASEC);
- c. the armour of cables is used as a circuit protective conductor. Where required to reduce the earth fault loop impedance to achieve disconnection times, a supplementary circuit protective conductor shall be run with the cable;
- d. the cable routes allow sufficient space for the bending radius of the cables;
- e. Busbar systems, both vertical and horizontal, are considered acceptable as a cost effective and space efficient alternative to multiple runs of cable. Busbar systems are compliant with BS EN 61439-6; and
- f. local distribution boards are provided strategically located around the Building, housed in dedicated electrical cupboards, risers or plant rooms. Distribution boards shall be fitted with a lockable door.

2.11.62 Cable Containment

2.11.62.1 Project Co shall ensure that the following requirements are met:

- a. sub-mains distribution cables are generally fixed to cable containment, buried underground, laid in trenches or run in underground ducts. Underground cable sheaths are not to be porous. Vertically routed cables are secured by cleats;
- b. where run externally, sub-mains cables are buried directly in the ground. Where sub-mains cables run below hard standing, the cables are run in cable ducts to

allow alterations and additions in the future. Warning tapes and protection tiles are laid above buried cables;

- c. cable runs in ducts are fixed to cable containment within the duct and are not be laid on the bottom of the duct. Ducts are laid to falls and drained and allow for maintenance access;
- d. cable containment is selected and arranged taking into account Electro Magnetic Compatibility (EMC) considerations;
- e. cable baskets, trays and ladders are compliant with BS EN 61537, and cable trunking with BS EN 50085. Cable baskets are high sided and cable trays are medium duty with a return flange;
- f. cable ladders are used over switchboards and where cables run vertically, for example in risers, the cables are fixed to horizontal channel supports. Cables are not fixed to vertically running cable trays;
- g. steel cable trays, baskets, ladders and trunking should have a galvanised finish. Metallic cable containment is electrically continuous and fire barriers are provided wherever cable containment penetrates a fire compartment; and
- h. cable containment is not to be suspended from other Service Infrastructure. Cable trunking has a minimum ingress protection rating of IP4X.

2.11.63 Power Circuits

2.11.63.1 Project Co shall ensure that power circuit systems comply with the following requirements:

- a. Residual Current Breaker with Overcurrent (RCBO) / Residual Current Device (RCD) / earth leakage protection is to be provided on all circuits serving socket outlets. This will normally be 30mA rated;
- b. the power circuit system is designed to minimise electromagnetic interference to the computer systems and nuisance tripping due to earth fault leakage currents;
- c. sufficient numbers of appropriately positioned sockets are provided, together with the others required for general maintenance and functions such as cleaning as agreed with the Authority;
- d. surge protection is to be provided for ICT equipment where required to meet compliance with BS EN62305 for Lightning Protection;
- e. sockets are to be located to support differing room layouts and usage;
- f. outlets for computer equipment must comply with BS7671⁴⁸; all sockets shall be sited safely away from potential hazards, such as water outlets;
- g. all cabling shall be low smoke and halogen type; and
- h. specific proposals for power circuits, such as the number of sockets in a room, emergency cut-off switches or 3-phase supplies, is as detailed on the ADS.

2.11.63.2 Project Co shall ensure that the following requirements are met:

- a. socket outlets are on 32A ring or 20A radial circuits as defined by BS 7671. Small power accessories comply with BS 1363;
- b. fused connection units and socket outlets have an Ingress Protection (IP) rating suitable for the environment;

⁴⁸ BS 7671 Chapter 54, earthing arrangements for high leakage equipment.

- c. fused connection units are provided for tea points, hand driers, fridges, freezers, and other similar equipment;
- d. socket outlet circuits are protected against overload by miniature circuit breakers (MCBs) and are protected against earth leakage currents by RCDs and RCBO's;
- e. the quantities of small power outlets are as detailed on the SoA and the Facility specific ADS. Typically, the total number of outlets provided shall be up to 1.2 per Student place. Generally, these comprise double socket outlets but within this allowance any fused spurs and a small number of single socket outlets for cleaners use in corridors and for connection of high level projectors are included;
- f. desk mounted socket outlets and wiring to desks shall comply with BS 6396: Electrical systems in office furniture and screens; and
- g. small power supplies are provided as appropriate for Building Services equipment e.g. wireless routers, control and instrumentation panels for fire detection and alarm systems, security systems, building management systems and other specialist systems, fan coil units, hand dryers, water heaters, and specialist equipment such as bleacher seating.

2.11.63.3 Project Co shall ensure that the number of sockets on a circuit is assessed. It is anticipated that this will vary depending on location and anticipated loading. The likely earth leakage carried on each circuit is assessed to prevent the unwanted tripping of RCDs. The number of socket outlets per circuit is limited according to the likely equipment to be supplied. Project Co shall consider using 20A radial circuits in lieu of 32A rings if the anticipated load is low (e.g. in areas of high density of computer use, limiting the number of sockets such that the earth leakage current is controlled to acceptable limits may mean that the current drawn flowing on a circuit is only a few Amperes, in which case 20A radial circuits would be appropriate). Diversity shall be assessed in accordance with IET Guidance note 1.

2.11.63.4 Wiring methods selected shall be compliant with BS 7671, robust, suitable for the environment, accessible, rewirable and where visible neat and tidy and in accord with the desired aesthetic. Preferred wiring methods for final circuits are:

- a. rigid thermosetting insulated single core cables (LSZH singles, 6491B, H07Z-R) to BS 7211 table 3a run in rigid steel trunking and conduit,
- b. flat twin and earth cabling (LSZH, 6242B) to BS7211, laid in rigid steel baskets may be used where agreed with the Authority.

For either wiring method,

- a. Circuit Protective Conductor (CPC) sizes shall be sufficient to ensure that the fault current generated operates the protective devices within safe time limits.
- b. Mechanical protection using galvanised steel conduit shall be provided where wiring is concealed within the building fabric to serve flush mounted accessories. RCBO/RCD circuit protection in accordance with BS7671, does not negate the need to provide this mechanical protection.

2.11.63.5 Prefabricated wiring systems may also be proposed, in which case cables shall be either rigid thermosetting insulated single core cables (LSZH singles, 6491B, H07Z-R) to BS 7211 table 3a or flat twin and earth cabling (LSZH, 6242B) to BS7211, run in armoured flexible conduits fixed to cable trays or baskets.

2.11.63.6 In accordance with BS7671 clause 522.10.202 all wiring systems are required to be supported to prevent premature collapse in the event of fire. For School and College Buildings this shall be using steel conduit, steel trunking, suspended steel cable tray or

basket with steel fixings with all cables laid onto the tray/basket. The use of inverted cable tray is not acceptable.

- 2.11.63.7 Arc fault detection devices (AFFDs) conforming to BS EN 62606 shall be provided as a means of additional protection against fire caused by arc faults in all ac circuits where Buildings have residential accommodation.
- 2.11.63.8 In accordance with BS7671 final circuits requiring overload, short circuit and earth leakage protection utilise RCBOs provided in the local distribution boards.
- 2.11.63.9 Project Co shall ensure that the following requirements are met:
- a. the grade of rigid steel conduit is appropriate for the environment in which it is to be installed. Conduit installed externally and in plant spaces and risers is galvanised;
 - b. flush mounted wiring accessories and concealed wiring are used generally;
 - c. final run outs of final circuit cables are contained in wall mounted plastic multi-compartment trunking accommodating small power accessories;
 - d. where specified in the Facility specific ADS, spaces - including science laboratories, prep rooms, design technology Practical Teaching rooms, Vocational Teaching rooms and Kitchens - are fitted with a facility to isolate supplies in an emergency; such facilities do not isolate refrigerators, freezers, ICT equipment and 13A sockets provided for cleaners;
 - e. all small power outlets in a room are on the same electrical phase;
 - f. SEN (D) and medical spaces such as medical / therapy rooms, sick bays, physiotherapy, soft play, Calming Room, multi-purpose therapy, sensory room, medical / nurse's office, hydrotherapy pool are designed in accordance with Health Technical Memorandum 06-01 'Electrical Services Supply and Distribution' and Sections 702 and 710 of BS 7671 IET Wiring Regulations;
 - g. in server rooms BS EN 60309 socket outlets are provided for server racks of ratings appropriate to the load;
 - h. a flush-mounted electrical fused spur shall be provided at high level connected via concealed conduit to a flush flex outlet plate adjacent to each hand drier. If a towel dispenser is installed, conduit shall be run to a position suitable for later connection of a hand drier. This allows for future installation of hand driers or automatic towel dispensers. Electric hand driers shall have: a drying time of less than 30 seconds; infra-red control for no contact start; auto-off; and a low noise level of less than 65 dBA at 1m. The choice of hand drier or paper towel dispenser will be as indicated in these ACRs. A hand drier shall be provided for each run of up to 5 WC cubicles; and
 - i. contrast switch plates shall be provided throughout the Building in compliance with ADM with a LRV 30 points different to the surrounding background décor.

2.11.64 Lift Installations

- 2.11.64.1 Lifts are not required for general Student and staff movement, but for ensuring access is available to all areas by those with physical disabilities and for assisting with the distribution of Equipment.
- 2.11.64.2 In Colleges, dependent on the Department needs the provision of an additional service or goods lift may be required for the distribution of materials, equipment and Teaching Resources.
- 2.11.64.3 The minimum requirements for a lift in any Facility will be 1no. 8-person standard passenger lift, with minimum clear internal car dimensions of 1,100 x 1,400mm, speed of

- 1.0m/s, and a capacity of 630kg. The lift will have an appropriately sized standard lift shaft with lift pit and over-run, and will be a machine room less (MRL) traction lift. The lift installations should attain all relevant BREEAM credits for lift energy consumption and energy efficiency.
- 2.11.64.4 All lifts will be sourced from UK manufacturers with UK sourced open protocol components, parts, and equipment to allow for ease and speed of maintenance and repair.
- 2.11.64.5 When calculating the number, size and location of lifts Project Co shall take account of the following factors as well as any outlined in these ACRs:
- a. the number of Students, staff and visitors expected;
 - b. the number of Students who will be using wheelchairs and other aids, the size of these aids and how many will need assistance alongside;
 - c. the maintenance strategy i.e. action in the eventuality of breakdowns and repairs specifically where access is required to all areas by those with physical disabilities or for the movement of goods and equipment. In particular Project Co must ensure that all floors are available to all staff and Students. The Payment Mechanism will penalise Project Co if any floors are unavailable due to lift maintenance or breakdown;
 - d. the arrangements for using lifts – whether they will be available to all occupants or restricted to disabled people (e.g. with a close proximity fob or key operation); and
 - e. the use of the lift in the event of a fire and in response to security incident, as part of the school's planned emergency strategies.
- 2.11.64.6 Project Co shall ensure that the design and installation of lifts provided:
- a. meet current and appropriate BS EN81 documents;
 - b. can be restricted to disabled Students, staff and visitors only, using a close proximity fob or key operation;
 - c. contain alarm communication devices, compliant with BS EN 81-28, such that the Authority (or the relevant School Entity in the case of a School(s) project) is aware of a trapped person and communication can be made with a 24-hour help line, via a direct link, to arrange their release;
 - d. have a lift capacity and internal finishes appropriate for their expected use; and
 - e. are energy efficient and meet relevant BREEAM credits for energy consumption and energy efficient features.
- 2.11.64.7 Where lifts are required, Project Co shall carry out a lift traffic analysis to identify the speed of the lift, its size and the waiting time. The minimum waiting time shall not be less than “good” as defined by CIBSE lift traffic analysis.
- 2.11.64.8 Any lift shall be large enough for a powered wheelchair user (or users if there are likely to be several users at the same time) to enter and leave the lift independently or assisted by a support worker alongside as appropriate. Significantly larger size lifts are essential for groups of Students in wheelchairs moving around alongside their peers.
- 2.11.64.9 Project Co may use platform lifts only for internal Circulation changes in level, and for transfers of less than one storey height; but they should not reduce the effective width of corridors or stairs. Platform lifts shall have a statement of conformity and be compliant

with BS EN 81-41 or Machinery Directive 2006/42/EC and have enclosed lift cars capable of being operated by a once applied control (i.e. not a continuous hold operation) and allow use by authorised personnel only.

2.11.64.10 Project Co shall ensure that lifts that are used as a means of escape are full evacuation lifts, fire rated to at least one hour with a and have a separate, secure electrical supply⁴⁹.

2.11.65 Communication Systems

2.11.66 Period Bell and PA Systems

2.11.66.1 The requirements for period bell systems and performance audio systems, as well as emergency voice communications to meet the Facility's planned emergency strategies, are given in these ACRs.

2.11.66.2 Project Co shall ensure that:

- a. period bell systems are installed where specified in the relevant Site Specific Brief to denote the start of the Core Day and to identify the end of various periods, they shall be flexible enough to deal with changes to the timetable;
- b. where possible, class changes shall be by a lower decibel rated system to that of the fire alarm, which may use local telephones as sounders;
- c. the tones/bells shall in any case be easily distinguishable from the tones/bells used for raising the fire alarm;
- d. the class change systems must have pre-set timings with manual override. All systems shall cater for hearing impaired Facility Users. Audio systems shall be provided where required in the ADS. These will be of the sound field type where specified in the relevant Site Specific Brief; and
- e. an emergency voice communication system shall be provided at each fire refuge point (see Stairs and Ramps). This enables occupants of each refuge to alert others that they are in need of assistance and to receive reassurance that this shall be forthcoming.

2.11.67 Audio Systems

2.11.67.1 Audio amplification systems shall be installed in drama, dance, Halls, music and Performance Spaces and where required in the Area Data Sheets and the relevant Site Specific Brief.

2.11.67.2 Audio cabling will be required for connecting equipment supplied by the Facility including:

- a. speakers and amplification systems in Halls;
- b. equipment in control rooms and Halls and other Performance Spaces; and
- c. where sound field systems are required in the relevant Site Specific Briefs these shall be provided and commissioned by Project Co.

2.11.68 Induction Loops (AFILS)

2.11.68.1 Project Co shall:

⁴⁹ Guidance on design and use of evacuation lifts is given in BS 5588-8:1999.

- a. ensure that induction loops are provided in line with the requirements of the Equality Act 2010 and ensure that they align with the code of practice for AFILS, BS 7594:2011; and
- b. provide a number of mobile induction loops for use in Classrooms and induction loop facilities in larger areas such as Performance Spaces as identified in these ACRs.

2.11.69 Emergency Voice Communications

2.11.69.1 Project Co shall ensure that the following requirements are met:

2.11.69.1.1 where emergency voice communications are required, the system is compliant with BS 5839-9:2011.

2.11.69.1.2 an emergency voice communication system is provided at each fire refuge point to enable occupants of each refuge to alert others that they are in need of assistance and to receive communications.

2.11.70 ICT Infrastructure

2.11.70.1 Project Co shall provide an ICT Infrastructure to meet the requirements set out in paragraph 4 of these ACRs.

2.11.70.2 Project Co shall provide, maintain and lifecycle the Passive ICT Infrastructure as part of the Works and Services.

2.11.70.3 Reference should be made to paragraph 4 of these ACRs, which provides the generic requirements for ICT Infrastructure including at Table 42 the allocation of responsibilities in relation to Lifecycle Replacement of ICT Infrastructure and equipment.

2.11.70.4 Project Co shall ensure that the use of technology is fully integrated into the design. The following will need to be considered to ensure that the Building supports the full integration of ICT.

2.11.70.5 Project Co shall ensure that the design allows for the specific circumstances of each School/ College, as specified in the Site-specific-Brief

2.11.71 The ICT solution

2.11.71.1 The ICT solution installed in the Building may rely heavily on Legacy ICT Equipment. During design, Project Co shall take account of the type of ICT solution contemplated by the Authority, it's possible future evolution, and the impact that this will have on design requirements, including; space allocation for infrastructure, mechanical and electrical requirements, including power, data and heating, ventilating and air conditioning.

2.11.71.2 The ICT Solution Summary is included in Annex 5 of the relevant Site Specific Brief

2.11.72 Data cabling and telecommunications

2.11.72.1 Project Co shall when positioning data points within teaching spaces take account of the teaching and learning activities proposed for each space and provide the most appropriate means of data access, including, but not limited to, dado mounted, furniture mounted, floor box mounted or wireless.

2.11.72.2 Project Co shall ensure that the scope of the provision shall include the whole of each Site and all ICT data and telecommunications equipment, cabling systems and containment, from core patching to connection point for the Equipment.

2.11.73 TV Installation

2.11.73.1 Project Co acknowledges that it is anticipated that all Facilities will require an incoming digital television signal; the method of reception will vary from site to site and could be DTT (Digital terrestrial television), digital cable or digital satellite. Project Co shall consider the most appropriate method of receiving a television signal for the geographical location of a Facility and take into account existing methods used by the Facilities.

2.11.74 Installations for Students with SEN (D)

2.11.74.1 Project Co shall provide additional installations specific to Students with SEN (D) which are given in the relevant Site Specific Briefs, for example:

- a. intercom, assistance alarms and access control systems; and
- b. attack alarms and/or staff-call systems, subject to a risk assessment, where staff need to call for rapid assistance.

2.11.75 Area data requirements

2.11.75.1 Project Co shall comply with the ADS and paragraph 4 of these ACRs in relation to specific Authority requirements for power, data and audio visual or sound field system cabling.

2.12 Safety and Security

2.12.1.1 Project Co shall ensure that the Buildings and Grounds are designed to be safe and secure, and for Students and staff to feel safe and secure, and that all statutory requirements for fire safety and evacuation are met.

2.12.1.2 Whilst security of both Buildings and Facility Users is clearly paramount it shall not be to the detriment of the overall appearance of Buildings; a 'fortress' appearance should be avoided. Facilities need clear, well-defined and secure boundaries to help control who gains access to their sites and Buildings, and to ensure that vulnerable Students do not wander off.

2.12.1.3 Project Co shall produce an Access and Security Strategy which shall be provided in Schedule 6 Part 4; this will be based on a security risk assessment.

2.12.1.4 The Access and Security Strategy shall take account of the Secure Line agreed for the Facility which separates members of the public from Students. The Secure Line will not necessarily be the perimeter of the site; it may be appropriate and more economical to have an inner perimeter excluding, for example, community car parks or team game playing fields. In areas with a higher security risk it may also be necessary to provide security measures for the areas outside the Secure Line such as the car park. In some cases, Buildings may form part of the Secure Line.

2.12.1.5 The level and type of security measures will vary from site to site and will need to be appropriate to the location as well as the level and type of security risk(s). The Access and Security Strategy shall take account of the merits of different types of fencing, hedges and defensive landscaping and security measures.

2.12.1.6 The following paragraphs describe the normal security provision for a Facility. These ACRs will indicate where more complex systems may be required for higher risk schools as a result of a security risk assessment. 'Secure by Design' guidance provides further guidance on the range of security options for areas of higher risk. NaCTSO's 'Crowded Places Guidance 2017' provides guidance on increasing the protection of crowded places from a terrorist attack. Project Co will ensure it complies with the principles of 'Secure by Design' and 'Crowded Places' guidance.

2.12.1.7 Project Co shall:

- a. ensure that the Facility has clear and well-defined boundaries, fences and gates to help control who gains access to its Site and Buildings;
 - b. ensure perimeter fencing, boundaries and gates are visible from the immediate vicinity of the Building such that intruders trying to gain access over these are not hidden from view;
 - c. provide secure play areas relative to the needs of the different age groups of Students;
 - d. for Colleges, provide secure external social and learning areas; and
 - e. refer to 'Site Access' at paragraph 2.3.2 and 'Fencing' references in paragraph 2.6.
- 2.12.1.8 Project Co shall provide a secure perimeter fence line; this shall comprise all new fencing unless otherwise set out in the Site Specific Brief. Project Co shall be responsible for the maintenance of all boundary treatments with the exception of hedges which will become the responsibility of the Authority after the period for Project Co to provide grounds maintenance under paragraph 2.12 of the Service Level Specification has expired..
- 2.12.1.9 Keys shall be suited and always available and shall be procured in respect of each Facility such that the Authority (or therelevant School Entity in the case of a School(s) project) shall be able to obtain replacement keys direct from the manufacturer at cost price. The Authority (or the relevant School Entity, in the case of a School(s) project) shall be able to issue access passes to visitors and staff. The Authority (or the School Entity in the case of a School(s) project) will be responsible for programming passes if an access control system is installed
- 2.12.1.10 Project Co shall ensure that building security is enhanced by:
- a. avoiding complex external building envelope forms, which may create areas that cannot be easily supervised;
 - b. careful positioning of drainpipes and canopies so that they do not provide unwanted access to high level windows and roof lights;
 - c. avoiding designs incorporating recessed doors and alcoves that could offer refuge for intruders;
 - d. external lighting optimised for energy efficiency and only used where necessary;
 - e. positioning windows/glazing to facilitate passive supervision of external areas from inside Buildings;
 - f. ensuring physical barriers do not obstruct views towards or away from School Buildings and Grounds;
 - g. designing canopies and drainpipes so that they do not provide access to high level windows and roof lights;
 - h. designing roofs and surrounding elements to prevent unauthorised access and avoid the provision of cover for intruders; and
 - i. designing external walls and the materials chosen for them to prevent unauthorised access to roofs or secure/restricted areas.
- 2.12.1.11 Project Co shall ensure that where use of security technology is agreed by the Authority, it should be discrete wherever possible with the more visible methods being restricted to the more vulnerable areas, where the obvious provision of detection devices may help deter crime. Thick planting areas close to the Building that could provide cover from security cameras is to be avoided.

- 2.12.1.12 Project Co shall ensure that the Facilities can be capable of zoning to isolate areas that may be used by the community outside the Core Day. Similarly, the heating, lighting, ventilation and security systems are to be zoned to allow for community use while the rest of the Building is unoccupied.
- 2.12.1.13 A panic alarm shall be provided for the main reception area staff and other staff as specified in these ACRs. The system will provide alarm indication in the general office or other staff area specified in these ACRs. The system will alert other staff in the event of emergencies.
- 2.12.1.14 Project Co shall provide a security solution that includes controlled entry and exit arrangements for the Site and is responsible for lifecycle and maintenance of the equipment except for internal CCTV systems used for behaviour management which the School/ College must fund and maintain. The access and security systems shall meet requirements of security, health & safety and efficient access for all Facility Users, taking account of pedestrian access, vehicle access and parking, cycle access (with secure site storage), bus stop facilities or onsite/offsite arrival of dedicated coaches. Project Co will not charge for parking services or car park security.
- 2.12.1.15 Project Co shall install a security system in respect of each Facility that is subsequently operated by the Authority (or the relevant School Entity in the case of a School(s) project). Project Co shall maintain the system(s) and provide training, a User Guide and a logbook to the relevant Facility Users to ensure that the relevant security system is understood.
- 2.12.1.16 Project Co shall provide appropriate internal glazing, to enable passive supervision of Circulation spaces from adjacent spaces.
- 2.12.1.17 Project Co shall provide training, a Building User Guide and a logbook to the relevant Facility Premises Team to ensure that the security system is understood.

2.12.2 Panic Alarm

- 2.12.2.1 A panic alarm shall be provided for the Building to enable staff to be alerted of a danger to Students and staff such as an intruder during the Core Day. The main visitor and Student reception area staff will require the ability to raise the alarm to alert other staff of an incident as specified in these ACRs. The system will provide alarm indication in the general office or other staff area specified in these ACRs. The system will be capable of alerting other staff throughout the Building and Site in the event of an emergency. These ACRs will provide further requirements as to the capability required from the system.
- 2.12.2.2 The system should be separate to the other alarm/ communication systems unless otherwise provided for in the Site Specific Brief.

2.12.3 Fire safety and evacuation

- 2.12.3.1 Project Co shall ensure that means of escape, firefighting equipment, automatic detection systems, sprinkler systems and fire signage provisions comply with Building Regulations 2010 (with 2016 amendments Part B volume 2, 'Fire Safety').
- 2.12.3.2 Building Bulletin 100, 'Design for Fire Safety in Schools' (BB100), advises how to design School Buildings so that they satisfy Part B. It is referred to in AD B, which says that Part B will typically be satisfied where the life safety guidance in BB100 is followed. BB100 contains guidance on an accepted way to meet Building Regulations Functional Requirements for fire safety B1 to B5, but also allows for alternative solutions to meeting Part B, using fire engineering or following BS 9999.

- 2.12.3.3 BS 9999, 'Code of Practice for fire safety in the design, management and use of buildings', provides guidance on how to meet Part B and is acceptable for School/College Building design. It attributes a risk profile to the Building, based on the occupancy characteristics and the likely rate of fire growth. It also embodies elements of a codified approach to fire engineering by allowing increases in travel distances and reduction in exit widths if additional fire safety measures are provided; and similarly, reduction in periods of fire resistance if certain ventilation conditions are satisfied.
- 2.12.3.4 Project Co shall ensure that a fire strategy is agreed with the approving authorities, i.e. the Local Authority Building Control or Approved Inspector. In accordance with the Schedule 10 (Completion Requirements) of this Agreement, at the Actual ICT Handover Date Project Co shall provide to the Authority all relevant fire safety information in a usable form that will allow the Authority⁵⁰ to develop plans to manage the Facility safely should a fire occur. This shall be in the form of a Fire Safety Management Plan produced in consultation with the Authority in order to meet their responsibilities under the Regulatory Reform (Fire Safety) Order 2005. Building Regulations Regulation 38 requires that the fire safety information is given to the "responsible person" at the Facility not later than the date of completion of the work and describes what that information should cover. Appendix C of BB100 gives further information on the Fire Safety Information required to be provided by Regulation 38. Basic information on the location of fire protection measures shown on a plan shall be provided, together with setting out any implications for the management of the building arising from the design of fire safety arrangements. This shall include detailing how occupants requiring assistance will be evacuated.
- 2.12.3.5 Project Co shall ensure that:
- a. the elements of the structure, finishes, fixtures and fittings must comply with all relevant Law including guidance and codes of practice;
 - b. fire doors which are subject to heavy usage, e.g. Circulation routes, have the facility to be held open by electro-magnetic contacts wired into the fire alarm system (see Section on Internal Door Hardware at paragraph 2.8.13);
 - c. a fire strategy is agreed with the approving authorities, i.e. the Local Authority Building Control or Approved Inspector;
 - d. building insurers are consulted about fire precautions, to establish whether they have any requirements over and above the Building Regulations; and
 - e. any compartmentalisation is maintained throughout the Operational Term; Half hour fire doors on corridors and stairwells, which are subject to heavy usage, must have the facility to be held open by electro-magnetic contacts wired into the fire alarm system (see Internal Door Sets at paragraph 2.8.11) and such doors shall be of the recessed type.

2.12.4 Fire detection and alarm systems

- 2.12.4.1 Project Co shall ensure that fire alarm systems are provided that comply with the requirements of BS 5839 51, and new systems are to be intelligent addressable. There are two categories of manual call points:
- a. Type A – direct operation (one action sets off the alarm); and

⁵⁰ Note that for School projects the Authority may delegate some of these requirements to the School Entity

⁵¹ BS 5839: 2013: "Fire detection and alarm systems".

- b. Type B – indirect operation (two actions set off the alarm – double knock), which may be suitable where tamper-proof installations are required, subject to Building control agreement.
- 2.12.4.2 Project Co shall determine the types of call points, in consultation with the Authority. Anti-vandal type manual call points shall be provided.
- 2.12.4.3 Project Co shall provide alternative warning systems to fire alarm sounders in accommodation specifically designed for Students with SEN (D) where required and so specified in the relevant Site Specific Brief, for example:
 - a. visual (fixed beacons) alarms in certain areas. Suitable additional visual alarms should be provided in areas where a person may be alone, such as toilets. Where full height doors are specified for WC and shower cubicles, deaf alarm beacons shall be fitted in each cubicle rather than a single beacon in the WC suite/changing room; and
 - b. vibrating paging systems for hearing impaired and other disabled people.
- 2.12.4.4 Project Co shall:
 - a. ensure that fire alarm systems are addressable;
 - b. ensure that the type (L1, L2, L3, etc.) of fire alarm system is as stated in the Project fire strategy and is agreed with building control;
 - c. determine if the fire alarm cabling is a standard or enhanced type;
 - d. ensure that wiring is fixed to the top of cable containment and where fixed to vertically mounted containment or directly to the building fabric, cabling is fixed by means of metallic clips;
 - e. develop a cause and effect matrix which shall set out the actions to be automatically taken in the case of an event such as the operation of a manual call point, the operation of a smoke detector or the operation of sprinklers;
 - f. ensure that fire alarm systems are provided that comply with the requirements of BS 5839-1:2013: 'Fire detection and alarm systems', and that new systems are intelligent addressable; and
 - g. Provide external monitoring of fire alarm and site security systems by a dedicated BT Redcare service and phone line link.

2.12.5 Evacuation of Students with SEN

- 2.12.5.1 For evacuation of Students with SEN (D) Project Co shall design the Building to enable all occupants to escape unaided so far as is practicable. Where this is not achievable, e.g. with stairs, Project Co shall ensure that there are suitable provisions to enable any occupant with mobility difficulties to wait in safety for assistance (e.g. in wheelchair refuges).
- 2.12.5.2 Project Co shall ensure that the design of the Building is capable of accommodating PEEPs⁵² for people with disabilities and shall ensure that escape plans are posted throughout the Building.

2.12.6 Sprinkler systems

- 2.12.6.1 Sprinkler systems are required for Property protection purposes. Systems shall comply with ACR; insurers requirements; and Loss Prevention Council (LPC) guidelines and

⁵² Personal Emergency Egress Plans.

Technical Memorandums. The entire installation shall be provided with an LPC certificate by Project Co at the Actual ICT Handover Date.

2.12.6.2 Project Co should liaise with:

- a. the local Water Company, when deciding whether the system requires a tanked water supply; and
- b. the insurers over their required specifications to be eligible for a discount on property insurance.

2.12.6.3 Project Co shall ensure that sprinkler protection is provided throughout the building, except in the following cases as identified in BS EN 12845⁵³ and TB 221⁵⁴:

- a. enclosed staircases and enclosed vertical shafts (i.e. those areas which cannot contain combustible materials);
- b. selected concealed spaces and voids as agreed by the Authority;
- c. rooms protected by other automatic extinguishing systems (designed, installed and maintained to recognised British/European standards);
- d. rooms containing electric power distribution apparatus, such as switchgear and transformers, where the walls, ceiling and floors have at least 120 minutes of fire resistance or have an alternative fire suppression system;
- e. rooms containing industrial/laboratory processes where water discharge might present a hazard;
- f. communicating Buildings or storeys separated from the sprinklered Building by walls of appropriate fire resistance⁵⁵; and
- g. outbuildings, such as sheds, separated from the sprinklered Building by at least 10m.

2.12.6.4 Project Co shall consider using local gaseous or powder fire suppression systems to provide protection to sever/comms rooms and/or chemical stores, which are to be interlocked with fire alarm and sprinkler systems.

2.12.6.5 Project Co shall ensure that all sprinkler systems are be installed with sympathy to the architectural aesthetic of the Buildings and shall be designed to be as unobtrusive as possible shall be well coordinated with respect to all other Service Infrastructure, the Building's structure, and the architectural finishes.

2.12.6.6 Typically, all sprinkler services will be installed concealed within ceiling voids. Sprinkler heads set within ceilings will be recessed type with drop off caps, or semi-recessed type. Exposed type heads shall not be used in suspended ceilings.

2.12.6.7 Where sprinkler installations are exposed (i.e. in rooms or areas with exposed soffits) all pipework shall be prefabricated and powder coated off-site in a colour (typically white) to suit the surrounding soffit paint finishes. All exposed sprinkler heads, valves, and other ancillaries, will be powder coated in a matching colour.

2.12.7 Lightning protection

2.12.7.1 Project Co shall provide suitable tamper proof lightning protection systems to all Buildings.

⁵³ BS EN 12845 version 11.

⁵⁴ Technical Bulletin 221, "Sprinkler Protection of Schools".

⁵⁵ See BB 100 Appendix A, TB 206 and TB 221.

2.12.7.2 Surge protection is to be provided for ICT equipment where required to meet compliance with BS EN62305 for Lightning Protection;

2.12.7.3 Project Co shall:

- a. determine the class of the lightning protection system by means of a risk assessment carried out in accordance with BS EN 62305;
- b. design a lightning protection system in accordance with the class of system;
- c. ensure that transient overvoltage surge suppression devices are provided for mains power, data, and telecom lines as appropriate to the required class of system as determined by the risk assessment;
- d. ensure that surge suppression devices are provided in server rooms and any other vulnerable critical systems as determined by risk assessment;
- e. ensure that surge suppression device alarms are linked to the BMS where one is installed; and
- f. ensure the lightning protection systems are tamper proof with earth electrodes accessible for regular testing.

2.12.8 Protective systems

2.12.8.1 Project Co shall ensure that all protective systems, including Access Control equipment and cabling, is securely installed and tamper-proof. All cabling and communications systems, including internet connections, shall be provided by Project Co.

2.12.9 Intruder alarms

2.12.9.1 Project Co shall ensure that a comprehensive intruder alarm system is provided, integrated with access controls, which complements the Building's functions and operations and is enhanced as necessary in designated areas of high risk.⁵⁶ Alarm systems should be zoned to allow parts of the Facility to be used outside of the Core Sessions without affecting security elsewhere.

2.12.9.2 Project Co shall provide an alarm system that meets the requirements of BS4737⁵⁷ parts 1, 2 and 3, BS EN 50131⁵⁸ and NACOSS⁵⁹ and:

- a. utilises some form of monitored path to the alarm receiving centre, if remote signalling is used;
- b. is capable of remote monitoring; and
- c. is installed by an installer certified by an UKAS, (United Kingdom Accreditation Service) accredited certification body., with detectors to cover all accessible perimeter areas.

2.12.10 CCTV

2.12.10.1 Intercom systems with integral CCTV cameras shall be provided at the main entrance to the Facility and at the Secure Line, to all pedestrian entrances and vehicle entrances.

⁵⁶ It is likely that any new systems will require confirmation technology (the ability to confirm that alarm activation is actually due to an intruder) before being granted Level 1 Police response. Further, any systems that lose Level 1 response due to the number of false alarm activations will require the addition of confirmation technology before Level 1 is reinstated.

⁵⁷ BS 4737: 1988: Intruder alarm systems in buildings. Code of Practice.

⁵⁸ BS EN 50131: 2006: Alarm systems. Intrusion and hold-up systems.

⁵⁹ NACOSS – national Approval Council for Security Systems.

- 2.12.10.2 The entire Building external perimeter shall be covered by building mounted weather-proof CCTV cameras, either fixed camera's or dome enclosed PTZ cameras, but in either case configured to provide 100% coverage of the whole Building perimeter. All external cameras shall be provided with electrically trace-heated enclosures.
- 2.12.10.3 The Buildings, Circulation, corridors and stairways will be provided with sufficient data points on soffits and within ceiling voids to allow the Authority (or a School Entity, in the case of a School(s) project) to install and commission internal CCTV cameras to cover 100% of the Circulation spaces if they so require in the future. Project Co shall provide, install, and test all internal data cabling, data outlets, and cable containment as required back to the central server room, and provide details of a fully-designed internal CCTV system to demonstrate that complete coverage can be provided. Sufficient server capacity and memory expansion slots shall be provided on the central CCTV server to accommodate such internal cameras in the future. These ACRs will indicate where more comprehensive CCTV systems are required for security purposes following a security risk assessment.
- 2.12.10.4 Where CCTV is required for access control systems or is required in the relevant Site Specific Briefs for the purposes of monitoring entrances or building/site surveillance, Project Co shall ensure that all systems comply with the requirements of EN50132-7⁶⁰ and be sympathetic to the adjacent land and neighbours and avoid intrusion into private activities not associated with the Authority and/or Schools Entity in the case of a Schools project.
- 2.12.10.5 Project Co shall ensure that CCTV systems are integrated into the architectural design of the Facility, surrounding Grounds and access control systems.
- 2.12.10.6 Project Co shall provide all hardware connected with CCTV, including fixings, brackets, power and cables (containment, routing, termination and presentation).
- 2.12.10.7 Where the Existing Facility has Legacy internal CCTV systems for behaviour management or administration purposes Project Co shall relocate these to the Facilities, but no new system hardware or software will be provided by Project Co. Project Co shall Decant, install, and test any Internal IP-based CCTV (equipment to be provided by others), that is included in the relevant Site Specific Brief and the ICT Solution Summary.
- 2.12.10.8 Legacy external CCTV systems shall not be re-positioned unless these ACRs require external CCTV based on a security risk assessment that identifies the Facility as at higher risk requiring CCTV measures. This will be included in the relevant Site Specific Brief and the ICT Solution Summary.
- 2.12.10.9 The Data Protection Act 2018 assessments for internal CCTV for behaviour management or School and College administration purposes and for CCTV required for external or internal building security purposes are separate. Project Co should consult the Information Commissioner's Office (ICO).

2.13 Operability, Maintenance and Construction

2.13.1 Commissioning

- 2.13.1.1 Project Co shall provide a commissioning programme.

⁶⁰ BS EN 50132-7: 1995: Alarm systems. CCTV surveillance systems for use in security applications.

- 2.13.1.2 Project Co shall ensure that the Building Services engineering systems are fully tested and commissioned in line with all relevant current regulations, standards and guidance documents and Law generally.
- 2.13.1.3 Project Co shall employ and appoint an independent commissioning management specialist to manage and review the entire commissioning process. This shall include for design stage system commissionability reviews and will encompass the entire Building Services package including for the mechanical, electrical, and public health services, and all associated controls, plant, equipment and ancillaries. This appointment shall be in pursuant of any BREEAM credits relevant to the building commissioning requirements.
- 2.13.1.4 The Building Services systems shall be commissioned such that where systems interact with each other they are commissioned at the same time in order to simulate this interaction.
- 2.13.1.5 Project Co shall undertake seasonal commissioning during the Soft Landings period in order to fine tune the systems for optimum performance and energy consumption in accordance with BSRIA BG 44/2013.
- 2.13.1.6 Project Co shall conduct Project Co's Pre-Completion Commissioning, Project Co's Post Completion Commissioning and seasonal commissioning on all aspects of the heating system and main plant in line with BSRIA BG 2/2010, BSRIA BG 44/2013 and the CIBSE commissioning code.
- 2.13.1.7 Project Co shall provide a notice period of 1 week to the Authority's engineering representative for witnessing.
- 2.13.1.8 Project Co shall record the results of the commissioning and performance testing in line with BSRIA Building Applications Guide BG2/2010 and provide these as part of the operation and maintenance manual documentation.

2.13.2 Demonstration and Training

- 2.13.2.1 Project Co shall provide demonstration and training as set out in the Soft Services Training Plan in Appendix C of Schedule 10 (*Outline Commissioning Programme*) of this Agreement.
- 2.13.2.2 Project Co shall ensure that all Building Services engineering systems, controls adjustment procedures, optimum settings and maintenance procedures are demonstrated to the Authority's selected representative/s. The functioning/calibration of the installed energy sub-metering shall be demonstrated along with the automatic uploading of data via the Automated Energy Data Collection Portal.
- 2.13.2.3 All training will be recorded by Project Co and made available as post-training material in the form of 'podcasts' on each training area or subject, that the Authority (or the School Entity/(ies) in the case of a School(s) project) may use for their own purposes for refresher training and development of their staff, and for any new staff joining the organisation.
- 2.13.2.4 Project Co shall ensure that the operating and maintenance manuals are available during the training and demonstration to ensure that the appropriate and correct documentation has been included.

2.13.3 Building Performance Evaluation (BPE) and seasonal commissioning

- 2.13.3.1 The purpose of the BPE is:

- a. to give support to Facility Users by contributing towards an objective understanding of what is successful and what are areas for consideration looking forward;
 - b. to monitor the result of fine tuning the building performance through seasonal adjustments to the building controls; and
 - c. to establish across the range of Schools/Colleges' where there are common issues in order to learn lessons for future School/College projects.
- 2.13.3.2 This is a process that looks at various interrelated aspects of School/College Buildings. The assessment looks for areas that can be improved and then suggests required actions.
- 2.13.3.3 Project Co shall support the Facility Users by carrying out BPE Reviews at 6 months and 12 months after the Actual Completion Date. This shall comprise:
 - a. analysis of information on the project before the visit;
 - b. site visit and walk round/meeting with the Authority (and the relevant School Entity, in the case of a Schools project) – generally the headteacher/principal, bursar, business manager or finance director, site supervisor (caretaker, estates or premises manager), Project Co (including contract manager, M&E and controls specialist);
 - c. photos of the Building/ elements reviewed;
 - d. completion of an FM questionnaire;
 - e. completion of a teaching staff questionnaire; and
 - f. review of the BMS system and energy data.
- 2.13.3.4 And follow up actions after the initial meeting shall comprise:
 - a. analysis of the data collected for each Facility;
 - b. compilation of a long report on all findings, energy trends and observations from each school/College – aimed at the Authority and Project Co;
 - c. compilation of short summary report that will go back to the school/College;
 - d. overall report on the batch of schools/Colleges for the Authority, if part of a batch project; and
 - e. all reports to follow the standard the Authority format for BPE reviews.
- 2.13.3.5 Project Co shall comply with the Building Performance Evaluation Methodology on conducting BPEs.
- 2.13.3.6 Seasonal commissioning adjustments shall be conducted throughout the first year of the Buildings performance following the Actual Completion Date by Project Co.
- 2.13.4 Operability
 - 2.13.4.1 Project Co shall ensure that the Building and Grounds and any systems provided have Service Infrastructure and controls are straightforward and efficient to operate and integrated where necessary into the whole Site. This includes fire and security alarms, external lighting controls and access controls.
 - 2.13.4.2 Project Co shall ensure that the Authority (or the relevant School Entity, in the case of a School(s) project) has enough information to enable all operators to understand how the relevant items and systems are designed to run effectively, efficiently and reduce running and maintenance costs.
 - 2.13.4.3 Project Co shall ensure the all of the Facilities Premises Team are provided, in a timely manner, with the appropriate level of information and training to satisfy their responsibilities.

- 2.13.4.4 The three groups of operators include:
- a. Technical i.e. FM and caretaking team with a detailed understanding of the Building operation and maintenance including Building Management System (BMS) and Energy Management System (EMS);
 - b. Operational i.e. Facility Users who need to understand certain operational systems but require a less technical application of knowledge including Business Managers; and
 - c. Functional i.e. teaching staff and Students who need a basic operational understanding of how the Building works e.g. ventilation of teaching spaces, lighting controls in communal teaching spaces.
- 2.13.4.5 Project Co shall ensure that the project is planned and managed to support collaborative working between the Authority Representatives, Facility Representatives, key design professionals and specialist contractors (such as the commissioning engineer) and that Soft Landings Framework is adopted⁶¹ across the contractual process. In doing so, Project Co shall ensure that the following occur at the key stages of the project:
- a. **Inception and briefing** – Roles and responsibilities are identified across the design team, construction team and client representatives to for the full duration of the Works, for example, clarify on going responsibilities throughout the Operational Term;
 - b. **Design development** – Project team to carry out reviews of the design to consider usability and manageability, and to review lessons learned from comparable projects e.g. where Legacy ICT Equipment is to be installed the design shall consider the impacts of the loads in the environmental and energy strategy using Legacy Equipment in the short-term and longer-term with the alternative impacts of new equipment;
 - c. **Pre-Actual Completion Date** – Project Co shall develop a Handover and Mobilisation Plan including a building readiness programme, including technical commissioning⁶² and witnessing by the school's technical operators; technical training of systems and building logbooks, plant and maintenance warranties; non-technical Building Use Guide to enable operators to understand interfaces and systems before occupation; and
 - d. **Post Actual Completion Date** (12 months after occupation) – Project Co shall carry out the initial aftercare as the first steps towards achieving building performance to cover seasonal adjustments to uses, building systems and controls.

2.13.5 Handover

- 2.13.5.1 By the Actual Completion Date, Project Co shall:
- a. Project Co shall ensure the School/ Colleges' Facilities Premises Team have a thorough understanding of how the building systems work, how to check and adjust building systems and controls, and how to monitor and review the measures to achieve building performance, including the review of environmental performance indicators and energy performance and consumption;
 - b. train all appropriate School/ College staff on the basic operational understanding of how the building works e.g. ventilation of teaching spaces, lighting controls in communal teaching spaces, including changes to the operation due to seasonal variations, and provide a suitable "Classroom" or "Room" guide that can be

⁶¹ Published by BSRIA

⁶² BSRIA "Commissioning Job Book".

issued by the Authority (or by a School Entity in the case of a School(s) project) to Facility Users;

- c. complete all training during the ICT Handover Period (as detailed in Appendix C (*Soft Services Training Plan*) of Schedule 10 (*Outline Commissioning Programme*), unless agreed with the Authority when it may be completed in the three months following the Actual Handover Date, and in addition when seasonal variations of systems occur as agreed with the Authority [and/or the School Entity in the case of school's project] as a change to Project Co's Proposals in Schedule 6 Part 4;
- d. Provide a user-friendly Building User Guide for the Facilities Premises Team and Soft Services Team including details of all user controls

2.13.5.2 Following the Actual Completion Date, Project Co shall

- a. during the Soft Landings period - support the Facility Users in achieving building performance including evaluation and reporting;
- b. Project Co shall ensure through the continuing involvement of the design and building team with the School/College's technical and operational team to identify emerging issues and follow-up actions. Project Co shall carry out the following in combination to inform the diagnostics of issues and reported on as part of the Biennial Review Report;
- c. Carry out site walkabouts, once every quarter, to observe occupation patterns to spot emerging technical issues which impact on building performance. Carry out with the mixture of Facilities Premises Team Staff and teaching staff;
- d. Carry out with Authority's and/or the School Entity's technical operators seasonal commissioning at 3, 6, 9, 12 months;
- e. Assess energy and water consumption against design targets at 3, 6, 9, and 12 months, as part of the energy commissioning process and thereafter as part of the Biennial Review Report and
- f. Carry out a User Satisfaction Survey between nine months and one year to cover the range of functional and operational issues including environmental comfort of Facility Users in both winter and summer; functionality of learning and non-learning spaces.

2.13.5.3 Extended aftercare for years 1 to 3 – Using the data and information reported on throughout the period prior to and following the Actual Completion Date and by routine monitoring and review of environmental performance and energy performance and consumption, Project Co shall ensure that all issues have been rectified.

2.13.5.4 Project Co shall hand over full technical operation and maintenance manuals and non-technical Building User Guides to the Authority's Representative including, but not limited to, the following, as appropriate:

- a. Building Logbook;
- b. Building Users' Guide;
- c. Fire Safety Management Plan;
- d. Fire Safety Risk Assessment;
- e. Emergency Evacuation Plan;
- f. Health and Safety File;
- g. operating and maintenance manuals;
- h. Maintenance Materials and Waste Efficiency Plan;

- i. LEV user manual and logbook, including risk assessments and commissioning test certificate;
- j. User guide to BMS and EMS systems;
- k. water quality policy document including the written scheme for controlling the risk of exposure to legionella bacteria;
- l. Records of Acoustic Performance Tests;
- m. Commissioning tests for boiler/flue systems;
- n. Energy and water Efficiency Plan and Energy Performance Certificates;
- o. Record Drawings;
- p. Equipment Schedules;
- q. Spare parts lists;
- r. Test certificates, including electrical, gas, drainage tests; and
- s. Certificates for heating system pressure tests and water treatment tests.

2.13.5.5 Project Co shall also prepare Room User Guides which provide simple guide or pictogram provided for Facility Users and especially staff (e.g. teachers) on how to use room systems e.g. lighting, ventilation, heating. This shall be provided for each occupied space.

2.13.5.6 Project Co shall prepare and maintain, up to completion, an Access Statement for each School/ College, to assist in the statutory approvals process.. The Access Statement shall be prepared according to Authority/School Entity guidelines/requirements (listed in the relevant Site Specific Brief). It shall be updated at every stage of the project development and whenever there is a change to the Buildings.

2.13.5.7 Where handover and training information is provided to Facility Users, this must be available in both Welsh and English including, but not limited to the following;

- a. Room User Guides and Building User Guides
- b. Training guides, including filmed inductions

2.13.6 Maintenance

2.13.6.1 Project Co shall ensure that the Buildings are designed and constructed so that they are easy to clean and maintain and incorporate materials and components that can be easily and safely replaced when necessary. Project Co shall ensure that the choice of materials, Service Infrastructure and components causes minimum inconvenience and disruption from breakdowns, repairs and maintenance activities.

2.13.6.2 Project Co shall ensure that the Building's environmental and safety systems are designed, co-ordinated, commissioned and re-commissioned to respond to seasonal and occupation changes: e.g.; The design of the window openings and the provision of free opening area for ventilation is an integral part of the Building's environmental systems. In this instance any proposed changes to the window openings which impacts on the free opening area as a result of maintenance or security policy needs to be fully tested through environmental modelling and designed prior to implementing changes. This is to ensure compliance with the PIU Targets.

2.13.6.3 Buildings shall be designed so that:

- a. cleaning and repair can be undertaken easily and with the minimum of disruption to Educational Services; and

- b. they weather well and withstand wear and tear and Malicious Damage.

2.13.7 Planned Maintenance Programme (PMP)

2.13.7.1 Project Co shall comply with the provisions of this Agreement relevant to the 5 Year Maintenance Plan and Schedule of Programmed Maintenance.

2.13.7.2 Project Co shall ensure that:

- a. safety and security measures are provided for internal and external maintenance purposes; including boarding, ladders and handrails within roof spaces;
- b. measures are incorporated to prevent birds roosting or nesting on the structure, especially around Building entrances;
- c. there are no visible signs of entry to weather caused by a breakdown in the building fabric or its installations; and
- d. there is no discomfort to occupants as a result of weather penetration due to this cause. Any water penetration shall also be measured by electrical conductivity tests.

2.13.7.3 Project Co shall ensure that the design facilitates future maintenance, in particular by:

- a. using Good Industry Practice and standard practical detailing of materials;
- b. using industry standard construction methods likely to be in use for the foreseeable future;
- c. providing ease of access for maintenance; and
- d. compliance with CDM Regulations.

2.13.8 Maintenance Access

2.13.8.1 Project Co shall ensure that access for external maintenance is designed in accordance with current regulations. Project Co shall provide all necessary permanent means of access to the roof for planned preventative maintenance in accordance with CDM Regulations. Other access for cleaning and maintenance, shall be designed to be carried out safely, easily, without disruption to Educational Services and without the need for the Authority (or any School Entity, in the case of a School(s) project) to hire or purchase additional maintenance equipment (e.g. access platforms). Means of safe access and fall prevention must be installed where access is required, for example to maintain roof plant and equipment.

2.13.8.2 Sufficient safe working space must be provided around plant.

2.13.8.3 Project Co shall ensure that any walkways provided are compliant with all health and safety standards as well as manufacturers' requirements. Walkways to roofs shall be adequately secured, free from corrosion, and decorated in accordance with then requirements of these ACRs.

2.13.8.4 Project Co shall ensure that external maintenance access is designed and installed in accordance with current regulations and allow for all necessary access for cleaning and maintenance safely, easily and without disruption to normal Facility operations. The maintenance programme for a Specially Resourced Provision or Designated Unit must take particular account of the need to minimise disruption and discomfort to vulnerable children and young people.

2.13.8.5 Project Co shall ensure that any walkways are compliant with all health and safety and manufacturers' requirements. Walkways to roofs shall be adequately secured, free from corrosion, and decorated in accordance with the external decorations paragraph.

2.13.9 Construction

2.13.9.1 Project Co shall ensure that the Works are planned to ensure safety, to minimise environmental impact and to avoid disruption to Educational Services.

2.13.9.2 Project Co shall ensure that the Buildings are designed and constructed to optimise low environmental impact materials, in particular:

- a. in order to meet the UK Government's timber procurement policy, the material must be (a) either independently verifiable legal and sustainable timber or FLEGT-licensed or equivalent timber or alternatively (b) 'recycled timber'; or (c) a combination of (a) and (b); and
- b. Project Co shall implement WRAP practices following DEFRA's waste hierarchy principles of a commitment to halve waste to landfill. Project Co shall implement a Site Waste Management Plan identifying actions to be taken to reduce waste, increase the level of recovery and increase reused and recycled content, and quantifying the resulting changes. On completion of the Works, Project Co shall submit a copy of the completed Site Waste Management Plan to the Authority, reporting the forecast and actual performance for waste, quantities, disposal routes, and reused and recycled content used in the construction.

2.13.9.3 Project Co shall also ensure that:

- a. the Buildings are designed so that they can be safely constructed;
- b. removal or containment of hazardous materials are managed safely;
- c. there is minimal disruption to Educational Services, particularly where the Buildings are being built on the site of the Existing Facility;
- d. the proposed timing of the landscaping ensures that sports pitches and hard surfaced games courts are available before, or as soon as possible after the Actual Completion Date; and
- e. separate access shall be provided for deliveries, maintenance vehicles and waste removal.

2.13.9.4 Project Co shall be a member of the Considerate Constructor's Scheme (or equivalent) or demonstrate in its Project Co's Proposals that its policies and procedures are comparable to those required by the Considerate Constructor's Scheme.

2.13.9.5 Project Co shall be responsible for all utilities and utilities connections and other costs associated with energy and utilities usage arising through the provision of the Works.

2.13.9.6 Project Co shall be responsible for costs associated with any alarm systems contracts or "Redcare" contracts required for commissioning and sign off and shall also facilitate the transfer of any of these contracts to the relevant Facility to the extent that they are ongoing and they were required prior to the Actual Completion Date and were taken out directly by Project Co or a third party other than the Authority (or the School Entity in the case of a School(s) project).

2.13.10 Temporary Accommodation

2.13.10.1 Where Project Co is required to provide temporary accommodation pursuant to this Agreement (other than where an Existing Facility is used pursuant to Clause 14.9.2 of this Agreement) the temporary accommodation shall:

- a. be compliant with Law including all health and safety requirements;
- b. be of sufficient capacity and size to meet the ACRs;
- c. be of suitable specification and condition to allow the Authority to deliver relevant Educational Services (including the provision of science facilities and other specialist facilities where required);
- d. be capable of being maintained by the Authority in accordance with Good Industry Practice (excepting defects the responsibility for which will remain with Project Co);
- e. be adequately connected to all necessary Utilities and Service Infrastructure;
- f. insured with such insurance arrangements ⁶³in place being acceptable to the Authority;
- g. comply with the ACRs; and
- h. comply with paragraph 2.13.10.2 of these Generic Design Requirements.

