Your Ref:

Date: 25th February 2021

Dear Councillor Jones

Please find below responses to the questions raised in your letter of the 12th January 2021

Q - Castle Square - Members requested a more detailed update on developments since the appointment of the Development Manager.

The Development Manager and the professional team have produced a feasibility study and are recommending a scheme that can be worked up in detail. The proposal is to significantly increase green space, remove the existing fountain and replace with water jets than can be turned off to create more space and include two commercial units of a size that can be split into 4 units subject to market interest. Cabinet on the 18th February approved funding of work up costs to take the design forward, at the same time the capital cost will be worked up and opportunities for grants and other funding options will be explored.

Q - Greater clarity sought on what constitutes local labour and how exactly the figures in the previous response letter reflect Swansea's workforce.

I attach the latest BBM figures which set out the impacts on Swansea and the wider economy, I would refer you to page 4, Local Impacts of the BBM report which answer your question.

In addition a "Meet The Buyer" event is to be held and will be targeted towards the contractors that can deliver the specific packages below:

Mechanical & Electrical Building Envelope Internal Fit Out & Finishes

Meet The Buyer for Swansea Central Phase 1 Date: Wednesday 11th March 2020 9am-1pm

Venue: Construction Wales Innovation Centre (CWIC), UWTSD, SA1

Page 2

Contractors will be able to book themselves onto 15 minute appointment slots through the Sell2Wales website. A press release has been issued.

Q - Drone (video) footage of the Arena is yet to be provided in place of a site tour, although aerial photographs have been shared with the Panel.

Please see links to Arena drone footage of construction May 2020 https://youtu.be/t4qixbINUGI

Arena - Drone footage of construction - June 2020: https://youtu.be/RgzxlNfG208
Arena - Drone footage of construction - September 2020:

https://youtu.be/YQxHAwykhVE

Q - Further update on the marketing of Felindre to be provided to future meeting.

I attach latest market information and end of year review from our agents which was produced at the end of last December. They have provided a market review document and a website analytical report and have also created a new marketing strategy for 2021 going forward.

Q - The Panel request details of organisations that have shown an interest in locating to Central Swansea.

The Arena project has a range of commercial opportunities as well as the Arena where we selected ATG as tenant for that space. In addition there is a Café in the new coastal park, a large restaurant below the residential unit on the ramp with views of the arena façade together with five units on the ramp and a further unit as part of the church hall building.

A letting strategy has been prepared which recognises the benefits of the circular economy and therefore we have focused on local businesses to occupy the various spaces. The opportunity has been widely marketed and we have seen significant interest from local businesses. A number of detailed discussions are ongoing which are commercially confidential and names cannot therefore be released at this time. What I can say is that the interest we have received has been really positive and once tenants are signed we can release names.

Yours sincerely

Y CYNGHORYDD/COUNCILLOR ROB STEWART ARWEINYDD/LEADER

Parc Felindre: Marketing Strategy

	Activity so far	Strategy moving forward
Brochure	A bespoke brochure was created in print and electronic format and circulated to the market	 Update the brochure to include some CGI's of the potential for the site Incorporate professional shots of the DPD unit within an interactive element of the brochure Embedded use of the website within the brochure Recirculation of updated brochure electronically to the market
Website, Press releases and mailers	A bespoke website has been created and is managed by Litchfield Morris — enquiries can be made through the website. Litchfield Morris add 'thought pieces' and news articles to the website which are also fed through to the various social media platforms.	 Website to be updated, incorporating new marketing materials and featuring photography of the DPD unit and CGI's of potential for the site JLL and Bruton Knowles to liaise with Andy Pearson of Swansea Council to ensure all noteworthy items are being included within the 'news' function on the website and associated social media platforms At present, only 1 article per 3 / 4 months is being shared on the website. This to be increased to at least monthly to encourage further engagement In January, JLL and Bruton Knowles to liaise with Litchfield Morris in creating an editorial 'thought piece' as a press release on the site – to also be published on the website Any relevant news on the site to be reported via a press release and shared with the market on social media platforms and bespoke electronic mailers containing links back to the website and marketing information Bespoke mailers to be used to target occupiers within the favoured sectors within the 'vision' of the site
Marketing boards	In November, bespoke marketing boards in Welsh and English were erected at the entrance to the site and at a vantage point to the site, incorporating the bespoke scheme branding.	For now, JLL and Bruton Knowles feel the signage erected is sufficient.
Social media usage	At present the social media platforms are managed by Litchfield Morris: - Facebook - Instagram - Twitter When news articles are added to the website, they are fed through also to the 3 social media platforms with links to drive traffic back to the website. Earlier in the year JLL was given access to the twitter account to follow 'target occupiers' and 'target sectors'.	 The use of all 3 social media platforms to be increased. At present there is only 1 post per 3 – 4 months. JLL and Bruton Knowles, as above, will engage with Litchfield Morris, to provide content that will be shared on the website and social media platforms, at least once per month. Social media platforms to be used to retweet/ re share content from accounts such as Welsh Government, Swansea Council etc in an attempt to increase engagement across the platforms. Increasing the use of hashtags across all social media platforms to enable the

