SWANSEA BAY City Deal	Strategic Alignment	
Strategy / Policy	Core Principles	How the Project Aligns
UK		
Levelling Up White Paper 2022	The White Paper outlines the UK Government approach to address and narrow economic and social disparities across the UK. covering numerous areas of government structures and public policy. The intention is for a long term programme of change to embed levelling up across all areas of the UK government, local and national, in partnership with the private sector and civil society.  The Government identifies 12 missions under the following 4 headline objectives:  **Dbjective 1: Boost productivity, pay, jobs and living standards by growing the private sector, especially in those places where they are lagging. This objective targets raised living standards, a focus on R&D, improvements to transport infrastructure and digital connectivity  **Dbjective 2: Spread opportunities and improve public services, especially in those places where they are weakest. The objectives targets education, skills, health and wellbeing.  **Dbjective 3: Restore a sense of community, local pride and belonging, especially in those places where they have been lost. The objective targets physical and community regeneration, housing and planning reforms  **Dbjective 4: Empower local leaders and communities, especially in those places lacking local agency. The objective targets the allocation of local growth funds as the Levelling Up Fund and Shared Prosperity Fund to improve local areas.	The programme will also contribute to the levelling up agenda as set out in the Levelling Up White Paper 2022 and to its 12 missions and 4 objectives of the strategy particularly Objective 1 - Boost productivity, pay, jobs and living standards by growing the private sector, especially in those places where they are lagging Objective 3 - Restore a sense of community, local pride and belonging, especially in those places where they have been lost Objective 4 - Empower local leaders and communities, especially in those places lacking local a they
Build Back Better: Our plan for growth 2021	The Government's plan for growth is based around building on 3 core pillars of growth:  1.Infrastructure a.investment in broadband, roads, rail and cities b.invest in local areas through the UK-wide Levelling Up Fund and UK Shared Prosperity Fund, as well as the Towns Fund and High Street Fund c.Help achieve net zero via £12 billion of funding for projects through the Ten Point Plan for a Green Industrial Revolution. d.Support investment through the new UK Infrastructure Bank 2.Skills a.Support productivity growth through high-quality skills and training b.Introduce the Lifetime Skills Guarantee to enable lifelong learning through free fully funded Level 3 courses c.Continue to focus on the quality of apprenticeships 3.Innovation a.Support and incentivise the development of the creative ideas and technologies that will shape the UK's future high-growth, sustainable and secure economy. b.Support access to finance to help unleash innovation c.Develop the regulatory system in a way that supports innovation. d.Attract the brightest and best people, boosting growth and driving the international competitiveness of the UK's high-growth, innovative businesses. e.Support our small and medium-sized enterprises (SMEs) to grow through two new schemes to boost productivity	The programme contributes to Build Back Better: Our plan for growth 2021 and to the 3 pillars of growth of Infrastructure, Skills and Innovation. The programme will provide first class facilities to promote business growth (particularly in the tech sectors) and innovation and will support the development of new skills and opportunities within the region

Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of:  • Rideas: the world's most innovative economy  • Reople: good jobs and greater earning power for all  • Infrastructure: a major upgrade to the UK's infrastructure  • Business Environment: the best place to start and grow a business  • Places: prosperous communities across the UK.  The Strategy also recognises the Grand Challenges of  • Artificial Intelligence and data  • Ageing society  • Clean growth  • Euture of mobility	Ideas – directly addresses the second and third challenges, by creating the supportive environment needed (in Box Village & Innovation Precinct) for graduates to turn idea into successful products and services and creating a local ecosystem that will support innovation and sustained growth in the technology sector.  People – The project is working closely with the City Deal Skills & Talent Initiative and local employability projects to ensure local individuals have the skills needed to tal advantage of the job opportunities that will be created through the project.  Infrastructure – The project will enable the right infrastructure to be put in place in Swansea to support graduate start-ups (through UWTSD's Box Village & Innovation Precinc and the growth of the technology sector.  Business Environment – as outlined in the Strategy, more opportunities to operate in an environment with advice and challenge, especially from other entrepreneurial busine people, can help businesses succeed initially and through their stages of development. The project will provide this environment for start-up and growing businesses in Swansea, combining flexible space, co-located with other similar businesses, with access to extensive support and curation through UWTSD and its wide partner network.  Places –Investment in the project through the Swansea Bay City Deal will strengthen the local economy, and facilitate the growth of highly productive technology base businesses in the region.
UK Digital Strategy 2017	This strategy sets out how the UK will develop a world-leading digital economy that works for everyone. It has seven strands:  •©onnectivity - building world-class digital infrastructure for the UK  •Skills and inclusion - giving everyone access to the digital skills they need  •©the digital sectors - making the UK the best place to start and grow a digital business  •©the wider economy - helping every British business become a digital business  •©tyberspace - making the UK the safest place in the world to live and work online  •Digital government - maintaining the UK government as a world leader in serving its citizens online  •©the data economy - unlocking the power of data in the UK economy and improving public confidence in its use	One of the seven strands within the UK Digital Strategy focuses on "Making the UK the best place to start and grow a digital business". This includes an emphasis on supporting and growing new businesses, and growing digital clusters across the UK. The project directly responds to this, by facilitating the creation and expansion of innovative technology based businesses in Swansea Bay.
Digital Strategy and Leadership DCMS	Developing a local digital infrastructure strategy:  • A senior digital champion to lead the process  • Bringing together local teams involved in deployment of digital infrastructure  • Putting in place the required skills and resources  • Collaborating with network providers	The project directly responds to this, by facilitating the creation and expansion of innovative technology based businesses in Swansea Bay.  Attracting inward investment by working with operators on full fibre planning.  City Centre digital strategy underway linking in with regional City Deal business case strands – initial priority is to ensure robust infrastructure over next few years
Climate Change Act	The Climate Change Act established a target for the UK to reduce its emissions by a minimum of 80% from 1990 levels by 2050 with five-yearly interim targets.  To note, the Welsh Government has set a more ambitious target of reducing emissions in Wales by at least 40% by 2020 from 1990 levels with a target to reduce emissions by 3% per annum, measured against a baseline of average emissions between 2006 and 2010. This includes all 'direct' greenhouse gas emissions in Wales except those from heavy industry and power generation that are covered by the EU Emissions Trading Scheme.	Supporting the growth of low carbon technology based business sectors. Low carbon strategies at heart of the new developments to reduce energy use and promote resource efficiency, with an aspiration for BREEAM Excellent rated buildings.  The projects will be delivered in a globally responsible way through, for example, responsible and (where possible) local sourcing of key materials, and a focus on reduced energy consumption and resource efficiency.
Climate Emergency	Climate emergency declarations have been made internationally. This includes UK and Welsh Governments, and all but one of the regions covered by the Swansea Bay City Deal (Neath Port Talbot has instead announced a Decarbonisation and Renewable Energy Strategy). The focus is to increase ambition to adopt more ambitious targets for reaching net zero emissions.	Supporting the growth of low carbon technology based business sectors. Low carbon strategies at heart of the new developments to reduce energy use and promote resource efficiency, with an aspiration for BREEAM Excellent rated buildings. The projects will be delivered in a globally responsible way through, for example, responsible and (where possible) local sourcing of key materials, and a focus on reduced energy consumption and resource efficiency.

Powering our Net Zero Future (Energy White Paper Dec 2020)	related measures the Plan announced in a long-term strategic vision for the energy system, consistent with net zero emissions by 2050. It establishes the	For Digital Village (71-72 Kingsway), high environmental performance is proposed to be achieved by coupling the use of sustainably sourced (certified) materials (including those with high thermal mass), to exceed current building regulations in terms of energy efficiency, harnessing means of natural heating and cooling, and the appropriate use of proven low-carbon technologies. The building has been designed to achieve a BREEAM Excellent rating, and has already achieved this in its design stage. The building has been designed to be a Carbon Zero building in operation. The building incorporates green/blue infrastructure which is a significant aspect of the scheme.
Wales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change.  There are 7 Wellbeing Goals:  A Prosperous Wales  A Resilient Wales  A More Equal Wales  A Wales of Cohesive Communities  A Wales of Cohesive Communities  A Wales of Vibrant Culture and Thriving Welsh Language  A Globally Responsible Wales  The Act also identifies 5 Ways of Working:  Exong Term  Entegration  Newolvement  Collaboration  Prevention	A Prosperous Wales – supporting innovative, productive and low carbon activities, and generating wealth and employment opportunities for Swansea Bay City Regic
Prosperity for All 2017  Economic Action Plan 2017	Wales Forward Programme for Government:  Prosperous and Secure  Healthy and Active  Ambitious and Learning  Hinted and Connected  And based around the 5 Priority Areas of:  Early Years  Housing  Social Care  Mental Health  Skills and Employability	The project aligns with the Welsh Government's Prosperity for All strategy, and in particular the Prosperous and Secure theme by generating new secure and sustainable employment opportunities and creating the right environment in Swansea for technology based businesses to grow and thrive.  The project supports the aspirations and objectives of the Economic Action Plan, particularly by growing higher added value activities, to drive regional growth and tackle regional inequalities, and by delivering modern and connected infrastructure to allow business to grow.

Commercial Property: Market Analysis and Potential Interventions	To inform the new Property Delivery Plan, the report sets out an analysis of the Welsh commercial property market, including current and likely demand, property market responses and the extent to which there is a gap in supply. It also considers potential priorities for, and approaches to, intervention. In line with the Welsh Government's regional approach to economic development, it outlines the priorities for intervention within South East Wales, South West and Mid Wales and North Wales.  The report contains an analysis of the property market for South West and Mid Wales.	71-72 Kingsway (Digital Viallage) will accommodate Swansea's growing technology businesses and ICT focused businesses expanding from Swansea University and UWTSD incubation facilities.  The Digital Village will act as a catalyst for new private sector led development and refurbishment of further properties on the Kingsway to create a new Central Business District in Swansea City Centre
Equality Act 2010	Due consideration of the nine protected characteristics and promotion of the Welsh language, rooted in business / service planning	Utilising social benefit clauses to create employment and training opportunities for workless individuals.  All signage for new project buildings will be bilingual.
A Living Language 2012-17	Welsh Government's vision is to see a thriving, living Welsh language. The strategy provides the framework to achieve the WG desire to see:	All signage for new project buildings will be bilingual.
Digital First - Welsh Government	Helping the public sector provide excellent online digital services to the people and business of Wales Seek to develop the infrastructure required to support digital service delivery Digital Transformation forms a central part of the Welsh Governments plans to make public services more meaningful to users	Supports the growth of a collaborative and cohesive technology based business community in Swansea, that will provide employment opportunities for local people.  The Digital Arena will provide the digitally enabled conference and events space required by Swansea's tech businesses and Universities
Visit Wales Partnership for Growth	Increasing visitor spend by: • more well-being facilities • more all year round attractions, activities and innovative / distinctive experiences	The new digital arena will offer a broad programme of events that will add to the leisure and cultural offer in the city, and encourage visitors to the Swansea Bay region.  The Digital Arena will provide the digitally enabled conference and events space required by Swansea's tech businesses and Universities
Regional		
Swansea Bay City Region Economic Regeneration Strategy 2013-30	The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy and boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims:  -Business Growth, Retention and Specialisation  -Skilled and Ambition for long term success  -Maximum job creation for all  -Knowledge Economy and Innovation  -Distinctive Places and Competitive Infrastructure.	The Project supports the vision of the Swansea Bay City Region Economic Regeneration Strategy to raise productivity to 90% of the UK average, by facilitating the growth of higher value activities. Under Strategic Aim 4: Knowledge Economy & Innovation, the Economic Regeneration Strategy highlights the need to support growth sectors and provide pro-actively managed grow on space for high growth firms through business incubation and innovation centres. The Digital Village, Box Village & Innovation Precinct directly respond to this need.

Regional Economic Framework	The Regional Economic Framework (REF) for South West Wales sets out the Welsh Government approach to economic development for the region and supports a more regionally-focused model of economic development, in accordance with the Welsh Government's Programme for Government. and a commitment to progress the Economic Resilience and Reconstruction Mission for Wales. The REF reflects the Ambitions and Missions identified in the Economic Delivery Plan. The REF outlines the approach that the Welsh Government will take with the key stakeholders in the region to work collectively to develop and realise the ambitions for economic growth.	The Swansea City and Waterfront Digital District will contribute directly to a strengthening of the city and regional economy building resilience and accelerating recovery.
South West Wales Regional Economic Delivery Plan 2022-2030	The SWW Regional Economic Delivery Plan provides an ambitious route map for the development of the regional economy to 2030. The Plan identifies 3 Ambitions for the economy:  1. Resilient and Sustainable 2. Enterprising and Ambitious 3. Balanced and Inclusive  It also sets out 3 Missions:  1. A UK leader in renewable energy and the net zero economy 2. Building a strong, resilient and embedded business base 3. Growing and sustaining the SW Wales experience offer	The Swansea City and Waterfront Digital District will directly contribute to the Ambitions and Missions set out in the Economic Delivery Plan.