2.13.10.2 Project Co shall ensure that all safety, security and communication systems are connected to and integrated with the other Buildings on Site (rather than “stand-alone” systems, including CCTV, intruder and fire alarms.

2.13.10.3 Where the Existing Facility is to be used as temporary accommodation in accordance with Clause 14.9.2 of this Agreement, paragraphs (a) to (f) of 2.13.10.1 and 2.13.10.2 above shall be complied with.

⁶³ Project Co shall insure the temporary accommodation except where it is proposed to use an existing building/facility which the Authority already insures

3. Equipment

3.1 Status of this paragraph

- 3.1.1 This paragraph gives the generic requirements for Equipment for all Facilities. Equipment is a blanket term which includes fittings, which are those items which are permanently fitted to the fabric of the Building, and Furniture and Equipment which may be fitted, fixed or loose. Fixed or loose furniture and equipment does not form an integral part of the Building;
- 3.1.2 In producing the Project Co' Proposals, Project Co shall consider and address all elements of the thes ACRs.
- 3.1.3 The Loaded Room Layout Drawings shall be prepared at a scale of 1:50 or as otherwise agreed with the Authority. The Loaded Room Layout Drawings shall show the proposed Equipment layouts for each space and Services Infrastructure including specifically the location of data and power sockets. The Loaded Room Layout Drawings will provide a plan view, elevations of each of the walls and where appropriate a ceiling view of each space. The Loaded Room Layout Drawings shall also include a schedule on the drawing detailing the Equipment (including ICT Equipment) to be placed in the room and also define what Group specification for the Equipment in accordance with Table 41 in section 3 of Part 1 of these ACRs. The Loaded Room Layout Drawings shall also confirm where blinds are to be provided to rooms and their specification. The Equipment schedule included on the Loaded Room Layout Drawings shall also be included on the respective Area Data Sheet (in Part 6 of Schedule 6 (*Construction Matters*)). The positioning of Equipment will be developed by the Authority and its ICT Installer and will also have a significant impact on shaping the building's design and services provision. Project Co shall engage with the Authority to ensure that the requirements of the ICT design and use of ICT is also captured on the Loaded Room Layout Drawings
- 3.1.4 Project Co shall demonstrate how the Loaded Room Layout Drawings, interior spaces volumes, lighting, heating, ventilation and acoustic strategies work successfully together.
- 3.1.5 In all areas of the relevant Site where Equipment is to be provided, Project Co shall ensure that the following requirements are met:
- a. Equipment is provided and specified as defined in these ACRs and Loose Equipment Purchase Protocol;
 - b. Equipment items provided with similar attributes to the Equipment listed in the ADS are approved by the Authority, to allow the user activities listed in the ADS to be carried out safely, effectively and efficiently by the maximum number of Students and/or staff, as shown in the SoA;
 - c. any Equipment provided meets the specifications detailed in these ACRs;
 - d. when Legacy Equipment is re-used, Project Co is responsible for ensuring they are in safe working order;
 - e. the layout of any Equipment proposed is well coordinated with the Building Services, and that this can be demonstrated in a Loaded Room Layout Drawings;
 - f. the layout of any Equipment proposed is well coordinated with the Building Elements, and that this can be demonstrated in a Loaded Room Layout Drawings;

- g. there is careful co-ordination between Equipment suppliers, fitters, ICT installation (including installation by the ICT Installer) and mechanical and electrical (M&E) design and installations;
- h. Project Co shall provide internal wall elevations as part of the detailing of fitted Equipment, taking account of any preferences for teaching wall elevations identified in these ACRs; and
- i. Legacy Equipment serviced by electric or gas shall be tested and certified by Project Co before connection to fixed supply systems. Project Co shall ensure that suitable safety and ventilation systems are in place for gas equipment.

3.1.6 Equipment Definitions

3.1.6.1 Equipment comprises:

- a. fittings, including worktops, sinks etc;
- b. fitted furniture, which is fitted to the fabric of the Building, including under-bench cupboards;
- c. fixed furniture and equipment which is fixed to a structure for stability, including tall library shelving units and some serviced equipment; and
- d. loose furniture and equipment, including chairs and tables.

3.1.6.2 Equipment does not include Service Infrastructure such as electrical outlets, public address and alarm systems, Active ICT Infrastructure and Passive ICT Infrastructure such as cabling, extraction systems, and fittings such as partitioning and sanitaryware.

3.2 Allocation of Responsibilities

3.2.1 In all cases, Project Co shall be responsible for the programming of the Equipment installations in line with the Works, and for the interface of the Equipment with the Building. Project Co shall ensure that all loose Equipment is located in line with the agreed Loaded Room Layout Drawings, and that there is careful co-ordination between fitted Equipment suppliers, fitters (if they are different), and M & E sub-contractors.

3.2.2 Equipment is divided into four groups according to the Project Co's responsibilities. Table 41 summarises the responsibilities for each of these groups. Items of Legacy Equipment are identified in a Legacy Equipment survey summary for each Facility and will also have a code attached. Project Co shall use the example Equipment layout drawings available in the data room to inform each room layout and all of the Equipment shall be identified in the Facility specific ADS along with the relevant code.

3.2.3 **Group 1 Equipment** covers all Equipment that shall be provided, placed, fitted and installed as part of the Works by Project Co. Project Co shall also be responsible for maintenance and lifecycle of all items of Group 1 Equipment throughout the Operational Term. Unless provided specifically otherwise elsewhere in these ACRs there shall be no Legacy Group 1 Equipment.

3.2.4 **Group 2 Equipment** covers any Equipment that shall be provided, placed, fitted and installed as part of the Works by Project Co but once the Group 2 Equipment has been installed and shown as suitable and working by Project Co, Project Co shall not be responsible for suitability, maintenance or lifecycle of any Equipment that is Group 2 Equipment. In order to achieve Completion [Services Availability], Project Co shall take the risk on the Group 2 Equipment working in the new Facility regardless of whether it is Group 2.2 Equipment (new) or Group 2.1 (Legacy).

- 3.2.5 Any loose Equipment provided by Project Co shall be sufficiently standard, using co-ordinated systems and/or modular sizes where appropriate, to be capable of being used in any part of the Facilities (i.e. interchangeable between Curriculum subjects) and in similar types of Schools/ Colleges (as relevant), and to be straightforward to re-order and replace at a later date.
- 3.2.6 **Group 3 Equipment** covers any Equipment provided by the Authority or the School Entity, in the case of a School(s) project, which is fixed or placed by Project Co. In these cases, any fixing or placing required will be part of the Works. Project Co shall not be responsible for lifecycle or the working condition of the items before they are moved but shall ensure that it is in the same state once it has been placed and, where relevant, connected. Following the Actual Completion Date, the on-going responsibility for the maintenance and life cycle, moving and placing of Group 2 Equipment, Group 3 Equipment and Group 4 Equipment rests with the relevant Authority , regardless of whether they are new or Legacy.
- 3.2.7 **Group 4 Equipment** covers small Legacy Equipment and consumables that do not affect the room layout and would typically be stored in cupboards or shelves. These items will be provided, boxed, unpacked and placed by the Authority (and/or the School Entity) in the case of a School(s) project, but Project Co shall be responsible for providing boxes for the decanting of these items and the Decant itself in accordance with the Decant Protocol. Project Co shall ensure that sufficient time is given for the Authority (and the School Entity, in the case of a School(s) project) to unpack it and store it appropriately prior to the Actual Completion Date.
- 3.2.8 Groups 1 Equipment, Group 2 Equipment and Group 3 Equipment will comprise all internal fixed and loose Equipment that have an effect on the room layout, including Legacy Equipment, specialist items or items specific to each Facility which will be identified in the relevant Site Specific Brief, and some loose or Legacy Equipment of external equipment. Project Co shall be responsible for Decant of such Equipment in accordance with the Decant Protocol.
- 3.2.9 In line with usual practice, Groups 1 Equipment to Group 4 Equipment does not cover:
- fixtures and Service Infrastructure specified in paragraph 2 of these ACRs, including electrical outlets, public address and alarm systems, Passive ICT Infrastructure such as cabling, built-in air extraction systems and sanitary ware; and
 - the specifications in this Equipment Brief generally do not therefore apply to these items, although some may be shown on the room layouts for information.
- 3.2.10 Table 41 sets out the different Groups of Equipment and how the responsibilities are divided between Project Co and the Authority.

TABLE 41 EQUIPMENT RESPONSIBILITIES

| Description (New/ Legacy) | PA defined term | Who Provides ? | Who boxes up? | Who places/ installs? | Who maintains? | Who takes the risk item is suitable? | Installation - ICT Handover Requirement ? | Installation - Payment Commencement Requirement? |
|---------------------------|-------------------|----------------|---------------|-----------------------|----------------|--------------------------------------|---|--|
| Group 1 New | Group 1 Equipment | Project Co | n/a | Project Co | Project Co | Project Co | Yes | Yes |

| Description (New/ Legacy) | PA defined term | Who Provides ? | Who boxes up? | Who places/ installs? | Who maintains? | Who takes the risk item is suitable? | Installation - ICT Handover Requirement ? | Installation - Payment Commencement Requirement? |
|---|---------------------|----------------|---------------|-----------------------|----------------|--------------------------------------|---|--|
| Group 2 Legacy | Group 2.1 Equipment | Authority | Project Co | Project Co | Authority | Project Co | No | Yes |
| Group 2 New | Group 2.2 Equipment | Project Co | n/a | Project Co | Authority | Project Co | No | Yes |
| Group 3 Legacy | Group 3.1 Equipment | Authority | Project Co | Project Co | Authority | Authority | No | Yes |
| Group 3 New | Group 3.2 Equipment | Authority | Project Co | Project Co | Authority | Authority | No | Yes |
| Other items to be packed and boxed up for removal | Group 4 Equipment | Authority | Authority | Authority | Authority | Authority | No | Yes |

3.2.11 Legacy Items

3.2.11.1 Following an initial survey using specialist contractors, where appropriate, employed by Project Co, items of Legacy Equipment in Group 2 and 3 will have been identified and listed in the Legacy Equipment summary survey and coded as such. These items have generally been identified because:

- a. they are suitable to be used for some years to come with minimal repair;
- b. they are suitable to be easily or cost-effectively removed, repaired, stored and repositioned e.g. a CAD/CAM lathe or acoustic piano;
- c. they have an historical importance to the Authority and/or the relevant School Entity; and
- d. other items in Group 3 may be supplied as new by the Authority and/or the relevant School Entity.

The Legacy Equipment survey summary provides a series of code references for Equipment, including Legacy items, which help to identify clear lines of responsibility for the layout, assessment of quality and safety, storage, placing and fixing of these items. These references shall be agreed between and used by each Authority and/or School Entity, in the case of a school project, and Project Co.

3.2.11.2 Project Co shall confirm the list of all Equipment, both new and Legacy in the ADS, after agreeing with the Authority the provision of Equipment and the viability of using the Legacy Equipment proposed. This shall be based on Project Co detailed Equipment survey of potential Legacy Equipment and subject to the Review Procedure.

3.2.11.3 As part of the requirement for layouts, Project Co, with the agreement of the Authority and in liaison with the relevant School Entity/(ies) in the case of a School(s) project, shall identify on their ADS and Loaded Room Layout Drawings where all Legacy items are proposed to be placed.

3.2.11.4 Project Co shall be responsible for Equipment Decant in accordance with the Decant Protocol. If any Equipment is damaged in this process, it shall be repaired or replaced by Project Co. Repairs and replacements should be in line with the latest standards set out

below. For example, where tables and chairs need to be replaced they must meet the ergonomic standard EN1729, which may require all the others in the room to also be replaced to ensure size compatibility.

3.3 Equipment Provision

3.3.1 General Layout Requirements

- 3.3.1.1 Project Co's Loaded Room Layout Drawings shall demonstrate that the General Teaching spaces and light Practical Teaching areas, in particular, will allow for short-term changes of layout and use.
- 3.3.1.2 Project Co shall illustrate how the requirements below have been met through an example Loaded Room Layout Drawings for each different type [or shape] of space in which:
 - a. Project Co is providing fittings or fitted Equipment in Groups 1 or 2 (such as those in Secondary School Practical Teaching spaces); and
 - b. the proposed area or shape of a space differs from the area recommendations in the ADS, to prove that the area is workable with the Equipment identified in the Legacy Equipment survey summary, including Equipment in Group 3.
- 3.3.1.3 In spaces where Project Co is providing Equipment, there shall be co-ordination between the choice of loose and fixed furniture in terms of size, appearance and function. Where these spaces also have Group 3 items, Project Co shall ensure that any fixed items they provide suit the 's Legacy Equipment.
- 3.3.1.4 Where Project Co is placing or fixing Legacy Equipment, all layouts shall address the following points:
 - a. Legacy Equipment shall be located appropriately in accordance with the requirements in the relevant Site Specific Brief; and
 - b. Legacy Equipment shall be integrated with any new Equipment provided by Project Co; and
 - c. where Legacy items are found to be unsuitable, for instance where they do not fit or match the size and dimensions of the space to be provided in the Building, Project Co shall make appropriate adjustments to the layout detailing the adjustments.
- 3.3.1.5 Project Co shall ensure that all Equipment that is provided is capable of being laid out to:
 - a. create spaces which are not cramped or overcrowded for the maximum number of pupils to be accommodated in the relevant area;
 - b. meet the needs of the School/ College's Curriculum and suit the related activities for each space or Suite of Spaces and the activities listed in the SoA and ADS;
 - c. allow a number of different layouts within each space type, to suit different teaching styles and the educational objectives of each Facility;
 - d. where possible or required in the SSB, offer more than one teaching position;
 - e. ensure good sight lines to and from all Students in the space;
 - f. ensure that no-one is placed at a disadvantage and that all Students are able to access all activities effectively and safely;
 - g. for disabled Students to be able to access all activities on offer in at least one space of each type or within each suite;

- h. allow for safe movement by Students and easy access to fire escape routes, with no fixed Equipment blocking exits;
 - i. where required, allow space for storing coats and bags near doors;
 - j. for Foundation Phase classrooms a low-level coat rain gear rack and a boot shelf is to be provided near the door to the outside space to support free flow movement between indoors and outdoors;
 - k. position equipment safely, away from Circulation areas or door swings;
 - l. fitted Equipment to be placed at 90° to windows to avoid glare, in ICT areas;
 - m. sufficient space for the safe operation of machinery and other equipment;
 - n. integrate with the Building, Service Infrastructure and the ICT Infrastructure;
 - o. ICT Equipment proposed for the room to be safely located with access to appropriate power and data;
 - p. take account of the position of other Service Infrastructure and Building features such as radiators and window sills;
 - q. allow Equipment to benefit from both natural and artificial lighting while avoiding glare, particularly in ICT areas [where glare can be a major obstacle to effective working];
 - r. enable central areas to be clear for moveable items by restricting Equipment to the perimeter of the space where possible;
 - s. allow easy to supervision of equipment by placing them in one activity zone; and
 - t. allow sufficient space for the safe operation of machinery and other equipment.
- 3.3.1.6 Project Co shall use Loaded Room Layout Drawings to determine the optimum location of servicing outlets such as gas, power and water, and to ensure that these are safely positioned. In all spaces, the layouts shall illustrate that any ICT Equipment required can be accommodated.
- 3.3.1.7 Project Co shall ensure that at both the initial design layout stage and final specification of Equipment, consideration should be given to Students with SEN (D) by ensuring that:
- a. where Equipment is adjustable for variable heights (within a range) it is easily and discretely operable by the user; and
 - b. the appropriate size, colour, finish and height of Equipment is provided. For example, for Students with visual impairment, the colour of furniture shall contrast with the carpet and the chair.
- 3.3.1.8 The appropriate number and distribution of the following fittings are to be provided, as agreed with the Authority, and specified in the Facility specific ADS:
- a. curtains and blinds;
 - b. shelves shall be fitted to all store rooms and storage areas sufficient for the number and type of items to be stored therein;
 - c. fixed benching, with sinks as necessary, shall be provided to ICT –rich and practical areas; and
 - d. noticeboards shall be fitted in corridors, teaching spaces and offices. Colour shall preferably differ from tables.

3.3.2 Specific Equipment Requirements

- 3.3.2.1 Where Project Co is responsible for the layout of Equipment, Project Co shall ensure that the following specific requirements are met, over and above those outlined in the relevant Site Specific Brief.
- 3.3.2.2 Defibrillators shall be provided in accordance with the UK Department for Education Guidance document (September 2018): Automated external defibrillators in schools.
- 3.3.2.3 In large **General Teaching rooms**, Project Co shall ensure that the choice and layout of Equipment shall provide:
- a. adequate storage for Learning Resources in furniture, over and above storage in store rooms;
 - b. at least one position for a wheelchair user, sited in such a way as to achieve a direct view of at least the main teaching position, in at least one space of each type or in each suite; and
 - c. furniture that is sufficiently lightweight to allow for short-term changes of layout and use.
- 3.3.2.4 In **Practical and Vocational Teaching spaces**, Project Co shall ensure that:
- a. safe working distances around Equipment are provided, as identified in relevant best practice guidance;
 - b. where Equipment is serviced with water or gas, master controls are provided;
 - c. light Practical Teaching spaces are suitable to be used safely as registration bases;
 - d. sinks are positioned to avoid congestion when used by a number of Students;
 - e. specialist fitters fit any specialist equipment, for example suppliers of service pedestals in science laboratories;
 - f. the serviced system in a laboratory is suitable for the size and shape of the proposed science space, its service arrangement and the priorities of the School / College (as identified in the relevant Site Specific Brief);
 - g. the serviced system in heavy practical or vocational spaces ensure that Equipment layouts take account of recommended safe operating zones for respective pieces of equipment. Suitable ventilation and extraction is provided and shut off valves where required;
 - h. in art rooms the positions of workstations maximise the use of natural light, and the colours and finishes of fixtures and furniture reflect light without causing glare; and
 - i. any rooms provided for art shall have space for both horizontal and vertical display of two- and three-dimensional work;
 - j. solid work surfaces shall be provided in D&T spaces, art rooms, science teaching spaces and science preparation spaces and shall be no less than 16mm thick. Drainage grooves around sink areas shall be machined into the worktop material. Tops of science pedestal units shall be firmly secured to the base unit with a minimum of 8 fixing points.
- 3.3.2.5 In **Halls and Performance Spaces**, Project Co shall ensure that:
- a. a number of assembly and performance options are possible for the given seating capacity using generic furniture and any bleacher or fixed seating provided, allowing for access and circulation;

- b. specialist suppliers shall be consulted on the most appropriate location of any new audio-visual equipment;
 - c. specialist suppliers are consulted on the most appropriate equipment specification and fixing method, including stage lighting bars and lanterns;
 - d. any Legacy Equipment such as lanterns, control equipment and scaffolding, and Group 1 Equipment such as stage lighting bars shall be fixed by a specialist supplier;
 - e. where it is the responsibility of Project Co to provide them, chairs in the main hall should be stackable, with the maximum number calculated to determine storage space. There shall be sufficient storage for examination tables, flats and staging when not in use;
 - f. there is space to manoeuvre chairs, examination tables and staging when not in use; and
 - g. in a Performance Space curtains form a proscenium arch and do not block entrances and fire exits, and good sight lines are available from the audience.
- 3.3.2.6 In Secondary School halls only, (unless otherwise required by these ACRs) the main hall shall be provided with retractable bleacher seating at one end and a floor-level performance area at the other.
- 3.3.2.7 The Performance Space shall be the full width of the hall, accessed from doors at either side of the end wall at the appropriate height. The end wall shall be behind the performance area and suitable as a cyclorama. The minimum Performance Space area, for assemblies, shall be 1.5m deep if floor-based or 2.4m deep if provided on a stage. The maximum Performance Space area, for major performances, shall be at least 6.9m deep.
- 3.3.2.8 Bleacher seating shall be retractable and extend to approximately half of the length of the hall and, wherever possible, the full width of the hall, with minimal gaps at each side. It shall be electronically operated by a hand-held control and, when retracted, fit within the storage area for retractable bleacher seating identified in the SoA, at the back of the hall. It shall be positioned according to advice from a specialist supplier. The bleacher seating shall be provided with back support to the seats.
- 3.3.2.9 Where a raised stage is used, it shall provide the minimum Performance Space area described above on a permanent stage, with stair and disabled access (for instance through a platform lift) provided to access the doors in the end wall Project Co shall provide sufficient demountable staging to extend the stage to accommodate the maximum Performance Space area (or other staging options), steps to the front of the stage, and sufficient loose chairs to provide seating to the remainder of the hall, with aisles and a 1.8m gap between the front row and the stage. The staging shall be chosen to be easily stored, with the chairs, within the furniture store identified in the SoA, which shall open directly off the hall.
- 3.3.2.10 In **Dining and Social areas**, where new Equipment is provided Project Co shall ensure that the layout, demonstrated with a flow diagram, is produced by a specialist catering company or consultant and shall allow for:
- a. a logical flow of Students round the Dining and Social space from arrival, queuing to collect food, both hot and cold, eating and self-clearing based on the number of lunch sessions, the number of pay stations (where relevant) and the hot/cold split, as outlined in these ACRs;
 - b. space is provided for food vending trolleys and dirty/ waste collection points;

- c. sufficient circulation area between dining tables to enable pupils to leave their positions easily and others to access them;
- d. sufficient space between tables so that chair legs can be seen;
- e. sufficient circulation to allow a wheelchair user to access some tables and dine alongside other Students;
- f. the servery is designed to have an efficient serving area layout, whether use fixed or moveable Equipment;
- g. servery design should identify menus and products for sale, whilst minimising the potential for theft;
- h. the servery has a tray slide and supports to ensure an efficient service and Students' safety;
- i. there is an efficient layout with adequate seating capacity for the allocated amount of time for lunch or other specified periods, acceptable eating times and the number of Students, as specified in the relevant Site Specific Briefs;
- j. provides seating capacity for Students who bring their own lunch to eat in the Dining and Social room;
- k. provision of storage furniture with sufficient space around it, as defined in these ACRs; and
- l. where the design requires storage of outdoor coats or bags near the Dining and Social area, storage furniture with sufficient space around it shall be provided.

3.3.2.11 In **Kitchens** Project Co shall ensure that the Equipment and the associated Loaded Room Layout Drawings provides:

- a. catering equipment necessary for the preparation of hot and cold meals in a cost effective and efficient manner both in terms of staffing and energy use to allow the School/ College to deliver the number of meals in accordance with the preparation model, at the frequencies specified in these ACRs;
- b. a functional layout that allows for efficient operations and any special dietary requirements, by arranging the main activity areas of delivery, unpacking, storage, preparation, cooking and wash-up in a logical sequence to ease work flows;
- c. a sensible 'flow' from the self-clearing facility to the Kitchen pre-clean area and dish wash, and from dishwasher to crockery/cutlery/tray storage; and
- d. high efficiency kitchen equipment, to achieve the good practice benchmarks for energy usage for schools given in CIBSE TM50 'Energy Efficiency in Commercial Kitchens', 2009.

3.3.2.12 In all **Secondary School and College Learning Resource Areas/Libraries** along with any specific requirements within these ACRs, Project Co shall employ a library specialist to design the layout to provide:

- a. the most efficient use of the space;
- b. furniture, particularly shelving units, positioned to allow sight lines from the librarian's desk, where provided, to all parts of the library;
- c. flexibility to take on board different uses of the space in the future; and
- d. low shelving or seating positioned near windows in such away so as to maximise natural lighting.

3.3.2.13 In **SEN (D) support areas**, Project Co shall ensure that the choice and layout of the Equipment shall contribute to a calming environment. Storerooms shall have enough

clear space for any specialist equipment which may be needed, including both Teaching Resources and aids for Students with physical disabilities. These ACRs shall state the assumptions to be made in Specially Resourced Provision or Designated Units as to the typical number of mobility aids per Student that will require storage. Where these have additional design requirements, these are given in the relevant Site Specific Brief and the SoA.

3.3.2.14 In store rooms, Project Co shall ensure that shelves are provided and fitted with sufficient area and depth for the number and type of items to be stored therein, with sufficient space in front to allow reasonable access.

3.3.2.15 Project Co shall ensure that **personal storage**, including Student lockers and other appropriate storage for coats and bags shall be sufficient for the number of pupils at each School, in line with the SoA and the relevant Site Specific Brief. Where provided, Project Co shall ensure that:

- a. where coats and bags are placed in the Classroom (usually in Primary Schools) sufficient and suitably positioned storage space is provided for coats and bags, over and above the required area of the Classroom;
- b. lockers are not placed alongside guarding or balustrades, do not restrict movement along main Circulation routes when being used and are not congested by creating banks of multiple units;
- c. layouts allow sufficient space between lockers for safe use;
- d. lockers are located to avoid long travelling distances between lessons, which can prevent usage;
- e. banks of multiple lockers are avoided to prevent congestion;
- f. lockers above 1.2m high are fixed back to the wall; and
- g. lockers are secured by the School/College's preferred method, e.g. combination locks, as defined in these ACRs.

3.3.2.16 In **PE changing rooms** Project Co shall carefully plan Equipment in changing rooms to provide comfortable and safe conditions for pupils, with sufficient distances between lockers and benches.

3.3.2.17 Noticeboards in **Circulation areas** shall be fitted to satisfy the requirement of BB100 such that they are not more than 3m wide and have a gap between them of at least 1m. In protected corridors (those used for means of escape) they should also be fitted with a cover, preferably top hung.

3.3.3 Service Infrastructure within Equipment

3.3.3.1 Project Co shall ensure that all serviced Equipment is integrated with the electric lighting, power and other systems in the Building, and it shall be clear where the responsibility lies for the various fitting and connections in each case.

3.3.3.2 Project Co shall ensure that all equipment addresses the following points to provide an integrated and responsive system of mechanical, electrical, protective and communication installation:

- a. all Service Infrastructure and installations meet the relevant standards as outlined in these ACRs;

- b. pipe-work or cables are easily accessible for maintenance (but hidden from view wherever possible), do not provide dust traps, and are protected from potential damage (including Malicious Damage);
- c. any connections, distribution systems, components and containment systems within Equipment are safely protected, tamper-proof, correctly insulated, and free from exposed contacts and clearly labelled;
- d. specialist suppliers install serviced equipment, whether new or Legacy;
- e. all user controls on equipment and used by Students are comprehensible and accessible;
- f. all controls are securely fixed to the item of Equipment or the internal fabric of the Building (i.e. not remote controls) and do not rely upon batteries for power;
- g. controls such as isolator switches on Equipment only enable use by authorised personnel;
- h. all Equipment incorporating water and drainage (such as serviced appliances in D&T workshops, food rooms and science laboratories) is installed so as to ensure hygienic conditions and the effective disposal of waste water;
- i. socket outlets are positioned away from sinks to reduce the risk of electrically powered equipment being placed in water, as defined in these ACRs; and
- j. in food rooms, socket outlets are positioned to ensure that an electrical cable attached to a piece of equipment does not have to cross a hot cooking surface.

3.3.4 Integration with ICT

- 3.3.4.1 Project Co shall comply with its obligations in a way that is compatible with the Authorities ICT solution as outlined in the relevant Site Specific Brief and ICT Solution Summary, e.g. the cabling requirements of user devices and the link between technology and specialist equipment e.g. CAD CAM systems will be taken into account when designing the Building and producing the Loaded Room Layout Drawings.
- 3.3.4.2 Where furniture is used that has not been designed to accommodate computer equipment, Project Co shall ensure that there is adequate space for comfortable and safe use of the technology and where appropriate, cable management.
- 3.3.4.3 Other than in the case of Lifecycle Assets, Project Co may wish to make use of suitable Legacy Equipment if it is available.

3.3.5 Blinds and Curtains

- 3.3.5.1 Blinds and/ or curtains shall be provided in the following situations and in line with the Facility Specific ADS and any additional requirements of these ACRs:
 - a. blinds to exterior glazing and rooflights for solar glare and daylight control;
 - b. roller blinds to exterior glazing in science laboratories and science studios for dim-out during science experiments;
 - c. blinds or curtains to exterior glazing for dim-out in Performance Spaces;
 - d. blinds or curtains to internal glazing for dim-out;
 - e. blinds to internal glazing where privacy is required;
 - f. in a Secondary School or College, curtains to form a proscenium arch at the front of the maximum performance area in a hall; and
 - g. shower curtains in changing rooms.

3.3.6 Wayfinding and Signage

- 3.3.6.1 The wayfinding system shall be designed to guide visitors from the Site boundary to an individual room, displaying only the level of information required at each decision point.
- 3.3.6.2 Signs shall be of a uniform type and be positioned in a similar manner throughout
- 3.3.6.3 Project Co shall provide a main site entrance sign and external directional signage to provide guidance for wayfinding by pedestrians and vehicles, especially for visitors, in directing them from the site entrance (via visitor parking if arriving by car) to the main reception. Any main site entrance sign provided shall detail the name of the School or College and other pertinent information. The sign shall be of a design that allows for the incorporation of changes when necessary and gives a positive first impression, written in both Welsh and English. The sign shall be illuminated and of a design that allows for the incorporation of changes when necessary.
- 3.3.6.4 As people move around the site signs shall give clear indications of directions for all Facility Users, including those new to the Facility, and shall define the purpose of the Buildings, providing reassurance and confirmation that they are moving in the right direction. There shall be signs to clearly identify assembly points, public and staff parking, externally accessed stores and plant rooms, delivery routes, restrictions and limitations, warnings and hazards etc.
- 3.3.6.5 Project Co shall provide internal directional signage from the main Building entrances and arrival points at each level (including at lifts and stairs) to provide guidance for internal wayfinding. These will inform people of which Department (in the case of Secondary Schools and Colleges, room, facility etc. is on each floor, as well as informing them which floor they are currently on. There shall also be room numbering provided in logical blocks, using the Building layout and architecture to provide suitable sequenced areas
- 3.3.6.6 Project Co shall fully integrate signage into the design of the Buildings and provide signs for every room and space, as described in the ADS denoting its name or purpose and agreed numbering, and to denote Suites of Spaces, such as faculties or Departments.
- 3.3.6.7 Project Co shall provide signage that is consistent and clearly visible, especially for visitors in directing them from Facility entrance to its main reception. It should also be capable of alteration where appropriate, without being easily tampered with.
- 3.3.6.8 Any external building signage to main entrances (either façade or canopy mounted) shall be clearly visible.
- 3.3.6.9 Sign surfaces shall be sufficiently hard to resist impacts from hand-held objects without any noticeable change to the surface appearance. Surfaces shall also resist abrasion from cleaning methods and maintenance systems without any noticeable change in surface appearance. All fixings used shall be suitable for their intended purpose and shall be in accordance with the manufacturer's recommendations.
- 3.3.6.10 Project Co shall comply with any specific requirements of the relevant Site Specific Brief.

3.3.7 External fittings

- 3.3.7.1 Project Co shall provide external fittings and Equipment that are:
 - a. safe for children and young people;
 - b. manufactured from durable materials;
 - c. suitable for different ages and physical abilities; and

- d. chosen to allow a number of layouts and easy rearrangements, including movement over distances (for example moving rugby posts to storage at the close of season), but sufficiently robust to withstand rigorous use.

3.4 Equipment Performance and Quality

3.4.1.1 Project Co shall ensure that all Equipment provided satisfies the quality and performance requirements specified below and within these ACRs to ensure it is safe and fit for purpose.

3.4.1.2 Project Co shall ensure that:

- a. all Equipment materials provided by Project Co are fit for purpose and comply with Welsh, British and European Standards and further with any such Welsh, British and European Standards that are in force or not in force but published at the time of the date of this Agreement;
- b. certificates and reports of tests carried out shall be seen and stored;
- c. if a third party is buying Equipment then they must also be able to produce valid test certificates;
- d. any new Equipment is ergonomically designed to ensure comfortable use and to meet the needs of different ages and physical abilities;
- e. new Equipment does not have any sharp edges or corners that may cause injury and chairs are designed so that legs do not protrude beyond the top of the back or present a tripping hazard; and
- f. where furniture screens are provided, they are stable with a suitable mechanism for fixing together, lightweight enough to be re-organised quickly and easily and do not present a tripping hazard.

3.4.1.3 Practical and Vocational spaces furniture shall:

- a. meet the service requirements in the ADS;
- b. allow Students to carry out practical activities individually, in pairs and in small groups;
- c. have sufficient flexibility to allow whole class discussion and presentation; and
- d. allow all Students to be able to face the demonstration bench or teaching/presentation wall and be observed by the teacher.

3.4.1.4 In order to accommodate disabled Students and those with SEN (D), Project Co shall ensure that the appropriate size, colour, finish and height of Equipment is provided. Where Equipment is adjustable for variable heights it shall be easily and discretely operable by the user.

3.4.2 Ergonomics, Strength and Stability

3.4.2.1 Project Co shall ensure that:

- a. any new Equipment is ergonomically designed to ensure comfortable use;
- b. all new tables and chairs to be used by pupils must comply with the ergonomic European Standard EN1729, which also covers strength and stability. This will therefore be an assurance of ergonomic suitability as well as quality and fitness for purpose;

- c. storage should comply with BS 5873⁶⁴; and
- d. the dimensions of furniture and fittings are agreed with the Authority, to ensure the correct specification for the age and size range in the space.

3.4.2.2 All new and Legacy Equipment shall:

- a. be durable and allow for a variety of postures and activities;
- b. be safe, strong, stable and durable;
- c. not have any sharp edges or corners that may cause injury;
- d. have chair legs that do not protrude so far as to present a tripping hazard; and
- e. where furniture screens are used, they are stable with a suitable mechanism for fixing together. They should also be lightweight enough to be re-organised quickly and easily and not present a tripping hazard.

3.4.2.3 Project Co shall identify the availability and, where applicable, the length of guarantees and/or warranties.

3.4.3 Fabric and Materials

3.4.3.1 Project Co shall ensure that the design and specification of fabric and materials of all Equipment provided by Project Co is fire resistant, fit for purpose and carefully detailed and compliant with the ADS. The colour, texture and finish of materials shall be deployed in a considered way, particularly for those pupils with SEN (D). Contrasts of colour should be used for pupils with visual impairment.

3.4.3.2 Project Co shall ensure that the finish chosen is appropriate for the activities taking place in the room.

3.4.3.3 Various finishes and applications are available for edgings of table and storage tops. Project Co shall ensure that edging materials are robust and are not susceptible to misuse.

3.4.3.4 Complicated corners, edges and frames that can trap food should be avoided for dining tables.

3.4.3.5 Project Co shall ensure that all fittings and furniture in music spaces shall include sound absorbent materials necessary to meet the acoustic requirements of that space.

3.4.3.6 Project Co shall ensure that all Equipment provided is to be manufactured to prevent 'off-gassing' pollutants like volatile organic compounds (VOC). Equipment is to contain low VOC materials⁶⁵, and to be assembled and maintained with the use of low VOC materials, including, cabling, paints and adhesives.

3.4.3.7 Project Co shall ensure that fire resistance is compliant with current Welsh, British and European Standards and with any that are known to be due to come into force. This is particularly important where a high volume of furniture will be stacked and stored. Upholstered furniture shall meet the relevant Welsh, British and European standards particularly for flammability, strength and stability (usually general contract) and fabric wear and tear in order to be re-used in a different setting.

3.4.4 Services

⁶⁴ BS 5873-4: 1998: Educational furniture. Specification for strength and stability of storage furniture.

⁶⁵ Levels of VOC not exceeding 300µg/m³ averaged over 8 hours.

- 3.4.4.1 Project Co shall ensure that all serviced Equipment shall be integrated with the artificial lighting, power and other systems in the Building, and it shall be clear where the responsibility lies for the various fitting and connections in each case.
- 3.4.5 Serviced Equipment
- 3.4.5.1 Project Co shall ensure that all equipment provided addresses the following points to provide an integrated and responsive system of mechanical, electrical, protective and communication installation:
- a. any pipe-work or cables shall be easily accessible for maintenance but, wherever possible, hidden from view, not forming dust traps and made tamper-proof; and
 - b. any connections, distribution systems, components and containment systems within Equipment shall be safely protected, tamper-proof, correctly insulated, and free from exposed contacts and clearly labelled.
- 3.4.5.2 Project Co shall ensure that specialist suppliers shall install the relevant equipment, either new or Legacy;
- 3.4.5.3 Project Co shall ensure that Facility Users shall have control over the equipment provided. All user controls on equipment provided by the Project Co shall be comprehensible, accessible and quietly responsive;
- 3.4.5.4 Controls such as isolator switches may need to be located on walls or fixed furniture to allow use by authorised personnel only.
- 3.4.6 Water and Drainage
- 3.4.6.1 Project Co shall ensure that all Equipment incorporating water and drainage (such as serviced appliances in workshops, food rooms and science laboratories) is installed so as to ensure hygienic conditions and the effective disposal of waste water, surface water and all liquid waste from the Facility and its activities.
- 3.4.6.2 Where sinks are to be supplied and installed by specialist furniture manufacturers, such as science laboratory manufacturers/suppliers, Project Co shall ensure coordination between the Equipment and Building Elements.
- 3.4.7 Gas and Compressed Air
- 3.4.7.1 Project Co shall install any gas and compressed air installations and appliances in accordance with appropriate regulations and guidance.

3.5 Equipment Life and Procurement

- 3.5.1 Design Life and Maintenance
- 3.5.1.1 The structure of all operable furniture provided by Project Co shall be compliant with all statutory regulations related to maintenance and management as well as provision.
- 3.5.1.2 All Equipment provided shall be easily cleaned and maintained and all materials and components shall have a suitable design life to ensure minimum inconvenience and disruption from breakdowns, repairs and maintenance activities.
- 3.5.1.3 Project Co shall ensure that all Equipment is:
- a. durable and reasonably easy to maintain;
 - b. simple in construction, to reduce maintenance and replacement costs;
 - c. easy to operate where adjustable (but difficult to misuse), repair or replace;

- d. housed in such a way that it is easy to access or remove for maintenance purposes; and
- e. all relevant staff and Facility Users shall be provided with adequate training in the use and maintenance of Equipment provided by Project Co, where necessary.

3.5.2 Warranties

3.5.2.1 Warranties will be provided in accordance with the requirements of the Agreement including Appendix B (*Completion Criteria*) of Schedule 10 (*Outline Commissioning Programme*).

3.5.3 Purchasing and delivery

3.5.3.1 Project Co shall:

- a. Agree a Loose Equipment Purchase Protocol with the Authority which will form part of the Project Co's Proposals. The protocol shall set out how the procurement of loose Equipment will be co-ordinated between the Authority, the School and Project Co, what Loose Equipment will be procured by the Authority and what by Project Co and all associated arrangements and programme;
- b. submit a schedule in the Project Co's Proposals listing all new and Legacy fixed and loose Equipment that it is responsible for;
- c. be responsible for the supply of new Equipment, and the delivery and fixing of all fixed Equipment as detailed in the Project Co's Proposals;
- d. be responsible for the supply, delivery and placing of all loose Equipment detailed on the schedules;
- e. liaise with suppliers to ensure ordering of new Equipment is in accordance with the required specification;
- f. liaise with suppliers to ensure delivery of Equipment is not before the Building is ready to receive it;
- g. liaise with each Authority (and each relevant School Entity, in the case of a School(s) project), to ensure Legacy items are securely stored for the duration of time they are not in use and are transported to the new site/block when the Building is ready;
- h. when necessary, ensure that Legacy Equipment is stored and/or moved appropriately, unless the Authority, has agreed to take responsibility for the serviceability and temporary storage of any item; and
- i. ensure a minimum number of delivery times where the Project Co is responsible for ordering Equipment.

4. ICT Design Requirements

4.1 Project Co shall deliver the requirements set out in these ACRs relating to the provision of ICT Infrastructure such that the ICT Infrastructure is capable of delivering the Authority's ICT solution.

4.2 Project Co shall ensure that the ICT Solution Summary aligns with the operational requirements of the school/college.

4.2.1 Introduction

4.2.2 This section and 'The ICT Responsibilities Matrix', set out the scope and the requirements of the ICT Equipment included within the Works and provide a baseline for responsibilities.

4.2.3 The aim of this section is to elaborate upon 'the ICT Responsibilities Matrix' and to clarify the requirements for the ICT Equipment elements of the building design and Works. School or College-specific information, for example the type of Initial ICT Equipment that will be transferred, is contained within the ICT Solution Summary. Read together, these will provide sufficient information to develop proposals. Project Co should also refer to the other sections in these ACRs.

4.2.4 Project Co will provide new infrastructure, initial training, AV installation and the Decant of Initial ICT Equipment.

4.2.5 Network Infrastructure security

4.2.5.1 Project Co. shall provide a secure wired and wireless environment by:

- a. configuring the wired and wireless infrastructure to support network segregation, security and quality of service (QoS); this shall not impact on the network's deployment or performance and shall be aligned with the school environment and GDPR guidance. Project Co. shall provide a rationale for how this will be achieved specific to the School's requirements;
- b. implementing network access controls and policy management that ensure authorised mobile user devices and/or guest user roles are securely authenticated onto the network, and that network traffic is protected from external and unauthorised internal interception, as per GDPR guidance. Project Co. shall detail how this will be achieved.

4.2.6 ICT Infrastructure means:

- a. Passive ICT Infrastructure - cabling infrastructure for data and voice services, including data outlets, containment, patch panels and cabinets;
- b. Active ICT Infrastructure – core and edge network switches and associated network switches and routers, including support for Power over Ethernet and wireless Active Equipment – controllers and access points for an enterprise whole-site wireless network;
- c. Telephony – an enterprise level, VOIP telephony solution including core equipment and handsets, and incoming connectivity; and
- d. Internet provision – the provision or relocation of a broadband internet connection.

4.2.7 The layout of 'The ICT Responsibilities Matrix' lists the following as major 'aspects' of ICT systems in Facilities:

- a. Server Room and hub Rooms;
- b. Network Infrastructure - passive and active;
- c. Local Technology – core;
- d. Local Technology – AV;
- e. Automated Systems;
- f. BMS/EMS, and the Automated Energy Data Collection Portal;
- g. Fire Alarm/Detection; and
- h. Telephony, Internet and TV Signal.

4.2.8 These aspects are further broken down into discrete ‘items’ which constitute each aspect. For example, ‘Local Technology – Core’ includes the following items:

- a. Servers and firewalls;
- b. Storage;
- c. User devices;
- d. Software;
- e. Peripherals; and
- f. Technical decant.

4.2.9 Each ‘item’ is a single system, a type of equipment or a service which is assigned to one or more party with regard to responsibility.

- a. ‘The ICT Responsibilities Matrix’ sets out six ‘responsibilities’ for each item. Each responsibility, where possible, is allocated to a single party. Where a party is shown as owning a responsibility for an item this includes all costs associated with the delivery of that responsibility.

4.2.10 Definitions of Responsibility

4.2.10.1 The parties identified to accept responsibility are as follows:

- a. Project Co
- b. Authority (provided that Project Co shall liaise with any Authority Party in place of the Authority, at the Authority’s request such as a relevant School Entity or the ICT Installer)

4.2.10.2 The responsibilities allocated within the matrix are set out below.

TABLE 42 ALLOCATED RESPONSIBILITY WITHIN MATRIX

| Specify | Determine the technical specification of the solution to meet the stated requirements |
|----------------|---|
| Supply | Procure the Equipment and Services to provide the solution |
| Install | Install and commission the ICT Equipment |
| Test | Confirm the correct working of the ICT Equipment and Services to provide the solution |
| Integrate | School or College-specific configuration (as appropriate), including implementation of any interconnections between systems and applications. Where shared between the School/College and Project Co, responsibility sits |

| | |
|----------|---|
| | with the School/College, but Project Co will provide support including limited resources. The package of support provided by Project Co is detailed in paragraph 4.12 below and the relevant Site Specific Brief. |
| Maintain | Provide day-to-day management, repair and replacement of the ICT Equipment and Services throughout a contracted period. |

4.2.11 Responsibility Matrix Line Items

- 4.2.11.1 The technical standards outlined in this section are minimum standards. Where standards change (for example, wireless technology) Project Co is expected to conform to the latest ratified and accepted standard as described below.
- 4.2.11.2 Project Co is expected to deliver the requirements as specified in 'The ICT Responsibilities Matrix' and the following sections provide additional detail with regard to each item in that matrix.

4.3 Server Room and Hub Rooms

- 4.3.1 Project Co shall provide a dedicated and secure environment and space to house infrastructure and server equipment, to include but not be limited to: cabinets holding servers and associated storage and backup equipment, core switches, edge switches, wireless controllers, telephony systems, cable distribution and distribution points and terminating equipment and presentation for broadband and telephone lines, and for connections to additional hub rooms containing supplementary equipment, such as edge switches, as required.
- 4.3.2 The server room and hub rooms shall be designed to safely and effectively accommodate the cabinets required by the installed equipment, both new and decanted, located around the Building to create an effective network topology.
- 4.3.3 When the size of a Building permits Project Co may use a single central space to house all server and infrastructure equipment without the need for separate hub rooms.
- 4.3.4 The server room and hub rooms shall be of sufficient size to allow, as a minimum:
- a. adequate Circulation space for service and maintenance activities to be performed without moving any cabinets; and
 - b. all cabinets to be accessible from front and rear with enough space for the cabinet doors to open fully when the door(s) to the room are closed, with a minimum clearance of 1200mm between the contents of the cabinet and wall.
- 4.3.5 Server rooms and hub rooms shall be designed to meet the requirements of these ACRs.
- 4.3.6 Connections to existing Buildings will be re-provided using the infrastructure standards covered in this document.
- 4.3.7 The location of the server and hub rooms shall ensure that Service Infrastructure not supplying the server room are not routed through, above, or on adjacent walls to the room.
- 4.3.8 Project Co shall provide that the server room as the termination point for any Internet and communications service to the Facility and any rooftop aerial or satellite dish for receiving digital broadcast transmissions.

- 4.3.9 The dimensions of the spaces provided shall be sufficient to accommodate the equipment being installed and to allow adequate circulation space for service and maintenance activities to be performed. Access for any envisaged maintenance purpose must be possible without moving the rack system.
- 4.3.10 The server rooms and distribution rooms should be located so that they are not below or sharing a party wall with wet Service Infrastructure and to ensure that the possibility of damage or contamination due to failures in any Service Infrastructure is minimised. Server and hub rooms shall not be adjacent to or below rooms with water services, including but not limited to toilets, bathrooms, wet areas. Project Co. shall ensure their design shall prevent flooding of the server room from adjacent and other spaces. The location of the server room shall be such that it is not susceptible to flooding from internal as well as external forces. No Service Infrastructure should traverse server or hub rooms. Server rooms shall not be located on the roof or below ground level. Where such issues are encountered and require mitigating and/or the size of the building service results in copper cabling runs exceeding 90m, separate hub rooms will be required.
- 4.3.11 All service and delivery access routes to the server and distribution rooms must be designed to allow easy movement and installation of equipment and fittings without dismantling large items. If doors open into the server/hub room they must allow cabinet doors to open at the same time. Access to the room(s) should not be from a classroom.
- 4.3.12 Project Co shall ensure that the server room is the termination point for any Internet and telecommunications services to the Facility and any rooftop aerial or satellite dish for receiving digital broadcast transmissions, as described in the School or College-specific ICT Solution Summary.
- 4.3.13 Project Co shall meet the requirements of the ICT Responsibilities Matrix including offering in its solution the following:
- a. Project Co shall provide a dedicated clean power supply to enable the server room supply to be left running while power in other sections of the Building is switched off; and
 - b. the power supply should be sufficient to support the equipment planned to be housed within the server and hub rooms together with headroom for future expansion.
- 4.3.14 Project Co shall provide power distribution units to support all Active Infrastructure, servers and associated components.
- 4.3.15 Project Co shall provide an accessible socket outlet adjacent to each cabinet, of a rating appropriate to the respective load, for example 1 x 32A for each server/core equipment cabinet and 1 x 16A for each edge switch cabinet
- 4.3.16 Project Co shall provide server and data cabinet surge protection to prevent damage to sensitive equipment
- 4.3.17 With regards to UPS Project Co shall ensure that the following requirements are met:
- a. Uninterruptible Power Supply(s) (UPS) are provided in the form of a rack-mounted battery system that will provide the following with 30 minutes autonomy, as a minimum and capable of providing transient over voltage protection;
 - b. servers and associated storage and backup systems;

- c. core switches;
- d. wireless controllers;
- e. broadband terminating equipment and/or routers;
- f. core telephony equipment and/or routers;
- g. the rating of the UPS is compatible with the load, the connecting cable(s) and the power supply it is connected to;
- h. relevant software is provided to enable a controlled shutdown (if required), with notification for all Servers, within the available runtime of the UPS battery(s);
- i. UPS shall comply with BS EN 62040-1 and BS EN 62040-3 (and any updates or replacements). Project Co shall ensure that the mode of operation shall be on-line;
- j. the UPS shall be compatible with the load; and
- k. batteries are integral to the UPS enclosure, have an autonomy of 30 minutes, are lead-acid valve regulated (VRLA) to BS EN 60896-21 and BS EN 61056-1 (and any updates or replacements), and have a minimum service life of 8 years.

4.3.18 ICT Server Room and Hub Room Ventilation

4.3.18.1 Refer to section 2.9.48

4.3.19 Sprinkler Systems

4.3.19.1 Sprinkler system requirements are included in 2.12.6 of these ACRs. Alternative fire suppressant systems for server and hub rooms are to be provided where identified in these ACRs.

4.3.20 Server Room and Hub Room Furniture

- 4.3.20.1 Project Co shall provide sufficient server racks of appropriate dimensions to house the servers that form part of the ICT Equipment. Racking design should support the cooling strategy of the room and should incorporate sufficient space and ancillary items so that a good standard of patching cable management can be achieved. Project Co may use Legacy ICT Equipment if available racking design should support the cooling strategy of the room.
- 4.3.20.2 Project Co shall provide sufficient cabinets to house patch panels for copper and fibre termination and Active network distribution equipment, for example core and edge switching. Racking design should support the cooling strategy of the room. Project Co may use Legacy ICT Equipment if available.
- 4.3.20.3 Project Co shall provide patch panels for data, telephony and fibre distribution to complete the network topology. All outlets should be appropriately labelled.
- 4.3.20.4 Project Co shall provide patch leads consistent with cabling standards and warranty to complete the network topology. The patch leads should reflect the Authority specific requirements for any colour scheme so as to support the Authority and each School Entity in any on-going maintenance and support, as detailed in these ACRs. Project Co may use Legacy patch leads if available, subject to not invalidating the warranty for any new cabling
- 4.3.20.5 Project Co shall provide service containment and routing in the form of dado, tray, riser and basket containment to match the cable specification and design aesthetics required. In order to provide redundancy there should be two separate, independent fibre routes linking each hub room to the server room.

- 4.3.20.6 Project Co shall provide server room/distribution cabinets, ICT Equipment (including the ICT Infrastructure) required by the Works or Services.
- 4.3.20.7 Project Co shall provide anti-static flooring in server rooms and all extraneous metal parts including door frames in server rooms shall be electrically earth bonded. Project Co shall ensure that raised floors and floor surfaces in server rooms shall be low smoke and zero halogen type.

4.4 ICT Network infrastructure - Passive

- 4.4.1 Project Co shall provide wired infrastructure (cables, ducting, containment, routing, termination, patch and fly leads and presentation) including the passive data cabling for the ICT network and wireless network and integrated systems which rely on data connections to function, for example, cashless catering systems, digital signage, telephony, internal and external CCTV, BMS, EMS, and the Automated Energy Data Collection Portal, etc.
- 4.4.2 Project Co shall ensure that where fibre cabling is used:
- a. the installation conforms to the relevant sections within the TIA/EIA 568 standards for the type of cable being installed, and that manufacturers instructions for handling and installation of cables are fully adhered to;
 - b. links between cabinets should have two separate fibre cables for resilience. It is conformant 16 core multi-mode OM4 (50/125) fibre as a minimum, with different routes back to the server room to ensure that both cannot be severed at the same, with all cores presented for use to support future requirements and resilience;
 - c. the maximum length of the fibre is 400m, and this is separately contained to avoid interference, with a bend radius controlled in line with the specification of the cable manufacturer;
 - d. where fibre is over 400m an appropriate specification of fibre is used to support the dependent Active infrastructure;
 - e. fibre warning labels should be attached along the length of the cable at 3m intervals;
 - f. sufficient slack (3m+) should be left at each end of the cable to facilitate re-termination or relocation;
 - g. no intermediate splices are used in the cable runs;
 - h. a minimum 20-year manufacturer's warranty is provided for the complete cabling system;
 - i. test results are provided for the performance of and length of 100% of the cables that have been installed; and
 - j. all relevant documentation is handed over to the Authority , including network topology details, cabling test results, cabling test certificates, cabling warranty information including evidence of installer accreditation, and other network documentation.
- 4.4.3 Project Co shall ensure that where copper cabling is used:
- a. the installation conforms to the relevant sections within the TIA/EIA 568 standards for the type of cable being installed;
 - b. it should be Category 6A (Cat 6A.) standard as a minimum, with all terminations following the manufacturer installation guidelines;

- c. no intermediate splices shall be used, and the minimum and maximum bend ratios should be adhered to;
- d. 30cm should be provided as slack at each end of the cable run;
- e. the length of any individual copper cable must not exceed 120 metres between termination points;
- f. all cables must be terminated on appropriately labelled RJ-45 sockets;
- g. all data cables shall be low smoke and zero halogen type;
- h. fly leads, consistent with the installed cabling manufacturer's specification and warranty requirements, are provided for each data point;
- i. a minimum 20-year manufacturer's warranty is provided for the complete cabling system; and
- j. test results are provided for the performance and length of 100% of the cables that have been installed.