Parc Felindre: Marketing Strategy

		 content to be picked up through users searching key terms such as #sustainability Continuing to target following relevant users in the target sectors for the site to drive up the followers across the platform. At present the Instagram was created in May 2019, has 10 posts and 0 followers. As Instagram is a visual platform, JLL and Bruton Knowles will share images from site with Litchfield Morris to be shared more frequently on the Instagram grid to increase user engagement and activity on the page. JLL and Bruton Knowles to engage with Litchfield Morris on the potential for 'sponsored posts' to push content on to the screens of those users who have searched key terms we believe are relevant for the site and target occupiers.
Links with Universities	It has been agreed that it would be extremely beneficial to form a relationship with the local Universities	JLL and Bruton Knowles to liaise on creating an 'information pack' on the site which can be used as almost a pitch document to share with local universities and to lead the conversations introducing the site to local Universities
Exposure at future conferences and events		Client contacts to utilise existing internal relationships to ensure the site is as widely recognised as possible. To explore the opportunity to showcase the site at events such as MIPIM 2021 via the Swansea City Region and Welsh Government Inward Investment.
Funding Options		 Investigation of what funding methods are available to the site Creating clear pathways for alternative funding methods for occupiers to achieve design and build Methods of gap funding to support the difference in end value and build
Speculative Development		 Investigate the option of speculative construction Type / design of a possible speculative development What would the market require – be led by occupier interest Linked to above – method of funding such an option

One of the most significant development opportunities in South Wales A motorway connected business park at the heart of the Swansea Bay City Region

unrivalled connectivity

Parc Felindre is in the Swansea Bay City Region and offers huge potential to create a live/work destination of regional, national and international significance, offering considerable job creation opportunities for Wales.

Businesses benefit from Swansea's connectivity. The city is a crucible for new ideas, scientific research and business development – home to the Institute of Sustainable Design, two universities and key industries reflecting their specialist subjects.

Parc Felindre Swansea SA5 7LU

development

Parc Felindre is a public sector backed business park focussing on emerging industries such as high tech manufacturing and high level uses, together with ancillary uses where complementary, and parking. Potential floor space of up to 80,065 sq m (862,000 sq ft) can be provided on 16 ha (40 acres) net. The business park is allocated in the adopted LDP for B1 & B2 uses.

connectivity

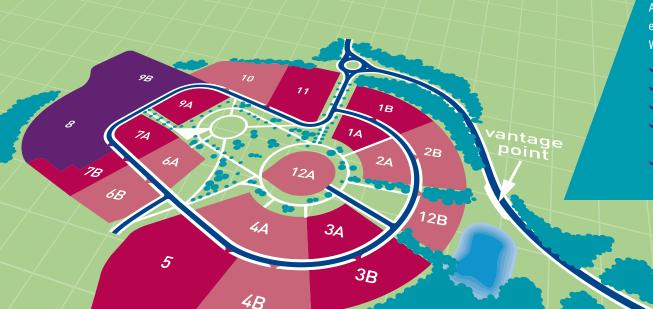

Parc Felindre Business Park has access to more than one telecommunications network operator, who can provide enterprise class connectivity with resilience and failover options. Further information available on request.