Bargen Ddinesig BAE ABERTAWE	Yr Egin Phase 1Business Case - OBC v11A June 20	
SWANSEA BAY City Deal	Strategic Alignment	
Strategy / Policy	Core Principles	How the Project Aligns
UK		
Create Together, the UK Creative Industries Council 2016	identifies 8 key drivers for growth;	The project contributes directly to these Big Wins through:  1. The City Deal proposals prioritise investment in digital infrastructure.  2. The University's objective to develop a sustainable skills pipeline, working with Carmarthenshire County Council and other providers is the heart of the project.  3. The University's strategy is both to engage in commercial partnerships with Yr Egin occupiers and co-invest with private sector investor in the small and start-up businesses which will develop at the Yr Egin cluster.  The strategy also recognises the creative industries have already proven to be powerful drivers in regenerating individual cities and neighbourhoods, raising their profile, making them more distinctive and more attractive and stimulating places for people to work and li Yr Egin will meet these objectives creating a locally sustainable cluster delivering high value jobs and skills retention but also providing the means by which much greater commercial interaction and growth can take place with other UK creative clusters to the benefit of each.
Wales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change.  There are 7 Wellbeing Goals:  A Prosperous Wales  A Resilient Wales  A More Equal Wales  A Healthier Wales  A Wales of Cohesive Communities  A Wales of Vibrant Culture and Thriving Welsh Language  A Globally Responsible Wales  The Act also identifies 5 Ways of Working:  Exong Term	Yr Egin project will help to deliver on the seven strategic goals of the Wellbeing of Future Generations Act (2015) in part by its inclusion of major public body as the anchor occupier. The University is committed to the goals of the Act, and considers sustainable, strong performance to be one of the critical measures by which the success of the project will be judged. By relocating such a major public body to Carmarthen, the University will be helping to build a stronger, fairer economy for West Wales and will be enabling people from the region to attain better paid, more highly skilled jobs in their local area. Key to this will be the provision of courses structured around the working environment, leading to the upskilling of the local community that results in a better, fairer job market and economy. The Business Case contains a detailed appraisal of the direct contribution of the project to the Wellbeing Goals and Ways of Working.

• Integration
• Involvement
• It collaboration
• It revention

Prosperity for All / Taking Wales Forward 2017	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking Wales Forward Programme for Government:  • Prosperous and Secure • Bealthy and Active • Ambitious and Learning • Binited and Connected And based around the 5 Priority Areas of: • Early Years • Bousing • Social Care • Mental Health • Skills and Employability	Yr Egin proposal is fully aligned to Taking Wales Forward, and will support the overall Welsh Government strategy to provide more and better jobs in the creative industries. Yr Egin will assist in the practical delivery of all four strands of Taking Wales Forwards, and will ensure sustainable growth and development in both the region and Wales as a whole.  Prosperous and Secure - An important aspect of Yr Egin is providing highly skilled, creative jobs for the local population, removing the need for these individuals to relocate out of West Wales. This will also build on the University's strategy of delivering enhanced skills and jobs to the region with the goal of reducing poverty and reducing the current levels of economic deprivation  Plealthy and Active - The opportunities provided by the Yr Egin creative cluster will enrich jobs in the local economy and provide a dynamic environment for talent to flourish. By securing  Pathellectual and creative capital the 'halo' effect of Yr Egin will extend to positive impact on the health and well-being of the local population.  Ambitious and Learning - Yr Egin will support this by bringing together education and industry, enabling innovation and entrepreneurship between the University and both public and private sectors. Yr Egin will also provide the capability to enhance both academic and vocational routes for learners into education, as well as providing the opportunity for significant, industry based upskilling of the local community.  Pinited and Connected - Yr Egin will deliver extensively on the strategic theme of United and Connected and will transform the way that public service delivery is undertaken by becoming wholly digital. It will also actively assist in delivering the target of achieving 95% of citizens having digital skills by 2021. Another key aspect of Yr Egin (assisted by the inclusion of S4C) will be to provide a creative and digital environment where business can be conducted in Welsh.
Tackling Poverty Action Plan	The key objectives of our Tackling Poverty actions are:  • to prevent poverty, especially through investment in giving children the best possible start in life. From conception through to early adulthood, our aim will be to reduce inequality at the earliest possible stage and break the link between socio-economic disadvantage, educational under achievement and the impaired life chances that flow from these;  • recognising that the best route out of poverty is through employment, we will continue to help people to improve their skills and enhance the relevance of their qualifications. We will also remove other barriers to employment – from practical barriers such as the accessibility of transport and buildings to less tangible barriers such as poverty of aspiration - helping people to move on to and up the employment ladder;  • at the same time, we will increase action to mitigate the impact of poverty here and now. We recognise that for more and more people, even being in work will not guarantee that they can escape poverty. We can act to improve the quality of life of these communities, families and individuals.	The University is committed to positively influencing the regions and areas in which it operates through its position as a major institution. Part of this influence is the positive actions and steps that the University can take towards making Wales a fairer society and tackling poverty in areas such as Carmarthen that have historically underperformed economically when compared to the metropolitan areas of Cardiff and Swansea (Source: ONS 2014). The University believes that this influence is best targeted by working to upskill the local population as well as by directly and indirectly providing employment. By situating a large public organisation within Carmarthen which will in turn attract many other businesses and by providing more opportunities for employment and growth, the Yr Egin project will inject a substantial economic stimulus into the Carmarthen area and will help to reduce poverty in the surrounding region.
A Living Language 2012-17	Welsh Government's vision is to see a thriving, living Welsh language. The strategy provides the framework to achieve the WG desire to see: • an increase in the number of people who both speak and use the language • more opportunities to use Welsh • an increase in people's confidence and fluency in the language • an increase in people's awareness of the value of Welsh, both as part of our national heritage and as a useful skill in modern life • the strengthening of the position of the Welsh language in our communities • strong representation of the Welsh language throughout digital media.	Yr Egin will be the catalyst for promoting and strengthening bilingualism throughout the South West Wales region and will address the priorities set out in Welsh Government strategy for the recovery of the national language. Historically it has been recognised that there are not enough opportunities for business to be conducted in Welsh and the development of both Welsh speaking and bilingual workplaces is a central element of the strategy. Yr Egin will address this by providing employment opportunities within the cluster to Welsh speakers and will develop an ethos of bilingual capability, enabling Welsh speakers to conduct business in their native language. This will be coupled with Yr Egin working with its tenants to ensure that a clear commitment to bilingualism is achieved, developing brand new entrepreneurial opportunities that take advantage of both languages. The inclusion of S4C will be critical to Yr Egin achieving this goal. By relocating the Welsh national broadcaster to Carmarthen (an area of Wales with a higher percentage of Welsh speakers), it is the vision of Yr Egin that Welsh will be seen as a comparable language to English within the cluster, driving and developing an increase in Welsh language skills within the business community and the surrounding area.

Wales Infrastructure Investment
Plan

The Wales Infrastructure Investment Plan for Growth and Jobs sets out the Welsh Government's strategic investment priorities, provides a detailed account of sectoral investment plans and sets out the key elements of a new approach to infrastructure investment. The Plan identifies the following investment priorities:

- Improving transport networks, in particular east-west links in North and South Wales.
- Improving telecommunications networks.
- Supporting the development of the energy industry in Wales.
- Investing in housing.
- · Delivering more efficient and economical public services.
- Improving the quality of the educational estate.
- · Developing our Enterprise Zones.

The Yr Egin project aligns with the intentions and aims of the Wales Infrastructure Investment Plan and supports its overall delivery in a variety of ways. The creative industry is highlighted as one of nine major industries, in terms of economic development, focused on through the plan. Key to this is the substantial growth in creative industries in recent years (23% between 2005 and 2009), making it one of the fastest growing industries in the UK. The Plan highlights that the support of the industry is key for improvements to GVA and to growth in Wales as a whole. Yr Egin will create precisely the environment required for the creative and digital industries to flourish. The WIIP also highlights the opportunity that clusters can provide in securing additional economic growth through increases in economic activity.

#### Regional

#### Regeneration Strategy

and boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims:

- •Business Growth, Retention and Specialisation
- •Skilled and Ambition for long term success
- •Maximum job creation for all
- ■Enowledge Economy and Innovation
- •Distinctive Places and Competitive Infrastructure.

Swansea Bay City Region Economic | The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy | The Region suffers from a series of overarching economic issues including low GVA, lack of well-paid job opportunities, skills shortages and outward youth migration. This has been recognised within the South West Wales Economic Regeneration Strategy. Yr Egin will directly assist in resolving these issues by the creation of a creative and digital cluster taking advantage of the new infrastructure proposals of the Internet Coast. The economic stimulus that Yr Egin will deliver through the creation of high value, highly skilled jobs and the regional impact of positioning major tenants the Region will provide the springboard for the regeneration of both the local the wider area. Yr Egin will also deliver on the key objective of the City Region's strategy to substantially increase the capacity and capability of the City Region to create and distribute digital content. The clustering effect of Yr Egin will provide opportunities for local businesses, SMEs and startups to take advantage of their proximity to major broadcasters, creating the perfect environment for creative content, leading to increased and more efficient productivity, an increase in opportunity and a rise in GVA for the area as a whole.

#### Digital Infrastructure Programme Business Case - OBC v3.5 November 20 Strategic Alignment

Strategy / Policy	Core Principles	How the Project Aligns
ик		
Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of:  • Biteas: the world's most innovative economy  • Beople: good jobs and greater earning power for all  • Binfrastructure: a major upgrade to the UK's infrastructure  • Business Environment: the best place to start and grow a business  • Blaces: prosperous communities across the UK.  The Strategy also recognises the Grand Challenges of  • Artificial Intelligence and data  • Ageing society  • Clean growth  • Buture of mobility	Put the UK at the forefront of the AI and data revolution - AI and Data require widespread and high capacity digital connectivity  Harness the power of innovation to help meet the needs of an ageing society - Key enabler is technology that has fixed and mobile  connectivity widely available and high capacity  Maximise the advantages for UK industry from the global shift to clean growth - Reduction in the need to travel and the 'Smart' control of energy systems  We will become a world leader in shaping the future of mobility- Mobility demands high capacity and widespread mobile communications
UK Digital Strategy 2017	This strategy sets out how the UK will develop a world-leading digital economy that works for everyone. It has seven strands:  •©onnectivity - building world-class digital infrastructure for the UK  •Skills and inclusion - giving everyone access to the digital skills they need  •The digital sectors - making the UK the best place to start and grow a digital business  •The wider economy - helping every British business become a digital business  •Typerspace - making the UK the safest place in the world to live and work online  •Digital government - maintaining the UK government as a world leader in serving its citizens online  •The data economy - unlocking the power of data in the UK economy and improving public confidence in its use	Building World Class Digital Infrastructure, including full fibre and 5G - A central part of what Digital Infrastructure project will deliver Give everyone access to the digital skills they need - Widespread deployment and hot-spots of 5G will drive the development of skills Making the UK the best place to start and grow a digital business - Digital Infrastructure is a pre-requisite, alongside the other central SBCD projects in digital media Helping every British business become a digital business - Making high quality digital connectivity widely available is a critical enabler Maintaining the UK government as a world leader in serving its citizens online - Digital transformation requires digital infrastructure to deliver the services Unlocking the power of data in the UK economy - Data analytics is core to new digital services Fixed and mobile networks will be the enabling infrastructure that drives economic growth - The Digital Infrastructure project is based upon this  Nationwide Full Fibre connectivity, there must be a sharp increase in the pace of full fibre roll out - Full Fibre is a one of the key objectives under the connected Cities element of Digital Infrastructure project  Making the cost of deploying fibre networks as low as possible by addressing barriers to deployment - Part of Digital Infrastructure is the deployment of publicly owned infrastructure assets to reduce roll out costs  Supporting market entry and expansion by alternative network operators - Open procurements are planned for all Digital Infrastructure

Future Telecoms Infrastructure DCMS	1. Fixed and mobile networks will be the enabling infrastructure that drives economic growth 2. Nationwide Full Fibre connectivity, there must be a sharp increase in the pace of full fibre roll out 3. Making the cost of deploying fibre networks as low as possible by addressing barriers to deployment 4. Supporting market entry and expansion by alternative network operators 5. An 'outside in' approach to deployment that means gigabit capable connectivity across all areas of the UK is achieved at the same time 6. A switchover process to increase demand for full fibre services 7. We want the UK to have high quality mobile connectivity where people live, work and travel 8. Alongside finishing the roll out of 4G networks to meet existing mobile demand, we want the UK to be a world leader in 5G	1. The Digital Infrastructure project is based upon this 2. Full Fibre is a one of the key objectives under the connected Cities element of Digital Infrastructure project 3. Part of Digital Infrastructure is the deployment of publicly owned infrastructure assets to reduce roll out costs 4. Open procurements are planned for all Digital Infrastructure 5. Rural connectivity is a key objective of Digital Infrastructure project 6. Demand and Supply simulation are both planned within Digital Infrastructure 7. Support for supply side actions and lowering build costs for 4G are included 8. Construction of 5G hot-spots is a key objective
5G Strategy for the UK	Government has a clear ambition for the UK to be a global leader in the next generation of mobile technology – 5G Digital infrastructure is a building block of the Government's modern Industrial Strategy Deliver three main outcomes: • accelerating the deployment of 5G networks • maximising the productivity and efficiency benefits to the UK from 5G • creating new opportunities for UK businesses at home and abroad, and encouraging inward investment	5G in support of specific and key projects is included Several aspects of the SBCD deal and specifically Digital Infrastructure addresses this directly Accelerating deployment through direct intervention and supporting infrastructure roll-out Projects will demonstrate productivity and efficiency gains across several sectors Availability of leading edge connectivity through Digital Infrastructure project will encourage inward investment
Digital Strategy and Leadership DCMS	Developing a local digital infrastructure strategy:  • A senior digital champion to lead the process  • Bringing together local teams involved in deployment of digital infrastructure  • Putting in place the required skills and resources  Collaborating with network providers	A central SBCD team under a single leadership is proposed Coordination of the 4 Local Authorities is proposed Development and recruitment of key skills and resources is proposed Working closely with communications Service Providers is proposed
5G Briefing Paper - UK Parliament	Gives a date of 2027 for most of the UK POPULATION to have 5G coverage Acknowledges the need for wider fibre deployments to support 5G Acknowledges the costs and commercial risks for MNOs to roll out 5G	The papers are more aspirational than concrete requirements on CSPs to roll out 5G. However, the commitments are there and engagement by the SBCD team with the intent and how these evolve into full policy and perhaps intervention funding should be kept under constant review
SRN Ofcom notice of 5G Coverage Compliance	SRN is a joint agreement with MNOs to cover the UK with 4G services, Match funded £1bn 90% of the UK Landmass must be covered 87% of Wales landmass must be covered Baselined in 2020, additional coverage must be in NotSpots	The timescales for SRN are unclear, 14 years is identified as the period this will apply, but no end date is given for the 88% or 90%+ The SBCD team would have the opportunity to examine the proposals of the MNOs for coverage in Q3/4 of 2020 and thereby lobby for changes or to be early in additional deployments
Innovate UK Industrial Challenge Fund	Next Generation services are predicated on leading edge digital infrastructure Transforming construction envisages digital design and IoT Robotics across a wide number of sectors Next Generation services for AI and embeded digital technology Leading edge healthcare, including digital technologies Driverless Cars Creative Industries clusters	Includes digital technologies as a key component which will require leading edge connectivity in fibre and 4G/5G Distributed design and IoT are all included in the project Robotics require leading edge fixed and mobile connectivity Al and analytics require leading edge fixed and mobile connectivity Healthcare requires leading edge fixed and mobile connectivity, particularly the new wave of wearable devices Autonomous vehicles need widespread 5G Creative industries are primarily digitally based and need leading edge fixed and mobile connectivity
Catapults	Various Streams, including: Digital, Energy, Future Cities, High Value Manufacturing, Offshore renewable energy and transport systems	Although these are not government entities, they are closely linked with Innovate UK and act as a delivery partner in many cases. A large number of their interest areas align directly with the Digital Infrastructure project