4.4.4 All relevant documentation including: network topology details, cabling test results, cabling test certificates, cabling warranty information including evidence of installer accreditation, and other network documentation is in the handover to the Authority.

4.4.5 Project Co shall for Secondary Schools and Colleges provide a minimum of 1.0 data per point Student (other than Primary Schools) and for Primary Schools 0.7 data points per Student unless otherwise advised in these ACRs. The final number and location of data points shall be included on the final ADS with the total number identified.

4.4.6 Project Co shall provide sufficient numbers of appropriately positioned data points to satisfy the requirements of the Authority. The location of the data points will be defined with the Authority and detailed in these ACRs.

4.5 ICT Network infrastructure - Active

4.5.1 Project Co shall provide as a minimum the following information.

- a. a logical diagram of the proposed solution topology;
- b. a detailed equipment schedule of all parts of the proposed technical solution;
- c. a detailed cost matrix for the proposed solution including potential cost options for the school such as external wireless access points; and
- d. current costs for elements of the solution that require revenue funding at the end of the licensing or support period proposed. For example, continuing support for cloud-based wireless management.

4.5.2 Project Co shall ensure that enterprise-level switching, edge and core, is provided that:

- a. takes account of the maximum bandwidth of the server network interface, including those proposed in these ACRs and/or the School or College-specific ICT Solution Summary;
- b. provides as a minimum the following bandwidth between the core switch/s and edge switch stack/s via a minimum of 2 bonded (Active/Active) links per stack;

TABLE 43 EDGE SWITCHES AND BANDWITHS

| Number of edge switches* in a stack | Bandwidth back to the core |
|-------------------------------------|----------------------------|
|-------------------------------------|----------------------------|

| | |
|---------|---------|
| 1 to 4 | 20 Gb/s |
| 5 to 6 | 30 Gb/s |
| 7 to 8 | 40 Gb/s |
| 9 to 10 | 50 Gb/s |

* Assuming a maximum of 48 ports per switch

- c. maximises the bandwidth between switches within each stack. Edge switches shall be stacked using specific and dedicated stacking port/s to enable high speed communication (minimum of bi-directional 40Gb/s per stacking module) between each switch in the stack as part of a dedicated resilient backplane, with a single IP address for each stack so that the stack can be managed as a single entity;
- d. provides a minimum of 1Gb/s connectivity to the user device deployed to the desktop;
- e. provides the required bandwidth to devices and infrastructure equipment that require a higher bandwidth, including but not limited to media devices and WiFi Aps;
- f. can be configured and managed to support network segregation, security and quality of service; this should not impact on the network's deployment or performance and should be aligned with the Facility's environment. Project Co shall provide a rationale on how this will be achieved;
- g. is scalable to accommodate future developments and flexibility of deployment as well as accommodating Legacy Equipment as required;
- h. can accommodate at least one additional module per chassis (where a chassis is provided) or can otherwise be upgraded when additional capacity is required in future;
- i. has a manufacturer warranty and support arrangement (telephone, email and web), including but not limited to licences, software and firmware updates, providing 5 years of cover as a minimum;
- j. outlines any expected ongoing revenue costs and implications for the school following the proposed 5 years' warranty/support period;
- k. includes an on-site, manufacturer approved, system administrator training package, appropriate to the scale of the solution as recommended by the manufacturer;
- l. is Energy Efficient Ethernet compliant to 802.3az standard;
- m. has central management tools that can be used to configure the switching (core and edge), monitor performance and provide alerts in the event of a failure;
- n. can support aspects of the proposed solution that require PoE, in compliance with the IEEE 802.3af/at (as required) standard, including but not limited to; wireless access points, CCTV cameras, access control systems, automated registration points and VoIP equipment;
- o. have sufficient active ports to support connectivity for 100% of terminated data points across the site;
- p. includes sufficient PoE ports for devices that require it, Project Co will provide details of PoE equipment loads and PoE Switch outputs, appropriate to cabinet patching and switch locations;

- q. has a core switch design that is resilient against the failure of any single component, including but not limited to redundant power supply or management modules;
- r. is suitable for integration into a wider technical solution or support arrangement if necessary, for example an existing Building or estate wide solution, providing details on the standards which will enable this to occur;
- s. provides for each switch a configuration file that allows it to be reset to the configuration set at Actual Completion Date, with logging of any changes made to configuration up to and including 12 months from the Actual Completion Date; and
- t. provides confirmation that the proposed solution supports the following conditions and standards as a minimum:
 - i. that LLDP-Med is implemented in PoE+ switches;
 - ii. that all switches have a minimum of 512mb of CPU memory;
 - iii. that the switch topology supports a minimum of 16000 MAC addresses;
 - iv. that the network supports MST standard for spanning tree;
 - v. uses non-blocking switch fabric;
 - vi. that all switches, access points, controllers, etc. are sourced from a UK distributor, and have a valid UK warranty; and
 - vii. that the UK distributor of the switch infrastructure has been consulted on the design of the Active Infrastructure.

4.5.3 Project Co may re-use Legacy switches if available and able to meet these requirements.

4.5.4 Project Co shall provide an enterprise level **wireless solution** which will support a high number, and high density, of educational users by:

- a. maximising the bandwidth between the Access Point (AP) and the switch; Project Co shall provide a rationale for the number of ethernet ports on the AP, the total available bandwidth between the AP and switch, and how this supports the wireless throughput of the AP;
- b. maximising the bandwidth between the AP and the user device by providing high performance access points to support simultaneous use, without degradation in performance; Project Co shall provide a rationale for the number of aerials, spatial streams and specific technology used in the AP, and how this supports the wireless standards associated with new and Legacy devices;
- c. providing blanket coverage throughout the Facility which ensures connectivity/performance is not lost whilst users roam around the Building;
- d. providing active signal management and load balancing of user/device connectivity, and provide rationale for how this is achieved;
- e. providing dual band connectivity;
- f. uses the fastest ratified standard at the time of installation and be backwards compatible with previous standards;
- g. configuring to support network segregation, security and Quality of Service (QoS); Project Co should demonstrate how the initial configuration meets the Authority's specific requirements;
- h. having central management tools that can be used to configure the wireless access points, monitor performance and provide alerts in the event of a failure;

- i. having a manufacturer warranty and support arrangement (telephone, email and web), including but not limited to licences, software enhancements and firmware updates, providing 5 years of cover as a minimum;
- j. outlining any expected ongoing revenue costs and operational implications following the proposed 5 years' warranty/support period;
- k. including an on-site, manufacturer approved, system administrator training package, appropriate to the scale of the solution as recommended by the manufacturer;
- l. including an on-site, manufacturer approved system administrator training package, appropriate to the scale of the solution as recommended by the manufacturer;
- m. provides guest access and automated authentication for authorised users;
- n. actively manages and load balances user connectivity;
- o. the system is easily scalable at the central controller and can accommodate future higher bandwidth requirements and/or the implementation of a resilient dual controller system; including reference to licensing, hardware/software capacity, and failover process;
- p. minimises the impact of interference from Building Services Infrastructure and systems and adjacent networks, and provide details of how this will be accomplished;
- q. is suitable for integration into a wider technical solution or support arrangement if necessary, for example an Existing Facility or an estate wide solution providing details on the standards which will enable this to occur;
- r. supporting the Authority should they wish to enable external WiFi connectivity as part of the Works; the Authority may include details in the relevant Site Specific Brief and procure external access points (and licences) in line with the Project Co's Proposals, which will be treated as New Existing Equipment and installed by the Project Co, limited to the funded Works;
- s. each wireless controller is provided with a configuration file that allows it to be reset to the configuration set at the Actual Completion Date, with logging of any changes made to configuration thereafter;
- t. Project Co will include these within the WiFi planning documentation and will install (physically and technically) APs as per the wider wireless solution;
- u. Project Co shall work with the Authority to ensure hardware is procured by the Authority at the same time as Project Co to minimise risks;
- v. where external wireless APs are included, it is the Project Co's responsibility to ensure that appropriate grounding and surge protection is provided;
- w. Project Co may consider re-use of a Legacy wireless solution if available; and
- x. Project Co shall provide any network infrastructure - wired and wireless, elements and any other equipment required to deliver the Services (in accordance with the Service Level Specification).

4.6 ICT Infrastructure Tests

- 4.6.1 Project Co shall undertake P1 Infrastructure Tests in accordance with the requirements detailed in Annex 2 to these ACRs. These tests will ensure that the structured cabling and wireless local area network is installed correctly and completely prior to handing over to the ICT Installer. Once all active equipment and final end user devices are installed and operating at normally occupied capacity, it is the responsibility of the Project Co to undertake further

WLAN/WiFi tests to ensure required coverage is achieved as detailed in the P2 Infrastructure Test in accordance with the requirements detailed in Annex 2 to these ACRs

4.7 Local Technology – Core

- 4.7.1 Project Co shall provide any additional equipment in relation to Local Technology core elements that he requires in order to deliver the Services.
- 4.7.2 Where required Project Co will decant all Local Technology systems as set out in paragraph 4.11 (ICT Decant Protocol) of Part 1 (Generic Design Requirements) of these ACRs and Table 45, 'The ICT Responsibilities Matrix' of Part 1 (Generic Design Requirements) of these ACRs.

4.8 Local Technology – AV

- 4.8.1 In relation to fixings, brackets, cables & power (containment, routing, termination and presentation) Project Co shall provide all necessary fittings, poles, frames, rigs, cages and brackets required for the installation, mounting, commissioning and other general installation Works for Legacy ICT Equipment.
- 4.8.2 In relation to the hardware only Project Co shall be responsible for decommissioning, decanting, reinstalling (mounting and connection to installed cabling) and testing of the following items:
 - a. Data projectors;
 - b. Interactive whiteboards;
 - c. Sound systems to support learning in teaching spaces, such as speaker systems connected to interactive displays and other ICT and audio-visual equipment;
 - d. Display screens;
 - e. IP TV broadcast system (Note that the provision of aerials, dishes etc. is covered in paragraph 4.6);
 - f. stage lighting control; and
 - g. other systems as included in these ACRs.
- 4.8.3 Otherwise Project Co will decant all AV equipment as set out paragraph 4.11 (*ICT Decant Protocol*) of Part 1 (*Generic Design Requirements*) of these ACRs, Table 45, 'The ICT Responsibilities Matrix' and the SSB.
- 4.8.4 Any ceiling mounted Teaching Area display technologies including pole mounted and short throw projection should be fixed directly or indirectly to the soffits.
- 4.8.5 Project Co shall ensure that the design considers the nature of the specific display technology to be used and provides ways of allowing the display to be viewed clearly and without reflections whilst retaining a space which benefits from daylight.
- 4.8.6 Project Co shall provide an AV wiring loom into every teaching space, hall and meeting room (as required). The loom should support the current AV requirements of the Facility including but not limited to VGA, USB and dual HDMI and be presented via a faceplate.
- 4.8.7 In specialist areas, for example science, food rooms and design & technology rooms, the faceplate location shall take into account the teacher desk and demonstration position to

ensure that appropriate connectivity can be maintained between the teacher PC/device and the teaching area AV equipment – and that sight lines and viewing angles for Students are maintained.

- 4.8.8 Where partitions support display equipment, including but not limited to interactive whiteboards, interactive projectors and interactive LED screens, suitable patressing shall be installed as required.
- 4.8.9 Where partitions support other display solutions, such as digital signage screens, or cashless revaluation units, parsing shall be installed across a suitable area, at a suitable height for the respective equipment, and be coordinated with appropriate power and data sockets, which may need to be concealed within or behind the respective unit.
- 4.8.10 Project Co shall install and test AV equipment as Table 45, 'The ICT Responsibilities Matrix' of Part 1 (Generic Design Requirements) of these ACRs.
- 4.8.11 Where a 'Teacher Wall' is required, it should have agreed power and data to accommodate interactive displays and/or associated projector; the interactive display area must be free from obstructions, not limited to dado, to enable flexible height installation of the display for staff and Student use.
- 4.8.12 Specialist suppliers shall be consulted on the most appropriate type of any new audio-visual equipment, taking account of any Initial ICT Equipment such as control equipment or scaffolding.
- 4.8.13 Where the legacy AV equipment from drama, dance, halls and music spaces is suitable, Project Co will Decant and reinstall, providing all necessary fixtures, fittings, cabling and infrastructure.
- 4.8.14 Where the legacy AV equipment from drama, dance, halls and music spaces and other areas is not suitable for decant, the Authority may procure equivalent new equipment which Project Co will decant and reinstall, providing all necessary fixtures, fittings, cabling and infrastructure.

4.9 Automated Systems

- 4.9.1 Project Co shall decommission, decant, reinstall, (mounting and connection to installed cabling) and test any cashless catering system (hardware only)
- 4.9.2 Where a specific Dining and Social area is required in the SoA, Project Co shall ensure that it is designed so that there is adequate space for till points, revaluation units, digital signage and serving areas to service the number of diners in any sitting, as given in these ACRs. A review of the small power and data requirements for this equipment should be conducted and these connections supplied.
- 4.9.3 Project Co shall specify, supply, install and commission the access control system;
- 4.9.4 Project Co shall decommission, Decant, reinstall, (mounting and connection to installed cabling) and test any Student automatic registration systems including visitor registration schemes at main reception;
- 4.9.5 Project Co shall decommission, Decant, reinstall, (mounting and connection to installed cabling) and test any internal CCTV;

- 4.9.6 where an existing or new legacy internal IP-based system is decanted/installed, Project Co may wish to integrate external CCTV cameras if provided, with the internal system;
- 4.9.7 Project Co shall ensure that all fixings, brackets, power & cables (containment, routing, termination and presentation) are provided for the installation and commissioning of all Works requiring alteration of the Building's structure in order to facilitate the installation of the items listed in this section of the matrix; and
- 4.9.8 Project Co shall provide any further automated systems, elements that are required to deliver the Services.

4.10 Telephony, Internet and TV signal

- 4.10.1 The Authority will require any or all of the following:
 - a. analogue lift phone line;
 - b. ISDN30/ISDN2 with direct lines identified and telephone extension;
 - c. BT Redcare;
 - d. franking machine and fax services;
 - e. spare phone line in the event of a telephone system failure;
 - f. the Building Management Systems (BMS); and
 - g. kitchen line,as specified in the relevant Site Specific Brief
- 4.10.2 Project Co shall provide all necessary cabling and connections (excess construction and last mile), routing and ducting.
- 4.10.3 Project Co shall fund and coordinate the ordering and installation of the broadband connection (last mile, on-site equipment and an active connection to the internet etc.) and digital and analogue telephone lines. This will include, but not be limited to, ISDN, Redcare, Alarm, Lift or SIP trunking Service Infrastructure and the relocation of existing connections or provision of new. An independent broadband connection will be provided for sole use of the BMS/EMS, and the Automated Energy Data Collection Portal. Project Co will maintain, where required, existing communication connections from the existing Buildings to other locations both inside and outside the red line and provide new connections where necessary.
- 4.10.4 The orders will be placed by the Authority and/or the School Entity, in the case of a school's project, or another Authority Party.
- 4.10.5 Works will be carried out in a way that minimises disruption to the Facility, including but not limited to maintaining connectivity during exam result delivery.
- 4.10.6 In the event that Project Co installs a private 'Telco Green Cabinet' (Customer premise equipment), on the Site to facilitate and de-risk broadband Works Project Co will provide the following as a minimum:
 - a. 1 x BT OpenReach duct;
 - b. 2 x Private ducts;
 - c. 1 x power outlets on a dedicated circuit; and
 - d. 1 x 12 core 10gb/s fibre cable, with cable specification appropriate to the cable distance, terminated within the Private CPE and Facility server room.

- 4.10.7 Where a private customer premise equipment (CPE) is provided, Project Co remains responsible for the termination of the broadband service within the server room, and for connectivity to the service providers main (public) roadside Telco Green Cabinet.
- 4.10.8 Project Co shall provide an enterprise level telephone system (core and handsets), with sufficient fixed handsets for offices and admin areas with the following functionality:
- a. a central switchboard;
 - b. fixed handsets, making use of the structured cabling and IP network, for all senior leadership team offices and admin staff;
 - c. headsets for hands-free operation for reception staff;
 - d. voicemail forwarding as e-mail attachment for all staff; and
 - e. Auto-Attendant (or automated attendant) voice menu system allowing callers to be transferred to an extension without going through a telephone operator or receptionist.
- 4.10.9 Project Co shall provide a solution to enable the Facility to make and receive calls in the case of a power failure.
- 4.10.10 The telephone system will have a manufacturer warranty and support arrangement, including firmware and software upgrades (telephone, email and web), providing 5 years of cover as a minimum.
- 4.10.11 Project Co shall provide training for the Telephony system.
- 4.10.12 In relation to aerials, dish, LNB, actuators, down-leads, distribution amplifier Project Co shall provide a digital terrestrial receiver, capable of supporting simultaneous access to multiple channels with the feed terminating in the server room.
- 4.10.13 In relation to telephony, internet and TV, elements Project Co shall supply any additional equipment that is required to deliver the Services.

4.11 ICT Decant Protocol

- 4.11.1 Where decant is required, Project Co shall provide all resources to decommission, package, store, move and re-commission Initial ICT Equipment and other ICT Equipment in accordance with this paragraph 4.11 and the Decant Protocol set out in Section 2 (Decant Protocol) of Schedule 11 (Equipment) of this Agreement.
- 4.11.2 A decant list will be agreed between the Authority and Project Co. Project Co and Authority will specify the date on which the list is frozen.
- 4.11.3 Where the Authority (and/or the relevant School Entity/(ies), in the case of a School(s) project) is procuring New Replacement ICT Equipment for Decant by Project Co to a Facility (see paragraph 4.11.12 below), Project Co shall co-ordinate with the Authority (and where relevant the School Entity/(ies), in the case of a Schools project), for the delivery, storage and insurance for installation before the ICT Handover Date.
- 4.11.4 Project Co shall provide all resources to decommission and decant the Initial ICT Equipment and services. This includes:
- a. testing;
 - b. de-installation

- c. packaging;
- d. transport;
- e. storage;
- f. un-packing;
- g. installation (as 'The ICT Responsibilities Matrix'); and
- h. testing, (as the Implementation and User Acceptance Testing Schedule).

4.11.5 Project Co shall co-ordinate and project-manage the resources required to ensure that the Authority (and each School Entity, in the case of a School(s) project), can operate with their Legacy ICT Equipment within the Building.

4.11.6 Project Co shall ensure ICT Assets are decanted to the correct locations specified by the School Entity or the Authority, in accordance with the Construction Phase Access Protocol the Authority's Construction Requirements and the Decant Protocol.

4.11.7 Where the Authority has a technical support team or a service provider, Project Co shall liaise with them through the Authority to ensure a smooth transition to the Facility's ICT solution, including the technical decant process.

4.11.8 Project Co is responsible for the Initial ICT Equipment from Decant of the ICT Assets (the point of de-installation in the case of Legacy ICT Equipment) and is not responsible during Authority Control Periods (as set out in paragraph 4 (*Control of ICT Assets*) of Section 2 (*Construction Phase Access Protocol*) of Schedule 34 (*Joint Operating Protocol*)).

4.11.9 In the event of damage to, loss or failure of the ICT Equipment during the period which Project Co is responsible for it, Project Co shall return the equipment to its previous condition or replace with suitable new, at no cost to the Authority (or any School Entity in the case of a School(s) project) in accordance with paragraph 14 (*Damage and Loss During the Move*) of Section 2 (*Decant Protocol*) of Schedule 11 (*Equipment*).

4.11.10 Project Co will ensure relevant conditions for maintaining existing warranties for Initial ICT Equipment are adhered to throughout the decant process, for example where a certified installer is required for decommissioning and re-installing a piece of equipment such as Teaching Area AV equipment or leased devices.

4.11.11 In the event that Decant by Project Co is not required in respect of any ICT Equipment and the Authority is making alternative arrangements for delivery of such ICT Equipment to a Facility,, Project Co will provide the necessary access, secure storage and insurances so that the installation and testing of ICT equipment is not delayed beyond Facility opening.

4.11.12 New ICT Equipment

The Authority may procure new Initial ICT Equipment to replace any unsuitable Legacy ICT Equipment, of an equivalent type or specification to the Legacy ICT Equipment, for delivery to the Facility.

The list of Legacy ICT Equipment shall be captured in the ICT Solution Protocol, the ADS and the Loaded Room Layout Drawings. This includes, but is not limited to:

- a. Classroom A/V equipment;
- b. digital signage;
- c. internal CCTV cameras;

- d. internal access control systems, including locks; and
- e. external Wireless Access Points.

(the "New Replacement ICT Equipment").

4.12 Local configuration support package

4.12.1 In addition to decant Project Co shall provide technical support to help the Authority configure and administer the ICT Assets in the Building. This support is in addition to installation works and defects management, and is for the purpose of ensuring successful integration of the Authority's equipment (and network, where applicable) with the new infrastructure provided by Project Co. This should include access to a key contact that should be available to direct any requests for assistance. Examples include; switch re-configuration or the re-distribution of ICT Assets should it be required. Project Co shall provide the following support days per School, per relevant support person (to be allocated by the Authority), and such support days will be in addition to any training requirements set out elsewhere in this Agreement. Support shall be provided during the ICT Handover Period. The scope of support is further detailed in the relevant Site Specific Brief.

TABLE 44 MAINTENANCE SUPPORT PER SUPPORT PERSON

| School Type | Student numbers | Network Engineer (Switching) | Network Engineer (Wireless) | Server Engineer (MCSE) | Client Engineer (MCSA) |
|-------------|-----------------|------------------------------|-----------------------------|------------------------|------------------------|
| Primary | up to 250 | 1 | 2 | 2 | 1 |
| Primary | up to 500 | 1 | 2 | 2 | 2 |
| Primary | 500 + | 2 | 2 | 2 | 2 |
| Secondary | Up to 1000 | 2 | 2 | 3 | 2 |
| Secondary | 1000+ | 3 | 3 | 3 | 3 |
| College | Up to 1000 | 2 | 2 | 3 | 2 |
| College | 1001+ | 3 | 3 | 3 | 3 |

4.12.2 Project Co shall co-ordinate and project manage the resources required to ensure that the Authority or each School Entity, as relevant, can operate with their existing ICT on the ICT Infrastructure provided at the Facility.

4.13 ICT Responsibilities Matrix

TABLE 45 ICT RESPONSIBILITY MATRIX

| Responsibility | | | | | | | | | | |
|----------------|-------------|-------|-----------------------|---------|---------|---------|------|-----------|----------|---------------------------|
| Aspect | Item | Group | Potential Legacy Item | Specify | Provide | Install | Test | Integrate | Maintain | Active (A) or Passive (P) |
| | Clean Power | 1 | No | PC | PC | PC | PC | N/A | PCFM | A |

| Responsibility | | | | | | | | | | |
|---|---|-------|-----------------------|---------|---------|---------|------|-----------|----------|---------------------------|
| Aspect | Item | Group | Potential Legacy Item | Specify | Provide | Install | Test | Integrate | Maintain | Active (A) or Passive (P) |
| Server Room/Distribution Rooms | Power distribution units | 1 | No | PC | PC | PC | PC | N/A | PCFM | A |

5. Annex 1 Statutory Requirements and Guidance

5.1 Introduction

- 5.1.1 Project Co is required to ensure that the designs for all Facilities comply with all current relevant regulations, including those listed here in Annex I. Project Co should be aware of all current relevant guidance on School and College premises, including that listed here.

5.2 Statutory Requirements

Legislation applying to School premises only

- 5.2.1 **The Education (School Premises) Regulations 1999 (SPRs)** - these apply to all existing and new schools maintained by a Local Authority. They cover toilet and washing facilities, medical accommodation, health, safety and welfare, acoustics, lighting, water supplies and outdoor space.
- 5.2.2 **The National Minimum Standards for Boarding Schools (2015)** cover requirements for boarding accommodation at all mainstream boarding schools, for all age groups of pupils up to 18. There is a separate set of national minimum standards for residential special schools.
- 5.2.3 Legislation applying to different types of buildings, including schools
- 5.2.4 There is a substantial amount of other Law that applies to all buildings, including schools. Regard should be had to the provisions of this Law including, but not limited to:
- a. the Health and Safety at Work etc Act 1974 (HSWA);
 - b. the Workplace (Health, Safety and Welfare) Regulations 1992, together with its Approved Code of Practice and Guidance (collectively – WRs);
 - c. the Equality Act 2010 (EQA);
 - d. the Regulatory Reform (Fire Safety) Order 2005 (RRFO); and
 - e. The Control of Substances Hazardous to Health Regulations 2002 (as amended) (COSHH).
- 5.2.5 As with other building types, developments at schools are bound by normal planning controls, details of which can be found on the government Planning Portal. The Department for Communities and Local Government (DCLG, or Communities) published the National Planning Policy Framework on 27 March 2012, which aims to make the planning system less complex and more accessible, in part by significantly reducing the number of regulations in place. It also aims to promote sustainable development.
- 5.2.6 Planning Policy Wales issues Technical Advice Notes and procedural guidance is further issued in circulars from Welsh Government/ National Assembly for Wales and Welsh Office.
- 5.2.7 Where a Site contains an Existing Facility, Project Co (or WEP Co during a New Project Development Stage 1 or Stage 2) shall apply for a Certificate of Immunity from Listing to Cadw, unless the Authority specifically agrees that such an application is not required. Project Co (or WEP Co) shall have notified the planning authority at the time of the application.
- 5.2.8 Construction work at schools is subject to approval under the Approved Documents for Wales which took effect from 2017.

- 5.2.9 Regard should also be had to The Construction (Design and Management) Regulations 2015, which concerns ensuring the safety of the workforce, occupants and the public while construction Works are carried out.
- 5.2.10 The Building Regulations set minimum standards for the design and construction of buildings and exist mainly to ensure the health and safety of people in and around buildings, but also cover energy conservation and accessibility. The fourteen technical “Parts” of the Building Regulations are supported by Approved Documents, which show how the requirements of the regulations can be complied with.
- 5.2.11 Developments on School and College sites are also bound by environmental Law, such as the:
 - a. Environmental Protection Act 1990; and
 - b. Site Waste Management Regulations 2008.

5.3 Regulatory Guidance

- 5.3.1 Building Bulletin (BB) 101, Ventilation of school buildings, downloadable only, 2017
- 5.3.2 This guidance advises on how to meet the requirements of Part F of the Building Regulations as they apply to Schools and is cited in AD F.
- 5.3.3 BB 100, Design for Fire Safety in Schools, NBS/RIBA 2007
- 5.3.4 This guidance advises on how to meet the requirements of Part B of the Building Regulations as they apply to Schools and is cited in AD B. It is being reviewed and revised guidance on fire safety in schools is expected.
- 5.3.5 The above list is not an exhaustive list of Statutory Requirements; Project Co should satisfy themselves that they have adhered to all relevant Statutory guidance.

5.4 Design Guidance

- 5.4.1 Listed below is the current design guidance for Schools, together with technical guidance, best practice and case studies.
 - c. BB 104, Area Guidelines for SEN (D) and Alternative Provision, 2015
 - d. BB 103, Area Guidelines for Mainstream Schools, 2015
 - e. BB 99, Briefing Framework for Primary School Projects, TSO 2006
 - f. BB 98, Briefing Framework for Secondary School Projects, TSO 2004)
 - g. BB 88, Fume Cupboards in Schools, TSO 2014
 - h. Design of sustainable schools: case studies, TSO 2006
 - i. Music Accommodation in Secondary Schools: a design guide, NBS/RIBA 2010

5.5 Welsh Government Policy and Guidance

- a. School toilets: Good practice guidance for schools in Wales, 2012
- b. Guides to making your 21st Century Schools and educational facilities sustainable, 2018
- c. Guidance for Community Benefits, 2018

- d. Welsh Government Sustainable Building Standards, 2017

|----------------|--|--|---|---|----------------------|--|-------------------------------------|
| | re complete | <ul style="list-style-type: none"> sioned and available - Proxy details (if required) - Firewall I.P. information (if required) - Test wireless client devices commissioned and available | <ul style="list-style-type: none"> - Open a Web Page on the mobile device to an external Source (e.g. BBC News) - Power up and stream video from a local file server to 30No simultaneous wireless client devices | <ul style="list-style-type: none"> - If upstream WAN connection has a firewall, then configuration details required from supplier as regards the school/local WAN connection to permit traffic to reach the internet. - It is the responsibility of school to provide proxy and firewall details to permit operation of the WAN (if required) | | | |
| Telephony Test | Telephony - ability to make an internal telephone call | <ul style="list-style-type: none"> - Network infrastructure commissioning completed - WAN/ISDN/PS TN connection & commissioning in place - Telephony system is deployed and integrated by the school/BC | <ul style="list-style-type: none"> - Dial phone number of an available phone - On pickup, ensure voice is audible and clear Hang up handset | | 5 mins | User can make an internal telephone call | P2 Payment Commencement Requirement |
| Telephony Test | Telephony - ability to make an external telephone call | <ul style="list-style-type: none"> - Network infrastructure commissioning completed - WAN/ISDN/PS TN connection & commissioning in place - Telephony system is deployed and integrated by the school/BC | <ul style="list-style-type: none"> - Dial an external phone number - On pickup, ensure voice is audible and clear Hang up handset | | 5 mins | User can make an external telephone call | P2 Payment Commencement Requirement |

| Test Ref | Test Definition | Test Pre-requisites | Each Test User Inputs Required | Test Process | Anticipated Duration | Expected Result | P1/P2 Handover |
|-----------------------------|---|--|---|---|----------------------|--|-------------------------------------|
| Telephony Test | Telephony - ability to receive an internal telephone call | <ul style="list-style-type: none"> - Network infrastructure commissioning completed - WAN/ISDN/PS TN connection & commissioning in place - Telephony system is deployed and integrated by the school/BC | <ul style="list-style-type: none"> - Dial the School switchboard - On pickup, ensure voice is audible and clear Hang up handset | | 5 mins | User can receive an external telephone call | P2 Payment Commencement Requirement |
| General Cabling | | <ul style="list-style-type: none"> - Network cabling complete and deployed into cabinets | <ul style="list-style-type: none"> - Terminations labelled appropriately and consistently within the cabinets | | | Port labelling in classrooms and cabinets/hub rooms are consistent and correct | P1 ICT Handover Requirements |
| Network Cabling to Activ es | Wired network installation complete and operational . Also, integration with Network infrastructure complete | <ul style="list-style-type: none"> - Network infrastructure commissioning has been completed | <ul style="list-style-type: none"> - Review each hub room against deployment diagrams to confirm equipment deployed matches schedule - Confirm all Ports patched into a network switch match available CAT 6 cables by counting patch panel ports labelled to active switch port cabled/connected | <ul style="list-style-type: none"> - It is noted that this test does not take into any port designation to VLANs. - This test is a conformation of deployment numbers. - A hub patching schedule document can also be used to confirm deployment | 60 mins | Confirm all CAT cables are patched into an active network switch | P2 Payment Commencement Requirement |
| Cabling Docu mentation | | <ul style="list-style-type: none"> - Network cabling complete and deployed into cabinets. - Building sign off complete | <ul style="list-style-type: none"> - Completion and warranty certificates received | | | CAT cables have been installed to latest standards and specifications | P1 ICT Handover Requirements |

| Test Ref | Test Definition | Test Pre-requisites | Each Test User Inputs Required | Test Process | Anticipated Duration | Expected Result | P1/P2 Handover |
|-----------------------|-----------------|---|--|--------------|----------------------|--|-------------------------------------|
| Cabling Documentation | | - Network cabling complete and deployed into cabinets | - Test results that show 100% pass against requirements and specifications | | | CAT cables have been installed to latest standards and specification | P1 ICT Handover Requirements |
| Digital Free view | | - Aerial System deployed, and termination points placed into server cabinet | - An aerial system must be installed and capable of receiving and distributing the following signals: Digital Terrestrial (DVB-T from Free-view) - If Applicable Digital Satellite (DVB-S from Sky Digital and freesat) - Deployed as - 12 x universal DVB-S/DVB-T outputs - Presentation via female BS EN 60169-24 (F-connectors) | | | Aerial system installed into server room. | P2 Payment Commencement Requirement |

Appendix

Schedule of Key Performance Indicators

Where defined terms are used in this Appendix to Section 3 of Schedule 3 (*Performance Measurement*) that are not defined in Schedule 1 (*Definitions, Interpretation and Construction*), such terms shall be interpreted in accordance with the definitions contained in Schedule 1 of the Project Agreement, relative to the distinct component of the KPI.

Table 1: WEPCo Performance

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|---|--|--|---|--|--|-----|
| 1. WEPCo Governance & Community Benefits | | | | | | |
| 1.1 | Compliance with management systems. | Compliance against the management systems requirements referred to in Section 2 (<i>Management Systems</i>) of Schedule 3 of this Agreement, save as set out at KPI 1.2 below. | <p>How measured: By external audit of compliance with the management system obligations contained in Section 2 (<i>Management Systems</i>) of Schedule 3 of this Agreement and reported in the WEPCo Performance Report</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: Annual reporting of results in respect of WEPCo</p> | Comply with management systems requirements referred to in Section 2 (<i>Management Systems</i>) of Schedule 3 (including carrying out audits) and implement any remedial actions points resulting from the audit. Corrective actions to be implemented within three (3) months. | Yes, if corrective action is not undertaken within the required timeframe. | Yes |

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|-----|---|--|---|---|----------------------------|------------|
| 1.2 | <p>Staff Performance Management.</p> <p><i>Only applicable if WEPCo has employees.</i></p> | <p>Measurement to be linked to results for internal audits of the staff performance appraisals with a minimum audit frequency of twelve (12) months. Contained within the staff performance audit process in the management systems.</p> | <p>How measured: Internal audits undertaken to confirm staff performance appraisals undertaken timeously and reported in WEPCo Performance Report</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: Annual reporting of results in respect of WEPCo</p> | <p>Any failure to undertake performance appraisals and audit the carrying out of performance appraisals or to undertake corrective actions identified in audit within three (3) months.</p> | <p>No</p> | <p>Yes</p> |
| 1.3 | <p>Active involvement in the SPB.</p> | <p>Using a Strategic Partnering Board Satisfaction Survey, including delivery of the Ongoing Partnering Services and Project Development Partnering Services Value for Money criteria, and producing an action plan based on the results of said survey.</p> | <p>How measured: Results from Strategic Partnering Board Survey and appropriateness of action plan reported in WEPCo Performance Report</p> <p>By whom: WEPCo</p> <p>Frequency: Annual reporting of results in respect of WEPCo</p> | <p>[To be agreed on development of survey at Selected Bidder stage].</p> | <p>No</p> | <p>Yes</p> |
| 1.4 | <p>Overall Satisfaction with Ongoing Partnering Services Value for Money.</p> | <p>Assessment of the delivery of the Ongoing Partnering Services Value for Money criteria as detailed at paragraph 1.2.3(b) of Schedule 3 of this Agreement on an annual basis for applicable projects.</p> | <p>How measured: Reporting on Value for Money criteria in WEPCo Performance Report</p> <p>By whom: WEPCo</p> <p>Frequency: Annual reporting of results in respect of WEPCo</p> | <p>Annual review to be completed within the year and performance in compliance with paragraph 1.2.3(b) of Schedule 3 of this Agreement.</p> | <p>No</p> | <p>Yes</p> |

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|-----|--|---|--|---|----------------------------|--------------------------|
| 1.5 | Delivery against Business Plan | WEPCo has a current Business Plan signed off by WEPCo's Board and Shareholders with clear in-year objectives identified. WEPCo to demonstrate delivery of the objectives contained in the Business Plan through regular reporting on delivery to WEPCo's Board and the SPB. | <p>How measured: Ensuring quarterly WEPCo Board reports identify delivery against the in-year plan, accepting in year variation to objectives and reported in WEPCo Performance Report.</p> <p>By whom: WEPCo</p> <p>Report to: SPB</p> <p>Frequency: Annual reporting of quarterly and annual obligations in respect of WEPCo</p> | <p>Business Plan approved by WEPCo's Board and Shareholders in accordance with WEPCo's Shareholders' Agreement and quarterly reporting on delivery of the objectives within such plan on a quarterly basis to WEPCo's Board and the SPB.</p> <p>No tolerance – one hundred per cent (100%) reporting.</p> | No | Yes |
| 1.6 | Delivering Baseline, Additional and Enhanced Community Benefits | Delivery of the baseline, [additional and enhanced] Community Benefits set out in Tables 3 and 4 of this Appendix to Schedule 3 (<i>Schedule of Key Performance Indicators</i>). | <p>How measured: Measured as set out in Tables 3 and 4 below.</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: To be reported as a standing agenda item for SPB on an annual basis.</p> | See Tables 3 and 4 below. | See Tables 3 and 4 below | See Tables 3 and 4 below |

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|-------------------------------|--------------------------|---|---|--|----------------------------|------------|
| 2. Project Development | | | | | | |
| 2.1 | Stage 1 Programme | Compliance with the timescale required for Stage 1 Submissions in respect of each New Project Request under the terms of this Agreement. | <p>How measured: Actual programme delivery against the required timescale, for all New Projects under development (Stage 1).</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: To be reported as a standing agenda item for SPB on an annual basis.</p> | <p>Stage 1 target – three (3) months (or such longer period permitted pursuant to the terms of this Agreement).</p> <p>Percentage (%) average exceedance not to exceed fifty per cent (50%).</p> <p>Percentage (%) one Project exceedance not to exceed one hundred per cent (100%).</p> | No | Yes |
| 2.2 | Stage 2 Programme | Compliance with the timescale submitted for Stage 2 Submissions in respect of each New Project Request under the terms of this Agreement. | <p>How measured: Actual programme delivery against the required timescale, for all New Projects under development (Stage 2).</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: To be reported as a standing agenda item for SPB on an annual basis.</p> | <p>Stage 2 target – delivery against Stage 1 submission programme for the Stage 2 development phase.</p> <p>Percentage (%) average exceedance not to exceed twenty five per cent (25%).</p> <p>Percentage (%) one Project exceedance not to exceed fifty per cent (50%).</p> | No | Yes |

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|-----|---|---|--|--|----------------------------|------------|
| 2.3 | Stage 1 and Stage 2 Approvals. | Percentage (%) of Stage 1 and Stage 2 Submissions that meet the Approval Criteria and become Approved Projects (except when the Relevant Participant elects not to proceed to Financial Close). | How measured: Number of approvals By whom: WEPCo Reported to: SPB Frequency: To be reported as a standing agenda item for SPB on an annual basis. | More than eighty per cent (> 80%) over a rolling twelve (12) month period. | Yes | Yes |
| 2.4 | Compliance with New Project Development Partnering Services Value for Money (VfM) proposals. | By internal and external auditing of Value for Money: Stage 1 - Achievement of VfM criteria as detailed at paragraph 1.3.3 of Schedule 3, of this Agreement and demonstration of Value for Money as required pursuant to paragraph 4.2.1 of Schedule 5 (<i>New Project Approval Process</i>), in respect of each New Project Request; Stage 2 - i. Achievement of VfM criteria as detailed at paragraph 1.3.3 of Schedule 3, of this Agreement and | How measured: Compliance with VfM obligations for each New Project, reported in WEPCo Performance Report By whom: WEPCo Reported to: SPB Frequency: Annual reporting of results in respect of WEPCo | Compliance with VfM obligations for each New Project as set out in column 3 of this KPI 2.4. | Yes | Yes |

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) |
|-----|--|---|---|--|----------------------------|
| | <p>demonstration of Value for Money as required pursuant to paragraph 5.4.1 of Schedule 5 (<i>New Project Approval Process</i>), in respect of each New Project Request; and</p> <p>ii. <i>[Bidders to propose specific targets and commitments relating to securing Value for Money through the Tender Process, including the management of pricing during the Tender Process.]</i>¹</p> | | | | |
| 2.5 | Deliverability of Stage 1 and Stage 2 within the Affordability Cap | Notwithstanding KPI 2.3 above, failure to deliver a New Project within/below the Affordability Cap. | <p>How measured: Failure to deliver within/below the Affordability Cap, reported in the in WEPCo Performance Report.</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: To be reported as a standing agenda item for the SPB on an annual basis.</p> | Zero failures. | Yes |

¹ Bidders to propose and to be discussed in dialogue.

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|---|---|---|--|--|----------------------------|------------|
| 3. Project Service Provider Monitoring and Reporting | | | | | | |
| 3.1 | Monitoring and Reporting of the Project Service Provider's management of Supply Chain Members, against the Method Statement for ongoing management of the supply chain for each New Project. | In respect of any Approved Project, WEPCo monitoring and reporting of the Project Service Provider's management of supply chain against the requirements in Schedule 3 of this Agreement. | How measured: Monitoring and reporting on evidence of audit compliance, completed by each Project Service Provider for each Project and reported in WEPCo Performance Report. By whom: WEPCo Reported to: SPB Frequency: To be reported as a standing agenda item for the SPB on an annual basis | To report on the agreed frequency i.e. at annual SPB review. | No | Yes |
| 3.2 | Monitoring and Reporting on Project Service Provider Energy performance during the construction phase and operation phase (where relevant) | In respect of any Approved Project, WEPCo monitoring and reporting of Project Service Provider's performance on the Project Agreement KPIs 5.1 and 5.2 in Table 2 below. | How measured: Monitoring and reporting on KPI performance i.e. compliance and variances with the Project Agreement KPIs in Table 2 below and reported in WEPCo Performance Report. By whom: WEPCo Reported to: SPB Frequency: To be reported as a standing agenda item for the SPB on an annual basis.. | To report on the agreed frequency i.e. at annual SPB review. | No | Yes |

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|-----|--|--|---|--|----------------------------|------------|
| 3.3 | Monitoring and Reporting on Project Service Provider BIM performance during construction phase and operation phase (where relevant) | In respect of any Approved Project, WEPCo monitoring and reporting of Project Service Provider's performance on the Project Agreement BIM KPIs in section 7 of Table 2 below. | <p>How measured: Monitoring and reporting on KPI performance i.e. compliance and variances with the Project Agreement KPIs and reported in WEPCo Performance Report.</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: To be reported as a standing agenda item for the SPB on an annual basis.</p> | To report on the agreed frequency i.e. at annual SPB review. | No | Yes |
| 3.4 | Project Service Provider Health and Safety (collating and reporting H&S data) | In respect of any Approved Project, WEPCo monitoring and reporting of Project Service Provider's performance of the H&S KPIs at section 1 of Table 2 below through H&S data provided by each Project Service Provider on each Project (RIDDER, Enforcement Notices and Near Misses). | <p>How measured: Monitoring and reporting on KPI performance i.e. compliance and variances with the Project Agreement KPIs and reported in WEPCo Performance Report.</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: To be reported as a standing agenda item for the SPB on an annual basis.</p> | To report on the agreed frequency i.e. at annual SPB review. | No | Yes |

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|-----|---|--|---|--|----------------------------|------------|
| 3.5 | <p>Monitoring and Reporting on Project Service Provider construction KPIs (as detailed in Table 2 below), including:</p> <ul style="list-style-type: none"> • Delivery against the agreed construction programme; • Snagging • Defects | <p>In respect of any Approved Project, WEPCo monitoring and reporting of Project Service Provider's performance on the relevant Project Agreement KPIs in sections 3 and 4 of Table 2 below.</p> | <p>How measured: Monitoring and reporting on KPI performance i.e. compliance and variances with the Project Agreement KPIs and reported in WEPCo Performance Report.</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: To be reported as a standing agenda item for the SPB on an annual basis.</p> | To report on the agreed frequency i.e. at annual SPB review. | No | Yes |
| 3.6 | <p>Monitoring and Reporting on Project Service Provider's operational KPIs (where relevant and as detailed in Table 2 below), including:</p> <ul style="list-style-type: none"> • Statutory testing • Post Occupancy Evaluation (POE) • Loss of Teaching Hours • Availability and Performance Deductions | <p>In respect of any Approved Project, WEPCo monitoring and reporting of Project Service Provider's performance on the relevant Project Agreement KPIs in section 9 of Table 2 below.</p> | <p>How measured: Monitoring and reporting on KPI performance i.e. compliance and variances with the Project Agreement KPIs and reported in WEPCo Performance Report.</p> <p>By whom: WEPCo</p> <p>Reported to: SPB</p> <p>Frequency: To be reported as a standing agenda item for the SPB on an annual basis.</p> | To report on the agreed frequency i.e. at annual SPB review. | No | Yes |

| KPI | KPI Measurement | How measured | Target | Significant Performance Failure (Yes/No) | Track Record Test (Yes/No) | |
|-----|---|---|---|--|----------------------------|-----|
| 3.7 | <p>Monitoring and Reporting on Project Service Provider Community Benefit performance.</p> | <p>In respect of any Approved Project, WEPCo monitoring and reporting on each Project Service Provider's performance on Approved Projects during the relevant year (by reference to the Dashboard Template for the relevant Project), in respect of delivery of the required Authority's Community Benefit Requirement KPIs, ACBR Enhancements and/or Additional Community Benefit Project Co Proposals at section 6 of Table 2 below and the Supply Chain Member responsible for such failures where applicable.</p> | <p>How measured: Monitoring and reporting on KPI performance i.e. compliance and variances with the Project Agreement KPIs and reported in WEPCo Performance Report.</p> <p>By whom: WEPCo</p> <p>Frequency: at the end of the Construction Phase and annually during the Operational Term, in respect of each Project Service Provider.</p> | To report on the agreed frequency i.e. at annual SPB review. | No | Yes |

Table 2: Project Service Provider Performance

Where KPIs relate to the performance of Project Service Providers and the failure to meet such KPI in respect of any Project Service Provider is a direct result of the performance of Supply Chain Members, WEPCo shall include details of such failure at Supply Chain Agreement level (including details of the responsible Supply Chain Member) in the WEPCo Performance Report.

| | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) | |
|-----------------------------|-------------------------|--|--|---|--------------------------------------|------------|
| 1. Health and Safety | | | | | | |
| 1.1 | RIDDOR Accidents | In respect of each Approved Project, the reporting of Reporting, Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR) on any such Project by a Project Service Provider or a Supply Chain Member | <p>How measured: Comparison of RIDDOR incidents reported by a Project Service Provider on any Project to WEPCo against HSE Accident Frequency Rate (AFR), for construction and hard FM – accidents per 1,000,000 hours and reported in WEPCo Performance Report (Section 2 on Project Service Provider Performance)</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and WEPCo to SPB.</p> <p>Frequency: In respect of each Project, to be reported as a standing agenda item for the SPB on an annual basis.</p> | Better than HSE average target for previous year in respect of each Project | No | Yes |

| | | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) |
|-----|----------------------------|---|--|---|--|---|
| 1.2 | Enforcement Notices | In respect of each Approved Project, the reporting of the number of HSE Enforcement Notices, raised in relation to each Project against a Project Service Provider or a Supply Chain Member. | <p>How measured: The number of enforcement notices reported by a Project Service Provider on any Project and reported in WEPCo Performance Report (Section 2 on Project Service Provider Performance)</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and WEPCo to SPB</p> <p>Frequency: In respect of each Project, to be reported as a standing agenda item for the SPB on an annual basis..</p> | Zero enforcement notices. | Yes | Yes |
| 1.3 | Near Misses | In respect of each Approved Project, the number of "near misses" identified on any Project. A "near miss" is defined as being an event not causing harm but has the potential to cause injury or ill health, including dangerous occurrences. | <p>How measured: As reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance).</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and WEPCo to SPB</p> | [◆] ² number of near misses, or as otherwise agreed on a Project by Project basis. | No | Yes |

² Tenderers to propose and to be discussed in dialogue.

| | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) | |
|--|---------------------------------------|--|---|--|--------------------------------------|------------|
| | | Frequency: In respect of each Project, to be reported as a standing agenda item for the SPB on an annual basis.. | | | | |
| 2. Management and Reporting Systems | | | | | | |
| 2.1 | Supply Chain Management | Compliance with the Project Service Provider's role to monitor performance of the Services and manage its supply chain, as described in the Ongoing Partnering Services Method Statement. Measurement to be linked to results of internal/external audits of compliance (including under clause 26.1 and 26.2 of the Project Agreement), in accordance with the audit process contained in the management systems. | How measured: Evidence of audit compliance as reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance). By whom: Project Service Provider Reporting to: WEPCo and WEPCo to SPB Frequency: In respect of each Project, to be reported to the SPB on an annual basis.. | A failure to comply with requirements or undertake audits or undertake corrective actions identified in audit. | No | Yes |
| 3. Construction | | | | | | |
| 3.1 | Project Construction Programme | In respect of each Approved Project, delivery against Completion Date and Programme (percentage (%) exceedance of the Completion Date in the Project Agreement for each Project against the Actual Completion Date | How measured: Average length of programme for cumulative Project and actual length for any one Project, against the target construction programme under the relevant Project Agreement | Percentage (%) average exceedance not to exceed twenty five per cent (25%). | No | Yes |

| | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) |
|--------------------------------|---|---|---|---|--------------------------------------|
| | including, for the avoidance of doubt, any extension of time granted under the relevant Project Agreement). | <p>as reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance).</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and WEPCo to SPB</p> <p>Frequency: In respect of each Project following construction completion, to be reported to the SPB on an annual basis.</p> | Percentage (%) one Project exceedance not to exceed fifty per cent (50%). | | |
| 4. Construction Quality | | | | | |
| 4.1 | Defects | <p>In respect of each Approved Project, measurement of performance of construction contractor Supply Chain Member in regards to making good defects (reporting post completion) to the required twelve month timescale.</p> <p>How measured: As reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance).</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and WEPCo to SPB</p> <p>Frequency: In respect of each</p> | Zero defects twelve (12) months following construction completion in respect of each Project. | No | Yes |

| | | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) |
|-----|-----------------|---|--|---|---|--------------------------------------|
| | | | Project following construction completion, to be reported to the SPB on an annual basis. | | | |
| 4.2 | Snagging | In respect of each Approved Project, completion of all Snagging Items within overall 20 Business Day allowance under Project Agreement (or such longer period permitted under the terms of the relevant Project Agreement). | <p>How measured: Number of Snagging Items outstanding after three (3) months and six (6) months on a Project by Project basis as reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance).</p> <p>By whom: Project Service Provider.</p> <p>Reporting to: WEPCo and WEPCo to SPB</p> <p>Frequency: In respect of each Project following construction completion, to be reported to the SPB on an annual basis.</p> | <p>Less than five per cent (<5%) Snagging Items outstanding at three (3) months.</p> <p>No Snagging Items outstanding at six (6) months.</p> | No | Yes |

| | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) | |
|--------------------------|-----------------------|---|--|---|--------------------------------------|-----|
| 5. Sustainability | | | | | | |
| 5.1 | BREEAM | In respect of each Approved Project, achievement of BREEAM targets. Pass/Fail on agreed BREEAM criteria e.g. construction waste and the use of recycled materials. | <p>How measured: BREEAM classification achieved against agreed level in Project Agreement i.e. Excellent, as reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance).</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and WEPCo to SPB</p> <p>Frequency: In respect of each Project following construction completion and BREEAM award, to be reported to the SPB on an annual basis.</p> | One hundred per cent (100%) of Projects achieving required standard. | Yes | Yes |
| 5.2 | Energy Targets | In respect of each Approved Project which is a MIM Project achievement of the modelled energy targets in compliance with the terms of the relevant Project Agreement. | <p>How measured: Achievement of energy targets by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider</p> | Less than eighty per cent (<80%) compliance against the modelled energy target for any Project. | No | Yes |

| | | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) |
|------------------------------|-----------------|--|---|--|---|--------------------------------------|
| | | | Performance). By whom: Project Service Provider Reporting to: WEPCo and WEPCo to SPB Frequency: In respect of each Project following construction completion (for the first three years), to be reported to the SPB on an annual basis. | | | |
| 6. Community Benefits | | | | | | |
| 6.1 | Baseline | In respect of any Approved Project, the Project Service Provider fails to comply with the Authority's Community Benefit Requirement KPIs | How measured: As reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance). WEPCo Performance Report By whom: Project Service Provider Reporting to: WEPCo and WEPCo to SPB Frequency: At the end of the Construction Phase and annually during the Operational Term, in respect of each Project | One hundred per cent (100%) of Authority's Community Benefit Requirement KPIs complied with. | No | Yes |

| | | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) |
|-----|--------------------------------|--|--|---|---|--------------------------------------|
| | | | Service Provider, to be reported to the SPB on an annual basis. | | | |
| 6.2 | Enhanced and Additional | In respect of any Approved Project, the Project Service Provider fails to comply with the ACBR Enhancements or Additional Community Benefit Project Co Proposals | <p>How measured: As reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance).</p> <p>WEPCo Performance Report</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and WEPCo to SPB</p> <p>Frequency: At the end of the Construction Phase and annually during the Operational Term, in respect of each Project Service Provider, to be reported to the SPB on an annual basis.</p> | One hundred per cent (100%) of the ACBR Enhancements and Additional Community Benefit Project Co Proposals complied with. | No | Yes |

| | | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) |
|---------------|--------------------------------|--|---|---|---|--------------------------------------|
| 7. BIM | | | | | | |
| 7.1 | Common Data Environment | In respect of any Approved Project, the Project Service Provider fails to maintain Common Data Environment in compliance with Information Requirements as evidenced by Information Manager | <p>How measured: Evidence of audit compliance as reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance).</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and WEPCo to SPB</p> <p>Frequency: to be reported to the SPB on an annual basis.</p> | A failure to comply with the requirements or undertake corrective actions identified in audit. | Yes | Yes |
| 7.2 | Data Drops | In respect of any Approved Project, the Project Service Provider, compliance with data drops on required dates or incomplete information | <p>How measured: Number of outstanding documents outstanding at data drop date as reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance).</p> <p>By whom: Project Service Provider</p> <p>Reporting to: WEPCo and</p> | <p>[Less than five per cent (<5%) documents outstanding at data drop stage.</p> <p>None outstanding within 1 month.]</p> | No | Yes |

| | | KPI Measurement | How measured | Target | Significant Performance Failure of Project Agreement (Yes/No) | Track Record Test for WEPCo (Yes/No) |
|-------------------------|--------------------------------|--|--|--|---|--------------------------------------|
| | | | WEPCo to SPB Frequency: to be reported to the SPB on an annual basis. | | | |
| 7.3 | Security | In respect of any Approved Project, Project Service Provider, compliance with security requirements | How measured: Evidence of audit compliance as reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance). By whom: Project Service Provider Reporting to: WEPCo and WEPCo to SPB Frequency: to be reported to the SPB on an annual basis. | A failure to comply with requirements or undertake corrective actions identified in audit. | Yes | No |
| 8. Soft Landings | | | | | | |
| 8.1 | Soft Landings Framework | In respect of any Approved Project, Project Service Provider, compliance with Soft Landings Framework (as such term is defined in the Service Level Specification) in respect of each MIM Project. | How measured: Evidence of audit compliance as reported by a Project Service Provider on any Project and reported in the WEPCo Performance Report (Section 2 on Project Service Provider Performance). By whom: Project Service | A failure to comply with requirements or undertake audits or undertake corrective actions identified in audit. | Yes | Yes |

WEP Strategic Partnering Delivery Model

Template WEPCo Shareholders' Agreement

ITPDSB Version (Standard Form Version 1.3)

TEMPLATE WEPCO SHAREHOLDERS' AGREEMENT

VERSION 1

IMPORTANT NOTICE

This is the first version of the Welsh Education Partnership ("**WEP**") Strategic Partnering Delivery Model standard form of WEPCo Shareholders' Agreement, the intention of which is to minimise the time and costs of dealing with legal issues relating to the WEP Strategic Partnering Delivery Model.