terms

Serviced plots are available to purchase on a long leasehold basis. Plots can be amalgamated. Alternatively, there is potential for the delivery of bespoke buildings by way of a 'design & build' package.

parcfelindre.co.uk

an outstanding opportunity

A business destination of regional and national importance, providing a quality environment for business development and employment opportunities for South Wales, with:

- a modern business park environment in the heart of the Swansea Bay City Region
- → a new development site providing 16 ha (40 acres) of net developable land
- immediate availability
- opportunities for bespoke design, flexible construction, quality plot landscaping within the context of the Felindre Development Framework
- potential financial and business support may be available, further details on request.

accommodation

by road

Parc Felindre is located at Junction 46 of the M4 motorway, which provides easy access via the M4 corridor to the major cities of London, Bristol and Reading to the east, Exeter, Plymouth and Southampton to the south, and via the M5 motorway, to Birmingham and Manchester further north.

by rail

Fast and frequent inter-city train services link major UK cities to Swansea with a travel time of around three hours to the centre of London. The Eurostar network connects Paris, Lille and Brussels directly with London St Pancras International, then via Underground or taxi to London Paddington for onward train to Swansea.

by air

There are fast rail/air links to Swansea from London (Gatwick and Heathrow).

Bristol and Cardiff International Airports (less than an hour's drive), also offer internal, European and international flights. www.cardiff-airport.com www.bristolairport.co.uk

CSR

Fundraising

As a large construction organisation we pride ourselves in working with the community. We frequently employ through local social enterprises and contribute both time and financially towards chosen charities in local areas to our sites.

In Swansea we have chosen to support Thrive Women's Aid as our charity throughout the life of the project and any funding, donations etc. raised throughout the project will be given to this charity.

On the Swansea Central site we employ people from Thrive Women's Aid, for a number of roles and we are currently considering the possibility of daily delivery of food to site that will further contribute to https://thrivewomensaid.org.uk/

Having spoken with the charity it was noted that their biggest outlay was for toiletries in the refuge when new families flee domestic violence. Throughout December the CSR Manager liaised with all our sub-contractors to raise money by setting up a raffle. Most of our sub-contractors donated prizes for our raffle, toiletries for their refuge or cash donations for use by the charity as they see fit. Our workforce, alongside some of our sub-contractor workforce donated toiletries and cash and we successfully raised £1303.00 alongside 6 starter packs for women and children needing to be housed at the refuge.

The raffle had some luxurious prizes and many outside organisations decided to participate by buying raffle tickets. https://www.facebook.com/watch/?v=588548328589894. Please use the link to see our handover of the charity monies to Thrive.

Swansea Arena

Skills & Employment Plan – December 2019

Ownership and responsibility of the plan

Buckingham Group Contracting Limited own the Skills and Employment plan and are responsible for ensuring that the outputs are delivered.

Monitoring

Tim Wood and/or Sue Jones from Buckingham Group Contracting Limited continue to meet with a representative from Swansea City Council on a 4-week basis to monitor progress of the plan and discuss any issues as they arise in order to find appropriate solutions asap.

A labour return and dashboard indicating number of people on site, number of local (postcode SA1 – SA7) people and number of people with CSCS cards on site will be produced and shared at the monitoring meetings.

1 Employment Opportunities

Buckingham Group Contracting Limited continues to promote appropriate employment opportunities with local agencies including the Swansea City Council's Beyond Bricks and Mortar team. Furthermore, in order to fulfil the TR&T requirements (i.e. 4325 weeks of which 3027 must be new entrants) all opportunities will be directed to BB&M in the first instance and BBM will advertise widely to their network of providers. To achieve the target, sub-contractors will be mandated to use BBM to fill their vacancies and other training opportunities. An ITT for CSR form is completed and issued to every packaged to ensure all sub-contractors work towards the goal of employing locally.