Vales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change.  There are 7 Wellbeing Goals:  A Prosperous Wales  A Resilient Wales  A More Equal Wales  A Wales of Cohesive Communities  A Wales of Cohesive Communities  A Wales of Vibrant Culture and Thriving Welsh Language  A Globally Responsible Wales  The Act also identifies 5 Ways of Working:  Brong Term  Britegration  Brovlement  Collaboration  Perevention	Prosperous - Directly supports the goal through delivering innovation, low carbon, expands skills and employment to new highvalue roles Resilient - Supports economic change through digital transformation  Healthier - Supports technology's part in delivering health of the nation  More Equal - Supports the removal of the digital divide across all sectors  Cohesive - Supports well connected communities and governments
Digital Strategy For Wales 2021	Identifies priority areas across six missions which, when taken together, aim to accelerate the benefits of digital innovation for people, public services and across our business community.  Mission areas are: -Digital services -Digital inclusion -Digital skills -Digital economy -Digital connectivity -Data and collaboration	The City Deal Digital Infrastructure programme will deploy essential infrastructure to realising the missions outlined in the Digital Strategy for Wales. Through deployment, conceptualisation and commercialisation of both fixed and mobile infrastructure the Digital Infrastructure Programme will enable and facilitate achievement of the ambitions under each mission of the Strategy for South West Wales.
Digital First - Welsh Government	Helping the public sector provide excellent online digital services to the people and business of Wales Seek to develop the infrastructure required to support digital service delivery Digital Transformation forms a central part of the Welsh Governments plans to make public services more meaningful to users	Delivering online services requires digital connectivity to those services, through fixed of mobile networks being supported by the project  A key element of the infrastructure is the digital connectivity with the right coverage and quality, both delivered by the project  Digital Transformation is enabled and driven by the availability of digital infrastructure
Delivering Digital Inclusion - Welsh Government	To ensure that everyone who wants to be online can get online, protect themselves and their friends and families online and do more online to fully benefit from the opportunities the internet and other digital technologies offer	The Digital Infrastructure project is directly focused on this vision and expands upon it to ensure everyone has network access, but also that access meets the demand of the user, including ultrafast and full fibre links and 4G/5G links

Mobile Action Plan - Welsh Government	The planning system has a key part to play in maximising mobile phone coverage across Wales  The public sector in Wales has thousands of assets that could be used to site mobile telecommunications infrastructure on public land, public highway and buildings  The topography and population density in Wales throws up specific challenges for mobile coverage. Extending coverage as far as possible is likely to require innovative solutions particularly in rural areas.  The investment being made by the mobile industry towards regulatory targets will significantly improve mobile connectivity in Wales both in terms of voice and data. However, it is likely that there will still be areas of Wales without a usable and reliable mobile signal  The Digital Infrastructure project is directly focused on this vision and expands upon it to ensure everyone has network access, but also that access meets the demand of the user, including ultrafast and full fibre links and 4G/5G links	Specific proposals are made related to a central SBCD function to support efficient planning processes Specific proposals are made related to a central SBCD function to support efficient asset management processes The use of new ways to achieve rural connectivity is included for both fixed and wireless technologies A central team is proposed for SBCD to act as a voice for the region in both investment and regulatory compliance and to work with the Emergency Service coverage requirements
Digital Wales - Welsh Government	1.Inclusivity: Making sure everyone can enjoy the benefits of technology is a key part 2.Skills: We will use technology to improve teaching methods and learning. Beyond schools, we will ensure that everyone in Wales can acquire the basic skills and confidence to get online and use digital technologies.  3.Economy: We want to drive economic growth. We will support Welsh companies to network with research departments to create and commercialise new digital technologies. We will help more Welsh companies to exploit these developments to innovate, grow and access new markets, especially in our priority sectors 4.Public services: We will make more public and government services digital so they are easier to access 5.Infrastructure: To deliver all the benefits of digital technology, we aim to ensure that all residential premises and businesses in Wales will have access to high speed broadband. We will continue to work to eliminate 'not spots' and to ensure that there is fair and equal access to higher speed broadband and to improve mobile coverage	1. Digital Infrastructure project has a key objective of the widest possible connectivity services 2. Utilising technology for skills and education requires underpinning digital infrastructure of the highest quality as delivery moves into video and augmented reality, both considerations for the project 3. Leading edge digital infrastructure will support inward investment and innovation directly 4. Digital Transformation in services requires access via digital networks 5. A fundamental aspect of the project is to ensure the widest possible coverage of both fixed and mobile communications
Informed Health and Care Wales	This strategy outlines how we will use technology and greater access to information to help improve the health and well-being of the people of Wales. It describes a Wales where citizens have more control of their health and social care, can access their information and interact with services online as easily as they do with other public sectors or other aspects of their lives, promoting equity between those that provide and those that use our services in line with prudent healthcare and sustainable social services.  1.Information for You 2.Supporting Professionals 3. Improvement & Innovation 4.A Planned Future	Digital Infrastructure is a direct enabler of all the strategic objectives within this Digital Health and Social Care Strategy for Wales.  Specifically, some of the proposed projects under the 5G and IoT actions are directly involved with health projects such as the Well Being village. Generally, an supporting the widest deployment of digital infrastructure, many of the strategic aims become easier to deliver and maintain.  1.Wider digital access directly promotes this aim  2.System integration directly is supported  3.Service change and data availability directly supported  4.Digital working directly supported

Transforming Health and Care in Wales	The current situation is of great concern for service users, health and care organisations, health and social care workers, and society more broadly. Health and social care services experience workforce shortages; Wales' outcomes for health and care are not improving as fast as desired; and service delivery is not consistently good. In this final report we recommend to the Welsh Government some key actions that need to be taken to do that, including: clarifying what a set of new models of care might look like; strengthening the power of citizens and users to make change; improving the local leadership and governance needed to implement change; harnessing digital, scientific, technological and infrastructure developments to underpin modernised models of care as well as unlock efficiencies; and at a national level designing the system to expedite and incentivise progress through increased transparency	Recommendations 7 – Harnessing innovation and accelerate technology and infrastructure developments is directly supported. Digital Infrastructure is a critical enabler to achieve this recommendation.  Recommendation 8 - Align system design to achieve results. Transformative change happens at several levels, but digital transformation of services is a key driving force that is supported directly by the actions in this business case.
Regional		
Swansea Bay City Region Economic Regeneration Strategy	By 2030, South West Wales will be a confident, ambitious & connected City Region, recognised internationally for its emerging Knowledge and Innovation economy Strategic Aim 1: Business Growth, Retention & Specialisation Strategic Aim 2: Skilled & Ambitious for long-term success Strategic Aim 3: Maximising job creation for all Strategic Aim 4: Knowledge Economy and Innovation Strategic Aim 5: Distinctive Places and Competitive Infrastructures	Knowledge and innovation are strongly supported by digital infrastructure and digital services. The delivery of both are primary objectives for the Digital Infrastructure project  Aim 1: Inward investment can be made more attractive by the availability of high quality digital infrastructure. Digital sector businesses tend to drive higher value jobs  Aim 2: Digital Transformation affects many sectors and will drive skills and resources to meet the demand. Digital infrastructure is a key enabler for the transformation process  Aim 3: High quality digital infrastructure stimulates innovation and digital/media clusters, creating new opportunities  Aim 4: First class digital infrastructure is a prerequisite for any knowledge and innovation based approach  Aim 5: The project directly supports the widest access to next generation fixed and mobile broadband, including

ndustrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of:  • It is easy the world's most innovative economy • People: good jobs and greater earning power for all • It is frastructure: a major upgrade to the UK's infrastructure • Business Environment: the best place to start and grow a business • Places: prosperous communities across the UK. The Strategy also recognises the Grand Challenges of • Artificial Intelligence and data • Ageing society • Elean growth • Euture of mobility	The Skills and Talent Programme will develop a sustainable pipeline of individuals to support growth of the four themes and support th future competitiveness of the region. It will nurture indigenous talent through initial education and ongoing career development, while also attracting globally-competitive skills to the region through the private sector investment which ensues from the proposal as a collective. The programme will seek to utilise and maximise the potential of city region partner organisations through the existing RLSP structure and will look to develop and support strategic skills interventions around the key themes of ICT infrastructure and digital skills Health, Energy and Smart Manufacturing.	
Vales			
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change.  There are 7 Wellbeing Goals:  - 图 Prosperous Wales - 图 Resilient Wales - 图 More Equal Wales - 图 Healthier Wales - 图 Wales of Cohesive Communities - 图 Wales of Vibrant Culture and Thriving Welsh Language - 图 Globally Responsible Wales The Act also identifies 5 Ways of Working:  - 图 Exong Term - 图 Hetgration - 图 Wolvement - 图 Collaboration	Prosperous - It will directly support an innovative and skilled Wales through developing new skills activity to support the development of the City Deal projects. It will allow for activity to become mainstream enhancing the current skills provision and allowing a greater numl of talented individuals to enter the Welsh digital economy. It will support the development of local supply chains and new and innovative business activity through supporting skills development within the digital economy.  Resilient - The programme will support the economy of the regional and Wales through the global transition that will arise from technological changes such as automation and artificial intelligence by ensuring residents are equipped with the skills required. Healthier - Skills and Talent will support individuals to participate within the digital economy and access sustainable employment which benefits mental and physical well-being. There will be direct support for the life science and well-being theme which includes Pentre Aw the 'Life Science and Well-being Village' as well as the 'Life Science Campuses' projects. Increased connectivity and the skills to utilise digital technologies will help to address issues related to isolation, loneliness and well-being.  Equal - Skills and Talent will support the City Deal in its ambitions to drive through economic transformation within the region and redu the deficit in GVA performance compared to other parts of the UK. The programme will support a reduction in poverty through providin individuals with the opportunity to access well paid sustainable employment locally.  Vibrant Culture - Skills and Talent will support skills activity bilingually where possible and support the progression of bilingual learners into the digital economy.  Globally rRsponsible - The skills developed via the programme will support the development of a low carbon economy within the region and improving sustainability, through supporting projects under the Internet of Energy and Smart Manufacturing.	

be growth opportunities for both local indigenous companies and local supply chains. Improved digital infrastructure and skills to utilise

technologies will improve the resilience and cohesion of communities, particularly within rural areas.

Prosperity for All	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking Wales Forward Programme for Government:  ●Prosperous and Secure  ●Bealthy and Active  ●Ambitious and Learning  ●Dnited and Connected  And based around the 5 Priority Areas of:  ●Barly Years  ●Bousing  ●Social Care  ●Mental Health	The Skills and Talent programme supports the key objectives of the Welsh Government's Prosperity for All strategy specifically the Ambitious and Learning theme by creating opportunities for all to achieve skills at all levels and from all ages enabling individuals to achieve a better chance of getting a rewarding job and the ability for the region to attract inward investment to the area because of a strong skills base.
Economic Action Plan	•Skills and Employability  The purpose of the Economic Action Plan is to support delivery of Prosperity for All — the national strategy for Wales. The Plan sets out a vision for inclusive growth, built on	The Skills and Talent programme supports the key objectives of the Welsh Government's Prosperity for All strategy specifically the Ambitious and Learning theme by creating opportunities for all to achieve skills at all levels and from all ages enabling individuals to achieve a better chance of getting a rewarding job and the ability for the region to attract inward investment to the area because of a strong skills base.
Tackling Poverty Action Plan	The key objectives of our Tackling Poverty actions are:  • to prevent poverty, especially through investment in giving children the best possible start in life. From conception through to early adulthood, our aim will be to reduce inequality at the earliest possible stage and break the link between socio-economic disadvantage, educational under achievement and the impaired life chances that flow from these;	The aim of the Skills and Talent programme is to develop the opportunities for all to achieve higher qualifications and opportunities to work in ground breaking technology through the City Deal projects and other investment opportunities that will be generated in the region. The International opportunities through the Erasmus programme and the development of opportunities for companies and students from overseat to invest, study and work in the region

recognising that the best route out of poverty is through employment, we will
continue to help people to improve their skills and enhance the relevance of their
qualifications. We will also remove other barriers to employment – from practical
barriers such as the accessibility of transport and buildings to less tangible barriers
such as poverty of aspiration - helping people to move on to and up the employment

 at the same time, we will increase action to mitigate the impact of poverty here and now. We recognise that for more and more people, even being in work will not guarantee that they can escape poverty. We can act to improve the quality of life of

ladder;

these communities, families and individuals.