Users of this standard form should be aware of the following points:

1. This is the Template WEPCo Shareholders' Agreement (the "**Template WEPCo Shareholders' Agreement**") as referred to in and set out in Section 3 of Schedule 7 (*Template Project Agreement*) of the Strategic Partnering Agreement ("**SPA**"). Under the terms of the SPA, the parties are obliged to use this Template WEPCo Shareholders' Agreement in conjunction with the SPA, subject to the amendments described below.
2. All footnotes (and optional drafting) should be used/deleted as appropriate and in accordance with the guidance contained therein. It should be noted other derogations to the Template WEPCo Shareholders' Agreement are strongly discouraged and it is expected Welsh Government approval will be strictly limited to changes that represent value for money and are required for project specific reasons, or to reflect changing Welsh Government guidance or demonstrable changing market circumstances.
3. Clause and paragraph numbering should be preserved through the use of lettered additions and "not used" deletions. Automatic numbering and hyperlinked cross references should be maintained.
4. All parties are reminded that the WEP Strategic Partnering Delivery Model is a true partnering arrangement and the value of further debate over insubstantial issues should be considered in this light.
5. The Template WEPCo Shareholders' Agreement is not a replacement for independent, specialist advice and the Shareholders must ensure that they have taken appropriate legal, financial and technical advice before using it.
6. Should you have any questions on the draft you are asked to contact MIMEducation@gov.wales

WEP STRATEGIC PARTNERING DELIVERY MODEL TEMPLATE WEPKO SHAREHOLDERS' AGREEMENT

THIS AGREEMENT is made on

20◆

Among:

- (1) [Private Sector Delivery Partner]¹ (Company No. ◆) whose registered office is at ◆ (PSDP);
- (2) [WGCo Limited]² (Company No. ◆) whose registered office is at ◆ (WGCo); and
- (3) [Name of WEPKO/Company]³ (Company No. ◆) whose registered office is at ◆ (Company).

Background:

- (A) Pursuant to this Agreement the PSDP and WGCo have agreed to subscribe for shares in the Company [and to advance monies to the Company (as debt)] and, on completion of the subscriptions referred to in clause 4.1 (*Initial subscriptions of Shares*), and completion of advances referred to in clause 4.2 (*Shareholder Debt*) the Shares held by each of those parties [and the amount of Shareholder Debt advanced to the Company by each of those parties] will be as set out in the Data Sheet.
- (B) The Company is a limited liability company registered in [England and Wales].
- (C) The Company has been established for the sole purpose of providing (or procuring) the Services described in the Strategic Partnering Agreement.
- (D) The parties have agreed that the respective rights and obligations of Shareholders in the Company shall be governed by the provisions of this Agreement and that the Company Business shall be conducted in accordance with the provisions of this Agreement.

IT IS AGREED:

1. Definitions and interpretation

This Agreement shall be interpreted according to the provisions of Schedule 1 (*Definitions and Interpretation*).

¹ **Parties - PSDP.** For ease of reference, this standard form anticipates the "PSDP" being a single company. It is recognised that the "PSDP" may comprise a number of parties. In this case this standard form will require amendment.

² **Parties - WGCo.** The identity of this entity is to be confirmed. Beyond the initial funding commitment pursuant to clause 4 of this Agreement, as with the PSDP, there will not be any recourse against the shareholders.

³ **Company** - This document has been drafted on the premise that the Company is registered in England and Wales.

2. Commencement and duration

Conditions precedent

- 2.1 The obligations set out in clause 13.7 (*Confidentiality*) shall commence:
- (a) in relation to the Founder Shareholders and the Company, on the execution of this Agreement; and
 - (b) in relation to any person becoming a Shareholder after the date of this Agreement (a "**New Shareholder**"), on the execution of the Deed of Adherence.
- 2.2 Save as set out in clause 2.1 (*Conditions precedent*), this Agreement shall come into effect:
- (a) in relation to Founder Shareholders and the Company, on the completion of the matters set out in clause 4.1 (*Initial subscriptions of Shares*); and
 - (b) in relation to a New Shareholder, on the registration of the New Shareholder as a Shareholder in the Company.

Termination in relation to a party ceasing to hold Shares in the Company

- 2.3 Immediately following the earlier of the termination of this Agreement and it ceasing to hold any Shares in the Company, a party shall cease to have any rights or obligations under this Agreement save for:
- (a) its obligations under clause 5.8 and 5.9 (*Composition of the Company Board and the right to appoint Directors*);
 - (b) its rights and obligations under clause 8.16 (*Provision of information to Shareholders and designated third parties*), clause 11 (*Disputes*) and clause 13 (*Miscellaneous*);
 - (c) its liability for any breaches prior to it ceasing to hold any Shares;
 - (d) any rights or cause of action that arose prior to it ceasing to hold any Shares; and
 - (e) its rights to receive any payment in connection with the transfer of its Shares.

Termination

- 2.4 Save as provided in clause 2.3 (*Termination in relation to a party ceasing to hold Shares in the Company*) this Agreement shall continue in full force and effect until the earliest of the following dates:
- (a) the date on which the Company is wound up; or
 - (b) the date on which all the Shareholders agree in writing to terminate this Agreement.
- 2.5 [If termination occurs the Company shall (if not already in liquidation) be placed into voluntary liquidation in accordance with clause 12 (*Winding Up*) and, after payment of liabilities, its assets shall be distributed to the Shareholders in the same proportions as the Shareholders' holdings of shares at the time of the determination.]

3. The business of the Company and details of the Company

- 3.1 The business of the Company is to provide (or procure) the Services.

3.2 Details of the Company following the share subscriptions referred to in clause 4 (*Funding of the Company and financial matters*) and board appointments referred to in clause 5 (*The Board of the Company*) will be as detailed in Schedule 2 (*Details of the Company*).

4. Funding of the Company and financial matters

Initial subscriptions of Shares

4.1 Immediately upon the execution of this Agreement by each of the parties, the parties shall take or procure to be taken the following steps either by themselves or at meetings of the Company Board or of the members of the Company to the extent not already taken:

- (a) the parties shall procure that the necessary Company Board and/or shareholder resolutions in respect of the Company are passed to adopt the Company Articles with immediate effect;
- (b) the following subscriptions shall be made in the capital of the Company:
 - (i) the PSDP shall subscribe for the number of B Shares as set out opposite its name in the Data Sheet; and
 - (ii) WCo⁴ shall subscribe for the number of A Shares as set out opposite its name in the Data Sheet,

following which the Company shall deliver the relevant definitive share certificates in relation to the allotment of such Shares and shall insert the names of the allottees in the register of members of the Company.

4.2 *[Shareholder Debt]*

[In respect of Shareholder Debt:

- (a) the PSDP undertakes to advance to the Company the amount of Shareholder Debt as set out opposite its name in the Data Sheet; and
- (b) WCo undertakes to advance to the Company the amount of Shareholder Debt as set out opposite its name in the Data Sheet,

following which the Company shall deliver any relevant certificates in relation to such Shareholder Debt and shall insert the names of the Shareholders in the relevant registers.]⁵

Further capital required for the Company

4.3

- (a) No Shareholder shall be required to subscribe for any further Shares or to provide any additional funding for the Company (or guarantees or indemnities on behalf of the Company or any other WEP Company) which, for the avoidance of doubt, shall include any additional funding by way of shareholder loans and/or required to increase the working capital requirements of any WEP Company or advancing or

⁴ **Clause 4.1(b)(ii)– Level of WCo investment.** The intended level of the WCo investment will be 20% of the issued share capital/debt.

⁵ It is envisaged this will be in the form of loan notes.

making available any Indebtedness to any WEP Company. For the avoidance of doubt, neither approval of:

- (i) the Business Plan or any change from time to time;
- (ii) a Stage 2 Submission;
- (iii) any increase in the Indebtedness of any WEP Company; or
- (iv) any other matter pursuant to this Agreement,

shall bind or commit any Shareholder to subscribe for Shares or to provide any additional funding for the Company (or any guarantee or indemnity on behalf of the Company or any other WEP Company) which, for the avoidance of doubt, shall include any additional funding by way of shareholder loans and/or required to increase the working capital requirements of any WEP Company or advancing or making available any Indebtedness to any WEP Company unless that Shareholder has expressly agreed in writing to do so.

- (b) The Company shall not allot any Shares to any person (other than a Shareholder) unless that person has first executed a Deed of Adherence in the form set out in Schedule 4 (*Deed of Adherence*).
- (c) If, in the opinion of the Company Board, the Company requires further funding, the Company Board shall, having consulted with the Shareholders in accordance with clauses 6.8 to 6.11 (*Shareholders' Forum*), determine how the Company should obtain such additional funding, whether by way of the allotment of Shares, by obtaining additional debt finance, or such other means as the Company Board may determine.
- (d) If the Company Board determines to allot further Shares, such Shares shall (except to the extent that all the Shareholders otherwise agree in writing) be allotted in accordance with the provisions of sub-clauses (e) to (i) below.
- (e) On the allotment of Shares, the number of Shares in each class offered for allotment by the Company shall be pro rata the number of Shares in each class then in issue.
- (f) If the Company Board determines to allot Shares in the Company, the Company Board shall, of the Shares to be allotted, first offer each class of Shares pro rata to those persons' existing holdings of Shares in that class ("**first offer**").
- (g) To the extent that any first offer is not accepted by some of the persons in the relevant category, the Company Board shall offer the remaining Shares in that class to the persons in that category who have accepted that first offer pro rata to their existing holdings of Shares ("**second offer**"). To the extent that any second offer is not accepted by some of the persons in any category, but is accepted by other persons in that category, the Company Board shall make such subsequent offers mutatis mutandis to those persons who have accepted the second offer and (if one subsequent offer fails to achieve the allotment of all the Shares in that class) any subsequent offers (if any), until all the Shares belonging to that class have been accepted by persons in that category or (failing acceptance) until there are no persons in that category willing to take further Shares.
- (h) To the extent that any first, second offer and any subsequent offers made pursuant to sub-clause (g) above (as applicable) fail to achieve the allotment of all the Shares in any class the Company Board shall offer the remaining Shares to the holder of the other class of shares, pro rata to their holdings following the first, second and any

subsequent offers (as applicable) ("**third offer**"). To the extent that any third offer is not accepted by some of the persons in that category, but is accepted by other persons in that category, the Company Board shall make such subsequent offers mutatis mutandis to those persons who have accepted the third offer and (if one subsequent offer fails to achieve the allotment of all the Shares) any subsequent offers (if any), until all the Shares have been accepted or (failing acceptance) until there are no persons in that category willing to take further Shares.

- (i) To the extent that the third offer and any subsequent offers in relation to any class of Shares are not accepted, the Company Board may offer the remaining Shares to any Suitable Third Party.

Offers to Allot

4.4 Each offer shall be made by the Company Board by notice in writing (an "**Offer to Allot**") and in the case of Shareholders shall be served at their address for service set out in clause 13.18 (*Notices*) and on New Shareholders at the address for service notified to the Company by such New Shareholder.

- (a) Each Offer to Allot shall:
 - (i) specify the total number of Shares which are on offer;
 - (ii) specify the number of Shares for which the recipient of the Offer to Allot may subscribe;
 - (iii) specify the price per Share and the date when the price shall be payable (which may be expressed by reference to the expiry of a specified period after the receipt of notices of acceptance in respect of all the Shares offered for allotment or (if later) expiry of the last of the Offers to Allot required to be issued);
 - (iv) specify the period during which the Offer to Allot will remain open for acceptance, which for a first offer shall be seven (7) Business Days after the date of service of the Offer to Allot and for all other offers five (5) Business Days after the date of service of the Offer to Allot; and
 - (v) contain a statement to the effect that the Offer to Allot shall not be deemed to be accepted until the Company Board has either received notices of acceptance in respect of all the Shares offered for allotment or, having received notices of acceptance in respect of less than all the Shares offered for allotment, has elected to issue such Shares notwithstanding that notices of acceptance have not been received in respect of all the Shares offered for allotment.
- (b) After the expiry of each Offer to Allot the Company Board shall as soon as practicable make such additional offers as may be necessary in accordance with this clause 4 (*Funding of the Company and financial matters*). For the avoidance of doubt, the Company Board shall not be under any obligation to make an offer to a Suitable Third Party under clause 4.3.
- (c) Any Shares issued pursuant to the procedures set out in this clause 4 shall be designated as the same class of Shares as the Shares already held by the relevant allottee. If the relevant allottee is not already a Shareholder the Shares shall, unless agreed otherwise by the Shareholders together holding a majority of the A Shares and the Shareholders together holding a majority of the B Shares, be designated as A

Shares where the allottee is a public sector or third sector body or as B Shares where the allottee is a private sector body.

- (d) Each of the Shareholders agrees to approve any resolution put to a general meeting of the Company to renew the authority of the Directors to allot Shares in the Company.

Additional Shareholder Debt

4.5 The provisions of clause 4.3 (*Further capital required for the Company*) and clause 4.4 (*Offers to Allot*) relating to any additional issue of Shares shall apply with the necessary changes to any further issue of/borrowing of Shareholder Debt.

4.6 Without prejudice to clause 4.3, but subject to clause 4.8, each Shareholder shall advance the amount of Shareholder Debt set out against its name in each Stage 1 Submission approved and submitted by the Company under the Strategic Partnering Agreement in accordance with any timetable for such subscription or advance set out in the Stage 1 Submission.

4.7 Notwithstanding clause 4.5 (*Additional Shareholder Debt*), where:

- (a) the Project to be implemented pursuant to a Stage 2 Submission requires subordinated debt to be provided to any WEP Company; and/or
- (b) there is any other proposal for Shareholder Debt to be provided to any WEP Company;

the Company shall ensure that each of the Shareholders is given the option to agree to:

- (c) advance monies (in aggregate equal to the required amount) as Shareholder Debt on a pari passu basis pro rata to their respective holding of Shares; or
- (d) have one or more of its Associates (or in the case of the B Shareholder, one or more of the B Shareholder Members or its or their respective Associates) provide such advances wholly or partially in their place.

Where a Shareholder (or any related party listed in clause 4.7(d) in place of that Shareholder) does not exercise its option under this clause 4.7 in respect of the full amount referred to in clause 4.7, the balance shall be offered, as an option on like terms to this clause 4.7, to the remaining Shareholders holding Shares of the same class first (pro rata to their holdings) and thereafter to the other Shareholders, on a basis consistent with the table at clause 4.3 (and on the basis that the sequence of offers, and the terms and conditions of such offers, shall reflect (so far as reasonably appropriate) the provisions of clause 4.3(f) to 4.3(i) and clause 4.4).

4.8 Where clause 4.7 applies, no Stage 2 Submission shall be made in respect of any Project which requires the provision of funds which would constitute Shareholder Debt unless:

- (a) the provisions of clause 4.7 have been complied with (except to the extent that all the Shareholders have otherwise agreed in writing); and
- (b) there is attached to such Stage 2 Submission a written agreement from all relevant Shareholders who are to advance Shareholder Debt in terms of the Stage 2 Submission to the making of such Stage 2 Submission including the requirement for such Shareholder Debt to be so provided by them (or their respective Associates or, in the case of the B Shareholder, one or more of the B Shareholder Members or its or their respective Associates).

5. The Board of the Company

Composition of the Company Board and the right to appoint Directors

- 5.1 Without prejudice to any right of the Shareholders to appoint Alternates under clause 5.4 and a Chairman under clause 5.11, the Shareholders shall be entitled in accordance with the Company Articles to nominate and appoint (and the Company shall procure that such persons are appointed by Company Board resolution) persons as Directors of the Company and to require the removal of such persons from office as set out below:
- (a) the Shareholder[s] holding the majority of the A Shares shall be entitled to nominate and appoint one Director (the “**A Director**”) and to remove the A Director from office; and
 - (b) the Shareholder[s] holding a majority of the B Shares shall be entitled to nominate and appoint [three] Directors (each a “**B Director**”) and to remove B Directors from office.
- 5.2 The persons nominated and appointed by the parties to act as initial Directors are:
- (a) the A Director: [*Insert name*]; and
 - (b) the B Directors: [*Insert names*].
- 5.3 Any Director who is not an employee of the Company shall be appointed upon the terms and conditions set out in Schedule 9 (*Letters of appointment of Nominated Directors*) or such other terms as the Company Board may agree from time to time.
- 5.4 The Shareholders nominating and appointing each of the Directors pursuant to clause 5.1 shall in addition be entitled, in accordance with the Company Articles, to nominate and appoint one (1) person as an Alternate and to replace such person(s) as an Alternate from time to time (provided such Alternate shall be registered as a Director at Companies House).
- 5.5 Subject to:
- (a) clauses 5.6, 5.7 and the Articles, the quorum for Company Board meetings shall comprise one A Director and at least [two] B Directors (or their respective Alternates). At Company Board meetings each Director shall have one vote; and
 - (b) the Articles, if a Shareholder has more than one (1) Director appointee under clause 5.1 (*Composition of the Company Board and the right to appoint Directors*) but not all of such appointees (or their Alternates) are present at the Board meeting then the other Director(s) present appointed by that Shareholder shall be entitled to vote each relevant absent Director's vote.
- 5.6 If within thirty (30) minutes of the time for the relevant meeting there is not a quorum of Directors in attendance (in accordance with clause 5.5) at a Company Board meeting called in accordance with this clause 5 (*The Board of the Company*), then (unless the relevant Director(s) have given written waiver(s) in relation to his/her attendance) such meeting shall be adjourned in accordance with article [◆] of the Company Articles and when reconvened, such adjourned meeting called in accordance with this clause 5 to discuss substantially the same business shall, subject to the provisions of article [◆] of the Company Articles, be deemed to be quorate notwithstanding the fact that the relevant number of Director appointed by holders of Shares of that class may not be present.

- 5.7 If the holders of any class of Share fail to appoint the number of Directors it is required to appoint to satisfy the applicable quorum requirements under clause 5.5, then, if a Company Board meeting is called in accordance with this clause 5 and notice of the meeting is given to each of the holders of Shares of that class as if they were Directors, the meeting shall be deemed to be quorate notwithstanding the fact that the relevant number of Director(s) appointed by holders of Shares of that class may not be present.
- 5.8 If the holders of any class of Shares elect to remove any person nominated by them as a Director (the "**Outgoing Director**") then:
- (a) if the Outgoing Director is an employee and/or officer of any Shareholder, that Shareholder shall procure that the Outgoing Director vacates office without any claim against the Company for loss of office or otherwise and the Shareholder shall indemnify the Company against all losses, liabilities and costs which the Company may incur arising out of, or in connection with, any claim by the Outgoing Director for wrongful, unfair or constructive dismissal or redundancy or other loss arising out of the Outgoing Director's removal or loss of office; and
 - (b) if the Outgoing Director is not an employee and/or officer of any Shareholder, the holders of that class of Shares shall procure that the Outgoing Director vacates office without any claim against the Company for loss of office or otherwise and such holders of Shares shall indemnify the Company against all losses, liabilities and costs which the Company may incur arising out of, or in connection with, any claim by the Outgoing Director for wrongful, unfair or constructive dismissal or redundancy or other loss arising out of such Outgoing Director's removal or loss of office.
- 5.9 If any Shareholder (an "**Outgoing Shareholder**") ceases to hold Shares in the Company and:
- (a) the Outgoing Shareholder is the sole holder of the class of Shares which the Outgoing Shareholder holds and any Director appointed by virtue of the Outgoing Shareholder's holding of such Shares is an employee and/or officer of the Outgoing Shareholder or has been nominated as a Director by the Outgoing Shareholder pursuant to clause 5.1; or
 - (b) the Outgoing Shareholder is not the sole holder of the class of Shares which the Outgoing Shareholder holds but any Director appointed by the holders of such class of Shares is an employee and/or officer of the Outgoing Shareholder, or has been appointed as a Director pursuant to clause 5.1 by the Outgoing Shareholder as a holder of a majority of the relevant class of Shares,
- the Outgoing Shareholder shall procure that any such Director vacates office without any claim against the Company for loss of office or otherwise and the Outgoing Shareholder shall indemnify the Company against all losses, liabilities and costs which the Company may incur arising out of, or in connection with, any claim by such Director for wrongful, unfair or constructive dismissal or redundancy or other loss arising out of such Director's removal or loss of office.
- 5.10 Where a Director exercises or fails to exercise his voting rights in contravention of this Agreement, the Shareholders nominating that Director shall remove that Director from office and the Shareholders shall co-operate with each other as appropriate to revise and rectify the consequences of that Director's actions or omissions. In the event of such removal the provisions of clause 5.8 shall apply.

5.11

- (a) If the Shareholders unanimously agree to appoint an independent non-executive Chairman then the Chairman shall be appointed either on an annual basis or on such occasions as the Shareholders (acting in their absolute discretion) may unanimously agree, and the period of appointment shall be for such time as the Shareholders may unanimously agree (acting in their absolute discretion) from time to time. The Chairman appointed shall be a Director and his/her appointment shall be in addition to the appointments of Directors referred to in clause 5.2 (*Composition of the Company Board and the right to appoint Directors*). If a Chairman is unable to attend any meeting of the Company Board or of the Shareholders of the Company the Directors in attendance shall appoint one (1) of their number as the chair for that meeting to act in his/her place. An independent non-executive Chairman appointed under this sub-clause (a) shall not have a vote at either Company Board or Shareholder meetings.
- (b) If the Shareholders do not agree unanimously to appoint an independent non-executive Chairman under sub-clause (a) within one (1) month of the date of this Agreement then the Chairman shall be one (1) of the Directors appointed in accordance with clause 5.1 (*Composition of the Company Board and the right to appoint Directors*) who shall act as Chairman for six (6) months and thereafter the role of Chairman shall rotate every six (6) months between a Director appointee of each class of Shareholder by each class of Shareholder drawing lots, provided that such appointee shall not hold the role of Chairman for more than six (6) months in any twelve (12) month period. A Director appointed as Chairman under this sub-clause (b) shall not have a second vote by reason of his/her appointment as Chairman.

5.12 Resolutions of the Company Board shall be determined by a simple majority of votes cast for or against each resolution in accordance with this Agreement.

5.13 Unless otherwise agreed by all of the Directors, not less than ten (10) Business Days' notice (or such other period of notice as may be agreed from time to time by all of the Directors) of each meeting of the Company Board specifying the date, time and place of the meeting shall be given to all Directors at the relevant time. All meetings of the Shareholders and of the Company Board shall take place at such location as the Company Board shall agree and the Shareholders shall use all reasonable endeavours to procure that their respective Directors attend each such meeting and to procure that a quorum (in accordance with the provisions contained in this clause 5 and in the Company Articles) is present at each such meeting of which due notice has been given.

5.14 Unless otherwise agreed by the Company Board:

- (a) meetings of the Company Board shall be held not less than [quarterly] on such dates as they may agree (and failing such agreement on such day as the Chairman shall decide);
- (b) a telephone conference call or video conference or a combination of the same, at which all participants are able to speak to and hear each of the other participants and at which for all times at that meeting a quorum of the Directors is able to so participate, shall be valid as a meeting of the Company Board;
- (c) a resolution in writing signed by all the Directors entitled to receive notice of a Company Board meeting and vote at that meeting shall be as valid and effectual as if it had been passed at a meeting of the Company Board duly convened and held; and

- (d) any Director shall by notice to the Company and each other Director be entitled to convene a meeting of the Company Board on not less than ten (10) Business Days' notice.
- 5.15 Unless otherwise agreed by all of the Directors, all papers for meetings of the Company Board will be sent to all Directors not less than five (5) Business Days prior to the relevant meeting and, unless otherwise agreed by all of the Directors, draft minutes of meetings of the Company Board will be sent to each Director as soon as practicable after the holding of the relevant meeting.
- 5.16 [Notwithstanding any other provisions of this Agreement or of the Company Articles, if a Shareholder (the "**Relevant Shareholder**") is in material breach of its obligations under this Agreement or the Articles the Director(s) appointed by it shall be disenfranchised from voting at Company Board meetings unless and until that breach is remedied and no approval shall be required of the Relevant Shareholder's Directors for any Reserved Matter Board Approval matters. If there is a dispute as to whether a Relevant Shareholder is in material breach of its obligations under this Agreement then, pending determination, the Relevant Shareholder shall be deemed to be in material breach if each other class of Shareholders (excluding the Relevant Shareholder) each confirm in writing to the Relevant Shareholder that they consider the Relevant Shareholder to be in material breach setting out the basis of that breach, however the Relevant Shareholder may then refer the question of whether it is in material breach to the dispute resolution procedure in clause 11 (*Disputes*).]

Director remuneration

- 5.17 The Company shall pay Director remuneration as set out in clause 5.18 (*Director remuneration*). Any increase in any such remuneration other than in accordance with clause 5.18 (*Director remuneration*) is a Reserved Matter Board Approval.
- 5.18 The role of Director of the Company shall attract remuneration of £[◆]⁶ per annum (Index Linked). Such fee shall be due to the relevant Director, pro rata, monthly in arrears, from the date of his/her appointment and is payable within thirty (30) days of receipt of an invoice by the Company in respect of such fee.
- 5.19 In addition to the remuneration set out at clause 5.18 (*Director remuneration*), the Directors may be paid reasonable travelling and other expenses properly incurred by them in connection with their attendance at meetings of the Company Board, general meetings, meetings of committees of the Company Board or otherwise in connection with the carrying out of their duties.

Director's power to authorise conflict situations

- 5.20 Provided that a Director has disclosed any interest he/she may have in accordance with the Companies Act 2006, and any conflict or potential conflict has been authorised under the provisions of this clause 5 (*The Board of the Company*), then that Director may vote at a meeting of the Company Board or of a committee of Directors on a resolution or participate in any unanimous decision concerning any matter in which he/she is interested, and (whether or not he/she votes or participates) he/she may be counted in the quorum when that resolution or matter is considered.

⁶ **Clause 5.17 - Director remuneration.** Note that agreement is required on the initial level Director remuneration. It will be set at bid stage and this will be required to be in line with corporate good practice. In respect of travel expenses this is expected to be standard class for train travel etc.

- 5.21 A Director shall be entitled to abstain from voting or to absent himself/herself from all or any part of any meeting in relation to any matter where he/she considers that to vote for or against a matter may put him/her in breach of his/her duties to the Company (whether at Law or by reference to any code of conduct, good governance procedures or otherwise) and if he/she so abstains or absents himself/herself then he/she shall not be in breach of his/her duties as a Director under sections 172 to 174 of the Companies Act 2006 in relation to the matter in question.
- 5.22 Any Director shall be entitled from time to time to disclose to the Shareholder responsible for his/her appointment such information concerning the business and affairs of the Company as he/she shall at his/her discretion see fit.
- 5.23 A Director who to his/her knowledge is in any way, whether directly or indirectly, interested in a transaction or arrangement or proposed transaction or arrangement with the Company shall declare the nature of his/her interest at a meeting of the Directors in accordance with the Companies Act 2006.
- 5.24 Subject to clause 6.2(*Reserved Matters*), for the purposes of section 175 of the Companies Act 2006, the Directors shall have the power to authorise, on such terms (including as regards duration and revocation) and subject to such limits or conditions (if any) as they may determine (a "**Conflict Authorisation**"), any matter proposed to them which would, or might, if not so authorised, constitute or give rise to a situation in which a Director (a "**Relevant Director**") has, or can have, a direct or indirect interest which conflicts, or possibly may conflict, with the interests of the Company (a "**Conflict Situation**"). Any Conflict Authorisation shall extend to any actual or possible conflict of interest which may reasonably be expected to arise out of the Conflict Situation so authorised.
- 5.25 Unless otherwise agreed between the Shareholders in writing and notwithstanding clauses 5.5 to 5.7), the quorum for any meeting (or part of a meeting) of the Company Board whilst it is considering the grant, alteration or revocation of a Conflict Authorisation shall be at least one (1) Director for each class of Shareholder provided that a Relevant Director shall not be counted in the quorum for such meeting.
- 5.26 Where Directors give a Conflict Authorisation:
- (a) the terms of the Conflict Authorisation shall be recorded in writing (but the authorisation shall be effective whether or not the terms are so recorded);
 - (b) the Directors may revoke or vary such authorisation at any time but this will not affect anything done by the Relevant Director prior to such revocation or variation in accordance with the terms of such authorisation; and
 - (c) the Relevant Director shall be obliged to act in accordance with any terms, limits or conditions to which such Conflict Authorisation is made subject.
- 5.27 Any terms to which a Conflict Authorisation is made subject ("**Conflict Authorisation Terms**") may include (without limitation to clause 5.24 (*Director's power to authorise conflict situations*)) provision that:
- (a) where the Relevant Director obtains (other than in his/her capacity as a Director of the Company or as its employee or agent or, if the Directors so decide, in any other capacity that would otherwise oblige him/her to disclose it to the Company) information that is confidential to a third party, he/she will not be obliged to disclose it to the Company or to use it directly or indirectly for the benefit of the Company or in performing his/her duties as a Director of the Company in circumstances where to do so would amount to a breach of a duty of confidence owed to that third party;

- (b) the Relevant Director may (but shall be under no obligation to) absent himself/herself from the discussion of, and/or the making of decisions relating to, the relevant matter (whether at any meeting of the Company Board or otherwise) and be excused from reviewing documents and information prepared by or for the Company Board to the extent that they relate to that matter; and
- (c) the Relevant Director be excluded from the receipt of documents and information, the participation in discussion and/or the making of decisions (whether at Directors' meetings or otherwise) related to the relevant matter,

and anything done (or omitted to be done) by the Relevant Director in accordance with any such provision (or otherwise in accordance with any Conflict Authorisation Terms given under this clause 5.27 (*Director's power to authorise conflict situations*)) will not constitute a breach by him of his/her duties under sections 172 to 174 of the Companies Act 2006.

5.28 Subject to this clause 5.28 and clause 6.2 (*Reserved Matters*) but without prejudice to clause 5.24 and 5.25 (*Director's power to authorise conflict situations*) (inclusive), authorisation is given by the Shareholders for the time being on the terms of this Agreement to each Director in respect of any Conflict Situation that exists as at the date of this Agreement or that subsequently arises where (in either case):

- (a) the Director is an employee or director of, or shareholder or member with a [controlling/substantial] interest in, a counterparty to a Project Document with any [WEP Company or Project Service Provider] ("**Counterparty**"); or
- (b) the Director has been appointed as a director of the Company on the nomination of the Counterparty; or
- (c) the Director is an employee, director, appointee of, or member with a [controlling/substantial] interest in, a body (i) which holds a [controlling/substantial] interest in the Counterparty; or (ii) in which the Counterparty has a [controlling/substantial] interest; or (iii) which is an Associate of the Counterparty,

and on the basis that a "**substantial interest**" shall be taken to be an interest which confers an entitlement to [ten per cent (10%)]⁷ or more of the voting rights at general meetings of the relevant body or [ten per cent (10%)] or more of the distributable profits of the relevant body ("**Project Document Conflict Authorisation**").

5.29 The Conflict Authorisation Terms applicable to the Project Document Conflict Authorisation ("**Project Document Conflict Authorisation Terms**") are automatically set by this clause 5.29 (*Director's power to authorise conflict situations*) so that the Director concerned:

- (a) is not obliged to disclose to the Company information that is confidential to a third party obtained by him/her (other than in his/her capacity as a Director of the Company or as its employee or agent or, if the Directors so decide, in any other capacity that would otherwise oblige him/her to disclose it to the Company) in any situation to which the Project Document Conflict Authorisation applies, nor to use any such information directly or indirectly for the benefit of the Company or in performing his/her duties as a Director of the Company, in circumstances where to do so would amount to a breach of a duty of confidence owed to that third party; or
- (b) may (but shall be under no obligation to):

⁷ **Clause 5.28 - Conflicts.** To be considered on a project by project basis of the proposed investment structure.

- (i) absent himself/herself from the discussions of, and/or the making of decisions; and/or
 - (ii) make arrangements not to receive documents and information,
- relating to the Conflict Situation concerned,

and the Company will not treat anything done (or omitted to be done) by the Director concerned in accordance with the Project Document Conflict Authorisation Terms as a breach by him of his/her duties under sections 172 to 174 of the Companies Act 2006.

6. Management of Company affairs

Management of the Businesses

- 6.1 The parties shall exercise all rights and powers available to them in relation to the Company to procure that (in so far as they are able to do so) at all times during the term of this Agreement:
- (a) the business of the Company shall consist exclusively of the Company Business;
 - (b) with the exception of those matters requiring Shareholder or Board approval pursuant to clause 6.2 (*Reserved Matters*), all the business of the Company, other than routine day-to-day business, shall be undertaken and transacted by the Directors;
 - (c) no payment will be made by the Company and no cheque or payment instruction of the Company shall be signed other than in accordance with the mandates (general or specific) and procedures authorised by the Company Board from time to time;
 - (d) the Company will, if it requires any approval, consent or licence for the carrying on of its business in the places and in the manner in which it is from time to time carried on or proposed to be carried on, use all reasonable endeavours to obtain and maintain the same in full force and effect;
 - (e) the Company shall both put in place and maintain appropriate procedures and training to comply with the requirements of the Bribery Act 2010;
 - (f) the Company will conduct its Business and affairs in a proper and efficient manner and for its own benefit and in accordance with the Business Plan; and
 - (g) the Company shall not carry out any activity which would or could render the holding of Shares by any Founder Shareholder unlawful provided that where a proposed change of Law would render such shareholding unlawful such Founder Shareholder will use its reasonable endeavours to take such steps as are necessary to allow it to continue lawfully to hold its Shares and, if it is unable to do so the relevant Founder Shareholder will notify the other Shareholders who shall convene a joint meeting of the Company Board and the SPB to take place as soon as is practicable after such notice. The purpose of such meeting is to discuss and, if possible, agree amendments to this Agreement which do not prejudice the interests of the Shareholders or the Company but which allow the relevant Founder Shareholder to continue to participate in the Company as a Shareholder following the proposed change of Law. If following the meeting of the Company Board and the SPB a solution has not been agreed which allows the relevant Founder Shareholder to continue lawfully to participate in the Company as a Shareholder following the proposed change of Law, the relevant Founder Shareholder shall be deemed to have served a Deemed Transfer Notice under the provisions of the Company Articles with

effect from the date no later than [six (6)] months before the coming into force of the relevant proposed change of Law.

Reserved Matters

- 6.2 Subject to clause 6.5 (*Shareholders' and Company undertakings*), each of the parties hereby undertakes to the other to procure that the Reserved Matters listed in Schedule 8 (*Reserved Matters*) shall not be carried out:
- (a) in the case of those matters ticked in the second column ("Shareholder") without the prior written approval of each Material Shareholder; or
 - (b) in the case of those Reserved Matter Board Approval matters ticked in the third column (entitled "Board") without the prior written approval of [a Director appointed by each of the Material Shareholders] [all of the Directors who have been appointed by the Material Shareholders],

and each of the Shareholders shall use their respective rights and powers to procure, so far as they are each able, that no such Reserved Matter is carried out unless the required approval has been given.

- 6.3 Not used

Manner of giving Shareholder approval⁸

- 6.4

- (a) Subject to sub-clause (b) and to sub-clause (c) of this clause 6.4 (*Manner of giving Shareholder approval*), the written approvals required from Shareholders referred to in clause 6.2(*Reserved Matters*) may be given and signed for and on behalf of a Material Shareholder by a Director nominated by it under clause 5.1 (*Composition of the Company Board and the right to appoint Directors*).
- (b) Notwithstanding the provisions of clause 5 (*The Board of the Company*), if at a Company Board meeting (the "**Original Meeting**"), a matter arises for resolution which a Director reasonably considers gives rise to a conflict of interest between his/her duty to his/her appointor/employer and his/her duty as a Director to promote the success of the Company he/she shall, upon declaring such conflict, be entitled to abstain from casting his/her vote and to refer the relevant matter back to the relevant class of Shareholder whose decision on the resolution shall be substituted for the decision of the abstaining Director PROVIDED THAT (except in the case of a matter which is Reserved Matter Board Approval matter) such decision is notified to the company secretary of the Company in writing and is received by him/her within five (5) Business Days of the date of the Original Meeting at which the Relevant Director notified his/her intention to make such referral. If no decision is received from the Shareholder within such period, the requisite Company Board approval shall be capable of being given by one (1) Director appointed by each of the other classes of

⁸ **Clause 6.4 – Reserved Matters approval/flexibility.** This clause has been drafted on the basis that, in the normal course, Reserved Matters would be dealt with by the relevant Company Board appointees giving approval or otherwise (as the case may be) under clause 6.4(a). However, in terms of director's duties, sub-clause (b) addresses conflict of interest situations where the Company Board appointee is conflicted and where the matter can then be referred to the relevant Shareholder for approval (or otherwise), thereby removing the relevant director from having any obligation to vote for or against the relevant matter. Finally sub-clause 6.4(c) allows a Shareholder to opt in and out of these arrangements should it wish to do so.

Shareholders (the "**Other Directors**") and shall be so given if at the Original Meeting the Other Directors resolved to pass the resolution in question.

- (c) The Shareholders of a majority of each class of Shares may opt out of the mechanism in sub-clause (a) and sub-clause (b) by giving notice under this sub-clause (c) to the other parties. The effect of the notice shall be that, for any matter requiring approval by that class of Shareholder, that approval will only then be deemed to have been given when that class of Shareholder has given its specific approval in writing to that matter. A class of Shareholder may opt back in to the mechanism in sub-clause (a) and sub-clause (b) by notice in writing to the other parties under this sub-clause (c).
- (d) Notwithstanding the provisions of clause 5 (*The Board of the Company*), if a Director considers he/she has a conflict of interest between his/her duty to his/her appointor/employer and his/her duty as a Director to promote the success of the Company in relation to any matter other than (i) Claims (where clause 6.7 (*Step-aside provisions*) applies); and (ii) the decision to issue a Provisional Transfer Notice (where clause 10.6 (*Tax compliance*) applies); then he/she may refer the matter to his/her appointor for approval or otherwise and, if given in writing, the Shareholder approval shall be valid in place of the Director approval.

Shareholders' and Company undertakings

- 6.5 Each Shareholder undertakes to each of the other Shareholders that, in its capacity as a Shareholder, it will:
 - (a) act in a manner that is consistent with and shall exercise all voting rights and other powers of control available to it in relation to the Company so as to procure (insofar as it is able by the exercise of such rights and powers) that the Company complies with the provisions of the Project Documents; and
 - (b) generally act in a manner that will promote the Business and the best interests of the Company and act at all times in good faith towards the other Shareholders.
- 6.6 Without prejudice to the provisions of clause 6.4 (*Manner of giving Shareholder approval*), the Company and the PSDP undertake to the other parties hereto to use their respective reasonable endeavours to enforce the terms of the Supply Chain Agreements.

[Step-aside provisions]⁹

- 6.7 Notwithstanding any provision to the contrary in this Agreement or the Company Articles:
 - (a) If the WCo Director(s) (the "**Independent Director(s)**") so decide it is reasonable to conclude that the PSDP or any Associate of the PSDP will issue Proceedings in respect of any Claim against the Company:
 - (i) the Independent Director(s) shall be entitled to defend such Claim in the name and at the expense of the Company;
 - (ii) each of the Directors appointed by the PSDP ("**PSDP Directors**") shall not be entitled to (and the PSDP shall procure that each of the PSDP Directors shall not) make (or participate in making) any decisions, attend or vote at

⁹ **Clause 6.7- Step aside provisions.** Drafting assumes a single PSDP and may be amended where there are two (2) distinct sponsor entities and conflict of one would not necessarily result in a conflict situation for the other.

meetings of the Company Board or otherwise take any action on behalf of the Company in respect of the defence by the Company of such Claim nor shall they be entitled to any Company Board papers or other papers or information in relation to such Claim; and

- (iii) the quorum at any Company Board meeting convened to consider any such Claim shall be one (1) Independent Director.
- (b) If the A Shareholder or any Associate of the A Shareholder asserts that the Company has any Claim against the PSDP and/or an Associate of the PSDP:
- (i) the Independent Director shall be entitled to determine if and when to pursue such Claim in the name and at the expense of the Company by the issue of Proceedings by the Company against the PSDP and/or Associate of the PSDP;
 - (ii) each of the PSDP Directors shall not be entitled to any Company Board papers or other papers or information in relation to such Claim nor shall they be entitled to (and the PSDP shall procure that each of the PSDP Directors shall not) make (or participate in making) any decisions, attend or vote at meetings of the Company Board or otherwise take any action on behalf of the Company in respect of:
 - (A) any decision pursuant to sub-clause (b)(i) to issue Proceedings in respect of a Claim; and/or
 - (B) once Proceedings have been issued in respect of a Claim, the pursuance of that Claim by the Company; and
 - (iii) the quorum at any Company Board meeting convened in relation to any consideration of making a Claim (sub-clause (b)(i)) and after the issue of Proceedings in relation to the relevant Claim shall be the Independent Director appointed by the A Shareholders.
- (c) For the purposes of this clause 6.7 (*Step-aside provisions*), "**Claim**" shall mean a claim of any nature, whether for breach of contract, in tort, breach of statutory duty or otherwise.
- (d) ¹⁰The provisions of sub-clauses (a) to (c) shall apply, if a simple majority of Directors (other than the WCo Director(s)) so decide, with the necessary changes having been made:
- (i) in the case of sub-clause (a), if it is reasonable to conclude that WCo will issue Proceedings in respect of a Claim against the Company as if references to the PSDP are references to WCo and references to the PSDP Directors are references to the WCo Director(s); or
 - (ii) in the case of sub-clause (b), if a Claim against WCo is asserted by a B Shareholder or an Associate of a B Shareholder and/or if Proceedings are

¹⁰ **Clause 6.7 - Step-aside provisions.** Sub-clause (d) recognises the commercial context of there being proceedings between the Company and the relevant authority in allowing for the initiation and then conduct of any such proceedings to be with the Shareholders (excluding WCo) even though there is no legal reason/conflict which would otherwise preclude them from participating.

then issued by the Company against WCo as if references to the PSDP are references to WCo.^{11]}

Shareholders' Forum

- 6.8 In support of the Company's business objectives, the parties agree to establish a shareholders' forum ("**Shareholders' Forum**"). The Shareholders' Forum will be chaired by the Chairman and will consist of representatives from each of the Shareholders.
- 6.9 The Shareholders' Forum will meet [four (4)] times a year with the Company Board to review:
- (a) the effectiveness of the Company in fulfilling the objects;
 - (b) the past and future business activities of the Company;
 - (c) the performance by all parties of their respective obligations under this Agreement and the Strategic Partnering Agreement, having particular regard to the partnering principles contained in clause 2.3 of the Strategic Partnering Agreement; and
 - (d) the Directors' response to any queries previously raised by the Shareholders' Forum.
- 6.10 The Shareholders' Forum will send a report at least once per year to each of the parties to this Agreement and the Strategic Partnering Agreement. The first Shareholders' Forum meeting will be in the fourth quarter of calendar year 20[]¹². The Shareholders' Forum will have the option of meeting more frequently if required, subject to the consent of the Company Board. The Directors shall provide all information reasonably required for the Shareholders' Forum to conduct an effective review in accordance with clause 6.9.
- 6.11 The Shareholders' Forum will not have any executive authority over the Company, the purpose of the Shareholders' Forum being to allow the Shareholders to make representations to the Company Board and each other on the Company's and each other's performance in relation to this Agreement. However, the Shareholders shall each procure that the Directors shall carefully consider the conclusions of the Shareholders' Forum in formulating their plans for the Company.

7. Distributions

- 7.1 Subject to clause 6.2 (*Reserved Matters*) the parties shall procure (insofar as permitted by Law) that, subject to any restrictions imposed pursuant to the [Funding Agreements] and subject to the working capital and other financial requirements of the Company, the Company shall distribute all amounts which are lawfully available for distribution by the Company to the Shareholders by way of dividend on the Shares in the Company but only after payment of any interest and principal which is then due and payable, in order of priority, in relation to any Shareholder Debt by the Company.

¹¹ **Clause 6.7- Step-aside provisions.** If the Company is party to a contract with an Associate of another Shareholder, analogous provisions would be inserted with respect to Claims relating to that contract.

¹² Insert year.

8. Budgeting, Business Planning and financial matters

The Business Plan (including the Annual Budget)

8.1

- (a) The first Business Plan,¹³ relating to the Company Business in the first financial year following the date specified in the Data Sheet and each subsequent financial year through to the end of the fifth financial year of the Company, has been approved by the Shareholders and comprises Schedule 3 (*Agreed Form Business Plan*) to this Agreement ("**Business Plan**"). The Business Plan shall be reviewed by the Company Board at least every six (6) months and updated for each financial year in accordance with the provisions of sub-clause (b).
- (b) No earlier than three (3) months and no later than one (1) month before the end of each financial year of the Company, the Company will prepare and circulate to Shareholders a refreshed draft of the proposed Business Plan for the next five financial years, including capital expenditure and cash flow projections for the Company and its subsidiaries ("**Draft Business Plan**") for approval by the Shareholders. The Draft Business Plan (with such amendments as are agreed by the Shareholders to it) will become the Business Plan in place of the then current Business Plan upon the start of the financial year to which it relates or, if later, the date of its approval.

- 8.2 The Annual Budget for each financial year shall form part of the Business Plan. The Annual Budget shall be reviewed by the Company Board at least every three (3) months. From the end of the second financial year following the end of the Lock in Period the Annual Budget shall include relevant lifecycle costs and an implementation programme.

Working Capital

- 8.3 Each of the Working Capital Providers shall make the proportion of the Working Capital Facility to be provided by them in accordance with the terms of the Working Capital Agreement available to the Company in accordance with the provisions of the Working Capital Agreement and agree that (subject to the requirements of the Company Articles, this Agreement and the Working Capital Agreement) the Company shall be free to utilise the Working Capital Facility as the Directors see fit to fund the working capital requirements of the Company.
- 8.4 On or around the date falling six (6) months after the date of this Agreement and thereafter on or around each anniversary of the date of this Agreement, the Company Board shall meet to discuss the Working Capital Requirements of the Company and, on the basis of the discussions at that meeting, shall (within a reasonable period after the meeting) provide the Shareholders with recommendations on:
- (a) using any of the Working Capital Facility to the extent it has not been drawn down to meet the working capital requirements of the Company and/or has not been identified as being required to be drawn down to meet the working capital requirements of the Company in the current Business Plan;
 - (b) increasing or decreasing the Working Capital Limit; and/or

¹³ **Clause 8 – Business Plan.** The Business Plan will be a key part of the overall proposals to be put forward by the PSDP in terms of the financials, expected running costs and general details on the general operations of the Company and an agreed version appended to this Agreement.

- (c) repaying any or all sums drawn down under the Working Capital Facility.
- 8.5 Any decision to take any of the actions referred to in clauses 8.4(a) to 8.4(c) shall, subject to the Working Capital Agreement, require a recommendation of the Company Board and the prior written consent of:
- (a) the Shareholders holding together a majority of the A Shares; and
- (b) the Shareholders holding together a majority of the B Shares.
- 8.6 In the event and to the extent that any party or parties whose approval is required under clause 8.5 in respect of a decision under clauses 8.4(a) or 8.4(b) declines to give approval in relation to any particular use of the Working Capital Facility provided by it/them which is proposed under the relevant recommendation(s) issued by the Company Board in pursuance of clause 8.3, that party or parties may request the Company Board in writing to give consideration to some alternative use of that Working Capital Facility. Any such request shall be valid if issued by or on behalf of the holders of a majority of the Shares of the relevant class or classes.
- 8.7 Following receipt of a written request of the nature referred to in clause 8.6, the Company Board shall meet to discuss the request and the Shareholders shall procure that the Company Board use reasonable endeavours to accommodate the request, subject to the Company Board being satisfied that the implementation of that request would be in the interests of the Company.
- 8.8 Throughout the period prior to repayment in full of the Working Capital Facility, any payments by the Company during a given month (excluding for this purpose payments of a nature which would not be taken into account in determining Working Capital Requirements) which are funded to any extent by any part of the Working Capital Facility shall be deemed to be funded under the Working Capital Facility on a pro rata basis to sums drawn down from each of the Working Capital Providers.
- 8.9 Where sums are drawn down under the Working Capital Facility pursuant to the Working Capital Agreement the amounts received from the Working Capital Providers shall carry interest in accordance with paragraph 3.1 (*Interest*) of the Working Capital Agreement.
- 8.10 If a Working Capital Provider ceases to hold any Shares, then (subject to clause 8.11 and article [9.2(f)] of the Company Articles):
- (a) the Company shall repay to that Working Capital Provider the amount of the Working Capital Facility advanced by that Working Capital Provider (to the extent not previously repaid);
- (b) that Working Capital Provider shall cease to be a Working Capital Provider and the transferee of its shares shall be a Working Capital Provider in its place; and
- (c) where the PSDP ceases to hold shares the Company shall release the relevant guarantor(s) from any future liability in relation to the guarantee referred to in clause 8.12, save in respect of antecedent breach.
- 8.11 The Company's obligation under clause 8.10 shall apply only where the transferee(s) of the relevant Shares undertake(s), in terms of the relevant Deed(s) of Adherence:
- (a) to make available the same Working Capital Provider's Individual Commitment provided for in Schedule 10 (*Working Capital Agreement*) as those provided by the party which is ceasing to hold the Shares; and

- (b)
 - (i) (in the case of a transferee of A Shares only) to pay (on that date) to the Company an amount equal to all sums already advanced to the Company under the Working Capital Facility provided by the holders of A Shares (to the extent such sums are due to be repaid on the existing A Shareholder ceasing to hold Shares); or
 - (ii) (in the case of a transferee of B Shares only) to provide (on the date on which the transfer of the Shares is completed):
 - (A) a guarantee in accordance with the provisions of clause 8.12 (as read with clause 8.13); and
 - (B) payment (on that date) to the Company of an amount equal to all sums already advanced to the Company under the Working Capital Facility provided by the holders of B Shares (to the extent such sums are due to be repaid on the existing B Shareholder ceasing to hold Shares).

8.12 The PSDP shall, on or prior to the date of this Agreement procure a guarantee or guarantees in favour of the Company for an amount equal to their [Individual Commitment], in a form and from an entity or entities reasonably acceptable to the Company.

8.13 With reference to clause 8.12:

- (a) the guarantees shall be in favour of the Company to pay to the Company on demand the unpaid balance of every sum owing due or payable by the PSDP from time to time pursuant to clauses 8.3 to 8.11 (inclusive) of, and Schedule 10 (*Working Capital Agreement*) to, this Agreement (the "**Guaranteed Amount**") to the extent that the Guaranteed Amount remains unpaid and outstanding at any time after the last date of execution of this Agreement under and in accordance with the provisions of this Agreement, but on the basis that:
 - (i) the Company shall be required to notify the guarantors of the failure of the PSDP to make the payments due in accordance with clauses 8.3 to 8.11 (inclusive) and Schedule 10 (*Working Capital Agreement*) to this Agreement;
 - (ii) a claim under the guarantee may only be made five Business Days from the issue of the notification referred to in clause 8.13(a)(i) above to pay the amount unpaid referred to in clause 8.13(a)(i) above;
 - (iii) the guarantors shall be jointly and severally liable for the amount unpaid referred to in clause 8.13(a)(i) above; and
- (b) none of the B Directors (or their Alternates) shall be entitled to (and the B Shareholders shall procure that each of the B Directors and their Alternates shall not) make (or participate in making) any decision relating to:
 - (i) the acceptability of:
 - (A) the form of guarantee referred to in that clause; or
 - (B) the entities issuing it; or
 - (ii) the enforcement of the guarantees by the Company,

and the quorum requirements at any meeting of the Company Board in respect of which any such decision is to be made shall, in respect of that decision, be taken to be satisfied if the A Director (or its respective Alternate) is present.

Financial records

8.14

- (a) The Shareholders shall use reasonable endeavours to procure that the Company shall keep proper books of account and make true and complete entries of all its dealings and transactions of and in relation to its Business.
- (b) The Company shall keep proper books of account and make true and complete entries of all its dealings and transactions of and in relation to its Business.

Provision of information to Shareholders and designated third parties

8.15

- (a) The Company shall supply each of the Shareholders with the Transparency Information as detailed in Part A of Schedule 7 (*Transparency Information and Commercially Sensitive Information*) relating to the Company with the relevant period set out therein.
- (b) Each Shareholder shall provide to each other Shareholder the information as detailed in Part B of Schedule 7 (*Transparency Information and Commercially Sensitive Information*) within the relevant period set out therein.
- (c) [Where WCo is a Shareholder, each of the Company and each other Shareholder will use its reasonable endeavours to assist WCo in its preparation of any report required by a government department from time to time, which relates in whole or in part to a Project.]
- (d) The Company shall, as soon as reasonably practicable, notify the Shareholders promptly of any litigation, arbitration or administration proceedings raised against it.

