

Report of the Cabinet Member for Care, Health and Ageing Wellbeing

Adult Services Scrutiny Performance Panel – 29 October 2019

ADULT SERVICES PERFORMANCE FRAMEWORK

Purpose	The purpose of this report is to present the Adult Services Performance Framework.
Content	The Performance Framework is designed to monitor performance across Adult Services.
	Members will note that there are two reports attached. The first is a summary report with headline indicators which demonstrate the general health of the Adult Services overall system. The second is the more detailed report with a summary at the beginning.
	The report demonstrates the areas of business that are performing well and less well, and is designed to be an operational tool to help continually improve service quality and delivery.
	 Similarly to the Performance Framework that Child and Family has developed over the years, it is anticipated that the Framework will be an evolving document.