	The skills implementation plan was developed to inform future action in relation to post-19 skills and employment policy. The aim of the plan is to provide details of the actions to be undertaken by the Welsh Government working with employers, individuals, trade unions and delivery partners.  The four key themes of the Policy Statement are:  • Skills for jobs and growth: how Wales can stimulate demand for a more highly-skilled society that can drive forward our economy in pursuit of jobs and growth  • Skills that respond to local needs: a skills system which reflects the needs of local communities, including a streamlined and accessible employment and skills offer  • Skills that employers value: the importance of engaging employers to participate in the skills system and the level of co-investment needed alongside government if Wales is to remain competitive  • Skills for employment: the role of the skills system in providing employment support necessary to assist individuals into employment and to progress in work	The Skills and Talent programme will support the key opbjectives to improve literacy, numeracy and ICT skills of working adults to at least level 2 and higher.
Schools Improvement Plan	The strategy covers post 16 education and skills via further and higher education, adult and community learning and apprenticeship and aims to deliver. The aspiration of the strategy is to have aspirational young people with opportunities across all levels of education achieve the highest levels of qualifications	The Skills and Talent programme aims to increase the number of people in the region attaining a qualification and to generate opportunities for all to attain higher qualifications to meet the needs of the City deal projects.
Youth Engagement and Progression Framework	Youth Engagement Framework The Youth Engagement and Progression Framework (YEPF) sets out a new approach to developing support for young people who are at risk of or who have become NEET. The Framework has 6 key elements: Identifying young people most at risk of disengagement; Better brokerage and co-ordination of support	The Skills and Talent programme will work with all people in society with the aspiration of raising the skills levels for all across the region. There are a high percentage of individuals who fall within the NEET category and the Skills and Talent programme will work with all employability projects, stakeholders and educational establishments to ensure that the opportunities that will be generated through the whole City Deal portfolio.
Regional		
Regeneration Strategy	The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy and boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims:  •Business Growth, Retention and Specialisation  •Skilled and Ambition for long term success  •Maximum job creation for all  •Enowledge Economy and Innovation  •Distinctive Places and Competitive Infrastructure.	The Skills and Talent programme will be instrumental in the success of all 5 key aims of the strategy and will deliver on the key skills requirements to meet the needs of the employers in the region.
Plan	The plan informs and support the Welsh Government's strategic approach to the delivery of employment and skills provision in conjunction with the other two Regional Skills Partnerships in Wales.	The Skills and Talent programme will utilise the work undertaken by the RLSP team includingdata being generated on the impact of Covid 19 pandemic for future skills needs.

## Life Science and Wellbeing Campuses Business Case - Draft OBC Dec 20 Strategic Alignment

Cicy Deal	Strategic Alignment	
Strategy / Policy	Core Principles	How the Project Aligns
ик		
Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of:  • Bleas: the world's most innovative economy  • Beople: good jobs and greater earning power for all  • Bifrastructure: a major upgrade to the UK's infrastructure  • Business Environment: the best place to start and grow a business  • Blaces: prosperous communities across the UK.  The Strategy also recognises the Grand Challenges of  • Artificial Intelligence and data  • Ageing society  • Ellean growth  • Euture of mobility	The ILS Campuses Strategy builds upon excellent industrial, life science and clinical research strengths. The Life Science, Wellbeing & Sport Campuses also underpin wider regional efforts to support regeneration in some of the UK's most deprived areas. The ILS Campuses Strategy builds upon excellent industrial, life science and clinical research strengths. The Life Science, Wellbeing & Sport Campuses also underpin wider regional efforts to support regeneration in some of the UK's most deprived areas.  The project aims to deliver:  Development of 23.23 hectare (57 acre) International Sports village, a 55-acre Innovation park and Access road (Infrastructure) Capital build elements will comply with (Clean growth) minimum requirements. The initiatives will create a cluster of 300+ firms, 100+ Commercial and innovation opportunities within the Health, Life science, well-being, MedTech and Sports Tech sectors (Business environment) (Ideas: World's most innovative economy) (Artificial Intelligence and data)  The initiatives will Create over 1120 new jobs across the construction and operational phases, build skills and training within thriving sector's that generate a wage premium of £6,000 + above the national average wage (People: Good jobs and greater earning power) (Business environment).  Outputs of the project such as the International sports village and facilities to support innovation around Life science, Health and Wellbeing support the targeted output of: One additional year of good health for the region's population (Ageing society)
UK Government Strategy for UK Life Sciences	Building an integrated system of industry, academia and health service. The IL Life Science, Wellbeing & Sport Campuses are underpinned by UK/local sector strengths in industrial capacity and academic research. The alignment with HE/FE and wider skills development and global investors supports delivery of skills and talent.	Embedding innovation activity within an integrated healthcare and life sciences environment will place citizens at the centre of innovation. The focus created by the ILS Campuses will provide sustainable critical mass, and underpin services to support digital inclusion.
The Department for Culture Media and Sport's UK Digital Strategy	This strategy sets out how the UK will develop a world-leading digital economy that works for everyone. It has seven strands:  •©onnectivity - building world-class digital infrastructure for the UK  •Skills and inclusion - giving everyone access to the digital skills they need  •Ehe digital sectors - making the UK the best place to start and grow a digital business  •Ehe wider economy - helping every British business become a digital business  •Eyberspace - making the UK the safest place in the world to live and work online  •Digital government - maintaining the UK government as a world leader in serving its citizens online  •Ehe data economy - unlocking the power of data in the UK economy and improving public confidence in its use	The project will develop large sites at both Singleton and Morriston and shall work with the Digital infrastructure project and key stakeholders to focus on "connectivity" ensuring requirements are achieved.  The project aligns to the strategy / policy in the following ways:  The digital sectors - making the UK the best place to start and grow a digital business, by aiming to grow a cluster of 300+ firms and in excess of 100 commercialisation and innovation opportunities within the MedTech, Sports Tech and Life science sectors.  Connectivity - building world-class digital infrastructure for the UK – working with stakeholders and the portfolio's "Digital infrastructure" project to across the capital elements of the project.  Skills and inclusion - giving everyone access to the digital skills they need – working with the Portfolios Skills and talent programme.
The UK Governments 5G Strategy	Government has a clear ambition for the UK to be a global leader in the next generation of mobile technology – 5G Digital infrastructure is a building block of the Government's modern Industrial Strategy Deliver three main outcomes: • accelerating the deployment of 5G networks • maximising the productivity and efficiency benefits to the UK from 5G • creating new opportunities for UK businesses at home and abroad, and encouraging inward investment	Aligned to the SBCR Digital infrastructure project, the project will harness the emerging digital capabilities inclusive of ultra-fast broadband and 5G mobile connectivity to drive technology development and innovation.

The UK Government Building Digital UK (BDUK)	Building Digital UK (BDUK), part of the Department for Digital, Culture, Media & Sport (DCMS) is delivering broadband networks to the UK. Current activity includes:  • Bivestment to provide superfast broadband coverage to as many premises as possible beyond the 95% level achieved in December 2017  • Biloting a way to provide gigabit-capable broadband to the hard-to-reach places in the UK through its Rural Gigabit Connectivity programme that is currently funded through to March 2021  • Stimulating private investment in gigabit-capable connections through its UK Fibre programme, currently funded through to March 2021	Embedding innovation activity within an integrated healthcare and life sciences environment will place citizens at the centre of innovation. The focus created by the ILS Campuses will provide sustainable critical mass, and underpin services to support digital inclusion.
Wales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change.  There are 7 Wellbeing Goals:  《A Prosperous Wales  《A Resilient Wales  《A More Equal Wales  《A Wales of Cohesive Communities  《A Wales of Cohesive Communities  《A Wales of Vibrant Culture and Thriving Welsh Language  《A Globally Responsible Wales  The Act also identifies 5 Ways of Working:  《Brong Term  《Breyention  《Brevention	The Life Science,Well-being & Sport Campuses project will be inclusive of all, creating diverse opportunities apprenticeships, jobs and continued skills development. Public and private sectors will jointly address the linked determinants of health & well-being between education, health and employment.
Prosperity for All / Taking Wales Forward	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking Wales Forward Programme for Government:  • Prosperous and Secure • Plealthy and Active • Ambitious and Learning • Whited and Connected And based around the 5 Priority Areas of: • Plarly Years • Plousing • Social Care • Mental Health • Skills and Employability	Aiming to build a Wales that is prosperous and secure, healthy and active, ambitious and learning, and united and connected. This will be delivered by securing and creating sustainable employment, shifting the approach from treatment to prevention, inspiring people to be the best they can be and building the vital links that make it easier for people to come together and for the economy to grow.

Economic Action Plan	The purpose of the Economic Action Plan is to support delivery of Prosperity for All — the national strategy for Wales. The Plan sets out a vision for inclusive growth, built on strong foundations, supercharged industries of the future and productive regions. The Plan focusses on boosting productivity and addressing inequality. The Plan presents Calls to Action on a number of areas including:  •Decarbonisation  •Bnovation  •Bigh quality employment and skills development  •Research and development	The plan sets out the principles to support an economy that increases both wealth and well-being through inclusive growth and fair distribution of benefits across Wales, delivering better jobs closer to home. The Life Science,Well-being & Sport Campuses project responds to four of the seven "Calls to Action". The Project will expand the capacity and capability to allow investment into training provision through expansion of apprenticeships, foundation, undergraduate, postgraduate training and continued professional development. The project will also enable the enhancement of vocational and innovative learning programmes and engage with employers from across the public and private sectors to ensure a true and sustainable pipeline of talent is commanded. Digital capacity and capabilities will be incorporated into all aspects of the project inclusive of skills development activities.
Parliamentary Review of Health and Social Care in Wales	Harness innovation, and accelerate technology and infrastructure developments     A Health & Care System that's always learning     Bold new models of seamless care	This initiative will support the delivery of the quadruple aim advocated within the report. In particular, whilst supporting the delivery of all 10 of the recommendations this project will significantly contribute to harnessing innovation and accelerating technology and infrastructure developments outlined in recommendation seven.  The review concludes that while Wales is in prime position to further develop technology and innovation as a key strength in pursuit of the quadruple aim current capacity and capability hinder the ability to deliver at pace. This project will provide both the capacity and capability for technology development and innovation within the region.
A Healthier Wales - Our Plan for Health and Social Care in Wales	Information to be provided	The project harnesses and builds on the current life science eco system with a focus on Med tech, Sports Tech, Health, well being and preventative therapies. As such a targetted outcome of the project is One additional "QALY" - Quality of Life year per citizen or additional year of improved health.
Regional		
Swansea Bay City Region Economic Regeneration Strategy	The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy and boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims:  •Business Growth, Retention and Specialisation  •Skilled and Ambition for long term success  •Maximum job creation for all  •Enowledge Economy and Innovation  •Distinctive Places and Competitive Infrastructure.	The Institute of Life Science, Wellbeing & Sport is an expansion for growth in GVA and employment and will main ILS-supported levels of growth throughout the SBCR programme period, delivering 1,120 jobs (directly and indirectly) based upon Life Sciences & Well-being innovation across the regional cluster by 2031 (across both R&D and wider industry).  The region will engage with Welsh Government and wider stakeholders to create the SBCR living lab/testbed environment. This will be achieved through ILS and Joint Clinical Research Facility (J-CRF) engagement and activity across SBCR. During the period, the region will utilise its RD&I assets to attract 4 significant inward investments to support balanced cluster growth and opportunity for wider UK sector. This would also involve realising a network of 300 cluster firms within the project period. Expanding technology and knowledge transfer activities between industry, academia and health service. This will involve development in excess of 100 new commercialisation opportunities during the project period, with £48m co-investment and numerous enterprise partnerships.  In response to the Case for Change and broader Strategic Case, the Campuses Project has been developed appraising options against the following Critical Success Factors in pursuit of achieving the Spending Objectives;  *To support the growth of high value employment in the sector  *To expand the pipeline of new enterprises in the sector  *To enhance the effectiveness of regional RD&I assets for local and UK-wider innovation  *To enhance the region and UK sector profile by capturing major international opportunities  *To expand the pipeline of innovation opportunities engaged and realised with SBCR RD&I assets

Regional Employment and Skills Plan	Information to be provided	SBCD Campuses project will provide a pipeline of healthcare innovations benefitting communities during the development phase (locally) and from commercialisation (UK and further afield). This will provide both local economic uplift through improved health and wellbeing and subsequent productivity along with wider societal benefit and skills uplift improving education and skills is both important to our efforts to reduce poverty and to improve the city and economy, which means transforming our education system to ensure children and young people have the necessary skills for the new economy.  The SBCD Campuses project will work alongside RLSP to identify skills solutions, including bespoke training where required. An agreement will be developed with the Training Solutions group, resulting in:  • a better understanding of the needs of the sector within the region;  • engagement with Schools to influence curriculum development and promotion of key skills required in the future by the life science sector and projects;  • the creation of a skills system that will support the competitiveness of current and future life science companies;  • an increase in the number of higher skilled individuals able to take up opportunities in the life science sectors, including those choosing to locate or expand within the region because of the City Deal;  • an increased number and quality of apprenticeships will be supported and new opportunities developed through the projects, thereby creating a more skilled workforce in the region; and  • encouraging people to learn and go on to work in life science industries in the region.  Expanding ILS capacity and capability will allow investment to equip existing and prospective workforces across the Region with the relevant skills for future employment, addressing skill gaps. The project will also enable the enhancement of vocational and innovative learning programmes, engaging with employers from across public and private sectors, remain sustainable and boosting a rapidly changing economy
A Regional Collaboration for Health (ARCH)	Information to be provided	The SBCD Campuses project will support the health and wellbeing challenges within the region through collaborative approaches.  Specifically around Skills & Workforce, Research, Enterprise & Innovation, Service Transformation and Wellbeing.