8.16 Notwithstanding the provisions of clause 13.7 (*Confidentiality*):

- (a) each Shareholder may (but only once the relevant Shareholder has made the intended Recipient aware of that Shareholder's obligations of confidentiality under this Agreement (and in the case of the intended Recipients in (v) and (vi)) below has obtained a written undertaking from that intended Recipient agreeing with that Shareholder and for the benefit of all other Shareholders and the Company, to comply with such obligations of confidentiality as though it were a party to this Agreement) disclose any information received from the Company or any Director, to:
 - (i) in the case of the PSDP, any holding company of the PSDP;
 - (ii) any Shareholder in it;
 - (iii) any director or other officer of, adviser to, trustee or manager of, or investor or prospective investor in its Shareholder's Group;
 - (iv) the Shareholder's investment adviser and any of its other professional advisers;

- (v) any member or prospective member of the Shareholder's Group;
 - (vi) potential purchasers of any of that Shareholder's interest in the Company; and
 - (vii) any person to whom it is required by Law or a regulatory authority or body or by the Project Documents to be disclosed.
- (b) where WGC Co is a Shareholder, WGC Co may disclose and use any Transparency Information in such manner and for such purposes as it may determine from time to time, including reports and reviews of the performance of MIM projects generally or specifically in respect of the Project and in relation to any audit, accounting or other review or scrutiny by any government or public body where WGC Co considers it appropriate to make some or all of such information available; and
- (c) where WGC Co is a Shareholder, the Company shall permit all records referred to in clause 8.14 (*Financial records*) and/or clause 8.15(a) to 8.15(d) (*Provision of information to Shareholders and designated third parties*) to be examined and copied from time to time by WGC Co or by any person to whom WGC Co notifies the Company that it wishes to have access to any such documents, records or information under sub-clause 8.16(b).

*Tax matters*¹⁴

8.17

- (a)
- (i) Each Shareholder shall use its reasonable endeavours to ensure that the Company is treated by all relevant authorities as being resident for taxation and other purposes in the United Kingdom¹⁵.
 - (ii) [other tax provisions to be agreed]
- (b) To the extent that any tax losses arise, the Shareholders shall agree (each acting reasonably) from time to time as the losses arise, how the losses shall be treated. The Shareholders agree, if so requested by a Shareholder, to discuss a mechanism for the obtaining of relief for a proportionate share of trading losses of each of the Shareholders and other amounts eligible for relief from corporation tax by virtue of group-relief provisions by the Company or a Shareholder and compensation in accordance with Law. Each Shareholder agrees that no such mechanism shall be approved by the Company without the approval of the other Shareholders (acting reasonably and having regard to ensuring that there is no adverse impact on the success of the Company).

¹⁴ **Clause 8.17 - tax matters.** The parties may wish to insert bespoke drafting in this clause, to regulate matters of importance to the Company and the Shareholders. The drafting may cover matters such as VAT grouping, transfer pricing, group payment arrangements, worldwide debt cap issues etc and, generally, organisational arrangements for the Company tax compliance and administration. Bidders are required to summarise the bespoke arrangements they propose when submitting bids.

¹⁵ **Clause 8.17–tax matters.** The taxation provisions have been drafted on the premise that the Company is tax resident in the United Kingdom.

9. Restrictions on share transfers

Restrictions on transfers of Shares in the Company

9.1

- (a) Except in relation to any transfer of Shares permitted by article [◆]¹⁶ [(*Transfer – Permitted Transfers*)], of the Company Articles, all transfers of Shares shall be subject to the rights of first refusal¹⁷ set out in the Company Articles.
- (b) Each party undertakes to transfer Shares only in accordance with this Agreement and the Company Articles and to procure that only transfers made in accordance with this Agreement and the Company Articles are registered.
- (c) Each Shareholder undertakes to comply with any restrictions on the transfer of Shares contained in the Project Documents.
- (d) [Other than a transfer which occurs as a result of clause 9.3, article [◆] or article [◆] (*Compulsory Transfers*) of the Company Articles, no Shares or any interest therein shall be transferred and the Directors shall not register any transfer of Shares unless a percentage of any Affected Shareholder Debt as is equal to the percentage of Shares which are being transferred (as compared with the total Shares held by the Transferor at the time) is also transferred by the transferor (or other holder of the Affected Shareholder Debt) to the transferee (or its Associate). Where the transferor holds tranches or forms of Affected Shareholder Debt to which differing terms apply, the transferor must transfer an equal percentage of the total amount of each tranche or form of Affected Shareholder Debt.]
- (e) No Shareholder shall sell or transfer any Shares to any person other than another Shareholder unless that person has first executed a Deed of Adherence in the form set out in Schedule 4 (*Deed of Adherence*). Each of the parties shall execute any such Deed of Adherence in respect of a transfer of Shares made in accordance with this Agreement and the Company Articles. The Company shall not register any transfer in accordance with this Agreement and the Company Articles unless the transferee (other than a Shareholder) has first executed a Deed of Adherence in the form set out in Schedule 4 (*Deed of Adherence*). No Shareholder (which, for the avoidance of doubt includes the WGCo) shall, except with the prior written consent of all the Shareholders:
 - (i) grant any option over any Shares (or any interest, whatsoever, legal or beneficial, in any Shares); or
 - (ii) enter into any agreement in respect of the votes attached to any Shares, provided that nothing in this sub-clause (e) shall restrict or prevent: the Company from granting a Security Interest over its Shares.
- (f) No Shareholder shall be entitled to give a Transfer Notice if it (or, if it is a company, any of its Associates) is at that time in material breach of this Agreement or in breach

¹⁶ **Clause (a)**

- **Restrictions on transfer of shares.** The Company Articles shall permit transfers within groups of companies, including specifically any member of the WGCo Group to another member of the WGCo Group. WGCo will carry out diligence on the Company Articles.

¹⁷ **Clause 9.1**

- **Permitted transfers.** The mechanism must be "first refusal" – i.e. a seller being able to sell to a third party at or above an "offer price" if the other shareholders have had the opportunity to buy at that price and have decided not to.

of any Project Document to which it is a party, save with the written consent of the Shareholders holding the majority in each class of A Shares and B Shares. Nothing in this sub-clause (f) shall prevent the service of a Transfer Notice which a Shareholder is required to give in accordance with the Company Articles or the giving of a Deemed Transfer Notice in accordance with the Company Articles.

- (g) The Company shall procure that each share certificate issued by it will carry the following statement:

"Any disposition, transfer, charge of or dealing in any other manner in the securities represented by this certificate is restricted by the Articles of Association of [Company] Limited and by a Shareholders' Agreement dated [♦] 20[♦] and made between [PSDP], [WGCo] and [Company] Limited".

- (h) A Shareholder may not transfer any Share to any person who is, at the time of transfer, a Restricted Person.
- (i) [No Shareholder shall restrict the transfer of Shares to the Finance Parties, or resist the registration of Shares on the enforcement by the Finance Parties of security, in either case validly undertaken in accordance with the Funding Agreements, and the Shareholders shall procure (as far as they are able) that the Company Board shall not decline the registration of such a transfer.]

9.2 Subject to the provisions of this clause 9 and the Company Articles:

- (a) a Shareholder other than the B Shareholder may transfer any Share to a Suitable Third Party; and
- (b) the B Shareholder may transfer all (but not some) of the B Shares to a Suitable Third Party.

Events of Default and deemed transfers

9.3 Subject to clause 9.8, notwithstanding the provisions of the Company Articles, the Shareholders agree that if any of the following events occur:

- (a) the occurrence of an Insolvency Event in respect of the B Shareholder or the B Shareholder commits a material breach of this Agreement which, if such breach is capable of remedy, the B Shareholder has failed to remedy within twenty (20) Business Days of written notice given to the B Shareholder by the Shareholders holding together a majority of the A Shares requiring the B Shareholder to remedy the same (or within such longer period as may be specified in such notice);
- (b) a Material Default is deemed to have occurred and no Default Termination Notice has been given pursuant to clause 23.12 of the Strategic Partnering Agreement within twenty (20) Business Days of the Material Default and such Material Default has not been remedied within twenty (20) Business Days of the expiry of such period;
- (c) there is a PSDP Change in Ownership during the Lock In Period without the consent of the Shareholders holding a majority of the A Shares which is not remedied within twenty (20) Business Days of the occurrence of such PSDP Change of Ownership;
- (d) the B Shareholder or a B Shareholder Member is a Restricted Person or an Associate of an Restricted Person and there has not been a transfer of the affected Shares to a Suitable Third Party in terms permitted by the Company Articles and this Agreement within twenty (20) Business Days of written notice given to the B Shareholder by the

Shareholders holding together a majority of the A Shares requiring the B Shareholder to remedy the same (or within such longer period as may be specified in such notice);

- (e) the occurrence of an Insolvency Event in respect of a B Shareholder Member which is not remedied (in accordance with the terms of clause 9.8) within twenty (20) Business Days of its occurrence;
- (f) a breach by the Company of clause 2.6.4(b) of the Working Capital Agreement which is not remedied within thirty (30) days of its occurrence; or
- (g) a failure by the PSDP to pay any amount required under the Working Capital Agreement, or procure payment pursuant to the guarantees referred to in clause 8.12 (*Working Capital*), within twenty (20) Business Days of the due date following the drawdown notice;

such event shall be a "**Transfer Event**" in respect of the B Shareholder for the purposes of article [◆] of the Company Articles.

- 9.4 Where a Deemed Transfer Notice is deemed given pursuant to article [◆] of the Company Articles (including pursuant to clause 9.3) in respect of B Shares, such Deemed Transfer Notice shall also be deemed to offer, by way of transfer, any outstanding B Shareholder Debt. Any person acquiring some or all of the B Shares pursuant to the provisions of this clause 9.4 and the Company Articles shall also have the right to (but shall not be required to) acquire a proportion of the B Shareholder Debt equal to the proportion that the B Shares being acquired represents to the total issued B Shares (and the B Shareholder shall transfer such B Shareholder Debt) in accordance with the terms of the relevant Shareholder Loan Agreement(s), this Agreement and the Company Articles. Where the outstanding B Shareholder Debt was advanced in tranches or forms to which differing terms apply, the right to acquire B Shareholder Debt shall be deemed to be a right to acquire an equal percentage of the total amount of each tranche or form of B Shareholder Debt.
- 9.5 This clause 9.5 is an additional arrangement as referred to in article [◆] of the Company Articles and applies where all or any of the Shares of the Defaulting Member are offered for sale pursuant to the provisions of clause 9.6 and clause 9.7 in which case the price to be paid for the Defaulting Member's Remaining Shares and any Defaulting Member's remaining B Shareholder Debt (which for the avoidance of doubt includes any remaining Affected Shareholder Debt) (together the "**Defaulting Member's Remaining B Shareholder Debt**") shall be as determined in accordance with clauses 9.6 and 9.7 and Schedule 5 (*Sale Agent*).
- 9.6 If on the expiry of the Offer Notice served in respect of a Deemed Transfer Notice relative to B Shares, the holders of the A Shares have not purchased all of the Defaulting Member's Shares then a notice (an "**Instruction to Sell Notice**") shall be deemed to have been served on the Defaulting Member requiring the Defaulting Member to sell all of its remaining Shares (the "**Defaulting Member's Remaining Shares**") and the Defaulting Member's Remaining B Shareholder Debt (if any) and the Defaulting Member and the other Shareholders shall jointly appoint a sale agent ("**Sale Agent**") who shall be instructed in accordance with Schedule 5 (*Sale Agent*) to find a purchaser for all (but not some only) of the Defaulting Member's Remaining Shares and/or the Defaulting Member's Remaining B Shareholder Debt (the Defaulting Member's Remaining Shares and the Defaulting Member's Remaining B Shareholder Debt together being the "**Investment**") at a price for such Shares and such Defaulting Member's Remaining B Shareholder Debt not less than the price at which such Shares and such Defaulting Member's Remaining B Shareholder Debt were offered to the holders of the A Shares pursuant to clauses 9.3 and 9.4 and article [◆] of the Company Articles.

- 9.7 If no Qualifying Bid is received from a Suitable Third Party in respect of all the Defaulting Member's Remaining Shares within the sixty (60) Business Day period referred to in Schedule 5 (*Sale Agent*) or the whole of the Defaulting Member's Remaining Shares have not been sold to a Suitable Third Party in accordance with and within the time periods set out in Schedule 5 (*Sale Agent*), then:
- (a) the holders of the A Shares shall be entitled by notice in writing to the Defaulting Member to elect to purchase the Defaulting Member's Remaining Shares whereupon the Defaulting Member shall forthwith transfer to the holders of the A Shares making the election pro rata to their holdings of Shares all (but not some only) of the Defaulting Member's Remaining Shares for an aggregate consideration (given that the market is deemed to have determined that the value of the Defaulting Member's Remaining Shares is nil) equal to the par value of the Defaulting Member's Remaining Shares; or
 - (b) the holders of the A Shares shall be entitled by notice in writing to the Defaulting Member to require that the Company be wound up in accordance with clause 12 (*Winding Up*) (in which case the Defaulting Member undertakes to the other Shareholders to vote in favour of any resolution(s) to wind up the Company).
- 9.8 The B Shareholder may propose, as part of any express rectification or remedy rights in relation to any potential Transfer Event in respect of the B Shareholder (a "**Potential Default**") and within the time period specified in relation to any such right to remedy the Potential Default, the replacement of a B Shareholder Member or the Associate of any B Shareholder Member (a "**Responsible Shareholder**") as a shareholder (direct or indirect) in the B Shareholder where the B Shareholder considers such Responsible Shareholder to be responsible for the Potential Default.
- 9.9 The A Shareholders shall consider any proposal made by the B Shareholder pursuant to clause 9.8 in good faith and, in the case of a Potential Default under clause 9.3(e) shall, and in all other cases may accept the proposal:
- (a) if they reasonably consider that the replacement would remedy the Potential Default; and/or
 - (b) if they consider (in their absolute discretion) that the effect of the replacement would be such as to allow the Company to operate in future in compliance with the requirements of this Agreement and the Strategic Partnering Agreement.
- 9.10 For the avoidance of doubt, where the Potential Default is a Material Default under the Strategic Partnering Agreement and the A Shareholders give written notice to the B Shareholder that they accept a proposal made by the B Shareholder under clause 9.8 in accordance with clause 9.9 and the replacement is effected then (unless otherwise agreed in writing between the A Shareholders and the B Shareholder) such replacement of the Responsible Shareholder shall have the effect (in relation to that Potential Default only or as may otherwise be agreed in writing between the A Shareholders and B Shareholder¹⁸) of deeming a reinstatement notice to have been given by the Participants pursuant to the Strategic Partnering Agreement.

¹⁸ The intention here in relation to "... or as may otherwise be agreed..." is that the removal of the Responsible Shareholder could be agreed as being a remedy on an absolute basis in relation to the Relevant Default or on a less absolute basis so that, for example, should the removal not effectively cure the default within an agreed time period, a Deemed Transfer Notice would still be deemed given.

Lock In Periods

9.11

- (a) **Shares in the Company.** Subject always to clause 9.1(h) (*Restrictions on transfers of Shares in the Company*), each Shareholder agrees that it shall not transfer or dispose of any interest in or over or right attaching to any of its Shares except by a transfer:
- (i) in the case of a B Shareholder, to a transferee at any time after the expiry of the Lock In Period (as defined in sub-clause (a)); and
 - (ii) in respect of all Shareholders, at any time to a transferee permitted in accordance with articles [◆] of the Company Articles,

9.12 but always subject to sub-clauses

(i) to (ii) above, otherwise in accordance with the provisions of the Company Articles and this clause 9 (*Restrictions on share transfers*).

- (a) For the purposes of this Agreement, **Lock In Period** means the period of [three (3)] years from and including the date of this Agreement.

9.13 Where, during the Lock In Period, the holder of any shares in the PSDP is an Associate of:

- (a) [*insert name of relevant company with respect to first Initial PSDP Shareholder and company number*¹⁹] and that holder ceases to be an Associate of [*insert name and company number*] it shall be a breach of clause 9.3(c) (*Events of Default and deemed transfers*) if the shares in the PSDP held by that holder are not within twenty (20) Business Days of that holder ceasing to be an Associate of [*insert relevant name and company number*], transferred to [*insert relevant name and company number*] or an Associate of [*insert relevant name and company number*];
- (b) [*repeat as necessary to capture consortium members within the PSDP*].

9.14 The PSDP shall inform the other parties as soon as reasonably practicable (and in any event within twenty (20) Business Days) of any PSDP Change in Ownership occurring.

9.15 The Company may, not more than twice in any calendar year, or at any time when a Material Default is outstanding, request that the PSDP inform it, as soon as reasonably practicable and in any event within twenty (20) Business Days of such request, of any PSDP Change in Ownership. The Company shall exercise the right referred to in this clause 9.15 where requested to do so by the holders of a majority of the A Shares.

9.16 For the purposes of:

- (a) clauses 9.3(c) and 9.3(d) (*Events of Default and deemed transfers*) and clauses 9.14 and 9.15, any change in the legal or beneficial ownership of any shares in any company that are listed on recognised investment exchanges (as defined in Section 285 of the Financial Services and Markets Act 2000);

¹⁹ For each consortium member, this clause should identify the appropriate company, LLP or partnership which was the subject of pre-qualification. The change of control provisions in clause 9.3 (*Events of Default and deemed transfers*) are designed to ensure that such company, LLP or partnership (or its subsidiary undertakings) retain their interest in the PSDP during the lock in period. By virtue of clause 9.16, transfers of ownership in the identified company, LLP or partnership would not however give rise to any breach of the provisions in clause 9.3.

- (b) clause 9.3(c) (*Events of Default and deemed transfers*), but subject always to clause 9.13, any transfer of shares in the PSDP by an Initial PSDP Shareholder to an Associate of such transferor or further transfers from such Associate to another Associate of such Initial PSDP Shareholder or to the Initial PSDP Shareholder; and
- (c) clause 9.3(c) (*Events of Default and deemed transfers*), any:
 - (i) transfer of shares or change in control over the exercise of voting rights conferred on those shares or the control over the right to appoint or remove directors in:
 - (A) [insert name of relevant company with respect to first Initial PSDP Shareholder and company number]; and/or
 - (B) [repeat as necessary to capture corporate consortium members within the PSDP]; and/or
 - (ii) [change in the members of or voting rights in [*identify name of any LLP with respect to second Initial PSDP Shareholder*]]²⁰,
 and/or their respective members,

shall be disregarded.

10. Warranties and undertakings

Warranties by WGCo

- 10.1 WGCo warrants and represents to each of the other parties at the date of this Agreement that:
- (a) it is duly incorporated under the laws of England and Wales;
 - (b) it has the corporate power to enter into and to exercise its rights and perform its obligations under the Project Documents to which it is a party;
 - (c) each Project Document to which it is a party constitutes, or will when executed constitute, legal, binding and enforceable obligations on it;
 - (d) it has taken all necessary action to authorise the execution of and the performance of its obligations under the Project Documents to which it is a party (and in the case of a Project Document executed after the date of this Agreement it will take all necessary action to authorise the execution of such Project Document);
 - (e) no claim is being asserted and no Proceedings are presently in progress, or, to the best of its knowledge pending or threatened against it or any of its assets which will or might have a material adverse effect on its ability to perform its obligations under those Project Documents to which it is a party;
 - (f) it is not subject to any contractual obligation, compliance with which will be likely to have a material adverse effect on its ability to perform its obligations under the Project Documents to which it is a party; and

²⁰ Delete where there is no relevant LLP within the Initial PSDP Shareholders. Where there is a partnership, appropriate drafting will require to be inserted.

- (g) no Proceedings or other steps have been taken and not discharged (nor, to the best of its knowledge are threatened) for its winding-up or for its dissolution or for the appointment of a receiver, administrative receiver, liquidator, administrator or similar officer in relation to any of its assets or revenue.

Warranties by the PSDP and the Company

10.2 The PSDP and the Company each severally warrant and represent to each of the other parties at the date of this Agreement that:

- (a) it is duly incorporated under the laws of England and Wales²¹ and has the corporate power to enter into and to exercise its rights and perform its obligations under the Project Documents to which it is a party;
- (b) each Project Document to which it is a party constitutes, or will when executed constitute legal, binding and enforceable obligations on it;
- (c) it has taken all necessary action to authorise the execution of and the performance of its obligations under the Project Documents to which it is a party (and in the case of a Project Document executed after the date of this Agreement it will take all necessary action to authorise the execution of such Project Document);
- (d) no claim is being asserted and no Proceedings are presently in progress or, to the best of its knowledge pending or threatened against it or any of its assets which will or might have a material adverse effect on its ability to perform its obligations under those Project Documents to which it is a party;
- (e) it is not subject to any contractual obligation, compliance with which will be likely to have a material adverse effect on its ability to perform its obligations under the Project Documents to which it is a party;
- (f) no Proceedings or other steps have been taken and not discharged (nor, to the best of its knowledge, are threatened) for its winding-up or for its dissolution or for the appointment of a receiver, administrative receiver, liquidator, administrator or similar officer in relation to any of its assets or revenue; and
- (g) it has complied with and currently complies with all relevant anti-bribery and corruption laws applicable to its business and operations including (without limitation) the provisions of the Bribery Act 2010.

Warranties by the Company

10.3 The Company warrants and represents to each of the other Shareholders at the date of execution of this Agreement that the Company is a newly incorporated company and has not traded prior to the date of this Agreement.

Tax compliance

10.4 Each Shareholder (other than the A Shareholder) represents and warrants to each of the other parties that, as at the date of this Agreement, it has notified the Company in writing of any Occasions of Tax Non-Compliance or any litigation that it is involved in that is in connection with any Occasions of Tax Non-Compliance.

²¹ **Clause 10.2(a) - Warranties.** To be amended if any of the parties are not incorporated in England and Wales.

- 10.5 If at any time an Occasion of Tax Non-Compliance occurs in relation to a Shareholder, the Shareholder shall:
- (a) notify the Company in writing of such fact within five (5) Business Days of its occurrence; and
 - (b) promptly provide to the Company:
 - (i) details of the steps which the Shareholder is taking to address the Occasion of Tax Non-Compliance and to prevent the same from recurring, together with any mitigating factors that it considers relevant; and
 - (ii) such other information in relation to the Occasion of Tax Non-Compliance as the Company may reasonably require.

- 10.6 If:
- (a) the representation and warranty given by a Shareholder pursuant to clause 10.4 (*Tax compliance*) is untrue; and/or
 - (b) the Shareholder commits a material breach of its obligation to notify the Company of any Occasion of Tax Non-Compliance as required by clause 10.5 (*Tax compliance*),

and, in either case, the Shareholder fails to provide details of proposed mitigating factors which, in the reasonable opinion of the Company Board, are acceptable, then the Company shall be entitled to give a notice to that Shareholder (a "**Provisional Transfer Notice**") and the provisions of clause 10.7 (*Provisional Transfer Notices*) shall then apply.

Provisional Transfer Notices

- 10.7 If a Shareholder receives a Provisional Transfer Notice:
- (a) it shall have ninety (90) days to effect the transfer of its Shares to a Suitable Third Party;
 - (b) in relation to any such transfer:
 - (i) the pre-emption and transfer provisions in this Agreement and the Company Articles shall apply;
 - (ii) if the Shares are transferred to a Suitable Third Party then the other Shareholders shall take (or procure) all steps reasonably requested of them by the transferring Shareholder to enable any such transfer to be effected and registered; and
 - (c) if the Shareholder has not effected the transfer of its Shares to a Suitable Third Party within the ninety (90) day period referred to (or such longer period as may be agreed by the Company) then the same shall constitute a material breach of this Shareholders' Agreement in respect of that Shareholder.

11. Disputes

- 11.1 If there is a disagreement or dispute arising between two (2) or more of the parties in connection with this Agreement (a "**Dispute**"), the parties shall use all reasonable endeavours to resolve the matter on an amicable basis. A matter or action requiring approval as a Reserved Matter not receiving the necessary approval shall not constitute a Dispute. If one (1) party serves formal written notice on one (1) or more of the others that a Dispute has

arisen and the parties are unable to resolve the Dispute within a period of twenty (20) Business Days from the service of such notice, then the Dispute shall be referred to the respective Chief Executives, Managing Directors or, in the case of WGCo, [◆] (as the case may be) of each of the parties who shall attempt to resolve the Dispute within the following twenty (20) Business Days (the "**Second Consideration Period**"). No recourse to arbitration or litigation by any party against any other under this Agreement shall take place unless and until such procedure has been followed.

- 11.2 If the Chief Executives or Managing Directors (as the case may be) of the parties are unable to resolve a Dispute within the Second Consideration Period, then a "**Deadlock**" shall be deemed to have arisen following the expiry of the Second Consideration Period or such earlier date on which the parties agree that Deadlock has arisen (the "**Deadlock Date**"). Any Deadlock shall be dealt with in accordance with clause 11.3 (*Disputes*).
- 11.3 If a Deadlock has arisen, then any party shall be entitled to refer the Dispute to a third party expert (the "**Expert**") who shall, unless otherwise agreed, be an independent expert with knowledge of and experience in matters relating to public private partnerships, [*project/sector relevant subject matter – defence, health, waste, education etc.*] and construction and development. The identity of the Expert shall be agreed between the parties within ten (10) Business Days of the Deadlock Date or, failing such agreement, shall be appointed by the President from time to time of the Institute of Chartered Accountants in England and Wales or any successor thereto and the fees and expenses of the Expert in making his/her determination shall be borne in such proportions as the Expert shall determine.
- 11.4 The parties shall co-operate with each other and with the Expert in an attempt to resolve the Dispute and Deadlock amicably. The decision of the Expert (appointed as set out above) shall not be binding unless the parties agree otherwise in advance of referring any Dispute to the Expert. Following the Expert's decision any party may, unless the parties have agreed that the Expert's decision shall be binding, issue legal proceedings in relation to the subject matter of the Dispute. Where the parties agree that the Expert's decision shall be binding, the decision of the Expert (appointed as set out above) as to the Dispute or Deadlock shall (except in the case of manifest error) be final and binding on all the parties for all purposes and (subject only to their fiduciary duties as Directors) the parties and their respective appointees on the Company Board shall execute all such documents and do and take all such action as may be necessary or reasonably desirable to give effect to and/or implement the said decision as promptly as reasonably practicable after the date of the same being so determined. For the purposes of this clause 11 (*Disputes*), any consent required from any party to implement the decision of the Expert made in accordance with the above provisions shall be deemed to have been given.

12. Winding Up

- 12.1 If the Shareholders pass a resolution pursuant to this Agreement or otherwise to wind up the Company by way of a members' voluntary winding-up they shall procure that the liquidator is a member of the Institute of Chartered Accountants in England and Wales acceptable to all the Shareholders and in default of agreement nominated at the request of any Shareholder by the President from time to time of the Institute of Chartered Accountants.
- 12.2 Except to the extent each party has contractual obligations to the contrary, the Shareholders shall prove in the winding-up of the Company to the maximum extent permitted by Law for all sums due or to fall due to them respectively from the Company and shall exercise all rights of set-off and generally do all such other acts and things as may be available to them in order to obtain the maximum receipts and recoveries.
- 12.3 To the extent that any or all of the Shareholders do not receive satisfaction in full in the winding-up of the Company of all sums due or to fall due to them the aggregate shortfall

between all sums due or to fall due to the Shareholders and all amounts actually recovered by the Shareholders from the Company or its liquidator (whether by direct payment or the exercise of any right of set-off or otherwise) shall be calculated and apportioned between the Shareholders in the same proportions as the Shareholders hold Shares at the time of the determination. The Shareholders shall make such contributions to each other as are necessary to procure that the Shareholders bear the aggregate amount of such shortfall in such proportions.

13. Miscellaneous

- 13.1 Unless the Shareholders together holding a majority of the A Shares and the Shareholders together holding a majority of the B Shares agree otherwise, on the establishment of any WEP Company other than the Company, the parties shall procure that the necessary Company Board and/or shareholder resolutions in respect of such WEP Company are passed to adopt the WEP Company Articles with immediate effect.
- 13.2 Unless the Shareholders together holding a majority of the A Shares and the Shareholders together holding a majority of the B Shares agree otherwise, the entering into of any contract or agreement by any WEP Company other than the Company shall require the approval of the board of directors of such WEP Company.

Announcements

- 13.3 No announcement, communication or circular concerning or relating to the subject matter of this Agreement shall be made or despatched by any of the parties without the prior written consent of the other parties to the form and text of such announcement.
- 13.4 Clause 13.3 does not apply to an announcement, communication or circular required by Law, the UK Listing Authority, the London Stock Exchange, the Panel on Takeovers & Mergers or by any governmental body or authority to which any of the party is subject **PROVIDED THAT** in that event the party required to make or send such announcement, communication or circular shall, where practicable first consult with the other parties as to the form or content of such announcement.

13.5 Not Used.

13.6 Not Used.

Confidentiality

13.7

- (a) Subject to clause 8.16(b)(*Provision of information to Shareholders and designated third parties*), during the term of this Agreement and after termination or expiry of the Agreement for any reason whatsoever, a party receiving information from another party shall:
- (i) keep Confidential Information (as defined in clause 13.9) confidential;
 - (ii) not disclose Confidential Information to any other person other than with the written consent of the party disclosing such information or in accordance with sub-clauses (b) to (d); and
 - (iii) not use Confidential Information for any purpose other than the performance of its obligations under this Agreement and the other Project Documents.

- (b) During the term of this Agreement, a party receiving information from another party may, subject to the provisions of clause 8.16(a) to 8.16(c) (*Provision of information to Shareholders and designated third parties*), disclose Confidential Information to its employees, contractors, sub-contractors, agents and advisers under conditions of confidentiality in each case to the extent that it is reasonably necessary for the purposes of this Agreement, or any other Project Document and may disclose Confidential Information to its funders, prospective funders, prospective shareholders of the Company or prospective purchasers of its assets under conditions of confidentiality. In each case the permitted recipient of such Confidential Information shall be known as a "**Recipient**".
- (c) The party receiving information from another party shall so far as practicable procure that each Recipient is made aware of and complies with all that receiving party's obligations of confidentiality under this Agreement as if the Recipient were a party to this Agreement.
- (d) Without prejudice to sub-clause (b), the obligations contained in sub-clauses (a) to (c) shall not apply to:
- (i) any disclosure of information that is reasonably required by any person engaged in the performance of their obligations under the Agreement for the performance of those obligations;
 - (ii) any matter which a party can demonstrate is already, or becomes, generally available and in the public domain otherwise than as a result of a breach of any of the provisions in sub-clauses (a) to (c);
 - (iii) any disclosure which is required pursuant to any statutory, legal (including any order of a court of competent jurisdiction) or Parliamentary obligation placed upon the party making the disclosure or the rules of any stock exchange or governmental or regulatory authority having the force of Law or, if not having the force of Law, compliance with which is in accordance with the general practice of persons subject to the stock exchange or governmental or regulatory authority concerned;
 - (iv) any disclosure of information which is already lawfully in the possession of the receiving party, prior to its disclosure by the disclosing party;
 - (v) any provision of information to the parties' own professional advisers or insurance advisers or to lenders in respect of the Project or such lender's professional advisers or insurance advisers or, where it is proposed that a person should or may provide funds (whether directly or indirectly and whether by loan, equity participation or otherwise) to the Company to enable it to carry out its obligations under this Agreement or may wish to acquire shares in the Company in accordance with the provisions of this Agreement to that person or their respective professional advisers but only to the extent reasonably necessary to enable a decision to be taken on the proposal;
 - (vi) any disclosure for the purposes of:
 - (A) the examination and certification of the Company's accounts;
 - (B) any examination pursuant to the Public Audit (Wales) Act 2004 of the economy, efficiency and effectiveness with which any Participant has used its resources;

- (C) complying with a proper request from either party's insurance adviser, or insurer on placing or renewing any insurance policies;
- (D) any disclosure required to be made to the Auditor General for Wales or the Wales Audit Office; or
- (E) (without prejudice to the generality of sub-clause (d)(iii) above) compliance with the FOIA and/or the Environmental Information Regulations,

provided that, for the avoidance of doubt, neither sub-clause (d)(vi)(E) nor sub-clause (d)(iii) above shall permit disclosure of Confidential Information otherwise prohibited by sub-clauses (a) to (c) above where that information is exempt from disclosure under Section 41 of the FOIA.

(e)

- (i) Where disclosure is permitted under sub-clause (d), other than sub-clauses (d)(ii), (iii), (iv) and (v), the party providing the information shall procure that the Recipient of the information shall be subject to the same obligation of confidentiality as that contained in this Agreement.
- (ii) For the purposes of the Public Audit (Wales) Act 2004, the Wales Audit Office may examine such documents as he/she may reasonably require which are owned, held or otherwise within the control of the Company and may require the Company to produce such oral or written explanations as he/she considers necessary.
- (iii) The parties acknowledge that the Wales Audit Office has the right to publish details of the Agreement (including Commercially Sensitive Information) in its relevant reports.

13.8 The provisions of clause 13.7 (*Confidentiality*) are without prejudice to the application of the Official Secrets Act 1911 to 1989.

13.9 For the purposes of clause 13.7 (*Confidentiality*), "**Confidential Information**" means:

- (a) information that ought to be considered as confidential (however it is conveyed or on whatever media it is stored) and may include information whose disclosure would, or would be likely to, prejudice the commercial interests of any person, trade secrets, commercially sensitive intellectual property rights and know-how of any party and all personal data and special categories of personal data within the meaning of the Data Protection Laws; and
- (b) Commercially Sensitive Information.²²

Freedom of Information

13.10

- (a) The parties acknowledge that WGCo is subject to the requirements of the FOIA and the Environmental Information Regulations and the Company shall facilitate WGCo's

²²

Clause 13.9(b) – Commercially Sensitive Information. Any information or classes of information that the parties agree should be treated as Commercially Sensitive Information should be included in Schedule 7, Part C entitled Commercially Sensitive Information. The parties should be mindful of guidance on this issue when agreeing which information should be categorised as commercially sensitive. Broad blanket categorisations are not appropriate.

compliance with its Information disclosure requirements pursuant to the same in the manner provided for in sub-clauses (b) to (g) and to clause 13.11 (inclusive) below. For the purpose of sub-clauses (b) to (g) and clause 13.11 (inclusive) only **"Information"** has the meaning given to it under section 84 of the FOIA.

- (b) Where WGC0 receives a Request for Information in relation to Information that the Company is holding on behalf of WGC0, WGC0 shall transfer to the Company such Request for Information that it receives as soon as practicable and in any event within [five (5)] Business Days of receiving a Request for Information and the Company shall:
 - (i) provide WGC0 with a copy of all such Information in the form that WGC0 requires as soon as reasonably practicable and in any event within [ten (10)] Business Days (or such other period as WGC0 may acting reasonably specify) of WGC0's request; and
 - (ii) provide all necessary assistance as reasonably requested by WGC0 in connection with any such Information, to enable WGC0 to respond to a Request for Information within the time for compliance set out in section 10 of the FOIA or Regulation 5 of the Environmental Information Regulations.
- (c) Following notification under sub-clause (b) and up until such time as the Company and the Shareholders (other than WGC0) has provided WGC0 with all the Information specified in sub-clause (b)(i), the Company may make representations to WGC0 as to whether or not or on what basis Information requested should be disclosed, and whether further Information should reasonably be provided in order to identify and locate the Information requested, provided always that WGC0 shall be responsible for determining at its absolute discretion:
 - (i) whether the Information is exempt from disclosure under the FOIA and the Environmental Information Regulations;
 - (ii) whether the Information is to be disclosed in response to a Request for Information,and in no event shall the Company respond directly or allow its subcontractors to reply directly to a Request for Information unless expressly authorised to do so by WGC0.
- (d) The Company shall ensure that all Information held on behalf of WGC0 is retained for disclosure for at least [six (6)] years from the date it is acquired and shall permit WGC0 (as appropriate) to inspect such Information as requested from time to time.
- (e) The Company shall transfer to WGC0 any Request for Information received by the Company as soon as practicable and in any event within two (2) Business Days of receiving it.
- (f) The Company acknowledges that any lists provided by it listing or outlining Confidential Information, are of indicative value only and that WGC0 may nevertheless be obliged to disclose Confidential Information in accordance with sub-clause (d) above.
- (g) If WGC0 makes a request to the Company pursuant to sub-clause (b)(ii) the Company shall, as soon as practicable, and in any event within five (5) Business Days of receipt of such request, inform WGC0 of the Company's estimated costs of complying with the request to the extent these would be recoverable if incurred by WGC0 under section 12(1) of the FOIA and the Fees Regulations. Where such costs

(either on their own or in conjunction with WGCo's own such costs in respect of such Request for Information) will exceed the appropriate limit referred to in section 12(1) of the FOIA and as set out in the Fees Regulations WGCo shall inform the Company in writing whether or not it still requires the Company to comply with the request and where it does require the Company to comply with the request the ten (10) Business Days period for compliance shall be extended by such number of additional days for compliance as WGCo is entitled to under section 10 of the FOIA. In such case, WGCo shall notify the Company of such additional days as soon as practicable after becoming aware of them and shall reimburse the Company for such costs as the Company incurs in complying with the request to the extent WGCo is itself entitled to reimbursement of such costs in accordance with its own FOIA policy from time to time.

13.11 The Company acknowledges that (notwithstanding the provisions of clause 13.7 (*Confidentiality*)) WGCo may, acting in accordance with the Department of Constitutional Affairs' Code of Practice on the Discharge of Functions of Public Authorities under Part I of the Freedom of Information Act 2000 (or such equivalent as may from time to time be applicable in Wales) ("**the Code**"), be obliged under the FOIA, or the Environmental Information Regulations to disclose Information concerning the Company:

- (a) in certain circumstances without consulting with the Company; or
- (b) following consultation with the Company and having taken their views into account,

provided always that where this clause 13.11 applies, WGCo shall, in accordance with the recommendations of the Code, draw this to the attention of the Company prior to any disclosure.

Governing law and Jurisdiction

13.12

- (a) Subject to the provisions of clause 11 (*Disputes*), this Agreement and any non-contractual obligations arising out of or in connection with it shall be considered as a contract made in England and Wales and shall be subject to the laws of England and Wales.
- (b) The parties agree that the courts of England and Wales shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Agreement and irrevocably submit to the jurisdiction of those courts.

Further assurance

13.13 Each party will:

- (a) execute any document;
- (b) use all reasonable endeavours to procure that any third party (where necessary) executes any deed or document; and

do anything reasonably necessary to implement and give full effect to the terms of this Agreement.

Costs

13.14 Each party shall bear its own costs and expenses in relation to the drafting, negotiating, execution and implementation of this Agreement and the Project Documents.

Insurance

13.15

- (a) The Company shall take out and maintain with reputable insurers all insurances required to be maintained by Law and such other prudent insurances against such risks as are normally insured against by businesses carrying on activities similar to those of the Company Business and (without prejudice to the generality of the foregoing) shall insure its assets which are of an insurable nature for their full replacement or reinstatement value. The Company shall comply with its obligations under the Project Documents in respect of insurance.
- (b) Each Shareholder shall ensure that any directors and officers liability insurance taken out by such Shareholder extends to any Directors nominated and appointed by such Shareholder.

Assignment

13.16

- (a) Subject always to clause 9 (*Restrictions on share transfers*), this Agreement can be transferred by a Shareholder to a permitted transferee or successor. This Agreement, shall be binding on, and shall ensure to the benefit of, each of the parties and their respective permitted transferees and successors. In the case of WGCo its successors shall include any person to whom the Welsh Government transfers the property, rights and obligations of WGCo.
- (b) Save as permitted by sub-clause (a) and clause 9 (*Restrictions on share transfers*), no party shall assign, transfer, sub contract or otherwise dispose of any interest in this Agreement.

Entire agreement

13.17 Except where expressly provided otherwise in this Agreement, this Agreement constitutes the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings concerning the subject of this Agreement.

Notices

13.18

- (a) All notices under this Agreement shall be in writing and all certificates, notices or written instructions to be given under the terms of this Agreement shall be served by sending the same by first class post, email or by hand, leaving the same at:

| | |
|------------------------------|--|
| <i>If to the PSDP</i> | |
| For the attention of | |

| | |
|---------------------------------|--|
| Address | |

| <i>If to WGCo</i> | |
| For the attention of | |
| Address | |
| Email | |
| <i>If to the Company</i> | |
| For the attention of | |
| Address | |
| Email | |

- (b) Any party to this Agreement may change its nominated address or email address by prior notice to the other parties.
- (c) Notices given by post shall be effective upon the earlier of (i) actual receipt, and (ii) five (5) Business Days after mailing. Notices delivered by hand shall be effective upon delivery. Notices given by email shall be deemed to have been received (unless there is an error message returned to that email):
- (i) within two (2) hours after sending, if sent on a Business Day between the hours of 9am and 4pm; or
 - (ii) by 11am on the next following Business Day, if sent after 4pm, on a Business Day but before 9am on that next following Business Day.

Contracts (Rights of Third Parties) Act 1999

13.19 It is agreed for the purposes of the Contracts (Rights of Third Parties) Act 1999 that this Agreement is not intended to, and does not, give to any person who is not a party to this Agreement any rights to enforce any provisions contained in this Agreement.

Waiver – no waiver unless in writing

13.20 Any relaxation, forbearance, indulgence or delay (together indulgence) of any party in exercising any right shall not unless made in writing, be construed as a waiver of the right and shall not affect the ability of that party subsequently to exercise that right or to pursue any remedy, nor shall any indulgence constitute a waiver of any other right (whether against that party or any other person).

Severability

13.21 If any provision of this Agreement shall be declared invalid, unenforceable or illegal by the courts of any jurisdiction to which it is subject, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability or legality of the remaining provisions of this Agreement.

No partnership or agency

- 13.22 (a) Nothing in this Agreement shall be construed as creating a partnership.
- (b) No party shall be deemed to be an agent of any other party and no party shall hold itself out as having authority or power to bind any other party in any way.

Amendments

- 13.23 This Agreement may not be varied except by an agreement in writing executed as a deed by duly authorised representatives of the parties.

Executed as a deed by the parties or their duly authorised representatives on the date of this Agreement.

Schedule 1
Definitions and Interpretation

1. Definitions

1.1 In this Agreement, unless the context otherwise requires:

A Director has the meaning given to it in clause 5.1(a);

A Shares means the [*insert number*] 'A' Ordinary Shares of £1 each in the capital of the Company, together with any further shares issued from time to time and classified as A Shares or which, on transfer, are reclassified as A Shares;

A Shareholder means the holder of A Shares from time to time;

Affected Shareholder Debt means:

- (a) where a transferor or potential transferor of Shares under this Agreement and the Company Articles is not the B Shareholder, Shareholder Debt the creditor of which is the Shareholder in question and/or an Associate of that Shareholder; and
- (b) where a transferor or potential transferor of Shares under this Agreement and the Company Articles is the B Shareholder, Shareholder Debt the creditor of which is the B Shareholder and/or an Associate of the B Shareholder and/or a B Shareholder Member and/or an Associate of a B Shareholder Member;

Agreement means this Shareholders' Agreement including the Schedules;

Alternate has the meaning given to it in Article 1.1 of the Company Articles;

Annual Budget means the annual budget forming part of the Business Plan;

Approved Project has the meaning given to it in the Strategic Partnering Agreement;

Associate²³ means:

- (a) in respect of any person which is a body corporate:
 - (i) any undertaking of which that body corporate is a Director or partner;
 - (ii) any undertaking in the same group as such body corporate; and
 - (iii) any employee or Director of that body corporate or of any undertaking in the same group;
- (b) in respect of any person which is a partnership that is a legal person under the law by which it is governed:
 - (i) any undertaking of which that partnership is a Director or partner;
 - (ii) any employee of or partner in that partnership; and

²³ **Schedule 1 Definitions – Associate.** The definition of Associate to be considered at bid stage in accordance with the relevant facts and in the context of the relevant PSDP group structure to ensure the definition is appropriate/wide enough.

- (iii) any person who is an Associate of a partner in that partnership;
- (c) in respect of any person which is a partnership which is not a legal person under the law by which it is governed, any person who is an Associate of any of the partners,

provided that, for the purposes of clauses [◆] only, any partnership which would otherwise qualify as an Associate of the B Shareholder or a B Shareholder Member shall not constitute an Associate unless the B Shareholder, the B Shareholder Member or one of their respective Associates is beneficially entitled to 50% or more of the profits and/or assets of such partnership. In this definition in relation to a limited liability partnership for "Director" read "member" and **Associated** shall be construed accordingly;

B Director has the meaning given to it in clause 5.1(b) (*Composition of the Company Board and the right to appoint Directors*);

B Shareholder means the holder of B Shares from time to time;

B Shareholder Debt means all outstanding Shareholder Debt, the creditor of which is the B Shareholder and/or an Associate of the B Shareholder and/or a B Shareholder Member and/or an Associate of a B Shareholder Member;

B Shareholder Member means the shareholders, members or partners from time to time of the B Shareholder, being as at the date of this Agreement, the Initial PSDP Shareholders;

B Shares means the [*insert number*] 'B' Ordinary Shares of £1 each in the capital of the Company, together with any further shares issued from time to time and classified as B Shares or which, on transfer, are reclassified as B Shares;

Business means the Company Business;

Business Day means a day other than a Saturday, Sunday or a bank holiday in England and Wales;

Business Plan has the meaning given to it in clause 8.1(a) (*The Business Plan (including the Annual Budget)*);

Chairman means such independent non-executive Director or other Director as may be appointed from time to time to act as Chairman of the Company Board pursuant to clause 5.11 (*Composition of the Company Board and the right to appoint Directors*);

Claim has the meaning given to it in clause 6.7(c) (*[Step-aside provisions]*);

Code has the meaning given to it in clause 13.11 (*Freedom of Information*);

Commercially Sensitive Information means any information detailed in Part C of Schedule 7 (*Transparency Information and Commercially Sensitive Information*);

Company Articles means the articles of association of the Company in the format set out in Schedule 6 (*The Articles of Association of the Company*) as amended from time to time;

Company Board means the board of Directors from time to time of the Company as constituted in accordance with this Agreement and the Company Articles;

Company Business means the business of the Company as described in clause 3.1 (*The business of the Company and details of the Company*) and such other business as the Shareholders may from time to time agree should be carried on by the Company;

Confidential Information has the meaning given to it in sub-clause 13.9 (*Confidentiality*);

Conflict Authorisation has the meaning given to it in clause 5.24 (*Director's power to authorise conflict situations*);

Conflict Authorisation Terms has the meaning given to it in clause 5.27 (*Director's power to authorise conflict situations*);

Conflict Situation has the meaning given to it in clause 5.24 (*Director's power to authorise conflict situations*);

Counterparty has the meaning given to it in clause 5.28(a) (*Director's power to authorise conflict situations*);

Data Protection Laws means Regulation (EU) 2016/679 (General Data Protection Regulation), as supplemented by the Data Protection Act 2018;

Data Sheet means the document in the Agreed Form containing details about the Company including, inter alia, subscriptions by the parties for Shares [and details of any Shareholder Debt advanced to the Company], Directors details and other administrative matters;

Deadlock has the meaning given to it in clause 11.2 (*Disputes*);

Deadlock Date has the meaning given to it in clause 11.2 (*Disputes*);

Deed of Adherence means a deed in substantially the same form as the draft set out at Schedule 4 (*Deed of Adherence*);

Deemed Transfer Notice has the meaning given to it in the Company Articles;

Defaulting Member means the B Shareholder following the occurrence of a Transfer Event in relation to the B Shareholder or a B Shareholder Member;

Defaulting Member's Remaining Shares has the meaning given to it in clause 9.6 (*Events of Default and deemed transfers*);

Defaulting Member's Remaining B Shareholder Debt has the meaning given to it in clause 9.5 (*Events of Default and deemed transfers*);

Directors means:

- (a) the directors of the Company as nominated by the relevant parties from time to time and appointed pursuant to clause 5.1 (*Composition of the Company Board and the right to appoint Directors*) and Article 36 (*Appointment of Directors*);
- (b) any Alternate (in that capacity):
 - (i) save where expressly stated otherwise in this Agreement or the Articles; and
 - (ii) save for the purpose of clauses 5.1 to 5.3 (*Composition of the Company Board and the right to appoint Directors*), 5.17 to 5.19 (*Director Remuneration*) and 6.5(b) (*Reserved Matters*); and
- (c) a Chairman (in that capacity):

- (i) save where expressly stated otherwise in this Agreement or the Articles;
- (ii) save for the purpose of clauses 5.1 to 5.3 (*Composition of the Company Board and the right to appoint Directors*); and
- (iii) subject always to Article 27.5 (*Voting at Board Meetings*).

and **Director** shall mean any of them;

Dispute has the meaning given to it in clause 11.1 (*Disputes*);

DOTAS means the Disclosure of Tax Avoidance Schemes rules which require a promoter of tax schemes to tell HM Revenue & Customs, and or any relevant tax authority with jurisdiction in Wales of any specified notifiable arrangements or proposals and to provide prescribed information on those arrangements or proposals within set time limits as contained in Part 7 of the Finance Act 2004 and in secondary legislation made under vires contained in Part 7 of the Finance Act 2004 and as extended to National Insurance Contributions by the National Insurance Contributions (Application of Part 7 of the Finance Act 2004) Regulations 2012, SI 2012/1868 made under s.132A Social Security Administration Act 1992;

Draft Business Plan has the meaning given to it in sub-clause 8.1(b) (*The Business Plan (including the Annual Budget)*);

Environmental Information Regulations means the Environmental Information Regulations 2004 together with any guidance and/or codes of practice issued by the Information Commissioner or relevant Government department in relation to such regulations;

Expert has the meaning given to it in clause 11.3 (*Disputes*);

Fees Regulations means The Freedom of Information and Data Protection (Appropriate Limit and Fees) Regulations 2004;

[**Finance Parties** means [◆];]

Founder Shareholders means the Shareholders who entered into this Agreement on the date on which it was signed;

FOIA means the Freedom of Information Act 2000 and any subordinate legislation (as defined in section 84 of the Freedom of Information Act 2000) made under the Freedom of Information Act 2000 from time to time together with any guidance and/or codes of practice issued by the Information Commissioner or relevant Government department in relation to such Act;

Funding Agreements has the meaning given to it in the Strategic Partnering Agreement;

General Anti-Abuse Rule means:

- (a) the legislation in Part 5 of the Finance Act 2013; and
- (b) any future legislation introduced into parliament to counteract tax advantages arising from abusive arrangements to avoid national insurance contributions;

Guaranteed Amount has the meaning given in clause 8.13(a) (*Working Capital*);

Halifax Abuse Principle means the principle explained in the CJEU Case C-255/02 Halifax and others;

Indebtedness means any obligation for the payment or repayment of money, whether joint or several, actual or contingent, in respect of:

- (a) moneys borrowed or raised (including the capitalised value of obligations under financial leases and hire purchase agreements and deposits), debit balances at bank accounts and interest and other charges thereon or in respect thereof;
- (b) any liability under any debenture, bond, note, loan stock, commercial paper or other security or under acceptance or documentary credit, bill discounting or note purchase facilities;
- (c) any liability in respect of the deferred acquisition cost of property, assets or services to the extent payable after the time of acquisition or possession thereof by the party liable;
- (d) any guarantee or other assurance against financial loss in respect of any of the indebtedness specified in this definition;
- (e) any cost or liability under any interest rate or currency hedging agreement; and
- (f) any other transaction having the commercial effect of the borrowing or raising of money.