2 Apprenticeships

Use of the Cyfle shared apprenticeship scheme is encouraged but those can only be counted for the duration they remain on site, however, BBM also encourage the appointment of new apprentices to work directly with BGCL or sub-contractors i.e. they can be counted for 104 weeks each even if they do not stay on site for the entire 2 years. We currently have 2 apprentice engineers in the office and 1 x under graduate quantity surveyor.

3 Meet the Buyer

Event no. 2 is now scheduled 11th March 2020 due to the delay in start dates. This one will focus more specifically on the mechanical and electrical, Tier 2 and 3 sub-contractors an internal fit out trade contractors including related suppliers. Our meeting is scheduled for 10th January to prepare for this.

The schedule of attendees with their designations:

- Sub-Contractor
- Sub-Contractor @ Tier 2 and 3
- Suppliers

This was highlighted to interested parties at the Wales Construction Show and suitable trades from those will be invited with allocated times. It will be held in the CWIC building on SA1.

4 Workforce Development

Buckingham Group Contracting Limited will encourage appropriate workforce development with sub-contractors. All documentation for sub-contractor commitment has now been set up and is being completed at all pre-let meetings. Since our last report the labourer who was on crutches has recovered and is working on the North site along with a 2nd who works lesser hours due to family commitments. We have arranged for a new gate person to start early January. We will attend a jobs fair with Workways+ 5th February. Also see Education.

Community Engagement

Buckingham Group Contracting Limited will support local community and voluntary groups within the vicinity of the development. Buckingham Group Contracting Limited continue to meet with City Council's Community Development Service (lee.wyndham@swansea.gov.uk) to develop ideas and link into opportunities. For developments that can offer financial support, the Community Development Service will establish a bespoke grant fund.

Our chosen charity event was held throughout December where our workforce ALL contributed with cash or toiletries so that we could buy toiletries for the refuge run by Thrive Women's Aid. Many of our sub-contractors donated cash or prizes towards a raffle that was drawn on 19th December 2019. A total sum of £1303.00 was raised along with 6 x starter packs of toiletries for families fleeing domestic violence. A selection of new baby clothes was donated and ladies' coats in various sizes.

Our CSR continues to liaise with neighbours regarding the work being carried out. Now that the hoarding has been erected, a notice board with CGIs of the work and information regarding current work will be placed at the North and South entrances to site.

5 Work Experience

Buckingham Group Contracting Limited has offered work experience opportunities to Civil Engineers who are studying at Swansea University. During January will be interviewing for graduate positions and internships UK wide from the applicants following our presentation evening held in November 19. Work experience is available to those wishing to have an insight into working with management in construction on a regular basis. Buckingham Group ensure worthwhile work experience as all teams are required to set appropriate tasks for individuals to occupy their time whilst with us. Careers Wales have requested work experience for 12 weeks for a school pupil in year 11. We are currently setting up all health and safety for the individual who will attend site 1 x day per week. This will commence in February once our Health and Safety have agreed our risk management plan.

6 Future Works Packages

See updated stakeholder engagement plan.

7 Education Engagement

On 9th December 2019 Civil Engineer and quantity survey students from UWTSD visited site. Following a site induction, they had a site tour where and the opportunity to speak with several of our workforce on site to learn first-hand about work currently being carried out on Swansea Central. Half of the students were full time and half were working with contractors while studying. There was a marked difference in the general awareness of sitework between both. Students working on sites had a far broader knowledge than those in education 100% of their time.

CSR will be working with Careers Wales in the New Year at Pentrehafod School and have received a request from St Helen's Primary School. We will establish what we can offer and support both schools throughout the life of the project. A request to also work with a Welsh Medium School has been received, however, this has not progressed as we have not received any further details. Once this has been confirmed we will populate our stakeholder engagement plan with events, visits, lessons, assemblies etc. and this will conclude the number of establishments we can support - to include:

- Swansea University site visits, events, work experience, internships, graduate applications to work with Buckingham Group, offer of employment for the right candidates
- UTWSD as above
- Gower College as above
- Coleg Sir Gar as above
- NPTC as above
- Pentrehafod Comprehensive School Business Class, see stakeholder engagement
- St Helen's Primary School assemblies, lessons, site visits, competitions
- Welsh School tbc. As Pentrehafod on a smaller scale