Bargen Ddinesig	Homes as Power Stations - OBC v2 Nov 19	
City Deal	Strategic Alignment	
Strategy / Policy	Core Principles	How the Project Aligns
JK		
ndustrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of:  • Bleas: the world's most innovative economy  • Beople: good jobs and greater earning power for all  • Infrastructure: a major upgrade to the UK's infrastructure  • Business Environment: the best place to start and grow a business  • Blaces: prosperous communities across the UK.  The Strategy also recognises the Grand Challenges of  • Artificial Intelligence and data  • Ageing society  • Clean growth  • Euture of mobility	The HAPS project aligns well with each of these foundations, particularly 'ideas' – where the goal is to create 'the world's most innovative economy'.  The HAPS project has greatest strategic fit with the 'clean growth' grand challenge, where the strategy states:  • 'The move to cleaner economic growth – through low carbon technologies and the efficient use of resources – is one of the greatest industrial opportunities of our time.'  • 'We will transform construction techniques to dramatically improve efficiency'  • 'For the majority of [the UK's] energy to be clean and affordable, we need much more intelligent systems. Smart systems can link energy supply, storage and use, and join up power, heating and transport to increase efficiency dramatically. By developing these world-leading systems in the UK, we can cut bills while creating high-value jobs for the future.'
Climate Change Act	The Climate Change Act established a target for the UK to reduce its emissions by a minimum of 80% from 1990 levels by 2050 with five-yearly interim targets.  To note, the Welsh Government has set a more ambitious target of reducing emissions in Wales by at least 40% by 2020 from 1990 levels with a target to reduce emissions by 3% per annum, measured against a baseline of average emissions between 2006 and 2010. This includes all 'direct' greenhouse gas emissions in Wales except those from heavy industry and power generation that are covered by the EU Emissions Trading Scheme.	The HAPS project aims to reduce emissions through decreasing energy demand and increasing the use of renewable technologies in housing – this decarbonisation of homes will align to this policy and support delivery of emission reduction targets
Construction Sector Deal	The Construction Sector Deal sets out an ambitious partnership between the industry and the government that aims to transform the sector's productivity through innovative technologies and a more highly skilled workforce. One of the benefits outlined in the Construction Sector Deal states 'better homes that are cheaper to run'	Direct alignment with HAPS

increase the effectiveness of investment in infrastructure – both economic infrastructure

such as transport and energy networks, by improving productivity in the way we design,

build and operate assets.

Transforming Infrastructure Performance (TIP) plan, which is the UK Government's plan to The HAPS project is a demonstration project and aligns with the Transforming Infrastructure Performance (TIP) plan, which is the UK

Government's plan to increase the effectiveness of investment in infrastructure – both economic infrastructure such as transport and

energy networks, by improving productivity in the way we design, build and operate assets.

Transforming Infrastructure

Performance Plan

Consultation - Future Homes Standard	This consultation sets out government plans for the Future Homes Standard, including proposed options to increase the energy efficiency requirements for new homes in 2020. The Future Homes Standard will require new build homes to be future-proofed with low carbon heating and world-leading levels of energy efficiency; it will be introduced by 2025. This document is the first stage of a two-part consultation about proposed changes to the Building Regulations. It also covers the wider impacts of Part L for new homes, including changes to Part F (ventilation), its associated Approved Document guidance, airtightness and improving as-built performance of the constructed home.	The HAPS project is aligned to these proposed energy efficiency requirements.
Clean Growth Strategy	The strategy sets out proposals for decarbonising all sectors of the UK economy through the 2020s. It explains how the whole country can benefit from low carbon opportunities, while meeting national and international commitments to tackle climate change.  The strategy sets out a comprehensive set of policies and proposals that aim to accelerate the pace of 'clean growth', i.e. deliver increased economic growth and decreased emissions.  **Accelerating clean growth  **Pmproving business and industry efficiency  **Pmproving the energy efficiency of our homes  **Bolling out low carbon heating  **Accelerating the shift to low carbon transport  **Delivering Clean, Smart, Flexible Power  **Enhancing the benefits and value of our natural resources  The Strategy recognises that it is only through innovation that new technologies will be developed and the cost of clean technologies come down.	Information to be provided
Ten Point Plan for a Green Industrial Revolution	The Government's Ten Point Plan lays the foundations for a Green Industrial Revolution. The Plan supports the creation of jobs and economic growth around the green economy through the following sectors and activities:  •Advancing Offshore Wind  •Driving the Growth of Low Carbon Hydrogen  •Delivering New and Advanced Nuclear Power  •Accelerating the Shift to Zero Emission Vehicles  •Green Public Transport, Cycling and Walking  •Et Zero and Green Ships  •Greener Buildings  •Breener Buildings  •Breeting Our Natural Environment  •Green Finance and Innovation	Point 7: Greener Buildings The HAPS project aligns with and delivers the action detailed in point 7 to improve energy efficiency of homes and replace fossil fuel heating with lower carbon, more efficient alternatives.
Powering our Net Zero Future (Energy White Paper Dec 2020)	This white paper builds on the Government's Ten Point Plan to set the energy-related measures the Plan announced in a long-term strategic vision for the energy system, consistent with net zero emissions by 2050. It establishes the goal of a shift from fossil fuels to clean energy, in power, buildings and industry, while creating jobs and growing the economy and keeping energy bills affordable. It addresses how and why our energy system needs to evolve to deliver this goal. And it provides a foundation for the detailed actions the Government will take to realise the vision.	HAPS aligns to this energy white paper as the paper presents a vision to make the transition to energy efficient homes and shifting away from gas to electricity to heat our homes.

	•Bollaboration	
	•Brevention	
Taking Wales Forward / Prosperity	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking	HAPS will contribute to the following priority areas of this strategy:
for All	Wales Forward Programme for Government:	Housing – the HAPS project will contribute to meeting new-build targets in Wales. There is a current shortage of energy efficient new
TOT All	• Prosperous and Secure	housing in the region. HAPS will facilitate the adoption of a programme of new-build energy efficient housing, with integrated renewable
	· ·	energy, combined with an energy efficiency retrofit of existing stock to improve their energy efficiency will support meeting this target.
	Bealthy and Active	energy, combined with an energy efficiency retroit of existing stock to improve their energy efficiency will support meeting this target.
	•Ambitious and Learning	
	• Dnited and Connected	Skills and employability – through links with the Skills and Talent project, the HAPS project will ensure that people have appropriate skills
	And based around the 5 Priority Areas of:	to take advantage of available employment opportunities linked to renewable technologies in housing. The HAPS project will work with
	Early Years	employment initiatives to ensure unemployed (long and short-term) and economically inactive individuals can access appropriate skills
	• <b>B</b> ousing	training to increase their employment chances.
	•Social Care	This Plan sets the foundations for Wales to transition to a low carbon nation. Cutting emissions and the moving towards a low carbon
	•Mental Health	economy bring opportunities around clean growth for business, as well as wider benefits for people and our environment. The HAPS
	•Skills and Employability	project links directly into the following policy areas of the plan:
		Policy 32 – Developing Routes to Market for Renewable Technologies - The UK also needs newer and emerging technologies to continue
		to be developed, to provide a diverse mix of generation, which can also provide economic opportunities in exporting technology and
		expertise.
		Policy 33 – Increasing local ownership of energy generation. In 2018 Welsh Government held a call for evidence on the benefits of, and
		challenges in, increasing locally-owned generation 48. This demonstrated that increasing ownership of energy generation within Wales is
		likely to increase prosperity and we are now taking forward the actions indicated by the evidence. This includes developing a policy
		position on ownership of energy generation.
		Policy 36 - Market Regulation and Investment. In 2017 UK Government published the 'Upgrading our Energy System: Smart Systems and
		Flexibility' plan. This set out actions government, Ofgem and industry will take to:
		☐remove barriers to smart technologies (such as storage and demand-side response);
		Benable smart homes and businesses; and improve access to energy markets for new technologies and business models.

Innovation Strategy for Wales	This Strategy seeks to promote, encourage and enable innovation across the whole	HAPS will deliver against the 5 themes of the Innovation Strategy.
	economy, with clear priorities identified and built on the acknowledged strengths of Wales.	
	The Strategy is based around action across 5 main themes:	
	• improving collaboration	
	promoting a culture of innovation	
	providing flexible support and finance for innovation (in partnership with Welsh	
	Government)	
	innovation in Government	
	prioritising and creating critical mass	

The Environment (Wales) Act	The Environment (Wales) Act puts in place legislation needed to plan and manage Wales' natural resources in a more proactive, sustainable and joined-up way. It seeks to position	The HAPS project will deliver against the targets of this act and will encourage smart, energy efficient homes to become standard, which in turn deliver reduction in emissions target and decrease energy demand.
	Wales as a low carbon, green economy, ready to adapt to the impact of climate change.  Relevant sections of the Act are:	in turn denver reduction in emissions target and decrease energy demand.
	Part 1: Sustainable management of natural resources in a more proactive, sustainable and	
	joined-up way  BPart 2: Climate change – provides Welsh Ministers with powers to put in place statutory	
	emission reduction targets, including at least an 80% reduction in emissions by 2050 and	
	carbon budgeting to support their delivery. This is vital within the context of existing UK and EU obligations, sets a clear pathway for decarbonisation and provides certainty and	
	clarity for business and investment	
Energy Wales: A Low Carbon	The Welsh Government set out its proposals for transitioning to a sustainable, low carbon	The HAPS project delivers the targets of 'A Low Carbon Transition' by providing the evidence base for smart, energy efficient homes. It
Transition	economy in Energy Wales: A Low Carbon Transition, in 2012. This aims to maximise the long-term economic benefits of the transition, ensuring communities benefit from energy	will also embed the industry in the region maximising jobs and long term economic development.
	infrastructure developments and careful planning and management of the relationship	
	between energy development and the natural environment.	
	The Welsh Government committed to prioritise efforts on:	
	<ul> <li>Eeadership providing a clear, consistent framework for investors, regulators and decision- makers and infrastructure, coordination and stability to make Wales a great place to do</li> </ul>	
	business	
	■Maximising jobs and wider economic benefits ensuring communities derive long-term  Output  Description:	
	benefits	
	•Acting now for Wales' long-term energy future supporting innovation, research,	
	development and commercialisation in the areas that offer the greatest potential for long- term benefit	
	Delivery proposals include: priorities for action, high level milestones and a summary of	
	deliverables for low carbon energy, energy efficiency, energy intensive industries, marine	
	energy, regulatory regimes, infrastructure and other areas. As of April 2017, public services	
	in Wales should use 100% renewable electricity, 50% of which will be generated in Wales.	
	The Programme for Government, Taking Wales Forward 2016-2021, reconfirms the	
	commitment to emissions reductions and support for renewable energy.  In a statement in December 2016, the Cabinet Secretary for Climate Change, Environment	
	and Rural Affairs, Lesley Griffiths, outlined energy priorities for the Fifth Assembly,	
	including:	
	•Reducing energy consumption	
	Reduced reliance on energy generated from fossil fuels	
	•An actively managed transition to a low-carbon economy	
Green Growth Wales: Local Energy		The HAPS project will identify those developments which can be powered by local energy systems. The aim of HAPS is to demonstrate the
	system is in a period of transition – an opportunity for Wales to take control of its own energy needs. The vision is for communities and businesses to use locally generated	reduction in energy demand through fabric first approach and energy efficient technologies.
	electricity and heat, from a range of renewable installations, to supply local demand and	
	minimise dependence on central generation:	
	☑Creating local energy systems	
	Tackling poverty for the long term	
	Positioning Wales at the forefront of carbon reduction	
	Positioning Wales at the forefront of carbon reduction	

	I	[
Smart Living Wales	A range of emerging drivers in Wales and the UK have increased interest in how to intelligently balance, interconnect and integrate smarter solutions to assist the balancing of the energy trilemma - security, affordability and low carbon developments. The vision adopted in the Smart Living Demonstrator Framework is:  "Wales has the opportunity to influence how we live with energy and resources in the future through demonstrators that will innovatively transform homes, businesses and communities providing multiple benefits for all."  'Smart Living' is a concept covering a range of policy and practical interventions that drive low carbon solutions that can deliver a range of societal benefits.	It is within this context that the HAPS project will be developed and delivered
Independent Review of Affordable Housing	Housing and Regeneration, and includes the following recommendations:  1.Introduction of a requirement for all new affordable homes to be near zero carbon / EPC  'A' using a fabric first approach from 2021, supplemented by technology (renewables) if required  2.Continue to support the trialling of Modern Methods of Construction (MMC) to help establish which methods can contribute to the objective of increasing the scale and pace of affordable housing provision with the existing resources available.  Develop a strategy to map out how Wales could further use off-site manufacturing (OSM) and MMC to deliver near zero carbon homes along with an appropriate timetable for achieving this.	Information to be provided
Smarter Energy Future for Wales	The National Assembly for Wales Environment and Sustainability Committee recommends moving to 'near-zero' carbon emissions as the new Welsh Housing Quality standard. It also strongly advocates for local energy systems, with grid level local prioritisation for Welsh customers, based on net positive buildings and homes.  The report emphasises the importance of local, sustainable, supply chains for technology development, supply and fitting, increasing Welsh resilience and delivering carbon cuts through the framework laid out in the Wellbeing of Future Generations Act. Finally, the report recommends setting up a not-for-profit, publicly owned energy company, a suggestion that has been endorsed by Ofgem.	HAPS aims to develop a regional skilled and sustainable supply chain which is aligned to the aim of this report.
Prosperity for All - A Low Carbon Wales	Key areas of environmental improvement including industry, transport and waste     Driving sustainable growth and modern infrastructure	Information to be provided
National Development Framework	The National Development Framework for Wales addresses national priorities through the planning system, including:  •Bustaining and developing a vibrant economy,  •Becarbonisation,  •Beveloping resilient ecosystems,  •Bmproving the health and well-being of our communities.	The local authority partners will identify development areas across all sectors where the HAPS approach can be adopted.