Independent Director has the meaning given to it in clause 6.7(a) (*Step-aside provisions*);

Index Linked means in relation to any amounts or sums, such amounts or sums as adjusted on each anniversary of the date of this Agreement in accordance with the following formula:

Amount or sum x (RPIXd / RPIX0)

Where RPIXd is the value of the Retail Prices Index (All Items Excl Mortgage Interest) published or determined with respect to the month most recently preceding the relevant anniversary of the date of this Agreement and RPIX0 is the value of the Retail Prices Index (All Items Excl Mortgage Interest) in respect of [◆];

Individual Commitment has the meaning given in Schedule 10 (*Working Capital Agreement*);

Insolvency Event has the meaning given to it in the Strategic Partnering Agreement;

Initial PSDP Shareholders means [◆];

Information has the meaning given to it in clause 13.10 (*Freedom of Information*);

Instruction to Sell Notice has the meaning given to it in clause 9.6 (*Events of Default and deemed transfers*);

Investment has the meaning given to it in clause 9.6 (*Events of Default and deemed transfers*);

Law has the meaning given to it in the Strategic Partnering Agreement;

Lock In Period has the meaning given to it in clause 9.12(a) (*Lock In Periods*);

Material Default means the occurrence of an SPA Material Default as referred to in clause 23.12 of the Strategic Partnering Agreement;

Material Shareholder means any Shareholder holding fifteen per cent (15%) or more of the issued Share capital;

MIM means the Welsh Government's Mutual Investment Model;

New Shareholder has the meaning given to it in sub-clause 2.1(b) (*Conditions precedent*);

Occasion of Tax Non-Compliance means:

- (a) any tax return of the Shareholder submitted to a Relevant Tax Authority on or after 1 October 2012 is found to be incorrect as a result of:
 - (i) a Relevant Tax Authority successfully challenging the Shareholder under the General Anti-Abuse Rule or the Halifax Abuse Principle or under any tax rules or legislation that have an effect equivalent or similar to the General Anti-Abuse Rule or the Halifax Abuse Principle;
 - (ii) the failure of an avoidance scheme which the Shareholder was involved in, and which was, or should have been, notified to a Relevant Tax Authority under the DOTAS or any equivalent or similar regime; and/or
- (b) the Shareholder's tax affairs give rise on or after 1 April 2013 to a criminal conviction in any jurisdiction for tax related offences which is not spent at the date of this Agreement or to a penalty for civil fraud or evasion;

[**Offer Notice** has the meaning given in the Company Articles;]

Offer to Allot has the meaning given to it in sub-clause 4.4 (*Offers to Allot*);

Original Meeting has the meaning given to it in sub-clause 6.4(b) (*Manner of giving Shareholder approval*);

Other Directors has the meaning given to it in sub-clause 6.4(b) (*Manner of giving Shareholder approval*);

Outgoing Director has the meaning given to it in sub-clause 5.8 (*Composition of the Company Board and the right to appoint Directors*);

Outgoing Shareholder has the meaning given to it in sub-clause 5.9 (*Composition of the Company Board and the right to appoint Directors*);

Participants has the meaning given to it in the Strategic Partnering Agreement;

Personal Data has the meaning given to it in the Data Protection Laws, and refers to personal data processed by any party in connection with its respective rights and obligations under this Agreement;

Potential Default has the meaning given to it in clause 9.8 (*Events of Default and deemed transfers*);

Proceedings means any adjudication, litigation, arbitration or administrative proceedings;

Project has the meaning given to it in the Strategic Partnering Agreement;

Project Agreement has the meaning given to it in the Strategic Partnering Agreement;

Project Agreement Counterparty has the meaning given to it in the Strategic Partnering Agreement;

[Project Documents means this Agreement, the Strategic Partnering Agreement, the Project Agreements, the Supply Chain Agreements and the Funding Agreements;]

Project Document Conflict Authorisation has the meaning given to it in clause 5.28 (*Director's power to authorise conflict situations*);

Project Document Conflict Authorisation Terms has the meaning given to it in clause 5.29 (*Director's power to authorise conflict situations*);

Project Service Provider has the meaning given to it in the Strategic Partnering Agreement;

Provisional Transfer Notice has the meaning given to it in clause 10.6 (*Tax compliance*);

PSDP Change in Ownership means:

- (a) any sale, transfer or disposal of any legal, beneficial or equitable interest in any or all of the shares in the PSDP (while it is the B Shareholder) or any B Shareholder Member which is a company including the control over the exercise of voting rights conferred on those shares or the control over the right to appoint or remove directors;
- (b) any change in the members of any B Shareholder Member which is a limited liability partnership or any change the voting rights in relation to such limited liability partnership;
- (c) any change in the partners of any B Shareholder Member which is a partnership or a limited partnership or any change in the voting rights in relation to such partnership or limited partnership; and/or

any other arrangements that have or may have or which result in the same effect as paragraph (a), (b) or (c) above;

PSDP Directors has the meaning given to it in clause 6.7(a)(ii) (*Step-aside provisions*);

Qualifying Bid has the meaning given to it in Schedule 5 (Sale Agent);

Recipient has the meaning given to it in sub-clause 13.7(b) (*Confidentiality*);

Relevant Director has the meaning given to it in clause 5.24 (*Director's power to authorise conflict situations*);

[Relevant Shareholder has the meaning given to it in clause 5.16 (*Composition of the Company Board and the right to appoint Directors*);]

Relevant Tax Authority means HM Revenue & Customs, or, if applicable, a tax authority in the jurisdiction in which the Shareholder and the Company is ordinarily based for the purpose of carrying out its business;

Request for Information shall have the meaning given to it in the FOIA or the Environmental Information Regulations as relevant;

"Reserve Account" means the account set up in the name of the Company for the purposes of holding payments under the Working Capital Agreement;

Reserved Matter Board Approval means those matters listed in Schedule 8 (*Reserved Matters*) and ticked in the third column (entitled "Board"), which shall not be carried out without prior approval in accordance with clause 6.2(b)(*Reserved Matters*);

Reserved Matters means those matters listed in Schedule 8 (*Reserved Matters*);

Responsible Shareholder has the meaning given to it in clause 9.8 (*Events of Default and deemed transfers*);

Restricted Person means either:

- (a) any person who has a material interest in the manufacture, production, sale or distribution of [pornography,] or [arms and weapons] or [the production of tobacco products and/or alcoholic beverages];
- (b) a person who poses, or could pose [(in the reasonable opinion of WGCo)] a threat to national security;
- (c) [any person whose tax returns submitted on or after 1 October 2012 have been found to be incorrect as a result of:
 - (i) HM Revenue and Customs successfully challenging it under the General Anti-Abuse Rule or the Halifax Abuse Principle;
 - (ii) the Relevant Tax Authority challenging it under any tax rules or legislation that have an effect equivalent or similar to the General Anti-Abuse Rule or the Halifax Abuse Principle; and/or
 - (iii) the failure of an avoidance scheme which the person was involved in and which was, or should have been, notified under the DOTAS or any equivalent or similar regime in a jurisdiction in which the person is established;]

Sale Agent has the meaning given to it in clause 9.6;

Schedules means Schedules 1 (*Definitions and Interpretation*) to 10 (*Working Capital Agreement*) attached to this Agreement;

Security Interest means any mortgage, pledge, lien, charge, assignment, encumbrance, right of set-off, guarantee, title transfer or retention arrangement or security interest whatsoever, howsoever created or arising, including any "flawed asset" arrangement and "secured" will be construed accordingly;

Second Consideration Period has the meaning given to it in clause 11.1 (*Disputes*);

Services has the meaning given to it in the Strategic Partnering Agreement;

Shares means the issued Shares of any class referred to in Schedule 2 (*Details of the Company*) together with any further shares issued from time to time pursuant to clause 4 (*Funding of the Company and financial matters*);

[Shareholder Loan Agreement means, where Shareholder Debt has been advanced or otherwise made available to any WEP Company, the agreement between that WEP Company and the relevant Shareholder(s) setting out the terms on which that Shareholder Debt has

been advanced or otherwise made available to that WEP Company [and includes the Working Capital Agreement];]

Shareholder Debt means any Indebtedness (other than share capital) advanced or otherwise made available to any WEP Company by a Shareholder, a B Shareholder Member or an Associate of a Shareholder or of a B Shareholder Member;

Shareholders means the parties to this Agreement (except for the Company) and such other persons who may become shareholders in the Company from time to time as permitted by this Agreement and the Company Articles and Shareholder means any one (1) of them;

Shareholders' Forum has the meaning given in clause 6.8 (*Shareholders' Forum*);

Shareholder's Group means:

- (a) in relation to a Shareholder which is a company, the Shareholder and each of its Associates; and
- (b) in the case of WGCo each Associate of WGCo and each member of WGCo Group;

SPB means the Strategic Partnering Board, as defined in the Strategic Partnering Agreement;

Stage 2 Submission has the meaning given to it in the Strategic Partnering Agreement;

Strategic Partnering Agreement means the strategic partnering agreement between the Company and [◆] dated on or around [◆];

Suitable Third Party means any person who is not a Restricted Person;

Supply Chain Agreements means has the meaning given to it in the Strategic Partnering Agreement;

Transfer Event has the meaning given to it in clause 9.3 (*Events of Default and deemed transfers*);

Transfer Notice has the meaning given to it in the Company Articles;

Transparency Information means the information described in Part A and Part B of Schedule 7 (*Transparency Information and Commercially Sensitive Information*) and, for the avoidance of doubt, in no circumstances shall any Transparency Information constitute Commercially Sensitive Information whether or not listed in Part C of Schedule 7 (*Transparency Information and Commercially Sensitive Information*);

WEP Company means the Company, together with any of its subsidiaries from time to time, each individually referred to as a WEP Company;

[WEP Company Articles means the articles of association of any WEP Company (other than the Company) in the form set out in [◆] (*Articles of any WEP Company (other than the Company)*) as amended from time to time;]

[Working Capital Agreement means the working capital agreement set out in Schedule 10 (*Working Capital Agreement*);]

Working Capital Facility means the working capital facility set out in Schedule 10 (*Working Capital Agreement*);

"Working Capital Limit" has the meaning given in paragraph 2.1 of Schedule 10 (*Working Capital Agreement*);

Working Capital Providers means [◆];

Working Capital Requirement means, in respect of any period, the maximum working capital requirement of the Company during that period, disregarding for this purpose any sums paid or received by the Company which form part of the capital costs of a specific project or represent capital payments to fund a specific project or represent capital investment in an individual WEP Company (other than the Company);

WGCo means [◆];

WGCo Director means a Director appointed by WGCo or the WGCo Group; and

WGCo Group means:

- (a) any Associate of WGCo;
- (b) the Welsh Ministers or any agency, subsidiary or other body owned or controlled by the Welsh Ministers; and/or
- (c) any public sector body, third sector body or quasi autonomous non-governmental organisation who assumes and/or undertakes (whether as successor or otherwise) some or all of the functions exercised by WGCo or the Welsh Ministers.

1.2 Interpretation

This Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings and marginal notes and references to them in this Agreement shall be deemed not to be part of this Agreement and shall not be taken into consideration in the interpretation of this Agreement.
- (b) Except where the context expressly requires otherwise, references to clauses, sub-clauses, paragraphs, sub-paragraphs, parts and Schedules are references to clauses, sub-clauses, paragraphs, sub-paragraphs and parts of and Schedules to this Agreement and references to Sections, Appendices and Attachments (if any) are references to Sections, Appendices and Attachments to or contained in this Agreement.
- (c) The Schedules to this Agreement (including any Attachments thereto) are an integral part of this Agreement and a reference to this Agreement includes a reference to the Schedules. In the event of any inconsistency between the provisions of the body of this Agreement and the Schedules, the body of this Agreement shall take precedence.
- (d) Words importing persons shall, where the context so requires or admits, include individuals, firms, partnerships, trusts, corporations, governments, governmental bodies, authorities, agencies, unincorporated bodies of persons or associations and any organisations having legal capacity.
- (e) Where the context so requires words importing the singular only also include the plural and vice versa and words importing the masculine shall be construed as including the feminine or the neuter or vice versa.

- (f) The language of this Agreement is English. All correspondence, notices, and information shall be in English.
- (g) References to any Law are to be construed as references to that Law as from time to time amended or to any Law from time to time replacing, extending, consolidating or amending the same.
- (h) References to a public organisation shall be deemed to include a reference to any successor to such public organisation or any organisation or entity which has taken over either or both the functions and responsibilities of such public organisation.
- (i) The words in this Agreement shall bear their natural meaning. The parties have had the opportunity to take legal advice on this Agreement and no term shall, therefore, be construed contra proferentem.
- (j) Reference to **parties** means the parties to this Agreement and references to a **party** mean one of the parties to this Agreement.
- (k) In construing this Agreement, the rule known as the ejusdem generis rule shall not apply nor shall any similar rule or approach to the construction of this Agreement and accordingly general words introduced or followed by the word other or including or in particular shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (l) Reference to a document being in **Agreed Form** is a reference to the form of the relevant document agreed between the parties and for the purpose of identification initialled by each of them or on their behalf.
- (m) Where this Agreement states that an obligation shall be performed **no later than** or **within** or **by** a stipulated date or event which is a prescribed number of Business Days after a stipulated date or event, the latest time for performance shall be midnight on the last Business Day for performance of the obligations concerned.
- (n) A reference to a **subsidiary** or **holding company** is to be construed in accordance with section 1159 of the Companies Act 2006.
- (o) If there is a conflict between the terms of this Agreement and the Company Articles, the terms of this Agreement shall prevail and, if there is such a conflict, the Shareholders shall procure at the request of any of the Shareholders any modification reasonably required to be made to the Company Articles as shall be necessary to remedy such conflict.
- (p) A person, being a company, shall be **controlled** by another person if that other person owns a majority of the voting equity of that person or controls the majority of the votes at meetings of the board of directors of that person.
- (q) Save where stated to the contrary, references to any agreement or document include (subject to all relevant approvals and any other provisions of this Agreement concerning amendments to agreements or documents) a reference to that agreement or document as amended, supplemented, substituted, novated or assigned.
- (r) References to a **month** [in clauses 8.3 to 8.13 (*Working Capital*)] shall mean a calendar month.
- (s) A reference in this Agreement to matters being agreed by the Directors shall only include Alternates (acting in that capacity) where he/ she is participating in a decision

in place of a Director appointed pursuant to clause 5.1 (*Composition of the Boards and the right to appoint Directors*).

Schedule 3
Agreed Form Business Plan

(Budgeting, Business Planning and financial matters)

The provisions of this paragraph shall apply in respect of each Draft Business Plan prepared from time to time and submitted to the Shareholders for approval. The minimum requirements for an acceptable Business Plan will include:

- (a) the income forecasts for the Company, based on projects expected to be developed in the forthcoming year;
- (b) the costs budget for the Company (including salaries, overheads and consultants fees);
- (c) capital requirements of the Company and how these will be met; and
- (d) business objectives and targets to be met by the Company in meeting its obligations under this Agreement and the Strategic Partnering Agreement.

The Business Plan should not be used as a means of sidestepping the consent matters in clause 6.2 (*Reserved Matters*). Any matters in the Business Plan which are in the nature of matters where Shareholders consent is being provided upfront by virtue of the Business Plan must:

- (a) be specific;
- (b) be such that it is not reasonably practicable to seek the consent required at the time in question; and
- (c) be specifically set out in a section at the start of the Business Plan so that, in the review of the Draft Business Plan, the nature and extent of any deemed consent matters can be easily identified and considered by the Shareholders in deciding whether or not to approve the Draft Business Plan.

[To be inserted]

**Schedule 4
Deed of Adherence**

THIS DEED OF ADHERENCE is made the day of 201[◆]

BY [◆] of [◆] ("**Covenantor**") in favour of the persons whose names are set out in the Schedule to this Deed and is supplemental to the shareholders' agreement dated [◆] 201[◆] made by (1) [PSDP], (2) [WGCo], and (3) [Company] ("**Shareholders' Agreement**").

Terms defined in the Shareholders' Agreement shall bear the same meanings herein.

It is agreed

1. In consideration of the Covenantor being accepted as a party for the purposes of the Shareholders' Agreement by the parties thereto, as from [insert date] ("**Adherence Date**") the Covenantor hereby confirms that it shall be a party to the Shareholders' Agreement as if they had originally been referred to in the Shareholders' Agreement as [◆] and agrees to be bound by all of the relevant provisions of the Shareholders' Agreement from the Adherence Date.
2. The Covenantor warrants and represents to each of the persons whose names are set out in the Schedule to this Deed, that the Covenantor is a Suitable Third Party.
3. The Covenantor makes all those warranties and representations, which are listed in full at clause 10.2 (*Warranties by the PSDP and the Company*) and clause 10.4 (*Tax compliance*) of the Shareholders' Agreement, to each of the persons whose names are set out in the Schedule to this Deed.
4. This Deed is governed by the law of England and Wales.

In witness whereof this Deed has been executed by the Covenantor and is intended to be and is hereby delivered on the date first above written.

SCHEDULE

[Parties to Shareholders' Agreement including those who have executed earlier deeds of adherence].

Schedule 5 Sale Agent

1. In this Schedule 5 (*Sale Agent*) (subject to paragraph 8):

Closing Date has the meaning given to it in paragraph 6;

Purchaser has the meaning given to it in paragraph 6;

Qualifying Bid means a bid for all of the Defaulting Member's Remaining Shares [(whether or not including a bid to purchase all or any of the Defaulting Member's Remaining B Shareholder Debt) or, in the case of paragraph 9, the Defaulting Member's Remaining B Shareholder Debt]:

(a) is accompanied by each of the following:

- (i) an acknowledgement addressed to all of the holders of the A Shares to the effect that the bidder has carried out its own due diligence and in offering to purchase the Investment has not relied on (and an undertaking that it will not rely on) any warranty, statement, undertaking or representation (whether negligent or innocent) made by or on behalf of any holder of the A Shares;
- (ii) a confirmation that if its bid is successful it will enter a Deed of Adherence and pay the Sale Agent's fees;
- (iii) a confirmation of funding for the purchase of such Defaulting Member's Remaining Shares [and any Defaulting Member's Remaining B Shareholder Debt] forming part of such bid and its ability to complete the payment for and the transfer of the Investment within the time period specified in paragraph 6; and

(b) is from a Suitable Third Party which is not Associated with the B Shareholder or any B Shareholder Member;

Reserve Bid has the meaning given to it in paragraph 9(a); and

Reserve Tenders has the meaning given to it in paragraph 9.

2. If the parties are unable to agree on the identity of the Sale Agent within twenty (20) Business Days of the issue of the Instruction to Sell Notice (as defined in clause 9.6 of this Agreement), the Sale Agent shall thereafter be appointed on the application of any party by the President of the Institute of Chartered Accountants in England and Wales with the party making the application requesting that the appointment be made within twenty (20) Business Days of the date the party makes the application referred to.
3. The Defaulting Member shall provide the Sale Agent with all such information as the Sale Agent may request in relation to the Investment and the Sale Agent shall invite tenders from Suitable Third Parties to purchase the Investment.
4. The Defaulting Member and the Sale Agent shall comply with the Financial Services and Markets Act 2000 and all other legislation which may apply from time to time in relation to the offer for sale of the Investment.
5. The Defaulting Member shall take all necessary action to ensure that the Investment has the widest possible market, and shall not do anything which might limit the number of potential bidders for the Investment and shall ensure that it has provided all necessary information to

the Sale Agent to enable the Sale Agent to offer the Investment for sale within fifteen (15) Business Days of the appointment of the Sale Agent.

6. The Defaulting Member shall accept the highest Qualifying Bid which is received by the Sale Agent (with the relevant Suitable Third Party being referred to as the "**Purchaser**") by the end of sixty (60) Business Days from the Instruction to Sell Notice (the "**Closing Date**") and shall take all steps necessary to complete the transfer of its Defaulting Member's Remaining Shares [and any Defaulting Member's Remaining B Shareholder Debt] to the Purchaser within ten (10) Business Days of the Closing Date.
7. Should the Purchaser fail to complete the transfer of the Shares [and any Defaulting Member's Remaining B Shareholder Debt] to the Purchaser within ten (10) Business Days of the Closing Date then the Sale Agent shall remarket the Investment and the procedure referred to in paragraphs 3 to this paragraph 7 shall be followed until either the Investment has been sold to a purchaser or no Qualifying Bid is received by the relevant Closing Date.
8. [Where more than one Qualifying Bid is received, the Sales Agent shall consider the extent to which such bid includes the Defaulting Member's Remaining B Shareholder Debt, and shall compare the price offered for the Defaulting Member's Remaining Shares only for the purposes of determining the highest bid.]
9. [Notwithstanding the provisions of paragraphs 1 to 8, the Sale Agent shall also invite tenders (**Reserve Tenders**) from Suitable Third Parties for the Defaulting Member's Remaining B Shareholder Debt only²⁴ and the provisions of paragraphs 1 to 8 shall apply with necessary changes having been made as if references to the "Investment" were in each case solely to the Defaulting Member's Remaining B Shareholder Debt and subject to the variations in this paragraph 9. In such event:
 - (a) where the aggregate consideration offered pursuant to a Qualifying Bid comprising a Reserve Tender (a "**Reserve Bid**") is greater than under the highest Qualifying Bid which is not a Reserve Bid, or the only Qualifying Bids are Reserve Bids, then the highest Reserve Bid shall be accepted by the Defaulting Member and the sale and transfer of the Defaulting Member's Remaining B Shareholder Debt shall be effected in accordance with the provisions of paragraphs 1 to 7.
 - (b) In all other cases the provisions of paragraphs 1 to 8 above shall apply as if this paragraph 9 had not applied.]
10. [Where a Reserve Bid is accepted pursuant to sub-paragraph 9(a), then the provisions of clause 9.7 shall apply in respect of the Defaulting Member's Remaining Shares.]

²⁴

Schedule 5 – Sale Agent. This mechanism in Schedule 5 (*Sale Agent*) allows for offers for the Loan Notes only on the basis that this flexibility may add some liquidity and enhance the value received in a default transfer scenario.

Schedule 8 Reserved Matters²⁶

| Reference | Shareholder | Board | Reserved Matter |
|------------------|--------------------|--------------|---|
| A | | | Financial |
| A1 | ✓ | | The approval of any change to the dividend policy set out in clause 7 (<i>Distributions</i>) which would adversely affect any Material Shareholder. |
| A2 | ✓ | | The making of any political donation. |
| A3 | ✓ | | The Company giving any deed of guarantee or indemnity involving a potential liability of £[100,000] (Index Linked) or more which in the reasonable opinion of a Material Shareholder is not required for the proper operation of the Company. |
| B | | | Shares/Shareholder Debt and constitutional |
| B1 | ✓ | | Any amendment to the Memorandum or Articles of the Company, which would adversely affect any Material Shareholder. |
| B2 | ✓ | | A change in the status of the Company from a limited company to a public limited company or from a company limited by shares to any other form of legal entity which would adversely affect any Material Shareholder or the Company. |
| B3 | ✓ | | A listing of the Company's share capital which would adversely affect any Material Shareholder or the Company. |
| C | | | Management, control, Directors and employees |
| C1 | ✓ | | Moving the central management and control of the Company or the Company's tax residence outside the UK. |
| C2 | | ✓ | The approval of (and any change to) Company policies which affect the potential statutory liability of Directors (e.g. anti-bribery and corruption, health and safety, non-discrimination). |
| C3 | | ✓ | Any increase in the payment of fees or remuneration to Directors to the Company save as expressly provided under this Agreement. |
| C4 | | ✓ | Conflict Authorisation to a Conflict Situation pursuant to clause 5.24 (<i>Director's</i> |

²⁶ **Schedule 8 – Reserved Matters.** Welsh Government reserves the right to add further Reserved Matters into Schedule 8 following further discussion with ONS. The approach will be confirmed during dialogue. Three other important general points: (1) the items in this table must be included as a bid compliance matter; (2) a bidder/PSDP may suggest additional items for consideration/evaluation during the bid process, including a category of matters that are reserved for approval by a further distinct category of Shareholder (provided these do not cut across the effect of the compliance matters listed above); and provided always (3) no separate Reserved Matter or Reserved Matter type issues Lists are to be included which operate to exclude a particular Shareholder from voting or which remove all Shareholder voting rights on specific matters.

| Reference | Shareholder | Board | Reserved Matter |
|-----------|--|-------|---|
| | | | <i>power to authorise conflict situations).</i> |
| D | | | Other WEP Company related Reserved Matters |
| D1 | <i>Approval level as per the relevant item</i> | | In relation to each WEP Company (other than the Company) each of the above Reserved Matters in this table shall also be a Reserved Matter in relation to that WEP Company (as if references to the Company were references to WEP Company). |

Schedule 9
Letters of appointment of Nominated Directors

[Insert Name and Address of the Director]

[◆] 20[◆]

Dear [◆]

YOUR APPOINTMENT AS A DIRECTOR OF [INSERT NAME OF THE COMPANY] LIMITED (THE "COMPANY")

Thank you for accepting your appointment to become a director of the Company. We note that you have been appointed by [*insert name of appointing shareholder*].

Your appointment is made pursuant to and is subject to the terms and conditions set out in the Shareholders Agreement dated [◆] between, amongst others, [◆] (the "**Shareholders' Agreement**"). Your appointment (and the continuation of it) is also subject always to the Articles of Association from time to time of the Company ("**Articles**"), a copy of the current version of which accompanies this letter.

Terms defined in the Shareholders Agreement shall bear the same meanings in this letter of appointment.

1. Time Commitment

- 1.1 We anticipate that your normal commitment to the Company will include attendance at Company Board meetings (anticipated to be at intervals of [◆] months), [meetings of any committees of the Company Board of which you are a member] and any general meetings of the members of the Company. You will be required to consider all relevant papers prior to each Company Board meeting.
- 1.2 By accepting this appointment, you confirm that you are able to allocate sufficient time to meet the expectations of your role.

2. Roles and Duties

- 2.1 As a director you will be a member of the Company Board. The Company Board is responsible for overall supervision and control of the activities of the Company.
- 2.2 It is your duty as a director of the Company to take decisions (and exercise your other powers and responsibilities as a director) in good faith and in such a way as you consider is in the best interests of the Company.
- 2.3 The directors of the Company are required to use all reasonable endeavours to ensure that they are:
- (a) complying at all times with the Shareholders Agreement and in particular the needs for shareholder consents under clause 6.2(*Reserved Matters*) and any corporate governance protocol which the Company adopts;

- (b) exercising proper control over the Company's services, activities, assets, staff and consultants;
- (c) procuring that the Company acts in accordance with its articles of association;
- (d) conducting the Company's affairs with honesty and integrity;
- (e) managing prudently the Company's resources, including public and private money which is invested in the Company;
- (f) procuring that conditions attached to offers of grants/loans are adhered to;
- (g) ensuring adequate record keeping and adhering to all administrative requirements imposed by company legislation and other relevant legislation; and
- (h) complying with all applicable statutes, rules and regulations.

2.4 In your role as a director, you will also be required to:

- (a) participate constructively in decision making within the Company Board;
- (b) [act as a member of such committees of the Company Board (for example the audit or remuneration committees) as may reasonably be required]²⁷;
- (c) deal with any special responsibilities which may reasonably be assigned to you by the Company Board;
- (d) constructively challenge and contribute to the development of company policy and strategy;
- (e) scrutinise the performance of management and contractors in meeting agreed goals and objectives and monitor the reporting of performance;
- (f) maintain a sound system of internal control to safeguard the investment of members and other stakeholders in the Company and the Company's assets;
- (g) satisfy yourself that financial information is accurate and that financial controls and systems of risk management are robust and defensible;
- (h) comply with all reasonable directions and regulations of the Company;
- (i) fulfil the role of director of each WEP Company (other than the Company) and the terms of this letter apply to each such directorship on like terms; and
- (j) act at all times in accordance with the Articles, the Shareholders Agreement, any corporate governance protocol which the Company adopts and any obligations imposed on directors by law.

2.5 If you strongly disagree with a decision of the Company Board, you are entitled to have your dissent recorded in the minutes of the relevant meeting, however you must not actively undermine action which has been decided upon by majority vote at a Company Board meeting.

²⁷

Insert if appropriate

2.6 [In addition, you will have the responsibilities as set out in the Director – Specification of Role a copy of which is attached in the Schedule to this letter of appointment.]

3. Committee

3.1 You may be asked to serve on any committee of the Company Board as the Company Board may require from time to time. In the event that you are requested to serve on any such committee, you will be provided with details of the committee's terms of reference, any specific responsibilities this will entail and any fees that may be involved.]

4. Fees and Expenses

4.1 [The role of Director of the Company shall attract remuneration of £[◆]²⁸ per annum (Index Linked). Such fee payable to you shall be due, pro rata, monthly in arrears, from the date of your appointment and is payable within thirty (30) days of receipt of an invoice by the Company.]

5. Conflicts of Interest

5.1 As a Director of the Company you should ensure, so far as is reasonably possible, that other Directors of the Company act in the interests of the Company.

5.2 As a Director of the Company you must put the interests of the Company before your own interests or those of any other person or organisation. In particular, please note that:

- (a) you should attempt to avoid conflicts or possible conflicts between your personal interests and the interests of the Company. If a conflict or possible conflict arises you must put the interests of the Company first;
- (b) where there is a conflict between the interests of the Company and the interests of one or more of [*insert name of each shareholder appointing the Director*] (who are responsible for your appointment as a Director), you must put the Company's interests first; and
- (c) where there is a conflict or a possible conflict between the interests of the Company and another organisation with which you are affiliated or connected, you must declare this interest to the other Directors at the earliest opportunity in order that it can be authorised in advance either by the members of the Company or the Directors. In addition you must be aware of your obligations set out in the Shareholders' Agreement and in particular clauses 5.20 to 5.29 (*Director's power to authorise conflict situations*) of the Shareholders Agreement.

6. Ceasing to be a Director

6.1 Your appointment as a director will automatically cease in the event that:

- (a) you resign as director;
- (b) [*insert anything in addition set out in the Articles*].

6.2 Shareholders holding a majority of [◆] Shares may give a notice to the Company in accordance with clause 5.8 (*Composition of the Company Board and the right to appoint Directors*) of the Shareholders Agreement removing you from office:

²⁸ **Clause 4.1- Directors remuneration.** Note that agreement is required on the initial level Director remuneration. It will be set at bid stage and this will be required to be in line with corporate good practice. In respect of travel expenses this is expected to be standard class for train travel etc.

- (a) in accordance with clause of the Shareholders Agreement there cease to be any holders of [◆] Shares in the Company; or
 - (b) Shareholders holding a majority of [◆] Shares remove you from office in accordance with clause 5.8 (*Composition of the Company Board and the right to appoint Directors*) of the Shareholders Agreement on the basis that you exercised your voting rights, or otherwise acted or omitted to act, in contravention of the Shareholders Agreement.
- 6.3 In the event that any matter specified in any of paragraphs 6.1 or 6.2 above occurs you will resign immediately from all offices held by you in the Company and any subsidiary of the Company.
- 6.4 In particular, in signing this letter, you acknowledge that your office is subject to the terms of the Shareholders Agreement and the Articles and may be terminated as permitted under their terms and that upon termination you will vacate office in relation to the Company forthwith without raising any claim whatsoever against the Company in relation to your vacation of office (otherwise than in respect of any properly incurred and unpaid expenses due to you up to the date you vacate your office).
- 6.5 In the event that you fail to resign from office you hereby authorise the Company Secretary to appoint some person in your name and on your behalf to execute all documents necessary to bring about such resignations.
- 6.6 On termination of your appointment, you agree that you will promptly return to the Company Secretary all papers and property of the Company which are in your possession.
- 7. Insurance**
- 7.1 The Company [proposes to obtain][has obtained] directors' and officers' liability insurance and intends to maintain such cover for the full term of your appointment. The indemnity limit is £[◆]. A copy of the policy document will be available in due course.
- 8. Indemnity**
- 8.1 Subject to the provisions of the Companies Act 2006 and the Articles, as a Director you shall be indemnified out of the assets of the Company against any liability incurred by you in defending any proceedings, whether civil or criminal, alleging liability for negligence, default, breach of duty or breach of trust in relation to the affairs of the Company and in which judgment is given in your favour, or in which you are acquitted, or in connection with any application in which relief is granted to you by the court.
- 9. Confidentiality**
- 9.1 All information acquired during your appointment is confidential to the Company and should not be disclosed to any third parties or used for any reason other than in the interests of the Company, either during or after your appointment. You will not, whether during your appointment or after its termination, except in the proper performance of your duties or as required by law, use or divulge, and shall use all reasonable endeavours to prevent the use or disclosure of any trade or business secrets or any information concerning the business or finances of the Company or of any dealings, transactions or affairs of the Company or any client, customer or supplier of the Company which comes to your knowledge during the course of your appointment. You will also comply with the provisions of clause 13.7 (*Confidentiality*) of the Shareholders Agreement as if it applied to you.
- 9.2 For the avoidance of doubt, you shall be entitled to share information you obtain by virtue of your role with the holders of [*insert class*] Shares, so long as this does not run counter to the provisions regarding conflicts of interest outlined above.

We should be grateful if you would accept these terms by signing and returning to us the attached copy of this letter.

Yours sincerely

.....
For and on behalf of [**INSERT NAME OF THE COMPANY**] Limited

I agree to the above terms of appointment as a Director.

.....
[**DIRECTOR'S SIGNATURE**]

Schedule 10
Working Capital Agreement²⁹

1. Definitions & Interpretation

1.1 In this Working Capital Agreement, the following terms will have the following meanings:-

"Event of Default" means any of the following:

- (a) any of the events or circumstances in clause [2.4 (*Termination*)] of this Agreement;
- (b) a failure by the Company to make any repayment to a Working Capital Provider in accordance with paragraph 4 of this Working Capital Agreement where such failure has not been rectified within ten (10) Business Days of the date that such repayment was due to be made; or
- (c) the occurrence of an Insolvency Event in respect of the Company (but not, for the avoidance of doubt, any other WEP Company);

"Individual Commitment" means, in respect of a given Working Capital Provider, the commitment of that Working Capital Provider as set out in paragraph 2.2 of this Working Capital Agreement as may be adjusted from time to time in accordance with paragraph 2.3 of this Working Capital Agreement;

"Reserve Account" means the account set up in the name of the Company for the purposes of holding payments under this Working Capital Agreement; and

"Working Capital Limit" has the meaning given in paragraph 2.1 of this Working Capital Agreement.

2. Working Capital Facility

2.1 Without prejudice to [paragraph 2.3 and 4.1 of this Working Capital Agreement], the total limit applicable to the Working Capital Facility to be provided by the Working Capital Providers hereunder shall be [£◆]³⁰ (the "**Working Capital Limit**").

2.2 Each Working Capital Provider shall, on a several basis and not jointly, make available funds forming part of the Working Capital Limit in accordance with this Working Capital Agreement in the following amounts:

| Working Capital Provider | Working Capital Provider's Individual Commitment |
|---------------------------------|---|
| | [£◆] ³¹ |

2.3 Subject to Article [9.2(f)], a Working Capital Provider's Individual Commitment shall be:

²⁹ To be aligned with Bidder solution, including the working capital plan to be submitted pursuant to Section F1 (WEPCo working capital and resourcing plan of Annex 9 of Volume 1 of the ITPDSB)

³⁰ To be populated for Final Bid

³¹ To be populated for Final Bid

- 2.3.1 increased or decreased pro rata to the number of Shares held by that Working Capital Provider as compared with the aggregate number of Shares in issue; and
- 2.3.2 increased or decreased pro rata to the overall Working Capital Limit determined by the Company from time to time pursuant to this Agreement,

provided that the Individual Commitment of any Working Capital Provider shall only be increased where that Working Capital Provider has expressly so agreed in writing to such increase.

- 2.4 When drawing under or otherwise utilising the Working Capital Facility, the Company must comply with:
 - 2.4.1 the Working Capital Limit in aggregate;
 - 2.4.2 each Working Capital Provider's Individual Commitment; and
 - 2.4.3 the requirement for drawing under or other utilisation of Working Capital Providers' Individual Commitments to be done on a pro rata basis (proportionate to the percentage of the relevant Working Capital Provider's shareholding in the Company)

All other provisions of this Working Capital Agreement relating to the level of drawing or utilisation of the Working Capital Facility shall be subject to this paragraph 2.4.

- 2.5 Subject to the provisions of clauses 8.3 to 8.7 (*Working Capital*) of this Agreement ³², the Working Capital Facility shall be, and shall only be capable of being utilised for the purposes of providing working capital for the Company as the Directors see fit in accordance with the provisions of the Company Articles and this Agreement.

2.6 Availability

- 2.6.1 The Working Capital Facility shall be available for drawing by the Company from the [date of this Agreement] until [*insert date 5 years from date of Shareholders Agreement*]. Following [*insert date 5 years from date of Shareholders Agreement*] the Working Capital Facility will cease to be available unless the holders of a majority of the A Shares and the holders of a majority of the B Shares have agreed in writing to its renewal or extension.
- 2.6.2 Without prejudice to clause 8.4(c) of this Agreement, the Working Capital Facility shall be repaid in full:
 - (a) on or before [*insert date 5 years from date of Shareholders Agreement*] (subject always to paragraph 2.6.4 of this Working Capital Agreement); or
 - (b) on such later date as may be agreed in writing by the Company, the holders of a majority of the A Shares and the holders of a majority of the B Shares; or
 - (c) if earlier, on the occurrence of an Event of Default.

Save to the extent agreed in writing by the Company, the holders of a majority of the A Shares and the holders of a majority of the B Shares, if the Working Capital Facility is not repaid by [*insert date 5 years from date of Shareholders Agreement*],

³² Bidders should adjust drafting as appropriate to their solution in the event that the PSDP is not providing working capital.

then the full amount of the Working Capital Facility shall be due and payable on that date.

2.6.3 [Not Used]³³

2.6.4 Without prejudice to clause 8.4(c) (*Working Capital*) of this Agreement and paragraph 2.6.2 of this Working Capital Agreement, the Company may and shall, where the Directors so resolve in accordance with this Agreement and the Company Articles, repay all or any amounts drawn or deemed to be drawn (and not repaid) under the Working Capital Facility from the Working Capital Providers from time to time at any time without penalty prior to [insert date 5 years from date of Shareholders Agreement] or later date as referred to in paragraph 2.6.2(b) or the occurrence of any Event of Default, provided that:

- (a) [where repayments are made pursuant to this paragraph 2.6.4 , the Working Capital Limit and the Individual Commitments of any such Working Capital Provider shall remain unaffected and any amounts so repaid shall be available for redrawing as part of the Working Capital Facility in accordance with the terms of this Agreement; and]
- (b) repayments shall be made to each Working Capital Provider pro rata to sums drawn down from that Working Capital Provider pursuant to paragraph 2.4.3 of this Working Capital Agreement.

For the avoidance of doubt, the prior written consent of the Shareholders pursuant to clause 8.5 (*Working Capital*) of this Agreement shall not require to be sought in respect of any proposal to repay amounts pursuant to this paragraph 2.6.4 of this Working Capital Agreement.]³⁴

2.6.5 Nothing in this Working Capital Agreement shall prevent repayments to a Working Capital Provider in pursuance of clause 8.10 (*Working Capital*) (as read with clause 8.11 (*Working Capital*)) of this Agreement.

2.7 Drawdown Process

2.7.1 In order to require a drawdown under the Working Capital Facility, the Company shall deliver to a Working Capital Provider a drawdown notice in the form set out in Appendix 1 to this Schedule 10 (*Working Capital Agreement*) and complying with the requirements of Appendix 1 to this Schedule 10 (*Working Capital Agreement*). Unless an Event of Default has occurred, provided the requirements of the drawdown notice have been met, the Working Capital Provider shall make payment of the amount requested in the drawdown notice to the Reserve Account on a date falling not later than five (5) Business Days after the date of the drawdown notice.

2.7.2 [On the date of completion under clause 2.2 of this Agreement, the Company shall be deemed to have issued a drawdown notice for £[•] from the PSDP and £[•] from the WCo Working Capital Provider and the Working Capital Providers shall

³³ Where a revolving facility is not envisaged as provided for in para 2.6.4 (a) that provision should be deleted. Bidder specific drafting may be included here.

³⁴ PSDP may elect to delete this paragraph. In such circumstances the drafting will require to reflect a requirement for any repayment of Working Capital other than in accordance with paragraph 2.6.2 or Clause 8.4(c), to be a Reserved Matter.

transfer these amounts deemed to have been drawn down to the Reserve Account on or before completion of this Agreement under clause 2.2 of this Agreement.]³⁵

3. Interest

- 3.1 The rate of interest applicable to the Working Capital Facility for all amounts drawn and outstanding under the Working Capital Facility at any time shall be, subject always to clause 8.9 (Working Capital) of this Agreement, in respect of all other sums drawn under the Working Capital Facility and paid to the Company the rate of [◆]% per annum.

4. Payments

- 4.1 All payments by the Company to the Working Capital Provider under this Schedule 10 (*Working Capital Agreement*) shall be in cleared funds and made free and without deduction of Tax unless the Company is required by law to make a payment subject to deduction or withholding of Tax, in which case the amount payable by the Company will be sufficiently increased to ensure that Working Capital Provider receives and retains a net sum equal to that which it would have received and retained were no deduction or withholding made. If a Working Capital Provider subsequently receives a Tax credit which is referable to the increased payment and which enhances its position, then the relevant Working Capital Provider will reimburse the Company sufficient to redress the position up to the amount received so long as by so doing the relevant Working Capital Provider does not prejudice receipt or retention of the Tax credit.
- 4.2 All payments of interest due to a Working Capital Provider will be paid semi-annually (on 31 December and 30th June) to the relevant Working Capital Provider as directed by the relevant Working Capital Provider. Interest shall be calculated in respect of all amounts drawn down from the Working Capital Facility and provided by each individual Working Capital Provider under this Agreement and payable to the relevant Working Capital Provider in accordance with paragraph 3.1 of this Working Capital Agreement.
- 4.3 All payments to be made by the Company under this Working Capital Agreement shall be calculated and be made without (and free and clear of any deduction for) set-off or counterclaim.
- 4.4 All sums of interest will accrue on a daily basis on the amount paid into the Reserve Account and be calculated on the basis of a year of 365 days and, in any such case, for the actual number of days elapsed. Interest shall continue to accrue on sums due following a decree or judgement as well as before it, and at the same rate.
- 4.5 Any determination by a Working Capital Provider of any amount of principal, interest, commission or charges or an applicable interest rate owed to such Working Capital Provider shall, in the absence of manifest error, be conclusive and binding on the Company.
- 4.6 Where the due date for payment of any amount under this Working Capital Agreement is not a Business Day then (without affecting subsequent payment dates) actual payment will be required on the next Business Day.

5. Indemnity

- 5.1 The Company will at all times on demand indemnify the Working Capital Providers against all actions, suits, Proceedings, claims, demands, liabilities, costs, expenses, losses, damages and charges whatsoever (except those arising as a result of the gross negligence or wilful misconduct of the relevant Working Capital Provider) which may occur in relation to

³⁵ Noting these amounts should be proportionate and no greater than the Individual Commitments contained in paragraph 2.2. Bidders to complete in Final Bid.

or arising out of any utilisations of the Working Capital Facility made available under this Agreement.

- 5.2 The Company will pay the Working Capital Providers the amount of all payments made (whether directly or by way of set-off, counterclaim or otherwise) and all losses, costs or expenses suffered or incurred from time to time by the Working Capital Providers arising under any liability which the Working Capital Providers have incurred (directly or indirectly) in relation to any utilisations of the Working Capital Facility.
- 5.3 The liability of the Company under paragraphs 5.1 and 5.2 of this Working Capital Agreement shall not be affected by any time being given or by anything being done or not done by the Working Capital Providers.

Appendix 1

From: [WEPCo]
To: [Working Capital Provider]
Address:
Attention:
Date:

Dear Sirs

Working Capital Facility between [] and [WEPCo] dated [●] (the "Working Capital Facility")

- 1 We refer to the Working Capital Facility. This is a drawdown notice. Terms defined in the Shareholders Agreement between, amongst others, the Working Capital Providers and the Company dated [] have the same meaning in this drawdown notice.
- 2 We request an advance under the Working Capital Facility on the following terms:
Amount: [●]
- 3 Proposed drawdown date: [●] (or, if that is not a Business Day, the next Business Day).
- 4 The proceeds of this Advance should be credited to the Reserve Account [*details*].
- 5 This drawdown notice is irrevocable.
- 6 [We attach to this drawdown notice a schedule detailing the amount of working capital required by us and [the anticipated expenditure for which that working capital will be required/the expenditure which has been funded from sums standing to the credit of the Reserve Account.]
- 7 We confirm that this drawdown notice is for an amount that is equal to []% of the expenditure referred to in paragraph 6 above, such proportion being equal to the proportion of shares held by [the PSDP]/[WGCo]³⁶ in the Company.

Yours faithfully

Director
For and on behalf of
[WEPCo]

³⁶ To be selected as appropriate for a drawdown notice to the PSDP or the WGCo Working Capital Provider and relevant percentage of the aggregate advance .

WEP Strategic Partnering Delivery Model

Template Project Co Shareholders' Agreement

ITPDSB Version (Standard Form Version 1.3)

TEMPLATE PROJECT CO SHAREHOLDERS' AGREEMENT

VERSION 1

IMPORTANT NOTICE

This is the first version of the Welsh Education Partnership ("**WEP**") Strategic Partnering Delivery Model standard form of Project Co Shareholders' Agreement, the intention of which is to minimise the time and costs of dealing with legal issues relating to WEP Strategic Partnering Delivery Model.

Users of this standard form should be aware of the following points:

1. This is the Template Project Co Shareholders' Agreement (the "**Template Project Co Shareholders' Agreement**") as referred to in and set out in Section 4 of Schedule 7 (*Template Project Agreement*) of the Strategic Partnering Agreement ("**SPA**"). Under the terms of the SPA, the parties are obliged to use this Template Project Co Shareholders' Agreement on all Mutual Investment Model (MIM) projects, subject to the amendments described below.
2. All footnotes (and optional drafting) should be used/deleted as appropriate and in accordance with the guidance contained therein. It should be noted derogations to the Template Project Co Shareholders' Agreement are strongly discouraged and it is expected Welsh Government approval will be strictly limited to changes that represent value for money and are required for project specific reasons, or to reflect changing Welsh Government guidance or demonstrable changing market circumstances. Further, in the case of matters which may adversely affect an "off-balance sheet" statistical classification by ONS/EUROSTAT, project teams are advised to read EPEC/EUROSTAT's Guide before contacting Welsh Government for approval. Any derogations that, in the opinion of Welsh Government, may adversely affect an "off-balance sheet" statistical classification will not be permitted.
3. Clause and paragraph numbering should be preserved through the use of lettered additions and "not used" deletions. Automatic numbering and hyperlinked cross references should be maintained.
4. All parties are reminded that the WEP Strategic Partnering Delivery Model is a true partnering arrangement and the value of further debate over insubstantial issues should be considered in this light.
5. The Template Project Co Shareholders' Agreement is not a replacement for independent, specialist advice and the Shareholders must ensure that they have taken appropriate legal, financial and technical advice before using it.
6. Should you have any questions on the draft you are asked to contact MIMEducation@gov.wales

**WEP STRATEGIC PARTNERING DELIVERY MODEL TEMPLATE PROJECT CO
SHAREHOLDERS' AGREEMENT**

THIS AGREEMENT is made on

20◆

Among:

- (1) **[Private Sector Delivery Partner]**¹ (Company No. ◆) whose registered office is at ◆
(PSDP);
- (2) **[[WGCo Limited]**² (Company No. ◆) whose registered office is at ◆] (**WGCo**);
- (3) **[Name of Hold Co]**³ (Company No. ◆) whose registered office is at ◆ (**Company** or **Hold Co**); and
- (4) **[Name of Project Co]** (Company No. ◆) whose registered office is at ◆ (**Project Co**).

Background:

- (A) Pursuant to this Agreement the PSDP and WGCo have agreed to subscribe for shares in the Company and to advance monies to the Company (as debt) and, on completion of the subscriptions referred to in clause 4.1 (*Initial subscriptions of Shares*), and completion of advances referred to in clause 4.2 (*Shareholder Debt*) the Shares held by each of the parties and the amount of Shareholder Debt advanced to Project Co by each of the parties will be as set out in the Data Sheet.
- (B) The Company is a limited liability company registered in [England and Wales].
- (C) The Shareholders have agreed to establish the Company as a jointly owned company which is intended to carry on the business of a holding company in the manner set out in this Agreement.
- (D) Project Co is a limited liability company registered in [England and Wales]. Project Co is a wholly owned subsidiary of the Company established for the purposes of Project Co entering into the Project Documents to which it is to be a party and undertaking the Project.⁴
- (E) The parties have agreed that the respective rights and obligations of Shareholders in the Company shall be governed by the provisions of this Agreement and that the Company and Project Co Businesses shall be conducted in accordance with the provisions of this Agreement.

IT IS AGREED:

¹ **Parties - PSDP.** For ease of reference, this standard form anticipates the "PSDP" being a single company. It is recognised that the "PSDP" may comprise a number of parties. In this case this standard form will require amendment.

² **Parties - WGCo.** Subject to due diligence on a project by project basis, Welsh Government shall invest. The identity of this entity is to be confirmed. Beyond the initial funding commitment pursuant to clause 4 of this Agreement, as with the PSDP, there will not be any recourse against the shareholders.

³ **Parties – Company and Project Co.** This document has been drafted on the premise that the Company and Project Co are companies which are registered in England and Wales.

⁴ **Recital D – Formation of Project Co and the Company.** The PSDP is expected to set up the Company and Project Co.

1. Definitions and interpretation

This Agreement shall be interpreted according to the provisions of Schedule 1 (*Definitions and Interpretation*).

2. Commencement and duration

Conditions precedent

2.1 The obligations set out in clause 12.1 (*Confidentiality*) shall commence:

- (a) in relation to the Founder Shareholders, the Company and Project Co, on the execution of this Agreement; and
- (b) in relation to any person becoming a Shareholder after the date of this Agreement (a **New Shareholder**), on the execution of the Deed of Adherence.

2.2 Save as set out in clause 2.1 (*Conditions precedent*), this Agreement shall come into effect:

- (a) in relation to Founder Shareholders, the Company and Project Co, on the completion of the matters set out in clause 4.1 (*Initial subscriptions of Shares*); and
- (b) in relation to a New Shareholder, on the registration of the New Shareholder as a shareholder in the Company.

Termination in relation to a party ceasing to hold Shares in the Company

2.3 Immediately following the earlier of the termination of this Agreement and it ceasing to hold any Shares in the Company, a party shall cease to have any rights or obligations under this Agreement save for:

- (a) its obligations under clause 5.3 (*Removal of/change to nominated Directors*);
- (b) its rights and obligations under clause 8.4(c) (*Provision of information to Shareholders and designated third parties*) and clause 12 (*Miscellaneous*);
- (c) its liability for any breaches prior to it ceasing to hold any Shares;
- (d) any rights or cause of action that arose prior to it ceasing to hold any Shares; and
- (e) its rights to receive any payment in connection with the transfer of its Shares,

shall not be affected.

Termination

2.4 Save as provided in clause 2.3 (*Termination in relation to a party ceasing to hold Shares in the Company*) this Agreement shall continue in full force and effect until the earliest of the following dates:

- (a) the date on which the Company is wound up; or
- (b) the date on which all the Shareholders agree in writing to terminate this Agreement.

2.5 [If termination occurs the Company shall (if not already in liquidation) be placed into voluntary liquidation in accordance with clause 11 (*Winding Up*) and, after payment of liabilities, its

assets shall be distributed to the Shareholders in the same proportions as the Shareholders' holdings of shares at the time of the determination.]

3. The business of the Company and Project Co and details of the Company and Project Co

3.1

- (a) The business of the Company is to act as the holding company of Project Co.
- (b) The business of Project Co is to carry out or procure the carrying out of the Welsh Mutual Investment Model project relating to [details of the relevant MIM project] (**Project**).

3.2 Details of the Company and Project Co following the share subscriptions referred to in clause 4 (*Funding of the Company and the Project Co and financial matters*) and board appointments referred to in clause 5 (*The Boards of the Company and Project Co*) will be as detailed in Schedule 2 (*Details of the Company and the Project Co*).

4. Funding of the Company and the Project Co and financial matters⁵

Initial subscriptions of Shares

4.1 Immediately upon the execution of this Agreement by each of the parties, the parties shall take or procure to be taken the following steps either by themselves or at meetings of the Board or of the members of the Company/Project Co (as appropriate) to the extent not already taken:

- (a) the parties shall procure that the necessary board and/or shareholder resolutions in respect of the Company and Project Co are passed to adopt the Hold Co Articles and the Project Co Articles with immediate effect;
- (b) the following subscriptions shall be made in the capital of the Company:
 - (i) the PSDP shall subscribe for the number of Shares as set out opposite its name in the Data Sheet; and
 - (ii) WGCo⁶ shall subscribe for the number of Shares as set out opposite its name in the Data Sheet,
- (c) the Company shall subscribe for the number of shares in Project Co as set out opposite its name in the Data Sheet,⁷

⁵ **Clause 4 – Funding.** If an equity bridge is to be used or Shareholder Debt is to be invested by instalments, the mechanics will need to be set out in the Equity Subscription Agreement. If there is no equity bridge, an Equity Subscription Agreement may not be required and appropriate amendments may be required to this Agreement. It should be assumed that WGCo will invest on the same market terms and at the same times as other Shareholders and the detail included in an Equity Subscription Agreement.

⁶ **Clause 4.1(b)(ii) – Level of WGCo investment.** The intended level of the WGCo investment will be stated in the procurement documentation at the outset of the procurement. The procurement documentation will provide further information regarding the manner in which WGCo shall undertake due diligence. Any holding will always be a minority interest and no higher than 20% of issued share capital/debt, so WGCo will not be entitled to appoint more than one (1) Director to each of Project Co and Hold Co.

⁷ **Clause 4.1(c) - Wholly Owned Subsidiary.** Project Co shall be a wholly owned subsidiary of the Company.

following which the Company and Project Co shall deliver the relevant definitive share certificates in relation to the allotment of Shares pursuant to sub-clause (b) and sub-clause (c) and shall insert the names of the allottees in the register of members.

Shareholder Debt

4.2 In respect of Shareholder Debt:

- (a) the PSDP undertakes to advance the amount of Shareholder Debt as set out opposite its name in the Data Sheet by way of subscribing for Hold Co Loan Notes in accordance with the terms of the Equity Subscription Agreement;
- (b) WGCo undertakes to advance the amount of Shareholder Debt as set out opposite its name in the Data Sheet by way of subscribing for Hold Co Loan Notes in accordance with the terms of the Equity Subscription Agreement; and
- (c) Hold Co undertakes to on-loan the amount equivalent to the subscription monies of the Shareholder Debt received pursuant to clause 4.2(a) to 4.2(b) (*Shareholder Debt*) to Project Co in accordance with the terms of the Equity Subscription Agreement and the On-Loan Agreement⁸,

following which Hold Co and Project Co (as applicable) shall deliver any relevant certificates in relation to the Shareholder Debt advanced pursuant to sub-clauses (a) to (b) and shall insert the names of the Shareholders in the Register (as such term is defined in the Hold Co Loan Note Instrument).

Further capital required for the Company and for Project Co

4.3

- (a) No Shareholder shall be required to subscribe for any further Shares or to provide any additional funding for the Company (or guarantees or indemnities on behalf of the Company) which, for the avoidance of doubt, shall include any additional funding by way of shareholder loans and/or required to increase the working capital requirements of the Project Co. The same provisions shall apply in respect of Hold Co, such that Hold Co shall not be required to subscribe for any further Shares or to provide any additional funding for Project Co.
- (b) The Company and Hold Co shall not allot any Shares contrary to any restrictions imposed pursuant to the Project Documents.
- (c) The Company shall not allot any Shares to any person (other than a Shareholder) unless that person has first executed a Deed of Adherence in the form set out in Schedule 4 (*Deed of Adherence*).⁹
- (d) If, in the opinion of the Hold Co Board (or the Project Co Board as the case may be), the Company (or the Project Co) requires further funding, the Hold Co Board (or the Project Co Board) shall determine how the Company (or Project Co) should obtain such additional funding, whether by way of the allotment of shares, by obtaining

⁸ **Clause 4.2(a) - On-Loan Agreement.** The On-Loan Agreement will be the subject of WGCo due diligence and must represent like for like terms injection of capital at Company and Project Co level.

