

- Task and Finish Group to be set up to look into the feasibility of biomass, wind and solar on council general fund assets and land
The T&F group will include representatives with technical, financial and other appropriate backgrounds and any other relevant stakeholders as required.
- The Energy Strategy Action plan is currently being updated to include realistic timelines, named responsible officers or (external resource if required) to progress the specific objective, along with a progress column so that the action plan can be updated quarterly to reflect progress.
- An Energy Asset working group will be set up with representatives across the authority (Waste, Energy, Transport, Education, Housing) that have relative experience to contribute on providing progress against specific targets in the action plan to allow it to be updated.
- The key objectives that the CAC will consider and assist with have been identified and prioritised by the CAC. As part of this process we will be reviewing resources required to deliver the programme specifically which elements will require bespoke external input i.e. consultancy.