Tackling Fuel Poverty 2021-2035	Welsh Government has set 3 main targets to determine how successful the Welsh Government has been at achieving the statutory objective in tackling fuel proverty, these are; 1) ensure no households are estimated to be living in severe or persistent fuel poverty as far as reasonable practicable, 2) Not more than 5% of households are estimated to be living in fuel poverty at any one time as far as reasonably practicable 3) the number of all households "at risk" of falling into fuel poverty will be more than halved based on the 2018 estimate.	The HAPS project has clear alignment to these targets and will support in the co-ordination of this work across south west Wales.  Ensuring supporting data is gathered and shared will help inform a wider audience and build on best practice to inform a faster roll out of the HAPS concepts within the private sector.
Regional		
Swansea Bay City Region Economic Regeneration Strategy	boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims:  •Business Growth, Retention and Specialisation  •Skilled and Ambition for long term success  •Maximum job creation for all  •Enowledge Economy and Innovation  •Distinctive Places and Competitive Infrastructure.	HAPS is one of nine projects and programmes prioritised to deliver the Swansea Bay City Deal 'Internet Coast' strategy, based on the Swansea Bay City Region Economic Regeneration Strategy 2013 – 2030.  The Swansea Bay City Deal is supported by the evidence-based Swansea Bay City Region Economic Regeneration Strategy 2013 – 2030.  This strategy comprises five strategic aims to deliver the ambitious vision: 'By 2030, South West Wales will be a confident, ambitious and connected City Region, recognised internationally for its emerging knowledge and innovation economy'.  HAPS is aligned to each of the five strategic aims of this strategy:  Business growth, retention and specialisation – supporting the creation of new industry in the region, supporting locally-based business growth and creating a sustainable supply chain  Skilled and ambitious for long-term success – working closely with the Skills and Talent City Deal project to ensure the region's workforce has the appropriate skills to maximise the opportunity of HAPS  Maximising job creation for all – supporting diversification of the economy, through the creation of employment opportunities linked to the green growth economy and a sustainable indigenous supply chain  Knowledge economy and innovation – establishing the Swansea Bay City Region as a test bed for smart, low carbon, energy efficient homes and associated product development and commercialisation of innovation  Distinctive places and competitive infrastructure – providing an attractive infrastructure asset for the region

Strategy / Policy	Core Principles	How the Project Aligns
UK		
UK Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of:  #Bleas: the world's most invovalities economy.  #Booje: good jobs and greater earning power for all  #Infrastructure: amajor upgrade to the UK's infrastructure  #Business Environment: the best place to start and grow a business  #Blaces: prosperous communities across the UK.  The Strategy also recognises the Grand Challenges of  #Antificial Intelligence and data  #Beging society  #Blean growth  #Buture of mobility	1. Build no our strengths and extend excellence into the future, Pembroke Dock Marine builds upon existing infrastructure and skills base. Not only will this revitable and increase realisines to the existing supply chain, but it will mean that decades of marine engineering experience will survive and discerning into the nascent marine energy increase. The productive companies industries in the wider marine encogny control. In April 2019, the total interestment in marine energy process of all miles stands as 1862 of miles. Marine energy acceptance in the productive companies, industries, pages and people and the rest; Pembrobe Dock Marine REC. Strategic Case 2. Close the gap between the UK Rs and time of the productive productive companies, industries, pages and people and the rest; Pembrobe Dock Marine in Excellence, all in Pembrobe Dock will deliver cost effective technology development and enhance productivity. PDM skip includes a Rochdale emelop consent process common problems in a geographic location where they can prosper, thus enabling technology developers to an observable productive pro
Climate Change Act	The UK's emissions targets were revised in 2019 to be net zero greenhouse gases by 2050. The Committee on Climate Change's 2018 progress report to Parliament, Reducing UK Emissions, outlined four messages to Government to get emissions reductions on track. It identified the need to 'Act now to keep long-term actions open' and specifically referenced floating wind a type of emerging technology that could offer cost reduced low carbon energ generation. This will be a critical step in ensuring the need is met for a diverse portfolio of low carbon technology that will meet the increasing electricity demands towards 2050 as stated in the report.	The three Challenges that the Industrial Strategy identifies are to be supported by Ten Pillars, and PDM will directly support eight of these as detailed in the Project Busines Case (refer to the FBC for a comprehensive breakdown of these):  1. Investing in cincine, research and innovation  Floating wind energy is one of the decarbonised energy technologies that will be supported by Pembroke Dock Marine, the public funding will help ensure the technology reaches full maturity well in advance of the 2050 targets. The UK's emissions targets were revised in 2019 to be net zero greenhouse gases by 2050. The Committee on Climate Changes' 2018 progress report to Parliament, Reducing UK Emissions, outlined four messages to Government to get emissions reductions not rack. It identified the need to x for two to keep long-term actions open and specifically referenced floating wind a type of emerging technology that could off cost reduced low carbon energy generation. This will be a critical step in ensuring the need is met for a diverse portfolio of low carbon technology that will meet the increasing electricity demands towards 2050 as stated in the report. Floating wind energy is one of the decarbonised energy technologies that will be supported by Pembroke Dock Marline, the public funding will help ensure the technology reaches full maturity well in advance of the 2050 targets.
Climate Emergency	Climate emergency declarations have been made internationally. This includes UK and Welsh Governments, and all but one of the regions covered by the Swansea Bay (Tip Deal (Neath Port 1 abob has instead announced a Decarbonisation and Renewable Energy Strategy). The locus is to increase ambition to adopt more ambitious targets for reaching ne zero emissions.	Pembroke Dock Marine project provides the support structure for the growth of an industry that targets the generation of decarbonised energy and therefore aligns with climate emergency goals. Since the early drafts of the FBC, climate emergency declarations have been made internationally. This includes UK and Welsh Governments, and all but one of the regions covered by the Swansea Bay City Deal (Neath Port Talbot has insteed announced a Decarbonisation and Renewable Energy Strategy). The focus is to increase ambition to adopt more ambitious targets for reaching net zero emissions. Pembroke Dock Marine provide the support structure for the growth of an industry that targets the generation of decarbonised energy and therefore aligns with climate emergency goals.
UK Government Marine Policy Statement	Marine renewable energy can provide employment thus creating wide and long-term benefits for both national and local economies. (2.5.3) A secure, sustainable and affordable supply of energy is of central importance to the economic and social welbeing of the UK: (3.3.1) Marine renewable energy, particularly wave and tidal stream technologies have significant potential in the medium to long-term, (3.3.3) up to 20% of the UK's current energy demand (3.3.21) "It is important for marine planning to take account of appropriate locations for such developments".	The potential impact of inward investment in offshore wind, wave, tidal stream and tidal range energy related manufacturing and deployment activity is significant; as well as the impact of associated employment opportunities on the regeneration of local and national economies.
Marine Strategy Framework Directive	The aim of the European Union's Marine Strategy Framework Directive (MSFD) is to protect the marine environment across Europe, where fundamental to the MSFD is the aim to achieve Good forwinnessend Status (GSF) of the EU? water by 2020. Of relevance to the marine energy industry, the MSFD seeks to address the impact of impulse underwater (anthropogenic) noise into the marine environment, which can provide adverse environmental affects to marine unifolding and abhatise. Due to the high level of uncertainty about the effects of noise, the UK consultation on the MSFD has highlighted that it has not been possible to recommend a specific target for impulse noise which is believed to be equivalent to GES.	PDM will allow industry/catapult/academic led research to overcome some of these challenges by providing a test area for R&D.
Catapults	Various Streams, Including: Digital, Energy, Future Cities, High Value Manufacturing, Offshore renewable energy and transport systems	The Offshore Renewable Energy Catapult is one of the four partners in PDM. It will establish a Catapult within the region providing a strong link into the UK's industrial Strategy, particularly the Strength in Place theme, and would aim to be a key Pembrokeshire asset, attracting further funding into the county, ensuring MEECE's sustainability.

ean Air Strategy	The Clean Air Strategy details the Government's approach to tackle all sources of air	PDM will make a significant contribution to the UK Government's Clean Air Strategy. The proposed development specifically seeks to encourage renewable energy industries across a range of low carbon technologies, in order to reduce greenhouse gas emissions. Furthermore, it is recognised that marine energy
		e technologies have the potential to displace coal and natural gas generation on the grid and to reduce CO2 emissions permanently
	Strategy is to deliver it's objectives through the following priority actions:	
	•Securing clean growth and innovation	
	•Action to reduce emissions from transport	
	•Action to reduce emissions at home	
	•Action to reduce emissions from farming	
	•Action to reduce emissions from industry	
	Beadership at all levels	
	***************************************	
Clean Growth Strategy	2020s. It explains how the whole country can benefit from low carbon opportunities, while	PDM will make a substantial contribution to achieving (lean Growth Strategy objective), particularly in relation to wave and tidal stream, where the strategy recognises that "More nascent technologies such as wave, tidal stream and tidal range, could also have a role in the long-term decarbonisation of the UK, but they will need to demonstrate how they can complete with other froms of eneration."
		need to demonstrate now they can compete with other forms or generation.
	meeting national and international commitments to tackle climate change.	
	The strategy sets out a comprehensive set of policies and proposals that aim to accelerate	
	the pace of 'clean growth', i.e. deliver increased economic growth and decreased emissions	
	•Accelerating clean growth	
	•Improving business and industry efficiency	
	•Improving the energy efficiency of our homes	
	•Rolling out low carbon heating	
	•Accelerating the shift to low carbon transport	
	Belivering Clean, Smart, Flexible Power	
	Bhancing the benefits and value of our natural resources	
	The Strategy recognises that it is only through innovation that new technologies will be	
	developed and the cost of clean technologies come down.	
Wales		
Wellbeing of Future Generations	The Well-being of Future Generations Act requires public bodies in Wales to think about the	Refer to comprehensive assessment in Business Case
Action 2015	long-term impact of their decisions, to work better with people, communities and each	
	other, and to prevent persistent problems such as poverty, health inequalities and climate	
	change.	
	There are 7 Wellbeing Goals:	
	•A Prosperous Wales	
	•A Resilient Wales	
	•A More Equal Wales	
	•A Healthier Wales	
	•A Wales of Cohesive Communities	
	<ul> <li>■A Wales of Vibrant Culture and Thriving Welsh Language</li> </ul>	
	◆A Globally Responsible Wales	
	The Act also identifies 5 Ways of Working:	
	•Eong Term	
	•lintegration	
	•Involvement	
	•Bollaboration	
	• Prevention	
Prosperity for All	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking	PDM is aligned to a range of priorities articulated within this national strategy. PDM will:
	Wales Forward Programme for Government:	• realise the economic opportunities of Wales' natural resources and deliver towards Wales' decarbonisation targets;
	• Prosperous and Secure	capture opportunities in a new global industry forecast to be worth £76bn by 2050 with a sustainable floating offshore wind sector adding an additional £10bn per year;
	•Bealthy and Active	build national resilience to support future generations;
	•Ambitious and Learning	- contribute to growth and prosperity by creatine additional jobs and GVA:
	•Bnited and Connected	- Unit out to go under any togeter by you certain grounders provided and the advanced agreement with "modern infrastructure is a key enabler of competitiveness and productivity" to deliver a site that minimises productivity losses through the provision of shared, managed facilities and by fostering knowledge sharing in highly productive sectors;
	And based around the 5 Priority Areas of:	outs on the activities the control of the control o
	•Early Years	for growth in boat building to support the marine energy sector, and the nascent aquaculture sector.
	•Housing	
	•Social Care	Pembroke Dock Marine is aligned with all three issues identified as having National Thematic Relevance – Tradable Services: PDM will establish a potential export market for goods and knowledge, High Value Manufacturing – PDM will be an advanced fabrication site with extensive engineering application (from marine
	•Mental Health	energy to ship building); Enables – PDM will deliver the technologies that will benefit Welsh businesses and communities.
	•Skills and Employability	Beyond Thematic Relevance, Pembroke Dock Marine aligns with multiple focus points.
		Decarbonisation - PDM will make a significant contribution to achieving the Welsh Government's target of 70% of electricity consumed in Wales from Welsh renewable sources by 2030, together with locally owned renewable energy capacity in Wales reaching 1 GW by 2030.
		December 2000 and the second and the
Vales Infrastructure Investment		PDM will directly support a central aim of the WIIP which is to support the development of the energy industry in Wales (the industry's importance to Wales is reflected in the WIIP Mid-point Review 2018 (May 2018), which identified that £100m of £RDF has recently been allocated for tidal stream and marine energy
Plan	Government's strategic investment priorities, provides a detailed account of sectoral	projects in Wales) and will use existing resources to create this enhanced infrastructure that has cross-industry application and minimal impact on surrounding civic infrastructure.
	investment plans and sets out the key elements of a new approach to infrastructure	
	investment. The Plan identifies the following investment priorities:	
	Improving transport networks, in particular east-west links in North and South Wales.	
	Improving transport networks, in particular east-west links in North and South Wales.     Improving telecommunications networks.	
	Supporting the development of the energy industry in Wales.	
	Supporting the development of the energy industry in Wales.     Investing in housing.	
	Supporting the development of the energy industry in Wales.     Investing in housing.     Delivering more efficient and economical public services.	
	Supporting the development of the energy industry in Wales.     Investing in housing.	