⁹ **Clause 4.3(c) - Deed of Adherence.** The Articles and Project Documents must provide that Project Co shall always be a wholly owned subsidiary of Hold Co.

additional debt finance, or such other means as the Hold Co Board (or Project Co Board) may determine.

- (e) If the Board determines to allot further Shares, such Shares shall be allotted in accordance with the provisions of sub-clauses (f) to (h) below.
- (f) Subject to the provisions of clause 4.4 (*Offers to Allot*), if the Directors determine to allot Shares in the Company, the Directors shall, of the Shares to be offered, first offer the Shares to the Shareholders pro rata to each Shareholder's existing holdings of Shares (**first offer**).
- (g) To the extent that any Shares are not accepted under the first offer the Directors shall offer the remaining Shares to the Shareholders who have accepted that first offer pro rata to their holdings of Shares following the first offer (**second offer**). To the extent that any second offer is not accepted by any such Shareholder but is accepted by other Shareholders, the Directors shall make such subsequent offers with the necessary changes having been made to those persons who have accepted the second offer until all of the Shares have been accepted or, failing acceptance, until there are no persons willing to take further Shares whereupon the Directors may offer the remaining Shares to any Suitable Third Party.
- (h) A Shareholder may accept a first offer, or any other offer made to it, in whole or in part.

Offers to Allot

4.4 Each offer shall be made by the Board by notice in writing (an **Offer to Allot**) and in the case of Shareholders shall be served on Founder Shareholders at their address for service set out in clause 12.8 (*Notices*) and on New Shareholders at the address for service notified to the Company by such New Shareholder.

- (a) Each Offer to Allot shall:
 - (i) specify the total number of Shares which are on offer;
 - (ii) specify the number of Shares for which the recipient of the Offer to Allot may subscribe;
 - (iii) specify the price per Share;
 - (iv) specify the period during which the offer will remain open for acceptance, which for a first offer shall be fifteen (15) Business Days after the date of service of the Offer to Allot and for all other offers five (5) Business Days after the date of service of the Offer to Allot; and
 - (v) contain a statement to the effect that the offer shall not be deemed to be accepted until the Board has either received notices of acceptance in respect of all the Shares available for allotment or, having received notices of acceptance in respect of less than all the Shares offered for allotment, has elected to issue such Shares notwithstanding that notices of acceptance have not been received in respect of all the Shares offered for allotment.
- (b) After the expiry of each Offer to Allot the Board shall as soon as practicable make such additional offers as may be necessary in accordance with this clause 4 (*Funding of the Company and the Project Co and financial matters*).

- (c) Each of the Shareholders agrees to approve any resolution put to a general meeting of the Company to renew the authority of the Directors to allot Shares in the Company.

Additional Shareholder Debt

- 4.5 The provisions of clause 4.3 (*Further capital required for the Company and for Project Co*) and clause 4.4 (*Offers to Allot*) relating to any additional issue of Shares shall apply with the necessary changes to any further issue of/borrowing of Shareholder Debt.

5. The Boards of the Company and Project Co

Composition of the Boards and the right to appoint Directors

5.1

- (a) Each of the Boards shall consist of not less than three (3) Directors, to be appointed in accordance with this Agreement and the Hold Co Articles and the Project Co Articles (as the case may be).
- (b) The Shareholders shall be entitled in accordance with the Hold Co Articles and this Agreement to nominate and appoint in writing persons as Directors of the Company and to remove such persons from office. Any Shareholder holding [fifteen per cent (15%)]¹⁰ or more of the issued Share capital (a **Material Shareholder**) shall be entitled to nominate one (1) Director for every [fifteen per cent (15%)] of the issued Share capital of the Company held by it, PROVIDED THAT WGCo (and any member of the WGCo Group to whom WGCo transfers all but not part of its Shares in the Company) shall, for as long as it holds issued Share capital in the Company, be entitled to nominate and appoint in writing one (1) person as a Director of the Company and to remove such person from office, irrespective of whether it holds [fifteen per cent (15%)] of the issued Share capital of the Company.
- (c) The persons nominated and appointed by the parties to act as the initial Directors for the purposes of sub-clause (b) are as set out in Schedule 2 (*Details of the Company and the Project Co*).
- (d) In addition to its rights to nominate and appoint Directors under sub-clause (b), each RTAD Shareholder shall be entitled in accordance with the Articles, to nominate and appoint in writing one (1) person as an Alternate to each of its Director appointees and to replace any such person(s) as an Alternate from time to time (provided such Alternate shall be registered as a Director at Companies House).
- (e) The parties shall procure that the Directors of the Company (and any Alternate(s)) appointed or removed in accordance with this clause 5 (*Composition of the Boards and the right to appoint Directors*) shall also be appointed and removed, as the case may be, as Directors/Alternate(s) of Project Co.

¹⁰ **Clause 5.1(b) – Percentage of Shareholding.** The percentage will need to be determined on a transaction by transaction basis but shall never be more than 20%. See footnote 7. WGCo will never have the right to appoint more than one (1) Director.

Quorum requirements for Board meetings

5.2

- (a) Subject to the Articles, sub-clauses (b) and (c), clause 6.5 (*Step-aside provisions*) and clause 5.14 (*Director's power to authorise conflict situations*), the quorum for Board meetings of the Company and Project Co respectively shall comprise [one (1) WG Co Director and [two (2)] PSDP Directors (or their respective Alternates) .
- (b) If within thirty (30) minutes of the time for the relevant meeting there is not a quorum of Directors in attendance (in accordance with sub-clause (a)) at a meeting of Directors called in accordance with this clause 5.2 (*Quorum requirements for Board meetings*), then (unless the relevant Director(s) have given written waiver(s) in relation to his/her attendance) such meeting shall be adjourned in accordance with article [26.6] [*Quorum for Board Meetings*] of the Hold Co Articles and when reconvened such adjourned meeting shall, subject to the provisions of article [◆] [*Quorum for Board Meetings*] of the Hold Co Articles or article [◆] [*Quorum for Board Meetings*] of the Project Co Articles (as appropriate), be deemed to be quorate notwithstanding the fact that the relevant number of Director(s) appointed by that RTAD Shareholder may not be present.
- (c) If a RTAD Shareholder fails to appoint and maintain in office the relevant number of Directors it is required to appoint to satisfy the quorum requirements in sub-clause (a) then, if a meeting of the Directors is called in accordance with this clause 5.2 (*Quorum requirements for Board meetings*) and notice of the meeting is given to that RTAD Shareholder as if it were a Director, the meeting of Directors shall be deemed to be quorate notwithstanding the fact that the relevant number of Director(s) appointed by that RTAD Shareholder to form a quorum under sub-clause (a) may not be present.

Removal of/change to nominated Directors

5.3

- (a) If an RTAD Shareholder (the **Appointing Shareholder**) removes any person nominated by it as a Director (such a Director being an **Outgoing Director**) then the Appointing Shareholder shall procure that the Outgoing Director vacates office without any claim to the Company for loss of office or otherwise relating to the Outgoing Director's vacation of office and the Appointing Shareholder shall indemnify the Company against all losses, liabilities and costs which the Company may incur arising out of, or in connection with, any claim by the Outgoing Director for wrongful or unfair dismissal or redundancy or other loss arising out of the Outgoing Director's removal from or loss of office.
- (b) If any Material Shareholder ceases to be a Material Shareholder or WGCo ceases to hold any Shares (an **Outgoing Shareholder**) and any Director has been nominated as a Director by the Outgoing Shareholder pursuant to clause 5.1 (*Composition of the Boards and the right to appoint Directors*), the Outgoing Shareholder shall procure that any such Director vacates office without any claim to the Company for loss of office or otherwise relating to such Director's vacation of office and the Outgoing Shareholder shall indemnify the Company against all losses, liabilities and costs which the Company may incur arising out of, or in connection with, any claim by such Director for wrongful or unfair dismissal or redundancy or other loss arising out of such Director's removal from or loss of office.

- (c) The provisions of sub-clause (a) and sub-clause (b) above apply with the necessary changes in relation to Project Co Directors as if references to the Company were references to Project Co.

Chairman of the Board

5.4

- (a) There shall be a Chairman of the Hold Co Board and the Project Co Board appointed or nominated in accordance with either sub-clause (b) or sub-clause (c) as the case may be.
- (b) If the Shareholders unanimously agree to appoint an independent non-executive Chairman then the Chairman shall be appointed either on an annual basis or on such occasions as the Shareholders (acting in their absolute discretion) may unanimously agree, and the period of appointment shall be for such time as the Shareholders may unanimously agree (acting in their absolute discretion) from time to time. The Chairman appointed shall be a Director and his/her appointment shall be in addition to the appointments of Directors referred to in clause 5.1 (*Composition of the Boards and the right to appoint Directors*). If a Chairman is unable to attend any meeting of the Board or of the Shareholders of the Company/Project Co the Directors in attendance shall appoint one (1) of their number as the chair for that meeting to act in his/her place. An independent non-executive Chairman appointed under this sub-clause (b) shall not have a vote at either Board or Shareholder meetings.
- (c) If the Shareholders do not agree to appoint an independent non-executive Chairman under sub-clause (b) within one (1) month of the date of this Agreement then the Chairman shall be one (1) of the Directors appointed in accordance with clause 5.1 (*Composition of the Boards and the right to appoint Directors*) who shall act as Chairman for six (6) months and thereafter the role of Chairman shall rotate every six (6) months between a Director appointee of each Material Shareholder (by agreement between the Material Shareholders) or, failing agreement, then by the Material Shareholders drawing lots (provided that a Material Shareholder appointee shall not hold the role of Chairman for more than six (6) months in any eighteen (18) month period). A Director appointed as Chairman under this sub-clause (c) shall not have a second vote by reason of his/her appointment as Chairman.

Board meetings and Board voting¹¹

5.5

- (a)
 - (i) Resolutions of the Board shall be determined by a simple majority of votes cast for or against each resolution.
 - (ii) Subject to the Articles, sub-clause (a)(iii), clause 5.4(b) and (c) (*Chairman of the Board*) and clause 6.5 (*Step-aside provisions*), at Board meetings each Director (other than an independent non-executive Chairman appointed under clause 5.4(b) (*Chairman of the Board*)) shall have one (1) vote.

¹¹ **Clause 5.5 - director voting.** The standard form documents are drafted on the basis of votes per director/Alternate. If other voting mechanics (e.g. director appointees having voting rights in the percentages of their appointees) then the PSDP/Bidder will need to put forward any such changes (rationale and detail) for consideration as part of the bid process.

- (iii) Subject to the Articles, if a Material Shareholder has more than one (1) Director appointee under clause 5.1 (a) (*Composition of the Boards and the right to appoint Directors*) but not all of such appointees (or their Alternates) are present at the Board meeting then the other Director(s) present appointed by that Material Shareholder shall be entitled to vote each relevant absent Director's vote.
- (b) Unless otherwise agreed by all of the Directors, not less than ten (10) Business Days' notice (or such other period of notice as may be agreed from time to time by all of the Directors) of each meeting of the Board specifying the date, time and place of the meeting shall be given to all Directors. All meetings of the Board shall take place at such location as the Board shall agree and the RTAD Shareholders shall use all reasonable endeavours to procure that their respective Directors attend each such meeting and to procure that a quorum (in accordance with the provisions contained in this clause 5 (*The Boards of the Company and Project Co*) and in the Articles) is present at each such meeting of which due notice has been given.
- (c) Unless otherwise agreed by the Board:
 - (i) meetings of the Directors shall be held not less than quarterly on such dates as they may agree (and failing such agreement on such day as the Chairman shall decide);
 - (ii) a telephone conference call or video conference or a combination of the same, at which all participants are able to speak to and hear each of the other participants and at which for all times at that meeting a quorum of the Directors is able to so participate, shall be valid as a meeting of the Directors;
 - (iii) a resolution (which may be in counterparts) in writing signed by all the Directors entitled to receive notice of a meeting and vote at the meeting shall be as valid and effectual as if it had been passed at a meeting of Directors duly convened and held; and
 - (iv) any Director shall by notice to the Company and each other Director be entitled to convene a meeting of the Directors on not less than ten (10) Business Days' notice.
- (d) Unless otherwise agreed by all of the Directors, all papers for meetings of the Board will be sent to all Directors not less than five (5) Business Days prior to the relevant meeting and, unless otherwise agreed by all of the Directors, draft minutes of meetings of the Board will be sent to each Director as soon as practicable after the holding of the relevant meeting.
- (e) The provisions of sub-clauses (a) to (d) shall apply with necessary changes as if references to the Company were references to Project Co.
- (f) Unless otherwise agreed by all of the Directors, a meeting of the Project Co Board shall follow immediately after a meeting of the Hold Co Board.
- (g) Notwithstanding any other provisions of this Agreement or of the Articles, if a Shareholder (the Relevant Shareholder) is in material breach of its obligations under this Agreement or the Articles the Directors appointed by it shall be disenfranchised from voting at Board meetings unless and until that breach is remedied and no approval shall be required of the Relevant Shareholder's Directors for any Reserved Matter Board Approval matters. If there is a dispute as to whether a Relevant Shareholder is in material breach of its obligations under this Agreement then, pending determination, the Relevant Shareholder shall be deemed to be in material

breach if the Material Shareholders (excluding the Relevant Shareholder) each confirm in writing to the Relevant Shareholder that they consider the Relevant Shareholder to be in material breach setting out the basis of that breach.

Director remuneration

- 5.6 The Company and Project Co shall pay Director remuneration as set out in clause 5.7 (*Director remuneration*). Any increase in any such remuneration other than in accordance with clause 5.7 (*Director remuneration*) is a Reserved Matter.
- 5.7 The role of Director of the Company and Project Co shall attract remuneration of £[◆]¹² per annum (Index Linked). Such fee shall be due, pro rata, monthly in arrears, from the date of his/her or her appointment and is payable within thirty (30) days of receipt of an invoice by the Company and/or Project Co, as appropriate.
- 5.8 In addition to the remuneration set out at clause 5.7 (*Director remuneration*), the Directors may be paid reasonable travelling and other expenses properly incurred by them in connection with their attendance at meetings of the Board, general meetings, meetings of committees of the Board or otherwise in connection with the carrying out of their duties.

Director's power to authorise conflict situations

- 5.9 Provided that a Director has disclosed any interest he/she may have in accordance with the Companies Act 2006, and any conflict or potential conflict has been authorised under the provisions of this clause 5 (*The Boards of the Company and Project Co*), then that Director may vote at a meeting of Directors or of a committee of Directors on a resolution or participate in any unanimous decision concerning any matter in which he/she is interested, and (whether or not he/she votes or participates) he/she may be counted in the quorum when that resolution or matter is considered.
- 5.10 A Director shall be entitled to abstain from voting or to absent himself/herself from all or any part of any meeting in relation to any matter where he/she considers that to vote for or against a matter may put him/her in breach of his/her duties to the Company (whether at Law or by reference to any code of conduct, good governance procedures or otherwise) and if he/she so abstains or absents himself/herself then he/she shall not be in breach of his/her duties as a Director under sections 172 to 174 of the Companies Act 2006 in relation to the matter in question.
- 5.11 Any Director shall be entitled from time to time to disclose to the RTAD Shareholder responsible for his/her appointment such information concerning the business and affairs of the Company as he/she shall at his/her discretion see fit.
- 5.12 A Director who to his/her knowledge is in any way, whether directly or indirectly, interested in a transaction or arrangement or proposed transaction or arrangement with the Company shall declare the nature of his/her interest at a meeting of the Directors in accordance with the Companies Act 2006.
- 5.13 Subject to clause 6.2 (*Reserved Matters*), for the purposes of section 175 of the Companies Act 2006, the Directors shall have the power to authorise, on such terms (including as regards duration and revocation) and subject to such limits or conditions (if any) as they may determine (a **Conflict Authorisation**), any matter proposed to them which would, or might, if

¹² **Clause 5.7 - Directors remuneration.** Note that agreement is required on the initial level Director remuneration. It will be set on a project specific basis and this will be required to be in line with corporate good practice. In respect of travel expenses this is expected to be standard class for train travel etc.

not so authorised, constitute or give rise to a situation in which a Director (a **Relevant Director**) has, or can have, a direct or indirect interest which conflicts, or possibly may conflict, with the interests of the Company (a **Conflict Situation**). Any Conflict Authorisation shall extend to any actual or possible conflict of interest which may reasonably be expected to arise out of the Conflict Situation so authorised.

5.14 Unless otherwise agreed between the Shareholders in writing and notwithstanding clause 5.2 (*Quorum requirements for Board meetings*), the quorum for any meeting (or part of a meeting) of the Directors whilst it is considering the grant, alteration or revocation of a Conflict Authorisation shall be at least one (1) Director for each RTAD Shareholder provided that a Relevant Director shall not be counted in the quorum for such meeting.

5.15 Where Directors give a Conflict Authorisation:

- (a) the terms of the Conflict Authorisation shall be recorded in writing (but the authorisation shall be effective whether or not the terms are so recorded);
- (b) the Directors may revoke or vary such authorisation at any time but this will not affect anything done by the Relevant Director prior to such revocation or variation in accordance with the terms of such authorisation; and
- (c) the Relevant Director shall be obliged to act in accordance with any terms, limits or conditions to which such Conflict Authorisation is made subject.

5.16 Any terms to which a Conflict Authorisation is made subject (**Conflict Authorisation Terms**) may include (without limitation to clause 5.13 (*Director's power to authorise conflict situations*)) provision that:

- (a) where the Relevant Director obtains (other than in his/her capacity as a Director of the Company or as its employee or agent or, if the Directors so decide, in any other capacity that would otherwise oblige him/her to disclose it to the Company) information that is confidential to a third party, he/she will not be obliged to disclose it to the Company or to use it directly or indirectly for the benefit of the Company or in performing his/her duties as a Director of the Company in circumstances where to do so would amount to a breach of a duty of confidence owed to that third party;
- (b) the Relevant Director may (but shall be under no obligation to) absent himself/herself from the discussion of, and/or the making of decisions relating to, the relevant matter (whether at any meeting of the Directors or otherwise) and be excused from reviewing documents and information prepared by or for the Directors to the extent that they relate to that matter; and
- (c) the Relevant Director be excluded from the receipt of documents and information, the participation in discussion and/or the making of decisions (whether at Directors' meetings or otherwise) related to the relevant matter,

and anything done (or omitted to be done) by the Relevant Director in accordance with any such provision (or otherwise in accordance with any Conflict Authorisation Terms given under this clause 5.16 (*Director's power to authorise conflict situations*)) will not constitute a breach by him of his/her duties under sections 172 to 174 of the Companies Act 2006.

5.17 Subject to this clause 5.17 and clause 6.2 (*Reserved Matters*) but without prejudice to clause 5.13 and 5.14 (*Director's power to authorise conflict situations*) (inclusive), authorisation is given by the Shareholders for the time being on the terms of this Agreement to each Director in respect of any Conflict Situation that exists as at the date of this Agreement or that subsequently arises where (in either case):

- (a) the Director is an employee or director of, or shareholder or member with a [controlling/substantial] interest in, a counterparty to a Project Document with the Company or Project Co (**Counterparty**); or
- (b) the Director has been appointed as a director of the Company or Project Co on the nomination of the Counterparty; or
- (c) the Director is an employee, director, appointee of, or member with a [controlling/substantial] interest in, a body (i) which holds a [controlling/substantial] interest in the Counterparty; or (ii) in which the Counterparty has a [controlling/substantial] interest; or (iii) which is an Associate of the Counterparty,

and on the basis that a "**substantial interest**" shall be taken to be an interest which confers an entitlement to [ten per cent (10%)]¹³ or more of the voting rights at general meetings of the relevant body or [ten per cent (10%)] or more of the distributable profits of the relevant body (**Project Document Conflict Authorisation**).

5.18 The Conflict Authorisation Terms applicable to the Project Document Conflict Authorisation (**Project Document Conflict Authorisation Terms**) are automatically set by this clause 5.18 (*Director's power to authorise conflict situations*) so that the Director concerned:

- (a) is not obliged to disclose to the Company information that is confidential to a third party obtained by him/her (other than in his/her capacity as a Director of the Company or as its employee or agent or, if the Directors so decide, in any other capacity that would otherwise oblige him/her to disclose it to the Company) in any situation to which the Project Document Conflict Authorisation applies, nor to use any such information directly or indirectly for the benefit of the Company or in performing his/her duties as a Director of the Company, in circumstances where to do so would amount to a breach of a duty of confidence owed to that third party; or
- (b) may (but shall be under no obligation to):
 - (i) absent himself/herself from the discussions of, and/or the making of decisions; and/or
 - (ii) make arrangements not to receive documents and information, relating to the Conflict Situation concerned,

and the Company will not treat anything done (or omitted to be done) by the Director concerned in accordance with the Project Document Conflict Authorisation Terms as a breach by him of his/her duties under sections 172 to 174 of the Companies Act 2006.

5.19 The provisions of clauses 5.9 to 5.19 (*Director's power to authorise conflict situations*) (inclusive) shall apply with all necessary changes as if references to the Company were references to Project Co.

¹³ **Clause 5.17 - Conflicts.** To be considered on a project by project basis of the proposed investment structure.

6. Management of Company and Project Co affairs

Management of the Businesses

6.1 The parties shall exercise all rights and powers available to them in relation to the Company and Project Co to procure that (in so far as they are able to do so) at all times during the term of this Agreement:

- (a) the business of the Company shall consist exclusively of the Hold Co Business;
- (b) the business of Project Co shall consist exclusively of the Project Co Business;
- (c) with the exception of:
 - (i) matters for which responsibility is expressly delegated by the Project Co Board to the officers of Project Co; and
 - (ii) those matters requiring Reserved Matter Board Approval or Shareholder approval pursuant to clause 6.2 (*Reserved Matters*),

all the business of the Company and Project Co, other than routine day-to-day business, shall be undertaken and transacted by the Directors;

- (d) no payment will be made by the Company or Project Co and no cheque or payment instruction of either the Company or Project Co shall be signed other than in accordance with the mandates (general or specific) and procedures authorised by the respective Boards from time to time;
- (e) the Company/Project Co will, if it requires any approval, consent or licence for the carrying on of its business in the places and in the manner in which it is from time to time carried on or proposed to be carried on, use all reasonable endeavours to obtain and maintain the same in full force and effect; and
- (f) the Company and Project Co shall both put in place and maintain appropriate procedures and training to comply with the requirements of the Bribery Act 2010.

Reserved Matters

6.2 Subject to clause 6.4 (*Shareholders' and Company undertakings*) each of the parties hereby undertakes to the other to procure that the Reserved Matters listed in Schedule 8 (*Reserved Matters*) shall not be carried out:

- (a) in the case of those matters ticked in the second column ("Shareholder") without the prior written approval of each Material Shareholder; or
- (b) in the case of those Reserved Matter Board Approval matters ticked in the third column (entitled "Board") without the prior written approval of [a Director appointed by each of the Material Shareholders] [all of the Directors who have been appointed by the Material Shareholders]¹⁴,

¹⁴ **Clause 6.2(b) - Reserved Matters.** Option for the parties to decide on in terms of what is considered the most appropriate structure for the relevant project.

and each of the Shareholders shall use their respective rights and powers to procure, so far as they are each able, that no such Reserved Matter is carried out unless the required approval has been given.

*Manner of giving Shareholder approval*¹⁵

6.3

- (a) Subject to sub-clause (b) and to sub-clause (c) of this clause 6.3 (*Manner of giving Shareholder approval*), the written approvals required from Shareholders referred to in clause 6.2 (*Reserved Matters*) may be given and signed for on behalf of a Material Shareholder by a Director nominated by it under clause 5.1 (*Composition of the Boards and the right to appoint Directors*).
- (b) Notwithstanding the provisions of clause 5 (*The Boards of the Company and Project Co*), if at a Board meeting (the **Original Meeting**), a matter arises for resolution which a Director reasonably considers gives rise to a conflict of interest between his/her duty to his/her appointor/employer and his/her duty as a Director to promote the success of the Company/Project Co he/she shall, upon declaring such conflict, be entitled to abstain from casting his/her vote and to refer the relevant matter back to the relevant Shareholder whose decision on the resolution shall be substituted for the decision of the abstaining Director PROVIDED THAT (except in the case of a matter which is Reserved Matter Board Approval matter) such decision is notified to the company secretary in writing and is received by him/her within five (5) Business Days of the date of the Original Meeting at which the Relevant Director notified his/her intention to make such referral. If no decision is received from the Shareholder within such period, the requisite Board approval shall be capable of being given by one (1) Director appointed by each of the other Material Shareholders (the **Other Directors**) and shall be so given if at the Original Meeting the Other Directors resolved to pass the resolution in question.
- (c) A Material Shareholder may opt out of the mechanism in sub-clause (a) and sub-clause (b) by giving notice under this sub-clause (c) to the other parties. The effect of the notice shall be that, for any matter requiring Shareholder approval, that approval will only then be deemed to have been given when that Material Shareholder has given its specific approval in writing to that matter. A Material Shareholder may opt back in to the mechanism in sub-clause (a) and sub-clause (b) by notice in writing under this sub-clause (c).
- (d) Notwithstanding the provisions of clause 5 (*The Boards of the Company and Project Co*), if a Director considers he/she has a conflict of interest between his/her duty to his/her appointor/employer and his/her duty as a Director to promote the success of the Company/Project Co in relation to any matter other than (i) Claims (where clause 6.5 (*Step-aside provisions*), applies); and (ii) the decision to issue a Provisional Transfer Notice (where clause 10.6 (*Tax compliance*) applies); then he/she may refer the matter to his/her appointor for approval or otherwise and, if given in writing, the Shareholder approval shall be valid in place of the Director approval.

¹⁵

Clause 6.3 – Reserved Matters approval/flexibility. This clause has been drafted on the basis that, in the normal course, Reserved Matters would be dealt with by the relevant Board appointees giving approval or otherwise (as the case may be) under clause 6.3(a). However, in terms of director's duties, sub-clause (b) addresses conflict of interest situations where the board appointee is conflicted and where the matter can then be referred to the relevant Shareholder for approval (or otherwise), thereby removing the relevant director from having any obligation to vote for or against the relevant matter. Finally sub-clause (c) allows a Shareholder to opt in and out of these arrangements should it wish to do so.

Shareholders' and Company undertakings

- 6.4 Each Shareholder undertakes to each of the other Shareholders that, in its capacity as a Shareholder, it will not act and shall not exercise its voting rights and other powers of control available to it in relation to the Company and Project Co so as to cause (insofar as it is able by the exercise of such rights and powers) Project Co to breach the provisions of the Project Documents to which it is a party.

[Step-aside provisions]¹⁶

- 6.5 Notwithstanding any provision to the contrary in this Agreement or the Articles:
- (a) if the WCo Director(s) (the “**Independent Director(s)**”) so decide it is reasonable to conclude that the PSDP or any Associate of the PSDP will issue Proceedings in respect of any Claim against the Company/Project Co:
 - (i) the Independent Directors shall be entitled to defend such Claim in the name and at the expense of the Company/Project Co;
 - (ii) each of the Directors appointed by the PSDP (**PSDP Directors**) shall not be entitled to (and the PSDP shall procure that each of the PSDP Directors shall not) make (or participate in making) any decisions, attend or vote at meetings of the Board or otherwise take any action on behalf of the Company/Project Co in respect of the defence by the Company/Project Co of such Claim nor shall they be entitled to any Board papers or other papers or information in relation to such Claim; and
 - (iii) the quorum at any Board meeting of the Company/Project Co convened to consider any such Claim shall be one (1) Independent Director nominated by each RTAD Shareholder other than the PSDP.
 - (b) If an RTAD Shareholder or Associate of an RTAD Shareholder (other than the PSDP) asserts that the Company or Project Co has any Claim against the PSDP and/or an Associate of the PSDP:
 - (i) the Independent Directors shall be entitled to determine if and when to pursue such Claim in the name and at the expense of the Company/Project Co by the issue of Proceedings by the Company/Project Co against the PSDP and/or Associate of the PSDP;
 - (ii) each of the PSDP Directors shall not be entitled to any Board papers or other papers or information in relation to such Claim nor shall they be entitled to (and the PSDP shall procure that each of the PSDP Directors shall not) make (or participate in making) any decisions, attend or vote at meetings of the Board or otherwise take any action on behalf of the Company/Project Co in respect of:
 - (A) any decision pursuant to sub-clause **Error! Reference source not found.** to issue Proceedings in respect of a Claim; and/or
 - (B) once Proceedings have been issued in respect of a Claim, the pursuance of that Claim by the Company/Project Co; and

¹⁶ **Clause 6.5 - Step aside provisions.** Drafting assumes a single PSDP and may be amended where there are two (2) distinct sponsor entities and conflict of one would not necessarily result in a conflict situation for the other.

- (iii) the quorum at any board meeting of the Company/Project Co convened in relation to any consideration of making a Claim (sub-clause **Error! Reference source not found.**) and after the issue of Proceedings in relation to the relevant Claim shall be one (1) Independent Director appointee of each RTAD Shareholder (other than the PSDP).
- (c) For the purposes of this clause 6.5 (*Step-aside provisions*), **Claim** shall mean a claim of any nature, whether for breach of contract, in tort, breach of statutory duty or otherwise.
- (d) The provisions of sub-clauses **Error! Reference source not found.** to **Error! Reference source not found.** shall apply, if a simple majority of Directors (other than the WGCo Directors) so decide, with the necessary changes having been made:
 - (i) in the case of sub-clause **Error! Reference source not found.**, if it is reasonable to conclude that WGCo will issue Proceedings in respect of a Claim against the Company/Project Co as if references to the PSDP are references to WGCo and references to the PSDP Directors are references to the WGCo Director(s); or
 - (ii) in the case of sub-clause **Error! Reference source not found.**, if a Claim against WGCo is asserted by a Material Shareholder or an Associate of a Material Shareholder and/or if Proceedings are then issued by the Company/Project Co against WGCo as if references to the PSDP are references to WGCo]¹⁷

7. Distributions

- 7.1 Subject to clause 6.2 (*Reserved Matters*) the parties shall procure (insofar as permitted by Law) that, subject to any restrictions imposed pursuant to the Project Documents and subject to the working capital and other financial requirements of Project Co (e.g. budgeted expenditure and maintenance reserves) as determined by the Project Co Directors:
- (a) Project Co shall distribute all amounts which are lawfully available for distribution by the Project Co to the Company by way of dividend on the Shares in Project Co but only after payment of any interest and principal which is then due and payable, in order of priority, in relation to any Shareholder Debt by the Project Co under the relevant On-Loan Agreement; and
 - (b) the Company shall distribute all amounts which are lawfully available for distribution by the Company to the Shareholders by way of dividend on the Shares in the Company but only after payment of any interest and principal which is then due and payable, in order of priority, in relation to any Shareholder Debt by the Company under the Hold Co Loan Note Instrument. The dividend payable per Share shall be calculated pro-rata to the total number of Shares.

¹⁷ **Clause 6.5 - Step-aside provisions.** If Project Co (or the Company) is party to a contract with an Associate of another Shareholder, analogous provisions would be inserted with respect to Claims relating to that contract. Step-Aside approach remains subject to further review by Development Bank for Wales and policy consideration.

8. Budgeting, Business Planning and financial matters

The Business Plan (including the Annual Budget)

8.1

- (a) The first Business Plan¹⁸ relating to the Hold Co Business and the Project Co Business covering the period from the date specified in the Data Sheet through to the end of the first financial year of the Company has been approved by the Shareholders and comprises Schedule 3 (*Agreed Form Business Plan*) to this Agreement. The Business Plan shall be reviewed by the Board at least every six (6) months and updated for each financial year in accordance with the provisions of sub-clause (b).
- (b) No earlier than three (3) months and no later than one (1) month before the end of each financial year of the Company, the Company will prepare and circulate to Shareholders a draft of the proposed Business Plan for the next financial year (**Draft Business Plan**) for approval by the Shareholders. The Draft Business Plan (with such amendments as are agreed by the Shareholders to it) will become the Business Plan in place of the then current Business Plan upon the start of the financial year to which it relates or, if later, the date of its approval.

- 8.2 The Annual Budget for each financial year shall form part of the Business Plan. The Annual Budget shall be reviewed by the Board at least every three (3) months. From the end of the second financial year following the end of the Lock-in Period (as defined in clause 9.7(c)(*Lock In Periods*)) the Annual Budget shall include relevant lifecycle costs and an implementation programme.

Financial records

8.3

- (a) The Shareholders shall use reasonable endeavours to procure that each of the Company and Project Co shall keep proper books of account and make true and complete entries of all its dealings and transactions of and in relation to its Business.
- (b) The Company shall (and shall procure that Project Co shall) keep proper books of account and make true and complete entries of all its dealings and transactions of and in relation to their Businesses.

Provision of information to Shareholders and designated third parties

8.4

- (a)
 - (i) The Company shall supply in respect of the Company, and shall procure that Project Co shall supply in respect of the Project Co, each of the Shareholders with the Transparency Information as detailed in Part A of Schedule 7 (*Transparency Information and Commercially Sensitive Information*) relating to the Company/Project Co with the relevant period set out therein.

¹⁸ **Clause 8 – Business Plan.** The Business Plan will be a key part of the overall proposals to be put forward by the PSDP in terms of the financials, expected running costs and general details on the general operations of the Company/Project Co and an agreed version appended to this Agreement. It is thereafter an operational matter and so the approval of subsequent versions and its approval from time to time is not a Reserved Matter.

- (ii) Each Shareholder shall provide to each other Shareholder the information as detailed in Part B: of Schedule 7 (*Transparency Information and Commercially Sensitive Information*) within the relevant period set out therein.
 - (iii) Where WCo is a Shareholder, each of the Company, Project Co and each other Shareholder will use its reasonable endeavours to assist WCo in its preparation of any report required by a government department from time to time, which relates in whole or in part to the Project.
- (b) The Company shall and shall procure that Project Co shall, as soon as reasonably practicable, notify the Shareholders promptly of any litigation, arbitration or administration proceedings raised against it.
- (c) Notwithstanding the provisions of clause 12.1 (*Confidentiality*):
- (i) each Shareholder may (but only once the relevant Shareholder has made the intended Recipient aware of that Shareholder's obligations of confidentiality under this Agreement (and in the case of the intended Recipients in (D) and (E)) has obtained a written undertaking from that intended Recipient agreeing with that Shareholder and for the benefit of all other Shareholders and the Company and the Project Co, to comply with such obligations of confidentiality as though it were a party to this Agreement) disclose any information received from the Company, Project Co or any Director, to:
 - (A) any shareholder in it;
 - (B) any director or other officer of, adviser to, trustee or manager of, or investor or prospective investor in its Shareholder's Group;
 - (C) the Shareholder's investment adviser and any of its other professional advisers;
 - (D) any member or prospective member of the Shareholder's Group;
 - (E) potential purchasers of any of that Shareholder's interest in the Company and/or Project Co; and
 - (F) any person to whom it is required by Law or a regulatory authority or body or by the Project Documents to be disclosed.
 - (ii) where WCo is a Shareholder, WCo may disclose and use any Transparency Information in such manner and for such purposes as it may determine from time to time, including reports and reviews of the performance of MIM projects generally or specifically in respect of the Project and in relation to any audit, accounting or other review or scrutiny by any government or public body where WCo considers it appropriate to make some or all of such information available; and
 - (iii) where WCo is a Shareholder, the Company shall permit (and shall procure that Project Co shall permit) all records referred to in clause 8.3 (*Financial records*) and/or clause 8.4(a) (*Provision of information to Shareholders and designated third parties*) to be examined and copied from time to time by WCo or by any person to whom WCo notifies the Company that it wishes to have access to any such documents, records or information under sub-clause (b)(ii).

*Tax matters*¹⁹

8.5

- (a)
- (i) Each Shareholder shall use its reasonable endeavours to ensure that both the Company and Project Co are treated by all relevant authorities as being resident for taxation and other purposes in the United Kingdom²⁰.
 - (ii) [other tax provisions to be agreed]
- (b) To the extent that any tax losses arise, the Shareholders shall agree (each acting reasonably) from time to time as the losses arise, how the losses shall be treated. The Shareholders agree, if so requested by a Shareholder, to discuss a mechanism for the obtaining of relief for a proportionate share of trading losses of each of the Shareholders and other amounts eligible for relief from corporation tax by virtue of group-relief provisions by the Company or Project Co or a Shareholder and compensation in accordance with Law. Each Shareholder agrees that no such mechanism shall be approved by the Company or Project Co without the approval of the other Shareholders (acting reasonably and having regard to ensuring that there is no adverse impact on the success of the Company and Project Co).

9. Restrictions on share transfers

Restrictions on transfers of Shares in the Company

9.1

- (a) Except in relation to any transfer of Shares permitted by Article [◆]²¹ [(*Transfer and Transmission of Shares*)], in the Hold Co Articles, all transfers of Shares shall be subject to the rights of first refusal²² set out in the Hold Co Articles.
- (b) Each party undertakes to transfer Shares only in accordance with this Agreement and the Hold Co Articles and to procure that only transfers made in accordance with this Agreement and the Hold Co Articles are registered.
- (c) Each Shareholder undertakes to comply with any restrictions on the transfer of Shares contained in the Project Documents.
- (d) No Shareholder shall sell or transfer any Shares to any person other than another Shareholder unless that person has first executed a Deed of Adherence in the form set out in Schedule 4 (*Deed of Adherence*). Each of the parties shall execute any

¹⁹ **Clause 8.5 - tax matters.** The parties may wish to insert bespoke drafting in this clause, to regulate matters of importance to the Company and the Shareholders. The drafting may cover matters such as VAT grouping, transfer pricing, group payment arrangements, worldwide debt cap issues etc and, generally, organisational arrangements for the Company and Project Co tax compliance and administration. Bidders are required to summarise the bespoke arrangements they propose when submitting bids.

²⁰ **Clause 8.5 –tax matters.** The taxation provisions have been drafted on the premise that Hold Co and Project Co are tax resident in the United Kingdom.

²¹ **Clause 9.1(a) - Restrictions on transfer of shares.** The Articles shall permit transfers within groups of companies, including specifically any member of the WCo Group to another member of the WCo Group. WCo will carry out diligence on the Articles.

²² **Clause 9.1(a) – Permitted transfers.** The mechanism must be "first refusal" – i.e. a seller being able to sell to a third party at or above an "offer price" if the other shareholders have had the opportunity to buy at that price and have decided not to.

such Deed of Adherence in respect of a transfer of Shares made in accordance with this Agreement and the Hold Co Articles. The Company shall not register any transfer in accordance with this Agreement and the Hold Co Articles unless the transferee (other than a Shareholder) has first executed a Deed of Adherence in the form set out in Schedule 4 (*Deed of Adherence*). However, the provisions of this clause 9.1(d) (*Restrictions on transfers of Shares in the Company*) shall not apply to any Finance Party enforcing its security in accordance with clause 9.1(j) (*Restrictions on transfers of Shares in the Company*).

- (e) No Shareholder (which, for the avoidance of doubt includes the WGCo) shall, except with the prior written consent of all the Shareholders:
- (i) grant any option over any Shares (or any interest, whatsoever, legal or beneficial, in any Shares); or
 - (ii) enter into any agreement in respect of the votes attached to any Shares (other than in any shareholders' agreement entered into between the shareholders of any company which is a Material Shareholder which does not conflict with the terms of this Agreement),

provided that nothing in this sub-clause (e) shall restrict or prevent:

- (A) the Company from granting a security interest over its shares in Project Co to a funder of the Project Co in relation to a project; or
 - (B) arrangements between WGCo, Welsh Government and the Authority from time to time and the other Shareholders shall be entitled to assume that the actions of WGCo as Shareholder and of the Directors appointed by the WGCo as Shareholder are binding and made with the requisite authority. The other Shareholders and Directors shall not be required to make further enquiry as to any such authority or the nature of the arrangements (if any) between WGCo, Welsh Government and the Authority.
- (f) No Shareholder shall be entitled to give a Transfer Notice if it (or, if it is a company, any of its Associates excluding Project Co) is at that time in material breach of this Agreement. Nothing in this sub-clause (f) shall prevent the service of a Transfer Notice which a Shareholder is required to give in accordance with the Hold Co Articles or the giving of a Deemed Transfer Notice in accordance with the Articles.
- (g) Each of the Company and Project Co shall procure that each share certificate issued by it will carry the following statement:
- "Any disposition, transfer, charge of or dealing in any other manner in the securities represented by this certificate is restricted by the Articles of Association of [Company] Limited and by a Shareholders' Agreement dated [♦] 20[♦] and made between [PSDP], [WGCo], [Company] Limited and [Project Co] Limited".*
- (h) A Shareholder may not transfer any Share to any person who is, at the time of transfer, a Restricted Person.
- (i) [No Shareholder wishing to transfer Shares (**Transferring Shareholder**) may do so unless it transfers (or procures the transfer of) an equivalent proportion (relative to the number of Shares that the Transferring Shareholder holds) of any Shareholder Debt held by it or any member of the Shareholder's Group to the proposed transferee. The

Transferring Shareholder must elect to include reference to both Shares and Shareholder Debt (where relevant) in a Transfer Notice.]²³

- (j) No Shareholder shall restrict the transfer of Shares to the Finance Parties, or resist the registration of Shares on the enforcement by the Finance Parties of security, in either case validly undertaken in accordance with the Funding Agreements, and the Shareholders shall procure (as far as they are able) that the Board shall not decline the registration of such a transfer.

Events of Default and deemed transfers

9.2 Notwithstanding the provisions of the Hold Co Articles, if an Event of Default occurs in relation to a Shareholder (**Defaulting Shareholder**) which:

- (a) if capable of remedy, has not been remedied within twenty (20) Business Days of the Shareholder in default becoming aware of the Event of Default (or such longer period as the other Shareholders may notify in writing to the Defaulting Shareholder) (the **Remedy Period**) then the Defaulting Shareholder shall be deemed, at the end of the Remedy Period; or
- (b) is incapable of remedy, then the Defaulting Shareholder shall be deemed immediately upon the Event of Default occurring,

to have given a Deemed Transfer Notice in respect of all the Shares held by it (**Default Shares**) in accordance with the provisions of the Hold Co Articles.

Shareholder Debt

9.3

- (a) Where a Deemed Transfer Notice is deemed given pursuant to clause 9.2 (*Events of Default and deemed transfers*), such Deemed Transfer Notice shall also be deemed to offer, by way of transfer, any Shareholder Debt outstanding to the Defaulting Shareholder in the Company (**Defaulting Shareholder Debt**). Any person acquiring some or all of the Default Shares pursuant to the provisions of this clause 9 (*Restrictions on share transfers*) and the Hold Co Articles shall be required to accept a transfer to it of an equal proportion of the Defaulting Shareholder Debt (and the Defaulting Shareholder shall transfer such Defaulting Shareholder Debt in accordance with the terms of the Hold Co Loan Note Instrument and this Agreement). Except where sub-clause (b) applies, the price for the Defaulting Shareholder Debt shall be the price agreed between the non-defaulting Shareholders and the Defaulting Shareholder or, if a market valuation of the Default Shares is requested in accordance with the Articles, then the parties shall require and procure that such market valuation shall also value the Defaulting Shareholder Debt and the transfer of the Defaulting Shareholder Debt shall be at the Market Value as so determined.
- (b) This sub-clause (b) applies where the Default Shares are offered for sale pursuant to the provisions of clause 9.4 (*Appointment of the Sale Agent in certain circumstances*) in which case the price to be paid for the Defaulting Shareholder Debt shall be as determined in accordance with clause 9.4 (*Appointment of the Sale Agent in certain circumstances*) and Schedule 5 (*Sale Agent*).

²³ Welsh Government Education team are considering stapling provisions from a policy perspective and wish to discuss with bidders.

Appointment of the Sale Agent in certain circumstances

- 9.4 If on the expiry of the Deemed Transfer Notice, the non-defaulting Shareholders have not purchased all of the Default Shares and accompanying Defaulting Shareholder Debt then a notice (an **Instruction to Sell Notice**) shall be deemed to have been served on the Defaulting Shareholder requiring the Defaulting Shareholder to sell such Default Shares and any such Defaulting Shareholder Debt and the Defaulting Shareholder and the other Shareholders shall jointly appoint a sale agent (**Sale Agent**) who shall be instructed in accordance with Schedule 5 (*Sale Agent*) to find a purchaser for such Default Shares and any Defaulting Shareholder Debt (the Default Shares and any such Defaulting Shareholder Debt together being the **Investment**).
- 9.5 If no Qualifying Bid (as defined in Schedule 5 (*Sale Agent*)) is received from a Suitable Third Party within the sixty (60) Business Day period referred to in paragraph 6 of Schedule 5 (*Sale Agent*) or the Investment has not been sold to a Suitable Third Party in accordance with and within the time periods set out in Schedule 5 (*Sale Agent*), then the non-defaulting Shareholders shall be entitled by notice in writing to the Defaulting Shareholder either:
- (a) subject to clause 9.6 (*Appointment of the Sale Agent in certain circumstances*), to elect to purchase the Investment whereupon the Defaulting Shareholder shall forthwith transfer to the non-defaulting Shareholders making the election pro rata to their holdings of Shares all (but not some only) of the Investment for an aggregate consideration (given that the market is deemed to have determined that the value of the Investment is nil) equal to the par value of the Default Shares only; or
 - (b) to require that the Company be wound up in accordance with clause 11 (*Winding Up*) (in which case the Defaulting Shareholder undertakes to the other Shareholders to vote in favour of any resolution(s) to wind up the Company).
- 9.6 Notwithstanding clause 9.5(a) (*Appointment of the Sale Agent in certain circumstances*), any non-defaulting Shareholder shall be entitled to purchase its entitlement to the Investment in its own name and/or by procuring that a Suitable Third Party purchases any part of that entitlement not purchased by that Shareholder provided that:
- (a) the identity of that Suitable Third Party is disclosed to the other non-defaulting Shareholders when it makes an election under clause 9.5(a) (*Appointment of the Sale Agent in certain circumstances*); and
 - (b) no non-defaulting Shareholder reasonably objects in writing within five (5) Business Days of being notified to the identity of the proposed Suitable Third Party on the grounds that the proposed Suitable Third Party is a direct competitor to the non-defaulting Shareholder making the objection.²⁴

Lock In Periods

- 9.7
- (a) **Shares in the Company.** Subject always to clause 9.1(h) (*Restrictions on transfers of Shares in the Company*), each Shareholder agrees that it shall not transfer or dispose of any interest in or over or right attaching to any of its Shares except by a transfer:

²⁴ **Clause 9.6 – WGCo purchase of the Investment.** WGCo needs the flexibility to purchase a proportion of the shares only, with WGCo procuring a Suitable Third Party purchaser for any remainder. (WGCo expects to remain in a minority position).

- (i) to a transferee at any time after the expiry of the Lock In Period (as defined in sub-clause (c));
- (ii) at any time to a transferee permitted in accordance with Articles [◆] of the Hold Co Articles; or
- (iii) in the case of WGCo, WGCo (and any member of the WGCo Group to whom WGCo transfers all but not part of its Shares in the Company) may transfer any interest (or part thereof) to a transferee at any time, including, for the avoidance of doubt during the Lock In Period (as defined in sub-clause (c)),

but always subject to sub-clauses (a)(i) to (ii) above, otherwise in accordance with the provisions of the Hold Co Articles and this clause 9 (*Restrictions on share transfers*).

- (b) **Shares in the PSDP.** No transfer of any legal or beneficial interest in any share capital of [*identify superior holdings in the PSDP*] (each an **Original PSDP Shareholder**) in the PSDP or change in the control over the exercise of voting rights conferred by shares held by the Original PSDP Shareholders in the PSDP shall be made or effected before the expiry of the Lock In Period.
- (c) For the purposes of this Agreement, **Lock In Period** means the period from and including the date of this Agreement up to and including the end of the Project Co Lock In Period.

10. Warranties and undertakings

Warranties by WGCo

10.1 WGCo warrants and represents to each of the other parties at the date of this Agreement that:

- (a) it is duly incorporated under the laws of England and Wales;
- (b) it has the corporate power to enter into and to exercise its rights and perform its obligations under the Project Documents to which it is a party;
- (c) each Project Document to which it is a party constitutes, or will when executed constitute, legal, binding and enforceable obligations on it;
- (d) it has taken all necessary action to authorise the execution of and the performance of its obligations under the Project Documents to which it is a party (and in the case of a Project Document executed after the date of this Agreement it will take all necessary action to authorise the execution of such Project Document);
- (e) no claim is being asserted and no Proceedings are presently in progress, or, to the best of its knowledge pending or threatened against it or any of its assets which will or might have a material adverse effect on its ability to perform its obligations under those Project Documents to which it is a party;
- (f) it is not subject to any contractual obligation, compliance with which will be likely to have a material adverse effect on its ability to perform its obligations under the Project Documents to which it is a party; and
- (g) no Proceedings or other steps have been taken and not discharged (nor, to the best of its knowledge are threatened) for its winding-up or for its dissolution or for the appointment of a receiver, administrative receiver, liquidator, administrator or similar officer in relation to any of its assets or revenue.

Warranties by the PSDP, the Company and the Project Co

- 10.2 The PSDP, the Company and the Project Co each severally warrant and represent to each of the other parties at the date of execution of this Agreement that:
- (a) each of them is duly incorporated under the laws of England and Wales²⁵ and has the corporate power to enter into and to exercise its rights and perform its obligations under the Project Documents to which it is a party;
 - (b) each Project Document to which it is a party constitutes, or will when executed constitute legal, binding and enforceable obligations on each of them;
 - (c) each of them has taken all necessary action to authorise the execution of and the performance of their obligations under the Project Documents to which they are respectively parties (and in the case of a Project Document executed after the date of this Agreement will take all necessary action to authorise the execution of that Project Document);
 - (d) no claim is being asserted and no litigation, arbitration or administrative proceeding is presently in progress or, to the best of its knowledge pending or threatened against any of them or any of their assets which will or might have a material adverse effect on their ability to perform their obligations under the Project Documents;
 - (e) none of them is subject to any contractual obligation, compliance with which will be likely to have a material adverse effect on their ability to perform their obligations under the Project Documents;
 - (f) no proceedings or other steps have been taken and not discharged (nor, to the best of their knowledge, are threatened) for the winding-up of any of them or for their dissolution or for the appointment of a receiver, administrative receiver, liquidator, administrator or similar officer in relation to any of their assets or revenue; and
 - (g) each of them has complied with and currently complies with the all relevant anti-bribery and corruption laws applicable to its business and operations including (without limitation) the provisions of the Bribery Act 2010.

Warranties by the PSDP, the Company and the Project Co

- 10.3 The PSDP, the Company and the Project Co each severally warrant and represent to each of the other Shareholders at the date of execution of this Agreement that each of the Company and Project Co are newly incorporated companies and have not traded prior to the date of this Agreement.

Tax compliance

- 10.4 Each Shareholder (other than WGCo) represents and warrants that, as at the date of this Agreement, it has notified the Company and Project Co in writing of any Occasions of Tax Non-Compliance or any litigation that it is involved in that is in connection with any Occasions of Tax Non-Compliance.
- 10.5 If at any time an Occasion of Tax Non-Compliance occurs in relation to a Shareholder, the Shareholder shall:

²⁵ **Clause 10.2(a) - Warranties.** To be amended if any of the parties are not incorporated in England and Wales.

- (a) notify each of the Company and Project Co in writing of such fact within five (5) Business Days of its occurrence; and
- (b) promptly provide to each of the Company and Project Co:
 - (i) details of the steps which the Shareholder is taking to address the Occasion of Tax Non-Compliance and to prevent the same from recurring, together with any mitigating factors that it considers relevant; and
 - (ii) such other information in relation to the Occasion of Tax Non-Compliance as the Company and Project Co may reasonably require.

10.6 If:

- (a) the warranty given by a Shareholder pursuant to clause 10.4 (*Tax compliance*) is untrue; and/or
- (b) the Shareholder commits a material breach of its obligation to notify the Company and Project Co of any Occasion of Tax Non-Compliance as required by clause 10.5 (*Tax compliance*) or the Authority under the analogous provisions of the Authority Project Agreement,

and, in either case, the Shareholder fails to provide details of proposed mitigating factors which, in the reasonable opinion of the Project Co Board, are acceptable, then Project Co shall be entitled to give a notice to that Shareholder (a **Provisional Transfer Notice**) and the provisions of clause 10.7 (*Provisional Transfer Notices*) shall then apply.

Provisional Transfer Notices

10.7 If a Shareholder receives a Provisional Transfer Notice:

- (a) it shall have ninety (90) days to effect the transfer of its Shares and Shareholder Debt to a Suitable Third Party;
- (b) in relation to any such transfer:
 - (i) the pre-emption and transfer provisions in this Agreement and the Articles shall apply;
 - (ii) if the Shares and Shareholder Debt are transferred to a Suitable Third Party then the other Shareholders shall take (or procure) all steps reasonably requested of them by the transferring Shareholder to enable any such transfer to be effected and registered; and
- (c) if the Shareholder has not effected the transfer of its Shares and Shareholder Debt to a Suitable Third Party within the ninety (90) day period referred to (or such longer period as may be agreed by Project Co) then the same shall constitute an Event of Default in respect of that Shareholder.

11. Winding Up

- 11.1 If the Shareholders pass a resolution pursuant to this Agreement or otherwise to wind up the Company by way of a members' voluntary winding-up they shall procure that the liquidator is a member of the Institute of Chartered Accountants in England and Wales acceptable to all the Shareholders and in default of agreement nominated at the request of any Shareholder by the President from time to time of such Institute.

11.2 Except to the extent each party has contractual obligations to the contrary, the Shareholders shall prove in the winding-up of the Company to the maximum extent permitted by Law for all sums due or to fall due to them respectively from the Company and shall exercise all rights of set-off and generally do all such other acts and things as may be available to them in order to obtain the maximum receipts and recoveries.