Innovation Strategy for Wales	This Strategy seeks to promote, encourage and enable innovation across the whole economy, with clear priorities identified and built on the acknowledged strengths of Wales. The Strategy is based around action across 5 main themes: • improving collaboration • promoting a culture of innovation	Innovation Wales identifies some key themes where Wales needs to improve its innovation performance, and PDM will help to deliver these themes as follows:  - Improving collaboration PDM is itself a collaboration, and MEECE's whole business model embraces the ethos of collaboration, and indeed must embrace collaboration as a main innovation delivery mechanism.  - Promoting a culture of innovation ORE Cataput is the UK's flagship technology innovation and research centre for advancing wind, wave and ideal energy. Through MEECE, Cataput will bring its experience in promoting and capturing innovation to Pembrokeshire and Wales, leveraging that experience by using META's and, if fault, PDT's unique facilities to trial, demonstrate and validate those innovations.  - Providing flexible support and finance for innovation within MEECE will not be able to offer grants to companies, it can provide innovation support through a number of mechanisms, ranging from de minimus aid (free to the company) to fully collaborative projects where all consortium members share costs and benefits.
	providing flexible support and finance for innovation (in partnership with Welsh Government)     innovation in Government	<ul> <li>Prioritising and creating critical mass Under this theme, Innovation Wales recommends that Welsh Government investment should be prioritised around existing or emerging capabilities. PDM meets this criterion, as it builds on proven capabilities in Pembroke Dock, proven capabilities in the development and operation of a world leading test facility by Wave Hub Ltd. and the previous academic expertise developed through the Low Carbon Research Institute (LCIN).</li> <li>Innovation Wales identifies some key themes where Wales needs to improve its innovation performance, and PDM will help to deliver these themes as follows:</li> </ul>
	innovation in covernment     prioritising and creating critical mass	innovation wates loentines some key fremes where waste needs so improve its innovation performance, and PUM will nelp to deliver these tenenes is stolows:  - Improving collaboration POM is tisted a collaboration, and MEECE's whole these tissness model embraces the tensor of collaboration, and indicated must embrace collaboration as a main innovation delivery mechanism.  - Promoting a culture of innovation ORE Catapult is the UK's flagship technology innovation and research centre for advancing wind, wave and tidal embrace collaboration, and interest in the company in th
Energy Wales: A Low Carbon Transition		• Lead the drive to develop a competitive marine energy sector in Walles. PDIM will support this drive by providing essential port infrastructure, test and demonstration facilities and innovation support. • Identify strategic sites for wave and tidal stream developments and the wider actions that will be needed to support them. Moriais and PDZ have been identified as Demonstration Zones for tidal and wave respectively. PDM will be part of the 'wider actions' that support them.
	and provide businesses with clarity and stability.	• Work with The Crown Estate and industry to bring forward a marine energy leasing round for Webh waters as soon as possible. This has been achieved through The Crown Estate leases for Morfals and PDZ. PDM will support both Demonstration Zones.  • Provide robust and timely information and guidance to the emerging marine renewable energy sector on the nature of the opportunities in Webh waters. PDM will support the sector in realising these opportunities.  • Work with partners to promote Wales as a centre for marine renewables. MEW and PoMH are already key partners in such promotion, and the addition of META, PDZ and MEECE will strengthen this message.  • Investigate mechanisms for advancing the deployment of marine energy arrays. The PDZ is a strategic site that has been identified for wave energy array demonstrations and leased as such by the Crown Estate. PDM will support the sector in developing their device technologies to a level where array deployments in PDZ
	<ul> <li>Engage the UK Government to ensure that there is a credible framework for capital investment to support the transition to a low carbon economy, that the market mechanisms proposed by the Electricity Market Reform are implemented with greater clarity and speed and that they address current inequalities.</li> <li>Support our vital energy intensive industries in the transition to a low carbon economy, engaging the UK Government to ensure that during transition there is clarity on and</li> </ul>	become feasible. PDZ itself could enable deployment of marine energy arrays to the order of tens of megawatts.
Securing Wales Future	identified as vital for Wales as the UK transitions away from being a member of the	
Energy Policy Statement: A Low Carbon Revolution	The Policy Statement outlines the Weish Governments Main Actions in the drive towards energy efficiency and low carbon energy. These Actions are seen seen seen seen seen seen seen se	Pembroke Dock Marine directly encourages the establishment of new renewable energy industries that will reduce greenhouse gas emissions and promote sustainable economic growth.
Economic Prioritisation Framework	The EPF recognises that EU funds are only one piece of the overall investment jigsaw across Wales and it points the way to joining up the pieces. In doing so, it assists both WEFO and potential beneficiaries in determining how to target the activities set out within the Welsh Operational Programmer, programming documents. The EPF will help identify the opportunities and investments in a geographical or specific thematic area. Operations seeking EU funding support will be expected to describe how they can contribute to, interact with or complement relevant opportunities or investments in ways which can add value and provide wider benefits. It details the programmes and initiatives being developed and delivered in the South West Wales area.	development built around displacement - these are new facilities that will ad to the current LK marine energy proposition and allow the industry to benefit for gains in innovation and operational efficiencies.  The new industrial growth will be supported by Pembrokeshire's extensive engineering supply chain. Originally grown around the oil and gas industry, the supply chain has been increasingly pressured with refinery closures. PDM will support supply chain resilience and, in doing so, will ensure a robust and reliable supply chain continues to be available for Valero. It will create high skill, year-round jobs for both the current and future employment markets. Marine energy specifically has significant focus on the STEM skill base. Beyond the dedicated marine energy jobs, a wider cross-section of skills will be created in the supporting supply chain. Pembroke Dock Marine has two key aims – to enhance operational efficiency (driving industrial costs down) and enhanced innovation. The creation of MEECE will focus on increasing collaboration to support innovation and ultimately creating Pembrokeshire based intellectual property.

Wales National Marine Plan		
	The Plan has an overarching aim to support the sustainable development of the Welsh	PDM will assist in achieving the objectives of the Marine Plan by providing pre-consented test areas for marine energy device testing in close proximity to the Strategic Resource Areas.
	marine area by contributing across Wales' well-being goals, supporting the Sustainable	
	Management of Natural Resources (SMNR) through decision making and by taking account	
	of the cumulative effects of all uses of the marine environment.	
	Objectives:	
	•Bontribute to a thriving Welsh economy by encouraging economically productive activities	
	and profitable and sustainable businesses that create long term employment at all skill	
	levels.	
	•Support the opportunity to sustainably develop marine renewable energy resources with	
	the right development in the right place, helping to achieve the UK's energy security and	
	carbon reduction objectives, whilst fully considering other's interests, and ecosystem	
	resilience.	
	•Brovide space to support existing and future economic activity through managing multiple	
	uses, encouraging the coexistence of compatible activities, the mitigation of conflicts	
	between users and, where possible, by reducing the displacement of existing activities.	
	•Recognise the significant value of coastal tourism and recreation to the Welsh economy and	
	well-being and ensure such activity and potential for future growth are appropriately	
	safeguarded. Ensuring a strong, healthy and just society	
	•Contribute to supporting the development of vibrant, more equitable, culturally and	
	linguistically distinct, cohesive and resilient coastal communities.	
	•Support enjoyment and stewardship of our coasts and seas and their resources by	
	encouraging equitable and safe access to a resilient marine environment, whilst protecting	
	and promoting valuable landscapes, seascapes and historic assets.	
	Improve understanding and enable action supporting climate change adaptation and	
	mitigation. Living within environmental limits	
	•Support the achievement and maintenance of Good Environmental Status (GES) and Good	
	Ecological Status (GeS).	
	•Brotect, conserve, restore and enhance marine biodiversity to halt and reverse its decline	
Innovation Wales		Improving collaboration: PDM is itself a collaboration, and MEECE's whole business model embraces the ethos of collaboration, and indeed must embrace collaboration as a main innovation delivery mechanism.
		Promoting a culture of innovation: ORE Catapult is the UK's flagship technology innovation and research centre for advancing wind, wave and tidal energy. Through MEECE, Catapult will bring its experience in promoting and capturing innovation to Pembrokeshire and Wales, leveraging that experience by using META's and,
		Founding a color or increased. Once apply to all to a reagaing technology introduced and reagaing technology in the re
		Providing flexible support and finance for innovation: While MEECE will not be able to offer grants to companies, it can provide innovation support through a number of mechanisms, ranging from de minimus aid (free to the company) to fully collaborative projects where all consortium members share costs and benefits.
		Prioritising and creating critical mass: Under this theme, Innovation Wales recommends that Welsh Government investment should be prioritised around existing or emerging capabilities. PDM meets this criterion, as it builds on proven capabilities in Pembroke Dock, proven capabilities in the development and operation of
		a world leading test facility by Wave Hub Ltd. and the previous academic expertise developed through the Low Carbon Research Institute (LCRI).

Knowledge Economy and Innovation As part of their WEFO-funding application processes, MEECE, META and PDZ all underwent 'regional proofing' by the Swansea Bay City Region, which has subsequently written letters of support for all three operations.  4. Business Growth, Retention 8. Specialisation PDM will directly support the transition to a low Carbon Economy as identified as one of the three Grand Challenge Areas in the Welsh Smart Specialisation Strategy. In addition, by providing diversification opportunities for those supply chain companies that support the pre-existing, onsite Oil & Gas and Offshore Engineering sectors, PDM will help retain existing jobs in and around Pembroke Dock, and the wider region. A successful marine energy industry would also generate very significant Business Growth, since the sector is currently in its infancy. The potential for the region to capture these high growth companies will be enhanced by the innovation support and relationships building that MEECE and META will offer, and the enhanced facilities that the infrastructure upgrades at Pembroke Dock will provide — and their ability to attract multi maritime sector opportunities.  5. Skilled & Ambitious for long-term success An Operational Aim requires higher education provision 'that is fully aligned to and shaped by the needs of employers and the key knowledge-based growth sectors'. Through ORE Cataputt, MEECE will be able to bring insights concerning future industry needs, in marine energy and offshore wind, and promote these to colleges and training organisations. A key activity for MEECE will be to explore device developers' future technology needs, and these can be translated back to the supply chain to inform them of their future training needs. Early determination of future training needs will enable the supply chain to upskill in parallel with the commercial development of the marine energy sector. Having the right workforce in place at the right time, in the right place will maximise the region's ability to captu

The potential for the region to capture these help for worth companies will be enhanced by the innovation support and relationship-building that MEECE and META will offer, and the enhanced facilities that the infrastructure upgrades at Pembroke Dock will provide – and their ability to attract multi maritime sector opportunities.  5. Skilled & Ambitions for operations in the strategy of the provides of
Operational Programme	The Programme details the plan to invest EU ERDF funds to help social and economic growth in West Wales and the Valleys.  The Policy recognises that Wales' natural resources underpin well-being including prosperity, health, culture and identity. The Policy identifies the following headline opportunities:  Supporting successful, sustainable communities;  Supporting successful, sustainable communities;  Supporting aurore growth and innovation to create sustainable jobs;  Supporting a more resource efficient economy; and,  Maintaining healthy, active and connected communities.  The following National Priorities are also identified:  Delivering nature-based solutions;	3. Knowledge Economy and Innovation As part of their WEFO-funding application processes, MEECE, META and PDZ all underwent 'regional proofing' by the Swansea Bay City Region, which has subsequently written letters of support for all three operations.  4. Business Growth, Retention 8. Specialisation PDM will idercity support the transition to a Low Carbon Economy as identified as one of the three Grand Chillenge Areas in the Webth Smart Specialisation Strategy, in addition, by providing diversification opportunities for those supply chain companies that support the pre-existing, onsite Oil & Gas and Offshore Engineering sectors, PDM will help or retain existing jobs in and around Pembroke Dock, and the winder region. As uscessful marine energity vould also generate very significant subsesses. Growth, store the sector is currently in its infancy. The potential for the region to capture these help for worth companies will be enhanced by the innovation support and relationship-building that MEECE and META will offer, and the enhanced facilities that the infrastructure upgrades at Pembroke Dock will provide – and their ability to attract multi maritime sector opportunities.  5. Skilled & Ambitions for operations in the strategy of the provides of
Operational Programme	The Programme details the plan to invest EU ERDF funds to help social and economic growth in West Wales and the Valleys.  The Policy recognises that Wales' natural resources underpin well-being including prosperity, health, culture and identity. The Policy identifies the following headline opportunities:  *Supporting successful, sustainable communities;  *Promoting green growth and innovation to create sustainable jobs;  *Supporting and resources difficient economy, and,  *Maintaining healthy, active and connected communities.	3. Knowledge Economy and Innovation As part of their WEFO-funding application processes, MEECE, META and PDZ all underwent 'regional proofing' by the Swansea Bay City Region, which has subsequently written letters of support for all three operations.  4. # Supporting Innovation and Low Carbon Growth - Draft OBC Nov 20 Strategic Alignment

	Strategie Aligimient	
Strategy / Policy	Core Principles	How the Project Aligns
ИК		
Industrial Strategy 2017	UK Government long term strategy to boost productivity through the creation of jobs and by increasing the earning power of people throughout the UK with investment in skills, industries and infrastructure. The strategy is supported through 5 Foundations of:  • Rieas: the world's most innovative economy  • People: good jobs and greater earning power for all  • Birfrastructure: a major upgrade to the UK's infrastructure  • Business Environment: the best place to start and grow a business  • Places: prosperous communities across the UK.  The Strategy also recognises the Grand Challenges of  • Artificial Intelligence and data  • Ageing society  • Clean growth  • Euture of mobility	Enhance competitiveness of regional economy by creating a knowledge ecosystem with suitable infrastructure to drive growth     Innovation in decarbonisation, energy generation and use, construction techniques and air quality improvement     Strengthen regional economic base through supporting critical industries, while diversifying and developing supplementary industries to reduce reliance on existing manufacturing base     Use of hydrogen as a clean fuel will accelerate the growth of the green economy     Increasing productivity and helping to close the GVA gap between the region and the rest of Wales and between Wales and the rest of the UK     Providing capacity for innovation to support regional and UK industrial base     Encouraging creation of new businesses to capitalize on the research and development in the region     Improving the retention and attraction of University graduates and academics within the area     Working with partners across the UK, developing a knowledge economy in the region     Highly complementary to projects already funded such as the Cardiff University Flexis project, further enhancing innovation and industrial collaboration across the region
Climate Change Act	The UK's emissions targets were revised in 2019 to be net zero greenhouse gases by 2050. The Committee on Climate Change's 2018 progress report to Parliament, Reducing UK Emissions, outlined four messages to Government to get emissions reductions on track. It identified the need to 'Act now to keep long-term actions open' and specifically referenced floating wind a type of emerging technology that could offer cost reduced low carbon energy generation. This will be a critical step in ensuring the need is met for a diverse portfolio of low carbon technology that will meet the increasing electricity demands towards 2050 as stated in the report.	The Climate Change Act is the basis for the UK's approach to committing the Government to reduce emissions by at least 80% of 1990 levels by 2050, with 5 yearly interim targets.  The SILCG is aligned to this Act by transitioning to a low carbon economy.
Clean Air Strategy	The Clean Air Strategy details the Government's approach to tackle all sources of air pollution, making air healthier to breathe, protecting nature and boosting the economy. The Strategy is to deliver it's objectives through the following priority actions:  •Securing clean growth and innovation  •Action to reduce emissions from transport  •Action to reduce emissions at home  •Action to reduce emissions from farming  •Action to reduce emissions from industry  •Eeadership at all levels	The DEFRA Clean Air Strategy sets out the comprehensive actions required across all parts of government and society to improve air quality.  The SILCG programme is aligned to this strategy as it will support reduction in emissions from industry and transport and monitor air quality.