11.3 To the extent that any or all of the Shareholders do not receive satisfaction in full in the winding-up of the Company of all sums due or to fall due to them the aggregate shortfall between all sums due or to fall due to the Shareholders and all amounts actually recovered by the Shareholders from the Company or its liquidator (whether by direct payment or the exercise of any right of set-off or otherwise) shall be calculated and apportioned between the Shareholders in the same proportions as the Shareholders hold Shares at the time of the determination. The Shareholders shall make such contributions to each other as are necessary to procure that the Shareholders bear the aggregate amount of such shortfall in such proportions.

12. Miscellaneous

Confidentiality

12.1

(a) Subject to clause 8.4(c)(ii) (*Provision of information to Shareholders and designated third parties*), during the term of this Agreement and after termination or expiry of the Agreement for any reason whatsoever, a party receiving information from another party shall:

- (i) keep Confidential Information (as defined in sub-clause (e)) confidential;
- (ii) not disclose Confidential Information to any other person other than with the written consent of the party disclosing such information or in accordance with sub-clauses (b) to (d); and
- (iii) not use Confidential Information for any purpose other than the performance of its obligations under this Agreement and the other Project Documents.

(b) During the term of this Agreement, a party receiving information from another party may, subject to the provisions of clause 8.4 (*Provision of information to Shareholders and designated third parties*), disclose Confidential Information to its employees, contractors, sub-contractors, agents and advisers under conditions of confidentiality in each case to the extent that it is reasonably necessary for the purposes of this Agreement, or any other Project Document and may disclose Confidential Information to its funders, prospective funders, prospective shareholders of the Company or prospective purchasers of its assets under conditions of confidentiality. In each case the permitted recipient of such Confidential Information shall be known as a **Recipient**.

(c) The party receiving information from another party shall so far as practicable procure that each Recipient is made aware of and complies with all that receiving party's obligations of confidentiality under this Agreement as if the Recipient were a party to this Agreement.

(d) Without prejudice to sub-clause (b), the obligations contained in sub-clauses (a) to (c) shall not apply to:

- (i) any disclosure of information that is reasonably required by any person engaged in the performance of their obligations under the Agreement for the performance of those obligations;
- (ii) any matter which a party can demonstrate is already, or becomes, generally available and in the public domain otherwise than as a result of a breach of any of the provisions in sub-clauses (a) to (c);
- (iii) any disclosure which is required pursuant to any statutory, legal (including any order of a court of competent jurisdiction) or Parliamentary obligation placed upon the party making the disclosure or the rules of any stock exchange or governmental or regulatory authority having the force of Law or, if not having the force of Law, compliance with which is in accordance with the general practice of persons subject to the stock exchange or governmental or regulatory authority concerned;
- (iv) any disclosure of information which is already lawfully in the possession of the receiving party, prior to its disclosure by the disclosing party;
- (v) any provision of information to the parties' own professional advisers or insurance advisers or to lenders in respect of the Project or such lender's professional advisers or insurance advisers or, where it is proposed that a person should or may provide funds (whether directly or indirectly and whether by loan, equity participation or otherwise) to the Company and/or Project Co to enable it to carry out its obligations under this Agreement or may wish to acquire shares in the Company and/or Project Co in accordance with the provisions of this Agreement to that person or their respective professional advisers but only to the extent reasonably necessary to enable a decision to be taken on the proposal;
- (vi) any disclosure for the purposes of:
 - (A) the examination and certification of the Company's or the Project Co's accounts;
 - (B) any examination pursuant to the Public Audit (Wales) Act 2004 of the economy, efficiency and effectiveness with which the Authority has used its resources;
 - (C) complying with a proper request from either party's insurance adviser, or insurer on placing or renewing any insurance policies;
 - (D) any disclosure required to be made to the Auditor General for Wales or the Wales Audit Office; or
 - (E) (without prejudice to the generality of sub-clause (d)(iii) above) compliance with the FOIA and/or the Environmental Information Regulations,

provided that, for the avoidance of doubt, neither sub-clause (d)(vi)(E) nor sub-clause (d)(iii) above shall permit disclosure of Confidential Information otherwise prohibited by sub-clauses (a) to (c) above where that information is exempt from disclosure under Section 41 of the FOIA.

- (e)
 - (i) Where disclosure is permitted under sub-clause (d), other than sub-clauses (d)(ii), (iii), (iv) and (v), the party providing the information shall

procure that the Recipient of the information shall be subject to the same obligation of confidentiality as that contained in this Agreement.

- (ii) For the purposes of the Public Audit (Wales) Act 2004, the Wales Audit Office may examine such documents as it may reasonably require which are owned, held or otherwise within the control of the Company and/or Project Co and may require the Company and/or Project Co to produce such oral or written explanations as he/she considers necessary.
- (iii) The parties acknowledge that the Wales Audit Office has the right to publish details of the Agreement (including Commercially Sensitive Information) in its relevant reports.
- (iv) The provisions of this clause 12.1 (*Confidentiality*) are without prejudice to the application of the Official Secrets Act 1911 to 1989.
- (v) For the purposes of this clause 12.1 (*Confidentiality*), **Confidential Information** means:
 - (A) information that ought to be considered as confidential (however it is conveyed or on whatever media it is stored) and may include information whose disclosure would, or would be likely to, prejudice the commercial interests of any person, trade secrets, commercially sensitive intellectual property rights and know-how of any party and all personal data and special categories of personal data within the meaning of the Data Protection Laws; and
 - (B) Commercially Sensitive Information.²⁶

Freedom of Information

- (f) References in sub-clauses (f) to (m) to the Company shall apply also to Project Co with the necessary changes. The parties acknowledge that WGC Co is subject to the requirements of the FOIA and the Environmental Information Regulations and the Company shall facilitate WGC Co's compliance with its Information disclosure requirements pursuant to the same in the manner provided for in sub-clauses (f) to (m) (inclusive) below. For the purpose of sub-clauses (f) to (m) (inclusive) only **Information** has the meaning given to it under section 84 of the FOIA.
- (g) Where WGC Co receives a Request for Information in relation to Information that the Company is holding on behalf of WGC Co, WGC Co shall transfer to the Company such Request for Information that it receives as soon as practicable and in any event within [five (5)] Business Days of receiving a Request for Information and the Company shall:
 - (i) provide WGC Co with a copy of all such Information in the form that WGC Co requires as soon as reasonably practicable and in any event within [ten (10)] Business Days (or such other period as WGC Co may acting reasonably specify) of WGC Co's request; and
 - (ii) provide all necessary assistance as reasonably requested by WGC Co in connection with any such Information, to enable WGC Co to respond to a

²⁶

Clause 12.1(e) – Commercially Sensitive Information. Any information or classes of information that the parties agree should be treated as Commercially Sensitive Information should be included in Schedule 7, Part C entitled Commercially Sensitive Material. The parties should be mindful of guidance on this issue when agreeing which information should be categorised as commercially sensitive. Broad blanket categorisations are not appropriate.

Request for Information within the time for compliance set out in section 10 of the FOIA or Regulation 5 of the Environmental Information Regulations.

(h) Following notification under sub-clause (g) and up until such time as the Company and the Shareholders has provided WGC0 with all the Information specified in sub-clause (g)(i), the Company may make representations to WGC0 as to whether or not or on what basis Information requested should be disclosed, and whether further Information should reasonably be provided in order to identify and locate the Information requested, provided always that WGC0 shall be responsible for determining at its absolute discretion:

(i) whether the Information is exempt from disclosure under the FOIA and the Environmental Information Regulations;

(ii) whether the Information is to be disclosed in response to a Request for Information,

and in no event shall the Company respond directly or allow its subcontractors to reply directly to a Request for Information unless expressly authorised to do so by WGC0.

(i) The Company shall ensure that all Information held on behalf of WGC0 is retained for disclosure for at least [six (6)] years from the date it is acquired and shall permit WGC0 to inspect such Information as requested from time to time.

(j) The Company shall transfer to WGC0 any Request for Information received by the Company as soon as practicable and in any event within two (2) Business Days of receiving it.

(k) The Company acknowledges that any lists provided by it listing or outlining Confidential Information, are of indicative value only and that WGC0 may nevertheless be obliged to disclose Confidential Information in accordance with sub-clause (i) above.

(l) If WGC0 makes a request to the Company pursuant to sub-clause (g)(ii) the Company shall, as soon as practicable, and in any event within five (5) Business Days of receipt of such request, inform WGC0 of the Company's estimated costs of complying with the request to the extent these would be recoverable if incurred by WGC0 under section 12(1) of the FOIA and the Fees Regulations. Where such costs (either on their own or in conjunction with WGC0's own such costs in respect of such Request for Information) will exceed the appropriate limit referred to in section 12(1) of the FOIA and as set out in the Fees Regulations WGC0 shall inform the Company in writing whether or not it still requires the Company to comply with the request and where it does require the Company to comply with the request the ten (10) Business Days period for compliance shall be extended by such number of additional days for compliance as WGC0 is entitled to under section 10 of the FOIA. In such case, WGC0 shall notify the Company of such additional days as soon as practicable after becoming aware of them and shall reimburse the Company for such costs as the Company incurs in complying with the request to the extent WGC0 is itself entitled to reimbursement of such costs in accordance with its own FOIA policy from time to time.

(m) The Company acknowledges that (notwithstanding the provisions of clause 12.1 (*Confidentiality*)) WGC0 may, acting in accordance with the Department of Constitutional Affairs' Code of Practice on the Discharge of Functions of Public Authorities under Part I of the Freedom of Information Act 2000 (or such equivalent as may from time to time be applicable in Wales) (**the Code**), be obliged under the

FOIA, or the Environmental Information Regulations to disclose Information concerning the Company:

- (i) in certain circumstances without consulting with the Company; or
- (ii) following consultation with the Company and having taken their views into account,

provided always that where sub-clause (m)(i) applies, WGCo shall, in accordance with the recommendations of the Code, draw this to the attention of the Company prior to any disclosure.

Governing law and Jurisdiction

12.2

- (a) This Agreement and any non-contractual obligations arising out of or in connection with it shall be considered as a contract made in England and Wales and shall be subject to the laws of England and Wales.
- (b) The parties agree that the courts of England and Wales shall have exclusive jurisdiction to hear and settle any action, suit, proceeding or dispute in connection with this Agreement and irrevocably submit to the jurisdiction of those courts.

Further assurance

12.3 Each party will:

- (a) execute any document and do any thing; and
- (b) use all reasonable endeavours to procure that any third party (where necessary) executes any deed or document and does any thing,

reasonably necessary to implement and give full effect to the terms of this Agreement.

Costs

12.4 Each party shall bear its own costs and expenses in relation to the drafting, negotiating, execution and implementation of this Agreement and the Project Documents.

Insurance

12.5

- (a) The Company and the Project Co shall each take out and maintain with reputable insurers all insurances required to be maintained by Law and such other prudent insurances against such risks as are normally insured against by businesses carrying on activities similar to those of the Company/Project Co and (without prejudice to the generality of the foregoing) shall insure its assets which are of an insurable nature for their full replacement or reinstatement value. Each of the Company and the Project Co shall comply with its obligations under the Project Documents in respect of insurance.
- (b) Each Shareholder shall ensure that any directors and officers liability insurance taken out by such Shareholder extends to any Directors nominated and appointed by such Shareholder.

Assignment

12.6

- (a) Subject always to clause 9 (*Restrictions on share transfers*), this Agreement can be transferred by a Shareholder to a permitted transferee or successor. This Agreement, shall be binding on, and shall enure to the benefit of, each of the parties and their respective permitted transferees and successors. In the case of WGCo its successors shall include any person to whom the Welsh Government transfers the property, rights and obligations of WGCo.
- (b) Save as permitted by sub-clause (a) and clause 9 (*Restrictions on share transfers*), no party shall assign, transfer, sub contract or otherwise dispose of any interest in this Agreement.

Entire agreement

12.7 Except where expressly provided otherwise in this Agreement, this Agreement constitutes the entire agreement between the parties in connection with its subject matter and supersedes all prior representations, communications, negotiations and understandings concerning the subject of this Agreement.

Notices

12.8

- (a) All notices under this Agreement shall be in writing and all certificates, notices or written instructions to be given under the terms of this Agreement shall be served by sending the same by first class post, email or by hand, leaving the same at:

| | |
|------------------------------------|--|
| <i>If to the PSDP</i> | |

| | |
|----------------------|--|
| For the attention of | |
| Address | |
| Email | |

- (b) Any party to this Agreement may change its nominated address or email address by prior notice to the other parties.
- (c) Notices given by post shall be effective upon the earlier of (i) actual receipt, and (ii) five (5) Business Days after mailing. Notices delivered by hand shall be effective upon delivery. Notices given by email shall be deemed to have been received (unless there is an error message returned to that email):
 - (i) within two (2) hours after sending, if sent on a Business Day between the hours of 9am and 4pm; or
 - (ii) by 11am on the next following Business Day, if sent after 4pm, on a Business Day but before 9am on that next following Business Day.

Contracts (Rights of Third Parties) Act 1999

- 12.9 It is agreed for the purposes of the Contracts (Rights of Third Parties) Act 1999 that this Agreement is not intended to, and does not, give to any person who is not a party to this Agreement any rights to enforce any provisions contained in this Agreement.

Waiver – no waiver unless in writing

- 12.10 Any relaxation, forbearance, indulgence or delay (together indulgence) of any party in exercising any right shall not unless made in writing, be construed as a waiver of the right and shall not affect the ability of that party subsequently to exercise that right or to pursue any remedy, nor shall any indulgence constitute a waiver of any other right (whether against that party or any other person).

Severability

- 12.11 If any provision of this Agreement shall be declared invalid, unenforceable or illegal by the courts of any jurisdiction to which it is subject, such provision may be severed and such invalidity, unenforceability or illegality shall not prejudice or affect the validity, enforceability or legality of the remaining provisions of this Agreement.

No partnership or agency

12.12

- (a) Nothing in this Agreement shall be construed as creating a partnership.
- (b) No party shall be deemed to be an agent of any other party and no party shall hold itself out as having authority or power to bind any other party in any way.

Amendments

12.13 This Agreement may not be varied except by an agreement in writing executed as a deed by duly authorised representatives of the parties.

Executed as a deed by the parties or their duly authorised representatives on the date of this Agreement.

Schedule 1 Definitions and Interpretation

1. Definitions

1.1 In this Agreement, unless the context otherwise requires:

Agreement means this Shareholders' Agreement and Schedules;

Alternate means an alternate director appointed by a RTAD Shareholder under clause 5.1(d) (*Composition of the Boards and the right to appoint Directors*) provided such alternate director has been registered as a director at Companies House;

Annual Budget means the annual budget forming part of the Business Plan;

Annual Service Payment has the meaning given to it in the Authority Project Agreement;

Appointing Shareholder has the meaning given to it in clause 5.3(a) (*Removal of/change to nominated Directors*);

Articles means the Hold Co Articles or the Project Co Articles as the context requires;

Associate²⁷ means in relation to any company:

- (a) any company of which such company is a subsidiary;
- (b) any subsidiary of such company; or
- (c) any other subsidiary of such company's holding company,

and **Associated** shall be construed accordingly;

Authority means [*insert relevant definition from the Authority Project Agreement*];

Authority Project Agreement means [*add relevant definition of the project agreement*];

Boards means the Hold Co Board and the Project Co Board (as the context may require) and Board means either of them;

Business Day means a day other than a Saturday, Sunday or a bank holiday in England and Wales;

Business Plan means the plan referred to in clause 8.1(a) (*The Business Plan (including the Annual Budget)*) as the same may be varied or updated or replaced from time to time in accordance with the provisions of clause 8 (*Budgeting, Business Planning and financial matters*);

Businesses means the Hold Co Business and the Project Co Business and Business means either of them as the context requires;

²⁷

Schedule 1 Definitions – Associate. The definition of Associate to be considered on a project specific basis in accordance with the relevant facts and in the context of the relevant PSDP group structure to ensure the definition is appropriate/wide enough.

Chairman means such independent non-executive Director or other Director as may be appointed from time to time pursuant to clause 5.4 (*Chairman of the Board*);

Claim has the meaning given to it in clause **Error! Reference source not found.** (*Step-aside provisions*);

Code has the meaning given to it in clause 12.1(m) (*Miscellaneous*);

Commercially Sensitive Information means any information detailed in Part C of Schedule 7 (*Transparency Information and Commercially Sensitive Information*);

Confidential Information has the meaning given to it in sub-clause 12.1(e)(v) (*Confidentiality*);

Conflict Authorisation has the meaning given to it at clause 5.13 (*Director's power to authorise conflict situations*);

Conflict Authorisation Terms has the meaning given to it at clause 5.16 (*Director's power to authorise conflict situations*);

Conflict Situation has the meaning given to it in clause 5.13 (*Director's power to authorise conflict situations*);

Counterparty has the meaning given to it in clause 5.17(a) (*Director's power to authorise conflict situations*);

Data Protection Laws means Regulation (EU) 2016/679 (General Data Protection Regulation), as supplemented by the Data Protection Act 2018;

Data Sheet means the document in the Agreed Form containing details about the Company and the Project Co including, inter alia, subscriptions by the parties for Shares and details of any Shareholder Debt advanced to the Company, Directors details and other administrative matters;

Deed of Adherence means a deed in substantially the same form as the draft set out at Schedule 4 (*Deed of Adherence*);

Deemed Transfer Notice has the meaning given to it in the Hold Co Articles;

Default Shares has the meaning given to it in clause 9.2 (*Events of Default and deemed transfers*);

Defaulting Shareholder has the meaning given to it in clause 9.2 (*Events of Default and deemed transfers*);

Defaulting Shareholder Debt has the meaning given to it in clause 9.3(a) (*Shareholder Debt*);

Directors means, as the context may require:

- (a) the Hold Co Directors and/or the Project Co Directors as nominated by the relevant parties from time to time; and
- (b) a Chairman appointed pursuant to clause 5.4(b) (*Chairman of the Board*) and Article 37.1 (*Chairman of the Board*) (in respect of Project Co or Hold Co as applicable),

- (i) save as expressly stated otherwise in this Agreement;
- (ii) [save for the purpose of clause 5.1 (Composition of the Boards and the right to appoint Directors); and
- (iii) subject always to clause 5.5(a)(ii)(Board meetings and Board voting) and the Articles],

and Director shall mean any of them;

DOTAS means the Disclosure of Tax Avoidance Schemes rules which require a promoter of tax schemes to tell HM Revenue & Customs, and or any relevant tax authority with jurisdiction in Wales of any specified notifiable arrangements or proposals and to provide prescribed information on those arrangements or proposals within set time limits as contained in Part 7 of the Finance Act 2004 and in secondary legislation made under vires contained in Part 7 of the Finance Act 2004 and as extended to National Insurance Contributions by the National Insurance Contributions (Application of Part 7 of the Finance Act 2004) Regulations 2012, SI 2012/1868 made under s.132A Social Security Administration Act 1992;

Draft Business Plan has the meaning given to it in sub-clause 8.1(b) (*The Business Plan (including the Annual Budget)*);

Environmental Information Regulations means the Environmental Information Regulations 2004 together with any guidance and/or codes of practice issued by the Information Commissioner or relevant Government department in relation to such regulations;

Equity Subscription Agreement means [◆];

Event of Default means:

- (a) a petition being presented or a proceeding commenced (and such petition or proceeding not being discharged or dismissed) or an order being made or an effective resolution passed for the winding-up, insolvency, administration, re-organisation, re-construction, dissolution or bankruptcy of a Shareholder or for the appointment of a liquidator, receiver, administrative receiver, administrator, trustee or similar officer of a Shareholder or of all or any part of its business or assets PROVIDED THAT this paragraph shall not apply to any bona fide re-organisation or re-construction of a Shareholder whilst solvent (the structure of which has been previously approved by the other Shareholders in writing, acting reasonably) in which a new company assumes (and is capable of assuming) all the obligations of the Shareholder;
- (b) a Shareholder stopping or suspending payments to its creditors generally or being unable to pay its debts as they fall due or seeking to enter into any composition or other arrangement with its creditors or being declared bankrupt or insolvent;
- (c) a creditor taking possession of all or any part of the business or assets of a Shareholder or any execution or other legal process being enforced against the business or any substantial asset of the Shareholder and not being discharged;
- (d) anything analogous or having an effect substantially similar to any of the events described in paragraphs (a) to (c);
- (e) a Shareholder changing the nature or scope of its business such that it becomes a Restricted Person;

- (f) a Shareholder being in material breach of any of the warranties given by it in clause 10.1 to clause 10.3 (*Warranties and undertakings*) or of its obligations under clause 4.1 (*Initial subscriptions of Shares*) [within [◆] Business Days of the due date for payment (whether by the defaulting Shareholder or pursuant to any guarantee or other security provided in support of such obligations)]²⁸;
- (g) a Shareholder attempting to sell, transfer, charge or otherwise dispose of any of its Shares or Shareholder Debt or any interest in Shares or Shareholder Debt otherwise than in accordance with this Agreement and/or the Articles (which in all cases shall be deemed not to be capable of remedy) or any secured party taking any steps to enforce any charge created over any Shares held by the Shareholder in the Company;
- (h) the circumstances where an Event of Default occurs as set out in clause 10.7(c) (*Provisional Transfer Notices*);
- (i) a Shareholder failing to comply with its obligations under clause 8.4(a)(ii) (*Provision of information to Shareholders and designated third parties*); or
- (j) a Shareholder committing any material offence under any anti-bribery and corruption legislation in the UK from time to time or at common law in respect of fraudulent acts and provided always that if the offence is an offence under section 7(1) of the Bribery Act 2010;

Expiry Date has the meaning given to it in the Authority Project Agreement;

Fees Regulations means The Freedom of Information and Data Protection (Appropriate Limit and Fees) Regulations 2004;

Finance Parties means [◆];

Financing Default means the occurrence of an event of default under the Principal Funding Agreement;

Financial Model has the meaning given to it in the Principal Funding Agreement;

Founder Shareholders means the Shareholders who entered into this Agreement on the date on which it was signed;

FOIA means the Freedom of Information Act 2000 and any subordinate legislation (as defined in section 84 of the Freedom of Information Act 2000) made under the Freedom of Information Act 2000 from time to time together with any guidance and/or codes of practice issued by the Information Commissioner or relevant Government department in relation to such Act;

Funding Agreements means [*define by reference to relevant MIM funding documents relating to Project Co*];

General Anti-Abuse Rule means:

- (a) the legislation in Part 5 of the Finance Act 2013; and

²⁸

Schedule 1 Definitions - Event of Default. To cover any payment default and with the benefit of the same grace period (if any) as permitted by Senior Funders (as defined in the Authority Project Agreement).

- (b) any future legislation introduced into parliament to counteract tax advantages arising from abusive arrangements to avoid national insurance contributions;

Halifax Abuse Principle means the principle explained in the CJEU Case C-255/02 Halifax and others;

Hold Co Articles means the articles of association of the Company in the format set out in Schedule 6 (*The Articles of Association of the Company*) as amended from time to time;

Hold Co Board means the board of Directors of the Company from time to time as constituted in accordance with this Agreement and the Hold Co Articles;

Hold Co Business means the business of Hold Co as described in clause 3.1(a) (*The business of the Company and Project Co and details of the Company and Project Co*) and such other business as the Shareholders may from time to time agree should be carried on by Hold Co;

Hold Co Director means:

- (a) any director from time to time of Hold Co appointed pursuant to clause 5.1 (b) (*Composition of the Boards and the right to appoint Directors*) and article 36.1 (*Appointment of Directors*); and
- (b) any Alternate (in that capacity):
- (i) save where expressly stated otherwise in this Agreement or the Articles;
 - (ii) save for the purpose of clauses [5.1 (*Composition of the Boards and the right to appoint Directors*), 5.6 to 5.8 (*Director Remuneration*) and 6.2(b) (*Reserved Matters*)]; and
 - (iii) subject always to Article 26.4 (*Quorum for Board Meetings*) and article 27.4 (*Voting at Board Meetings*).

Hold Co Loan Note means [◆];

Hold Co Loan Note Instrument means [◆];

Independent Directors has the meaning given to it in clause 6.5(a) (*Step-aside provisions*);

Index Linked means in relation to any amounts or sums, such amounts or sums as adjusted on each anniversary of the date of this Agreement in accordance with the following formula:

Amount or sum x (RPIXd / RPIX0)

Where RPIXd is the value of the Retail Prices Index (All Items Excl Mortgage Interest) published or determined with respect to the month most recently preceding the relevant anniversary of the date of this Agreement and RPIX0 is the value of the Retail Prices Index (All Items Excl Mortgage Interest) in respect of [◆];

Information has the meaning given to it under section 84 of the Freedom of Information Act 2000;

Instruction to Sell Notice has the meaning given to it in clause 9.4 (*Appointment of the Sale Agent in certain circumstances*);

Investment has the meaning given to it in clause 9.4 (*Appointment of the Sale Agent in certain circumstances*);

Law has the meaning given to it in the Authority Project Agreement;

Lock In Period has the meaning given to it in clause 9.7(c) (*Lock In Periods*);

Market Value has the meaning given to it in the Hold Co Articles;

Material Shareholder has the meaning given to it in clause 5.1(b) (*Composition of the Boards and the right to appoint Directors*);

MIM means the Welsh Government's Mutual Investment Model;

New Shareholder has the meaning given to it in sub-clause 2.1(b) (*Conditions precedent*);

Occasion of Tax Non-Compliance means:

- (a) any tax return of the Shareholder submitted to a Relevant Tax Authority on or after 1 October 2012 is found to be incorrect as a result of:
 - (i) a Relevant Tax Authority successfully challenging the Shareholder under the General Anti-Abuse Rule or the Halifax Abuse Principle or under any tax rules or legislation that have an effect equivalent or similar to the General Anti-Abuse Rule or the Halifax Abuse Principle;
 - (ii) the failure of an avoidance scheme which the Shareholder was involved in, and which was, or should have been, notified to a Relevant Tax Authority under the DOTAS or any equivalent or similar regime; and/or
- (b) the Shareholder's tax affairs give rise on or after 1 April 2013 to a criminal conviction in any jurisdiction for tax related offences which is not spent at the date of this Agreement or to a penalty for civil fraud or evasion;

Offer to Allot has the meaning given to it in sub-clause 4.4 (*Offers to Allot*);

On-Loan Agreement means [◆];

Original Meeting has the meaning given to it in sub-clause 6.3(b) (*Manner of giving Shareholder approval*);

Original PSDP Shareholder has the meaning given to it in clause 9.7(b) (*Lock In Periods*);

Other Directors has the meaning given to it in sub-clause 6.3(b) (*Manner of giving Shareholder approval*);

Outgoing Director has the meaning given to it in sub-clause 5.3(a) (*Removal of/change to nominated Directors*);

Outgoing Shareholder has the meaning given to it in sub-clause 5.3(b) (*Removal of/change to nominated Directors*);

Principal Funding Agreement means the [insert definition of Common Terms Agreement/Credit Agreement];

Proceedings means any adjudication, litigation, arbitration or administrative proceedings;

Project has the meaning given to it in clause 3.1(b) (*The business of the Company and Project Co and details of the Company and Project Co*);

Project Agreements means [the Authority Project Agreement and those other documents defined as "**Project Document**" pursuant to the Principal Funding Agreement];

Project Co Articles means the articles of association of Project Co;

Project Co Board means the board of Directors for the time being of Project Co as constituted in accordance with this Agreement and the Project Co Articles;

Project Co Business means the business of Project Co as described in clause 3.1(b) (*The business of the Company and Project Co and details of the Company and Project Co*) and such other business as the Shareholders may from time to time agree should be carried on by Project Co;

Project Co Director means:

(a) any director for the time being of Project Co appointed pursuant to clause 5.1 (b) (*Composition of the Boards and the right to appoint Directors*) and article 36.1 (*Appointment of Directors*); and

(a) any Alternate (in that capacity):

- (i) save where expressly stated otherwise in this Agreement or the Articles;
- (ii) save for the purpose of clauses [5.1 (*Composition of the Boards and the right to appoint Directors*), 5.6 to 5.8 (*Director Remuneration*) and 6.2(b) (*Reserved Matters*)]; and
- (iii) subject always to article 26.4 (*Quorum for Board Meetings*), article 27.7 (*Quorum for Board Meetings*) and article 27.4 (*Voting at Board Meetings*).

Project Co Lock In Period means the period during which Shareholders in Project Co and/or Hold Co are not entitled to transfer shares in the Project Co and/or Hold Co under clause [59.5] of the Authority Project Agreement;

Project Default means the occurrence of an event of default under a Project Agreement;

Project Documents means this Agreement, the Funding Agreements and the Project Agreements;

Project Document Conflict Authorisation has the meaning given in clause 5.17 (*Director's power to authorise conflict situations*);

Project Document Conflict Authorisation Terms has the meaning given to it in clause 5.18 (*Director's power to authorise conflict situations*);

Provisional Transfer Notice has the meaning given to it in clause 10.6 (*Tax compliance*);

PSDP Directors has the meaning given to it in clause 6.5 **Error! Reference source not found.** (*Step-aside provisions*);

Qualifying Bid has the meaning given to it in Schedule 5 (*Sale Agreement*);

Recipient has the meaning given to it in sub-clause 12.1(b) (*Confidentiality*);

Register has the meaning given to it in the Hold Co Loan Note Instrument;

Relevant Director has the meaning given to it in clause 5.13 (*Director's power to authorise conflict situations*);

Relevant Shareholder has the meaning given to it in clause 5.5(g) (*Board meetings and Board voting*);

Relevant Tax Authority means HM Revenue & Customs, or, if applicable, a tax authority in the jurisdiction in which the Shareholder and the Company/Project Co is ordinarily based for the purpose of carrying out its business;

Remedy Period has the meaning given to it in clause 9.2 (*Events of Default and deemed transfers*);

Request for Information shall have the meaning given to it in the FOIA or the Environmental Information Regulations as relevant;

Reserved Matters means those matters listed in Schedule 8 (*Reserved Matters*) and ticked in the second column (entitled "Shareholder"), which shall not be carried out without prior written approval in accordance with clause 6.2(a) (*Reserved Matters*);

Reserved Matter Board Approval means those matters listed in Schedule 8 (*Reserved Matters*) and ticked in the third column (entitled "Board"), which shall not be carried out without prior written approval in accordance with clause 6.2(b) (*Reserved Matters*);

Restricted Person shall have the meaning given to it in the Authority Project Agreement;

RTAD Shareholder means each Material Shareholder and, where WGCo is not a Material Shareholder but holds issued Share capital in the Company, WGCo;

Sale Agent has the meaning given in clause 9.4 (*Appointment of the Sale Agent in certain circumstances*);

Schedules means Schedules 1 (*Definitions and Interpretation*) to [8 (*Reserved Matters*)] attached to this Agreement;

Shares means the Shares referred to in Schedule 2 (*Details of the Company and the Project Co*) together with any further shares issued from time to time pursuant to clause 4 (*Funding of the Company and the Project Co and financial matters*);

Shareholder Debt means monies advanced or otherwise made available to Project Co by way of subordinated debt or loan stock subscription by a Shareholder or an Associate of a Shareholder (or, in relation to the Project Co, by the Company);

Shareholders means the parties to this Agreement (except for the Company and Project Co) and such other persons who may become shareholders in the Company from time to time as permitted by this Agreement and the Articles and Shareholder means any one (1) of them;

Shareholder's Group means:

- (a) in relation to a Shareholder which is a company, the Shareholder and each of its Associates; and
- (b) in the case of WGCo each Associate of WGCo and each member of WGCo Group;

Suitable Third Party means any person who is not a Restricted Person;

Transfer Notice has the meaning given to it in the Articles;

Transferring Shareholder has the meaning given to it in clause 9.1(i) (*Restrictions on transfers of Shares in the Company*);

Transparency Information means the information described in Parts A and B of Schedule 7 (*Transparency Information and Commercially Sensitive Information*) and, for the avoidance of doubt, in no circumstances shall any Transparency Information constitute Commercially Sensitive Information whether or not listed in Part C of Schedule 7 (*Transparency Information and Commercially Sensitive Information*);

WGCo Director means a Director appointed by WGCo or the WGCo Group; and

WGCo Group means:

- (a) any Associate of WGCo;
- (b) the Welsh Ministers or any agency, subsidiary or other body owned or controlled by the Welsh Ministers; and/or
- (c) any public sector body, third sector body or quasi autonomous non-governmental organisation who assumes and/or undertakes (whether as successor or otherwise) some or all of the functions exercised by WGCo or the Welsh Ministers.

1.2 Interpretation

This Agreement shall be interpreted according to the following provisions, unless the context requires a different meaning:

- (a) The headings and marginal notes and references to them in this Agreement shall be deemed not to be part of this Agreement and shall not be taken into consideration in the interpretation of this Agreement.
- (b) Except where the context expressly requires otherwise, references to clauses, sub-clauses, paragraphs, sub-paragraphs, parts and Schedules are references to clauses, sub-clauses, paragraphs, sub-paragraphs and parts of and Schedules to this Agreement and references to Sections, Appendices and Attachments (if any) are references to Sections, Appendices and Attachments to or contained in this Agreement.
- (c) The Schedules to this Agreement (including any Attachments thereto) are an integral part of this Agreement and a reference to this Agreement includes a reference to the Schedules. In the event of any inconsistency between the provisions of the body of this Agreement and the Schedules, the body of this Agreement shall take precedence.
- (d) Words importing persons shall, where the context so requires or admits, include individuals, firms, partnerships, trusts, corporations, governments, governmental

bodies, authorities, agencies, unincorporated bodies of persons or associations and any organisations having legal capacity.

- (e) Where the context so requires words importing the singular only also include the plural and vice versa and words importing the masculine shall be construed as including the feminine or the neuter or vice versa.
- (f) The language of this Agreement is English. All correspondence, notices, and information shall be in English.
- (g) References to any Law are to be construed as references to that Law as from time to time amended or to any Law from time to time replacing, extending, consolidating or amending the same.
- (h) References to a public organisation shall be deemed to include a reference to any successor to such public organisation or any organisation or entity which has taken over either or both the functions and responsibilities of such public organisation.
- (i) The words in this Agreement shall bear their natural meaning. The parties have had the opportunity to take legal advice on this Agreement and no term shall, therefore, be construed contra proferentem.
- (j) Reference to **parties** means the parties to this Agreement and references to a **party** mean one of the parties to this Agreement.
- (k) In construing this Agreement, the rule known as the ejusdem generis rule shall not apply nor shall any similar rule or approach to the construction of this Agreement and accordingly general words introduced or followed by the word other or including or in particular shall not be given a restrictive meaning because they are followed or preceded (as the case may be) by particular examples intended to fall within the meaning of the general words.
- (l) Reference to a document being in **Agreed Form** is a reference to the form of the relevant document agreed between the parties and for the purpose of identification initialled by each of them or on their behalf.
- (m) Where this Agreement states that an obligation shall be performed **no later than** or **within** or **by** a stipulated date or event which is a prescribed number of Business Days after a stipulated date or event, the latest time for performance shall be midnight on the last Business Day for performance of the obligations concerned.
- (n) A reference to a **subsidiary** or **holding company** is to be construed in accordance with section 1159 of the Companies Act 2006.
- (o) If there is a conflict between the terms of this Agreement and the Articles, the terms of this Agreement shall prevail and, if there is such a conflict, the Shareholders shall procure at the request of any of the Shareholders any modification reasonably required to be made to the Articles as shall be necessary to remedy such conflict.
- (p) A person, being a company, shall be **controlled** by another person if that other person owns a majority of the voting equity of that person or controls the majority of the votes at meetings of the board of directors of that person.
- (q) Save where stated to the contrary, references to any agreement or document include (subject to all relevant approvals and any other provisions of this Agreement concerning amendments to agreements or documents) a reference to that agreement or document as amended, supplemented, substituted, novated or assigned.

- (r) A reference in this Agreement to matters being agreed by the Directors shall only include Alternates (acting in that capacity) where he/ she is participating in a decision in place of a Director appointed pursuant to clause 5.1 (b) (*Composition of the Boards and the right to appoint Directors*).

**Schedule 3
Agreed Form Business Plan**

(see clause 8 (*Budgeting, Business Planning and financial matters*))

[*To be inserted*]

**Schedule 4
Deed of Adherence**

THIS DEED OF ADHERENCE is made the day of 201[◆]

BY [◆] of [◆] (**Covenantor**) in favour of the persons whose names are set out in the Schedule to this Deed and is supplemental to the shareholders' agreement dated [◆] 201[◆] made by (1) [PSDP], (2) [WGCo], (3) [Company] and (4) [Project Co] (**Shareholders' Agreement**).

Terms defined in the Shareholders' Agreement shall bear the same meanings herein.

It is agreed

1. In consideration of the Covenantor being accepted as a party for the purposes of the Shareholders' Agreement by the parties thereto, as from [insert date] (**Adherence Date**) the Covenantor hereby confirms that it shall be a party to the Shareholders' Agreement as if they had originally been referred to in the Shareholders' Agreement as [◆] and agrees to be bound by all of the relevant provisions of the Shareholders' Agreement from the Adherence Date.
2. The Covenantor warrants and represents to each of the persons whose names are set out in the Schedule to this Deed, that the Covenantor is a Suitable Third Party.
3. The Covenantor makes all those warranties and representations, which are listed in full at clause 10.2 (*Warranties by the PSDP, the Company and the Project Co*) and clause 10.4 (*Tax compliance*) of the Shareholders' Agreement, to each of the persons whose names are set out in the Schedule to this Deed.
4. This Deed is governed by the law of England and Wales.

In witness whereof this Deed has been executed by the Covenantor and is intended to be and is hereby delivered on the date first above written.

SCHEDULE

[Parties to Shareholders' Agreement including those who have executed earlier deeds of adherence].

**Schedule 5
Sale Agent**

1. In this Schedule 5 (*Sale Agent*)(subject to paragraph 8):

Closing Date has the meaning given to it in paragraph 6;

Purchaser has the meaning given to it in paragraph 6;

Qualifying Bid means a bid for the entire Investment which:

(a) is accompanied by each of the following:

- (i) an acknowledgement addressed to the Shareholders to the effect that the bidder has carried out its own due diligence and in offering to purchase the Investment has not relied on (and an undertaking that it will not rely on) any warranty, statement, undertaking or representation (whether negligent or innocent) made by or on behalf of any Shareholder;
- (ii) a confirmation that if its bid is successful it will enter a Deed of Adherence and pay the Sale Agent's fees;
- (iii) a confirmation of funding for the purchase of the Investment and its ability to complete the payment for and the transfer of the Investment within the time period specified in paragraph 6; and

(b) is from a Suitable Third Party which is not Associated with the Defaulting Shareholder or any shareholder in the Defaulting Shareholder.

Reserve Bid has the meaning given to it in paragraph 8; and

Reserve Tenders has the meaning given to it in paragraph 8.

2. If the parties are unable to agree on the identity of the Sale Agent within twenty (20) Business Days of the issue of the Instruction to Sell Notice (as defined in clause 9.4 (*Appointment of the Sale Agent in certain circumstances*) of this Agreement), the Sale Agent shall thereafter be appointed on the application of any party by the President of the Institute of Chartered Accountants in England and Wales with the party making the application requesting that the appointment be made within twenty (20) Business Days of the date the party makes the application referred to.
3. The Defaulting Shareholder shall provide the Sale Agent with all such information as the Sale Agent may request in relation to the Investment and the Sale Agent shall invite tenders from Suitable Third Parties to purchase the Investment.
4. The Defaulting Shareholder and the Sale Agent shall comply with the Financial Services and Markets Act 2000 and all other legislation which may apply from time to time in relation to the offer for sale of the Investment.
5. The Defaulting Shareholder shall take all necessary action to ensure that the Investment has the widest possible market, and shall not do anything which might limit the number of potential bidders for the Investment and shall ensure that it has provided all necessary information to the Sale Agent to enable the Sale Agent to offer the Investment for sale within fifteen (15) Business Days of the appointment of the Sale Agent.
6. The Defaulting Shareholder shall accept the highest Qualifying Bid which is received by the Sale Agent (with the relevant Suitable Third Party being referred to as the **Purchaser**) by the

end of sixty (60) Business Days from the Instruction to Sell Notice (the **Closing Date**) and shall take all steps necessary to complete the transfer of its Shares and any Defaulting Shareholder Debt to the Purchaser within ten (10) Business Days of the Closing Date.

7. Should the Purchaser fail to complete the transfer of the Shares and any Defaulting Shareholder Debt to the Purchaser within ten (10) Business Days of the Closing Date then the Sale Agent shall remarket the Investment and the procedure referred to in paragraphs 3 to this paragraph 7 shall be followed until either the Investment has been sold to a purchaser or no Qualifying Bid is received by the relevant Closing Date.
8. Notwithstanding the provisions of paragraphs 1 to 7, the Sale Agent shall also invite tenders (**Reserve Tenders**) from Suitable Third Parties for any Defaulting Shareholder Debt only²⁹ and the provisions of paragraphs 1 to 7 shall apply with necessary changes having been made as if references to the "Investment" were in each case solely to the Defaulting Shareholder Debt and subject to the variations in this paragraph 8. If:
 - (a) the aggregate consideration offered pursuant to a Qualifying Bid comprising a Reserve Tender (a **Reserve Bid**) is greater than under the highest Qualifying Bid which is not a Reserve Bid (or no Qualifying Bid is received which is not a Reserve Bid), then the Reserve Bid shall be accepted by the Defaulting Shareholder and the sale and transfer of the Defaulting Shareholder Debt shall be effected in accordance with the provisions of paragraphs 1 to 7.
 - (b) Where a Reserve Bid is accepted pursuant to sub-paragraph (a) in relation to the Defaulting Shareholder Debt then, in relation to the Defaulting Shareholder's Shares, the provisions of clause 9.5 (*Appointment of the Sale Agent in certain circumstances*) shall apply in relation to the Default Shares and the Non- Defaulting Shareholders shall be entitled to give written notice under clause 9.5 (*Appointment of the Sale Agent in certain circumstances*).

²⁹

Schedule 5 – Sale Agent. This mechanism in Schedule 5 (The Sale Agent) allows for offers for the Loan Notes only on the basis that this flexibility may add some liquidity and enhance the value received in a default transfer scenario.

Schedule 6
The Articles of Association of the Company
[To be inserted³⁰]

Schedule 7
Transparency Information³¹ and Commercially Sensitive Information

Part A: Information to be provided by the Company and Project Co

| Ref | Information | Last date for provision of information |
|-----|--|--|
| A1 | The audited accounts of the Company and Project Co for each financial year. | The earlier of: (a) the end of four (4) months after the end of that financial year; and (b) thirty (30) days after its publication. |
| A2 | Quarterly cashflow statements and cashflow forecasts for the Company and Project Co including details of: (1) any payments received or made (a) by way liquidated damages and (b) in respect of change and variations; and (2) payments (excluding any reimbursement of expenses) to Directors. | The end of three (3) weeks after the end of each quarter during the construction period and 1/2 yearly thereafter. |
| A3 | The equity internal rate of return (for both an actual cumulative return to the date of preparation and of the expected forecast return up to the Expiry Date) for each shareholder to be prepared using the Financial Model and calculated on a cash basis to include all distributions and any other payments made to Shareholders in respect of fees. | 31 March and 30 September. |
| A4 | Debt service cover ratio (for the twelve (12) month period to the date of preparation and for the next twelve (12) month period as from the date of preparation) and the loan life cover ratio (for the period as from the date of preparation to the Expiry Date). | 31 March and 30 September. |
| A5 | The occurrence of any Financing Default or Project Default. | Within seven (7) days of becoming aware of that event. |
| A6 | Distributions paid to Shareholders and payments in respect of Shareholder Debt. | Within thirty (30) days of the date those payments are made. |
| A7 | A copy of all information provided to the Authority under clause 24 of the Authority Project Agreement (Lifecycle Replacement). | Within seven (7) days of the date that information is delivered to the Authority. |
| A8 | A copy of all information provided to the Authority under clause 35.2.3 (<i>Invoicing and Payment Arrangement</i>) of the Authority Project Agreement in respect of deductions from the Annual Service Payment and operating costs. | Within seven (7) days of the date that information is delivered to the Authority. |

³¹

Schedule 7 - Transparency Information. This schedule of the standard form is subject to amendment from time to time as other relevant consultation exercises are concluded, policy established and relevant legislation is enacted or amended.

Part B: Information to be provided by the Shareholders

| Ref | Information | Last date for provision of information |
|------------|---|--|
| B1 | In respect of Shares and Shareholder Debt held by it, the identity of each person having a beneficial interest in those investments [insert carve out language for Shareholders that are publicly quoted companies or funds]. For the purposes of this item B1 the term "beneficial owner" shall have the meaning as set out in Regulation 6 of The Money Laundering Regulations 2007 (the 2007 Regulations) and the holder of the Shares and/or Shareholder Debt shall to the extent within its power to do so and to the extent reasonably practicable carry out due diligence measures regarding the beneficial ownership of the Shares and Shareholder Debt as set out in Part 2 of the 2007 Regulations and make available the findings of that due diligence as Transparency Information. | The date of this Agreement and within seven (7) days of any change of beneficial ownership. |
| B2 | In respect of each person named pursuant to B1 above, the jurisdiction of incorporation and tax residence, or in the case of an individual, his/her nationality and tax domicile. | The date of this Agreement and within seven (7) days of any change of beneficial ownership. |
| B3 | The terms on which it has or is to dispose of any Shares or Shareholder Debt or has acquired any Shares or Shareholder Debt (including the identity of the transferee and the price paid or to be paid). | Within two (2) Business Days of the date on which legally binding documentation to dispose of that interest is entered into. |

Part C: Commercially Sensitive Information

| Ref | Information | Applicable Period |
|------------|-------------------------------------|--------------------------|
| | [Note – to be added if/as required] | |

Schedule 8 ³²Reserved Matters

| Reference | Shareholder | Board | Reserved Matter |
|------------------|--------------------|--------------|---|
| A | | | Financial |
| A1 | ✓ | | The approval of any change to the dividend policy set out in clause 7 (<i>Distributions</i>) which would adversely affect any Material Shareholder. |
| A2 | ✓ | | The making of any political donation. |
| A3 | ✓ | | The Company giving any deed of guarantee or indemnity involving a potential liability of £[100,000] (Index Linked) or more which in the reasonable opinion of a Material Shareholder is not required for the proper operation of the Company. |
| B | | | Shares/Shareholder Debt and constitutional |
| B1 | ✓ | | Any amendment to the Memorandum or Articles of the Company, which would adversely affect any Material Shareholder. |
| B2 | ✓ | | A change in the status of the Company from a limited company to a public limited company or from a company limited by shares to any other form of legal entity which would adversely affect any Material Shareholder or the Company. |
| B3 | ✓ | | A listing of the Company's share capital which would adversely affect any Material Shareholder or the Company. |
| C | | | Management, control, Directors and employees |
| C1 | ✓ | | Moving the central management and control of the Company or the Company's tax residence outside the UK. |
| C2 | | ✓ | The approval of (and any change to) Company policies which affect the potential statutory liability of Directors (e.g. anti-bribery and corruption, health and safety, non-discrimination). |
| C3 | | ✓ | Any increase in the payment of fees or remuneration to Directors to the Company save as expressly provided under this Agreement. |
| C4 | | ✓ | Conflict Authorisation to a Conflict Situation pursuant to clause 5.13 |

³²

Schedule 8 - Reserved matters. Three important general points: (1) the items in this table will need to be included in every Shareholders' Agreement for a MIM Project as a bid compliance matter; (2) a bidder/PSDP may suggest additional items for consideration/evaluation during the bid process, including a category of matters that are reserved for approval by a further distinct category of Shareholder (provided these do not cut across the effect of the compliance matters listed above); and provided always (3) no separate Reserved Matter or Reserved Matter type issues Lists are to be included which operate to exclude a particular Shareholder from voting or which remove all Shareholder voting rights on specific matters.

| Reference | Shareholder | Board | Reserved Matter |
|-----------|--|-------|--|
| | | | <i>(Director's power to authorise conflict situations).</i> |
| D | | | Project Co related Reserved Matters |
| D1 | <i>Approval level as per the relevant item</i> | | In relation to Project Co each of the above Reserved Matters in this table shall also be a Reserved Matter in relation to Project Co (as if references to the Company were references to Project Co and to the Hold Co Business were references to the Project Co Business). |

Template Education Design & Build Development Agreement (WEP Strategic Partnering Delivery Model)

ITPDSB Version 1.2

**Template Education D&B Development Agreement, WEP Strategic Partnering Delivery Model
Version**

Important Notice¹

1. This is the template agreement for use on education sector design and build projects (the "**Template Education D&B Agreement**") as referred to in and set out in Section 2 of Schedule 7 (*Design and Build Development Agreement*) of the WEP Strategic Partnering Agreement ("**SPA**"). Under the terms of the SPA, the parties are obliged to use this Template Education D&B Agreement in connection with Approved Projects (as such term is defined in the SPA) which are publicly financed design and build projects in the education sector, subject to the amendments described below.

2. The drafting approach follows that of the template 'Project Agreement for Education Sector MIM Projects' (as referred to and set out in Section 1 of Schedule 7 (*MIM Projects*) of the SPA (the "**Template MIM Education PA**")). Please refer to the explanatory note at the start of the Template MIM Education PA for further background to the origins of that document. However, a number of the provisions present in the Template MIM Education PA have necessarily required to be removed, amended and, in some instances, substituted in the Template Education D&B Agreement to reflect the different approach to the funding of the Works and the absence of long-term maintenance obligations. Of particular note are the following design and build specific provisions:
 - (a) Application for Payment, Project Bank Account and Retention drafting in Clause 29 (*Payment*); and
 - (b) Defects drafting in Clause 19 (*Defects*).

3. This Template Education D&B Agreement assumes that:
 - (a) in respect of further education college projects, the relevant "Further Education Corporation" or "Designated Institution" shall be the "Authority" (and a Participant under the SPA);
 - (b) in respect of schools projects, the relevant local authority shall be the "Authority" (and a Participant under the SPA).

4. The Template Education D&B Agreement has been drafted on the basis of a community school project with some alternative drafting and/or drafting notes provided where it is to be used on a further education college project. Amendments may be required where the Template Education D&B Agreement is to be used for different educational facilities such as a voluntary aided school. The Template Education D&B Agreement has been prepared on the basis of a single facility new build project. It is assumed that the works will be completed in two phases, being the 'Main Works' phase (required for the school or college to become operational) and a second 'Post Completion Works' phase (required in order to complete demolition of existing buildings and/or external works/pitches). It is also assumed that the Authority will engage an ICT contractor to fit out the facility with the relevant ICT Assets in a 4 week pre-completion commissioning phase. On the basis that the draft assumes a

¹ It is anticipated amendments to reflect the UK's withdrawal from the European Union will require to be made to the Template Education D&B Agreement by Welsh Government.

standard schools approach, the "ICT Handover" provisions may not be appropriate for all types of further education college projects and should be specifically considered by further education institutions and their advisers. Where there are no Post Completion Works, more than one Facility and/or a different approach to project phasing, project specific tailoring will be required. There is no standard form of Authority's Construction Requirements but there is an expectation that these will align with the Authority's Construction Requirements in the Template MIM Education PA, where appropriate. Similarly, the contents of other technical schedules such as the Outline Commissioning Programme and Equipment schedule will require to be developed on a project specific basis, aligned to the extent appropriate with the Template MIM Education PA.

5. Whilst drafting and guidance has been included in the footnotes of this Template Education D&B Agreement, Authorities should note:

- (a) Use of the Template Education D&B Agreement is not a substitute for project specific advice and Authorities must take appropriate legal, financial and technical advice when using them. Authorities should also obtain professional insurance advice on all insurance related provisions in the context of the insurance market at that time.
- (b) The footnotes in the Template Education D&B Agreement do not represent an exhaustive list of project specific matters that need to be considered by each Authority and its advisers, who must analyse and review them in detail to ensure that they are tailored to the requirements of the specific project and that their terms (and their impact) are clearly understood by the Authority.
- (c) The Template Education D&B Agreement should be used in conjunction with any further guidance issued/adopted by the Welsh Government from time to time. It should also be read in conjunction with the accompanying SPA.
- (d) All changes to the Template Education D&B Agreement require the prior approval of the Welsh Government, acting through the relevant officials. For the avoidance of doubt, this includes any amendments to "technical" schedules, such as the Authority's Construction Requirements and the Outline Commissioning Programme and relates to the process for the procurement of "WEPCo", as well as the new project approvals process under the SPA.
- (e) It should be noted derogations to the Template Education D&B Agreement are strongly discouraged and it is expected Welsh Government approval will be strictly limited to changes that represent value for money and are required for project specific reasons, or to reflect a change to Welsh Government guidance or demonstrable changing market circumstances.
- (f) Authorities must propose a detailed timetable indicating when requests for derogations to the Template Education D&B Agreement will be presented to the Welsh Government, and such programme shall then be updated in discussion with the Welsh Government, as required. An Authority/the project team must give Welsh Government no less than one (1) month notice of when it intends to submit a request for derogations and the dates should generally tie in with Commercial Approval Point ("**CAP**") dates. The Welsh Government will endeavour to respond to a request for approval to derogations within two (2) weeks of receipt. In requesting derogations the Authority must provide its amended version of the Template Education D&B Agreement (including the Schedules) and provide explanations for the proposed amendments by way of accompanying commentary. Authorities should liaise with Welsh Government regarding the level of detail required. The Welsh Government will do a comparison of the document submitted

against its master version of the Template Education D&B Agreement. It will then decide whether to approve each derogation, or whether to decline to do so, and in each case will inform the Authority and the relevant project team of its decision in writing.

- (g) As noted above, this Template Education D&B Agreement contains optional/required drafting to deal with matters that are specific to the education sector and in some instances specific to schools (only) or colleges (only) and particular circumstances that are commonly encountered. Use of such drafting must nevertheless be reported to the Welsh Government and approval obtained.
- (h) All footnotes (and optional drafting) should be used/implemented/deleted as appropriate before the document is issued by the relevant Authority for a specific project. For ease of future contract management, the Welsh Government does not expect to see the Template Education D&B Agreement amended to any individual law firm's house style. Clause and paragraph numbering should be preserved through the use of lettered additions and "not used" deletions. Automatic numbering and hyperlinked cross references should be maintained.