Clean Growth Strategy	through the 2020s. It explains how the whole country can benefit from low carbon opportunities, while meeting national and international commitments to tackle climate change.  The strategy sets out a comprehensive set of policies and proposals that aim to accelerate the pace of 'clean growth', i.e. deliver increased economic growth and decreased emissions.  •Accelerating clean growth  •Improving business and industry efficiency	SILCG is aligned to the aim of clean growth i.e. economic growth while reducing greenhouse gases.  •@ecarbonising all sectors of the UK economy through the 2020s  •The SILCG will support low carbon industries  •The SILCG will support the BEIS ambition to accelerate the commercialisation of clean energy technologies and investment in smart energy systems.
	<ul> <li>Emproving the energy efficiency of our homes</li> <li>Bolling out low carbon heating</li> <li>Accelerating the shift to low carbon transport</li> <li>Delivering Clean, Smart, Flexible Power</li> <li>Enhancing the benefits and value of our natural resources</li> <li>The Strategy recognises that it is only through innovation that new technologies will be developed and the cost of clean technologies come down.</li> </ul>	
Clean Air Plan for Wales Consultation		• Focus on identifying sources of PM10s and hence identify corrective actions
Commercial Property: Market Analysis and Potential Interventions	To inform the new Property Delivery Plan, the report sets out an analysis of the Welsh commercial property market, including current and likely demand, property market responses and the extent to which there is a gap in supply. It also considers potential priorities for, and approaches to, intervention. In line with the Welsh Government's regional approach to economic development, it outlines the priorities for intervention within South East Wales, South West and Mid Wales and North Wales.  The report contains an analysis of the property market for South West and Mid Wales.	Creation of this space will support indigenous business and encourage inward investment through delivering a modern, attractive and suitable infrastructure for innovative development

Ten Point Plan for a Green Industrial Revolution	The Government's Ten Point Plan lays the foundations for a Green Industrial Revolution. The Plan supports the creation of jobs and economic growth around the green economy through the following sectors and activities:  • Advancing Offshore Wind  • Driving the Growth of Low Carbon Hydrogen  • Delivering New and Advanced Nuclear Power  • Accelerating the Shift to Zero Emission Vehicles  • Green Public Transport, Cycling and Walking  • Let Zero and Green Ships  • Greener Buildings  • Envesting in Carbon Capture, Usage and Storage  • Protecting Our Natural Environment  • Green Finance and Innovation	SILCG programme is aligned to the aim to 'build back better: to invest in making the UK a global leader in green technologies.  •SILCG will stimulate the growth of low carbon hydrogen  •SILCG will support the ambition to the shift to zero emission vehicles  •SILCG will construct greener buildings  •SILCG will support green innovation  •Port Talbot is identified in the plan as one of the places in the UK pioneering the decarbonisation of transport industry and power
Road to Zero	Paransition to zero emission road transport.     Reduction in emissions from conventional vehicles	The Road to Zero Strategy outlines the mission to put the UK at the forefront of the design and manufacture of zero emission vehicles.  •The target is for all new cars and vans to be zero emission by 2040.  •The also aims to reduce emissions from conventional vehicles during the transition.  •The SILCG programme aligns to this as it will develop a regional LEV strategy and coordinate funding opportunities / charging points activity to increase the number of charge points in the region.  •The strategy states that the UK is well placed to be a global leader in hydrogen and fuel cell powered transportation which aligns to the SILCG programme
UK Levelling Up White Paper	UK Government programme to level up the UK to transform places and boost local growth through strong innovation and a climate conducive to private sector investment, better skills, improved transport sytems, greater access to culture, stronger pride in place, deeper trust, greater safety and more resilient institutions.	Support economic growth through the private sector Deliver actions to support the UK's transition to Net Zero Support Technological Transformation
Wales		
Wellbeing of Future Generations Action 2015	The Well-being of Future Generations Act requires public bodies in Wales to think about the long-term impact of their decisions, to work better with people, communities and each other, and to prevent persistent problems such as poverty, health inequalities and climate change.  There are 7 Wellbeing Goals:  A Prosperous Wales  A Resilient Wales  A More Equal Wales  A Healthier Wales  A Wales of Cohesive Communities  A Wales of Vibrant Culture and Thriving Welsh Language  A Globally Responsible Wales  The Act also identifies 5 Ways of Working:	Providing high quality jobs and training opportunities, which will lead to improved health, stronger community cohesion and a more vibrant culture  Creating a culture of innovation in the SBCR and diversifying the economic base of the area, through sustainable development aligned to global needs  Anticipated spin-out companies will stimulate further private and public investment in the region  Safeguarding of existing, highly-skilled and well-paid jobs  Creating an attractive region to live and do business in, with opportunities available to all

Prosperity for All	Wales Strategy for prosperity and wellbeing to take forward the 4 key themes of Taking Wales Forward Programme for Government:  • ■ Prosperous and Secure  • ■ ealthy and Active  • ■ mbitious and Learning • ■ nited and Connected  And based around the 5 Priority Areas of:  • ■ Early Years • ■ ousing • ■ Social Care	Creating high-value jobs leading to national prosperity Encourage a robust talent pipeline, benefitting the region through higher wages and lower levels of underemployment Provides a focus for inward investment together with indigenous innovation Providing the right environment for businesses to thrive The project will house state of the art research equipment and will attract top-class talent to the area levering collaboration across the globe Delivering wider benefits to the regional community
Economic Action Plan	The purpose of the Economic Action Plan is to support delivery of Prosperity for All – the national strategy for Wales. The Plan sets out a vision for inclusive growth, built on strong foundations, supercharged industries of the future and productive regions. The Plan focusses on boosting productivity and addressing inequality. The Plan presents Calls to Action on a number of areas including:  •Decarbonisation •Enovation •Enovation •Eligh quality employment and skills development •Research and development	Focus on decarbonisation clearly aligns with key aims     Accelerating low-cost energy generation     Investment in human capital, infrastructure and innovation to address productivity gap     A locus of innovation and research in the Neath Port Talbot region will strengthen the existing local economy and create new sustainable opportunities     Creating quality jobs and delivering industrially relevant training in future-focused technologies and applications will support peopledriven economic growth     Enabling public investment with social purpose, delivering increased value     Supporting public sector to become exemplar and drive green growth
Welsh Government Innovation Wales	This Strategy seeks to promote, encourage and enable innovation across the whole economy, with clear priorities identified and built on the acknowledged strengths of Wales. The Strategy is based around action across 5 main themes:  • improving collaboration  • promoting a culture of innovation  • providing flexible support and finance for innovation (in partnership with Welsh Government)  • innovation in Government  • prioritising and creating critical mass	Leading the way through public sector exemplar investment in a cohesive low carbon strategy for the region     Improved opportunities for supply chain productivity     Innovation in decarbonisation will lead to growth of new company clusters in recycling technology, the circular economy, component manufacture and modular construction     It will also increase the research capacity and capability for the region, paving the way for future growth in other sectors
The Environment (Wales) Act	The Environment (Wales) Act puts in place legislation needed to plan and manage Wales' natural resources in a more proactive, sustainable and joined-up way. It seeks to position Wales as a low carbon, green economy, ready to adapt to the impact of climate change.  Relevant sections of the Act are:	Contribute to emissions reduction by creating solutions for commercialisation that will allow a range of manufacturing sectors to decarbonise     Promote use of renewable energy sources     Develop energy positive construction technologies to reduce emissions from buildings, providing demonstrators to a wider audience
Prosperity for All - A Low Carbon Wales	Key areas of environmental improvement including industry, transport and waste     Driving sustainable growth and modern infrastructure	Creating high value jobs and innovation in clean growth will support the vision of establishing Wales as one of the best places in the world to live, work and do business     Deliver research, infrastructure and solutions that are essential to delivering the rapid change needed to hit ambitious targets     Opportunities to use active building (i.e. energy generating) technologies to pilot a modern construction sector     Efficient use of resources and reuse of brownfield sites

	Consultation document on the Welsh Government's proposals for the future of	• Directly support the plans for clean, green growth with focus on decarbonisation and waste utilisation – setting the foundations for a
framework for action	the manufacturing industry in Wales. The document outlines the proposed	circular economy in a regional eco-system that synergizes benefits and growth
	approach which:	• The cluster expertise in the area will create an ideal location to deliver green innovation through innovators, supply chain, infrastructur
	● ®ncourages greater innovation and headquarter location across Wales	and manufacturers across a range of sectors
	•@rows our export potential	Academic and industrial partnership will offer opportunities to develop specialist learning and training to ensure a long-term talent
	Increases quality employment and skills across Wales	pipeline aimed at attractive, high-quality career opportunities with longevity and resilience
	● Expands the research and development base across Wales	
Clean Air Plan for Wales	Improve air quality for health, nature & prosperity	The plan aims to improve air quality through air quality modelling and real time monitoring to ensure there is a targeted approach. The
Consultation		SILCG is aligned in the following way:
		• The programme will enhance monitoring to better understand how and where impacts on air quality are made;
		• Eocus on identifying sources of PM10s and hence identify corrective actions
Electric Vehicle (EV) charging	Draft strategy for EV charging in Wales	The SILCG is aligned in the following way:
strategy for Wales (consultation)	● ©urrent charging provision in Wales for cars & vans	■Boordinated approach for the region
,	• Euture charging needs	•Mapping current situation, behaviour and future demand in relation to low emission vehicles
		• Aligned to the Wales strategy
Regional Investment for Wales	4 investment priority areas:	The SILCG is aligned in the following way:
RIFW)	•Business productivity & competitiveness	● © reating the right environment for sustainable and inclusive jobs and growth

Swansea Bay City Region Economic Regeneration Strategy	The Economic Regeneration Strategy for Swansea Bay aims to strengthen the economy and boost productivity for the City Region area and sets out the Strategic Framework for intervention through 5 Strategic Aims Strategic Aims:  Business Growth, Retention and Specialisation  Skilled and Ambition for long term success  Maximum job creation for all  Enowledge Economy and Innovation  Distinctive Places and Competitive Infrastructure.	Supporting indigenous industries which are economically critical in terms of GVA and employment Creating the physical and knowledge-based infrastructure to foster and encourage innovative start-ups, providing support to ensure retention and growth of new businesses In particular, support early-stage knowledge-intensive firms through incubation and innovation stages Creating highly skilled and well-paid jobs, developing skills to maximise employment in growth sectors Removing barriers to employment Supporting business as a regional gateway, increasing entrepreneurial culture Through specialised training solutions, deliver a talent pipeline for high-growth sectors Support the 'internet coast' through next-generation digital infrastructure, creating future energy systems, integrating renewable energy with existing asset base and delivering leading-edge research Contribute to the key themes: -embeddedness - existing base of trained labour -relatedness - diversifying existing strengths in the area via the metals industry -connectedness - already established network of steel and metals companies in the area
Regional Economic Framework	Consultation document for the Regional delivery of the Economic Acton Plan for Mid and South West Wales. The approach the Regional economic growth is the four broad priority areas agreed by Welsh Government Cabinet for replacement EU funds, but will also reflect additional regional priorities:  • Reducing income inequalities for people, analysing the factors that create income inequality and reduce disposable and discretional income  • More productive and competitive businesses, including the vital role of innovation and research as well as alternative business models  • The transition to a zero carbon economy, taking advantage of the opportunities this creates as well as reducing negative effects  • Healthier and more sustainable communities, recognising different challenges in different communities and the role of local areas in identifying priorities in their places.	The SILCG programme is aligned in the following way:  *Addressing the areas of weaknesses / threats – will increase productivity, create employment opportunities, provision of low carbon high quality business infrastructure  *Build on the strengths of sectoral strengths in energy, advanced manufacturing and innovation centres.  *The SILCG programme is aligned to the SBCR Regional Delivery Plan as this action plan will focus on diversification, energy and renewables sectors.
